The consideration to authorize City Manager to sign U.S. Geological Survey application to name a creek in West Asheville "Penland Creek."

As part of their "Name that Creek" program, Riverlink recently performed a community engagement process to gather nominations and identify a preferred name for the short creek that runs along Waynesville Avenue in West Asheville, through the New Belgium Brewing site, and into the French Broad River. This is the same creek that will receive a stream restoration treatment as part of the partnership with RiverLink and the Clean Water Management Trust Fund for Craven Street Improvements.

The community chose the name "Penland Creek" in honor of the Penland family businesses that contributed to the West Asheville and the riverfront's cultural and economic development starting in the 1950's. The Penland family was then contacted to insure that there were no objections to using their name in this manner.

In order to complete the application to the United States Geological Naming Convention form to name this water body "Penland Creek", a local government official must sign the form to demonstrate support and to certify that the naming process followed U.S. Geological Survey (USGS) guidelines. This is a consideration for Council to support that USGS process and authorize the City Manager to sign the USGS form.

The Asheville Area Riverfront Redevelopment Commission reviewed this request on August 11, 2014, and voted unanimously to approve the following motion: "We advise Council to support the proposed name of "Penland Creek" for the stream in West Asheville flowing through the New Belgium site into the French Broad River." In addition, the Planning and Economic Development Committee reviewed the item at their September 16, 2014, meeting and voiced support for the naming and asked that this item be moved to Council's consent agenda.

Pros:

- Naming of a creek or stream can bring attention to its existence, help identify it as a part of neighborhoods ecosystem, and encourage environmental stewardship that enhances quality of life.
- Supporting this community-driven effort further develops partnerships between groups like RiverLink, EWANA, New Belgium Brewing, RADA and RADBA, and the City of Asheville.

Con:

- None identified.

City staff recommends City Council authorize the City Manager to sign the USGS form to name the creek in West Asheville "Penland Creek."

RESOLUTION BOOK NO. 36 - PAGE 386

D. RESOLUTION NO. 14-233 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH COOPER CONSTRUCTION COMPANY INC. FOR THE VAULT RENEWALS AND ZONE METERING PROJECT

ORDINANCE NO. 4353 - BUDGET AMENDMENT FOR THE VAULT RENEWALS AND ZONE METERING PROJECT

Summary: The consideration of the following items relative to the Vault Renewals and Zone Metering Project ('Project'): (1) resolution authorizing the City Manager to enter into a construction agreement with Cooper Construction Company, Inc., for the bid amount of $1,287,380; (2) contingency amount of $128,738 for a total project budget in the amount of $1,416,118; and (3) budget amendment in the amount of $500,000 to combine two capital projects into one in order to save time and money in the bidding and contract administration process.

The Project consists of all materials, labor, incidentals, and equipment necessary for the installation of zone meter vaults with Supervisory Control and Data Acquisition (SCADA) improvements and appurtenances at multiple job sites located within the City of Asheville's Water System. Additionally, there are improvements to be constructed at multiple customer meter points of service throughout the system. These improvements include vault improvements, vault replacements, meter installations and appurtenances at 40 sites. The zone meter installations will provide critical information for improved water auditing and water loss tracking. The customer vault / meter renewals will improve metering accuracies for some of the system's highest volume consumers and also correct safety issues for workers.

The Water Resources Department (WRD) issued an Advertisement For Bids for the construction project. In response to the Advertisement for Bids, the WRD received one bid on September 9, 2014. Bids were not opened due to formal bidding statues requiring at least three bids for the initial opening. The WRD issued a Re-Advertisement For Bids for the construction project. In response to the Re-Advertisement for Bids, the WRD received two bids on September 23 2014. Companies responding were:

1. Cooper Construction Company, Inc. – Hendersonville, NC
2. Pipeline Utilities, Inc. – Raleigh, NC

Following a review of bids by City staff and the project engineers, Cavanaugh and Associates PA, Cooper Construction Company, Inc., was selected as the lowest responsible, responsive bidder for the bid amount of $1,287,380. A contingency amount of $128,738 has been added for a total project budget in the amount of $1,416,118.

Pros:

- This project will provide critical information for improved water auditing and water loss tracking, improve metering accuracies for some of the system's highest volume consumers and correct safety issues for workers.
- This project is aligned with the City and WRD's goal of continued investment and improvement of the City's water system through Capital Improvement Projects, in order to provide safe and reliable service. It will make our water system more sustainable and efficient.
- Approval of the construction contract to the lowest responsible, responsive bidder will invest City funds in the local economy.

Con:

- Failure to award a construction contract would prevent the completion of this waterline system improvement and goal of continued investment in our infrastructure.

The Water Resources Department currently has $1,266,624 budgeted for this Project. The remaining funds needed for the contract and to combine two capital projects into one project will be transferred from the Pump Station Meters Project. The Pump Station Meters Project was going to be bid as a separate project, but the project engineers advised WRD to combine the projects in order to save time and money in the bidding and contract administration process. The entire balance of $500,000 will be transferred out of the Pump Station Meters Project. In order to transfer the funds, a budget amendment is necessary.

Amount in Meter/Vault Project Budget	$1,266,624
Transfer from Pump Station Meters Project	$ 500,000
Total Meter/Vault Project Budget	$1,766,624
Amount Needed for Construction Contract	$1,416,118
Available Balance in Meter/Vault Project for Future Contracts	$ 350,506

This will leave a balance of $0 in the Pump Station Meters Project, which will be made inactive and closed out.

City staff recommends City Council authorize the following relative to the Vault Renewals and Zone Metering Project: (1) a resolution authorizing the City Manager to enter into a construction agreement with Cooper Construction Company, Inc., for the bid amount of $1,287,380; (2) contingency amount of $128,738 for a total project budget in the amount of $1,416,118; and (3) budget amendment in the amount of $500,000 to combine two capital projects into one in order to save time and money in the bidding and contract administration process.

Mr. Ken Michalove questioned if it is standard operating procedure to adopt budget amendments to the operating and capital budgets from time to time, then why was it not done as it relates to the Pack Place and the Art Museum in the capital budget for 2014 and 2015.

RESOLUTION BOOK NO. 36 - PAGE 387
ORDINANCE NO. 29 - PAGE 251

E. RESOLUTION NO. 14-234 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AMENDMENT TO THE JUST FOLKS AGREEMENT

Summary: The consideration of a resolution authorizing the City Manager to sign an amended Adopt-a-Park Agreement with Just Folks to include a waiver of permit fees in addition to the approved waiver for park use fees for Triangle Park for Fiscal Year (FY) 2014-2015.

Just Folks is a local non-profit organization whose primary purpose is to support community-building activities in the Eagle/Market Street area known as "The Block". On May 27, 2014, City Council approved a resolution authorizing the City Manager to sign an Adopt-a-Park Agreement with Just Folks that included a waiver of park use fees of up to $2,500. The waiver has made it possible for them to produce events that activate Triangle Park by providing a variety of positive activities including music festivals, community cookouts and other community-building events in the Park May to December on Saturdays and Sundays. These events have activated the area for more positive uses which has resulted in this area being frequented by a more diverse group of city residents and visitors.

Since May 2014, Just Folks has expanded the activities included in their events so tents and food preparation are required in the park. This in turn has necessitated additional permit fees for tent use and operational fire purposes. The City Legal Department and the Special Events/Economic Development Specialist recommend amending the original agreement to include permit fees in order to make it possible for Just Folks to produce their events as planned for this fiscal year. The additional permitting fees are minimal and can still be covered by the original fee waiver amount of $2,500.

The presence of Just Folks members and their programming in the park continues to contribute to the reduction of nuisance behaviors in and around the park and an improved appearance for the park. Over the past three years, its efforts have made the park safer and more attractive to downtown visitors and community members and helped the city meet specific City Council goals for economic and community development.

As a result, staff requests that the Adopt-a-Park agreement with Just Folks be amended for FY 2014-2015, to waive permit fees for its events in Triangle Park in an amount up to the previously approved $2,500.

Pros:

- Strategic partnerships allow the city to leverage programming and events to reach a wider and more diverse audience.
- Provides additional quality cultural programming and diversity in a park that is generally not used for this type of event.
- Reduces staff time in processing fee wavier requests related to this group's events.
- This action is consistent with other partnerships the City has entered into for park programming in key community development areas.

Con:

- The inclusion of the permit fees in the agreement results in a loss of revenue; however, it does not change the impact of the original waiver which was not included in the FY 2014-2015 budget.

The estimated value of the waived park usage plus the permit fees remains to be $2,500; however, this revenue has not been included in the FY 2014-2015 budget.

Staff recommends that City Council authorize the City Manager to sign an amended Adopt-a-Park Agreement with Just Folks that expands the previously approved park usage fee waiver to include the waiver of permit fees with its programming in Triangle Park.

RESOLUTION BOOK NO. 36 - PAGE 389

F. RESOLUTION NO. 14-235 - RESOLUTION APPROVING THE 2013 LOCAL WATER SUPPLY PLAN

Summary: The consideration of a resolution adopting the 2013 Local Water Supply Plan as required by N.C. Dept. of Environment and Natural Resources.

Every year, the Water Resources Department is required to complete a Local Water Supply Plan (LWSP) update. On September 12, 2014, the N.C. Dept. of Environment and Natural Resources (NCDENR) issued a letter stating that the department's 2013 LWSP is complete and must be adopted by the water system's governing board. The LWSP contains a variety of information about the City of Asheville's water system, including:

- The distribution system (i.e. types/sizes of water lines);
- Water conservation programs;
- Water use (i.e. number of metered connections and average use by customer type);
- Water sales to wholesale customers;
- Monthly withdrawals from reservoirs;
- Surface water sources (i.e. locations and average monthly withdrawals);
- Wastewater discharge by the Metropolitan Sewerage District (MSD);
- Present and projected population;
- Present and future water supplies; and
- Other relevant information as NCDENR may require.

In order for the 2013 LWSP to be compliant with N.C.G.S. §143-355(l), City Council must formally adopt the plan. Once the City Council adopts the 2013 LWSP, NC DENR will change the status of the report from "Provisional" to "Compliant".

Pro:

- Adoption of the 2013 LWSP will ensure compliance with N.C.G.S. §143-355(l).

Con:

- If the 2013 LWSP is not adopted, then the City will not be compliant with N.C.G.S. §143-355(l) and may be issued a Notice of Violation from NCDENR.

City staff recommends City Council adopt the 2013 Local Water Supply Plan.

RESOLUTION BOOK NO. 36 - PAGE 390

G. RESOLUTION NO. 14-236 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH PATTON CONSTRUCTION GROUP INC. FOR THE LAKESHORE DRIVE SIDEWALK IMPROVEMENTS PROJECT

ORDINANCE NO. 4354 - BUDGET AMENDMENT FOR THE LAKESHORE DRIVE SIDEWALK IMPROVEMENTS PROJECT

Summary: The consideration of (1) a resolution authorizing the City Manager to execute a contract with Patton Construction Group, Inc. for the amount of $207,760 plus 15% contingency and any change orders within the project budget for the project known as Lakeshore Drive Sidewalk Improvements, City of Asheville Project #ENG-11-12-013; and (2) a budget amendment, in the amount of $43,079.04 from savings in other sidewalk projects, to provide adequate funding for the contingency and the cost of staff time for this project.

This project will build a much needed sidewalk along Lakeshore Drive and provide connectivity for the community along Lakeshore Drive to Merrimon Avenue. Pedestrians currently must walk along the road shoulder or in the street itself. The scope of work includes the installation of sidewalk, stand-up curbing, drainage structures, wheelchair ramps, driveway aprons, and utility relocations. The bids were opened on September 30, 2014, and the following is the result:

Patton Construction Group Inc., Asheville, NC	$207,760.00
Armen Construction, LLC, Charlotte, NC	$232,155.00
Land of the Sun, Inc., d/b/a Fletcher Grading Contractors	$272,936.25

Pros:

- Improves pedestrian safety.
- Encourages walking, thereby reducing carbon emissions.

Con:

- Project management and contract administration will consume staff time.

The project budget will be $260,425.04. The budget amount consists of $217,346.00 that was previously budgeted in the City's CIP, and $43,079.04 that will be allocated from savings in other sidewalk projects.

City staff recommends the City Council a resolution awarding the contract to Patton Construction Group, Inc.; authorizing the City Manager to execute the contract and any change order within the budgeted amount of $260,425.04; and adopt the associated budget amendment in the amount of $43,079.04.

RESOLUTION BOOK NO. 36 - PAGE 396
ORDINANCE BOOK NO. 29 - PAGE 253

H. RESOLUTION NO. 14-237 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CHANGE ORDER WITH MCGILL ASSOCIATES FOR THE STORMWATER ON-CALL PROFESSIONAL SERVICES CONTRACT

Summary: The consideration of a resolution authorizing the City Manager to execute a change order with McGill Associates for the Stormwater On-Call Professional Services Contract for additional professional services for completing the design and construction administration of various stormwater projects within the City.

On June 14, 2013, the City Manager executed a contract with McGill Associates for the professional services for the stormwater on-call projects. The contract was a two year contract in the amount of $89,000. This change order will increase that contract amount to $214,000. The City has utilized the contract to assist with the evaluation of the stormwater utility fees, public meeting to discuss the vulnerabilities of the City as it relates to stormwater, and projects such as Westwood Road (currently in construction) and Westover Drive (currently in final design). The City had previously selected McGill Associates through a Request for Qualifications process in which 15 other teams had submitted.

The ongoing contract will focus on construction actives and will allow city crews to focus on maintenance activities. This work will include the design of the projects, assistance with permitting and construction administration. This was the goal for the use of the stormwater utility fee is to utilize city crews to address the maintenance concerns that exist throughout the City.

Pros:

- Provides additional design services necessary for the on-call project
- Allows the City forces to focus on the maintenance needs and design and contract out the larger projects.
- Utilize the stormwater utility fee for construction related projects

Con:

- The project management and contract administration will consume staff time and City Funds

The City's Stormwater Utility will be responsible for the cost for the professional services contract. The total contract for professional services will now be $214,000. Funding for this contract is included in the adopted FY 2014-15 Stormwater Fund budget.

City staff recommends City Council authorize the City Manager to execute change order with McGill Associates for the Stormwater On-Call Professional Services, said total professional services contract is not to exceed $214,000.

RESOLUTION BOOK NO. 36 - PAGE 397

I. RESOLUTION NO. 14-238 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH APPALACHIAN PAVING AND CONCRETE INC. FOR THE CONCRETE REPAIR - UTILITY CUT PROJECT

Summary: The consideration of a resolution authorizing the City Manager to execute a contract in the amount of $257,183.75 plus a contingency of $42,816.25 (17%) for a total of $300,000.00 with Appalachian Paving and Concrete, Inc. for the project known as Concrete Repair – Utility Cuts, City of Asheville Project # SP 14-15-001.

As part of the Street Cut Utility Program utilities that damage public concrete infrastructure during the installation or maintenance of their underground infrastructure do not perform repairs to the concrete. This is the second year that a private contractor has performed this service. The project was advertised on September 2, 2014, and the following bids were received:

Appalachian Paving and Concrete	Asheville, NC	$257,183.75
Patton Construction Group	Arden, NC	$262,235.00
Armen Construction	Charlotte, NC	$443,300.00

After the bids were opened, Appalachian Paving and Concrete, Inc. of Asheville, NC, was the lowest responsible bidder with a bid of $257,183.75. A contingency of $42,816.25 (17%) has been added to allow payment for any unforeseen costs that typically arise during construction. The work produced from this contract will ensure that concrete infrastructure damaged during utility installation will be repaired in a timely manner.

Pro:

- The previous contract eliminated our backlog of repairs. This contract will ensure that another backlog does not occur.

Con:

- Project management and contract administration will consume staff time.

The Street Cut Utility Program is an enterprise fund that is funded by fees paid by the four partners participating in the program. The partners will be billed 100% of the repair cost meaning that the City realizes full cost recovery.

City staff recommends City Council adopt the resolution awarding the contract to Appalachian Paving and Concrete, Inc. and authorizing the City Manager to execute a contract in the amount of $257,183.75 plus a contingency of $42,186.25 (17%) with Appalachian Paving and Concrete, Inc. for the project known as Concrete Repair – Utility Cuts, City of Asheville Project # SP-14-15-001.

RESOLUTION BOOK NO. 36 - PAGE 398

J. ORDINANCE NO. 4355- BUDGET AMENDMENT FOR ENERGY ASSESSMENT AT THE U.S. CELLULAR CENTER

Summary: The consideration of a budget amendment from General Fund assigned fund balance to establish a FY15 budget in the amount of $55,000 for contracting the engineering-level energy assessment of the US Cellular Center.

In April 2011 City Council approved a resolution to set the annual municipal carbon footprint reduction goal at 4%. The mechanism Council approved to fund this initiative is the Green Capital Improvement Program (Green CIP). Through the Green CIP, the City borrowed money to fund the installation of LED streetlights and is now using the operational energy savings from that project to pay off the debt and to fund other energy saving projects. This energy assessment will be paid for out of those operational energy savings.

The US Cellular Center is the City's most energy-intensive facility, spending over $275,000 on utilities (electricity, natural gas and water/sewer) in FY14. Much of the USCC's heating, ventilation and air conditioning systems are still original from the 1970s construction, and are out of date and inefficient. This project would hire an engineering firm to do an in depth assessment of the USCC's HVAC, lighting, building envelope, plug load, controls, and water systems to determine what systems need attention soonest, and to develop a plan for deep energy savings at the facility. The $55,000 includes a 10% contingency.

Pros:

- Energy/water savings opportunities identified by the project could cut consumption by 30-50%, or more
- Capital needs assessment of aging equipment will aid in replacement planning

Con:

- None foreseen

The energy assessment will be paid out of the General Fund, from the Sustainability Division's contracted services budget. The budget amendment will appropriate $55,000 in LED streetlight savings which have been held in General Fund assigned fund balance; thus there will be no impact on the General Fund's unassigned fund balance.

City staff recommends City Council adopt a budget amendment to perform an energy assessment of the US Cellular Center.

ORDINANCE BOOK NO. 29 - PAGE 255

K. ORDINANCE NO. 4356- BUDGET AMENDMENT TO SET UP PROJECT BUDGETS FOR JOB ACCESS AND REVERSE COMMUTE PROJECTS

Summary: The consideration of a budget ordinance amendment in the City's Special Revenue Fund in the amount of $155,342 to set up the project budgets for the following Job Access and Reverse Commute (JARC) projects: 1) the Black Mountain Trailblazer route, which is operated by Mountain Mobility (Buncombe County); and 2) Employment trips to Buncombe County, which is a service provided by Mountain Projects (Haywood County).

The City of Asheville is the designated recipient of the Job Access and Reverse Commute (JARC), which is a program of the Federal Transit Administration (FTA). JARC is a formula grant program oriented to provide job access in the urbanized and suburbanized area. The formula is based on the number of eligible low-income and welfare recipients in these areas.

The job access refers to projects relating to the development and maintenance of transportation services designed to transport welfare recipients and eligible low-income individuals to and from jobs and activities related to their employment.

The reverse commute refers to a public transportation project designed to transport residents of urbanized areas and other than urbanized areas to suburban employment opportunities.

To be eligible, the program requires an intensive planning process and the development of a Coordinated Public Transportation and Human Services Transportation Plan or CTP-HSTP based on community participation. The CTP-HSTP was developed in conjunction with the French Broad Metropolitan Planning Organization (FBRMPO), Buncombe, Henderson and Haywood Counties, human services agencies, public and private transportation providers, the North Carolina Department of Transportation and the general public to assess current transportation needs, identify gaps and to set goals. The plan was approved on March 29, 2012 by the French Broad River MPO's governing body (the Transportation Advisory Committee), which includes elected representatives from each of the eighteen local governments which make up the MPO. The CTP-HSTP set the rules to apply for projects and the projects were selected in a competitive process that was approved by the TAC.

This year's JARC projects were funded through the Statewide 2011 JARC 5316 allocation with funds that were turned over to the City of Asheville from the North Carolina Department of Transportation, as the funds were expiring in September 2014 and the FBRMPO region had already the process in place to select the new round of JARC projects.

In June 26, 2014, the projects below were selected as sub-recipients of the JARC grant. The projects are listed as follows:

Sub-Recipient	Project	Amount funded	Sub-Recipient's match
Buncombe County	Black Mountain Trailblazer	$115,381	$115,381
Mountain Projects – Haywood County Transit	Employment trips to Buncombe County	$39,961	$39,961
City of Asheville	ART Sunday Service	$112,131	$112,131
City of Asheville	Program Administration	$21,033	N/A

The City of Asheville components of the project (ART Sunday Service and Program Administration) will be accounted for in the Transit Services operating fund, and a budget amendment is not needed for those parts of the grant. The City, however, does need to set up a project budget in the Special Revenue Fund in order to pass through the funds to the other sub-recipients.

Pros:

- Project funding is provided by the FTA, 50% for operating projects and 80% of capital projects. The sub-recipients are responsible for the local match.
- The city can use $21,033 for administration purposes.

Con:

- None.

The amount of grant funding that will be received through the JARC program to support local transportation programs totals $288,506. Buncombe County and Mountain Projects will be responsible for their sub-recipient matches. A portion ($80,000) of the City of Asheville's local match for ART Sunday service is included in the adopted FY 2014-15 Transit Operating Fund budget. The remaining match requirement will be part of the FY 2015-16 budget.

Staff recommends that City Council adopt a budget ordinance amendment in the City's Special Revenue Fund in the amount of $155,342 to set up the project budgets for the following Job Access and Reverse Commute (JARC) projects: 1) the Black Mountain Trailblazer route, which is operated by Mountain Mobility (Buncombe County); and 2) Employment trips to Buncombe County, which is a service provided by Mountain Projects (Haywood County).

ORDINANCE BOOK NO. 29 - PAGE 257

L. ORDINANCE NO. 4358 - BUDGET AMENDMENT FOR TRAFFIC SIGNAL POLE REPLACEMENT

Summary: The consideration of a budget amendment in the General Fund in the amount of $16,590 from insurance recovery funds from a damaged traffic signal pole to utilize towards the purchase of a new traffic signal pole.

On May 23, 2013, a City of Asheville traffic signal pole was knocked down by a third-party at the French Broad Street - Patton Avenue intersection and the City settled the property damage claim for $16,590. A temporary traffic signal control was installed to ensure traffic safety, however the Transportation Department seeks to utilize the settlement funds to purchase a permanent traffic signal pole.

Pro:

- Provides funding for Transportation Department traffic signal pole purchase.

Con:

- None.

The insurance recovery funds will be received in the City's Property & Liability Fund and then be transferred to the City's General Fund, where the traffic signal pole purchase will be made.

City staff recommends City Council adopt the budget amendment in the General Fund in the amount of $16,590 from insurance recovery funds to be utilized towards the purchase of a Transportation Department traffic signal pole.

ORDINANCE BOOK NO. 29 - PAGE 259

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Hunt moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Wisler and carried unanimously.

III. PRESENTATIONS & REPORTS: None.

IV. PUBLIC HEARINGS:

A. CONTINUATION OF PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF GREYMONT VILLAGE APARTMENTS LOCATED ON SARDIS ROAD FROM INDUSTRIAL DISTRICT AND COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION FO A MULTI-FAMILY APARTMENT DEVELOPMENT

At the request of the petitioner, Councilman Smith moved to continue this public hearing until December 9, 2014. This motion was seconded by Councilman Bothwell and carried unanimously.

B. PUBLIC HEARINGS TO CONSIDER THE CREATION OF A MUNICIPAL SERVICE DISTRICT FOR THE RIVER ARTS DISTRICT, THE SOUTH SLOPE EXTENSION, AND CHARLOTTE STREET CORRIDOR

Executive Director of Planning and Multimodal Transportation Cathy Ball said that this is the consideration of the adoption of three Municipal Service Districts (MSD's) to include the River Arts District MSD, the South Slope Extension MSD, and the Charlotte Street Corridor MSD in accordance with Article 23 of Chapter 160A of the N.C. General Statutes. These public hearings were advertised on October 3, 2014.

Following City Council's adoption of the budget in June 2013 that included a 2-cent tax increase for Community and Economic Development Capital Improvement Program, staff has been working on an implementation plan. In addition to developing a list of specific projects that would have the greatest return on investment, we have been working with Parker Poe, the City's Bond Counsel on the best ways to finance infrastructure capital improvements. She provided a memorandum from Scott Leo, an attorney at Parker Poe, detailing various methods of financing.

For the majority of the projects we anticipate constructing, Parker Poe is recommending that we pursue Special Obligations Bonds (SOB's). The City has never utilized this type of financing. One of the requirements of SOB's is that they can only be used for projects that are contained in an adopted Municipal Service District (MSD). A MSD is a geographically defined, special taxing district in which a city may levy property taxes in addition to those levied throughout the city, or utilize SOB's, in order to finance, provide or maintain services, facilities or functions specifically authorized in N. C. General Statute sec. 160A-536 for that district. Allowed projects include, but are not limited to, urban revitalization projects, street and sidewalk improvements, drainage projects, and off-street parking facilities. There is no intent to increase the tax rate in these proposed districts at this time; as previously noted, the intent is to use special obligation bonds to fund any improvements. Municipal Service Districts is the legal term of the boundaries as stipulated in the N.C. General Statutes. Staff *recommends the working name of these districts be* ***Innovation Districts.***

Staff is recommending the approval of three new MSD's this fiscal year. In 2013, City Council adopted a MSD for the Central Business District as recommended by the Business Increment Development (BID) Committee. The three additional areas are the Charlotte Street Corridor, the River Arts District and the South Slope Extension. These areas have planned infrastructure improvements in the proposed five-year capital improvement program.

Under Article 23 of Chapter 160A of the N. C. General Statutes, properties within these districts are legally eligible for an incremental tax increase. This action is not included in the request before you tonight. City Council would be required to take separate public action to establish an increase in taxes. Funding for the projects in these districts is included in the five-year capital improvement plan.

This item has been presented to the Planning and Economic Development and Finance Committees of City Council.

N.C. General Statutes require that any persons owning real or personal property within the district boundaries be notified of the public hearing to adopt these boundaries thirty days prior to the meeting. Notices went out to property owners on September 15, 2014. Additionally, the statutes require that a report describing the boundaries and the proposed improvements within the district be filed in the City Clerk's office thirty days prior to the public hearing. These reports were filed in the City Clerks office on September 15, 2014.

Staff held a drop-in meeting to answer community questions on October 6, 2014, and approximately 45 people attended the meeting.

Pro/Con Considerations:

- Allows funding mechanism for capital improvements at a lower interest rate and administrative cost than other funding methods.

- Article 23 of Chapter 160A of the N.C. General Statutes authorizes local governments to levy additional property taxes within MSD's. That is not the intention of staff to recommend this as an option or a reason to adopt a MSD. An MSD boundary must be adopted by City Council to utilize Special Obligation Bonds for specific capital projects. Staff is proposing a financing structure to pay the debt service on the bonds with funds from the 2 cent tax increase.

By utilizing Special Obligation Bonds, the City would save money on administration of issuing bonds as well as interest rates because the collateral for the bonds is more secure.

City staff recommends City Council adopt the three Municipal Service Districts (MSD's), hereinafter to be referred to as Innovation Districts, to include the River Arts District MSD, the South Slope Extension MSD, and the Charlotte Street Corridor MSD, in accordance with Article 23, Chapter 160A of the N.C. General Statutes.

RESOLUTION NO. 14-240 - RESOLUTION CREATING A MUNICIPAL SERVICE DISTRICT FOR THE RIVER ARTS DISTRICT

Ms. Ball said that some planned projects include the (1) River Arts Transportation Improvement Project; (2) Clingman Forest Greenway; (3) Town Branch Greenway; (4) 14 Riverside Drive; (5) Riverside Drive Development Plan; (6) Five-Points Round-About; (7) West-Side Greenways; and (8) low impact parking lot.

Mayor Manheimer opened the public hearing at 5:27 p.m.

Mr. Keith Jackson, owner of a residential lot on Grandview Street, said his lot is not in context with the properties included in the MSD. He was also concerned that the value of his lot will be diminished by moving the power lines closer to his property. He asked for confirmation that the service road from New Belgium to Amboy Road won't be used as a service road from New Belgium to move beer.

Brother Christopher Chiaronmonte said that this is the right of taxation without representation.

Ms. Wiggins, owner of residentially zoned lots, wants affordable housing or mixed-use housing in the area. She was concerned that the property owners will have to pay additional tax for the improvement maintenance.

Ms. Pattiy Torno, Chair of the Asheville Area Riverfront Redevelopment Commission, said that this is a way for the City to be able to finance infrastructure improvements. She spoke in support of the MSD.

A property owner on Riverview said his property was zoned residential and wondered what improvements he could expect.

Ms. Lisa Ramsey, owner of property on the edge of the RAD, was glad for any improvements to the area.

At 5:35 p.m., Mayor Manheimer closed the public hearing.

Ms. Ball responded to questions raised. She said that Ms. Wiggins' residential property is not included within the RAD MSD. Regarding Mr. Jackson's property, she said that the City obtained data from various sources and notified all real and personal property owners. It was difficult to sort out, so we erred on the side of sending the notices out to too many people. She would be happy to meet with Mr. Jackson and look at his property because she thought that on the west side of the river the only thing that was included was the area that Duke Progress owns for the greenway improvements. Regarding the question about the access road and the power lines, those are under the control of Duke Progress.

Councilman Bothwell opposed the downtown Business Improvement District because it was drawn to include a special tax for people in that area and a non-elected body to administer those taxes. We are not doing either of those in this case. Even though it does leave it open for a future Council to impose special taxes, he was comfortable in supporting this at this time.

Councilman Davis emphasized that this does not impose a special tax for people in that district. And, hopefully a return on investment will generate the cash flow that will enable the infrastructure changes, and the planning that takes place will make the property more valuable.

Councilman Smith said the reason we are doing this is to receive the Special Obligation Bonds in order to fund the infrastructure improvements rather than through property tax increases.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 14-240, establishing the River Arts District MSD. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 36 – PAGE 403

RESOLUTION NO. 14-239 - RESOLUTION CREATING A MUNICIPAL SERVICE DISTRICT FOR THE SOUTH SLOPE EXTENSION

Ms. Ball said that some planned projects include the (1) Lee Walker Heights mixed-use redevelopment; (2) south Charlotte Street mixed-use redevelopment; and (3) Hilliard Avenue mixed-use redevelopment.

Mayor Manheimer opened the public hearing at 5:40 p.m.

Brother Christopher Chiaronmonte said that at anytime Council can decide to tax the people in that district.

The owner of property at 268 Biltmore Avenue asked what improvements are being planned for Biltmore Avenue.

Mr. Craig Jeffries, lives in the South Slope within the Central Business District, supported the Municipal Service Districts, but wanted to make sure that the word "Extension" was included in information regarding the South Slope Municipal Service District.

Mayor Manheimer closed the public hearing at 5:44 p.m.

Ms. Ball said that there is not a definite plan for Biltmore Avenue, but as part of the redevelopment area we would hope there is an opportunity to improve pedestrian and bicycle environment in that area. She encouraged the public to attend the multi-modal symposium on October 25, 2014, at the U.S. Cellular Center from 9:30 - 12:30 to get their views included in priorities in the plan.

Mayor Manheimer also noted that this particular area includes a complicated partnership to redevelop the Lee Walker Housing Project.

City Manager Jackson noted that the language of the resolution does include the word "Extension."

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Wisler moved for the adoption of Resolution No. 14-239. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 36 – PAGE 399

RESOLUTION NO. 14-241- RESOLUTION CREATING A MUNICIPAL SERVICE DISTRICT FOR NORTH CHARLOTTE STREET

Ms. Ball said that some planned projects include multi-modal improvements to (1) widen sidewalks; (2) underground utilities; and (3) streetscape improvements.

Mayor Manheimer opened the public hearing at 5:46 p.m.

Mr. Steven Brady, owner of property on Charlotte Street, was concerned that at some point in time the debt will fall to the property owners to repay. He was also concerned about how the City will deal with little or no rights-of-way for sidewalks on Charlotte Street.

A resident on Montford Avenue was excited to see a neighborhood corridor and encouraged the Council to add as much on-street parking as possible to enhance the pedestrian experience and slow cars down.

Mr. Ken Michalove felt that Charlotte Street is a neighborhood street not a major traffic corridor. He felt that Merrimon Avenue is a major corridor and should be improved by the N.C. Dept. of Transportation. He felt it was wasteful to invest $3 Million into Charlotte Street improvements.

Mayor Manheimer closed the public hearing at 5:52 p.m.

City Manager Jackson said that the debt is not tied to the property - it is city-wide debt.

Ms. Ball said that if the right-of-way for sidewalks is not available or occupied by a building, there may be instances were we would not get a full 10-foot width sidewalk. We might try to meander the sidewalk and there may be a short distance that we don't have a sidewalk. Until the design is complete, we don't know all the answers.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Wisler moved for the adoption of Resolution No. 14-241. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 36 – PAGE 407

E. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING RESIDENTIAL DEVELOPMENT DENSITY STANDARDS IN CERTAIN COMMERCIAL ZONING DISTRICTS

At staff's request, Councilman Davis moved to continue this public hearing until December 9, 2014. This motion was seconded by Councilman Pelly and carried unanimously.

V. UNFINISHED BUSINESS:

A. GRAFFITI REMOVAL INITIATIVE

Public Works Director Greg Shuler said that staff is requesting guidance from Council on how to best proceed with the Graffiti Removal Initiative as it relates to the removal of large sites.

On September 23, 2014, Council approved an extension of the $500 clean up assistance to property owners that had graffiti on their property, and signed a waiver. This extension applies only to those that haven't taken advantage of the initiative previously. The timeframe for this extension lasts until September 30, 2015, or until the allocated funds have been spent.

There was much discussion on how better incentivize owners that had larger areas of graffiti to be removed. Council asked that staff return with more details and possibilities to fairly distribute funds and remove more graffiti.

Program goals include (1) remove graffiti; and (2) manage a sustainable program for long term success in the eradication of graffiti.

Once guidance from Council has been received, staff will abide by the approved ordinance to inform owners of the presence of graffiti on their property, and offer assistance as approved by Council, until the time extension has elapsed, or the allocated funds have been spent.

Pros:

- Potential increase in the removal of more graffiti in Asheville.
- A more vibrant, safer feeling community.
- Higher Quality of Life for our citizens

Con:

- City resources utilized on private property

The fiscal impact is that $300,000 was already included in the FY 2014-15 general fund budget for contracts associated with the City's graffiti removal initiative. The FY 2014-15 adopted budget also includes $200,000 for administrative costs associated with this program.

City staff requests that Council consider the alternatives and offer direction on how to proceed with the graffiti removal initiative.

As of October 13, 2014, the Clean-Up Initiative has funded graffiti removal of 198 incidents using 17% or $50,400 of the allocated $300,000. Our current inventory of known graffiti sites include 90 properties.

Staff has reached out to many of the property owners in the community to get a feel for why they haven't taken advantage of the initiative, or cleaned the their property on their own. The following are their responses: (1) Most stated that they felt it would just happen again; (2) They all stated that they had already cleaned the area before, only to have it vandalized again; (3) Most said that they couldn't afford to remove it; and (4) A few said they may pay a minimal amount towards the removal.

Out of the current inventory of 90 known graffiti sites, as of October 9, 2014, outstanding properties consist of $0-500 - 64 properties; $501-5,000 - 19 properties; $5,001-10,000 - 3 properties; and $10,001-28,000 - 4 properties.

Alternative Proposal #1 - Keep program as is. Pay $500 as a one-time City contribution to remove graffiti on properties that haven't utilized the program before. Timeline would last until September 30, 2015, or until funds are exhausted.

Alternative Proposal #2 - 100% 1-time clean-up with no max amount. As of 10/09/2014 the program has spent $50,400 on clean-ups. There are 90 outstanding properties with a projected clean-up cost of $159,950. Equaling a projected total of $210,350.

City staff recommends that we select the first alternate. Based on discussions with many of the owners with impacted properties, there doesn't seem to be an equitable way to distribute additional funds for the larger sites in this initiative.

Vice-Mayor Hunt noted that we need to make it clear that the duty is ultimately the responsibility of the land owner. City Attorney Currin said that there is a two-step enforcement process - one is to send a notice of removal and then is no response a subsequent notice of violation. Throughout that process staff will continue to work with the property owner.

It was the consensus of Council to proceed with the current program - Pay $500 as a one-time City contribution to remove graffiti on properties that haven't utilized the program before. Timeline would last until September 30, 2015, or until funds are exhausted.

VI. NEW BUSINESS:

A. ORDINANCE NO. 4358 - BUDGET AMENDMENT TO APPROPRIATE ADDITIONAL FUNDS ANTICIPATED TO BE COLLECTED IN FISCAL YEAR 2014-15 FROM DEVELOPMENT SERVICES REVENUE GROWTH FOR ONGOING GENERAL FUND NEEDS AND TO APPROPRIATE EXCESS FUND BALANCE FROM THE HEALTH FUND AS A TRANSFER TO THE GENERAL FUND TO BE ALLOCATED FOR THE CLASSIFICATION AND COMPENSATION STUDY AND OTHER ONE-TIME NEEDS THAT BENEFIT ALL DEPARTMENTS

RESOLUTION NO. 14-242 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH SEGAL WATERS

CONSULTING FOR A CITY-WIDE CLASSIFICATION AND COMPENSATION STUDY

Assistant City Manager Paul Fetherston said that this is the consideration of (1) a budget amendment , in the amount of $300,000, to appropriate additional funds anticipated to be collected in Fiscal Year 2014-15 from development services revenue growth for ongoing General Fund needs; (2) a budget amendment, in the amount of $200,000, to appropriate excess fund balance from the Health Fund as a transfer to the General Fund to be allocated for the Classification and Compensation Study and other one-time needs that benefit all departments; and (3) a resolution authorizing the City Manager to sign a contract for $150,000 with Segal Waters Consulting for a city-wide Classification and Compensation Study.

Development Related Revenue Growth

As the local, regional and national economy continues to recover, the City of Asheville experienced a marked increase in development related revenue in Fiscal Year (FY) 2013-14 with $1.1 million more collected than in FY 2012-13. While this increase was noted during the development of the FY 2014-15 budget, in an abundance of caution, additional development related revenue was budgeted at $800,000 over FY 2013-2014 budget.

Development related revenue received in the first quarter of FY 2014-15 has been better than anticipated with more than $850,000 collected by the end of September. If collections continue at this rate, total revenue for the year could be as much as $3.4 million. Based on the healthy activity the City is experiencing in the area of development related revenue, staff recommends that Council consider and authorize an increase of $300,000 in anticipated revenue which would raise revenue levels in FY 2014-15 to $3.2 million. Staff is confident that this proposed increase in development related revenue is sustainable moving forward.

The corresponding expenditures for the increase in revenue would be focused on retention of resources in Development Services, and improvements in the effectiveness and function of the Human Resources and Communications departments.

As a result, the following is recommended for Council consideration and action:

- Amend the General Fund budget to allocate an additional $300,000 in Development Services revenue to fund ongoing needs in the General Fund. Because this budget amendment increases both revenue and expenditures, there is no impact on General Fund balance.

If approved, the funds would be allocated as follows:

1) Address retention in the Development Services Department (DSD)

   The DSD is experiencing high turnover due to a number of factors including the (a) healthy economic recovery in the construction trade; and (b) salaries for the current incumbents are currently below market rates. The allocation of funds generated by development services to improve retention and make the department more competitive when hiring will significantly benefit the department, organization and the customer service the City is able to provide.

2) Reengineer the Human Resources Department's (HR) internal service model – 2.0 FTE increase

   In an effort to maximize support for departments in providing services to the community, HR has been evaluating its internal service model and has concluded that a change in organizational structure and a redefining of roles within the department will significantly

benefit the organization as a whole. HR intends to implement a Human Resource Consultant model in which full time employees in the role of HR Consultants will each be assigned to work with particular departments. This model allows each consultant to work as a strategic partner in supporting each department accomplish their goal and objectives, identifying opportunities and challenges, and working to improve internal customer service and efficiency.

3) Reengineer the City of Asheville Communication and Public Engagement Model – 1.0 FTE increase

In order to maximize the effectiveness of the Communication and Public Engagement Division, City Staff has proposed a model in which communication specialists will be assigned to specific departments within the City. This "embedded" model will allow the City to more effectively message taxpayer investments in core services, programs and projects and City Council vision and priorities to both the community and media. Assignments will rotate over time which will improve staff's depth of knowledge and improve continuity of communication support for all levels of the organization both internally and externally.

Health Fund

The City of Asheville's health insurance plan for employees is a self-insured program. This means that each year, the City budgets for a third party to administer its health insurance program based on actuarial estimates for claims. Depending on the City's actual experience in health insurance claims, the city can run at estimate, at a deficit or at a surplus.

FY 2013-14 was a good year for the City's self-insurance program. Revenues from premiums were approximately equal to expenditures on claims, leaving a $2.4 million fund balance in the Health Fund. Based on existing City Policy, a balance of $1.3 million is recommended to be held in reserve. As a result, the City currently has $1.1 million available in unrestricted fund balance which can be reappropriated under certain circumstances.

Fund Balance, Health Fund:	$2.4 million
Reserve Requirement:	$1.3 million
Available unrestricted fund balance:	$1.1 million

The following is recommended for Council consideration and action:

- Amend the Health Fund and the General Fund for a transfer of $200,000 from the Health Fund to the General Fund for the classification and compensation study to be completed by Segal Waters Consulting and other city-wide needs and improvements.

The funds shall be allocated for the classification and compensation study which will be completed in time to influence the fiscal year 2015-16 budget process. Any remaining funds will be used to fund one-time expenditures that benefit the organization as a whole.

Segal Waters was selected after a Request for Proposal (RFP) process, staff review and interviews with the responding firms determined that the services offered by Segal Waters were the most compatible with City of Asheville goals.

Pros:

- Increased expertise and efficiency of Communications Department.
- Increased effectiveness of Human Resources.
- Improved meeting and training space.

Con:

- None.

The $300,000 additional expenditures and offsetting revenue have a zero net effect on the General Fund financials. The transfer of $200,000 from the Health Fund to the General Fund will decrease fund balance in the Health Fund. This transfer in will cover one-time expenditures anticipated to benefit all departments and will have zero net effect on the General Fund Financials.

City staff recommends City Council approve (1) the budget amendments in the amount of $300,000 and $200,000, to appropriate funds anticipated to be received from development services activity and a transfer from the Health Fund, respectively; and (3) adopt a resolution authorizing the City Manager to enter into a contract with Segal Waters Consulting for a Classification and Compensation Study.

Mayor Manheimer said that members of Council have been provided with copies of the ordinance and resolution and they would not be read.

Councilman Smith moved to adopt Ordinance No. 4358. This motion was seconded by Councilwoman Wisler and carried unanimously.

ORDINANCE BOOK NO. 29 - PAGE 261

Councilman Smith moved to adopt Resolution No. 14-242. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 36 - PAGE 411

B. BOARDS & COMMISSIONS

Regarding the Recreation Board, the following individuals applied for the vacancy: Brian Rowland, Forrest P. Merithew and Dean Pistor. It was the consensus of Council to interview Brian Rowland and Forrest Merithew.

Regarding the Planning & Zoning Commission, the following individuals applied for a vacancy and completed the necessary paperwork: Mark DeVerges, Colin Dennehy, Laura Berner Hudson, Peter Alberice and Arthur Ollendorff; and the three seated members Jeremy Goldstein, Jane Mathews and Kristy Carter. Mr. Dean Pistor withdrew his application. Mr. Richard Fort and Mr. Eric Workman did not submit written responses and are not eligible to be considered. The Boards & Commissions Committee recommended, and it was the consensus of Council, to interview Laura Berner Hudson, Peter Alberice and Arthur Ollendorff; in addition to the three seated members Jeremy Goldstein, Jane Mathews and Kristy Carter. Interviews will be held on October 28, 2014.

RESOLUTION NO. 14-243 - RESOLUTION APPOINTING MEMBERS TO THE HOMELESS INITIATIVE ADVISORY COMMITTEE

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Homeless Initiative Advisory Committee.

The terms of Charles Rosenblum, Sabrah n'haRaven and Jay Lively expire on November 1, 2014.

The following individuals applied for a vacancy: Allison Bond, Carrie Pettler, Kristi Case and Warren Furmann.

The Boards & Commissions Committee recommended reappointing Mr. Rosenblum, Ms. n'haRaven and Mr. Lively.

Councilman Smith moved to reappoint Charles Rosenblum, Sabrah n'haRaven and Jay Lively as members to the Homeless Initiative Advisory Committee to each serve a three-year term, terms to expire November 1, 2017, or until their successors have been appointed. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 36 – PAGE 412

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Michalove felt that terminating the lease between Pack Place and the City of Asheville was a "colossal illegal boondoggle." He provided Council with a list of at least 20 things he felt was wrong with the action.

Brother Christopher Chiaronmonte felt that Council should reestablish prayer at City Council meetings.

Mr. Jonathan Robert felt there was severe mismanagement of the Asheville Police Department under Police Chief William Anderson.

Mr. Timothy Sadler thanked Council for their courage to fly the gay pride flag. He then suggested creating an Asheville Artists Residency Program.

Mr. Tim Harrison questioned if the City's policy on domestic partner benefits for City employees is now outdated and no longer needed.

Ms. Judy Strong was opposed to City Council flying the gay pride flag. She was also upset that City Council proceed with direct leases at Pack Place.

Closed Session

At 6:37 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C. Gen. Stat. § 143-318.10(3). The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(1); (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(5); and (3) To discuss matters relating to the location or expansion of industries. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(4). This motion was seconded by Councilman Pelly and carried unanimously.

At 7:04 p.m., Vice-Mayor Hunt moved to come out of closed session. This motion was seconded by Councilman Smith and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 7:04 p.m.

Magdalen Burleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – October 28, 2014- 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

ADDITION TO AGENDA

Mayor Manheimer announced that a presentation will be made by City Manager Gary Jackson regarding the Strategic Operating Plan for the Asheville Police Department, under Presentations.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING NOVEMBER, 2014, AS "ADOPTION AWARENESS MONTH"

Mayor Manheimer read the proclamation proclaiming November, 2014, as "Adoption Awareness Month" in the City of Asheville. She presented the proclamation to Ms. Tammy Shook, Foster Care Program Administrator for Buncombe County Health and Human Services, who briefed City Council on some activities taking place during the month.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 14, 2014

B. ORDINANCE NO. 4359 - ORDINANCE ENACTING AND/OR CHANGING THE SPEED LIMITS AS FOLLOWS: 20 MPH SPEED LIMIT ON OAKWOOD STREET FROM HAYWOOD ROAD TO END OF CITY MAINTENANCE; AND 25 MPH SPEED LIMIT ON CATAWBA STREET FROM BROADWAY STREET TO CUMBERLAND AVENUE, CISCO ROAD FROM OLD HAW CREEK ROAD TO END OF CITY MAINTENANCE, RED OAK ROAD FROM LAKESHORE DRIVE TO ELLENWOOD DRIVE, AND WAYNESVILLE AVENUE FROM CRAVEN STREET TO WESTWOOD PLACE

Summary: The consideration of an ordinance to enact and/or change the speed limits on various sections of streets in the City of Asheville.

According to state law (NCGS # 20-141), the statutory speed limit in North Carolina is 35 mph inside municipal corporate limits for all vehicles and 55 mph outside municipal corporate limits for all vehicles except for school buses and school activity buses.

Furthermore, local authorities may authorize by ordinance higher speeds or lower speeds than the statutory 35 mph speed limit on locally-maintained streets provided that the higher speed

limit cannot exceed 55 mph. Speed limits authorized by local authorities are effective when the appropriate signs are erected.

City staff recently completed traffic engineering investigations and determined that a 20 mph speed limit on Oakwood Street from Haywood Road to End of City Maintenance, and a 25 mph speed limit on Catawba Street from Broadway Street to Cumberland Avenue, Cisco Road from Old Haw Creek Road to End of City Maintenance, Red Oak Road from Lakeshore Drive to Ellenwood Drive, and Waynesville Avenue from Craven Street to Westwood Place would be reasonable and safe.

Pros:

- City staff has been able to respond favorably to citizen's requests.
- The new speed limits will be consistent with roads of like character and design.
- This action will also bring some of the roads into line with our speed limit policies.
- Based on the 85th percentile speeds, most drivers would adhere to the recommended speed limits on these roads.

Cons:

- The initial cost to install the appropriate speed limit signs is about $450.00.
- Typically, speed limit signs have a serviceable life of five to seven years.

The initial cost to install the appropriate speed limit signs is about $450.00 and is included in the current operating budget for the Transportation Department.

City staff recommends that City Council approve an ordinance enacting a 20 mph speed limit on Oakwood Street from Haywood Road to End of City Maintenance, and a 25 mph speed limit on Catawba Street from Broadway Street to Cumberland Avenue, Cisco Road from Old Haw Creek Road to End of City Maintenance, Red Oak Road from Lakeshore Drive to Ellenwood Drive, and Waynesville Avenue from Craven Street to Westwood Place.

In response to Councilman Smith, Transportation Director Ken Putnam said that the Haywood Road Corridor Study is underway now and is anticipated to be complete in the spring of next year.

ORDINANCE BOOK NO. 29 - PAGE 263

C. RESOLUTION NO. 14-244 - RESOLUTION TO SET A PUBLIC HEARING ON DECEMBER 9, 2014, TO CONSIDER PERMANENTLY CLOSING A PORTION OF WESTOVER ALLEY

Summary: The consideration of a resolution of intent to permanently close a portion of Westover Alley and setting a public hearing on December 9, 2014.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjoining property owner Matt Depofi has requested the City of Asheville to permanently close a portion of Westover Alley.

The Multimodal Transportation Commission met on September 24, 2014, and approved the closure.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties

- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of intent to permanently close a portion of Westover Alley and set the public hearing on December 9, 2014.

RESOLUTION BOOK NO. 36 - PAGE 413

D. RESOLUTION NO. 14-245 - RESOLUTION AMENDING THE 2014 CITY COUNCIL MEETING SCHEDULE TO CANCEL THE NOVEMBER 25, 2014, FORMAL MEETING

RESOLUTION BOOK NO. 36 - PAGE 415

E. RESOLUTION NO. 14-246 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE NORTH CAROLINA GOVERNOR'S HIGHWAY SAFETY PROGRAM FOR HIGHWAY SAFETY GRANT FUNDS

ORDINANCE NO. 4360 - BUDGET AMENDMENT TO RECEIVE HIGHWAY SAFETY GRANT FUNDS

Summary: The consideration of (1) a resolution authorizing the City Manager to enter into an agreement with the North Carolina Governor's Highway Safety Program for highway safety grant funds to purchase equipment for the Traffic Safety Unit; and (2) an associated budget amendment in the amount of $20,000.

The Asheville Police Department currently participates in the North Carolina Governor's Highway Safety Program Highway Safety campaigns. In order to facilitate better participation and efficiency of highway safety initiatives, a regional law enforcement network was created to enhance communication and effectiveness. The Asheville Police Department promotes highway safety statewide by designating a member of the department to serve as the regional liaison for GHSP Region 10 covering Buncombe, Henderson, Madison, Mitchell, Polk, Rutherford, and Yancey counties.

In addition to purchasing equipment for the Traffic Safety Unit, funding would also cover the costs associated with training for officers and cover travel expenses for the Regional Liaison duties. The expenses created by the purchase of the equipment and the duty related travel are reimbursed by the Governor's Highway Safety Program through the National Highway Traffic Safety Administration. There is no local match of funds required for this grant.

Pros:

- Reimbursement revenue to cover the cost of obtaining the needed equipment including body cameras, CDR Software subscription, computer, tool kits, ARAS 360 Certification, and polo shirts.
- Reimbursement revenue to cover the cost of necessary training and travel related to highway safety duties and operations.

Con:

- Dedicate the staff hours for the officer charged with the liaison duties to accomplish the goals stated in the grant contract.

This budget amendment is fully funded with grant revenue and there is no impact to the General Fund budget.

City staff requests City Council to adopt (1) a resolution authorizing the City Manager to enter into an agreement with the N.C. Governor's Highway Safety Program to provide a Regional Law Enforcement Liaison and fund equipment and training; and (2) the associated budget amendment in the amount of $20,000.

RESOLUTION BOOK NO. 36 - PAGE 416
ORDINANCE BOOK NO. 29 - PAGE 264

F. RESOLUTION NO. 14-247 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE FOR UPSET BIDS FOR CITY-OWNED PROPERTY AT 30 ROCK HILL PLACE

Summary: The consideration of a resolution directing the City Clerk to advertise for upset bids for the sale of 0.34 acres (approx. 14,800 square feet) of real property located at 30 Rock Hill Place to Sayco Equity Fund.

The City of Asheville owns a parcel of property located at 30 Rock Hill Place. (PIN # 9656-28-0496). This property is improved with a manufactured home on a .34 acre lot. The tax assessed value of the land is $32,300 and the building is valued at $6,800 for a total of $39,100. It was built in 1967 and rehabilitated in 1996 using Community Development Block Grant funds (CDBG). The rehabilitation loan was in the amount of $39,000. The private owner went into foreclosure over its original mortgage in 2013 and the City purchased the property at auction to protect its position as the second lien holder. The purchase price was $30,611.96.

The City of Asheville purchased the property in January of 2014 with the intent to market and sell the property in order to recover as much of our CDBG investment as possible. In February, the Housing and Community Development Committee (HCD) and the City Council approved a sealed bid process. The services of Keller Williams Real Estate were secured to market the property in March of 2014. These services included marketing the property on MLS, acquainting local brokers with the property and performing showings. The public bid opening and subsequent award were scheduled for early April. Unfortunately, no bids were received. City staff continued to market the property and worked with local affordable housing partners in hopes of a negotiated settlement. No offers were received in the target range of $55,000 to $70,000. This property has limited market appeal because of the condition of the structure and the need for extensive repairs necessitates a cash buyer. Although it was originally thought that the property could be subdivided into two buildable lots, we discovered that access to sewer for the second lot would have required an easement over an adjoining property. In September of 2014, a bid was received from Sayco Equity Firm for $33,700.

Funds from the sale of the property will be used to repay the City of Asheville for funds expended in order to purchase the property. Any remaining profits will be used to repay the CDBG loan fund which was the original source of funding for the rehabilitation loan. The CDBG funds accomplished a national objective and were used for an eligible activity, so the City has no further obligation regarding those funds. The Housing and Community Development Committee (HCD) considered this action at their meeting on October 21, 2014, and recommends accepting Sayco Equity Firm's offer to purchase.

Considering the fact that the City of Asheville has already expended funds to market the property and the City is unlikely to recover the CDBG loan funds, the method to establish fair market value is the upset bid process set forth in NCGS 160A-269. If City Council approves the following resolution, the City Clerk will be directed to publish an advertisement for upset bids for a period of 10 days, in which any interested party may upset the bid of $33,700. The statutes require that a qualifying bid must increase the current offer by 10% of the first $1,000 and 5% of

the remainder (i.e. $35,435 or higher). Since the function of the upset bid process is to confirm fair market value, the resolution provides that if no qualifying, competing bid is received, then the City Council agrees to convey the parcel to Sayco Equity Fund for $33,700.

Pros:

- Private sale will convert public land into taxable real property and will relieve the City of Asheville of ongoing maintenance responsibility.
- The City will recover funds spent to purchase property out of foreclosure, to market the property and to support ongoing maintenance.

Con:

- The City of Asheville is unable to recover the CDBG funds originally invested in the amount of $39,000.

The sale will allow the City of Asheville to recover the $30,611.96 that was spent to purchase the property and prepare it for sale. Any remaining profits will be spent to replenish the CDBG loan fund.

City staff recommends City Council adopt a resolution directing the City Clerk to advertise for upset bids for a property located at 30 Rock Hill Place.

RESOLUTION BOOK NO. 36 - PAGE 417

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Wisler and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. WATER MAIN TRANSMISSION LINE PROJECT UPDATE

Mr. Rick Carrier, Vice-President of Brown and Caldwell, said that two pipelines carry over 70% of Asheville's water. He provided a project overview citing next steps for easement protection, and operating and capital investments.

In summary, Water Resources Director Steve Shoaf said that the pipeline is in excellent condition with 50+ year service life expected; values and vaults are being systematically refurbished; Capital Improvement Plan will be scheduled to improve protection; and policies needed for easement acquisition, maintenance, and encroachments.

When Councilman Bothwell asked about homes that are built over water lines that need repair, Mr. Shoaf said that they are trying to determine if there are existing policies in other jurisdictions to use as a model. He said we are not only concerned about the pipe, but also concerned about the safety of the homeowner.

In response to Councilman Smith, Mr. Shoaf said that the City of Asheville is on the leading edge of the process to assess smaller lines. He said their provider is willing to talk with the City about assessing the smaller lines; however, the City wants to see the results of their

assessment of the larger lines. He did note that they do have a program for replacing smaller lines.

B. DOMESTIC VIOLENCE PLAN

The Honorable Rebecca Knight reviewed the Buncombe County Domestic Violence Comprehensive Plan (Plan). From 2008-2013, there were 679 domestic violence murders in North Carolina. Twenty-four domestic violence murders were in Buncombe County. The Buncombe County Comprehensive Plan has been working in partnership with the Mission Women and Children's Safety Coalition to meet common objectives to reduce homicides, improve reporting and to improve the delivery of services to victims and offenders. The Plan (1) layers multiple programs for better outcomes; (2) each program is an evidence-based best practice; (3) objective is to hold offenders accountable and keep victims safety; and (4) strategies are individualized to meet the needs of our community.

The Plan's "eNOugh" Campaign includes increasing public awareness, focus on deterrences, engage in a High Risk Team, evaluate dangers to victims, track offenders for victim safety, and improve communication.

Law enforcement strategies include (1) offender focused deterrence; (2) domestic violence High Risk Team; (3) lethality assessment Program for first responders; and (4) electronic monitoring.

With intimate partner homicides, they can be predicted, they can be prevented; and there is an opportunity for intervene. She explained the lethality training, and the Domestic Violence High Risk Team. She reviewed the Massachusetts Model High Risk Team Six-Year Study. She then explained the electronic monitoring and domestic violence offender focused deterrence. She gave statistics from the High Point Domestic Violence Focused Deterrence Outcomes. Message to the offender is (1) we do not tolerate domestic violence in our community; (2) we will not tolerate your domestic violence behavior and there will be consequences; (3) we care about you and will refer you to services if you want help (such as substance abuse, employment, mental health); and (4) domestic violence has long term damaging effects on your children and family. She gave statistics for the Maryland LAP from 2006-2010.

On behalf of City Council, Mayor Manheimer thanked Ms. Knight and all those who have worked on this very important issue.

C. DUKE ENERGY PROGRESS - ASHEVILLE PLANT AND FUTURE PLANS FOR THE PLANT

Mr. Jason Walls, District Manager for the Asheville Region of Duke Energy Progress, updated City Council on the regional operations/community investments. They employ over 300 local employees, contribute $3 Million in local taxes, have 1,350 miles of transmission/distribution lines, and have 3 power plants - Asheville Plant, Marshall Plant (hydro), and Walters Plant (hydro). Community investment focus areas are (1) economic and workforce development; (2) education - STEM and Early Childhood Literacy; (3) environmental; and (4) community vitality/cultural enrichment. They have made over $1 Million in local investments in 2014, and there have been 13 community service projects lead by employees.

Regarding the coal ash update, they are in a partnership with the Asheville Regional Airport. The project began in 2008 and will end in 2015. Beneficially reuses 4 million tons of coal ash in a safe state-of-the-art project. This has created 40+ acres of usable land for aeronautical development. Duke Energy has already committed to excavating the coal ash at Asheville and closing the ash basin, which is reflected in Coal Ash Management Act of 2014. The new N.C. Coal Ash Management Act sets August 1, 2019, as the deadline for closing the Asheville coal ash impoundments. They are currently planning on how to meet this aggressive timeline and are

focused on safe and sound solutions that protect groundwater and the environment. They continue to evaluate a number of options related to the operations of the Asheville site (handling fly ash dry, retiring the plant, additional transmission support, etc.). This evaluation is ongoing and in the next few months they will have a better idea of their future plans.

Mr. Walls explained the peak customer demand, the supply resources they have; and the reserves for emergencies. He then provided statistics of the Asheville Power Plant.

Two ways they are investing in the electric system to serve the customers are as follows: (1) improving reliability and capacity for existing transmission and distribution infrastructure (a) ongoing work is rebuilding West Asheville Transmission Lines (west side of the river); (b) the last substation to serve customers in downtown Asheville was built in 1975; (c) electricity demand has more than doubled; and (4) three substations are needed to serve separate load centers (i) work is underway not to identify those sites; and (ii) they will work closely with city leaders to site and build these stations; and (2) increasing the transmission capacity for customers in Western North Carolina (a) exploring new transmission upgrades to tap into the broader system across the Carolinas; (b) benefits (i) improve overall reliability to homes, schools and businesses; (ii) provide access to the most cost effective source of electricity for customers; and (iii) allow the Asheville Plant to operate less, further reducing emissions; and (c) no decision has been made, but careful and deliberate analysis is being done.

Mr. Walls responded to various questions/comments from Council, some being, but are not limited to: with Duke Energy's partnership with the City's Sustainable Advisory Committee on Energy & the Environment, there be opportunities to find ways to reduce the City's overall energy use; do they know what the cost of the transmission option will be; and is Duke Energy looking at new lithium battery plants.

When Councilman Smith asked how can the City and the community be a partner in helping Duke Energy make some decisions around the coal plant, Mr. Walls said that that the City always has the right to participate in regulatory proceedings, and he encouraged the City to continue promoting and encouraging energy efficiency.

Mayor Manheimer thanked Mr. Walls for his willingness for open dialogue, noting the good partnership between the City and Duke Energy.

D. APPROACH TO REVIEW AND IMPLEMENT THE STRATEGIC OPERATING PLAN FOR THE POLICE DEPARTMENT

City Manager Jackson said that we are going through a significant change process coming out of the May, 2014, adoption of the 3-year Strategic Operating Plan (Plan) for the Asheville Police Department (APD). The SOP calls for major change. Since that time, internal teams of APD employees have been gearing up to carry out the Plan. Six teams have been formed around the following areas: recruitment and retention; leadership; organizational structure; equipment and technology; community quality of life; and agency outreach and communication. Their work will go on through the course of this Plan and bring about the Plan changes identified in each of these areas. Significant progress is being made in all six areas. The Plan is a navigation tool and we need to stay on course. To ensure that we stay on course in progress and positive change and organizational development, we need to give it our full support. We are proceeding in this path because we continue to place the highest importance on the APD. We care about each and every employee at the APD and the valuable service they provide for us every day.

He said that the highest level of management support that we can give is in two steps. The first action is to enlist Fire Chief Scott Burnette to serve as the facilitator of the cultural and organizational changes to be facilitated under the Plan. Chief Burnette was recognized at a state and national level for his Department's success in undertaking a similar process in recent years. Moving forward, Chief Burnette will be facilitating an internal multi-disciplinary team including employees throughout the APD. Chief Burnette's facilitation will allow Police Chief Anderson and his police team to stay focused on the day-to-day operations of keeping us safe while the Plan moves forward. The second management action is to enlist a management consulting firm. The firm will have principally three roles (1) perform diagnostics - third party to provide us with an objective review of the six areas and to give us that independent view of what we should consider and what are best practices in the field; (2) to provide additional avenues to receive employee input - we knew the Plan was going to be a dynamic tool so it's important that we keep lines of communication open at all times; and (3) to examine organizational culture.

He said that over the next 7-10 days, we will finalize the scope of work for the management consultant and determine the fee structure. Chief Burnette, Chief Anderson, Human Resources staff, Communications staff, and Finance & Budget staff are already working together. Additionally, the national consultants in this area, with proven track records, are being contacted by his office. He hoped to have the management consultant engaged within 30 days. We anticipate the engagement will take approximately 120 days and will keep Council updated.

All Council members spoke about their great respect for the men and women in the APD and how they don't need to be distracted with internal issues within the department. The bottom line is providing a service to the community and keeping our citizens safe. They encouraged the APD employees and the community to be patient and support this effort going forward. Council will be asking for accountability and progress

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING AN UNNAMED ALLEY OFF BROAD STREET

At the request of City staff, Councilman Smith moved to continue this public hearing until January 13, 2015. This motion was seconded by Councilwoman Wisler and carried unanimously.

B. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING A PORTION OF BRADLEY STREET

Mayor Manheimer announced that this item has been withdrawn from consideration.

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 14-250 - RESOLUTION APPROVING THE NAMING RIGHTS AGREEMENT BETWEEN THE ASHEVILLE ART MUSEUM AND THE NORTH CAROLINA STATE EMPLOYEE'S CREDIT UNION FOUNDATION FOR THE NAMING OF A PORTION OF THE PLAZA LOCATED AT 2 S. PACK SQUARE

Assistant City Attorney Jannice Ashley said that this is the consideration of a request to approve a naming rights agreement between Asheville Art Museum (AAM) and the NC State Employee's Credit Union Foundation (SECU) for the naming of a portion of the Plaza located at 2 S. Pack Square, proceeds to benefit the AAM capital campaign for the major renovation of the museum.

The City and AAM have entered into a lease for a portion of the city owned property located at 2 Pack Square for continued use as an art museum. As part of the lease negotiations, the AAM has long made clear its plans for a major, multi-million dollar renovation of the museum space and its need to raise funds to accomplish this renovation. As part of these fund raising efforts, it was anticipated by both AAM and the City that AAM would be permitted to raise funds through the granting of naming rights. Specifically, section 1(i) of the Lease regarding "Programmable Area" states, that "*advanced written approval by the City shall be required for any signage and naming rights in the AAM Programmable Area*" and further states that, "*any such approved use may not impair public access or use of City rights of ownership*".

A formal request from AAM regarding its naming rights agreement with SECU has been received. In summary, SECU has agreed to donate $1.5 million toward the museum renovation in return for the ability to name the plaza area in front of the main art museum entrance "SECU Plaza". The donation is tied to the museum's ability to achieve a certain level of its capital campaign goals and to begin the renovation. Approval of the signage shall be subject to all usual City review requirements and regulations. The City is not a party to the naming rights agreement and bears no responsibility for ensuring that the terms of the agreement are met. The term of the naming rights runs with the term of the lease.

The aforementioned lease provision did not specify the process for city approval. However, staff has researched past and current procedures and policies for the granting of approval for naming rights and has determined this process for approval of the current request before the Council, is consistent with past and present procedures. For example, in 2004, the City Council granted the Pack Square Conservancy the ability to manage naming rights for the park in order to raise funds for park improvements. Generally, major park features were named for individuals or organizations that had made significant historic or cultural contributions to Western North Carolina. More recently, in March 2014, City Council adopted a policy for the naming of publicly owned properties that stated, among other things, that consideration should be given for naming property for individuals or organizations that had made significant financial or civic contributions to the City of Asheville and more generally, to recognize noteworthy individuals and or organizations that have served the community with honor and distinction. While this policy provided general guidelines for the naming of public property, it specifically stated that it did not limit Council's authority to use its discretion based on the facts and circumstances surrounding a particular issue.

As AAM's letter of request outlines, SECU is an organization which has been an active financial supporter of important community endeavors both in Asheville and throughout North Carolina and as such, is the kind of organization for which the City has tended to favor the granting of naming rights.

Staff recommends that the City Council determine whether to approve the AAM granting of naming rights for a portion of the Plaza at Pack Square to SECU.

Vice-Mayor Hunt said that the SECU has in good faith committed $1.5 Million to improve a City-owned building. The funding comes from contributions the members from the credit union. The SECU is a great partner to many communities in the state. We do have imperfect circumstances in this case, however. The lease agreement with the AAM does contemplate naming rights outside the building and it requires City approval to grant those naming rights. We know that the AAM entered into a contract with SECU for this grant money and promised naming rights. That was not correct. Individual Council members and City staff spoke with the leadership of the AAM and they know this is distressing to the City. This is not an acceptable way to move forward in the future. The process had not been good to date nor has there been any public or stakeholder groups' engagement. But, the final product is not out of character what goes on in naming rights across Pack Square Park. He felt the downside of stopping the process now and re-create a process might end up with a lost opportunity and he was not in favor of that. A delay

would not be good for this community or for this project or good for funding partnerships that we need to rely on to get capital projects done in our community.

Vice-Mayor Hunt moved for the adoption of Resolution No. 14-250, with the following conditions: (1) In addition to being subject to all signage requirements provided by the UDO, all aspects of the naming rights signage including placement, design, aesthetic qualities shall be subject to final review and approval by the City Manager; and (2) the duration of the naming rights will be limited to the duration of the AAM lease and any agreement between the AAM and SECU shall clearly reflect this fact. This motion was seconded by Councilman Davis.

Councilwoman Wisler thanked SECU for the investment and support for the AAM. She didn't feel comfortable in pulling that ability for the AAM to get the naming rights, but was uncomfortable with the fact of the lack of communication and timeliness to bring this issue before City Council. She hoped that in the future the AAM will commit to communication better and on a timelier basis.

Councilman Bothwell was glad that the City Manager will have final review of the design because the design did concern him. In terms of naming, many things have been named without going through Council approval, i.e., Roger McGuire Green vs. City County Plaza.

Vice-Mayor Hunt noted that the lease provides for the AAM to have additional naming right opportunities, so he cautioned them to be diligent and responsible.

Ms. Kim McGuire, representing the AAM Board, said the Board shares Council's concern about the process and they are determined to do well by this for the future. They have been hard at work and in deep discussions about what the Museum and cultural center will be in the future. They have attempted to follow the plans set forth through the lease. They are very committed to respecting that this is a public space and should be honored in the right way. At the same time they have been working very hard to raise funds for this project. They are proud that they are very close to $17 Million toward their ultimate goal, including this investment from the SECU. She expressed appreciation to SECU members who donate $1/month to cultural, health and other high impact projects. Naming opportunities are an essential part of any capital project and they pledge to work openly going forward, noting that all final approval rests with City Council.

Mr. Tracey DeBruhl said that since this is a long term lease, the control can always come back to the City.

The following individuals spoke in opposition of the resolution to approve naming rights nor should it add any names to the area know as South Pack Square for various reasons, some being, but are not limited to: Asheville's history - this area already has a name dedicated in 1903 - Pack Square; no opportunity for dialogue amongst stakeholder groups, such as the Downtown Commission; is there any kind of prohibition for the City in conveying interest in a public street, sidewalk or square to private groups; by granting the naming rights Council will violate the public trust by giving away the City's assets to one non-profit in Buncombe County who can then sell them for their own purposes and control; how can public property be conveyed for private purposes; favoritism is given to one non-profit in Asheville for one organization's capital campaign is a slippery slope; the name SECU does not meet the criteria in the naming of publicly owned properties policy adopted by City Council in March, 2014; Council should have asked the Buncombe County Commissioners for their input; entire process was flawed, secretive and not transparent; and public not given the opportunity to read the signed lease:

Ms. Leslie Anderson
Mr. Adrian Vassallo, member of the Asheville Downtown Association and Asheville Downtown Commission
Mr. Ken Michalove
Mr. Jerry Rice, County resident

Mr. Ted Prosser
Brother Christopher Chiaronmonte

Councilman Bothwell noted that the area still is South Pack Square. He said we rent out public sidewalks all the time for restaurants - that is not unusual.

Councilman Smith agreed this is a flawed process and we will have to figure out what the process should look like. He noted that SECU is trying to improve this public asset.

City Manager Jackson said that he conveyed his frustration to the AAM Manager noting that City Council should have known this was coming forward earlier. A better model might be similar to when the Pack Square Conservancy had a plan to pursue donors. They provided Council with deep criteria and said they would be pursuing donors. They asked for Council's comfort with the potential donors and the locations. He suggested that might be a better process.

Councilman Pelly also agreed that the process is flawed. He felt it was his job as a Council member to look at long-term best interests of the City. Once the AAM is complete and school children will discover the world of art, then he thought his decision to support this action will have been the right one.

The motion made by Vice-Mayor Hunt and seconded by Councilman Davis carried unanimously.

RESOLUTION BOOK NO. 35 - PAGE 420

VI. NEW BUSINESS:

A. RESOLUTION NO. 14-248 - RESOLUTION APPOINTING MEMBERS TO THE PLANNING & ZONING COMMISSION

Vice-Mayor Hunt said that the terms of Jeremy Goldstein, Jane Mathews and Kristy Carter, as members on the Planning & Zoning Commission, expired on August 14, 2014.

The following individuals applied for a vacancy (including the three incumbents Jeremy Goldstein, Jane Mathews and Kristy Carter): Mark DeVerges, Colin Dennehy, Dean Pistor, Eric Workman, Laura Berner Hudson, Peter Alberice, Richard Fort and Allen Ollendorff. Dean Pistor withdrew his application; and Eric Workman and Richard Fort did not submit written responses to questions and are not eligible for consideration.

After City Council reviewed all responses to essay questions submitted to all candidates (including incumbents), City Council instructed the City Clerk to arrange interviews for Jeremy Goldstein, Jane Mathews, Kristy Carter, Laura Berner Hudson, Peter Alberice and Allen Ollendorff.

After Council spoke highly of all the candidates, Jeremy Goldstein received 4 votes, Jane Mathews received 3 votes, Kristy Carter received 7 votes, Laura Berner Hudson received 7 votes, Peter Alberice received no votes, and Allen Ollendorff received no votes. Therefore, (1) Jeremy Goldstein and Kristy Carter were reappointed as members of the Planning & Zoning Commission to each serve an additional three-year term respectively, terms to expire August 14, 2017, or until their successors have been appointed; and (2) Laura Berner Hudson was appointed as a member of the Planning & Zoning Commission to serve a three-year term, term to expire August 14, 2017, or until her successor has been appointed.

RESOLUTION BOOK NO. 36 – PAGE 418

B. RESOLUTION NO. 14-249 - RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Recreation Board.

Mr. Wayne Wheeler has resigned from the Recreation Board, thus leaving an unexpired term until June 30, 2015.

The following individuals applied for the vacancy: Brian Rowland, Forrest P. Merithew and Dean Pistor.

On October 14, 2014, City Council instructed the City Clerk to arrange interviews for Brian Rowland and Forrest Merithew. Mr. Rowland could not be reached for an interview.

Councilman Smith moved to appoint Forrest Merithew as a member to the Recreation Board to serve the unexpired term of Mr. Wheeler, term to expire June 30, 2015, or until his successor has been appointed. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 36 – PAGE 419

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Brother Christopher Chiaronmonte spoke about no prayer at City Council meetings.

The following individuals commented about the issues at the Asheville Police Department: Mr. Rondell Lance, President of the Fraternal Order of Police Lodge 1 in Asheville; Mr. John Midgette, Executive Director of the North Carolina Police Benevolent Association; Mr. Tracey DeBruhl; Mr. Ed Carroll; Ms. Phillips; and Mr. Jerry Rice.

Mr. Martin Ramsey urged City Council to institute a municipal minimum wage, or to place the issue on the ballot. Councilman Smith asked City Attorney Currin to review the information Mr. Ramsey presented from the N.C. Justice Center and provide Council with her opinion about the feasibility of a referendum.

Ms. Emma Greenbaum, Sierra Club's organizer for the Beyond Coal Campaign, and Mr. R. Keeler urged Council to continue asking questions regarding the Asheville coal plant and to keep the pressure on Duke Energy and other providers to push for clean energy.

Ms. Leslie Anderson commented on the lease of the Asheville Art Museum, noting that the Asheville Art Museum lease is not a comparable situation when the Pack Square Conversancy used when they did their naming rights.

Ms. Barbara Freeman spoke against abortion.

Closed Session

At 7:55 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. The statutory

authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3). This motion was seconded by Councilman Pelly and carried unanimously.

At 8:07 p.m., Councilman Bothwell moved to come out of closed session. This motion was seconded by Councilwoman Wisler and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 8:07 p.m.

Magdalen Burleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – November 11, 2014- 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: Vice-Mayor Marc W. Hunt

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance. She also asked for the public to recognize and honor Veterans Day.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Community & Economic Development Director Sam Powers, and consensus of Council, Consent Agenda Item P was added to the Consent Agenda.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 28, 2014

B. RESOLUTION NO. 14-251 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE CITY MARKET ON DECEMBER 6 AND 13, 2014

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Asheville City Market on December 6 & 13, 2014.

Appalachian Sustainable Agriculture Project has requested through the City of Asheville Office of Economic Development that City Council permit the sale of beer and/or unfortified wine on two occasions of the Asheville City Market and allow for consumption at those occasions.

Asheville City Market occasions with the sale of beer and/or unfortified wine will be held on Saturday, December 6 and Saturday, December 13, 2014, from 8:00 a.m. – 1:00 p.m. at the city-owned parking lot located at 161 S. Charlotte Street as per the event area limits referenced on the accompanying site map.

Pro:

- Allows fundraising opportunities for Appalachian Sustainable Agriculture Project.

Con:

- Potential for public safety issues

City staff recommends City Council adopt the resolution authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Asheville City Market dates 12/6/14 and 12/13/14.

RESOLUTION BOOK NO. 36 - PAGE 421

C. ORDINANCE NO. 4361 - BUDGET AMENDMENT FOR JULY 2013 SEVERE STORM CLEANUP

Summary: The consideration of a budget amendment in the amount of $101,107.33 to budget in the Special Revenue Fund for additional anticipated reimbursements from the Federal Emergency Management Agency and North Carolina Department of Public Safety for the declared disaster identified as FEMA–4146-DR-NC.

During the period of July 3-13, 2013, Western North Carolina including Buncombe County and the City of Asheville experienced severe storms leading to flooding, landslides, and mudslides.

On September 25, 2013, the U.S. Department of Homeland Security's Federal Emergency Management Agency (FEMA) announced that federal disaster aid has been made available to the State of North Carolina and ordered federal aid to supplement state and local efforts in the areas affected by severe storms, flooding, landslides, and mudslides during the period of July 3-13, 2013.

On October 11, 2013, staff met with the North Carolina Division of Public Safety (NCDPS) and FEMA, and concluded that the City of Asheville would be eligible for financial assistance under declaration number FEMA-4146-DR-NC.

On March 25, 2014, City Council adopted Budget Ordinance Amendment No. 4292 in the amount of $2,369,143.30 to (1) budget in the Special Revenue Fund $2,303,481.10 in anticipated reimbursements from the Federal Emergency Management Agency and North Carolina Department of Public Safety; and (2) move $65,662.20 in budget from the General Fund to the Special Revenue Fund for repair costs not covered through the reimbursements above.

Due to higher than anticipated contract expenses to complete the Bent Tree Rd. and Sunset Dr. wall projects, staff is requesting a budget amendment in the amount of $101,107.33 to budget in the Special Revenue Fund for additional anticipated reimbursements. This is an overrun of the original estimates, but will be fully reimbursable.

1. Bent Tree Rd. Repair (K1423) – Severe rainfall resulted in storm water flooding and flowing over the road causing severe erosion of the integral ground supporting the road and damage to the pavement. The area of erosion is approximately 75-ft-long x 20-ft-high x 5-ft-wide. Repair is underway and construction is on schedule. $28,116.65 of the total estimated cost of $817,583.91 has been received as reimbursement for expenses to date.
2. Sunset Drive Repair (K1422) - Severe rainfall resulted in storm water flooding and flowing over the road causing severe erosion of the integral ground supporting the road and damage to the pavement. The area of erosion is approximately 110-ft-long x 20-ft-high x 5-ft-wide. Repair is underway and construction is on schedule. $7,500 of the total estimated cost of $1,008,720.15 has been received as reimbursement for expenses to date.

This budget amendment is necessary to properly allocate the disaster aid reimbursements to the correct project expenses, and to replenish City funds that have already been spent in the General Fund.

Pros:

- Recovery of costs associated with declared disaster.
- This will allow the City to pay contractors for work yet to be completed.

Cons:

- Without transfer of funds to the identified accounts, infrastructure will further deteriorate.

- Failure to approve the amendment will prevent completion of the unfunded projects.

As noted above, repair costs for Bent Tree Road and Sunset Drive have exceeded initial estimates, and the budget for the two projects needs to be increased by a total of $101,107.33. The budget amendment will be fully covered with reimbursements from the Federal Emergency Management Agency and North Carolina Department of Public Safety.

City staff recommends City Council adopt the budget amendment in the amount of $101,107.33 to budget in the Special Revenue Fund for anticipated reimbursements from the Federal Emergency Management Agency and North Carolina Department of Public Safety for the declared disaster identified as FEMA–4146-DR-NC.

ORDINANCE BOOK NO. 29 - PAGE 266

D. RESOLUTION NO. 14-252- RESOLUTION ACCEPTING 2014 EMERGENCY SOLUTIONS GRANT FROM THE STATE OF NORTH CAROLINA IN ORDER TO FUND LOCAL AGENCIES

ORDINANCE NO. 4369 - BUDGET AMENDMENT FOR 2014 EMERGENCY SOLUTIONS GRANT FUNDS

Summary: The consideration of (1) a resolution accepting the 2014 Emergency Solutions Grant in order to fund local agencies; and (2) a budget amendment in the amount of $194,492 to establish a budget for the grant in the City's Special Revenue Fund.

In the process approved by Council at the September 9, 2014 Council meeting, the City submitted a timely application to the State of North Carolina Division of Aging and Adult Services (DAAS), Housing and Homeless Unit for Emergency Solutions Grant funding. Funding recommendations were made to the Housing and Community Development Committee by the Homeless Initiative Advisory Committee. These recommendations followed a process that included submittal of letters of intent from eligible agencies, review and preliminary selection by the ESG Subcommittee of the Advisory Committee, and endorsement of those recommendations by the Asheville Homeless Coalition and the Homeless Initiative Advisory Committee. The recommendations were approved by the Housing and Community Development Committee.

We have been informed that our application has been approved, with the following agency awards:

	Emergency Response	Housing Stabilization	HMIS	Total
Organization				
ABCCM		$ 68,500		$ 68,500
Helpmate	$ 22,000			$ 22,000
Homeward Bound		$ 71,992		$ 71,992
Salvation Army	$ 20,000			$ 20,000
City of Asheville			$ 12,000	$ 12,000
TOTAL REQUESTS	$ 42,000	$ 140,492	$ 12,000	$ 194,492

These awards are conditional on providing to the State additional information needed and/or assurances that must be provided. These conditions will include, but are not limited, to adequate documentation of required matching funds. These matching funds are provided by the individual agencies (and not the City).

Additionally, the State has awarded **$50,000** to be used for either Rapid Re-housing or HMIS activities due to the high score of the City of Asheville's original application. The Housing

and Community Development Committee recommends these additional funds be allocated to ABCCM for Rapid Re-housing for families with children to increase their award to **$68,500** total funds.

Pro:
- ESG funding is a key funding resource for emergency shelter, and is now becoming an important resource for rapid re-housing of persons experiencing homelessness.

Con:
- None noted.

Program funding is entirely from the US Department of Housing and Urban Development, through the State of North Carolina. Existing community development division staff will administer the program. No general funds are requested to support this program.

The recommendation is the acceptance of these funds, and subgranting of those funds to the agencies for the programs approved by the State Division of Aging and Adult Services (DAAS), Housing and Homeless Unit; and adoption of a budget amendment in the amount of $194,492 to establish a budget for the grant in the City's Special Revenue Fund.

RESOLUTION BOOK NO. 36 - PAGE 424
ORDINANCE BOOK NO. 29 - PAGE 297

E. RESOLUTION NO. 14-253 - RESOLUTION AUTHORIZING ADDITIONAL SUBORDINATION OF LOANS MADE TO MOUNTAIN HOUSING OPPORTUNITIES FOR THE EAGLE MARKET PLACE PROJECT

Summary: The consideration of a request by Mountain Housing Opportunities for the City to additionally subordinate its loans to the Eagle Market Place development.

Mountain Housing Opportunities is requesting the City subordinate further its two loans for the Eagle Market Place development. The request has two elements:

1. To allow the additional subordination of the City's Urban Development Loan (UDL) of $3.8 million during the construction period to the North Carolina Housing Finance Agency "RPP" loan, which would place our loan in fourth position during construction. This will allow the infusion of $800,000 in RPP fund (funds already committed by the North Carolina Housing Finance Agency but not usually available in the construction phase) into the project during construction, reducing borrowing costs. Our agreement with MHO allows for the draw of $1 million of the City's UDL during construction. Upon completion of construction, and the close of permanent financing, our UDL loan will be in second position, as indicated in our Loan Agreement with MHO.

2. To allow the additional subordination of the City's Housing Trust Fund (HTF) loan of $800,000 to fifth position during construction, and to fourth position at the close of permanent financing. This requires both approval of the change in conditions of the HTF Loan Agreement (which indicates that the HTF loan will be in second position) and a waiver from our current HTF policy, which requires that our loan be in no less than third position. Staff thinks that the second position described in the Loan Agreement probably assumed that the HTF and UDL would be combined. Regardless, the fourth position post-construction is to allow the County's $2 million loan to have a superior position. Post construction, the City will be adequately collateralized in any case. Because the County's funds will not be invested as cash into the project until after completion of construction,

the City's HTF funds are functionally in the same place as the City's UDL during construction.

The HCD Committee reviewed this request at its October 21, 2014 meeting and recommended approval.

Pro:

- The loan subordination will allow for the necessary investment of leveraged funds into the project during the construction phase, thereby reducing the need for borrowed funds.

Con:

- In the very unlikely event the project was terminated prior to completion of construction, the City's invested funds would be less secure.

The request would have a fiscal impact only if the project were not to be constructed as planned. In that unlikely case, it would be in the best interests of all parties to ensure completion of a project on the site, and security position would have an impact on recovery of costs via the completed project. Assuming the completion of the project as planned, the City is well-protected, both by the nature of the project and its post-completion value.

City staff recommends approval of a resolution authorizing additional subordination of loans made to Mountain Housing Opportunities for the Eagle Market Place development.

RESOLUTION BOOK NO. 36 - PAGE 425

F. RESOLUTION NO. 14-254 - RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO BE THE LOCAL GOVERNMENT PARTNER FOR THE ASHEVILLE AREA ARTS COUNCIL'S APPLICATION FOR THE 2015 NATIONAL ENDOWMENT FOR TH ARTS OUR TOWN GRANT

Summary: The consideration of a resolution authorizing the City of Asheville to be local government partner for the Asheville Area Arts Council grant application to the National Endowment for the Arts 2015 *Our Town* grant and consideration of match funding request for this grant.

The National Endowment for the Arts (NEA) offers numerous grants in a variety of art and design categories. For 2015, the NEA is offering the *Our Town* grant for projects that contribute toward livability of communities and help to transform them into lively, beautiful and resilient places with the arts at their core. The NEA defines these efforts as *Creative Placemaking*. *Our Town* prioritizes partnerships with arts organizations and government, private and non-profit organizations to achieve livability goals for communities. Our Town offers support for projects in two areas:

1. Arts engagement, cultural planning and design, projects that represent the distinct character and quality of their communities and

2. Projects that build knowledge about *Creative Placemaking*.

Our Town grants will invest in creative and innovative projects in which communities, together with their arts and design organizations and artists, seek to improve their quality of life, encourage creativity, create community identity, a sense of place and revitalize local economies.

To submit an application, eligible primary partners must be eligible local governments and local arts agencies or other departments, agencies or entities within an eligible local government. Only one application per city/town/county will be accepted. The Asheville Area Arts

Council meets the criteria as an arts agency with proven three (3) year history of arts programming.

Initial application submission begins December 15, 2014, through Grants.gov. Then final application, program narrative and financial information will be due January 15, 2015. Applications will be reviewed in April 2015, award notification is July 2015 and earliest project start is October 1, 2015.

The grant requires a non-federal dollar for dollar match, which may include in-kind, cash and volunteering. Matching funds for this grant are not required at the initial submission of the application but must be confirmed prior to award (July 2015).

The AAAC has worked with the Buncombe Cultural Alliance to seek matching funds in addition to the funds requested from the City of Asheville. In kind support has been requested from the Economic Development Coalition and additional requests will be submitted to Buncombe County ($25,000) and the Community Foundation of Western North Carolina.

City staff has been a working part of the recently formed Buncombe Cultural Alliance (BCA) since 2013. The BCA is a forum, not an organization. The Asheville Area Arts Council (AAAC), with the agreement of BCA partnering organizations, provides the coordination and infrastructure support necessary to maintain the vessel of the BCA. This allows the BCA to lend its full support to the collaborative efforts of arts organizations, artists and arts & cultural partners, and to not create a new, competing nonprofit organization or programming. The AAAC participates as an equivalent member in decisions works to capture and convey the work of the BCA through the annual Creative Sector Summit, and helps to facilitate partnership opportunities and the delivery of strategies that arise as a result of the BCA's work.

The BCA has agreed on an initial project to conduct a cultural asset inventory. It is a cross sector collaborative assessment of Buncombe County's cultural resources including but not limited to creative industry jobs and businesses, cultural amenities, public art, market opportunities, and arts and culture related resources such as nonprofit and educational programs and services, equipment, space, capital, and supply.

A Cultural Resources Asset Inventory captures important information about the scope of the economic activity of creative industry not captured in the area using traditional industry codes.

1. The data captured provides new information about the scale and nature of economic activity related to cultural and creative industry based businesses, such as the export and sale locally of creative product, the number of artisans and creative industry businesses in the area, supply chain information, related professional services industries supported, available and related real estate use, and the like.

2. Information gathered provides feasibility for arts based development and related uses, such as artist workforce housing and studios.

3. The inventory creates a common use, business to business database of arts and culture partners.

4. The process identifies need and resources for the creation and support of new and existing strategy in order to support long range cultural planning, as seen in planning efforts such as Imagine Chattanooga 2020 (http://imaginechattanooga2020.org/).

5. Supports the implementation of existing plans such as the Asheville Downtown Master Plan (http://www.ashevillenc.gov/Departments/EconomicDevelopment/ProjectsInitiatives.aspx).

6. Provides cultural resource data to enhance existing GIS based tools such as the WNC

Vitality Index (http://www.wncvitalityindex.org/) and GroWNC maps, similar to CultureBlocks.com in Philadelphia.

7. Increases the area's eligibility for additional Creative Place making funding from the National Endowment for the Arts, ArtPlace, SmArt Initiative, and similar funds.

The request to the National Endowment for the Arts will be $75,000. Support is being sought from the City as part of the match in the amount of $25,000. Additional support is currently being requested.

Staff Review:

- A successful grant application will provide funds for marketing, outreach, data collection and analysis, release and publication of reports.
- If awarded funds, AAAC and its partners will conduct a public process, coordinating with other national and local processes, to capture the scope of creative industry economic activity in Buncombe County. The AAAC and partners, including the North Carolina State Arts Council will identify data sets congruous with the NC Creative Economy work of 2007 and 2009, as well as the Economic Development Coalitions Arts and Economic Impact study, and the Americans for the Arts survey that produces Arts and Economic Prosperity V. The AAAC will manage the process with partners including public meetings, survey, marketing and outreach, the management of data, and reporting, and the creation of the database.
- This application will be presented to the Public Art & Cultural Commission in November 2014.
- Staff recognizes the need for the AAAC to build capacity in the performance of this grant. The AAAC understands that and understands that the ultimate goal of the NEA Our Town Grant is to support collaborative efforts that bring results for the entire community and addresses community goals.

Request for consideration of this grant partnership was presented to PED at their meeting on October 21, 2014. They approved this item to be place on your agenda for consideration and approval with the following:

- There should be outreach efforts made to other local government to assist in supporting the work and consideration of matching funds not just other arts agencies and non-profits as this project will benefit and have an impact to all of Buncombe County.
- If approved, the city's match will be contingent upon the outcome of this outreach and support from other local governments.

The grant will support City Council's goal to create economic development and community investment opportunities through partnerships, planning and incentives and to continue to support Asheville as a culturally diverse city.

Pros:

- The City of Asheville will not have fiduciary responsibility on this grant.
- The City would partner with the Asheville Area Arts Council and other arts, culture and entertainment agencies in the fulfillment of this grant programming.
- The inventory will provide important economic development data for future planning and funding.
- It will fulfill the inventory of this kind which was recommended in the 2009 Downtown Master Plan.
- It will serve to unify the creative sector around common goals and a great sense of viability.
- A work plan will be provided to the community for arts driven economic development.
- A framework/strategy will be provided for the support of creative industry entrepreneurship.
- It supports the fulfillment of Asheville's brand promise through enhanced cultural activity.
- It strengthens the community's eligibility for additional infrastructure funding.

- It provides a compass for the development of the identified Innovation Areas, especially the River Arts District.
- An opportunity is provided for marketing the importance of arts and culture, for citizen engagement.
- It builds on existing planning efforts and supports strategic implementation.
- It builds a greater level of partnership between City and creative constituency, County, and arts partners.
- Without the inventory, funds will be spent on creative industry activity with a long range vision and clearly identified goals and reduces the loss of valuable creative people and related businesses.
- It will reduce the impact of the loss of artists due to gentrification.

Cons:

- None noted at this time.

The fiscal impact of the City's support to this grant application is grant matching funds in the amount of $25,000. If Council approves this request, staff will include funding for the match in the Proposed FY 2015-16 Budget that is presented to Council next spring. As recommended by PED Committee, City matching funds will be contingent upon financial support from other local governments. Additionally, staff time and resources will be required in the performance of this grant.

Approval by City Council for the community partnership for the Asheville Area Arts Council's 2015 NEA *Our Town* grant application; and consideration of the matching funds requested in the amount of $25,000 which will be budgeted for Fiscal Year 2015-16, subject to (a) other local government match funding; and (b) combination of cash (no amount specified) and in kind.

RESOLUTION BOOK NO. 36 - PAGE 426

G. RESOLUTION NO. 14-255 - RESOLUTION AUTHORIZING THE STANDARDIZATION PURCHASE OF SAFARILAND BALLISTIC VESTS FOR CONSISTENCY IN OPERATION AND FUNCTIONALITY IN THE ASHEVILLE POLICE DEPARTMENT

Summary: The consideration of a resolution authorizing the Asheville Police Department to purchase, through standardization, Safariland Second Chance Body Armor through Fiscal Year 2019.

The Asheville Police Department (APD) has been utilizing Second Chance Concealable Body Armor Vests exclusively since 2009. During this time, APD officers have experienced consistent performance while wearing these vests on a daily basis in conducting their policing duties, which have included various force scenarios. The updated version of ballistic vest recommended for standardization is the Safariland Second Chance Summit threat level II and IIIA.

Currently, APD has a long-standing relationship with Lawmen's Safety Supply as a distributor for our equipment needs. North Carolina General Statute 143-129 (e) allows exceptions to formal bidding when standardization or compatibility is the overriding consideration; Lawmen's Safety Supply is identified as the only Safariland authorized distributor eligible to place bids for the State of North Carolina.

Lawmen's has consistently provided excellent customer service, and representatives from both Safariland and Lawmen's have exceeded the Department's expectations with support and assistance.

Pros:

- Reduction in cost to the City of Asheville for the purchase of ballistic vests
- Increase in officer safety by providing crucial safety equipment
- Consistency in equipment when replaced or inventory is increased

Con:

- None

The exception to bid will have no adverse fiscal impact.

City staff recommends City Council adopt a resolution authorizing the Asheville Police Department to purchase, through standardization, Safariland Second Chance Summit Body Armor through Fiscal Year 2019.

RESOLUTION BOOK NO. 36 - PAGE 427

H. RESOLUTION NO. 14-256 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH NHM CONSTRUCTORS, LLC, FOR THE FINALEE AVENUE RETAINING WALL CONSTRUCTION PROJECT

ORDINANCE NO. 4362 - BUDGET AMENDMENT FOR THE FINALEE AVENUE RETAINING WALL CONSTRUCTION PROJECT

Summary: The consideration of (1) a resolution authorizing the City Manager to execute on behalf of the City of Asheville a contract in the amount of $658,578.50 plus a contract contingency of 15% ($98,786.78) with NHM Constructors, LLC for the project known as Finalee Ave. Retaining Wall Construction; and (2) a budget amendment in the amount $386,403 from debt proceeds to fully fund costs associated with the project.

From January 1, 2013, to July 8, 2013, the Asheville area received 41.67 inches or rainfall, exceeding the City's normal annual rainfall for the same time period by 4.68 inches. The stretch of Finalee Ave. adjacent to and above the property located at 760 Biltmore Ave. experienced structural damage to the soils adjacent to the road surface.

Several large and complicated landslides required consultation outside the City workforce, and several consultants were chosen for the more extensively damaged areas. To reinforce the road surface, a design including a soldier pile and lagging retaining wall was chosen for this site, and includes some road rebuilding. The project was advertised on September 9, 2014. Bids were opened and the following bids were received:

NHM Constructors, LLC	Asheville, NC	$658,578.50
Graham County Land Company	Robbinsville, NC	$818,115.50

NHM Constructors, LLC was the lowest responsible bidder with a bid of $658,578.50. Adding in a 15% contingency, the total required budget for construction is $757,365. Project design consultants, right of way expenses, utility relocation, and construction observation consultation total an additional $88,738. Finally, City of Asheville labor costs are budgeted at $90,300; bringing the total budget for the project to $936,403. The work produced from this contract would resolve liability issues associated with a deteriorating road structure and rebuild the road's underlying support.

Pro:

- Will remove a potential liability issue from the City's transportation network.

Cons:

- Project management and contract administration will consume staff time.
- Financial obligations of project work.

In June 2014, City Council adopted an initial budget for this project that totaled $550,000.00. Staff now anticipates that the total cost for this project will be $936,403, which includes design costs, internal labor, easement acquisition, utility relocation, and the contract with NHM Constructors, LLC. The budget amendment tonight in the amount of $386,403 will fully fund the contract and other costs associated with the project. The project will be funded with debt proceeds with an anticipated twenty year amortization schedule.

City staff recommends City Council adopt (1) the resolution awarding the contract to NHM Constructors, LLC and authorizing the City Manager to execute on behalf of the City of Asheville a contract in the amount of $658,578.50 plus a contingency of 15% ($98,756.78), for a total of $757,335.28, with NHM Constructors, LLC for the project known as Finalee Ave. Retaining Wall Construction; and (2) a budget amendment in the amount of $386,403 from debt proceeds to increase the existing project budget to cover the contract, right of way expenses, utility relocation, construction observation consultation, City of Asheville labor, and the 15% contingency.

RESOLUTION BOOK NO. 36 - PAGE 428
ORDINANCE BOOK NO. 29 - PAGE 268

I. **RESOLUTION NO. 14-257 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH ARMEN CONSTRUCTION LLC, FOR THE SHILOH ROAD SIDEWALK IMPROVEMENTS PROJECT**

ORDINANCE NO. 4263 - BUDGET AMENDMENT FOR THE SHILOH ROAD SIDEWALK IMPROVEMENTS PROJECT

Summary: The consideration of (1) a resolution authorizing the City Manager to execute a contract with Armen Construction, LLC, for the amount of $138,000 plus 15% contingency and any change orders within the project budget for the project known as Shiloh Road Sidewalk Improvements, City of Asheville Project #ENG-12-13-003; and (2) a budget amendment, in the amount of $73,550 from savings in other sidewalk projects, to provide adequate funding for the proposed bid and the cost of staff time for this project.

This project will build a much needed sidewalk along Shiloh Road and provide connectivity along from the Community Center to Hendersonville Road. Pedestrians currently walk along the road shoulder or in the street itself. The project is ready to begin. All easements have been donated to the City. The scope of work includes the installation of sidewalk, ADA ramps, driveway aprons, and utility relocations. The bids were opened on October 29, 2014, and the results were as follow:

Armen Construction, LLC, Charlotte, NC	$138,000.00
Patton Construction Group Inc., Asheville, NC	$183,990.00

Pros:

- Improves pedestrian safety.
- Encourages walking, thereby reducing carbon emissions.

Con:

- Project management and contract administration will consume staff time.

The project budget will be $189,775. The budget amount consists of $116,225.00 that was previously budgeted in the City's CIP, and $73,550 that will be allocated from savings in other sidewalk projects.

City staff recommends that City Council adopt a resolution awarding the contract to Armen Construction, LLC; authorizing the City Manager to execute the contract and any change order within the budgeted amount of $189,775; and adopt the associated budget amendment in the amount of $73,550.

RESOLUTION BOOK NO. 36 - PAGE 429
ORDINANCE BOOK NO. 29 - PAGE 270

J. RESOLUTION NO. 14-258 - RESOLUTION AUTHORIZING THE CITY MANAGER TO CONVEY AN EASEMENT TO DUKE ENERGY PROGRESS INC. OVER A PORTION OF CITY-OWNED PROPERTY AT JOHNSON BOULEVARD

Summary: The consideration of a resolution authorizing the City Manager to convey an easement to Duke Energy Progress, Inc. over a portion of City-owned property at Johnston Boulevard and Roger Farmer Park.

The City of Asheville owns real property at PIN #9628663324 and it is currently in use as a recreational park called Roger Farmer Memorial Park. It contains 9.24 acres and the entrance to the park is on Johnston Boulevard. This property is improved with three ballfields, a picnic shelter, concession and restrooms.

Duke Energy is rebuilding an obsolete feeder line along Johnston Blvd. in order to improve reliability to this West Asheville community. The lines will be replaced and voltage increased. The current lines will be relocated to the park side of Johnston Blvd. to facilitate maintenance of the infrastructure from the roadway. This is part of a larger project that extends from Patton Avenue to Bear Creek. This project will only affect road frontage on Johnston Blvd. Access to the park could be affected during the installation of the poles, but it should not constitute a significant amount of time. A guard rail could be affected by the project, but restoration is promised as a part of the provisions of the easement document.

The easement area being requested extends 267 feet along the road frontage. The total width of the easement is 15' on either side of the line and the City is being asked to absorb 9' of the total thirty. This is approximately 2,403 square feet of permanent easement that is being requested. As a result of input from the City Transportation Director, we are stipulating that the poles be at least 7 feet from the edge of pavement. In this way, the new infrastructure will not inhibit the City's ability to install a sidewalk or greenway at a later date. The assistant city attorney has reviewed the easement document.

Pros:

- Granting of the easement will allow Duke Energy to upgrade power infrastructure to provide improved service to the West Asheville neighborhood.
- Granting of the easement will not affect the long range use of the park for public recreation.

Cons:

- The only cons are short term in nature and will take place only during installation of the poles, guide wires and anchors.

City staff recommends City Council approve a resolution authorizing the City Manager to convey a 2,403 square foot easement over a portion of City-owned property at Johnston Boulevard to Duke Energy Progress, Inc.

RESOLUTION BOOK NO. 36 - PAGE 430

K. RESOLUTION NO. 14-259 - RESOLUTION ACCEPTING A GRANT FROM THE N.C. DEPT. OF PUBLIC SAFETY FOR THE PURCHASE OF EQUIPMENT FOR THE HAZARDOUS MATERIALS REGIONAL RESPONSE TEAM 6 - ASHEVILLE

ORDINANCE NO. 4364 - BUDGET AMENDMENT FOR THE HAZARDOUS MATERIALS REGIONAL RESPONSE TEAM 6 - ASHEVILLE

Summary: The consideration of the following items relative to a grant for the Hazardous Materials Regional Response Team: (1) a resolution authorizing the City Manager to accept a non-matching grant from the N.C. Department of Public Safety, Division of Emergency Management, for the procurement of equipment to be used by Hazardous materials Regional Response Team 6 – Asheville; and (2) the associated budget amendment, in the amount of $27,400.

The U.S. Department of Homeland Security Grant Program (HSGP) has made funds available through State Homeland Security Grant Number: EMW-2014-SS-00069-S01 to implement the State Homeland Security Strategy. The strategy identifies the NC Hazardous Materials Regional Response Teams (RRT) as an integral component of North Carolina's preparation and response to manmade and natural emergencies and disasters. The purpose of the grant is to purchase specialized equipment to be used on-scene and to prevent, protect against, respond to, mitigate, and recover from potential acts of terrorism and other hazardous or catastrophic events.

There are seven Regional Response Teams (RRT) strategically located throughout the state. Asheville Fire Department hosts one of the seven state funded teams - RRT 6. The team responds to hazardous materials incidents in the twenty westernmost counties of North Carolina.

Each of the seven RRTs will receive an equal amount of non-matching funding and each will procure comparable equipment. The equipment consists of a handheld thermal imaging camera, a propane gas burn-off kit and LED scene lighting for the RRT-6 vehicle.

The grant is non-matching and all equipment provided through this grant will become the property of the Asheville City Government.

This grant has been reviewed by the Public Safety Committee and has been recommended for consideration by Council.

Pros:

- The Department of Public Safety, Division of Emergency Management, will provide $27,400 in non-matching funds for the purpose of upgrading Asheville and Western North Carolina's terrorism response capabilities.
- The equipment is state of the art and will better address the risk of terrorist's attacks and hazardous materials incidents.
- All statewide regional response teams will be comparably equipped and interoperability will be realized should an event require the resources of additional teams.
- This equipment is immediately available to Asheville residents and businesses. This level of equipment would most likely not be able to be obtained through the city's general budget process.
- Firefighter and citizen safety will be enhanced.

Con:

- The City of Asheville will be responsible for maintenance and upkeep of the equipment.

There is no fiscal impact associated with the receipt of this grant, as it is non-matching. However, the City of Asheville takes ownership of the purchased equipment, necessitating routine maintenance and upkeep costs to be incurred by the City, which will be absorbed by our annual operating budget.

City staff recommends that City Council take the following action: (1) authorize the City Manager to accept the non-matching grant from the NC Department of Public Safety, Division of Emergency Management, to enhance AFD's capabilities to protect Asheville and Western North Carolina; and (2) adopt the associated budget amendment.

RESOLUTION BOOK NO. 36 - PAGE 431
ORDINANCE BOOK NO. 29 - PAGE 272

L. RESOLUTION NO. 14-260 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM FOR YEAR 2 OF THE MULTI-JURISDICTIONAL DWI TASK FORCE

ORDINANCE NO. 4365 - BUDGET AMENDMENT TO ESTABLISH YEAR 2 OF THE MULTI-JURISDICTIONAL DWI TASK FORCE

Summary: The consideration of (1) a resolution authorizing the City Manager to enter into a contract with the North Carolina Governor's Highway Safety Program (NCGHSP) for a grant to fund Year Two of the multi-jurisdictional DWI Task Force involving the Asheville Police Department (APD) and Buncombe County Sheriff's Office (BCSO); and (2) a budget amendment in the amount of $411,331 to establish a budget for the second year of the grant.

In Asheville and Buncombe County, the number of impaired drivers has been a serious concern to citizens and law enforcement for many years. Since 2010, there have been 4,434 DWI arrests by Buncombe County law enforcement agencies, more than 1,024 traffic collisions that have involved impaired drivers and 18 fatal collisions as a result of an .08 Blood Alcohol Content (BAC) or higher.

In reviewing these statistics, the NCGHSP contacted APD and suggested a DWI Task Force with a goal of reducing the number of DWI related collisions, injuries and deaths in Asheville and Buncombe County, as well as educating the public on impaired driving and its effects. A request for continuation of Year Two of a four year grant in the amount of $411,331 in FY 2015 that would cover the of cost, to pay for six officers on DWI enforcement and training. The City of Asheville and Buncombe County will match this grant at 15%. For the City, the FY 2014-15 15% match will total $40,999. Under this grant, APD would supply one sergeant and three officers while BCSO would supply two officers. These six officers would conduct targeted DWI enforcement throughout Asheville and Buncombe County and conduct DWI, seat-belt and night-time traffic safety checking stations throughout the County. The appointed officers would also hold educational events at local high schools that would focus on teen driving safety, impaired driving, distracted driving and seat-belt compliance.

Pros:

- NCGHSP grant funds for training and 85% of the costs of salary and benefits to officers participating in the DWI Task Force.

- Potential reduction in impaired driving collisions, injuries and deaths throughout Asheville and Buncombe County.

Cons:

- Funding from NCGHSP is evaluated annually and not fully guaranteed beyond the first year.
- In Year Two, the City of Asheville will be required to cover 15% of the grant of personnel costs. The grant will continue to decrease each year with the City of Asheville responsible for 100% of personnel costs at the end of the four-year grant period.

As noted above, the general fund impact in FY 2014-15 is $40,999. This amount is already included in the Police Department's adopted budget. At the end of the grant, the general fund impact will be approximately $267,325 per year to permanently add one sergeant and three officers to the APD roster. The chart below outlines the estimated general fund impact in future budget years.

FY 2016	$80,197
FY 2017	$133,662
FY 2018	$267,325

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to enter into a contract and accept grant funds through the North Carolina Governor's Highway Safety Program; and (2) a budget amendment in the amount of $411,311 to establish a budget for Year Two of the grant.

RESOLUTION BOOK NO. 36 - PAGE 432
ORDINANCE NO. 29 - PAGE 274

M. RESOLUTION NO. 14-261 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH HENDERSON COUNTY TO LEASE A BUS.

ORDINANCE NO. 4366 - BUDGET AMENDMENT TO SET THE BUDGET TO PURCHASE A REPLACEMENT COMPRESSED NATURAL GAS BUS FOR HENDERSON COUNTY'S TRANSIT SYSTEM

Summary: The consideration of (1) a resolution authorizing the City Manager to enter into an agreement with Henderson County to lease a Compressed Natural Gas (CNG) bus; and (2) budget amendment in the amount of $143,600.40 to set the budget to purchase a replacement CNG bus for Henderson County's transit system.

As a result of the 2000 Census, the City of Asheville was reclassified from a non-urbanized area to an urbanized area with a population greater than 200,000 persons and now includes municipalities in Buncombe, Haywood, and Henderson counties. After the reclassification, Henderson County's transit system became part of the transit systems operating in the overall urbanized area. The Federal Transit Administration named the City of Asheville the designated recipient and as a result, the City of Asheville oversees all of the Federal funding administration. The City of Asheville and Henderson County have signed a sub-recipient agreement that specifies how the funds are disbursed. The City of Asheville is accountable to the Federal Transit Administration regarding the use of all Federal funds and owns all the capital items that Henderson County purchases with their share of the Federal funds.

The estimated total cost of the subject project is $143,600.40. Federal funds will provide $112,828 covered with grant NC-90-X439; this grant requires a match of $28,206 provided by Henderson County, plus $2,566.40 for the title, tag and graphics. The City of Asheville performs all of the administrative tasks including the bidding process, requests for funding, review of documentation, and reporting. A contract is in place and staff will order the bus as soon as the budget is amended.

Pros:

- The bus will produce savings in maintenance and fuel costs.
- The Federal Transit Administration (FTA) provides 80% of the total estimated project cost.
- Henderson County provides 20% of the total estimated project cost plus tag, title's costs and graphics.
- There is **no** cost obligation for the City of Asheville other than administrative expenses.

Con:

- The City of Asheville is responsible for administrative expenses including staff time to oversee the project.

The total estimated project cost is $143,600.40, with 80% or $112,828 coming from Federal funds, 20% or $28,206 and tag and title in the amount of $2,566.40 coming from Henderson County. There is no direct fiscal impact to the City of Asheville, however the City's cost of administering the project is not recovered.

City staff recommends that City Council approve (1) a resolution authorizing the City Manager to enter into an agreement with Henderson County to lease one CNG Bus; and (2) adopt the associated budget amendment.

RESOLUTION BOOK NO. 36 - PAGE 433
ORDINANCE BOOK NO. 29 - PAGE 276

N. REPORT ON ONE-YEAR UPDATE ON UNIFIED DEVELOPMENT ORDINANCE AGRICULTURAL AMENDMENT

Summary: This is a one-year review of the Agriculture Amendment that was presented and approved by City Council on September 24, 2013 (Ordinance 4233). The impetus for the amendment came from local citizens interested in food policy issues such as food security, sustainability and the expansion of agricultural production. Efforts were made to review code items that may have been hindering the creation or expansion of farming activities throughout the city.

The code changes are outlined below:

- 'Agriculture' as a land use was added to the table of uses in the UDO as either a permitted use in non-residential districts or a *use by right subject to special requirements* (USSR) in residential districts.
- Structure sizes for agricultural uses in non-residential districts are only limited by general structure limitations for the zoning district in which they are located.
- Standards for residential districts as a USSR were amended to:
    - Allow a farm stand to operate on a daily basis on the farm property to sell items produced on site.
    - Allow animals as a part of an agricultural activity by permit
    - Create a standard for stand-alone structures on a community garden space

- Provide special provisions for structures used in agricultural production with building sizes that are separate from other accessory standards on the same property

The ordinance was greeted with enthusiasm when it was adopted in September 2013. Staff has reviewed the development records over the past year and initially found that there were no permits issued to build agricultural structures or establish an agricultural use. After attending a food policy council meeting in September and speaking with some members of that group, staff learned that there have been several storage sheds constructed on garden sites. Since the structures are smaller in scale and do not require a building permit, there is no record of the construction.

Other suggestions shared by the group to encourage additional urban farming activity:

- Encourage changes in state law to expand the range of eligible properties to participate in the *present use valuation* method instead on market value to determine property taxes. This method which typically applies to larger farm tracts, usually reduces the property tax burden for property owners engaging in agricultural activities. If the qualifying regulations were changed, smaller tracts could receive some tax relief and subsequently less pressure to sell off excess land for redevelopment. This change would require revamping the regulations at the state level.
- Farmers need access to affordable land and so an idea was offered with a suggested name- 'farm my yard' where property owners on a voluntary basis would allow local farmers to undertake agricultural activities on their excess property. There are no required changes to city regulations to allow this type of exchange to occur. In some situations, a grading permit may be required depending on the size of the area.
- One local farmer mentioned the need for flexibility in housing accommodations on a farm to house farm workers (often volunteers). The zoning for many farm operations is residential and single-family residential zoning limits the number and types of residential units allowed on a single parcel. Also normal building code and housing standards need to be met for the construction of safe housing units which can make the cost of housing more expensive. Some rural farms utilize recreational vehicles and manufactured housing (mobile homes) to provide accommodations for farm workers. There are not many options for permitting recreation vehicles for occupancy (RVs or similar structures) except where temporary accommodations are allowed such as camp grounds. Asheville does permit manufactured housing which is limited by location as an overlay as either an individual manufactured housing site or manufactured housing communities. There has not been much discussion to expand the overlay for manufactured housing.
- Other ideas from the Food Policy group related to permitting distribution sites for local CSAs (*community supported agriculture* farm operations) at neighborhood sites for the convenience of local members. This type of activity is already allowed by existing ordinances.
- There was one request from the past year where a woman wanted to operate a mobile farm vending truck and that was approved and issued under a temporary use provision already in the ordinance.

In developing the City's legislative agenda, it is recommended that any legislative changes be directed to the Governance Committee for their review. For suggested changes to the Unified Development Ordinance, it is recommended that those be forwarded to the City Council Planning & Economic Development Committee for their review.

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

O. MOTION AUTHORIZING THE MAYOR TO SIGN A LETTER TO SUPPORT ACTION TO HELP STOP GLOBAL WARMING

p. RESOLUTION NO. 14-264 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH WNC ROOFING INC. FOR REPAIR WORK TO THE THOMAS WOLFE AUDITORIUM

ORDINANCE NO. 4370 - BUDGET AMENDMENT FOR THE REPAIR WORK TO THE THOMAS WOLFE AUDITORIUM ROOM

Summary: The consideration of (1) a resolution authorizing the City Manager to enter into a contract with WNC Roofing Inc. for repair work on the roof of the Thomas Wolfe Auditorium; and (2) a budget amendment in the amount of $185,000 from US Cellular Center and General Fund available fund balance to appropriate funding for the repair work.

Staff at the U.S. Cellular Center has been repeatedly working with roofing vendors for over one year repairing leaks in the roof of the Thomas Wolfe Auditorium. Over the past year and a half the venue has spent $5,000 on roof repairs. New leaks are found after every hard rain. Currently the roof has at least three active leaks. Recently during a very heavy rainfall storm a leak over the seating section of the Auditorium caused a section of the plaster ceiling to crumble and fall into the seating area. For public safety reasons, staff believes that patches to the roofing material are no longer a viable option.

Staff recommends install a Hydro-Stop Premium Coat System on the room of the Thomas Wolfe Auditorium. This roof system comes with a 15 year labor and material warranty, has a high reflectivity and does not require the removal of the current roof.

This item has been reviewed the by the Civic Center Commission and at their meeting on November 4, 2014, and they recommended approval.

Pros:

- Repair to leaking roof
- 15 year labor and material warranty

Cons:

- $185,000 cost is a non-budgeted expense.

Funding for this unanticipated repair work will be split between the General Fund and the US Cellular Center Fund, using the same percentage basis as the General Fund's subsidy of the US Cellular Center operating budget. Therefore, $125,000 will be appropriated from US Cellular Center available fund balance, and $60,000 will be appropriated from General Fund unassigned fund balance. Fund balance levels in both funds will continue to exceed city policy targets after these appropriations.

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to enter into a contract with WNC Roofing Inc. of 15 Loop Rd Arden NC, 28704, to install a Hydro-Stop Premium Coat System on the room of the Thomas Wolfe Auditorium; and (2) a budget amendment in the amount of $185,000 from US Cellular Center and General Fund available fund balance to appropriate funding for the repair work.

RESOLUTION BOOK NO. 36 - PAGE 436
ORDINANCE BOOK NO. 29 - PAGE 299

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Bothwell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. ABC BOARD UPDATE

ABC Board Chairman Jim Ellis thanked Council for allowing him to serve as Chairman of the ABC Board. He then introduced General Manager Mark Combs who said that the ABC Board (1) Responsible Sales (a) new point of sale system; (b) best credit card data protection available; and (c) modern, efficient stores and operations; and (2) Return Resources to our Community (a) local alcohol and drug rehabilitation grants ($166,000); (b) statutory funding to (i) Buncombe County rehabilitation services ($74,289); and (ii) N.C. Dept. of Health Services ($72,046).

Mr. Combs then reviewed the ABC Board's financial information for Fiscal Year 2013-14 vs. Fiscal Year 2012-13. Distributions to City and County in Fiscal Year 2013-14 were $1,457,860 vs. $1,322,523 in Fiscal Year 2012-13. Profit Percentage to sales were 9.44% in Fiscal Year 2013-14 vs. 8.98% in Fiscal Year 2012-13.

ABC Board projects include a new store on Hendersonville Road, customer focus and alcohol education.

On behalf of City Council, Mayor Manheimer thanked Mr. Ellis for his service, and the entire Board for their dedication and hard work.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A SUBSTANTIAL AN AMENDMENT TO THE 2014-15 CONSOLIDATED ANNUAL ACTION PLAN FOR COMMUNITY DEVELOPMENT BLOCK GRANT (CDBG) AND HOME FUNDS

RESOLUTION NO. 14-262 - RESOLUTION TO SUBSTANTIALLY AMENDED THE 2014-15 CONSOLIDATED ANNUAL ACTION PLAN FOR COMMUNITY DEVELOPMENT BLOCK GRANT (CDBG) AND HOME FUNDS

Assistant Director of Community and Economic Development Development Jeff Staudinger said that this is the consideration of a resolution to substantially amended the 2014-15 Consolidated Annual Action Plan for Community Development Block Grant (CDBG) and HOME funds to (1) Grant an additional $9,326 to Asheville Buncombe Community Christian Ministries for their Homelessness Prevention and Rapid Rehousing (HARP) program, for a total 2014-2015 award of $20,000; (2) Grant an additional $140,000 to Asheville Area Habitat for Humanity for their Shiloh Taft Avenue single-family home construction program, for a total 2014-2015 award of $150,000; (3) Grant an additional $50,000 to Madison County for the Rural Housing Rehabilitation Program in partnership with the Community Housing Coalition of Madison County, for a total 2014-2015 award of $90,000; (4) Grant an additional $62,837 to Mountain Housing Opportunities as a CHO for their proposed 60-unit East Haven Apartments affordable housing development in Swannanoa, for a total 2014-2015 award of $162,837; and (5) Grant $162,837 to the Housing Assistance Corporation as a CHO for their proposed 66-unit Mud Creek Villages affordable housing development in Hendersonville. This public hearing was advertised on October 31 and November 7, 2014.

He said that $425,000 of HOME funds awarded to the Housing Assistance Corporation in Hendersonville for multi-family rental development needs to be reallocated. The Community Development Division, at the direction of the Asheville Regional Housing Consortium, sought proposals from those HOME subrecipients originally awarded funds for less than their 2014 request, and for developments proposed by Community Housing Development Organizations (Cho's). Five applications were received requesting a totaling $1,049,326.

Applicant	Project	Original Request	Amount Originally Funded	New Request	Total Request
AMAH	Shiloh Taft Avenue Project	$ 150,000	$ 10,000	$ 140,000	$ 150,000
ABCCM	HARP	$ 20,000	$ 10,674	$ 9,326	$ 20,000
Madison County	Rural Rehab	$ 90,000	$ 40,000	$ 50,000	$ 90,000
MHO	East Haven Apartments	$ 328,000	$ 100,000	$ 425,000	$ 525,000
HACK	Mud Creek Village			$ 425,000	$ 425,000

After reviewing applications, hearing presentations by applicants and Board discussion, the Consortium recommends the following allocations:

1. Asheville Area Habitat for Humanity, Shiloh Taft Avenue development. Additional allocation, $140,000 for a total 2014 allocation of $150,000. Habitat will develop 10 new, affordable, Green Built NC and System Vision certified homes to be sold at 0% interest loans to qualified low-income families and individuals ("Partner Families").
2. Asheville Buncombe Community Christian Ministries, Homelessness Prevention and Raid Rehousing. Additional allocation, $9,326, total allocation, $20,000. ABCCM will assist 28 households who are homeless or in imminent danger of becoming homeless obtain or retain permanent housing, through providing tenant-based rental assistance and case management services.
3. Madison County, Rural Housing rehabilitation. Additional allocation, $50,000, total allocation, $90,000. Madison County will contract with the Community Housing Coalition of Madison County to rehab 2-4 homes belonging to low and very low income homeowners to eliminate the threat to life, health or safety and incorporate energy efficiency improvements.
4. Mountain Housing Opportunities, East Haven Apartments. Additional allocation, $62,837, total allocation, $162,837. MHO will develop 60 units of rental housing in Swannanoa affordable to low-income households.
5. Housing Assistance Corporation, Mud Creek Village, Allocation, $162,837. HACK will develop 66 units of rental housing in Hendersonville affordable to low-income households.

In accordance with the City's Citizen Participation Plan, the proposed allocations have been available for public review and comment for 30 days. Contracts for HOME funds are executed only when the project is ready for implementation and all other funding is firmly committed. Disbursement of grant funds occurs after contracts are signed, and on a reimbursement basis.

Pros:

- The development projects, if all go to completion, will create 136 units of new affordable housing for low-income households in the Consortium area; and will provide significant construction employment;
- Additionally, 28 households will be housed who would otherwise be homeless, and at least two households living in substandard conditions will have their homes repaired.

Con:

- None.

All funds being allocated in this process are federal HOME funds received by the City of Asheville for the purpose of affordable housing. No City of Asheville general funds are affected by this process.

Staff concurs with the recommendation of the Asheville Regional Housing Consortium that the Asheville City Council approve the proposed Substantial Amendment to the 2014-2015 Annual Action Plan for CDBG and HOME.

Councilman Smith said that the HOME Consortium agreed unanimously on these amounts.

Mayor Manheimer opened the public hearing at 5:18 p.m.

A gentleman questioned why these funds for affordable housing are going outside the City of Asheville.

Ms. Judy Strong questioned if the organizations have made assurances that the rents will remain low and if there is a different way to allocate the money in the Madison County area.

Mayor Manheimer closed the public hearing at 5:22 p.m.

Councilman Smith said that the funds are HOME Consortium funds. The federal government apportions these to a four-county area. The City of Asheville is the primary entity that disperses the dollars, but the intent is to have that money create affordable housing across the four counties. The City of Asheville has its own Housing Trust Fund and Community Development Block Grant funds.

Mr. Staudinger responded to Ms. Strong's inquires, noting that there are federal requirements for the use of those funds.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Wisler moved for the adoption of Resolution No. 14-262. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 36– PAGE 434

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING 593 AZALEA ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING TO ALLOW AN EXISTING RESIDENTIAL STRUCTURE TO BE USED FOR OFFICE SPACE FOR ASHEVILLE-BUNCOMBE YOUTH SOCCER ASSOCIATION

ORDINANCE NO. 4367 - ORDINANCE TO CONDITIONALLY ZONE 593 AZALEA ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING TO ALLOW AN EXISTING RESIDENTIAL STRUCTURE TO BE USED FOR OFFICE SPACE FOR ASHEVILLE-BUNCOMBE YOUTH SOCCER ASSOCIATION

Urban Planner Julia Fields said that this is the consideration of an ordinance to conditionally zone 593 Azalea Road from RM-16 Residential Multi-Family High Density District to Office District/Conditional Zoning to allow an existing residential structure to be used for office space for Asheville-Buncombe Youth Soccer Association. This public hearing was advertised on October 31 and November 7, 2014.

The subject property consists of a 14.16 acre parcel (zoned RM-16) located at 593 Azalea Road East in East Asheville. The property contains an existing residential structure that is currently vacant. [Parcel Identification Number is 9668.25-1574]. The property slopes steeply up from Azalea Road and is heavily wooded.

The applicant, Asheville Buncombe Youth Soccer Association (ABYSA), proposes to convert an existing single-family dwelling to an office building with accompanying parking at 593 Azalea Road East. [Property is owned by AVL Investment Properties LLC]. The building is one story in height (with a basement) and has a gross floor area of 4,479 square feet. The structure is served with well water and a septic system.

Access to the site is currently via a gravel/dirt drive off of Azalea Road East. It is proposed that this drive be improved to meet City of Asheville standards. The improved access will lead to the office building and to a parking area containing eighteen spaces. Sidewalks are not required on Azalea Road due to rock impediments on the property. This stretch of Azalea Road is part of a comprehensive infrastructure improvement project being undertaken by the City of Asheville. Sidewalks were proposed not to be constructed through this stretch of the improvements due to the presence of rock.

Landscaping is required for the project and includes street trees, buffering, and vehicular use area landscaping. Street trees and needed buffers are provided for through the extensive existing vegetation. Additional detail is needed on the landscaping plan but can easily be shown compliant. Open space information needs to be provided but will clearly be compliant. Both of these will be shown for the Final TRC review if the conditional zoning is approved.

The Technical Review Committee (TRC) reviewed this application at their meeting on September 15, 2014, and approved it with conditions. [The developer has addressed many of the conditions noted by TRC in the submittal that is before the Asheville City Council]. The application was reviewed by the Asheville Planning and Zoning Commission at a meeting on October 16th and was recommended for approval unanimously (5-0). The matter will return to the Technical Review Committee, if approved by Asheville City Council, for Final TRC review. To date, staff has had no comments from the public on this matter.

The site is bordered by properties zoned RS-2 to the south (Recreation Park), RS-8 and RM-8 to the north and east (containing single-family homes) and RM-16 to the west (containing townhouses). While most of the surrounding properties are residential in nature there are City of Asheville offices and other facilities in the immediate area.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. *That the proposed use or development of the land will not materially endanger the public health or safety.*
   The proposed project has been approved by City staff and appears to meet or be able to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. *That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.*

The proposed use and development of the land are reasonably compatible with the natural features and topography of the site. The developer is using an existing structure and doing minor site work (drive widening and parking); no disturbance will occur on the majority of the property. Most of the existing vegetation will remain on the site.

3. *That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.*
The development is not expected to injure the value of adjoining or abutting properties. The portion of the site that will be used for offices is greatly removed from all surrounding properties and buffered with existing vegetation. The Office District anticipates the development of small scale office uses adjacent to residential uses. It limits hours of operation to between the hours of 7:00 a.m. and 9:00 p.m. The proposed use should not add significant vehicular usage to a busy roadway which is currently being improved to better handle the traffic.

4. *That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.*
The use of the existing home as an office is in harmony with the area in which it is located. There are other offices and a wide variety of uses found in the immediate vicinity. The scale of the office will be in keeping with the residential structures in the area.

5. *That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.*
The *Asheville City Development Plan 2025* encourages compatible adaptive reuse in appropriate areas (pg. 149).

6. *That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.*
The proposed use is located near major roadways and along a road that is undergoing major infrastructure improvements. Basic infrastructure appears adequate and issues identified by the major service providers have been or are being addressed.

7. That *the proposed use will not cause undue traffic congestion or create a traffic hazard.*
The proposed project has been reviewed by the City Traffic Engineer and it has been determined that the project should not cause undue traffic congestion along the existing street infrastructure.

The *Asheville City Development Plan 2025* encourages compatible adaptive reuse in appropriate areas.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- The project proposes adaptive reuse of a currently vacant building for a use compatible with the surrounding area.
- The proposal results in the loss of a housing unit in the city; however, this unit has been vacant in the recent past.
- The use of the property for an office will be well buffered from surrounding residential properties and hours of operation are limited.
- While the proposed use of the property is perhaps not the highest and best ultimate use of this underutilized parcel (especially when all the road improvements in the area are completed), staff does not find it to be an inappropriate use for a period of time until a more

significant development is proposed. Such a development will require major infrastructure extensions/improvements. The property owner has provided an affidavit indicating their interests concerning the future of the property.

Staff recommends approval of the proposed conditional zoning, finding it consistent with City-adopted plans and strategic goals for development.

Mayor Manheimer opened the public hearing at 5:28 p.m.

Ms. Margie Mann, representing the owner, said that the property will be used as office space. She also noted that they have met with the Viewpoint Homeowners Association and they are pleased with what they are doing with the property.

Mr. Karl Koon, property owner, asked for City Council's support of the conditional zoning.

Ms. Judy Strong asked if City funds will be used for this renovation.

Mayor Manheimer closed the public hearing at 5:31 p.m.

In response to Councilman Bothwell, Ms. Fields said that the conditional zoning is site specific, not the entire 14.16 acre parcel.

In response to Ms. Strong, Ms. Mann said that only ABYSA funds will be used to renovate the home.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved to approve the conditional zoning request for the ABYSA office at 593 Azalea Road from RM-16 Residential Multi-Family High Density District to Office District/Conditional Zoning, and find that the request is reasonable, is in the public interest, and is consistent with the Comprehensive Plan and other adopted plans in the following way: the plans propose the compatible adaptive reuse of a property from vacant residential to office. This motion was seconded by Councilman Pelly and carried unanimously.

ORDINANCE BOOK NO. 29 - PAGE 278

C. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING SIX LOTS ON KLEPPER DRIVE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL ZONING FOR ROAD CONSTRUCTION, MODIFICATION AND FLEXIBLE DEVELOPMENT REQUEST FOR LOT SIZE

ORDINANCE NO. 4368 - ORDINANCE TO CONDITIONALLY ZONE SIX LOTS ON KLEPPER DRIVE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL ZONING FOR ROAD CONSTRUCTION, MODIFICATION AND FLEXIBLE DEVELOPMENT REQUEST FOR LOT SIZE

Interim Planning Director Alan Glines said that this is the consideration of an ordinance to conditionally zone 6 lots on Klepper Drive from RM-8 Residential Multi-Family Medium Density District to RM-8/CZ Residential Multi-Family Medium Density District/Conditional Zoning for road construction, modifications and flexible development request for lot size. This public hearing was advertised on October 31 and November 7, 2014.

He said that the site is located on Charlotte Street at Hazzard Street and consists of 6

existing non-conforming lots with limited access. The PINs include 9649-50-8286, 9649-50-9208, 9649-50-9332, 9649-50-9372, 9649-60-0311, 9649-60-0298. The properties have a complicated history as they were remnant properties that were sold to the current owner by the City of Asheville from excess ROW areas left over from the creation of South Charlotte Street by the NC DOT. Portions of these same parcels were originally created by T.W. Patton by a plat recorded in 1901. The current owner improved the area of these lots by purchasing additional excess ROW directly from the NC DOT and then recombining a portion to each remnant parcel to make them more compliant and more buildable. A recombination plat was approved and recorded in 2011. The surrounding area is zoned RM-8 (residential multi-family medium density) but many of the surrounding uses are single family residences along with a place of worship along Circle Street. This area was originally part of the Eagle Street neighborhood that was closely associated with 'The Block' located in downtown Asheville.

The applicant is proposing to create a new private street to provide access to 6 residential lots. The lots are existing but non-conforming due to lot size and frontage width and will be made smaller by the creation of the improved right of way access. The paved access drive is proposed to be 17 feet wide within a dedicated 20 foot wide right of way space (ROW). Some of the areas of the right of wade are wider than 20 feet but the ROW will be 20 feet at its narrowest point near Hazzard Street. The pavement width (17') is the minimum width to allow on-street parking. The movement of traffic will be one-way from Circle Street and the size and flow of the street has the approval of the TRC members including Fire and Transportation. The proposed lot sizes will be smaller than RM-8 standards defined in 7-8-6 of the UDO. Standard lots are generally 5,000 square feet with 50 feet of frontage on an improved ROW.

The new private street, Klepper Drive will be accessed from Circle Street. The traffic flow will be one-way from Circle Street and will connect at the bottom with Hazzard Street. Circle Street is a quiet street that has access from the intersection with Hazzard Street and Max Street. There is an important neighborhood pedestrian connection and bridge from Circle Street that crosses Charlotte Street connecting to Davidson Street downtown. There are no other sidewalks in the project area except for along Hazzard Street and Max Street and none are required as a part of this subdivision due to the limited number of lots. Even though the street width is small, Klepper Drive will help to improve connectedness throughout the neighborhood.

Landscaping, Open Space and Tree Save standards are not required for this subdivision because only six lots are proposed and with the proposed smaller lot area these features will be more difficult to provide on-site. In spite of this the developer is proposing a street tree for each of the lots.

Modifications:

- **Area:** All 6 lots are already undersized to the lot area standard for RM-8 (standard 5,000 square feet). To create improved access for the lots, some area is being removed for each parcel making them smaller. The proposed lots will range in size from 3,147 to 4,720 square feet. It is expected that even with the smaller area, the lots will be able to accommodate a site-designed house.

- **Access:** The developer is seeking approval and use of a ROW of 20' which will be wider near the top at its connection with Circle Street but will establish a more consistent connection to Hazzard Street. The city standard for new streets is 50' ROW which affords two-way movement, sidewalks and on-street parking. It is not unusual though for residential developments to request modifications to ROW widths which can range from 25 to 40 feet depending on the proposal and neighborhood context. With the limited number of lots, no concerns were raised by technical review committee members.

- **Setbacks:** The developer is seeking flexible development standards for the front and rear setback allowed under Article 11 in the UDO (7-11-7). The UDO specifies that should

flexible standards be granted, then at least a ten foot setback be maintained. Since four of the six lots have frontage on two streets, these are considered to be through-lots so the 10' front setback request applies to both fronts (15 foot setback is the standard in this district). The two remaining lots near Hazzard Street will only need a 10' setback reduction for the **front** of their proposed lot. An approved setback reduction should expand the space on the lots for a house since the building envelop is expanded.

- **Frontage:** The standard lot width is 50 feet in the RM-8 district. Four of the lots; lots numbered 4,6,8, and 10 Klepper Drive have widths proposed to range between 35 and 43 feet. Designing a house to meet the smaller lot widths is possible and accounting for the **side** setbacks of 6 feet (12 feet total) provides a minimum house width of at least 22 feet wide or larger.

The existing zoning is RM-8 (residential multi-family medium density) district and the proposed zoning request is RM-8 CZ (conditional zoning) to accommodate the development of smaller parcels on a smaller right of way.

The Technical Review Committee met on September 15, 2014, and this project was recommended for approval with conditions.

The proposal is for smaller residential lots in an area that is primarily residential in nature. Although the lots border or are close to South Charlotte Street, their access and orientation is from the residential side. Due to their limited size, use of the lots will be limited to one single-family residence and typical residential accessory structures in a similar way that other non-conforming lots are permitted to be developed.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. *That the proposed use or development of the land will not materially endanger the public health or safety.*
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. *That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.*
   The applicant is proposing to provide better access for existing lots using a narrower one-way street. The residential uses proposed for the parcels will be a good fit for the topography of the site since each house can be designed to fit each individual lot owing to its unique slope and configuration. No access to the development will occur directly from Charlotte Street.

3. *That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.*
   The proposal for single family subdivision is not expected to injure the value of properties in the area. The proposed lots will be similar to some other historic lots in the vicinity of the development accessed from neighborhood streets.

4. *That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.*
The proposed site is a part of the historic Eagle-Market Street district known as 'The Block' and was the residential edge of Eagle Street. An original plat was recorded in 1906 and included Eagle Street and Circle Street. The six parcels were remnants of some of those original parcels and when South Charlotte Street was created and the neighborhood altered, these were excess parcels. The city acquired these parcels from the NC Department of Transportation and later sold them to the current owner. The current owner approached NC DOT about acquiring additional land to make each lot more buildable. The lots are compatible with the scale of the surrounding area and with a number of the original parcels that were part of the 1906 plat. The new residential development will contribute to the neighborhood fabric now known as the *East End* neighborhood.

5. *That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.*
The Comprehensive Plan recommends higher density residential infill development at locations that are suitable for such development with basic infrastructure. The proposal is adjacent to the central business district area and is close to jobs, parks, transportation options and shopping. The area is currently vacant and as noted in the Comprehensive Plan, such infill properties can be developed without changing the existing character of the area. Smaller lot sizes were once more common in Asheville before minimum zoning standards were adopted so in some ways this development reflects historic patterns especially for neighborhoods near downtown.

6. *That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.*
This project poised near the edge of downtown is has direct access to a pedestrian bridge crossing South Charlotte Street to provide access to downtown. Multiple modes of transportation are available to the area including bus lines that run along College Street and Martin Luther King Jr. Boulevard. All other urban services are available to this parcel as well.

7. That *the proposed use will not cause undue traffic congestion or create a traffic hazard.*
The proposed uses on the site are not expected to create undue traffic congestion or create a traffic hazard. The small number of residential parcels in the subdivision will not create traffic congestion.

The Comprehensive Plan recommends higher density residential infill development at locations that are suitable for such development with sufficient basic infrastructure. The proposal is adjacent to the central business district area and is close to jobs, parks, transportation options and shopping. The area is currently vacant and as noted in the Comprehensive Plan, such infill properties can be developed without changing the character of the area. Smaller lot sizes were once more common in Asheville before minimum zoning standards were adopted so in some ways this development reflects historic patterns especially for neighborhoods near downtown.

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff finds this request to be reasonable.

Considerations:

- The project proposes improved access for existing vacant residential lots.
- Infill residential parcels close to downtown, transportation options and jobs will be available for new housing development.
- Sidewalks are not proposed (or required) as a part of this subdivision and are limited in the surrounding area.

- An important pedestrian bridge over S. Charlotte Street close to this site links the neighborhood to the downtown area.

The Technical Review Committee met on September 15, 2014, and this project was recommended for approval with conditions. The Planning and Zoning Commission met on October 16, 2014, and recommended unanimous approval.

Staff recommends approval of the proposed RM-8 CZ conditional zoning to allow for six residential lots with improved right of way access as proposed in the site plans, to allow for single-family residences and typical residential accessory structures and, finding that the request is consistent with City-adopted plans and strategic goals.

Mayor Manheimer opened the public hearing at 5:38 p.m., and when no one spoke, she closed the public hearing at 5:38 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Wisler moved to approve the conditional zoning request for the Klepper Drive Development from Residential Multifamily Medium Density (RM-8) to Residential Multifamily Medium Density conditional zone (RM-8 CZ), based on the site plan with the proposed modifications, compliance with TRC requirements and conditions agreed upon by the applicant and outlined in Exhibit B.1, and find that the request is reasonable, and is in the public interest and is consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) higher density residential infill development at locations that are suitable for such development with sufficient basic infrastructure is supported; (2) The proposal is adjacent to the central business district area and is close to jobs, recreation, transportation options and shopping; (3) The land is currently vacant and will contribute to the fabric of the existing East End neighborhood. This motion was seconded by Councilman Pelly and carried unanimously.

ORDINANCE BOOK NO. 29 - PAGE 293

D. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING PROPERTY OFF FAIRVIEW ROAD FROM URBAN VILLAGE DISTRICT TO URBAN PLACE DISTRICT/CONDITIONAL ZONING FOR DEVELOPMENT OF A MIXED USE PROJECT CONTAINING APARTMENTS AND RETAIL, WITH MODIFICATIONS TO PARKING STANDARDS FOUND IN SECTION 7-8-26 OF THE UNIFIED DEVELOPMENT ORDINANCE

At the request of the applicant, Councilman Smith moved to continue this public hearing until December 9, 2014. This motion was seconded by Councilman Bothwell and carried unanimously.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. BOARDS & COMMISSIONS

Regarding the Noise Ordinance Appeals Board, no one applied for the vacancy and therefore, City Council instructed the City Clerk to re-advertise.

RESOLUTION NO. 14-263 - RESOLUTION APPOINTING A MEMBER TO THE ABC BOARD

Councilman Davis, member of the Boards & Commissions Committee, said that this is the consideration of appointing members to the ABC Board and also to appoint a Chair.

The terms of Jim Ellis and John Menkes expire on November 13, 2014. Mr. Ellis is currently Chairman and City Council must appoint a new Chair.

The following individuals applied for a vacancy: Lewis Isaac and Charles R. Worley.

The Boards & Commissions Committee recommenced reappointing Mr. Menkes; appointing Lewis Isaac; and appointing John Menkes as Chairman.

All members of Council expressed their appreciation to Mr. Ellis for his service as Chairman.

Councilman Davis moved to reappoint John Menkes to serve a 3-year term, term to expire November 13, 2017, or until his successor has been appointed. This motion was seconded by Councilman Pelly and carried unanimously.

Councilman Davis moved to appoint Wilfred Lack to serve as Chairman of the ABC Board until his term expires on November 13, 2016, or until City Council appoints a replacement. This motion was seconded by Councilman Bothwell and carried unanimously.

Councilman Bothwell moved to appoint Lewis Isaac to serve a 3-year term, term to expire November 13, 2017, or until his successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 36 – PAGE 435

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. John Robert felt that City Council should censor Councilman Bothwell for his comments related to issues at the Asheville Police Department.

Mr. Andrew Clark, Sawyer Motor Condominium on Coxe Avenue, Dr. Bryan Edwards, 32 Broadway Condo Association, and Mr. Larry Shames, Aston Condominium on Church Street, asked City Council to reconsider their January 8, 2013, decision to lift the ban on outdoor amplified music in the Central Business District. Mr. Shames also read a letter from the President of 21 Broadway Condo Association requesting Council to restore the ban on external speakers in the Central Business District. Mayor Manheimer said that the Downtown Commission will be reviewing the matter at their meeting on November 14, 2014. After their recommendation, the matter will be heard by the City Council Public Safety Committee. If any amendment is recommended, the matter will need to go before the Planning & Zoning Commission, prior to the public hearing by City Council.

A woman urged City Council to consider a plan to assist families who will be displaced and evicted when Lee Walker Heights is renovated.

Closed Session

At 5:57 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132

of the General Statutes. The law that makes the information privileged and confidential is N.C. Gen. Stat. § 143-318.10(3). The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(1); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: Resurgence Development Company and the City of Asheville; and State of North Carolina and the City of Asheville. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3); (3) To discuss matters relating to the location or expansion of industries. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(4); and (4) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(5). This motion was seconded by Councilman Pelly and carried unanimously.

At 7:10 p.m., Councilman Smith moved to come out of closed session. This motion was seconded by Councilman Bothwell and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 7:10 p.m.

Magdalen Burleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – December 9, 2014 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis (excused at 9:30 p.m.); Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 11, 2014

B. RESOLUTION NO. 14-265 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CH SECURITY FOR SECURITY SERVICES IN THE CITY'S PARKING GARAGES

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with CH Security for security services in the City's parking garages.

The City of Asheville, through the Parking Services Division, operates four parking garages; Civic Center, Rankin Avenue, Wall Street and Biltmore Avenue. The Parking Services Division uses a combination of City employees and contract security officers to provide security and customer assistance in the garages. Generally, City employees work during the business day and early evenings while contract security is on duty during late nights, weekends, and holidays.

Contracts for security are in effect for three years and the current contract expired on November 30, 2014. In October 2014 the Parking Services Division requested quotes for service from interested vendors resulting in 21 vendors responding as shown on the vendor bid sheet. CH Security provided the lowest price for the service. They are headquartered in Alpharetta, Georgia, and they have a district office in Burnsville, N.C. They have been our provider since December 2011. On a normal week, a total of 205 hours of security services will be needed. In addition, the Parking Services Division will request additional security support during periods of high demand; for example, Southern Conference Tournament, Moogfest, employee vacations, or large concerts at the US Cellular Center. The total cost of the three-year security contract will be $405,000.00 but will not exceed $135,000.00 per fiscal year.

Pros:

- Provides safe facilities for residents and visitors to park in.
- Using contract security is the most cost effective manner to augment the Parking Services Division's security requirements.
- Achieves the City of Asheville's assurances to its partners at 51 Biltmore that adequate security will be maintained in the Biltmore Avenue Parking Garage.

Con:

- Total cost of $405,000.

The necessary funds are already budgeted in the Parking Services Fund's Operating Budget for FY 2014-15.

City staff recommends that City Council adopt a resolution authorizing the City Manager to sign a three-year contract with CH Security to provide security services in the City's parking garages at a total cost of $405,000.00; not to exceed $135,000.00 per fiscal year.

RESOLUTION BOOK NO. 36 - PAGE 437

C. RESOLUTION NO. 14-266- RESOLUTION ADOPTING THE 2015 CITY COUNCIL MEETING SCHEDULE, INCLUDING THE CITY COUNCIL ANNUAL RETREAT ON JANUARY 30 & 31 2015, BEGINNING AT 8:30 A.M. IN THE BANQUET HALL OF THE U.S. CELLULAR CENTER

RESOLUTION BOOK NO. 35 - PAGE 438

D. RESOLUTION NO. 14-267 - RESOLUTION AUTHORIZING A PUBLIC HEARING TO BE HELD ON JANUARY 13, 2015, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR LINAMAR

Summary: The consideration of a resolution authorizing a public hearing to be held on January 13, 2015, to consider an economic development incentive grant for Linamar.

City of Asheville has been requested by Buncombe EDC for consideration of a performance based incentive grant under the City of Asheville Economic Development policy to Linamar. Linamar is a diversified global manufacturing company of highly engineered products with facilities across North America, Europe, and Asia. The purpose of the City's participation would be to induce Linamar to make additional investments in the City and Buncombe County for expenditures to expand its existing facilities located at 2169 Hendersonville Road in Asheville. The project will require additions to and renovations of existing buildings and purchase of additional machinery and equipment which may increase the tax value as determined by the Buncombe County Tax Department, regardless of funding sources for said property, in the amount of $190,000,000. This commitment replaces and is an increase of $115 million and 150 jobs to Linamar's second expansion announcement in June of 2012, which encompassed a $75 million investment and 250 new employees. The City of Asheville is considering offering a performance-based grant in an amount not to exceed $3,500,000, which will replace a phase II grant of $1 million. No payments have been made on Phase II.

North Carolina state law requires a public hearing be held before an incentive grant can be officially awarded.

The economic development incentive grant for Linamar supports the City Council's Strategic Operating Plan as it addresses Council focus areas. Under the Job Growth and Community Development focus area, the project supports the Goal of creating more collaborative and effective working partnerships between the COA, the business community, and other key organizations to effectively manage the city's regulatory environment while accomplishing economic development goals by meeting the objective to support diversified job growth and small business development. It supports the goal of supporting a strong local economy by continuing to implement sustainable growth and development policies and efficient use of existing resources.

Pros:

- Performance driven grant that is distributed after job and investment is achieved or mutually agreed performance bench marks are established;
- Supports job creation and capital investment in Asheville;

- Supports regional and state cooperation in the project.

Con:

- Grant is formulated based on use of a portion of the new incremental increase from property tax revenue generated by the project.

The project has an overall positive fiscal impact on tax revenues received by the city. Initially (during the grant period), the City will receive a portion of the new incremental property tax revenues from the project. As noted above, the City of Asheville performance-based grant amount will not exceed $3,500,000 in total.

City staff recommends Council approve a resolution authorizing a public hearing to be held on January 13, 2015, on an economic development incentive grant agreement to support Linamar.

RESOLUTION BOOK NO. 36 - PAGE 439

E. RESOLUTION NO. 14-268 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONSTRUCTION AGREEMENT WITH MOORE & SON, INC. FOR THE BEAUCATCHER TANK WATERLINE IMPROVEMENT AREA PROJECT

ORDINANCE NO. 4371 - BUDGET AMENDMENT FOR THE BEAUCATCHER TANK WATERLINE IMPROVEMENT AREA PROJECT

Summary: The consideration of the following items relative to the Beaucatcher Tank Waterline Improvement Area Project ('Project'): (1) a resolution authorizing the City Manager to enter into a construction agreement with Moore & Son, Inc., for the bid amount of $432,480; (2) a contingency amount of $65,470 for a total project budget in the amount of $497,950; and (3) a budget amendment in the amount of $372,950 from savings in other capital projects that were completed under budget.

This project consists of all materials, labor, incidentals, and equipment necessary for the waterline installation on two separate roads and the abandonment of multipule waterlines across the former Beaucatcher Tank site. The waterline installations will occur on College Street with the installation of approximately 1,100 Linear Feet (LF) of 10-inch Ductile Iron Pipe (DIP) and Beaucatcher Road with the installation of approximately 350 LF of 24-inch DIP with related appurtenances and materials required to complete the work. This project is being completed in order to remove and abandon all public lines off the former Beaucatcher Tank property, which is a condition of an existing property trade agreement between the City of Asheville and Fiesta Resort Properties. The property trade is needed to complete the proposed Beaucatcher Greenway Project. The WRD issued an Advertisement For Bids for the construction project. In response to the Advertisement For Bids, the WRD received four bids. Companies responding were:

1.	Dillard Excavating Company, Inc. – Pelzer, SC	$544,115.00
2.	Huntley Construction Company, Inc. – Asheville, NC	$511,125.75
3.	Moore & Son, Inc. – Mills River, NC	$432,480.00
4.	Patton Construction Group, Inc. – Asheville, NC	$473,300.00

Following a review of bids by City Staff, Moore & Son, Inc., was selected as the lowest responsible, responsive bidder for the bid amount of $432,480. A contingency amount of $65,470 has been added for a total project budget of $497,950.

Pros:

- This project will remove and replace aging infrastructure from existing City of Asheville property and relocate all lines to within the road right-of-way. The existing lines are considered to be main transmission lines and due to age, have a high risk of failure that could cause costly repairs for the WRD. This is intended to reduce frequent outages for the customers with a durable, reliable, sustainable water system for the project area.
- The completion of this project enables the City to meet the conditions for the existing property trade agreement with Fiesta Resort Properties, which is required for the City to complete the proposed Beaucatcher Greenway.
- This project is aligned with the City and WRD goal of continued investment and improvement of the City's water system through Capital Improvement Projects, in order to provide safe and reliable service.
- Approval of the construction contract to the lowest responsible, responsive bidder will invest City funds in the local economy.

Cons:

- Failure to award a construction contract would prevent the completion of this waterline system improvement and goal of continued investment in our infrastructure.
- Failure to award would also prevent the City from fulfilling a condition of the existing property trade agreement with Fiesta Resort Properties, which is required for the City to complete the proposed Beaucatcher Greenway.

The Water Resources Department currently has $125,000 budgeted for this Project. The scope of this project has expanded beyond the original scope identified more than six years ago. The remaining funds of $372,950 needed for the contract will be transferred from two capital projects that were completed under budget. In order to transfer the funds, a budget amendment is necessary.

Amount in Project Budget	$125,000
Amount Needed for Construction Contract	$372,950
Total Amount for Project	$497,950

City staff recommends City Council authorize the following relative to the Beaucatcher Tank Waterline Improvement Area Project: (1) a resolution authorizing the City Manager to enter into a construction agreement with Moore & Son, Inc., for the bid amount of $432,480; (2) a contingency amount of $65,470 for a total project budget in the amount of $497,950; and (3) a budget amendment in the amount of $372,950 from savings in other capital projects that were completed under budget.

RESOLUTION BOOK NO. 36 - PAGE 440
ORDINANCE BOOK NO. 29 - PAGE 301

F. RESOLUTION NO. 14-269 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CAROLINA CORNERSTONE CONSTRUCTION FOR THE RENOVATION OF THE STEPHENS-LEE RECREATION CENTER

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Carolina Cornerstone Construction to replace the existing recreation center flooring, gym ceiling, interior paint, sports equipment, and provide structural upgrades at Stephens-Lee Recreation Center for an amount not to exceed $340,000.

The City of Asheville has determined the existing flooring, sports equipment, interior paint, and gym ceiling tiles at the Stephens-Lee Recreation Center have exceeded their life expectancy, are in poor condition, and poses safety hazard for users. Additionally in response,

the city has identified the need for a renovation and plans to complete the project in FY 2014-2015 under the parks and recreation deferred maintenance program.

The City issued an Advertisement for Bids for construction of the renovations and received a bid from Carolina Cornerstone Construction located at 357 Depot Street in Asheville, North Carolina who was selected as the lowest, responsible bidder at the amount not to exceed $340,000.

Pros:

- Improves safety by replacing uneven and cracked flooring and ceiling surfaces from years of patching and repairing; replacement of outdated and broken sports equipment.
- Provides safe alternative for recreation.
- Improves performance through ongoing care and maintenance.

Con:

- None

The $340,000 to support the Carolina Cornerstone Construction contract for Stephens-Lee Recreation Center renovation is budgeted in the FY 2014-2015 Parks and Recreation Department operating budget as part of the deferred maintenance budget.

Staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Carolina Cornerstone Construction to renovate Stephens Lee Recreation Center for an amount not to exceed $340,000.

RESOLUTION BOOK NO. 36 - PAGE 442

G. RESOLUTION NO. 14-270 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH AMERICAN SEATING COMPANY FOR THE REPLACEMENT OF THE MCCORMICK FIELD SEATING

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with American Seating Company for the replacement of seating at McCormick Field for an amount not to exceed $259,453, with the City Manager authorized to approve change orders up to the budget amount.

In March 2012 City Council approved a five-year lease with DeWine Seeds –Silver Dollar Baseball, L.L.C for the use of McCormick Field for the operation of the Asheville Tourists minor league baseball team. As part of that agreement, the City committed to fund certain capital improvements at McCormick Field during the term of the lease, including the replacement of seating in Fiscal Year 2014-15. The City issued an Advertisement for Bids for McCormick Field seat replacement on November 6, 2014, and received the following two bids:

Irwin Seating Co. - Grand Rapids, MI	$312,774
American Seating Co. - Grand Rapids, MI	$259,453

American Seating Company from Grand Rapids, MI, was selected as the lowest, responsible bidder at an amount not to exceed 259,453.

Pros:

- This project will remove and replace aging infrastructure from existing COA property.
- The project will also make this site more aesthetically pleasing.

Con:

- None

Funding for this contract is already budgeted in the adopted Fiscal Year 2014-2015 capital improvement budget.

Staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with American Seating Company for the replacement of seating at McCormick Field for an amount not to exceed $259,453, with the City Manager authorized to approve change orders up to the budget amount.

At the request of Councilman Davis, Director of Finance and Management Services, said that she would be happy to provide the detailed specs and photos of the seats.

RESOLUTION BOOK NO. 36 - PAGE 443

H. RESOLUTION NO. 14-271 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH WASTE PRO OF NORTH CAROLINA INC. TO PROVIDE BULK CONTAINER REFUSE AND RECYCLING COLLECTION SERVICES AT CITY FACILITIES

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Waste Pro of North Carolina Inc., to provide bulk container refuse and recycling collection services for the U.S. Cellular Center, Transportation, General Services, Public Works, Parks and Recreation and Water Resources Departments.

The City of Asheville U.S. Cellular Center, Transportation, General Services, Public Works, Parks and Recreation and Water Resources Departments generate and/or collect moderate amounts of solid waste on a regular basis through normal operations. These items are deposited frequently into large 4, 8 and 34 cubic yard capacity dumpsters located at the various City Department's facilities.

In total, there are 34 dumpsters throughout the City; 21 located at Parks and Recreation facilities, 2 at parking garages, 3 at General Services facilities, 4 at Water Resources facilities, 2 at the U.S. Cellular Center, 1 at Public Works, and 1 located at the Purchasing warehouse.

The City of Asheville does not own these types of dumpsters or the specialized machinery and equipment to haul the waste to the various transfer stations.

A competitive bid process was conducted, receiving four (4) bids for the rental of equipment and collection of bulk waste generated by the City. The bid summary is below:

Waste Industries, LLC, Raleigh, N.C.	$51,496.00
Waste Management of Carolinas Inc., Arden, N.C.	$40,380.20
Waste Pro of North Carolina Inc., Arden, N.C.	$40,310.20
Republic Services of North Carolina, LLC, Asheville, N.C.	$40,530.75

Waste Pro of North Carolina Inc. was the lowest responsive and responsible bidder with an estimated yearly amount of $40,310.20. By adding a 5% contingency for future year price adjustments, the total expense for three years is $127,078.00

Pros:

- Allows for an efficient work environment by frequently removing waste material from city facilities.
- Provides a safe means of storing and disposing of waste.

Con:

- None identified

The first year of the multi-year contract expense is budgeted in the FY 2014 – 2015 operating budgets of the aforementioned Departments, and the remaining years will also be budgeted for in the respective operating budgets.

Staff recommends City Council adopt a resolution authorizing the City Manager to enter into and approve change orders for a three (3) year contract with the option of two (2) one (1) year extensions; with Waste Pro of North Carolina Inc. to provide bulk container refuse/recycling collection services in the amount of $127,078.00.

RESOLUTION BOOK NO. 36 - PAGE 444

I. RESOLUTION NO. 14-272 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH FIELD CONSTRUCTION SERVICES INC. FOR THE INSTALLATION OF AN IRRIGATION SYSTEM ON THE BACK NINE HOLES AT THE ASHEVILLE MUNICIPAL GOLF COURSE

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Field Construction Services, Inc. for the installation of a new irrigation system on the back nine holes at the Asheville Municipal Golf Course for an amount not to exceed $365,000.

City Council approved $450,000 as part of the City's Fiscal Year 2014-2015 capital improvement budget for the irrigation system at the Asheville Municipal Golf Course. The City issued an Advertisement for Bids for the irrigation system and installation, and received a bid from Field Construction Services, Inc., located in Charlotte, North Carolina, who was selected as the lowest, responsible bidder at the amount not to exceed $365,000.

Pros:

- The new irrigation system will replace an old, leaking and antiquated system that is manually operated and in continuous need of repair.
- The new system will save considerable resources in staff time, repair costs and water use.
- The new system will increase water efficiency while improving overall playability of the golf course and enhance customer service.

Con:

- None

The $365,000 to support the Field Construction Services, Inc. contract for the Asheville Municipal Golf Course back nine irrigation system is budgeted in the Fiscal Year 2014-2015 capital improvement budget.

Staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Field Construction Services, Inc. for the irrigation system and installation on the back nine holes of the Asheville Municipal Golf Course not to exceed $365,000.

Mayor Manheimer said that the City leases the Golf Course to a private entity that runs it for the City and that has enabled the City to re-direct its dollars to make investments in capital improvements needed for the Golf Course.

RESOLUTION BOOK NO. 36 - PAGE 445

J. ORDINANCE NO. 4372 - BUDGET AMENDMENT FOR THE SENIOR OPPORTUNITY CENTER AND HARVEST HOUSE FROM THE SENIOR CENTER GENERAL PURPOSE FUND FOR FISCAL YEAR 2014-15

Summary: The consideration of a budget amendment in the amount of $3,893 for Senior Opportunity Center and $3,893 for Harvest House for an appropriation from the State of North Carolina, Department of Health and Human Services, Division on Aging and the Land of Sky Regional Council/Area Agency on Aging through the Senior Center General Purpose Fund.

Funds will be used at the Senior Opportunity Center to enhance the front entrance patio and landscaping around the building. The allocation requires a 25% local match which will be provided via in-kind services of staff time to manage the project.

Funds will be used at Harvest House to 1) add new storage space, and 2) purchase program and facility equipment. This allocation also requires a 25% local match which will be provided via in-kind services of staff time to manage the project.
Pros:

- Facility improvements will address existing maintenance projects and improve accessibility.
- Equipment purchases will enhance the customer experience and expand programming opportunities in senior centers.

Con:

- None

The allocation will increase the City's General Fund budget by $7,786 in special project accounts designated for the Senior Opportunity Center and Harvest House. The 25% local match will be provided through in-kind services of staff time to manage the projects.

Staff recommends City Council to approve the budget amendment authorizing the City Manager to establish a budget in the amount of 1) $3,893 for Senior Opportunity Center, and 2) $3,893 for Harvest House for facility improvements and equipment.

ORDINANCE BOOK NO. 29 - PAGE 303

K. RESOLUTION NO. 14-273 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A DONATION FROM THE ASHEVILLE DOWNTOWN ASSOCIATION OF THE STAGE CANOPY AT PACK SQUARE PARK

Summary: The consideration of a resolution authorizing the City Manager to accept a donation from the Asheville Downtown Association (ADA) of the stage canopy at Pack Square Park.

In 2013 the City authorized ADA to install a canopy on the stage at Pack Square Park. Since then ADA successfully met all the requirements of the canopy installation and the work is complete. ADA is now making a gift of the stage canopy to the city valued at $125,000.

Upon acceptance of the gift, the City will assume responsibility for all maintenance and operations of the canopy including but not limited to maintenance, repair and replacement. Each 10-year period of operation is anticipated to cost a minimum of $155,000.

Pro:

- Supports the partnership between the City and ADA to enhance Pack Square Park events and programming

Con:

- Increase cost to the City's budget for canopy maintenance, repair and replacement

The addition of the stage canopy in Pack Square Park will increase the City's operating budget by $155,000 for each 10-year period.

City staff recommends City Council to adopt a resolution authorizing the City Manager to accept a donation from the Asheville Downtown Association of the stage canopy at Pack Square Park.

Councilman Davis thanked the Asheville Downtown Association for the donation of the stage canopy.

RESOLUTION BOOK NO. 36 - PAGE 446

L. ORDINANCE NO. 4373 - TECHNICAL BUDGET AMENDMENT TO APPROPRIATE FUNDING FOR PRIOR YEAR CONTRACTS AND PURCHASE ORDERS THAT ROLLED FORWARD TO FISCAL YEAR 2014-15

Summary: The consideration of a technical budget amendment in each of the City's annual operating funds to appropriate from restricted fund balance the required budget authorization for prior year contracts, purchase orders, and other carry-over appropriations that rolled forward to Fiscal Year 2014-15.

As part of its ongoing operations, the City enters into various contracts and purchase order agreements throughout the fiscal year. When these contracts and purchase orders are entered into, budget funds are encumbered for the full amount of the expected purchase. Often these contract and purchase orders are not fully completed and paid in one fiscal year. North Carolina General Statutes provide authorization for local governments to reserve the unexpended portion of these prior year commitments and roll those budgets forward to the new fiscal year.

As a part of the Fiscal Year 2013-14 annual audit, staff identified prior year commitments and carry-over appropriations to roll forward to Fiscal Year 2014-15, and these dollar amounts were deducted from the unassigned fund balance amounts that were reported in the Comprehensive Annual Financial Report. The technical budget amendment will provide authorization to officially appropriate these amounts in the Fiscal Year 2014-15 budget for each of the City's annual operating funds.

Pro:

- Provides budget authorization for prior year contracts, purchase orders, and other carry-over appropriations that rolled forward to Fiscal Year 2014-15.

Con:

- None.

As noted above this budget amendment simply provides budget authorization for prior year commitments which have already been reserved in the City's Fiscal Year 2013-14 financial statements. There is no impact on unassigned/available fund balance in the City's operating funds.

City staff recommends City Council approve the technical budget amendment in each of the City's annual operating funds to appropriate from restricted fund balance the required budget authorization for prior year contracts, purchase orders, and other carry-over appropriations that rolled forward to Fiscal Year 2014-15.

ORDINANCE BOOK NO. 29 - PAGE 305

M. RESOLUTION NO. 14-274 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A SUPPLEMENTAL UTILITY AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE RELOCATION AND ADJUSTMENT OF MUNICIPALLY OWNED WATERLINES WITHIN THE I-

26/NC 280 (AIRPORT ROAD) INTERCHANGE PROJECT AREA

Summary: The consideration of a resolution authorizing the City Manager to execute a Supplemental Utility Agreement with N.C. Dept. of Transportation (NCDOT) for the relocation and adjustment of municipally owned waterlines within the I-26 / NC 280 (Airport Road) interchange project area.

On July 23, 2013, City Council authorized the City Manager to execute a Municipal Utility Agreement with NCDOT for the I-26 / NC 280 Interchange Project (No. I-5501) in the amount of $164,000. Afterwards the Water Resources Department was informed that the cost of the project increased to $196,900 and on June 10, 2014, City Council authorized the City Manager to execute the first Supplemental Utility Agreement. Since construction has begun on the project it has been determined that an additional 200' of 24" water transmission main will have to be relocated due to it being in conflict with the roadway project. Because the City of Asheville owns and maintains municipal waterlines within the right-of-way of the project area, the Water Resources Department is responsible for 100% of the cost associated with adjustment or relocation of the waterlines.

The current project estimate is $196,900. The Supplemental Utility Agreement increases the project estimate by $106,780. The new adjusted estimate for the relocation and adjustment of the waterlines is $303,680 plus an additional contingency amount of $45,552 for other possible unforeseen additions, for a total project budget estimate amount of $349,232.

Pros:

- Execution of the supplemental agreement allows the City of Asheville Water Resources Department to meet its obligations to NCDOT for the adjustment or relocation of municipal waterlines within the NCDOT right-of-way.
- Execution of the supplemental agreement allows the required adjustment or relocation of municipal waterlines to be performed under the NCDOT construction contract, which will provide construction efficiencies producing cost savings and allow construction schedules to be met.

Cons:

- Failure to execute the supplemental agreement hinders the City of Asheville Water Resources Department ability to meet obligations to NCDOT for the adjustment or relocation of municipal waterlines within the NCDOT right-of-way.
- Failure to execute the supplemental agreement prevents the required adjustment or relocation of municipal waterlines from being performed under the NCDOT construction contract. This will create difficulties with construction coordination, create a lack of efficiencies and add to the overall cost of the construction.

The funding needed for this agreement is currently allocated within the NCDOT I-26 Widening Project in the Water Resources Capital Improvement Projects fund. City Council previously approved a budget of $196,900, so this request would increase the budget amount by $152,332. No budget amendment is necessary.

City staff recommends City Council approval of a resolution authorizing the City Manager to execute a Second Supplemental Utility Agreement with NCDOT for the relocation and adjustment of municipally owned waterlines within the I-26 / NC 280 (Airport Road) interchange project area. The adjusted estimate for the relocation and adjustment of the waterlines is $303,680 plus an additional contingency amount of $45,552 for other possible unforeseen additions, for a total project budget estimate amount of $349,232.

RESOLUTION BOOK NO. 36 - PAGE 447

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Hunt moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Wisler and carried unanimously.

Councilman Smith asked that when the City enters into contracts, that Council be advised on what is being provided in terms of wages. City Manager Jackson will check what reporting is being reported now and what will be needed to satisfy that request.

III. PRESENTATIONS & REPORTS:

A. PRESENTATION OF THE EXTERNAL AUDIT OF THE FISCAL YEAR 2015 COMPREHENSIVE ANNUAL FINANCIAL REPORT

Director of Finance and Management Services Barbara Whitehorn said that this is the consideration of a motion to accept the Fiscal Year (FY) 2014 Comprehensive Annual Financial Report (CAFR).

Mr. Eddie Burke, CPA, Audit Partner with Cherry Bekaert LLP, presented Council with the City's CAFR, and then provided a review of the audit. He reviewed the different audit areas of focus.

Cherry Bekaert has provided the City with an unmodified, or "clean," opinion that the financial statements are fairly presented in conformity with generally accepted accounting principles. This opinion is the highest form of opinion that the external auditors can express on the presentation of the City's financial statements.

In response to Councilwoman Wisler, Mr. Burke said that all three recommendations from last year have been addressed/corrected.

Vice-Mayor Hunt moved to accept the Fiscal Year 2014 Comprehensive Annual Finance Report. This motion was seconded by Councilman Bothwell and carried unanimously.

B. QUARTERLY FINANCIAL UPDATE

Director of Finance and Management Services Barbara Whitehorn noted the following key items in the first quarter financial report:

- Major General Fund revenues, such as property and sales taxes, are on track to match budget estimates, but more refined projections will be available in the second quarter report. Please note that many revenues are remitted to the City either on a delay from collection (sales tax) or peak during a particular month or quarter (property tax). In the case of sales tax, the actual collections as of 9/30/2014 represent only one month of sales tax. Since the date of these financials, we have received the August and September receipts, on which we base our assertion that these taxes are on track with budget. Property Tax collections will be recorded primarily in December and January.

- Smaller General Fund revenues, such as Development Services fees and Local ABC shared revenue continue to perform better than original budget estimates; the Development Services fee revenue budget was amended in October (Quarter 2) to account for the ongoing high level of activity.

172

- General Fund expenditures were at 20% of budget at the end of the first quarter – which is typical for this point in the fiscal year. Although Police Department overtime and augment pay expenses were running ahead of budget through the first quarter, overall Police salary expenses (including regular and overtime pay) were on budget due to offsetting vacancies. Staff will be adjusting budgets between Police regular and overtime/augment pay during the second quarter to reflect first quarter results and projections for the remainder of the year.

- While staff anticipates that unassigned fund balance in the General Fund will increase in FY 2014-15, staff will have more refined projections later in the year.

- All Enterprise Funds are currently projected to perform at or better than budget.

- Staff has identified no financial or budget issues with capital projects in the first quarter that significantly impact budget estimates or cash flow projections.

She then provided Council with the following financial information which reflects the City's overall financial position for the fiscal year through September, 2014. The following is the executive summary:

Amendments. The General Fund budget presented in this first quarter report reflects the adopted budget of $99,547,954 along with two budget amendments approved by City Council. A summary of the budget amendments is presented below. The budget amendments that involved an appropriation from fund balance are noted with an asterisk.

Adopted Budget	99,547,954
Budget Amendments:	
Parks & Recreation Grants/Donations	53,795
WNC Diversity Engagement Coalition Support*	10,000
9/30/2014 Budget	$99,611,749

*Fund Balance Appropriation

Revenues. Through September 30, 2014, the City has collected $9.3 million in General Fund revenue, which represents approximately 10% of the total General Fund revenue budget. Based on FY 2014 year end revenue collections and FY 2015 first quarter trends, staff is currently projecting that ***FY 2015 General Fund revenue will slightly exceed budget.***

Expenditures. General Fund expenditures through September 30, 2014 totaled $19.9 million or 20% of budget, which is typical for this point in the fiscal year. Personnel expenses, the largest component of the General Fund budget, are on budget through the first quarter. Staff is projecting that ***FY 2015 expenditures (including contract and purchase order commitments) will finish the year under budget by $767,000 (99% of budget).***

Fund Balance. The City began FY 2015 with unassigned fund balance of $15.0 million. As noted above, an additional $10,000 was appropriated from unassigned fund balance during the first quarter. Based on ***current revenue and expenditure projections for FY 2015, staff estimates that unassigned fund balance at June 30, 2015 will be $16.26 million or 16.5% of estimated expenditures.***

In response to Vice-Mayor Hunt, Ms. Whitehorn said that it's a little early in our first quarter to project our unassigned fund balance, but so far the trend is looking good.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING RESIDENTIAL DEVELOPMENT DENSITY STANDARDS IN CERTAIN COMMERCIAL ZONING DISTRICTS AND ONE RESIDENTIAL ZONING DISTRICT

ORDINANCE NO. 4374 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING RESIDENTIAL DEVELOPMENT DENSITY STANDARDS IN CERTAIN COMMERCIAL ZONING DISTRICTS AND ONE RESIDENTIAL ZONING DISTRICT

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance amending the Unified Development Ordinance regarding changes to the residential density allowed in certain commercial zoning districts (all but one would be increases). This public hearing was advertised on November 28 and December 5, 2014.

Staff originally brought forward the wording amendment in question, proposing changes to residential density limits in commercial zoning districts, primarily as an effort to better realize the goal of increased residential infill density along commercial corridors. However, with Asheville's affordable housing shortage also in place as one of Council's focus areas, Council and staff recognized that the amendment could also serve as an instrument to encourage the construction of more new affordable units.

In winter and spring of 2014, when the wording amendment was first being drafted, staff developed the proposed maximum densities based on a methodology assuming that residential building volumes would not exceed the theoretical largest building that could be developed as a wholly *commercial* development. The figures were also affected by suppositions about site design: landscape buffers, parking, building height, multiple buildings on a site, etc.

In June of this year, Council was scheduled to hear the wording amendment. The item was continued in order that staff might further discuss the figures with the Housing and Community Development (HCD) Committee, reconsider the numbers associated with those limits and whether they needed to be adjusted to better meet the aforementioned Council goals.

The conversation with HCD ensued at that committee's July meeting. The committee asked staff to reconsider, and do more analysis of, the proportion of units that would be required to be affordable in order to maximize density. Further, staff was asked to consult with the Affordable Housing Advisory Committee, and to examine whether the maximums were sufficiently high as to fully support the goal of encouraging infill density while still ensuring compatibility with surrounding areas.

Staff has devoted considerable time to refining the numbers, and has used interactive spreadsheets, as well as other tools, to investigate how the density numbers are affected when certain assumptions (e.g., number of parking spaces provided per unit) are adjusted. Staff also has given attention to the matter of the percentage of affordable units required to maximize density, and how that maximum density relates to the density allowed for purely market-rate housing.

Staff's analysis also led to the inclusion of two more districts. The Neighborhood Corridor District, another mixed-use district similar to those already included, was determined to have an unsuitably low maximum density. Staff also recognized that, if the changes to commercial districts were to take effect, there would be a marked discrepancy with the highest density *residential* district in the development ordinance: the Urban Residential (URD) district. To offer a maximum in the Office district that was higher than the maximum offered in the Urban Residential district

seemed too inconsistent an approach to addressing the goals of increasing multifamily density in appropriate locations.

Unlike the other affected districts (and unlike most districts in the ordinance), the URD district exists on the ground in very limited circumstances. Since its adoption in 2003, it has only been applied when property owners have requested a rezoning for certain projects (e.g., The Larchmont, Clingman Lofts). There are no existing districts of privately-owned, undeveloped land zoned URD. As such, any developer seeking to develop in the URD district would need to request a rezoning, and compatibility for a development of such density would be assessed at that time.

Staff made the determination that the URD district should be included after it was too late to add that modification to the Planning and Zoning Commission's November agenda. At their November 5th meeting, the Commission voted unanimously to recommend approval for the modifications to the other eleven districts. At their December 3, 2014, meeting, the Planning and Zoning Commission voted unanimously (6-0) to recommend approval of revising the wording amendment text to include the changes to density in the Urban Residential district.

Recognizing that incentives for density and affordable housing will appeal to developers only if the math truly represents an encouraging option, staff has sought conversations with multiple developers to examine the key ratios and factors that would enable the amendment to have the desired impact. The table below is meant to illustrate how the proposed change affects the numbers, not only of maximum density, but also of affordable housing units provided, and additional market units provided. Of the eleven districts where increases are proposed, three representative districts are shown here for the sake of simplicity.

Zoning District	Status quo maximum density (units/ac)	Proposed maximum density (units/ac)		Additional units yielded by bonus	
		Market-rate	With 20% affordable	Market-rate	Affordable
Office Business	12	20	40	12	8
River	16	30	60	18	12
Regional Business	32	35	70	21	14

It's worth noting that the maximal density levels were determined for a "best case" scenario parcel without the irregular shapes, topographic constraints, utility conflicts, flood hazards and other obstacles common to Asheville parcels. Staff recognizes that many parcels will not be able to be developed to these densities, but nonetheless concluded that the option should be available for the parcels that can support such levels.

The next table shows the existing densities for all of the districts proposed for increases, as well as the current proposal. If just 10% of the vacant land area in these districts – to say nothing of the underdeveloped land – were developed at the maximum density, more than 2,300 multifamily units would be built (more than 460 affordable) or if developed all at market rate, more than 1,150.

Proposed for Increased Residential Density

District Name	Current Density (units per acre)	New Proposed Density (units per acre) Market Rate	20% Affordable
Office	8	20	40
Office II	12	20	40
Office Business	12	20	40
CB I	16	20	40
CB II	16	25	50
Institutional	16	30	60
River	16	30	60
Highway Business	32	35	70
Regional Business	32	35	70
Neighborhood Corridor	32	35	70
Urban Residential	32	35	70

Another element of the proposed amendment involves *reducing* the allowed density for one district: Commercial Industrial. The reduction proposed in May (aimed to temporarily curtail residential development of land with industrial potential) had been from 16 units per acre to two units per acre. Staff is now proposing a change to eight units per acre to reduce the degree of nonconformity created for existing residences in the CI zoning, while still achieving the goal of preventing large multifamily projects.

In the Asheville City Development Plan 2025, references to encouragement of mixed-use development, higher residential densities in appropriate locations, and multi-family housing along corridors abound. Such instances are almost too numerous to list—multiple examples exist on page 155 alone.

The City Council 2014-2015 Strategic Plan (Focus Area 2) Goal 1 is to "Expand Asheville's supply of quality, affordable homes for current and future residents." Action Items under that goal speak directly to revisiting the UDO to encourage affordable housing close jobs and transportation; and providing financial assistance and development incentives. Focus Area 1, Goal 2 says the City should act to "Research, develop and propose incentives for in-fill and redevelopment."

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Amendments could encourage infill development in areas where current density limits may have inhibited desirable high-impact projects.
- Amendment is hoped to stimulate construction of mixed-income housing (including affordable) on location-efficient corridors.
- Stricter limits will prevent residential development of land with industrial potential while study of industrial land is conducted.

Staff recommends approval of the modification to the wording amendment text.

In response to Councilman Smith, Mr. Esselstyn said that they have had discussions with developers and they are in general agreement on the numbers.

Councilman Bothwell felt that this is a workable and rational plan to help increase density.

Mayor Manheimer opened the public hearing at 5:43 p.m.

A piano teacher in west Asheville was concerned that on the City's website it lists the median income as $39,000 but most of the people that she works with are making half of that. She asked Council to consider a percentage of affordable housing in any project moving forward.

Mr. Rich Lee, representing the East/West Asheville Neighborhood, felt this is a great first step to consolidate apartments along corridors and protect the core of the neighborhoods.

Mayor Manheimer closed the public hearing at 5:45 p.m.

Councilman Smith felt this is the leading edge of this Comprehensive Housing Affordability Strategy and was encouraged to hear the community wanting Council to take future steps. Ultimately this is about thoughtful growth in the City of Asheville and knowing that the affordable housing need is so great, how are we going to accommodate the density necessary to solve the problem.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell moved to approve the revised wording amendment modifying residential density in selected districts, and find that the request is reasonable, is in the public interest, and is consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) References to the benefits of higher-density residential development in corridors closer to jobs are widespread in the 2025 Plan; (2) Encouraging more density on transit routes is also a stated objective in the Comp. Plan; (3) Affordable housing, a goal of both the Comp. Plan, City Council Strategic Plan, and multiple other adopted plans, would be furthered, and (4) The aim to promote more mixed-use infill development figures prominently in the Comp. Plan, as well as the City Council Strategic Plan. This motion was seconded by Councilman Smith and carried unanimously.

On behalf of City Council, Vice-Mayor Hunt thanked Mr. Esselstyn for his compassion and professionalism as a planner with the City and wished him well in his future endeavors.

ORDINANCE BOOK NO. 29 – PAGE 307

B. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING OF A PORTION OF WESTOVER ALLEY

RESOLUTION NO. 14-275 - RESOLUTION TO PERMANENTLY CLOSE A PORTION OF WESTOVER ALLEY

Public Works Director Greg Shuler said that this is the consideration of a resolution to permanently close a portion of Westover alley. This public hearing was advertised on November 14, 21 and 28, and December 5, 2014.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjoining property owner Matt Depofi has requested the City of Asheville to permanently close a portion of Westover Alley.

The Multimodal Transportation Commission met on September 24, 2014, and approved the closure.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution to permanently close a portion of Westover Alley.

Mayor Manheimer opened the public hearing at 5:56 p.m., and when no one spoke, she closed the public hearing at 5:56 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Wisler moved for the adoption of Resolution No. 14-275. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 36 – PAGE 448

C. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING PROPERTY OFF FAIRVIEW ROAD FROM URBAN VILLAGE DISTRICT TO URBAN PLACE DISTRICT/CONDITIONAL ZONING FOR DEVELOPMENT OF A MIXED USE PROJECT CONTAINING APARTMENTS AND RETAIL, WITH MODIFICATIONS TO PARKING STANDARDS FOUND IN SECTION 7-8-26 OF THE UNIFIED DEVELOPMENT ORDINANCE

Mayor Manheimer said that Mr. Lou Bissette, representing the owner, asked for a continuance until January 27, 2015, in order to (1) further look at the City's Land Use Incentive Program and other ways to achieve 10% affordable housing in the project; and (2) meet with the neighbors to discuss any of their concerns. Therefore, Councilman Smith moved to continue this public hearing until January 27, 2015. This motion was seconded by Councilman Davis and carried unanimously.

D. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING 275 AND 281 HAZEL MILL ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR WHITE OAK GROVE APARTMENTS ON HAZEL MILL ROAD AND CLAYTON ROAD

ORDINANCE NO. 4375 - ORDINANCE TO CONDITIONALLY ZONE 275 AND 281 HAZEL MILL ROAD FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR WHITE OAK GROVE APARTMENTS ON HAZEL MILL ROAD AND CLAYTON ROAD

At the request of Mayor Manheimer, Councilman Pelly moved to recuse Mayor Manheimer from participating due to a conflict of interest. This motion was seconded by Councilman Bothwell and carried unanimously. At this time, Mayor Manheimer handed over the gavel to Vice-Mayor Hunt to preside over this portion of the meeting.

Urban Planner Julia Fields said that this is the consideration of an ordinance to conditionally zone 275 and 281 Hazel Mill Road from RM-8 Residential Multi-Family Medium Density District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for White Oak Grove Apartments on Hazel Mill Road and Clayton Road. This public hearing was advertised on November 28 and December 5, 2014.

City Attorney Currin said that a valid protest petition has been filed, thus requiring a three-fourths vote of the seated City Council to approve the rezoning of the property. Since Mayor Manheimer is recused, the number of votes necessary to rezone the property would be five.

The project site consists of two parcels (currently addressed 275 and 281 Hazel Mill Road) located off of Hazel Mill Road, just north of Patton Avenue, with frontage along Clayton Avenue, Hazel Mill Road and Nancy Street. The project proposes a recombination which would result in an overall project area of 6.501 acres. The property slopes gently from west to northeast.

There are two vacant dwellings and several associated structures existing on the parcels which will be removed for this project.

The applicant is proposing to construct a multi-family development that will consist of ten (10) buildings. The buildings are either two-story or two/three split configurations (maximum height of 40 feet) and contain a mix of one (32) and two (72) bedroom units for a total of 104 residential units. The developer is proposing that 10% (11 units) of the dwelling units be affordable meeting the City's standards. The remaining units will meet the City's criteria for "workforce" housing. A number of amenities are provided on the property for the benefit of the residents including a dog park, community garden, and picnic areas. The buildings will be constructed to meet North Carolina Healthy Built Homes standards.

Access to the site is proposed via two drive entrances off of Clayton Avenue. It is proposed that Clayton Avenue be widened to accommodate some on-street parking (18 spaces) while allowing for two-way traffic on that street. A total of 204 parking spaces are provided. All parking spaces on site will be constructed using pervious pavers. Provisions are made for the parking of 40 bicycles. Sidewalks are provided along both Clayton Avenue and Hazel Mill Road. The sidewalk proposed along Hazel Mill will be constructed largely back from the road (not immediately adjacent) and will be ten feet in width.

Street trees are required along all street frontages. The project also includes compliant street buffer, building impact, tree save, and parking lot landscaping, with the preservation of some existing vegetation along Hazel Mill Road. The applicant is proposing 2.38 acres of open space, well above the 1.20 acres of open space required.

Under the current RM-8 zoning, the combined site would be permitted a total of 57 units.

In 2009, a Level II project consisting of 42 single-family townhouses housed in 21 structures was conditionally approved for the site. No development activity occurred at that time. Subsequently, in 2012, a conditional zoning request was submitted (from RM-8 to RM-16CZ) proposing construction of a 92-unit apartment complex. This request was withdrawn prior to final consideration by the Asheville City Council.

The Technical Review Committee (TRC) reviewed this application at their meeting on September 15, 2014, and approved it with conditions. The developer has addressed many of the conditions noted by TRC in the submittal that is before the City Council.

The proposal was considered at a public hearing before the Asheville Planning and Zoning Commission on October 16, 2014. Five people spoke against the project at the meeting

with one person speaking in support. The main concerns voiced by those opposed were density and transportation issues along Hazel Mill Road. Following the public hearing, the Commission voted 4-1 to recommend approval of the project to the Asheville City Council. They added two additional conditions to those recommended by TRC as follows:

1. That the developer completes a comprehensive traffic study prior to final TRC approval.
2. That the developer provide annual bus passes for two years/per unit and in perpetuity if a transit line returns to Hazel Mill Road.

If approved by Council, the project must return to the Technical Review Committee for final review.

Although not required, the developer held two neighborhood meetings on the proposed development. These meetings were held on Thursday, September 11th (to introduce the proposal to those who own property or reside in the area) and on Monday, October 27th (transportation issues focus).

The subject parcels and adjacent lots are zoned RM-8, with Highway Business, Institutional, Office, Resort, and RS-8 zoned properties in the general vicinity. The properties are immediately surrounded by single family homes and townhomes with a large car dealership, offices, and a church in close proximity. The proposed development, with a density of approximately 16 units per acre, is of greater density than is found on the immediately surrounding residential properties, however, the property is within approximately ¼ mile of transit service and within walking distance of a number of service and retail businesses. The developer plans initially to provide an annual bus pass for each unit.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. *That the proposed use or development of the land will not materially endanger the public health or safety.*
   The proposed project has been approved by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. *That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.*
   The proposed use and development of the land are reasonably compatible with the natural features and topography of the site. The developer worked with the existing topography on the site in the placement of the buildings. Landscaping and open space surround the development and a number of existing trees are proposed to be saved.

3. *That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.*
   The development is not expected to injure the value of adjoining or abutting properties. The use proposed is similar to adjacent parcels (residential) although at a higher density. Given the proximity to the commercial / mixed-use Patton Avenue corridor, higher-density residential uses can be considered to be appropriate in this location. The developer is proposing a number of street and sidewalk improvements along Hazel Mill and Clayton

Road which should improve conditions along the segments of roadway surrounding the property.

4. *That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.*
The proposed use as multi-family is in harmony with the area in which it is located. Although surrounded primarily by single family homes, this site is less than a quarter mile from the Patton Avenue commercial corridor, making it an appropriate location for higher-density residential development. Additionally, there are a number of other parcels in the vicinity with multiple residential units, including condo units on adjacent Nancy Street and Townview Drive. None of these other developments include buildings as large as the apartment structures proposed in this development; however, the developer has worked to reduce the height and scale of the buildings from the previous submittal to make the structures more in keeping with surrounding buildings.
The number of units proposed exceeds the underlying (existing) density; however, staff feels that the site layout and proximity to Patton Avenue and transit (as mentioned above) makes this an appropriate location for this proposal.

5. *That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.*
The *Asheville City Development Plan 2025* encourages a Smart Growth development pattern by recognizing the need for higher density residential infill projects (pg. 31). With 104 units, this project is not only meeting that goal but also seeks to assist with what the *Plan* calls "the number one economic development problem for this community" (pg. 45): lack of affordable housing. The project includes 10% of the units as affordable.

6. *That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.*
The developer is proposing a number of street and sidewalk improvements along Hazel Mill and Clayton Road which should improve road conditions adjacent to the project site. Basic infrastructure appears adequate and preliminary review by other service providers has not revealed any problems for future service to the development.

7. That *the proposed use will not cause undue traffic congestion or create a traffic hazard.*
The proposed project has been reviewed by the City Traffic Engineer and it has been determined that the project should not cause undue traffic congestion along the existing street infrastructure.

One of the smart growth principles in the Asheville City Development Plan 2025 highlights the importance of higher density infill development where infrastructure can easily be provided. Given the proximity to the commercial/mixed use Patton Avenue corridor, higher density residential units seem appropriate. The comprehensive plan additionally speaks at length about the issue of affordable housing. This development proposes 10% (11 units) of affordable housing

City Council's adopted goals for 2014-2015 stress expanding Asheville supply of affordable housing. This project offers 11 new affordable units in a location near many needed services. Council has a goal of expanding the supply of housing and this proposal increases the density that can be placed on the property.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:
- Higher density development furthers the goals and objectives of the comprehensive plan.

- The proposed development provides housing in an area close to many services.
- The project will be designed to qualify for Healthy Built Homes certification.
- The project proposes 10% affordable units.
- The project exceeds the density allowance under the current RM-8 zoning district unless the conditional zoning is approved.
- Concern has been voiced by surrounding neighbors regarding increased traffic.

Staff recommends approval of the proposed conditional zoning, finding it consistent with City-adopted plans and strategic goals for development. The Planning and Zoning Commission additionally recommended approval to the Council (4-1).

Vice-Mayor Hunt opened the public hearing at 6:07 p.m.

Mr. Robert Grasso, developer, felt that this design has responded to a lot of the concerns expressed two years ago by City Council and the neighborhood. Two years ago a Traffic Impact Analysis was perform for 108 units (now 104 units) and at that time it showed that they were not significantly having an impact on the traffic on Hazel Mill Road and Louisiana Avenue. One hundred and four units are now being proposed into smaller buildings that conform with the slope of the land. Two of the buildings will be a floor below Clayton Avenue. Amenities will be provided, such as a dog park, community garden, benches, etc. They have committed to 10% affordable apartments and all their rents will we well within the workforce range. This is a unique location which is close to Patton Avenue and they were originally on the bus line. Since that line has since moved, he has committed to a bus pass per unit to encourage people to use that service. He has tried to be sensitive to the concerns of the neighborhood, with their one big concern the existing traffic issue on Hazel Mill Road. He committed $10,000 toward comprehensive traffic study so the neighborhood can come up with recommendations for traffic calming. A preliminary meeting was held and the outcome from that meeting was that the neighborhood wanted sidewalks. Instead of the $10,000 for the traffic study, he instead committed up to $15,000 towards construction of additional sidewalks off of his property. He did note that $1,000 has been spent on the consultant at the preliminary meeting, and therefore, committed to spending up to $14,000 for sidewalks. Regarding the construction schedule, he said they hope to break ground in the spring and after two years of construction, they hope to be completed in the spring of 2017. He was excited about moving forward and hoped City Council would support his project.

Ms. Fields said that the condition number 5 "The developer shall complete a comprehensive traffic study prior to final TRC approval" will be removed and replaced with the condition that the developer is committed to spending $14,000 on sidewalk construction off his property. Mr. Grasso agreed with replacement condition, along with all the other conditions provided to Council.

Mr. Timothy Sadler spoke about ways he supported the project.

The following individuals spoke in opposition of the project for various reasons, some being, but are not limited to: will the school district be able to accommodate the additional 200 children; since easiest route from this property to Patton Avenue is a private road off Hawkins Lane that cross Harry's Cadillac's property, a request that a condition be that the developer advise his tenants not to use the private road; the 15-20 townhouses and Section 8 housing on Nancy Street have negatively impacted the ability for vehicles to get onto Hazel Mill Road and these apartments will only exacerbate the problem; possible negative impact of my real estate values; abutting property owners do not want to see the apartments across the street from their homes; need for sidewalks on Hazel Mill Road; existing infrastructure and traffic challenges on Hazel Mill Road; need for stop sign at corner of Clayton Avenue and Hawkins Lane; every intersection from Patton Avenue to Clayton Road does not have the required site distance; the rents for a one-bedroom are still out of the range for many in our community; traffic calming on Hazel Mill Road is necessary; Hazel Mill Road is a narrow road; tenants will not work to beautify

the neighborhood like single-family homeowners; one-bedroom apartments will have a high turn-over; neighborhood wants single-family homes, not one-bedroom apartments; and stormwater runoff onto neighboring properties during construction:

Mr. Roy McGuinn, former principal
Mr. Craig Justice, attorney on behalf of Harry's Cadillac
Mr. Rich Steinhoff, property owner on Townview Drive
Mr. Steven Slack, property owner on Hazel Mill Road
Mr. Nat Burke, tenant on Townview Drive
Ms. Valerie Martin, property owner on Townview Drive
Ms. Bridget Nelson, resident on Nancy Street
Mr. Gary Dunbar, resident on Nancy Street
Mr. Nathan Merchant, property owner on Hazel Mill Road
Resident on Townview Drive

In response to Councilwoman Wisler, Transportation Director Ken Putnam said that if the private road across Harry's Cadillac's property is closed (as was a possibility noted by Mr. Justice), the traffic signal on Patton Avenue would not go away. Mr. Putnam then explained how the Transportation Department is constantly doing speed studies and is always open to listening to the neighborhood's concerns. Regarding traffic calming, the City has budgeted funds this year to work on the backlog of projects. If a road has been analyzed for traffic calming measures, there are several factors that are reviewed, including speed humps.

There was a brief discussion about possible strategies to eliminate cut-through traffic, noting that sometimes a strategy will just shift the problems onto another street.

It was confirmed that Hazel Mill Road is a no through truck street.

At 7:07 p.m., Vice-Mayor Hunt closed the public hearing.

Councilman Bothwell felt that we should act separately to have sidewalks on Hazel Mill Road both to Louisiana Avenue and to Patton Avenue.

Vice-Mayor Hunt said that the challenge we face is that we can't predict where the next development will go in and it's difficult to put in the infrastructure without knowing that fact.

Councilman Pelly heard emphasis on the expansion of affordable housing options, and at the same time Council has committed ourselves to greater mobility. If this project is approved, City Council is committed to ameliorate the impact to the surrounding community.

Councilman Pelly moved to approve the conditional zoning request for White Oak Grove Apartments on Hazel Mill and Clayton Roads from Residential Multi-Family Medium Density District (RM-8) to Residential Multi-Family High Density Conditional Zoning (RM-16CZ), subject to (1) the replacement of condition 5 in the list of conditions to be replaced with the condition that the developer is committed to spending $14,000 on sidewalk construction off his property; and (2) the developer notifying the tenants that the private road off Hawkins Lane, which crosses Harry's Cadillac's property, is a private road which is not available to access Patton Avenue, with said notice be printed by using a font and color sufficient to be notice by the tenants and posted at a conspicuous location in the community and be provided to all new tenants with the materials provided to such tenants along with their leases; and find that the request is reasonable, is in the public interest, and is consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) the plans for increased density on this site further City goals promoting higher density residential infill in appropriate areas; (2) the plan for 10% of the units to meet the City's affordability standards respects City goals working to address the needs of the community for increased affordable housing. This motion was seconded by Councilman Smith.

Mr. Grasso agreed to all conditions, including those in the motion that (1) condition 5 being revised that the developer is committed to spending $14,000 on sidewalk construction off his property; and (2) notice to tenants that the private road off Hawkins Lane is a private road and not available to access Patton Avenue.

City Attorney Currin said that she would contact Mr. Justice to obtain the PIN Number of Harry's Cadillac's property and include that in the condition.

Councilman Davis felt that Harry's Cadillac has been a good neighbor for many years and felt that blocking access to Patton Avenue seems to send a wrong message to the people in the community.

The motion made by Councilman Pelly and seconded by Councilman Smith carried unanimously (Mayor Manheimer was recused).

At this point in time, Vice-Mayor Hunt returned the gavel back to Mayor Manheimer to continue residing over the meeting.

ORDINANCE BOOK NO. 29 - PAGE 312

Because Councilman Pelly understood the need for sidewalks, he moved to direct the City Manager to investigate giving funding priority to Hazel Mill Road sidewalk sections discussed tonight during preparation of the Fiscal Year beginning July 1, 2015, and the Fiscal Year 2015-2019 capital improvement plan, with design work to be anticipated in Fiscal Year 2016 and construction thereafter in Fiscal Year 2017 and to report back to Council. Said motion is made with the understanding that advancement of the sidewalk project should be contingent upon satisfactory progress of the development and the granting of the easements necessary for sidewalk construction; and, that completion of the public sidewalk construction be timed to coincide with completion of the final phase of the development. This motion was seconded by Councilman Bothwell and carried unanimously.

Vice-Mayor Hunt noted that doing infrastructure is contingent upon easements from the property owners. He encouraged those that want infrastructure along Hazel Mill Road work together to help the City obtain the necessary easements.

Closed Session

At 7:25 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C. Gen. Stat. § 143-318.10(3). The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(1); (2) To discuss matters relating to the location or expansion of industries. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(4); and (3) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3). This motion was seconded by Councilman Pelly and carried unanimously.

At 7:47 p.m., Vice-Mayor Hunt moved to come out of closed session. This motion was seconded by Councilwoman Wisler and carried unanimously.

E. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR RIVER MILLS LOFT LOCATED OFF OF THOMPSON STREET FOR A NEW PROJECT OF 254 RESIDENTIAL UNITS WITH A REQUEST FOR A MODIFICATION TO THE SETBACK REQUIREMENTS, A REQUEST FOR

MODIFICATION FOR THE WIDTH OF A PORTION OF SIDEWALK IN THE PROJECT, AND VARIANCES TO THE DESIGN AND OPERATIONAL STANDARDS

City Attorney Currin reviewed with Council the conditional use process, which is a quasi-judicial permit hearing. At this public hearing, all the testimony needs to be sworn and due process protections afforded to the applicant.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

After hearing no questions about the procedure, Mayor Manheimer opened the public hearing at 7:55 p.m.

Interim Planning Director Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of the issuance of a conditional use permit for River Mills Loft located off of Thompson Street (Location Map - Attachment to City Exhibit 3), for the development of 254 residential units and 4,000 square feet of commercial space on a single parcel zoned Urban Place District in accordance with Section 7-5-5 of the Unified Development Ordinance (UDO), including a request for modifications to building setback standards found in Section 7-8-26 of the UDO.

The project site consists of a single parcel with a combined area of approximately 9.52 acres (according to submitted plans) and frontage on Thompson Street and Stoner Road to the east of Biltmore Village on the Swannanoa River (Aerial - Attachment to City Exhibit 3) (Aerial - City Exhibit 4) (Aerial - City Exhibit 5). The site is zoned Urban Place which was rezoned in 2013 at the request of the owner. Adjacent parcels are zoned Commercial Industrial (CI) to the south, River to the east and west and Urban Place to the west. The Swannanoa River is adjacent on the north side of this parcel and the Norfolk Southern rail line is on the south side.

The project area is currently vacant and was graded and filled several years ago as part of an approved development plan. Surrounding uses include commercial operations, the rail line and storage.

The applicant is proposing a primarily residential project with a limited amount of non-residential space. Plans indicate a total of 254 residential units made up of 248 two-bedroom and 6 three-bedroom units in two large 'L-shaped' 4-story structures described as Building A and Building B. Building A is located at the corner of Thompson Street and Stoner Road and Building B is located on Thompson Street adjacent to the entrance drive (Site Plan - Attachment to City Exhibit 3). Within each large structure will be a small non-residential spaces: one in Building A close to the corner of Stoner Road and the other in building B at the entrance. (Site Plan - City Exhibit 6). While the exact uses of these spaces has not been determined at this point, there is an expectation that they will be used as commercial space especially as the surrounding area receives further redevelopment (Map of Commercial Space - City Exhibit 7). The project also includes a one-story clubhouse structure located interior to the site.

The project site is within the 100-year flood hazard area and is also affected by the more restrictive floodway zone (Site Plan Marked for Floodway - City Exhibit 8). The finished floors of occupied buildings are required to be two feet above the base flood elevation which places the proposed ground floor level approximately 10 feet above the grade of Thompson Street.

The height of the large structures (Building A and B) is 41 feet to the ceiling height of the residential units and 67 feet to the top of the gabled roof. This places the project within the

maximum building height for the district.

The project proposes two access points; the main entrance is from Thompson Street and a second on Stoner Road towards the rear of the property, both are two-way driveways. There are a total of 327 parking spaces proposed, including required accessible spaces and 18 bike parking spaces at the interior of the project. This number is well within the UDO parking range.

New 10 foot wide compliant sidewalks are shown on Thompson Street and Stoner Road. The developer is requesting a modification for a portion of the sidewalk width along Stoner Road past the entrance terrace area because the design team feels the surrounding context does not warrant the need for the wider 10' sidewalk and the amount of impervious pavement in the floodplain could be reduced. This modification request was supported by both the Planning and Zoning Commission and the Asheville Area Riverfront Redevelopment Commission.

In addition to the external sidewalks there are internal walkways throughout the site across the parking lot and into key locations in the building. Because of the grade required to elevate the site above the level of the floodplain, the site is surrounded by retaining walls where the building interacts with the street. This is most prominent for Building A at the corner location. The developer is requesting a wider setback for both buildings to accommodate the location of the floodway and to provide an improved transition from Thompson Street. The pedestrian access into the development is provided along the building frontage along Building A and for Building B, along the front of the building adjacent to the driveway and sidewalk connections. The setback expansion represents the second modification request for this project.

Landscaping is required for this project and includes street trees, parking lot landscaping building impact and dumpster screening. With minor amendments to the plan, the project will comply with all landscape requirements.

Open space is required in an amount equal to five percent of the lot area, which is 20,735 square feet (or 0.47 acre). This is provided in the area around the clubhouse, and in the area along the Swannanoa River.

The site is located in the 100-year flood hazard area and is also affected by the more strictly regulated *floodway*. The setbacks in the Urban Place district are a maximum of 15 feet unless the site is affected by the flood hazard area and other topographic challenges, in which case the setback can be expanded through modification (Landscape Plan - City Exhibit 9). The survey for the project identifies the approximate boundaries of the floodway and the project has been setback from Thompson Street to accommodate this zone. Staff is supportive of this modification. The Stoner Road side has fewer challenges with the flood hazard zone but the need for the sidewalk and the topographic grade difference also requires additional setback area. The retaining wall proposed for Building A is about 10 feet above the surrounding street and according to revised plans with provide a ramp along the west side of the building, a large stairway at the corner, and other treatments such as plantings and terracing to reduce the scale/ mass of the retaining wall. The changes to the wall were proposed on the recommendation and discussion with the River district Design Committee and concerns from the Planning and Zoning Commission during their review. The setback modification request was supported by both the Planning and Zoning Commission and the Asheville Area Riverfront Redevelopment Commission.

Variances to design and operational standards are reviewed by the Planning and Zoning Commission acting as the Board of Adjustments.

The project was granted a variance by the Planning and Zoning Commission for the spacing between public entrances for buildings A and B (Retaining Wall Pictures - City Exhibit 10).

City Council may consider modifications to dimensional requirements as a part of the

conditional use approvals (Two Exterior Building Elevations and Perspective Views - Attachments to City Exhibit 3):

1. Setback - The maximum building setback in this district is 15 feet,
   To better accommodate the required finished elevation and to allow a transition to the street: a setback for Building A is proposed at between 35 and 45 feet from Thompson Street and between 45 and 55 feet from Stoner Road;

   To account for the location of the floodway a setback for Building B is proposed at between 55 and 95 feet from Thompson Street. This is due to the wide floodplain area and the existing curvature of the roadway.

2. Sidewalk width- the developer is requesting that the sidewalk along Stoner Road be approved to a more narrow 6 foot width and not be required to install the Urban Place standard of ten feet.

Both modification requests were recommended for approval by the Planning and Zoning Commission and the Asheville Area Riverfront Redevelopment Commission.

The site was zoned Urban Place in 2013 at the request of the property owner because he felt that Urban Place District provided greater options for commercial uses and because the residential density is higher in Urban Place than in the River District. Urban Place (UP) allows 64 residential units per acre and is intended to foster "higher-density, mixed-use development that is economically viable, pedestrian oriented, visually attractive and contributing to the place making character of the city...in the form of mixed-use structures that relate to the street, enhance the streetscape and offer a wide range of complementary land uses and employment opportunities." The district is suitable for areas affected by blight or neglect and for areas where the design and appearance of the built environment is important to the vitality of the area.

The proposal offers a residential density of almost 27 units per acre and includes two small non-commercial spaces located in the prominent corners of Buildings A and B (totaling about 4,000 square feet). The site is in a good location for a multi-family residential use because of the long term plans for the area which include greenway and recreation improvements along the Swannanoa River and because the site is walkable to Biltmore Village and beyond. However, the proposal has some challenges meeting the stated purposes of the Urban Place District of relating to the streetscape and pedestrian orientation due to focus of the proposal on residential uses and the topographic challenges in response to the flood hazard area. The proposed mix of uses is heavily residential and residential uses do not by their nature require such an active publicly accessible ground floor. That said, the building fronts will be designed with windows and private balconies which is something recommended in the ordinance. The flood plain elements work against the goal of direct building connectivity too. However since the initial plans were submitted the design team has continued to work to improve the connection of the building pad and the level of Thompson Street and Stoner Road. There will be a terrace space to reduce the scale and nature of the retaining wall and this will be accomplished with planted sections, change of materials large gateway steps and plantings between sections of the wall. Considering this project over the long term, the surrounding district is expected to become more mixed-use as additional projects come on-line. The Urban Place zoning allows density that is high enough to make the project viable and the influx of new residences will support businesses throughout the area. Over time there may be additional demand for commercial spaces and this development plan should be flexible enough to allow for expansion of non-residential uses provided that changes to parking needs (if any) can be accommodated. Additional commercial space was one discussion point that the Planning and Zoning Commission felt should be a stronger component of the proposal and a better fit for the Urban Place standards.

Staff recommends that the developer provide a level of affordable and workforce housing because this site is a good location for such units being close to employment centers, shopping

and recreation amenities. Mr. Pace Burt, developer, has expressed interest in discussing the topic of affordable/workforce housing with the City's Land Use Incentive Grant Program. Mr. Burt is aware that the extension of the incentive grant requires an application, analysis of the proposal for points and is at the discretion of City Council. Initial discussions to consider the Land Use Incentive Grant Program include some affordable units and a large percentage of workforce units.

The rezoning of this property from River to Urban Place took place in 2013. Across the railroad tracks along Stoner Road and Fairview Road, there have been a number of rezoning efforts including the recent Biltmore Apartments CZ that will be reviewed for a second time by the Planning and Zoning Commission on November 20, 2014.

Zoning and uses adjacent to this site include CI to the south, UP to the west and River to the west and east. Along the south boundary of the site is a 100 foot railroad easement. This location is well suited for a higher-density residential project, with non-residential uses given the proximity and access to employment, shopping and future and current recreational amenities.

Section 7-16-2(c) of the Unified Development Ordinance (UDO) states that Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and the testimony received at the public hearing or otherwise appearing in the record of the case:

1. *That the proposed use or development of the land will not materially endanger the public health or safety.*
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. *That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.*
   There are flood safety requirements that affect this site and buildings must be elevated above the 100-year base flood elevation. The proposal is also setback from the floodway which affects the front setback of the property along Thompson Street. With these mitigation measures the proposal is compatible with the natural and topographic features that affect this site.

3. *That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.*
   The proposed development of the land for residential use is not expected to injure the value of adjoining or abutting property; higher-density residential uses have been anticipated in this area with the number of rezonings to Urban Place District. The proposed development with its investment and influx of new residents should help the businesses in the area.

4. *That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.*
   This area along Thompson Street has been anticipated for higher-density development for a number of years. Given the proximity to employment centers, shopping, existing and future roadway infrastructure and future greenways this is an appropriate location for the proposed uses. While the scale, bulk, coverage and density are all greater than the adjacent uses in the vicinity at this time, the overall planning picture for the area is for higher density mixed-use development.

5. *That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.*
   As enumerated below, elements of the project are directly aligned with the City's plans and objectives as a mixed-use, infill project including multi-modal transportation elements in an area that will with time have improved pedestrian facilities. If the project includes affordable and workforce housing then this will also meet additional stated city goals and needs. Although the site must meet flood hazard requirements that require that the buildings be elevated which makes a direct connection to the street more challenging, the proposal will provide terrace spaces, stairways, shorter wall sections and plantings which along with sidewalk connections will provide additional direct connections to Thompson Street.

6. *That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.*
   The proposal has been determined by the TRC to have adequate water supply, police protection, waste disposal and similar facilities. The site is approximately half a mile or so to transit routes that connect through Biltmore Village or the bus stop at Stoner and Fairview Roads. Although the distance is about a half-mile, Biltmore Village is a crossing point for three transit routes.

7. *That the proposed use will not cause undue traffic congestion or create a traffic hazard.*
   The project is not expected to create a hazard or undue congestion based on the proposed plans, and the review and consideration provided by transportation staff.

This proposal is aligned with the *Asheville City Development Plan 2025* in several areas. Smart Growth policies encourage mixed-use developments and higher-density residential infill with an emphasis on locating projects in an area walkable to amenities and proximate to bike paths. Infill development along transit corridors is also highlighted but this site is a little over 2,000 feet to three routes that cross in Biltmore Village. The plan also supports projects that design landscapes to absorb stormwater using bio-swales and natural stormwater filters.

Affordable housing options are highlighted throughout the Plan as a strong community need; and no dedicated affordable or workforce rents are proposed specifically for the project at this time but the developer for the project is willing to discuss the need with City Council through the land use incentive grant program application.

The area is included in the planning for the Wilma Dykeman Riverway Master Plan and infill development, recreation amenities and roadway improvements are a part of that proposal. Planning for roadways has occurred in the River Arts District area but has not proceeded to this section of the river at this time. The proposed development though seems to fit in with the intent of the Dykeman plan with the inclusion of the river yard and the wide sidewalk along Thompson Street.

City Council's adopted goals for 2014-2015 stress expanding Asheville supply of affordable housing and maintaining a high quality of life for residents. If the affordable and workforce units can be agreed upon, then this important strategy will be met. Additionally, Council has a goal of expanding the supply of housing and this proposal provides about 27 units per acre which given this unique location with a number of environmental constraints and other development requirements provides a useful residential density.

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff finds this request to be reasonable or within the public interest.

Considerations:

- City-adopted plans and policies support mixed-use development, especially providing residential uses in a walkable location with pedestrian amenities
- The location is close to employment areas and shopping amenities and recreation opportunities are provided along the Swannanoa River.
- Affordable units are a goal for higher density residential projects but none are dedicated at this time.
- Due to topographic challenges, the finished floor of the Building A and B is required to be elevated above the surrounding streets but with some design improvements such as terraces and steps, the connection between the buildings and sidewalk could be strengthened.
- The site is not currently served by transit but three routes cross at Biltmore Village.

The proposal was approved with conditions by the Technical Review Committee at their meeting on October 20, 2014. The plans were adjusted and the building layout amended based on comments from the TRC review. The project was reviewed and approved with conditions by the Planning and Zoning Commission at their meeting on November 5, 2014, with a vote of 6-1. The project reviewed by the Asheville Area Riverfront Redevelopment Commission (AARRC) on Thursday November 13, 2014, and recommended for approval with conditions unanimously. Review by the Technical Review Committee is required prior to issuance of a zoning permit. Both AARRC and Planning & Zoning Commission recommended approval along with the request for additional building setbacks to incorporate changes to address the scale of the wall and for the sidewalk reduction along Stoner Road; and also recommended the inclusion of affordable and workforce units with the understanding that a separate approval would be required for that.

The proposal is for a higher-density residential project (with a small commercial component) in a unique infill location along a major river. Staff feels this is a good use for the site and the area would benefit from new investment and the residential units; however, some of the specific elements are challenged to meet all of the goals and design requirements of the Urban Place zoning district. The project is requesting additional setbacks for Building A and Building B due to location of the floodway and site elevations necessitated by flood hazard provisions and staff is supportive of this request subject to the motion and as shown on the site plan. Based on this analysis and strategic plan goals, staff feels that the project meets the seven conditional use permit findings.

In addition and separate from this approval, staff recommends consideration of this project for the land use incentive grant for affordable and workforce units understanding that while not all of the qualifiers or points may be obtained because of the location and other program parameters, the project will help to transform the area in ways that meet other adopted goals and plans.

In response to Mayor Manheimer, Mr. Glines said that Planning staff studied the greenway maps, which greenways are on the other side of Swannanoa River Road. However, this area is part of the Wilma Dykeman Riverway Master Plan (City Exhibit 11). That Plan suggests that on the Swannanoa West side that we could have facilities (maybe not the main greenway) for this area. From a planning study standpoint, staff has not gotten to this part of the River yet. He believed what is proposed could accommodate a future parallel pair.

Vice-Mayor Hunt, member of the Metropolitan Transportation Organization, said that the N.C. Dept. of Transportation (NCDOT) has released a draft Transportation Improvement Plan and the Swannanoa River Road Improvement Project appears to have made the cut for 10 years. As the NCDOT defines the configuration of the roadway, they are obligated to work with the City on the roadway/greenway plan. He felt those improvements to the Road should be considered in this project.

In response to Councilman Smith, Mr. Glines said it is the intention of the developer that the corner with the monument steps and terrace be open to the public.

Mr. Carleton Collins, representing McMillan, Pazdan, Smith Architects, said that although they are early in the design phase they are working to keep things simple but compelling on this important site, thinking about how to address the River, the pedestrian connectivity, and use of materials. They hope to set a good precedence in what might happen in this River corridor.

Mr. Clay Mooney, landscape architect with Design Associates, said that the entire parking area and streetscape meets the requirements set forth in the Unified Development Ordinance. All shown on the site plan is the minimum requirements since this is only a conceptual plan. As we move forward, we will be augmenting with additional plantings as necessary, particularly in the areas of the monumental steps and softening the 10-foot vertical separation between Thompson Street and the finished floor elevation. Using Applicant Exhibit 1 (River Mill Lofts Landscape Plan - Detail Views), he explained how they utilized a ramp to provide Americans with Disabilities Act accessibility up to the main floor level. They will have monumental steps that will be inviting to the general public. They do meet the minimum requirements for open space. He said the wet detention basin is located within the floodway. Using City Exhibit 8, said that in the back of the property to capture some of the runoff from the rear parking area they have a subterranean storage and detention area. They will be meeting all the requirements for stormwater control. The modification request for the expansion of the building setbacks is due to the elevation caused by the floodway elevation. The other modification request was to reduce the sidewalk width on Stoner Road just past the ramp area from 10 feet to 5-6 feet. He felt that 10-feet was excessive for the amount of potential pedestrian traffic from Stoner and it would minimize the amount of paving required, especially near the floodway area. The variance request was for spacing between public entrances for buildings A and B and was also requested due to the 10-foot vertical rise. He then briefly reviewed how the project meets the seven conditional use permit standards. He said that Mr. Pace Burke, developer, is interested in providing affordable/workforce housing and that they have submitted to the City an application for a Land Use Incentive Grant.

Mr. Pace Burke, developer, said that this is the third project he has worked on in the City. He said that the River corridor is the most exciting part of this project and is anxious to clean up that area.

In response to Councilwoman Wisler, Mr. James Voso, Traffic Engineer for the developer, said that the traffic numbers for the proposed Biltmore Apartments on Fairview Road are incorporated into the Traffic Impact Study for this project.

When Councilman Pelly questioned the traffic on Stoner Road, Mr. Voso said that from a capacity standpoint, Stoner Road has the capacity to handle the traffic; however, from a quality of life standpoint, the additional traffic will have an impact. Noting that Level of Service E is at capacity and Level of Service F is over capacity, the projected level of service on Stoner Road/Thompson Street is A, and the projected level of service on Stoner Road/Fairview Road is B.

In response to Councilman Smith, Mr. Voso said that the Traffic Impact Analysis did not study the area on Sundays, since the peak traffic at the apartment complex is in the morning and evening peak hours.

Mr. Pace responded to Councilman Smith when he asked about two intents in the Urban Place District - the wide range of complimentary land uses; and a variety of land use and housing types and prices. He said that the entire corridor is underutilized in type of any commercial component. He has confidence in this area and hoped that they can bring in the residential component and as the area develops, more commercial. There is also the elevation issue and if they were street level and they had more of an accessibility from the sidewalk to the commercial

area that would make a big difference. Regarding the housing types and prices, Mr. Pace said that there will be 2 and 3 bedroom units with no one-bedroom units. He cannot commit to a certain percentage of affordable/workforce units at this time but they are committed to the Land Use Incentive Program. He talked to Assistant Economic Development Director Jeff Staudinger stating that maybe after five years they add another component of units on line, or perhaps bringing in the Village of Haywood, even though it's under construction, under the Land Use Incentive Program.

Councilman Smith said that the developer currently has 7% affordable, 85% workforce and the rest market and the developer has said that he would move ahead with the Land Use Incentive Grant application and if that were approved, that he would follow-through with those numbers. Mr. Pace said that he was willing to commit to that process as part of the conditional use permit process. He reiterated that he spoke with Mr. Staudinger about an idea of committing to 7% and then in 5 years commit to another 7%. He will commit as a condition that they submit an application for the Land Use Incentive Program.

Mr. Glines clarified that in the plan the commercial uses are shown but in a river design review of the project there was discussion that there could be some internal constructability methods that would keep wider bays that at a later date could be converted to a live/work space. If the plan changes a lot, the plan may have to be amended.

Mayor Manheimer said that comments need to be limited to whether the project meets the seven conditional use permit standards (Conditional Use Permit Standards - City Exhibit 12).

The following individuals spoke in opposition of the project for various reasons, some being, but are not limited to: if the Land Use Incentive Program application is approved, the developer would provide 7% affordable/workforce housing, but based on the 2008 Study prepared by the a task force, the goal is 20% dedicated to affordable housing; the tenants will not be happy with the noise from the train to the rear of the property; need for sidewalks in the area; Stoner Road is a cut-through street; Stoner Road is a narrow street and they don't need any more additional traffic on it; developer should have met with the neighbors to discuss the project coming into their neighborhood; and size of the project does not fit in with the community:

Ms. Dana Davis, resident of Oakley and on the board of Asheville Parks & Greenways Foundation
Mr. Mike Carroll, resident on Stoner Road
Mr. Walter Barber, attends church in that area
Ms. Mary Carroll, resident on Stoner Road
Ms. Katie Hicks, resident on Fairview Road
Mr. David Ankeney, resident on Stoner Road

At 9:21 p.m., Mayor Manheimer closed the public hearing.

Councilman Smith said that as we try to work the Urban Place District in that area, developers need to do a good job on complimentary land uses or a really good job on the variety of housing prices or a really good job on the variety of employment opportunities. In this application, he understands why the commercial component is not there, and the intention to bring that variety of housing options. He challenged the developer to bring that affordable 80% of area median income and below to 10%. At this point, he understood that the developer is willing to condition the permit on following the process based on the 7% number and 85% number, and he is comfortable beginning there.

Councilman Smith moved to approve the conditional use permit for River Mill Lofts development on Thompson Street and Stoner Roads, (1) with the setback for Building A approved at between 35 and 45 feet from Thompson Street and between 45 and 55 feet from Stoner Road to reduce the effective scale of the retaining wall, through the use of smaller wall

sections, stepbacks, landscaping, change of materials, vegetation, stairs, and terraces; (2) with the setback for Building B approved at between 55 and 95 feet from Thompson Street; (3) the sidewalk width along Stoner Road approved to be 6 feet wide at the portion of the project south of the ramp; and subject to (1) an additional condition that the developer complete the Land Use Incentive Grant application and follow through with those allowances and that the application shall reflect 7% affordable at 80% of area median income and 85% at workforce between 80-120% of area median income; and (2) the site plan and elevations and the conditions outlined in the technical review committee report because the proposal meets the seven conditional use permit standards. This motion was seconded by Vice-Mayor Hunt.

Mr. Mooney said that the developer voluntarily commits to the additional condition in that they have already made the application for the Land Use Incentive Grant. City Attorney Currin noted that City Council will need to hold a public hearing on that grant, noting that Council has no obligation to allow the grant or not.

Councilman Pelly remained concern of the traffic impact on Stoner Road. With that in mind, he believed Council heard clearly that it would be in the developer's best interest to begin a relationship with the neighborhood. We've seen examples of developers and neighborhoods working together well and you'd be surprised at what can be accomplished.

City Attorney Currin clarified, and Mr. Mooney confirmed, that the Land Use Incentive Grant application has already been submitted - the 7% affordable and 85% workforce.

The motion made by Councilman Smith and seconded by Vice-Mayor Hunt and carried unanimously.

City Attorney Currin said that she would prepare the Findings of Fact and Conclusions of Law for Council approval on January 13, 2015.

F. CONTINUATION OF PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF GREYMONT VILLAGE APARTMENTS LOCATED ON SARDIS ROAD FROM INDUSTRIAL DISTRICT AND COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION FO A MULTI-FAMILY APARTMENT DEVELOPMENT

At the request of the petitioner, Councilman Bothwell moved to continue this public hearing until January 13, 2015. This motion was seconded by Councilman Pelly and carried unanimously.

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 14-276 - RESOLUTION ADOPTING THE 2015 LEGISLATIVE AGENDA

Mayor Manheimer said that this is the consideration of the City's Legislative Agenda for the 2015 Session of the North Carolina General Assembly.

The Governance Committee of the Asheville City Council has worked to identify areas of legislative concern with impact on Asheville. Seven focus areas have been identified: municipal authority, municipal revenue, mandates, city services, economic vitality, community standards, and environmental stewardship. Under each focus, policy supporting statements are proposed.

Once adopted by Council, this legislative agenda will be communicated to Asheville's State delegation and will provide direction for the City's legislative program during the 2015 regular session of the North Carolina General Assembly.

When Mayor Manheimer asked for public comments, none were received.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 14-276. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 36 – PAGE 450

VI. NEW BUSINESS:

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Jonathan Robert spoke about the selection process for the new Chief of Police.

Mr. Dylan Cahalan, a student at Warren-Wilson college and a volunteer with Food and Water Watch, asked for City Council consideration of a resolution on the Preservation of Antibiotics for Human Health to help keep antibiotics working. According to the Centers for Disease Control, two million people contract antibiotic-resistant infections, and at least 23,000 of these infections are fatal. The misuse of antibiotics on factory farms to treat animals that are not sick has contributed to the rise of antibiotic-resistant bacteria, unnecessarily threatened by public health. He urged Council to adopt the resolution in support of federal legislation to stop the misuse of our life-saving medicines for animals that are not sick.

Mr. Timothy Sadler spoke about the criteria needed for a new Chief of Police.

Vice-Mayor Hunt announced that Asheville is home for the Pro Cycling Team The Blue Train, sponsored by United Health Care.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 9:44 p.m.

Magdalen Burleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – January 13, 2015 - 5:00 p.m.
US Cellular Center - Banquet Hall

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Councilwoman Wisler, Consent Agenda Item "B" was removed from the Consent Agenda for discussion and/or individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON DECEMBER 9, 2014

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGRICULTURAL LEASE WITH BALSAM GARDENS, LLC, ON A PORTION OF CITY-OWNED REAL PROPERTY OFF OF HARDESTY LANE AT AZALEA PARK

This item was removed from the Consent Agenda for discussion and/or an individual vote.

C. RESOLUTION NO. 15-2 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH MICHELIN NORTH AMERICA, INC. FOR THE LEASE OF TIRES TO THE ASHEVILLE TRANSIT SYSTEM

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Michelin North America, Inc. for the lease of tires to the Asheville Transit System.

The City of Asheville released a RFP for transit bus tire lease on September 25, 2014. The City received two bids on November 7, 2014, Michelin North America, Inc., and Bridgestone Americas Tire Operations, LLC. The only responsive bid was from Michelin North America, Inc. (Greenville, South Carolina) which fulfilled the bid requirements. After a thorough review, City staff is recommending signing a contract for three years with Michelin North America, Inc. retroactive January 1st 2015.

The City of Asheville Transit System has been leasing tires for the buses since 2000. The cost for leasing the tires is about $4,700 per month and is based on actual mileage per tire (6 tires per bus). The rate per mile in a three year period is as follows:

Michelin Tires Cost					
Tire size	Miles/year/ bus	# buses in fleet	# of tires/bus	Cost per tire	Cost
Year 1					
12r	39,388	2	6	$0.00927	$4,381.47
305r	33,735	5	6	$0.01019	$10,312.79
275r	42,848	16	6	$0.01019	$41,915.32
				Cost/year	$56,609.58
Year 2					
12r	39,388	2	6	$0.00983	$4,646.15
305r	33,735	5	6	$0.01080	$10,930.14
275r	42,848	16	6	$0.01080	$44,424.48
				Cost/year	$60,000.77
Year 3					
12r	39,388	2	6	$0.01042	$4,925.01
305r	33,735	5	6	$0.01145	$11,587.98
275r	42,848	16	6	$0.01145	$47,098.17
				Cost/year	$63,611.16
			Three year cost		**$180,221.51**

The Asheville Transit System uses about 15 tires per month and if the City bought them, it would cost about $400 per tire or $6,000 per month plus the cost of shipping. In addition, the City would have to pay a disposal fee to get rid of the old tires. The total cost of the contract for three years is approximately $180,300.

The subject lease is part of the current operational budget and is recorded as an operational expense.

The Transit Committee supports the subject project.

Pros:

- Leasing the tires generates savings thereby using resources and staff in a more efficient way.
- The company provides technical assistance and equipment.
- The contract is based on tires per mile and the price is "locked" for three years.
- The company takes care of tire disposal.

Con:

- The total three-year cost of the contract is $180,300.

As noted above, the total three-year fiscal impact for the contract is $180,300. The annual budget is included in the Transit Services Fund operational budget. There is a net annual savings of approximately $15,000+ per year, not including shipping costs or tire disposal fees.

City staff recommends that City Council adopt a resolution authorizing the City Manager to enter into a contract with Michelin North America, Inc. for the lease of tires to the Asheville Redefines Transit System.

RESOLUTION BOOK NO. 37 - PAGE 2

D. RESOLUTION NO. 15-3 - RESOLUTION OPPOSING HYDRAULIC FRACTURING

Summary: The Sustainable Advisory Committee on Energy & the Environment (SACEE) recommended a resolution concerning opposing hydraulic fracturing of natural gas, or "fracking", for City Council to consider.

SACEE deliberated the resolution at their September and October meetings. Members were tasked with educating themselves on the subject, and listened to a presentation from Clean Water for NC. SACEE voted on the current draft and unanimously approved it to recommend to City Council.

Some notes about this resolution:

- This is a statement of leadership on the issue, rather than any kind of legally binding resolution for the City – it expresses the will of the people of Asheville that they do not support fracking in Asheville, Buncombe County, or WNC
- While Asheville and Buncombe County are not likely to face fracking pressure, this is still a relevant issue to Asheville. There is a possible shale gas resource covering parts of all of the counties to the west of Buncombe. Also, while the wells would not be drilled in Asheville, there are no limits to where the toxic fracking wastewater can be stored.
- Over 20 other NC counties and municipalities have approved similar resolutions

Two residents thanked Council for their support of this resolution.

RESOLUTION BOOK NO. 37 - PAGE 3

E. MOTION TO APPROVE THE FINDINGS OF FACT AND CONCLUSIONS OF LAW FOR THE CONDITIONAL USE PERMIT FOR RIVER MILLS LOFT LOCATED OFF OF THOMPSON STREET

F. RESOLUTION NO. 15-4 - RESOLUTION SETTING A PUBLIC HEARING ON JANUARY 27, 2015, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR TUTCO FARNAM

Summary: The consideration of a resolution authorizing a public hearing to be held on January 27, 2015, to consider an economic development incentive grant for Tutco Farnam.

Tutco Farnam is an existing manufacturing company located in South Asheville. The company produces a variety of air and surface heating units used in industrial applications. The company has been in Asheville for 30 years, starting in 1982. The company leases space and has outgrown the current building. The building owner has agreed to construct a new building addition and in return, the company will sign a new lease for the property.

The company is planning a $2.5 Million expansion in its South Asheville campus and has requested consideration for a performance based incentive grant under the City of Asheville Economic Development policy. The company will retain 63 current employees and will create 50 new jobs within three years. Employees are provided comprehensive benefits by the company. The City of Asheville is considering offering a performance-based grant totaling $30,380.

North Carolina state law requires a public hearing be held before an incentive grant can be officially awarded.

Pros:

- Performance driven grant that is distributed after job and investment is achieved;
- Supports job creation and capital investment in existing industry in Asheville;
- Supports development of an identified economic cluster in the City; and,
- Supports regional and state cooperation in the project.

Cons:

- Grant is formulated based on use of 45% of value of property tax revenue for a 7 year period.

The project has an overall positive fiscal impact on tax revenues received by the city. Initially (during the grant period), the City will receive approximately 55% of the new incremental property tax revenues from the project. After 7 years, the City will henceforth receive 100% capture of new city taxes.

The economic development incentive grant for Tutco Farnam supports the City Council's Strategic Operating Plan as it addresses multiple focus areas. Under the Job Growth and Community Development focus area, the project supports the Goal of creating more collaborative and effective working partnerships between the COA, the business community, and other key organizations to effectively manage the city's regulatory environment while accomplishing economic development goals by meeting the objective to support diversified job growth and small business development. It supports the goal of supporting a strong local economy by continuing to implement sustainable growth and development policies by promoting sustainable, high density infill development that makes efficient use of existing resources.

City staff recommends Council approve a resolution authorizing a public hearing to be held on January 27, 2015, on an economic development incentive grant agreement to support the expansion of Tutco Farnam.

RESOLUTION BOOK NO. 37 - PAGE 5

G. RESOLUTION NO. 15-5 - RESOLUTION SETTING A PUBLIC HEARING ON JANUARY 27, 2015, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR EXPANSION OF HIGHLAND BREWING

Summary: The consideration of a resolution authorizing a public hearing to be held on January 27, 2015, to consider an economic development incentive grant for Highland Brewing.

Highland Brewing, a pioneer in the Asheville craft brewery industry is considering expansion. Highland Brewing began in Asheville 20 years ago. Today it is considered one of the region's premier breweries. Demand for Highland product continues to grow and the company, with second generation leadership is considering expansion in the City. Capital investment in M/E etc. will be at least $3.8 Million, and improvements to existing real property/real estate will be at least $1.2 Million. Additionally the company will create 15 new jobs over a period of 3 years with average annual wage rate of $42,016. These jobs would offer comprehensive benefits to employees.

The City's incentive policy would justify an incentive grant of $60,000 to the company. The grant would be subject to a performance agreement with the City, and would be paid in five annual installments, $12,000 a year, after the conditions of the performance agreement are met and the annual property taxes are paid by the company and verified by the City that company has made the required investment and that investment goes on the tax rolls.

North Carolina state law requires a public hearing be held before an incentive grant can be officially awarded.

Pros:

- Performance driven grant that is distributed after job and investment is achieved;
- Supports job creation and capital investment in existing industry in Asheville;
- Supports development of an identified economic cluster in the City; and,
- Supports regional and state cooperation in the project.

Cons:

- Grant is formulated based on use of a portion of property tax revenue for a five year period.

The project has an overall positive fiscal impact on tax revenues received by the city. Initially (during the grant period), the City will receive approximately 48% of the new incremental property tax revenues from the project. After five years, the City will henceforth receive 100% capture of new city taxes. The company is also planning new retail and tourism product development that is not a part of this project that will generate sales and hotel tax.

The economic development incentive grant for Highland Brewing supports the City Council's Strategic Operating Plan as it addresses multiple focus areas. Under the Job Growth and Community Development focus area, the project supports the Goal of creating more collaborative and effective working partnerships between the COA, the business community, and other key organizations to effectively manage the city's regulatory environment while accomplishing economic development goals by meeting the objective to support diversified job growth and small business development. It supports the goal of supporting a strong local economy by continuing to implement sustainable growth and development policies by promoting sustainable, high density infill development that makes efficient use of existing resources.

City staff recommends Council approve a resolution authorizing a public hearing to be held on January 27, 2015, on an economic development incentive grant agreement to support the expansion of Highland Brewing.

RESOLUTION BOOK NO. 37 - PAGE 6

H. RESOLUTION NO. 15-6 - RESOLUTION SETTING A PUBLIC HEARING ON JANUARY 27, 2015, TO CONSIDER A ECONOMIC DEVELOPMENT INCENTIVE AGREEMENT INVOLVING A LEASE AND OPTION TO PURCHASE OF CITY-OWNED PROPERTY FOR PROJECT LAB

Summary: The consideration of a resolution authorizing a public hearing to be held on January 27, 2015, to consider an economic development incentive for Project Lab.

City of Asheville has been requested by Buncombe EDC to consider a performance based incentive under the City of Asheville Economic Development policy to a company known herein as Project Lab. The purpose of the City's participation would be to induce Project Lab to make investments in the City and Buncombe County for expenditures to acquire and install machinery and equipment and make improvements to city-owned real estate which may increase the tax value as determined by the Buncombe County Tax Department, regardless of funding sources for said property, in the amount of $8,100,000. Project Lab also proposes to create 65 new jobs with an average annual wage of $35,818. The City of Asheville is considering offering a lease of property to Project Lab for up to five years at $1/year (and Project Lab to pay taxes on improved property) and an option to purchase the improved property, for economic development purposes, at 80% of FMV (land only) or approximately $1,600,000 at or before the end of the five year period. Should Project Lab choose not to exercise the option to purchase, they could

continue to lease the property for an additional period of up to five (5) years at the fair market value rental rate. In addition, Project Lab will be granted an exclusive option to purchase the adjacent (1.67 acre) city owned parcel within the first year of the initial lease term for 80% of FMV (land only) if additional improvements and jobs are committed to or for FMV if no additional economic benefits are committed. Project Lab shall have the right to renew this option for one (1) additional year for a non-refundable fee of ten thousand dollars ($10,000.00). If Project Lab does not exercise its option to purchase the adjacent lot at the end of the second year, the City shall be free to market the property, subject only to a 30 day right of first refusal granted to Project Lab during the remainder of the initial lease term.

The lease and purchase would be subject to a performance agreement with the City, and would be governed through the conditions of the lease, economic development performance agreement and option(s) to purchase. North Carolina state law requires a public hearing be held before an economic incentive can be officially awarded.

Pros:

- Creates technology driven private sector use for Charlotte Street Corridor;
- Supports job creation and capital investment in Asheville;
- Activates an underperforming asset and places city owned property on the tax rolls;
- Supports development of an identified economic cluster in the City; and,
- Supports regional and state cooperation in the project.

Con:

- During the five year lease period, the city will lease the property below FMV, however, the property is currently providing no income to the City.

The project has an overall positive fiscal impact on tax revenues received by the city since the property improvements made by Project Lab will be valued at over $8 million dollars. Additionally, if Project Lab exercises its option to purchase the property, the city will receive approximately $1,600,000 at the end of the lease. No cash payments will be provided by the City. The city will begin accruing M/E tax payments in year one estimated at $6200. After five years, the City will henceforth receive 100% capture of new city taxes for all investment valued at $8,100,000.

The economic development incentive for Project Lab supports the City Council's Strategic Operating Plan as it addresses multiple focus areas. Under the Job Growth and Community Development focus area, the project supports the Goal of creating more collaborative and effective working partnerships between the COA, the business community, and other key organizations to effectively manage the city's regulatory environment while accomplishing economic development goals by meeting the objective to support diversified job growth and small business development. It supports the goal of supporting a strong local economy by continuing to implement sustainable growth and development policies by promoting sustainable, high density infill development that makes efficient use of existing resources.

City staff recommends Council approve a resolution authorizing a public hearing to be held on January 27, 2015, on an economic development incentive agreement, lease, and option agreement to support the location of Project Lab.

RESOLUTION BOOK NO. 37 - PAGE 7

I. RESOLUTION NO. 15-7 - RESOLUTION DIRECTING THE CITY CLERK TO ADVERTISE FOR UPSET BIDS FOR THE SALE OF 0.03 ACRES OF REAL PROPERTY LOCATED AT TUSKEEGEE STREET AND MARTIN LUTHER KING JR. DRIVE TO RUSS STALLINGS

Summary: The consideration of a resolution directing the City Clerk to advertise for upset bids for the sale of 0.03 acres (approx. 1306.8 square feet) of real property located at Tuskeegee St. and Martin Luther King, Jr. Drive to Russ Stallings.

The City of Asheville owns a remnant parcel of property located at Tuskeegee Street and Martin Luther King Jr. Drive (PIN # 964960632200000). The property was transferred from the Housing Authority to the City of Asheville in 1995 as a disposal parcel after the Urban Renewal program concluded. This lot is unbuildable due to the small size and shape of this parcel, and it would appear that it is a remnant of the right-of-way of Tuskeegee Street. The adjacent homeowner, Russ Stallings, at 128 Pine Street has approached the City with an offer to buy the land for $1,000. There are few comparables in the area for this type of property however; a recent sale on Hazzard Street of similar size and utility was valued at $1500.00.

The Parks Department and Transportation Department have confirmed that this property in not needed for future park infrastructure or multi-modal transportation infrastructure.

The method chosen to establish fair market value is the upset bid process set forth in NCGS 160A-269. If City Council approves the following resolution, the City Clerk will be directed to publish an advertisement for upset bids for a period of 10 days, in which any interested party may upset the bid of $1,000. The statutes require that a qualifying bid must increase the current offer by 10% of the first $1,000 and 5% of the remainder (i.e. $1,010 or higher). Since the function of the upset bid process is to confirm fair market value, the attached resolution provides that if no qualifying, competing bid is received, then the City Council agrees to convey the parcel to Russ Stallings for $1,000.

This action complies with the City Council Strategic Operating Plan by supporting Focus Area 1: Economic Growth & Financial Sustainability through the conveyance of real property at fair market value.

Pros:

- Private sale will convert public land into taxable real property and will relieve the City of Asheville of ongoing maintenance responsibility.

Cons:

- None

Because this property is associated with Federal Funds via Urban Renewal, the financial proceeds are to benefit the Community Development Block Grant fund.

City staff recommends City Council adopt a resolution directing the City Clerk to advertise for upset bids for a property located at Tuskeegee St. and Martin Luther King, Jr. Drive.

RESOLUTION BOOK NO. 37 - PAGE 8

J. RESOLUTION NO. 15-8 - RESOLUTION FINDING THAT AN UNOPENED 40-FOOT RIGHT-OF-WAY OFF BAKER DRIVE, KNOWN AS SHAMBY DRIVE, IS NOT PART OF AN ADOPTED STREET PLAN

Summary: The consideration of a resolution finding that an unopened forty (40) feet wide right of way off of Baker Drive, known as Shamby Drive, is not part of an adopted street plan.

Mr. Ronald Czecholinski has filed a Declaration of Withdrawal, withdrawing the offer of public dedication of the unopened five-foot wide strip off Fairmont Road. The purpose of the request is to make the property more useful as the 40-ft strip is between two parcels to the north and one to the south that Mr. Czecholinski now owns. The forty foot right of way is not used as an

ingress or egress nor has it ever been used as such. Additionally, the 40-ft. strip is not part of any City street plan, particularly not any City street plan adopted under 136-66.2. N. C. Gen. Stat. sec. 136-96 permits the filing of a Declaration of Withdrawal of any strip, piece or parcel of land which shall have been at any time been dedicated to public use as a street and which shall not have been actually opened and used by the public within 15 years from and after dedication. The 40-ft. strip was dedicated to the public in 1953.

In order to withdraw an offer of dedication, N.C.G.S. §136-96 requires:(1) that the strip, piece or parcel of land dedicated as a street shall not have been actually opened and used by the public within 15 years from and after the dedication; and (2) the person desiring to withdraw, must be the original dedicator or someone claiming under the original dedicator. Mr. Czecholinski along with his attorney contends both requirements are satisfied, as reflected in the attached letter from Attorney William T. Biggers. The City is being requested to adopt a resolution because the statute states that upon request, the City shall adopt a resolution stating whether the street is or is not part of the street plan adopted under G. S. 136-66.2.

Public Works Department staff has consulted with all appropriate City departments and determined that the unopened forty foot right of way off Baker Drive as set forth is not part of an adopted street plan and is not a City maintained right-of-way.

A withdrawal of dedication is not identified as a subject area in the Strategic Operating Plan.

Pros:

- Adoption of the Resolution eliminates any concerns about the 40-ft strip being part of a City Street Plan and does not compromise ingress/regress to other properties.

Con:

- None.

There is no fiscal impact.

City staff recommends City Council adopt the Resolution finding that the unopened forty foot right of way, off Baker Dr., between parcels PIN#s 9628696038/9628698020 and 9628687788 as shown on the exhibit A is not part of any City Adopted Street Plan.

RESOLUTION BOOK NO. 37 - PAGE 9

K. RESOLUTION NO. 15-9 - RESOLUTION AUTHORIZING THE CITY MANAGER TO CONVEY A SANITARY SEWER EASEMENT TO THE METROPOLITAN SEWERAGE DISTRICT FOR THE HILLIARD AVENUE AT ASTON PARK GENERAL SEWER REHABILITATION PROJECT

Summary: The consideration of a resolution authorizing the City Manager to convey a sanitary sewer easement to the Metropolitan Sewerage District of Buncombe County (MSD) for the Hilliard Ave. @ Aston Park General Sewer Rehabilitation Project.

The City of Asheville owns and operates the Aston Park Tennis Facility and the Parks Maintenance Facility at 336 and 338 Hilliard Avenue (PIN #9648183942 and PIN #9648187790). Aston Park is improved with tennis courts, the tennis center and associated parking. The Parks Maintenance facility is improved with offices, storage areas, equipment and vehicle parking, a welding shop and woodworking shop to provide a base of operations for maintaining the City's park system. A map of the area is attached.

MSD is working on a rehabilitation project for the sewer line that currently runs along Hilliard Avenue and then crosses through city property next to the Parks Maintenance buildings.

MSD will be replacing an existing vitreous clay pipe that is approximately 8-inches in diameter with ductile iron pipe. Starting at the entrance to the Parks Maintenance facility, the alignment of the sewer line runs perpendicular to Hilliard Avenue, continues along the facility driveway and exits City property in a T-joint at Merritt Street. At this time, MSD is requesting a permanent easement from the City that measures approximately ten feet on either side of the sewer line and a temporary easement approximately 15 additional feet on either side of the line. The easement being requested consists of 0.177 acres of permanent easement and 0.186 acres of temporary easement on the Parks Maintenance site. The easement also involves 0.007 acres of permanent easement and 0.062 acres of temporary easement on the Aston Park parcel. MSD agrees to repair and replace any disturbance that is caused by the replacement of this line, with minimal impact to the Park and most disturbance occurring in the driveway to the Parks Maintenance facility. In consideration of any future redevelopment of the Maintenance facility, the easement was located within the existing driveway in order to provide a maximum contiguous development area at the corner of Clingman and Hilliard.

This MSD rehabilitation project overlaps with the future Clingman Forest Greenway in certain areas and staff from both the City and MSD have met to attempt to coordinate schedules and encourage efficiency. Both parties agree that the sewer replacement project should be constructed before the greenway, if possible. MSD has agreed to move this sewer rehabilitation project to FY 15-16 budget cycle. The granting of this easement will assist MSD in going ahead with their project as soon as possible.

Pros:

- Granting of the easement will allow MSD to upgrade sewer infrastructure to provide improved service to the neighborhood adjacent to Hilliard Avenue.
- Granting of the easement will not affect the long range use of the park for public recreation or the future use at the Parks Maintenance facility.

Cons:

- None noted.

No monetary consideration involved in this conveyance.

City staff recommends City Council approve a resolution authorizing the City Manager to convey an 8,015.16 square foot permanent easement and a 10,814.22 square feet temporary easement over a portion of City-owned property at 336-338 Hilliard Avenue.

RESOLUTION BOOK NO. 37 - PAGE 11

L. ORDINANCE NO. 4376 - BUDGET AMENDMENT TO PURCHASE TWO ADDITIONAL SHELTERS UNDER THE STIMULUS FUNDING GRANT

Summary: The consideration of a budget amendment in the amount of $5,863 to add funds to a project in the City's Special Revenue Fund to purchase two additional shelters under the stimulus funding grant.

The City of Asheville was awarded $2,590,439 under the economic stimulus funding, as published in the Federal Register Volume 74, No. 42, page 9675 on March 5, 2009.

The city used those funds to purchase five diesel buses, ten shelters, and three CNG buses and one van for Henderson County. All of the projects were finished before the deadline of September 30, 2013.

After finishing the projects, $60,662 of ARRA funds were left unspent. The Federal Transit Administration issued a waiver to all grantees that had still funds left in ARRA and asked

for all the funds to be spent by September 30, 2015. $35,902 of those funds are part of the City's apportionment, the rest are part of Henderson County's apportionment.

The only project that could be accomplished by the deadline was the acquisition of additional shelters. The City issued a bid and was able to order 10 shelters, six for the city and four for the county instead of the five originally planned. There are still funds remaining in the grant in the amount of $5,262 and in order to maximize them local funds from both, the county and the city, need to be transferred to the project.

This project will be completed in approximately in March 2015.

Pros:

- All the funds allocated to the region will be used.
- Funds cover 50% approximately for two additional shelters.
- This project increases transit infrastructure and quality of service.

Con:

- Additional $2,248 funds will need to be transferred to the project from the Transit Services operating fund.

The cost of acquiring 2 new shelters will be approximately $11,125. The federal grant will cover $5,262 already budgeted. The rest of the funds will come from Henderson County ($3,615) and the city's Transit Services operating fund ($2,248). The budget amendment will provide authorization to add local funds to the project and purchase two additional shelters.

City staff recommends that City Council adopts a budget amendment in the amount of $5,863 to add funds to the project in the City's Special Revenue Fund to purchase two additional shelters under the stimulus funding grant.

ORDINANCE BOOK NO. 29 - PAGE 330

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Bothwell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Pelly and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGRICULTURAL LEASE WITH BALSAM GARDENS, LLC, ON A PORTION OF CITY-OWNED REAL PROPERTY OFF OF HARDESTY LANE AT AZALEA PARK

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Summary: The consideration of a potential agricultural lease with Balsam Gardens, LLC, a locally based certified organic farm, for 11 +/- acres of land for commercial agricultural production at Azalea Park.

Prior to the City's acquisition of the Azalea Park, the land was used as an agricultural farm. The former farmland has been converted to a state-of the-art soccer and park facility,

however there is still potential for unused lands within the park to be utilized in farm production. For the past six years New Sprout Farms, LLC has leased 11+/- acres of Azalea Park for certified organic vegetable, fruit and hay production. This 11 +/- acre plot is located to the rear of Azalea Park, adjacent to the City's beneficial fill site and the leased site for Danny's Dumpster compost operation. At this time, New Sprout has moved to a permanent location in Buncombe County and the city property is available for a new agriculture lease. Balsam Gardens, LLC has expressed interest in leasing the property and has demonstrated the capacity and wherewithal to be a reliable tenant. Balsam Gardens intends to utilize the property for certified organic fruit and vegetable production for the local market.

Balsam Gardens has offered to enter into a three-year lease with option to renew for one additional three year term at a rent of $3,300 per year, with an annual escalation of 3%. The rental rate was generated through input provided by the NC Cooperative Extension Service, and the WNC LandLink program, a service that connects emerging farmers to vacant agriculture lands.

Balsam Gardens sells to wholesale markets, local grocers, area restaurants and in local farmers markets, therefore no retail or U-pick operations would exist on the City Park property. The proposed lease will respect all stream buffers, conservation easements, wetlands and proposed greenway paths that exist at Azalea Park. Balsam Gardens will maintain all necessary liability insurance for the property as well as limit access to authorized personnel and representatives of Balsam Gardens. Only USDA organically certified fertilizers, pesticides and herbicides will be permitted at the property. The proposed agricultural use will have no impact on the recreational use of the Azalea Park or the soccer facility.

Pros:

- Supports Food Action Plan.
- Continues a successful use of city property with a new tenant.

Con:

- There is no negative impact.

The fiscal impact is $3,300 per year beginning in January 2015, with 3% annual escalations thereafter.

The Community and Economic Development staff recommends adoption of this resolution.

Councilman Smith wondered how we can fold this in with the Food Action Plan and create the highest and best agricultural use on this land. Staff has requested a three-year lease; however, he suggested a one-year lease and find ways to open this up to a wider group in the community.

Councilman Smith moved to approve a one-year lease to Balsam Gardens and during that time for staff to look at other opportunities for the land, perhaps with partnerships with Manna Food Bank, ABCCM, etc. This motion was seconded by Councilwoman Wisler.

A representative of Balsam Gardens provided a brief background of his company. They wish to expand their production from 5 acres at their current location to this location of 11 acres and do more wholesaling. They are interested in a 3-year lease because of their capital outlay to purchase additional equipment.

After a brief discussion to postpone this matter until January 27, 2015, in order to allow staff to work with Balsam Gardens to see if they would be interested in a one-year lease, Councilman Smith and Councilwoman Wisler withdrew their motion.

Councilman Bothwell felt that it is unfair to the grower to lease agricultural land one season at a time.

III. PRESENTATIONS & REPORTS:

A. CITY HALL WATER LEAK UPDATE

Mr. James Ayers, Director of General Services, updated City Council on the recent pipe fitting failure which closed City Hall for 1.5 days. He then spoke about steps to recovery and future actions to prevent future occurrences.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING AN UNNAMED ALLEY OFF BROAD STREET

RESOLUTION NO. 15-10 - RESOLUTION TO PERMANENTLY CLOSE AN UNNAMED ALLEY OFF BROAD STREET

Public Works Director Greg Shuler said that this is the consideration of a resolution to permanently close an unnamed alley off Broad Street. This public hearing was advertised on October 3, 10, 17 and 24, 2014. On October 28, 2014, the matter was continued to this date.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjoining property owners, Jim Hitt at 137 Broad Street and at 9999 Broad Street also known as 133 Broad Street, and Tom Leslie representing Charlotte Street Holding LCC at 130 Charlotte Street, have requested the City of Asheville to permanently close an unnamed alley off of Broad Street.

The Multimodal Transportation Commission met on August 27, 2014, and approved the closure of the unnamed alley off of Broad Street.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

City staff recommends City Council adopt the resolution to permanently close an unnamed alley off of Broad Street.

Mayor Manheimer opened the public hearing at 5:23 p.m. and when no one spoke, she closed it at 5:23 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 15-10. This motion was seconded by Councilman Davis and carried unanimously.

B. PUBLIC HEARING TO CONSIDER APPROVING AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO LINAMAR CORPORATION

RESOLUTION NO. 15-11 - RESOLUTION AUTHORIZING AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR THE EXPANSION OF LINAMAR CORPORATION

Economic Development Director Sam Powers said that this is the consideration of a resolution approving a $3,500,000 economic development incentive grant for Linamar Corporation. This public hearing was advertised on January 2, 2015.

This is the consideration for an economic development incentive grant under the City of Asheville Economic Development Incentive policy. Linamar Corporation is a world-class designer and diversified manufacturer of precision metallic components and systems for the automotive industry, energy and mobile industrial markets. The company is proposing one of the largest investments in new, taxable, capital investment of $190,000,000 for additional production equipment and facility improvements at the local facility in South Asheville, and has requested consideration of a cash grant under the City of Asheville Economic Development Incentive policy. This project also includes the creation of 400 new manufacturing jobs with an average annual wage of $39,000.

This new expansion commitment by Linamar replaces, and is an increase of the company's second expansion announcement in June of 2012, which encompassed a $75,000,000 investment and 250 new employees. The purpose of this investment is to allow Linamar to expand its operations, to serve a major automotive supplier thus growing the automotive components cluster in Asheville, and is projected to result in the creation of a substantial number of jobs that pay at or above the median average wage for Buncombe County. No payments were made to Linamar on Phase II that this project replaces.

Linamar has requested consideration of a performance-based incentive grant under the City of Asheville Economic Development Incentive policy. The performance based grant for Linamar for this project is an amount not to exceed $3,500,000, to be paid in annual installments in an amount equal to 95% of ad valorem City property tax paid by Linamar in the prior calendar year, for a period of up to seven years, with an additional two years if Linamar has achieved a benchmark of 85% of its investment; subject to compliance with an Economic Development Performance Agreement between the City and Linamar. Payments begin after the investment is made, taxes are paid and verified, and the company requests payment. The amount of the annual payment will take into consideration the estimated annual ad valorem property tax revenue attributable to the capital improvements, and each annual payment is projected to equal 95% of said estimated revenue. Any amounts paid to Linamar pursuant to the Agreement are subject to adjustment or recapture if the terms and conditions of the Agreement as to investment and job creation are not fulfilled.

The City will fund the payments from the general fund. The purpose of the proposed cash grant is to encourage Linamar to proceed with its proposed expansion. Staff believes that the project will further the economic interests of the area served by the City in several ways, including, but not limited to: (a) creating a substantial number of jobs having a wage at or above the median average wage for Buncombe County; (b) enhancing the City's tax base and the City's tax revenues; and (c) encouraging the retention and expansion of a major industrial operation in an existing facility.

Pros:

- Performance driven grant that is distributed after job and investment is achieved;
- Supports job creation and capital investment in manufacturing in Asheville;

- Supports retention and expansion of existing industry in the City;
- Supports development of an identified economic cluster in the city; and,
- Supports regional and state cooperation in the project.

Cons:

- Grant is formulated based on use of approximately 95% of the value of new incremental tax revenue for a seven to nine year period.

The project has a positive fiscal impact on tax revenues received by the City. Linamar's capital investment is one of the largest single manufacturing investments in the city. The project has significant potential for additional expansion, as well as substantial generation of local and state taxes from job creation. Initially (during the grant period), the City will receive approximately 5% of the new incremental real estate and M/E tax revenues from the project. After the grant period concludes as noted above, the City will henceforth capture 100% of the new taxes.

City staff recommends Council approve the resolution authorizing an economic development incentive grant for Linamar Corporation not to exceed $3,500,000.

Mayor Manheimer opened the public hearing at 5:31 p.m.

The Director of Business Development for Linamar, thanked City Council for their support as they look forward to expanding and bringing new technology into Asheville.

Mayor Manheimer closed the public hearing at 5:34 p.m.

Mayor Manheimer explained how an economic development incentive grant works.

Councilman Pelly said that one of Council's goals is to bring living wage jobs into our community and appreciated Linamar's investment.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Hunt moved for the adoption of Resolution No. 15-11. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 14

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING CONDITIONAL ZONING GENERAL REQUIREMENTS TO CLARIFY THAT CONDITIONS IMPOSED MAY BE MORE OR LESS RESTRICTIVE THAN THE GENERAL USE STANDARDS OF THE UNDERLYING DISTRICT

ORDINANCE NO. 4377 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING CONDITIONAL ZONING GENERAL REQUIREMENTS TO CLARIFY THAT CONDITIONS IMPOSED MAY BE MORE OR LESS RESTRICTIVE THAN THE GENERAL USE STANDARDS OF THE UNDERLYING DISTRICT

Urban Planner Alan Glines said that this is the consideration of an ordinance amending the Unified Development Ordinance regarding conditional zoning general requirements to clarify that conditions imposed may be more or less restrictive than the general use standards of the underlying district. This public hearing was advertised on January 2 and 9, 2015.

He said that currently, Section 7-7-8(c)(3) of the UDO provides that:

"All standards and requirements of the corresponding general use zoning district shall be met, except to the extent that the conditions imposed by the conditional zoning are more restrictive (emphasis added) than the general use standards, and/or where the requirements are modified in accordance with subsection 7-7-8(c)(6)."

The North Carolina General Statutes and North Carolina case law allow greater flexibility in terms of conditions imposed and do not limit local governments to conditions which are "more restrictive" than the general use standards. NC General Statute sec. 160A-382(b), Zoning Districts, states that "*conditions and site-specific standards imposed in a conditional district shall be limited to those that address the conformance of the development and use of the site to city ordinances and officially adopted comprehensive or other plan and those that address the impacts reasonably expected to be generated by the development of use of the site.*" The statute does not dictate whether the conditions imposed be more or less restrictive than the general use standards of the underlying district, only that whatever conditions are imposed be in compliance with the city's ordinances and officially adopted plans. In the NC Appeals Court case of *Rakestraw v. Town of Knightdale* (2008), the court upheld the Town's decision to approve a conditional zoning with conditions that had decreased standards from the general district requirements. The Court disagreed with the Plaintiff's position that NCGS sec. 160A-382 did not permit exceptions or decreased standards and noted that the Town's ordinance specifically provided that "*when a Conditional District is required...petitioners may also ask that certain standards identified be decreased.*"

While Planning staff has interpreted the UDO to allow conditions in accordance with the general statutes, we also believe an amendment is needed to make this clear.

Therefore, an amendment stating that conditions imposed may be more or less restrictive than the standards of the underlying district is recommended in order to clarify that the UDO allows the same level of flexibility allowed in this regard under the NCGS 160A-382 and to ensure that the UDO language in section 7-7-8(c)(3) clearly reflects the Planning Staff's interpretation of the intent of this provision.

The proposed amendment complies with the Asheville City Development Plan 2025 in that it allows for increased flexibility in the application of zoning regulations in the case of conditional zoning (formerly known as conditional use zoning) and allows a rezoning request to be tied to a specific development plan (pg. 66) while ensuring the project is compatible with the neighborhood. The plan also encourages adaptive reuse of underutilized and vacant sites and recognizes the need to have some flexibility in the implementation of zoning and and building codes (pg. 69) by maintaining a redevelopment 'toolbox'. The plan also recognizes the need for compatible infill development with opportunities provided on a case-by-case basis (pg. 71) to encourage redevelopment using the conditional zoning tool. In this way this amendment is reasonable and in the public interest because it allows for projects which are more compatible with the surrounding area and which further comprehensive plan goals.

The proposed amendment - complies with the City Council's Strategic Plan in that it allows for flexibility thus encouraging in-fill, mixed-use and redevelopment projects.

The Planning and Zoning Commission reviewed the wording amendment at their meeting on November 5, 2014, and voted to recommend approval unanimously.

Staff recommends approval of this proposed change as it clarifies that the UDO allows the same level of flexibility allowed in this regard under the N.C. Gen. Stat. sec. 160A-382 and ensures that the UDO language in section 7-7-8(c)(3) clearly reflects the Planning Staff's interpretation of the intent of this provision.

Mayor Manheimer opened the public hearing at 5:42 p.m. and when no one spoke, she closed the public hearing at 5:42 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell moved to approve the proposed amendment to Section 7-7-8(c)(3)-3 as outlined in this report and find that the request is reasonable and is consistent with the Comprehensive Plan and other adopted plans, because it allows for greater flexibility in granting conditions which in turn, allows for projects that are more compatible with their surrounding area. This motion was seconded by Councilwoman Wisler and carried unanimously.

ORDINANCE BOOK NO. 29 – PAGE 332

D. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING FROM RM-8 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AND OFFICE DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING WITH CHANGED CONDITIONS TO LANDSCAPE AND SETBACK REQUIREMENTS TO ALLOW THE USE OF AN EXISTING SINGLE-FAMILY RESIDENCE AS A LAW OFFICE AT 10 MADISON AVENUE AND 202 EAST CHESTNUT STREET

ORDINANCE NO. 4378 - ORDINANCE TO CONDITIONALLY ZONE 10 MADISON AVENUE AND 202 EAST CHESTNUT STREET FROM RM-8 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT AND OFFICE DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING WITH CHANGED CONDITIONS TO LANDSCAPE AND SETBACK REQUIREMENTS TO ALLOW THE USE OF AN EXISTING SINGLE-FAMILY RESIDENCE AS A LAW OFFICE

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to conditionally zone 10 Madison Avenue and 202 East Chestnut Street from RM-8 Residential Multi-Family High Density District and Office District to Office District/Conditional Zoning with changed conditions to landscape and setback requirements to allow the use of an existing single-family residence as a law office. This public hearing was advertised on January 2 and 9, 2015.

The project area consists of two parcels that are proposed to be combined (total area 7,170 square feet or 0.164 acres according to plans), located in the National Register Chestnut Hills Historic District. The parcel currently zoned Office is located at the northeast corner of East Chestnut Street and Madison Avenue (202 East Chestnut Street). The parcel to the north is currently zoned RM-8 (10 Madison Avenue). Adjacent zoning includes Office to the west, south and east and RM-8 to the north. East Chestnut Street has primarily non-residential uses in this vicinity but starting with the property at 10 Madison Avenue, the use becomes residential in nature.

On each parcel sits a residential-style structure; however the 2-story building at 202 East Chestnut is already used as an office whereas 10 Madison is currently a residential dwelling. The proposal is to convert the 1-story, 961 square foot house at 10 Madison into office use and to expand an existing parking lot to create a shared parking area between the two buildings. The front porch on the structure will be enclosed and pedestrian access will be reconfigured to the south side (rather than from the front). Additionally, windows on the north side of the structure will be closed in.

Access and parking will remain in the same general location as the present configuration, between the two structures, with a looped driveway off of Madison Avenue to the parking in the rear of the 202 East Chestnut property. This parking lot is proposed to be enlarged to provide five

parking spaces (one HC accessible) and includes alterations to standards in the City's *Standards and Specifications Manual*, which have been approved by the City Traffic Engineer. The alterations are to provide a more narrow drive aisle (14 feet rather than 24 feet) as well as lessen the distance between driveways on the blockface (25 feet rather than 150 feet) and is justified based on the low intensity of use expected.

Per the UDO, between nine and twelve spaces are required for the increased office area and per the applicant, there is an existing shared parking agreement with the office use across Madison Avenue to accommodate three spaces, which will be revised to accommodate four total. The existing gravel driveway into the residential property at 10 Madison would be removed.

There are no sidewalks existing along this side of Madison Avenue, nor are sidewalks proposed (but will be handled through a fee-in-lieu). A bike rack has been included on site plans.

Landscaping is required for this project and includes a property line buffer, street trees and parking lot landscaping. There is existing mature landscaping onsite that will be retained and used for credits. The applicant is requesting a changed condition to the property line buffer due to the proximity of the existing structure to the northern property line adjacent to RM-8.

Open space is not required for this project because the size of the property is less than an acre.

The following conditions are granted by City Council with a recommendation from the Commission:

1. Setback - Side setbacks in the Office zoning district are 10 feet (on the east side – interior lot line) and 7.5 feet for the corner side (west side, along Madison Avenue). The existing structures are within one foot of the east property line and within 6 feet of the west side. Parking also is shown to encroach into the setback as well.
2. Landscaping - A 20 foot Type A property line buffer is required between the proposed Office-CZ parcels and the RM-8 zoning to the north. The existing structure is within 3 feet of the property line, leaving insufficient room for landscaping. The applicant is requesting to eliminate the buffer.

The applicant is proposing to conditionally rezone the site from RM-8 and Office to convert the residential dwelling into an office use, otherwise not permitted in a residential zone. The Planning Department has consistently responded to requests to convert residential uses to non-residential when they are at the edge of a residential neighborhood with a statement that this is generally not supportable due to City goals regarding protection of existing neighborhoods.

The proposal was approved with conditions by the Technical Review Committee at their meeting on October 20, 2014. The Planning & Zoning Commission reviewed this request at their meeting on November 5, 2014. There were two votes taken by the Commission, the first was to deny the application and that vote failed 2-5. The second vote included a condition that the property be used for office and residential use only and not any allowable use in the Office District and this vote passed 6-1.

Comments have been received from neighbors who are concerned about the conversion as a loss of residential fabric and the impact to the 24/7 quality of a neighborhood. Additional concerns mirror those of the Planning & Zoning Commission in that while the current owner is seen as a good neighbor and is generally supported by folks on the block, the rezoning would open office uses to any future owner who may not have as much of a dedication or commitment to the area.

The East Chestnut Street corridor (from Merrimon Avenue to Charlotte Street) contains a mix of uses (office, medical, lodging facilities, religious institutions, retail, limited residential) and

is zoned Office, Community Business I & II. To the north of this corridor is a residential neighborhood zoned RM-8 and RM-16. This proximity is not considered to be incompatible from a zoning perspective, although it would be preferable to see more of a mix of residential and non-residential within the structures themselves to create a more consistent 24-hour presence within the area for the residential neighbors.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. *That the proposed use or development of the land will not materially endanger the public health or safety.*
   The proposed project has been reviewed by City staff and appears to meet or have the ability to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* (with conditions granted as identified previously in this report) and other applicable laws and standards that protect the public health and safety.

2. *That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.*
   The proposal is to retain the existing structures (which are contributing structures in the Chestnut Hills National Register Historic District) and to expand an existing parking area. Plans have been developed in a way to preserve as much existing mature vegetation as possible.

3. *That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.*
   The properties to the east, west and south are similarly zoned for office uses and should not be negatively impacted. The proposed development of the land may impact the value of adjoining property to the north. The historic development pattern of the Chestnut Hill neighborhood has a series of single-story bungalows in close proximity on this block, which is expected in a circa 1920 residential area. However, the UDO places protections in the form of required landscape buffers between dissimilar zoning districts and because of this development pattern, there is insufficient room to adequately buffer between the office use and the residential dwelling to the north.

   Additionally, with respect to the proposed use, the City has recognized a shortage of housing stock especially close to downtown and while this is not an affordable unit, it is operating as a small-sized residential rental unit in a walkable neighborhood close to business and transit – something the City is trying to create and preserve whenever possible. Expansion of the non-residential uses into the residential neighborhoods may be said to pose a negative impact on the existing neighborhood.

4. *That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.*
   As stated above, the proposed physical development on the site is primarily the expansion of the existing parking area, which is not considered out of character with the layouts seen all along the East Chestnut Street corridor where historic structures face the street and parking for the uses is located to the rear. There is a long history of adaptive reuse of the structures in this National Register historic district for office use and this has been recognized as a positive tool for historic preservation.

However, staff believes that to support and strengthen Asheville's residential neighborhoods existing housing stock should generally be preserved for residential uses. Also, the incursion of non-residential uses into a neighborhood can erode the character and quality of a typical residential community where there is expected to be a more regular "24/7" presence rather than typical business hours where there is no presence or activity during nights and weekends.

5. *That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.*
While the proposed adaptive reuse of the residential structure at 10 Madison Avenue is supported by City polices and plans regarding historic preservation and smart growth; staff feels that the potential impact to the residential neighborhood and loss of an ideally-situated residential unit when housing availability is a priority for the City is concerning.

6. *That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.*
The proposal has been determined by the TRC to have adequate water supply, police protection, waste disposal and similar facilities. The site is approximately three-tenths of a mile from the nearest transit stops (N, N1 & N2).

7. *That the proposed use will not cause undue traffic congestion or create a traffic hazard.*
The project is not expected to create a hazard or undue congestion based on the proposed plans. Modifications to standards for parking isle width and distance between driveways have been approved by the City Traffic Engineer.

Adaptive reuse of historic structures is noted in the *Asheville City Development Plan 2025* as an effective smart growth tool as it does not consume new land. Also, preservation of historic structures is generally identified as a goal in the *Plan* (not that staff is aware of any impending threat to the structure at 10 Madison Avenue if this application is not supported or otherwise).

However, the *2025 Plan* notes the lack of (affordable) housing as the "number one economic development problem for the community" and as stated earlier in this report, this unit is not currently a dedicated affordable unit, however it is a 961-square foot dwelling that is ideally sized and located for an affordable or workforce rental (noting that rents would be at the discretion of the property owner).

City Council's adopted goals for 2014-2015 stress expanding Asheville supply of housing and maintaining a high quality of life for residents. This project results in the loss of an ideally situated residential unit close to downtown and there is concern about the further incursion of non-residential uses into the neighborhood.

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff does <u>not</u> find this request to be reasonable or within the best public interest.

<u>Considerations</u>:

- Adaptive reuse of historic structures is supported by City plans.
- Mature landscaping on the site will be maintained and preserved.
- The change of use to office use is a loss of an ideally-situated, small-sized residential unit and housing supply is a noted concern for the City.
- Non-residential incursion into an established neighborhood can erode the residential quality.

While the proposal does preserve a contributing resource in a National Register Historic District through adaptive reuse, the change of use is a loss to the supply of housing close to downtown and impacts the residential quality of the neighborhood. Staff does not support the change of use to office and believes the residential structure should remain residential in use.

Should Council support this application, staff recommends inclusion of the condition as suggested by the Planning & Zoning Commission that the property be used for office and residential use only and not any allowable use in the Office District.

Ms. Bernstein said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property.

In response to Councilwoman Wisler, Ms. Bernstein said that there would be a recombination of property.

When Councilman Bothwell asked if the building was demolished could a larger office building be built on the property, Ms. Bernstein replied that they would have to comply with Office District standards.

In response to Councilman Pelly, Ms. Bernstein said that there would be no change to the law office; however, there would be changes to the house at 10 Madison Avenue. She said they would close in the porch (because of accessibility requirements), add parking to the right side of the house for accessible parking, and on the north side they propose to close in the windows.

Mayor Manheimer opened the public hearing at 5:54 p.m.

Mr. Jim Siemens, property owner, said that he would like to convert 10 Madison Avenue to perhaps a conference room area to enhance and expand his law office and at 202 E. Chestnut Street. He has no plans to demolish the house. He lives in the neighborhood and assured Council that the proposal will not be offensive to the neighborhood. He provided examples of renovations he has done in the past. He said that this is an adaptive re-use of a house and what will be lost in housing stock is only a one-bedroom bungalow. He is a small employer and a good neighbor in the community.

The architect on the project said that it is their intent to maintain the feel of a residential neighborhood. He said they will be enclosing the porch and add a door-like window on the front. They plan to maintain the mature trees. They will add additional vegetation and pervious pavers. He felt they are enhancing the residential area.

Mr. Timothy Sadler spoke in support of the project and felt it was a good example of adaptive reuse.

The following three individuals spoke in opposition of the conditional zoning for various reasons, with the main reason being that 10 Madison Avenue contributes to the neighborhood character of the area and to rezone it would irreparably alter the character and create erosion of the neighborhood. They presented Council with a petition containing 12 signatures asking Council to keep Madison Avenue residential.

Ms. Angela Scotchie, resident on Broad Street
Ms. Kate Fisher, resident on Madison Avenue
A gentleman on Madison Avenue

Mr. Siemens noted that the zoning is in line with the next door parking lot and he didn't think it would erode into the neighborhood.

Mayor Manheimer closed the public hearing at 6:17 p.m.

In response to Councilman Bothwell, Ms. Bernstein said that the development pattern along the Chestnut Street area was residential with larger homes with large backyards.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Wisler moved to deny the conditional zoning request for Siemens Law Offices at 202 East Chestnut Street and 10 Madison Avenue from Office and RM-8 to Office-CZ and find that the request is not reasonable, not within the public interest and is not consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) The proposed change of use would be a loss of a residential unit when maintaining and preserving the available housing supply is a goal of City Council; and (2) non-residential incursion into an established neighborhood can erode residential quality. This motion was seconded by Councilman Bothwell and carried unanimously.

E. CONTINUATION OF PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF GREYMONT VILLAGE APARTMENTS LOCATED ON SARDIS ROAD FROM INDUSTRIAL DISTRICT AND COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION FO A MULTI-FAMILY APARTMENT DEVELOPMENT

Mayor Manheimer announced that the applicant has requested an additional continuance. Mr. Louis Bissette' e-mail on January 6, 2015, states that "The Developer and the City Planning staff are in the process of reviewing certain modifications to the proposed site plan and need additional time to determine the process for approval. The Developer has proposed a reduction in the size of the property to be rezoned and has also reached a written Agreement with Asheville Industries for the Blind to provide an unlimited number of "Blind Friendly" units to Employees of IFB at a discounted rental rate. This additional continuance should give both parties the opportunity to ascertain the most efficient way to proceed with this matter."

Vice-Mayor Hunt moved to continue this public hearing until February 24, 2015. This motion was seconded by Councilman Bothwell and carried unanimously.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. BOARDS & COMMISSIONS

Regarding the Civil Service Board Chair position, in which current Chair Marvin Rosen asked to step down from, it was the consensus of Council to postpone action until February 10, 2015.

Regarding the Community Relations Council, the following individuals have applied for vacancies on the Community Relations Council: Kate Sampson, Sandra Houts, Roberto L. Hess, Dana Blake, Kelly Denson and Ben Scales. Councilman Smith moved to reappoint Rachael Tanksley-Russell and Mike Hahn and interview Sandra Houts and Kelly Denson. This motion was seconded by Councilman Davis and carried unanimously.

Regarding the Sustainable Advisory Committee on Energy & the Environment, the following individuals have applied for a vacancy on the Sustainable Advisory Committee on Energy & the Environment: Katie Bray, Philip H. Pritchard, Julie Loveless, Jackson Tierney, John Noor, Jeremiah Mattysse, Erin Singer McCombs, Hanna Furgiuele, Grant Millin, Sam McLamb

and Geoffrey Habron. Councilman Smith moved to reappoint Lael Gray, appoint Katie Bray, and interview Erin Singer McCombs and John Noor. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION NO. 15-1 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ADJUSTMENT

Vice-Mayor Hunt said that the terms of Nelda Holder (Alternate), James Sheeler (Regular), Daniel Summerlin (Alternate) and Janet Whitworth (Regular) as members on the Board of Adjustment expire on January 21, 2015.

The following individuals applied for vacancies on the Board of Adjustment: Pratik H. Bhakta and Christine Longoria.

Vice-Mayor Hunt said that the Boards & Commissions Committee recommended (1) reappointing Nelda Holder (Alternate) and Daniel Summerlin (Alternate); (2) appointing Richard Fort (current Alternate) to a Regular Member); (3) appointing Phillip Hardin (current Alternate) to a Regular member); and (4) appointing Pratik Bhakta and Christine Longoria as Alternate Members.

Vice-Mayor Hunt moved to (1) reappoint Nelda Holder (Alternate) and Daniel Summerlin (Alternate) to each serve an additional three-year term respectively, terms to expire January 21, 2018; (2) appoint Richard Fort (Regular) to serve a three-year term, term to expire January 21, 2018; (3) appoint Phillip Hardin (Regular) to serve a three-year term, term to expire January 21, 2018; and (4) appoint Pratik Bhakta and Christine Longoria (Alternates) to each serve a three-year term respectively, terms to expire January 21, 2018.. All terms are until their successors have been appointed. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 1

RESOLUTION NO. 15-12 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE DOWNTOWN COMMISSION

Vice-Mayor Hunt said that the terms of Byron Greiner, Michael McDonough and Jimi Rentz, as members on the Asheville Downtown Commission, expired on December 31, 2014.

The following individuals have applied for a vacancy on the Downtown Commission: Keaton Edwards, Ryan Israel, Brent Campbell, Ruth Summers, John Menkes, Guillermo Rodriguez, Constance Richards and Drea Jackson.

Vice-Mayor Hunt said that the Boards & Commissions Committee recommended reappointing Michael McDonough, Byron Greiner and Jimi Rentz.

Vice-Mayor Hunt to reappoint Michael McDonough, Byron Greiner and Jimi Rentz to each serve an additional three-year term respectfully, terms to expire December 31, 2017, or until their successors have been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 15

RESOLUTION NO. 15-13 - RESOLUTION APPOINTING MEMBERS TO THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT

Vice-Mayor Hunt said that the terms of Ryan Blau, Lael Gray and Matthew Raker, as members on the Sustainable Advisory Committee on Energy & the Environment expired on December 31, 2014.

The following individuals have applied for a vacancy on the Sustainable Advisory Committee on Energy & the Environment: Katie Bray, Philip H. Pritchard, Julie Loveless, Jackson Tierney, John Noor, Jeremiah Mattysse, Erin Singer McCombs, Hanna Furgiuele, Grant Millin, Sam McLamb and Geoffrey Habron.

Vice-Mayor Hunt said that the Boards & Commissions Committee recommended reappointing Lael Gray; appointing Katie Bray; and interviewing Erin Singer McCombs and John Noor.

Councilman Smith moved to (1) reappoint Lael Gray to serve an additional three-year term, term to expire December 31, 2017, or until her successor has been appointed; (2) appoint Katie Bray to serve a three-year term, term to expire December 31, 2017, or until her successor has been appointed; and (3) interview Erin Singer McCombs and John Noor. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 16

RESOLUTION NO. 15-14 - RESOLUTION APPOINTING A MEMBER TO THE FIREMEN'S RELIEF FUND

Vice-Mayor Hunt said that the term of Leesa Gibbs, as a member on the Firemen's Relief Fund, expired on January 1, 2015.

No individuals have applied for a vacancy on the Firemen's Relief Fund.

Vice-Mayor Hunt said that the Boards & Commissions Committee recommended appointing Chief Financial Officer Barbara Whitehorn.

Vice-Mayor Hunt moved to appoint Chief Financial Officer Barbara Whitehorn to serve a two-year term, term to expire January 1, 2017, or until her successor has been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 17

RESOLUTION NO. 15-15- RESOLUTION APPOINTING A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT BOARD

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that the term of Bill Russell, as a member on the Metropolitan Sewerage District Board, expire on January 19, 2015.

The following individuals have applied for a vacancy: John S. Brigham, Michael L. Holcombe and James Torpey.

The Boards & Commission Committee recommended appointing Councilwoman Gwen Wisler.

Vice-Mayor Hunt moved to appoint Councilwoman Gwen Wisler to serve a three-year term, term to expire January 19, 2018, or until her successor has been appointed. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 18

RESOLUTION NO. 15-16- RESOLUTION APPOINTING A MEMBER TO THE NOISE ORDINANCE APPEALS BOARD

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that there currently exists a vacancy left by John Hayes on the Noise Ordinance Appeals Board until July 1, 2015.

The following individuals have applied for a vacancy: Victor Fahrer and Robert Glenn.

The Boards & Commission Committee recommended appointing Victor Fahrer.

Councilman Smith moved to appoint Victor Fahrer to serve the unexpired term of Mr. Hayes, term to expire July 1, 2015, and then a full three-year term, term to expire July 1, 2018, or until his successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 19

RESOLUTION NO. 15-17 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE TREE COMMISSION

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that the terms of Brandee Boggs, Amy Kemp and Bob Gale, as members on the Tree Commission, expired on December 31, 2014. In addition. Jonathan Gach and Matthew Schlosser have resigned from the Commission, thus leaving two unexpired terms until December 31, 2015.

The following individuals have applied for a vacancy on the Tree Commission: Diane Hillgrove, Marc Williams, Carl Nyberg, Sara Surabian, Justin Price, Leslee Reiter and Stephen E. Hendricks.

The Boards & Commission Committee recommended appointing Justin Price, Marc Williams, Carl Nyberg, Stephen Hendricks and Leslee Reiter.

Vice-Mayor Hunt moved to (1) appoint Justin Price, Marc Williams and Carl Nyberg to each serve a three-year term respectively, terms to expire December 31, 2017, or until their successors have been appointed; and (2) appoint Leslee Reiter to serve the unexpired term of Mr. Gach, term to expire December 31, 2015, or until her successor has been appointed; and (3) appoint Stephen Hendricks to serve the unexpired term of Mr. Schlosser, term to expire December 31, 2015, or until his successor has been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 20

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Lawrence Rice, business owner in west Asheville, spoke to Council about the graffiti problem he has encountered and felt there should be more Police Department presence. He felt the City is trying to make property owners responsible over something they have no control over. Director of Public Works Greg Shuler offered to meet with Mr. Rice to discuss his concerns.

Mr. Jeffrey DeCristofaro spoke about the need to pursue alternative energy awareness.

Mr. Rondell Lance, President of the local Fraternal Order of Police, spoke in opposition of City Council trying to disband the Civil Service Board, which is so important to City employees.

Ms. Clare Hanrahan spoke about the need to maintain sidewalks and add benches in the downtown area.

Mr. Timothy Sadler felt the City should appoint all members to the Civil Service Board. He also suggested Council support any "know your rights" trainings.

Closed Session

At 7:00 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C. Gen. Stat. § 143-318.10(3). The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(1); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including, but not limited to, lawsuits involving the following parties: The City of Asheville v. Robert Frost, Butterworth, et al. v. City of Asheville, et al., and Gannett Pacific Corp. d/b/a Asheville Citizen Times Publishing Co. v. City of Asheville. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3); and (3) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(5). This motion was seconded by Councilman Pelly and carried unanimously.

At 8:51 p.m., Councilman Bothwell moved to come out of closed session. This motion was seconded by Councilman Pelly and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 8:51 p.m.

Magdalen Burleson
CITY CLERK

Edwin C. Manheimer
MAYOR

Tuesday – January 27, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson (excused from meeting at 8:43 p.m.); Director of Planning & Multimodal Transportation Cathy Ball (arrived in meeting at 8:43 p.m.); City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. EMPLOYEE RECOGNITIONS

City Manager Jackson recognized (1) Sara McHone - NC AWWA Walter J. Courmon Safety Award; (2) Leslie Carreiro - Outstanding Water Operator of the Year; (3) Randy Rhodes - Distribution System Operator of the Year; (4) Greg Shuler, Shannon Tuch, McCray Coates, Abigail Riley, Nathan Pennington, Keisha Lipe, Tim Bayless, Stephanie O'Conner, Chuck Watson, Ray Tracy and Mark Case - National Flood Insurance Program Community Rating System; (5) Ivan Thomas - Highlighted in the Municipal Sewer and Water Magazine.

Mayor Manheimer thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

B. PROCLAMATION PROCLAIMING JANUARY 27, 2015, AS THE "TEN-YEAR ANNIVERSARY OF WATER RESOURCES DEPARTMENT ISO 14001 REGISTRATION DAY"

Mayor Manheimer read the proclamation proclaiming January 25, 2015, as the "Ten-Year Anniversary of Water Resources Department ISO 14001 Registration Day" in the City of Asheville. She presented the proclamation to Director of Water Resources Steve Shoaf.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 13, 2015

B. RESOLUTION NO. 15-18 - RESOLUTION AUTHORIZING THE CITY MANAGER TO COMPLETE NEGOTIATIONS AND EXECUTE A PROFESSIONAL SERVICES CONTRACT WITH BROWN AND CALDWELL FOR THE CITY WIDE STORMWATER ASSESSMENT

Summary: The consideration of a resolution authorizing the City Manager to complete negotiations and sign a contract with Brown and Caldwell for the completion of the City Wide stormwater assessment.

In 2013, the City of Asheville received record rainfall. As staff was investigating many areas of concern, citizens were asking staff to perform additional maintenance activities and perform more watershed analysis which would help identify flood mitigation projects.

This past year, council approved an increase in the Stormwater Utility Fee, this was the first increase to the fee since its inception in 2005. The new revenue is designed to be utilized on maintenance activities and also to provide new capital construction projects.

The City of Asheville solicited request for qualifications for professional services for the Stormwater Assessment. From the proposals, the top 4 firms were interviewed in order for the City to obtain the most qualified team. From this interview process, the City selected Brown and Caldwell.

The top 4 firms were:

Brown and Caldwell Charlotte Office, NC
McGill Associates Asheville, NC
WK Dickson, Raleigh Office, NC
Kimley Horn, Charlotte Office, NC

In order to get accurate information, Brown and Caldwell will conduct and assessment of the City's drainage system. This assessment will identify potential issues, provide concepts toward solutions to these issues and prepare a 2 year and 10 year Capital Improvement Plan (CIP). The CIP plan will prioritize projects for future implementation.

The City has a goal to continue to be stewards of the environment. Through this assessment, Brown and Caldwell will also assist in identifying and prioritizing watersheds for further studies. The team will also look for opportunities to implement green infrastructure practices into the projects selected and opportunities for localized flood mitigation projects.

Pros:

- Provides a CIP for both drainage infrastructure and watersheds.
- Identify future issues with City infrastructures and provide a priority list for addressing these issues.
- Utilize the stormwater utility fee for construction related projects

Con:

- The project management and contract administration will consume staff time and City Funds

The City's Stormwater Utility will be responsible for the cost for the professional services contract. The total contract for professional services will be $500,000 with a 10% contingency for a total project up to $550,000. Funding for this contract is included in the adopted FY 2014-15 Stormwater Fund budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to complete negotiations and execute a contract with Brown and Caldwell for the professional services associated with an assessment of the City's stormwater system for a contract amount of $500,000, and to enter into change orders to this contract not to exceed 10% of the original contract $50,000 for a total amount up to $550,000.

RESOLUTION BOOK NO. 37 - PAGE 21

C. RESOLUTION NO. 15-19 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY TO THE FRENCH BROAD RIVER METROPOLITAN PLANNING ORGANIZATION FOR GRANTS OF FEDERAL

TRANSPORTATION FUNDING, AND IF SUCCESSFUL, TO ACCEPT SUCH GRANTS AND EXECUTE NECESSARY AGREEMENTS

Summary: The consideration of a resolution authorizing the City Manager to apply to the French Broad River Metropolitan Planning Organization (MPO) for grants of federal transportation funds, and if the applications are successful, to accept grants and sign necessary agreements with the MPO, or state or federal agencies to receive the funds.

The MPO has opened a second call for projects to use federal Surface Transportation Program – Directly Attributable (STP-DA) funds and Transportation Alternative Program (TAP) funding sources. The MPO expects to have approximately $3.8 million in STP-DA and TAP funding available for fiscal years 2016 and 2017. All of these funds are expected to be distributed via this competitive call for projects.

Staff is pursuing funding for the following projects:

- Design and construction for connectors between three city greenways, Beaucatcher, Town Branch and Clingman Forest, for $125,000 with 80% funded by the grant.
- Craven Street Bridge design and construction, estimated to cost $3 million, with 80% funded by the grant.
- A study to determine how Federal Transit Administration (FTA) operating assistance funds for urban transit services should be distributed among local governments in Buncombe, Henderson, Haywood and Madison counties. These funds are also referred to as 5307 funds. The study is expected to cost $90,000, with 80% funded by the grant.
- Update of the Transit Master Plan for $120,000, with 80% funded by the grant.

If received, these projects will be added to the city's capital and operating budgets.

Pros:

- Allows the City of Asheville access to up to $3.3 million in capital, planning and infrastructure investment from these grants
- Allows the City of Asheville to make clear connections between three upcoming greenways, making them part of a growing network of transportation pathways
- Allows the City of Asheville to make the next step in implementing the vision of the River District transportation system by improving connectivity of Craven Street for all travel modes
- Allows the urban transit providers in the MPO region to comply with federal regulations requiring a well-considered and equitable way to distribute the FTA 5307 allocation among qualifying providers.
- Allows the City of Asheville to meet FTA requirement to keep the transit master plan up-to-date

Con:

- Commits the city to funding to the match, at least for the time the applications are pending.

If successful, the grant applications will involve the spending of city funds to leverage 80% grant funding for these projects, up to a grant value of $3.3 million and a city match of up to $667,000.

City staff recommends City Council adopt a resolution authorizing the City Manager to apply to the French Broad River Metropolitan Planning Organization (MPO) for grants of federal transportation funds, and if the applications are successful, to accept grants and sign necessary agreements with the MPO, or state or federal agencies to receive the funds, and to express the intention to provide the required local match.

RESOLUTION BOOK NO. 37 - PAGE 22

D. RESOLUTION NO. 15-20 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL SERVICES CONTRACT WITH CLARK PATTERSON LEE FOR THE ARCHITECTURAL AND ENGINEERING SERVICES NECESSARY TO DESIGN AND REMODEL THE 7TH AND 8TH FLOORS OF CITY HALL

Summary: The consideration of a resolution authorizing the City Manager to enter into a professional services contract with Clark Patterson Lee for the architectural and engineering services necessary to design and remodel the 7th and 8th floors of City Hall.

The final phase of the City Hall Renovation project is the design and remodeling of the 7th and 8th floors of City Hall, which are currently unoccupied. The proposed professional services contract will provide the architectural and engineering services required to modernize the building systems, design the 7th & 8th floor space to be remodeled, and related services.

During the August 26, 2014, the Finance Committee received a briefing which included (a) an update on the overall City Hall Renovation Project, (b) available funding for the design & remodeling work on the 7th and 8th floors, (c) the proposed procurement of architectural & engineering services for the design phase, and (d) a description of potential uses for the space (multi-purpose meeting space for use by City Council, City staff, and the public; innovative and collaborative team space; records storage; and office space if needed).

In response to a Request for Qualifications, the following ten firms submitted:

Architectural Design Studio (Asheville, NC)	Novus-Bowers, Ellis, and Watson (Asheville, NC)
Clark Nexsen (Asheville, NC)	Clark Patterson Lee (Asheville, NC & Rochester, NY)
Mackey Mitchell Architects (Asheville, NC)	ARCA (Asheville, NC) & Craig Gaulden Davis (Greenville, SC)
Matthews Architecture, P.A. (Asheville, NC)	Creech & Associates (Charlotte, NC & Mt. Pleasant, SC)
Padgett and Freeman Architects (Asheville, NC)	Tise-Kiester Architects, P.A. (Asheville, NC & Chapel Hill, NC)

In reviewing submittals, an inter-departmental team utilized a scoring matrix to assess the qualifications. Clark Patterson Lee scored the highest by a significant margin, so it was selected for an on-site team interview. The interview process confirmed the capabilities of the consultant team. Clark Patterson Lee's multi-disciplinary team is well-qualified, and the firm includes disciplines such as architecture, engineering, historic preservation, interior design, and more. Further, its understanding of the renovation of historic public buildings ranges from the Cherokee County Courthouse (2012) to Asheville City Hall (1998). The Clark Patterson Lee team has exhibited flexibility and an understanding of the City's needs for phasing the work, authorizing services only as needed, and preparing for the technical and communications challenges of the proposed project.

The proposed design work and subsequent renovations would support Goal 4 in Focus Area 1 of the 2014-2015 Strategic Operating Plan because the renovated space is being designed to improve energy efficiency and modernize building systems, thus reducing operations and maintenance (O&M) costs and supporting sustainability efforts. The process undertaken for this phase of the project also supports the action item "ask employees to innovate and seek savings" listed in Goal 3 under Focus Area 1 of the 2013-2014 Strategic Operating Plan because a staff-based cross-functional team has already developed some cost-savings ideas as part of the design considerations for this architecture/engineering phase of the renovation project.

Pros:

- Allows the renovation of interior space and modernization of building systems on the 7th & 8th floors of City Hall to proceed;

- Multi-disciplinary team includes architecture, engineering, interior design, historic preservation, and other professional disciplines; and
- Plan to preserve historic elements while modernizing systems and providing multi-purpose meeting space, office space, and general storage/records retention.

Con:

- None identified.

Project funding was approved by City Council in the Capital Improvement Program (CIP Project B1101), and the proposed expenditures are within the existing budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a professional services contract with Clark Patterson Lee for the architectural & engineering services needed to design & remodel the 7th and 8th floors of City Hall.

RESOLUTION BOOK NO. 37 - PAGE 23

E. MOTION APPROVING THE BOARD OF ALCOHOLIC BEVERAGE CONTROL'S TRAVEL POLICIES ADOPTED JUNE 28, 2011

Summary: Changes in Commission rules require ABC Boards across the state to adopt a travel policy that mirrors the travel policy of their appointing authority. In order to meet the requirements of Chapter 18B-700, Article 7 (g2), the Asheville ABC Board seeks to continue to use the travel policies of its appointing authority, the City of Asheville. Section g2 states, "The local board shall annually provide the appointing authority's written confirmation of such approval ..." The ABC Board approved the current policies on June 28, 2011. There are no changes to the current policies.

The Asheville ABC Board is requesting formal written confirmation of the approval of the Asheville Board of Alcoholic Control Board Member Travel Policy and the Asheville Board of Alcoholic Control Travel Policy.

F. RESOLUTION NO. 15-21 - RESOLUTION APPOINTING A MEMBER TO THE TREE COMMISSION

Summary: On January 13, 2015, by Resolution No. 15-17, City Council appointed Mr. Carl Nyberg to fill the expired term of Ms. Amy Kemp. An error was made in calculating the terms and Ms. Kemp was eligible to serve another term. Mr. Nyberg has agreed to give up his term until the next available seat on the Commission. Therefore, Mr. Carl Nyberg is hereby removed as a member of the Tree Commission, until the next vacancy, in order to allow Ms. Amy Kemp to serve another term. In addition, Ms. Amy Kemp, is hereby reappointed as a member of the Asheville Tree Commission, to serve an additional three year term, term to expire December 31, 2017, or until her successor has been appointed.

RESOLUTION BOOK NO. 37 - PAGE 24

G. RESOLUTION NO. 15-22 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH THE Z SMITH REYNOLDS FOUNDATION AND SOCIAL PROFIT STRATEGIES TO FACILITATE THE DEVELOPMENT OF TRAINING MATERIALS AND PROCESS TO ENHANCE PARTNERSHIPS TO BUILD NEIGHBORHOOD CAPACITY

ORDINANCE NO. 4378 - BUDGET AMENDMENT FROM THE Z SMITH REYNOLDS FOUNDATION TO FACILITATE THE DEVELOPMENT OF TRAINING MATERIALS AND PROCESS TO ENHANCE PARTNERSHIPS TO BUILD NEIGHBORHOOD CAPACITY

Summary: The consideration of a resolution authorizing the City Manager to sign agreements with the Z Smith Reynolds Foundation and Social Profit Strategies (formerly Dynamic Governance Institute/Sims and Steele Inc.) to facilitate the development of training materials and process to enhance partnerships to build neighborhood capacity; and the associated budget amendment in the amount of $30,000 from the Z Smith Reynolds Foundation.

The project to be funded by this grant is a collaborative effort of the City's Communication and Public Engagement Division, Social Profit Strategies, and residents of Public Housing Communities in the South French Broad neighborhood and was developed to strengthen effective neighborhood participation in planning decisions.

This grant award is for a second year of funding from Z Smith Reynolds Foundation in the amount of $30,000 for the continuation of the pilot program entitled "Building Neighborhood Capacity and Leadership across Race and Class." The 2014 grant supported the development of a collaboration between the Communication and Public Engagement Division and the Dynamic Governance Institute (now a branch of Social Profit Strategies and called "Circle Forward") to strengthen the city's work with neighborhoods to increase effective citizen participation in government.

The 2014 grant-funded project focused on developing the capacity of the HACA Residents' Council in order to grow their ability to provide leadership for public housing residents' participation in the decisions that impact them. Early in the grant funding cycle, this became a crucial endeavor as HACA leadership and residents struggled to find common ground on how to implement the HUD Rental Assistance Demonstration project adopted by the HACA Board. Support and training provided by the grant Leadership Team were a catalyst for the Residents' Council Executive Committee's successful restructuring and establishment of a transparent process and development of an action plan to train the leadership of every public housing community's Residents' Association. Results of this effort include a 2-year action plan for strengthening the Residents' Council, revitalization of five public housing communities' Residents Associations, and efforts to develop a comprehensive communication network to more effectively connect public housing residents to the information they need to more actively participate in their communities.

In addition to using Circle Forward to facilitate Residents' Council and Association meetings more effectively, members of the Executive Committee participate in ongoing facilitation trainings in order to provide leadership for public housing communities as they reach out to their neighbors outside of public housing. Social Profit Strategies' involvement with the Leadership Team has resulted in the development of training materials that will support the Residents' Council in their efforts to build the capacity of Residents' Associations in all public housing to more effectively participate in shared decision making. The 2015 grant will provide support for expanding the use of the Circle Forward method by public housing communities as they seek to build partnerships with their neighbors and establish their role as capable facilitators of collaboration for the larger community.

Pros:

- Creates a more level playing field for historically disenfranchised residents who may lack the training and experience needed to participate effectively in public processes.
- Supports the development of a structured training opportunity with culturally sensitive materials that can be used for similar efforts in neighborhoods throughout the city.
- Empowers public housing residents by providing opportunities to act as process facilitators and trainers for other neighborhoods.
- Previous grant has resulted in a more effective Residents' Council and the re-establishment of active Residents' Association in five public housing communities.

Cons:

- While the Leadership Team is confident ongoing resources can be secured to sustain the program after this grant year, funding sources have not yet been identified.

Grant revenue of $30,000 will be administered by Social Profit Strategies through a sub-award agreement at no cost to the City. Funding will be used to administer the grant, oversee the development of materials, and coordinate and facilitate meetings and training sessions, including providing support services like babysitting and transportation to enable residents to participate in the free training. In addition, the grant provides opportunities for residents who assume key leadership roles to receive stipends for activities aimed at making the program sustainable over time and available to all Asheville neighborhoods.

Staff recommends that City Council adopt the resolution authorizing the City Manager to sign the grant agreement with the Z Smith Reynolds Foundation and the Sub-Award Agreement with Social Profit Strategies; and the associated budget amendment.

RESOLUTION BOOK NO. 37 - PAGE 25
ORDINANCE BOOK NO. 29 - PAGE 333

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Wisler and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. MULTIMODAL TRANSPORTATION COMMISSION UPDATE

Mr. Jim Grode, Chairman of the Multimodal Transportation Commission, gave a brief update on the Commission which was authorized in May 2013. He explained how the Commission is working with other City departments and commissions on different multimodal projects. He asked the Council to consider extending the Commissions' terms for an additional six months to bring them into the calendar year as other commissions. They embrace their role to serve as liaison between the community and Council and are grateful for Council's recognition of the need for multimodal transportation.

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that they will consider the Commissions request for calendar year terms at their next meeting.

In response to Councilman Smith, Mr. Grode said felt there is a lot of room for improvement on pedestrian safety using our limited resources.

On behalf of City Council, Mayor Manheimer thanked Mr. Grode and the entire Commission for their hard work and dedication on the Commission.

B. 2015 HOUSING MARKET STUDY AND NEEDS ASSESSMENT

Assistant Director of Economic and Community Development Jeff Staudinger said that the City's Community and Economic Development department contracted with Bowen National Research of Pickerington, Ohio to conduct our 2015 Housing Market Study and Needs Assessment. This study is a key element in the development of the 2015-2019 Consolidated Strategic Plan for CDBG and HOME, and is one of the precedent steps in the development of the Comprehensive Affordable Housing Strategy, presented to Council in October, 2014.

The Housing Market Study reports for the Asheville Regional Hosing Consortium four-county area, including Buncombe, Henderson, Madison and Transylvania Counties. Each county's specific market conditions and needs are also reported on separately, with a separate report also for the City of Asheville.

The report focuses on the market conditions and needs for households earning less than 120% of median income. The report concludes that the region is experiencing a significant housing supply gap across all income levels, and in both rental and for-sale housing supply.

He then summarized the key statistical information, leading to the consultant's opinion about housing needs and housing gaps, as well as summarizing the consultant's key finding, which are (1) insufficient rental housing (multi-family) supply; (2) emerging need for senior housing and/or efforts to enable seniors to age in place; (3) insufficient supply of for-sale housing affordable to moderate-income (80% to 120% AMHI) households; (4) utilization of affordable rental housing programs; and (5) need for home repair/maintenance programs.

Councilman Smith asked that the City place the link to the entire report on the front page of the City's website. He recognized that there are housing needs across the board. He was grateful for the leadership City Council has shown in the area of the affordable housing crisis. City Council is making some changes to help; however, there is no single solution. The City has made a change to allow residential density on commercial corridors, and is looking at several other items, e.g., a Request for Proposal for housing development on some City-owned properties, land-banking for future housing, revisions to accessory dwelling units, rules for tiny houses; short term rental housing, plan to renovate Lee Walker Heights, etc. The Housing & Community Development Committee will be reviewing housing targets and would keep the Council apprised of that process.

Councilman Bothwell said that Asheville is not different than the rest of the county. We are under the assumption that housing is expensive in Asheville, but that is not exactly the case. It's scare, but it's not unusually expensive, compared to wages.

Councilman Davis felt that the report shows there are housing needs in almost every income bracket, but recognizing it is more severe in the 80% or below.

Mr. Staudinger responded to Mayor Manheimer when she asked if we are out of line with other similar cities in the south.

Vice-Mayor Hunt noted that another constraint in Asheville is the competition for the land. There is limited land availability to build a large number of units.

Mr. Staudinger responded to Vice-Mayor Hunt regarding the lack of supply in the current market and how that relates to rent rates and land values.

Councilman Smith felt Council needs to incentivize development of populations that require a more intensive living environment, e.g., senior living homes, senior care homes, homes for the disabled, homes for the mentally ill, etc.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING PROPERTY OFF FAIRVIEW ROAD FROM URBAN VILLAGE DISTRICT TO URBAN PLACE DISTRICT/CONDITIONAL ZONING FOR DEVELOPMENT OF A MIXED USE PROJECT CONTAINING APARTMENTS AND RETAIL, WITH MODIFICATIONS TO PARKING STANDARDS FOUND IN SECTION 7-8-26 OF THE UNIFIED DEVELOPMENT ORDINANCE

ORDINANCE NO. 4379 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY OFF FAIRVIEW ROAD FROM URBAN VILLAGE DISTRICT TO URBAN PLACE DISTRICT/CONDITIONAL ZONING FOR DEVELOPMENT OF A MIXED USE PROJECT CONTAINING APARTMENTS AND RETAIL, WITH MODIFICATIONS TO PARKING STANDARDS FOUND IN SECTION 7-8-26 OF THE UNIFIED DEVELOPMENT ORDINANCE

Mayor Manheimer said that this public hearing was continued from the November 11, 2014, meeting to December 9, 2014, at the applicant's request. At the City Council meeting on December 9, 2014, Mr. Lou Bissette, representing the owner asked for a continuance until January 27, 2015, in order to (1) further look at the City's Land Use Incentive Program and other ways to achieve 10% affordable housing in the project; and (2) meet with the neighbors to discuss any of their concerns.

Urban Planner Jessica Bernstein said that this is the consideration of a Conditional Zoning for two parcels located on Fairview Road from Urban Village (UV) to UP (Urban Place District) – Conditional Zone in accordance with Section 7-7-8 of the UDO, for the construction of a mixed-use development with a condition regarding parking. This project was originally on City Council's December 9, 2014, agenda but a continuance was requested at that meeting to the January 27, 2015 date. This public hearing was advertised on October 31 and November 7, 2014.

Ms. Bernstein said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property.

She said that the project site consists of two parcels with a combined area of approximately 14.02 acres (according to submitted plans) and frontage on Fairview Road and Stoner Road just outside of Biltmore Village on the edge of the Oakley neighborhood. The site is currently zoned Urban Village (rezoned in 2007 as a part of a larger development project that was never realized). Adjacent parcels are zoned Commercial Industrial (CI) to the west and north, RM-8 and UV to the east and UV to the south.

The project area is currently vacant and has mature trees across the site. Surrounding uses include commercial/industrial operations, retail, the Norfolk Southern rail line and single-family residential. The site has some steep grade changes from adjacent parcels, especially along Stoner Road and the parcel to the west, along Fairview Road.

The applicant is proposing the construction of a mixed-use development with primarily residential units but also live-work and retail space. As indicated in the *Required Reviews* section of this report, the project was revised after an original plan was not supported by staff or the Planning & Zoning Commission. Current plans indicate a total of 309 residential units with 155 1-bedroom, 122 2-bedroom and 32 3-bedroom configurations *(up from 298 units previously)*. There are 5 live-work units identified as well as 9,742 square feet for retail uses *(original plan showed 7,600 square feet for retail)*.

The design incorporates four buildings with surface parking throughout the site. The buildings range from four to six levels and have a maximum height of 73 feet. Buildings 300 and 400 are unchanged from the original plan (four/five splits at 53 feet maximum height) but Buildings 100 and 200 were revised to provide access into retail spaces along Fairview Road and this has resulted in a greater height for those two buildings (73 feet and 63 feet respectively).

The project proposes two vehicular access points, one from Fairview Road and one on Stoner Road towards the rail line, both two-way driveways. Once inside the site, the buildings are surrounded by a series of linear surface parking areas. There are a total of 578 parking spaces shown, including required accessible spaces and bike parking *(previously 533 spaces – number*

of spaces increased to accommodate additional retail spaces and residential units).

New sidewalks are shown on Fairview Road. While the previous submittal indicated that sidewalks along Stoner Road would be handled through a fee-in-lieu; the applicant is now committing to installation of sidewalks on this side as well. Final location and details of sidewalk installation will be worked through in the Final TRC review.

There are internal walkways throughout the site. The previous plan showed very limited pedestrian access from Fairview Road into the retail shops; however the proposal has been revised to provide multiple direct access points along this streetscape.

Landscaping is required for this project and includes a property line buffer against areas of residential zoning, street trees, building impact and parking lot landscaping and dumpster screening.

Open space is required in an amount equal to five percent of the lot area, which is 30,492 square feet (or 0.7 acre). More than this amount is provided in hardscaped plaza areas throughout the site.

The redesign has greatly eliminated the retaining walls originally shown along Fairview Road, with the exception of a stretch approximately 80 feet long at the southwest end of the site. This section has been stepped in a way with incorporated landscaping at each level (10 and 12 foot sections) to reduce the perception of overall height and also includes stairs to provide additional access into the site. The west, north and east boundaries have not changed from the original plan and include (fill) walls up to 40 feet along the western (internal) property line, 16 to 36 feet along the northern boundary (rear of the site) and cut walls up to 26 feet along the east side with walls between 2 to 18 feet along Stoner Road. Interior to the site, there are additional walls around each building ranging in height from 2 to 13 feet.

Council Conditions:

- In the Urban Place zoning district, parking is not permitted to be closer to the street than the face or edge of a structure. Because the buildings are oriented either towards Fairview Road or internally, the frontage along Stoner Road is not activated. Due to landscape buffer requirements along Stoner Road and difficulties resulting from existing topography, activation in this particular location would be challenging and staff believes the layout as proposed is supportable, with parking areas separated from the street by landscaping and the grade change.

The proposal was approved with conditions by the Technical Review Committee at their meeting on September 15, 2014.

On October 16th, the Planning & Zoning Commission reviewed the original proposal and voted unanimously NOT to support the requested conditional zoning (6-0). Commissioners agreed with staff's recommendation on that application that the project's design and mix of uses was not aligned with the intent of the Urban Place zoning district and had serious concerns about the retaining walls as a method of incorporating the use into the site. Additionally, the Commission did NOT approve the requested variance relating to the distance between pedestrian entrances along Fairview Road.

The project was amended to address many of the comments raised by staff and the Commission and the revision was approved by a vote of 4-1 on November 20, 2014. The dissenting vote was due to concerns about integration of the project into the area and a desire for a greater mix of uses. Additionally there was some discussion regarding the district requirement for locating entrances on each primary façade, with one Commissioner wishing to see more entrances on each building; however staff has consistently and historically applied this

requirement only to *street facing* façades which in this case would be Fairview Road and not internal buildings as they face onto a parking field.

Since the Planning & Zoning Commission meeting, staff has met with the two adjacent residential neighbors who have expressed significant concern regarding the increased traffic into the neighborhood, the retaining walls and the lack of integration of the proposal into the area. Other area residents have expressed similar concerns.

The site was zoned Urban Village as a part of a larger master plan that was never finalized. Before that rezoning in 2007, the site was zoned as RM-16 (Residential Multi-family High Density). The proposed district, Urban Place, allows 64 residential units per acre and is intended to foster "higher-density, mixed-use development that is economically viable, pedestrian oriented, visually attractive and contributing to the place making character of the city...in the form of mixed-use structures that relate to the street, enhance the streetscape and offer a wide range of complementary land uses and employment opportunities."

The proposal offers a residential density of approximately 21 units per acre and includes five live-work units and almost 10,000 square feet of space available for retail use. The site is in a good location for a multi-family residential use because it is sited along a transit route and walkable to Biltmore Village and beyond. This revised proposal has increased the amount of retail and has been redesigned to allow for the buildings to step along the grade changes on the site, providing direct access to retail spaces from the sidewalk as well as internally along the main drive access. The Fairview Road frontage has been revised to be an active and pedestrian-oriented streetscape, more in line with the intent of the Urban Place zoning district.

Recent actions in the general vicinity have included the approval of the Roots & Wings School conditional zoning at 573 Fairview Road (2014); Biltmore Hill mixed-use conditional zoning at 63 Brook Street (2013) and River Mill Lofts CUP at Thompson Street and Stoner Road from River to Urban Place (2014).

Zoning and uses adjacent to this site include CI and UP to the north (Norfolk Southern railroad, manufacturing uses); RM8 and UV to the east (single-family residential); UV to the south across Fairview Road (CarePartners and retail) and CI to the west (manufacturing). Along the north boundary of the site is a 100 foot railroad easement. This location is well suited for a higher-density residential, mixed-use development given the proximity and access to employment locations, transit and amenities.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. *That the proposed use or development of the land will not materially endanger the public health or safety.*
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. *That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.*
   There are significant topographic differences around the site and vicinity. Fairview Road drops approximately 70-90 feet from the eastern to western extents of the parcel. The

building on the parcel to the west is approximately 45 feet lower than the elevation at the western property boundary. There is a difference of approximately 90 feet from the railroad line at Stoner Road up into the center of the project site. As is, the parcel sits well above Stoner Road, the adjacent parcel to the west and most of Fairview Road. In order to create a more ideal building surface within the site, the applicant is proposing significant retaining walls around the bulk of the project area's perimeter. This results in walls from 24 to 40 feet in height along the western property line; from 16 to 18 feet along Stoner Road (across from single-story homes); and from 9 to 26 feet along the eastern boundary (the site drops down below the adjacent single family homes but is 30-40 feet above the homes across Stoner Road). The plans have been revised to address the interaction between the project and Fairview Road, greatly reducing the walls along this southern boundary line.

While the revisions address the project's ability to facilitate pedestrian activity along Fairview Road and meet the intent of the Urban Place zoning district, the large retaining walls on the rest of the site remain and prohibit integration of the project with the residential uses to the east.

3. *That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.*
The proposed use of the land for the mixed-use development is not expected to injure the value of adjoining or abutting property; higher-density uses have been anticipated in this area with the 2007 Urban Village rezoning as well as the RM-16 zoning before that. The revisions along Fairview Road greatly enhance the streetscape and the interaction of the proposal within the area. However, there may still be some question of how the development of the land with large retaining walls at the perimeters could impact the value of the adjacent single-family residential uses.

4. *That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.*
As stated in finding number three, this area has been anticipated for higher-density development. Given the proximity to employment centers, residential infrastructure and transit, this is an appropriate location for the use. While the scale, bulk, coverage and density are all greater than the adjacent neighborhood, this is an area with a variety of commercial and manufacturing uses currently and the multi-family component offers an acceptable transition in scale and intensity between the single-family uses to the east and the commercial uses to the west. The activation of retail spaces along Fairview Road should enhance the corridor leading to Biltmore Village and should benefit the area.

   Again, there remains concern about the development of the land around and how the large retaining walls around the perimeter of the site complement the scale and character of the neighborhood.

5. *That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.*
As enumerated below, elements of the project are directly aligned with the City's plans and objectives as a mixed-use, infill project including multi-modal transportation elements (sidewalks, bike racks, transit shelter) in a walkable location. The applicant has slightly increased the residential density and has indicated a commitment to provide 10 one-bedroom units as dedicated affordable rentals for a period of five years.

   While the proposal is considered by staff to be a good use for this location and revisions allow the project to enhance Fairview Road in a way that meets with the purpose and intent of the requested zoning district, the topographic challenges on this parcel still result

in a difficulty, relating to the Stoner Road frontage and very large retaining walls on three sides.

6. *That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.*
The proposal has been determined by the TRC to have adequate water supply, police protection, waste disposal and similar facilities. The site is approximately 800 feet from the nearest transit stop (C) at Fairview and Stoner Roads and approximately two tenths of a mile to the S1 route.

7. *That the proposed use will not cause undue traffic congestion or create a traffic hazard.*
A TIS was required due to the anticipated volume of traffic and has been reviewed by the Traffic Engineer. The project is not expected to create a hazard or undue congestion based on the proposed plans and the recommendations contained by the Traffic Impact Study. Two of the recommendations that will be incorporated into the design are a dedicated left turn-in lane heading eastbound and a dedicated right turn-in lane heading westbound on Fairview Road.

This proposal is aligned with the *Asheville City Development Plan 2025* in several areas. Smart Growth policies encourage mixed-use developments and higher-density residential infill with an emphasis on locating projects in an area walkable to amenities and proximate to transit. Infill development along transit corridors is highlighted and encouraged in various plan chapters. Affordable housing options are highlighted throughout the Plan as a strong community need; and as of the writing of this report, the applicant has indicated a commitment to dedicate ten 1-bedroom units as affordable by the City's standards, for a period of five-years.

One aspect where the proposal does not align with the *Plan* is that when considering the retaining walls along the perimeter of the project facing existing residential uses and the lack of activity or integration along Stoner Road; the plan states that "protection, preservation and enhancement of existing neighborhoods must be as much a part of our development pattern as promoting new construction". The walls are proposed to accommodate development on a site with existing topographic challenges.

The revised plan aligns with several of City Council's adopted goals for 2014-2015: from "Economic Growth and Sustainability" is supporting mix-use development and development with multi-modal improvements; and "Affordability and Economic Mobility" stresses expanding Asheville supply of available housing with an emphasis on affordable units close to jobs and transportation. However, there is some concern as to how the large perimeter retaining walls will impact adjacent single-family properties (relating to the goals on "High Quality of Life."

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff does find this request to be reasonable and within the best public interest.

Considerations:

- Revisions to the buildings along Fairview Road result in direct pedestrian access to retail spaces and meet the purpose and intent of the Urban Place zoning district by enhancing the streetscape.
- City-adopted plans and policies support mixed-use development, especially providing residential uses in a walkable location proximate to transit.
- The applicant has offered to place a transit shelter on the site.
- Multi-family residential use would provide a good transition between single-family and commercial uses on either side.
- Application includes dedication of ten 1-bedroom units as affordable for a period of five years

- Due to retaining walls and topographic difficulties, the project does not interact with adjacent single-family neighborhood.

The proposal is for a higher-density mixed-use project in an ideal infill location. Staff feels this is a good use for the site and revisions from the original submittal create the opportunity for an active streetscape environment along the primary frontage. The project complies with a number of City goals and objectives, including inclusion of affordable housing. There is still some concern regarding the lack of integration of the development with adjacent neighborhoods and staff encourages the developer to increase the commitment to affordable housing but overall, the project meets the purpose and intent of the requested zoning district and City goals. Staff recommends approval.

When Councilman Bothwell asked why the current zoning of Urban Village District does not apply here. Ms. Bernstein said that when an Urban Village District is approved, it goes with a larger overall Master Plan which has to be built, or come back to Council for an amendment. In 2007 the overall Master Plan was approved which included two of the parcels, but also included a neighbor to the east and lots across Fairview Road. This was a significant amendment to eliminate three additional parcels. Urban Place District is the next step down from Urban Village District.

In response to Councilman Bothwell, Ms. Bernstein said that the Urban Place District allows for a much greater density - 64 units per acre. This application is approximately 22 units per acre.

In response to Vice-Mayor Hunt, Ms. Bernstein said that after hearing comments from the community and based on comments from a prior Council-approval on River Loft Apartments, the following conditions (agreed to by the applicant) which were posted on-line Friday, have been amended as follows: (1) Condition 3 now reads "The applicant will dedicate seven percent (7%) of the units at the City's affordable rent for a period of ten years. The rent limits are according to income standards determined by the City of Asheville Community Development Department; (2) Condition 9 now reads "The project includes new sidewalks with a minimum width of 10 feet along Fairview Road and new sidewalk along Stoner Road for the length of the property; and (3) Condition 13 now reads "The property owner and/or applicant shall pay to the City of Asheville $50,000 on or before the date the first building permit is issued for the purpose of promoting connectivity from the property to Sweeten Creek Road and Biltmore Village and/or for traffic calming measures or pedestrian enhancements on or around Fairview Road and Stoner Road."

When Councilman Pelly asked if the applicant's sidewalks can be connected to Fairview Road, Ms. Bernstein said that there are two other properties between this site and Fairview Road that are not owned by the applicant. She said they tried to open up that conservation with those owners to see if they would be willing to grant a sidewalk easement.

In response to Councilman Pelly about a direct connection to Biltmore Village, Ms. Bernstein said that the applicant is not proposing to make any sidewalk connections outside of their property.

Councilman Bothwell said that from the seven conditional use standards, Condition 2 states that the development shall be compatible with the topography of the site, and he didn't understand how a 40-foot retaining wall makes it compatible with the site. Ms. Bernstein said that it's subjective. She said it's compatible when you look at different sides of the project. For instance, the 40-foot retaining wall on the west side (which is a manufacturing operation) might be considered compatible. Across Stoner Road, there was a lot of conversation with the applicant about that, acknowledging that there are a lot of challenges with the site.

In response to Councilman Smith, Ms. Bernstein said that the applicant has dedicated 7% (22 units) for 10 years. When Councilman Smith asked how we will monitor the other price

points so we don't lose the Urban Place District intention, Ms. Bernstein said that the City has not worked through a secure procedure to monitor workforce units.

In response to Mayor Manheimer, City Traffic Engineer Jeff Moore said that a Traffic Impact Analysis (TIA) was performed. The study shows that there aren't any major things that need to be done in order to handle the traffic that will be produced by this development. There are a couple recommendations, for instance, a signal on Fairview Road and some turn lanes. It does address Stoner Road, the intersections with Stoner Road, and how the traffic will work there.

Councilman Bothwell read a report that suggested the accident rate on Fairview Road is 211% compared to the accident rate on similar roads. He wondered what that meant for the safety of Fairview Road. Mr. Moore responded that he prepared that report. He looked at similar roads that were N.C. Dept. of Transportation-type roads in the rural areas. Fairview Road, which is a City street, is different. He would not say that Fairview Road is a dangerous road, but that it's a busy road and there were crash patterns identified in the report. There seemed to be a crash pattern at the intersection of Glendale and Fairview. One solution out of the report was to move the signal head to the opposite side of the street (when you come around a curve). Another suggestion out of the report was to lower the speed limit.

In response to Councilman Bothwell, Mr. Moore said that this TIA includes the traffic from the recently approved project on Thompson Street.

In response to Vice-Mayor Hunt, Mr. Moore described the level of service on Fairview Road.

Councilman Pelly said that the November, 2013, report referenced by Councilman Bothwell, notes that there were 210 reported crashes over five years between Sweeten Creek and the Oakley Elementary School. He said that other recommendations made in the report included overgrown vegetation on the sidewalks, and the need for center-line and crosswalk stripping and wondered if those have been accomplished. Mr. Moore said that the City has a contract in place to do the stripping, but are waiting on some consistently warm weather. The vegetation has been trimmed back.

Councilman Pelly asked about what we can offer the community as far as improving their quality of life and the pedestrian experience in the future. Mr. Moore said that their goal in transportation is how can we improve that experience for everyone - safety for walkers, bikers and drivers. The lower speed limit and the 10-foot sidewalk will help create a visual friction. Instead of driving by an open field, there will be things happening next to the road and that tends to slow people down. They will look at from the three-pronged approach of engineering, enforcement and education.

In response to Councilman Pelly, Mr. Moore explained why speed humps on Fairview Road are not considered, which is due to the slow response time for emergency vehicles.

Mr. W. Louis Bissette, attorney representing the applicant, said that the applicant is a reputable builder throughout the southeast and they also have the Aventine Apartments at the end of Long Shoals Road. Those apartments are a quality asset for our community. We all recognize that something needs to be done to increase the inventory of housing - and not only one group of income. This project will add 309 units and also 5 live/work units. It also has almost 10,000 square feet of retail space. He said this project meets most of City Council's plans and objectives for a mixed-use, infill project. The project is within walking distance from three of our largest employers in Buncombe County - CarePartners, Mission Hospital, and A-B Tech. The developer is prepared to construct sidewalks on its property down Stoner Road and along Fairview Road. We heard from the community about their need for sidewalks and that is one reason why they are prepared to commit an additional $50,000 for the use of sidewalks, traffic

calming, etc. They have agreed to dedicate 22 units to affordable housing for 10 years. The projected rates for the remaining units (somewhere between 80-85%) are at workforce maximum or below. An agent of the developer has attempted to meet with two adjoining property owners about one year ago. He recent met with the protest petitioner's attorney and asked what their concerns were so they might be able to address them, but they did not do that. This project is infill development, mixed-use development and provides a wide range of affordable housing options. The developer has worked with the City for over one year and these plans have been revised 20 times in an effort to resolve the affordability, connectivity, topographical issues, and other issues that would benefit the Oakley community and the City. The property is now valued at $593,700. His client is prepared to invest approximately $25 Million into this project. Currently the total tax revenue going to both the City and County are $7,000. If this project continues, the annual taxes going to the City and County will be increased to approximately $294,000 per year. He acknowledged there are some topographical problems with the site and that is one of the reasons why we don't have the supply of housing that we need. But, overall, this project meets the types of things the City is trying to promote. He asked for Council's support of the project.

Mr. Will Buie, engineer representing the applicant, said that the site currently is vacant and Council approved a plan for that property back in 2007. That project truly didn't take in the topography of the site. He personally felt that might be the reason why that project did not move forward. He also believed that practically any project that occurs on that property will have to make use of the retaining walls, short of a single-family development. This project tries to meet some of Council's housing goals. There are topographic challenges with elevation changes, thus requiring retaining walls in order to develop a reasonable project. He explained their stormwater controls which will be in place and which will meet the City's stormwater standards. As he reads the TIA, the capacity of the road to move the vehicles through the intersections and along the road is more than acceptable. The levels of service are all in the "b" and "c" range. With the improvements they will make at the intersection they will continue to function in those levels of service. They heard a quality of life message from the community. That is why the developer stepped forward to commit to building sidewalks along Stoner Road and Fairview Road in addition to contributing $50,000 for improvements. They would like to see those improvements stay in the Oakley community. Regarding the sidewalk to be located on the lower end of Stoner Road will be in inside the railroad right-of-way which presents challenges. Because the River Mills Lofts Project also has a sidewalk that would located in the railroad right-of-way, he suggested that through the City they find some way that jointly they can approach the railroad for a single plan on how pedestrians along that path can safely cross the railroad and a plan that the City would support and hopefully that would bear some weight with the railroad.

In response to Councilman Davis, Mr. Buie provided additional information about the retaining walls, noting that they will have a number of reviews by engineers and the City.

Mayor Manheimer opened the public hearing at 7:01 p.m.

The following individuals spoke in opposition of the conditional zoning for Biltmore Apartments mainly due to the increased traffic in the neighborhood, the retaining walls and the lack of integration of the proposal into the area, along with other various reasons, some being, but are not limited to: public safety threats due to increased traffic; increased crime; potential transportation difficulties for emergency responders in the area given multiple train crossings; stormwater and floodplain impacts; aesthetic impacts of the planned multi-story apartment buildings and retaining wall in the midst of a community largely composed of single-family residences; changes to the landscape and overlooking Biltmore Village; increased congestion in Biltmore Village and impacts on tourism; failure to include significant affordable housing; parking concerns for residents on Stoner Road; failure to include significant retail space; interior of project is mostly made up of parking lots; property is almost entirely surrounded by retaining walls; affordable housing should be in perpetuity; project will detract from adjoining property values; retaining walls should be reduced in scale and terraced in shorter sections; buildings are too high and should be no more than a 2/3 story split; sidewalks will not solve the issues with too much

traffic on the roads; there is already existing water runoff; affordable units are not affordable to most of Asheville; project does not benefit the people in the Oakley community; Glendale/Fairview is a very dangerous intersection; no sidewalks going down Glendale; Fairview Road sidewalks are currently in disrepair; a new daycare at Fairview/Glendale will add additional traffic in the area; still waiting on solutions from November 2013 traffic report; project shows no regard for the zoning and master plan in place for the Oakley neighborhood; development does not meet the minimum standard of dedicated retail space to qualify as a mixed-use project under current zoning; developer disregards the historic uses of Stoner Road by residents, businesses and the historic church on that road; developer made no effort to include neighbors or community members in their planning process; existing traffic congestion on Thompson Street; additional traffic from recently approved River Mills Loft Apartments; Stoner Road is narrow with on-street parking; sidewalks from the project should be connected to Biltmore Village or Fairview Road; defer development until long term planning issues are fully resolved; resolve Fairview Road existing 211% injury crash rate and improve to acceptable standards before additional density into Oakley neighborhood; developers should be required to engage the broader surrounding community early in the process; implement a planning classification similar to the River Arts District; hire a City liaison specifically dedicated to citizen development concerns; allegation that the current zoning is not Urban Village thus making all the procedures and notices provided to date fatally flawed; the application does not meet the standards for Urban Place District; the project fails to comply with other Urban Place District standards, including, but not limited to, the entrance design requirements; the TIA is flawed in that it only addresses apartments and does not include the proposed retail uses; the TIA ignored the City Code requirement for an analysis of traffic safety/accident history; and the project does not comply with the Asheville City Development Plan 2025 and with the City Council Strategic Operating Plan Goals for 2014-15:

Mr. Jeff Hicks, resident on Fairview Road (also presented a petition entitled "Petition to Asheville City Council to Deny Fairview Rd. Mixed Use Project As Proposed) containing approximately 18 signatures)
Ms. Mary Carroll, area resident
A resident on Unaka Avenue
Mr. David Lynch, resident on Fairview Road,
Mr. Devin Walsh, Chair, Precinct 9.1, Buncombe County Democratic Party (also Presented a resolution entitled "Resolution of 9.1 Precinct Committee, Buncombe County Democratic Party to Oppose Flournoy-Biltmore Apartment Development in Oakley Neighborhood, Asheville, NC"
Ms. Dana Davis, Oakley resident
Mr. Nelson Ward, property owner on Stoner Road
Mr. Scott Campbell, Oakley resident
Minister Mike Carroll, Fairview Baptist Church
Mr. David Ankeney, resident on Fairview Road
Ms. Patsy Brison, attorney representing Pamela Tripp and David and Emily Ankeney (presented several documents with a cover letter dated January 27, 2015)

Mr. Bissette responded to various allegations outlined by Ms. Brison, noting that they have been proceeding based the City's zoning map and they have not gone back through the zoning history of the property. Since Ms. Brison just presented these allegations, he felt that he should have the opportunity to discuss them with City Attorney Currin, perhaps during a brief recess.

City Attorney Currin couldn't give unequivocal answers to all of the allegations raised by Ms. Brison; however, some of the allegations that are made have to do with an interpretation of the zoning ordinance, which is done by the Planning & Zoning staff. Ms. Bernstein and Interim Planning Director Alan Glines reviewed this particular zoning classification and made a determination under the conditional zoning ordinance that it was still under the previous zoning. She did not know what actions were taken between the time it was originally zoned and now. Planning staff did make that decision and generally that decision would be appealed to the Board

of Adjustment. She didn't think Council can conclude at this meeting that that zoning is not what it says on the map.

Interim Planning Director Alan Glines said that the Urban Village District is a straight rezoning - it doesn't expire after two years. It stays with the property. It's a general use.

City Attorney Currin said that Ms. Brison is referring to a conditional use zoning in the ordinance, which would revert back without getting vested rights. Mr. Glines said that the Urban Village District zoning is what is known as a general use district, so that reversion provision does not apply at all. With respect to other provisions in the Urban Place District, last month Council changed the conditional use zoning ordinance to say that the conditions could be more or less restrictive than the underlying zoning district. By attaching the site plan and adding the conditions there is no requirement that every single requirement of that underlying district be met. With respect to the TIA, she felt Council can consider that they don't think this TIA convinces them, but it is not a legal requirement that it contain any particular requirements. With respect to compliance with the Comprehensive Plan, that is a subjective determination and as long as Council has a statement that it does or does not comply, and describe that statement, that is not subject to judicial review.

Closed Session

At 8:13 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: City of Asheville v. Robert Frost. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3). This motion was seconded by Councilman Pelly and carried unanimously.

At 8:38 p.m., Councilman Bothwell moved to come out of closed session. This motion was seconded by Councilwoman Wisler and carried unanimously.

Continuation of Public Hearing

City Attorney Currin said that Mr. Glines has gone back through the ordinances and he feels confident that this is a general use rezoning. The way to challenge it would be an interpretation to the Board of Adjustment, and there is a very short statute of limitations for challenging zoning designations, which has run.

Mr. Bissette said that his client would like to be a good neighbor and has agreed amend Condition 13 to read "The property owner and/or applicant shall pay to the City of Asheville $200,000 on or before the date the first building permit is issued for the purpose of promoting connectivity from the property to Sweeten Creek Road and Biltmore Village and/or for traffic calming measures or pedestrian enhancements on or around Fairview Road and Stoner Road."

Mayor Manheimer closed the public hearing at 8:45 p.m.

Councilman Bothwell said reviewed the definition of the Urban Place District, and felt that it does not fit this plan. Therefore, he could not support the conditional zoning.

Councilman Pelly understood the need for housing in our community and acknowledged the genuine concerns of the retaining walls, additional traffic impact, and need for connectivity of the sidewalks. He urged staff to look for that sidewalk connectivity. Because we have a

commitment by the developer of $200,000 for traffic/pedestrian improvements, he could support the conditional zoning.

Councilman Smith saw both benefits and cons to this development, some benefits being dense infill, need for housing at all price points, enhancement of the tax base, and compliment of the River Mills Loft development, with some cons being tall buildings, high retaining walls, and multifamily backing up to single-family. Ultimately, after hearing the City's housing needs assessment, the City is in a housing crisis. He would support the project with the knowledge that we continue implementing other pieces of the Comprehensive Housing Affordability Strategy.

Vice-Mayor Hunt explained that the number of units that come into the market that satisfy rental demand will have a general subtle effect on rent rates across the community. It's important that we build density in the City. When projects don't occur in the City, development is forced out of town and it fragments the rural landscape and forest and farm land.

Councilman Pelly moved to approve the conditional zoning request for Biltmore Village Apartments on Fairview and Stoner Roads from Urban Village to Urban Place-CZ and find that the request is reasonable, in the public interest and is consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) the project proposes an active, pedestrian-accessible enhanced streetscape along Fairview Road, following the intent and purpose of the requested Urban Place zoning district; (2) the proposal is for a higher-density, mixed-use development in a location proximate to transit; (3) ten affordable rental units are included with the proposal. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Bothwell voting "no".

ORDINANCE BOOK NO. 29 - PAGE 335

B. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR THE CONSTRUCTION OF A 168-UNIT MULTI-FAMILY DEVELOPMENT ON PROPERTY LOCATED OFF OF TURTLE CREEK DRIVE

GRANTING OF A CONDITIONAL USE PERMIT FOR THE CONSTRUCTION OF A 168-UNIT MULTI-FAMILY DEVELOPMENT ON PROPERTY LOCATED OFF OF TURTLE CREEK DRIVE

Urban Planner Julia Fields said that this is the consideration of a conditional use permit for the construction of a 168-unit multi-family development on property located off of Turtle Creek Drive. This public hearing was advertised on January 16 and 23, 2015.

City Attorney Currin reviewed with Council the conditional use process, which is a quasi-judicial permit hearing. At this public hearing, all the testimony needs to be sworn and due process protections afforded to the applicant.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

Ms. Fields submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Fields said that the applicant is requesting approval of a Level III conditional use permit for the development of a 168-unit addition to the Hawthorne South apartment complex. This project is considered a Level III review pursuant to Section 7-5-9(a) of the UDO which outlines review for residential projects with more than 50 units. Level III projects are reviewed as Conditional Use Permits.

Using City Exhibit 4 (Hawthorne Apartments South Conceptual Layout), she explained that the site consists of an 11.9-acre parcel located along a private drive, Turtle Creek Drive, which is accessed from Hendersonville Road in South Asheville. The parcel is zoned Highway Business (HB) and is currently vacant. The parcel is bordered by the Norfolk-Southern Railroad to the east with property also zoned Highway Business; industrial/warehousing uses to the south on property zoned Industrial; retail and office uses to the west on property zoned Highway Business; and, existing Hawthorne South multi-family housing to the west and north on property zoned RM-16 (Residential Multi-Family High Density District). Dingle Creek runs along the southern border of the property as does an existing sewer line. A portion of the property is in a flood protected area.

The developer, Hawthorne-Midway Turtle Creek, LLC., proposes to build additional multi-family apartments on property adjacent to the existing Hawthorne South complex. The new development is comprised of a total of 168 units in seven buildings with clubhouse/pool amenities provided. The project density is approximately 14 units per acre. Plans propose a mix of one-bedroom (48 units), two-bedroom (84 units), and three-bedroom (36 units) dwellings. The buildings are designed as three-story structures with a maximum height (per the UDO) of 28 feet.

Access to the site is through the existing Hawthorne South development (previously Turtle Creek) via Turtle Creek Drive. The property is beside and immediately beyond the existing leasing office/clubhouse facility at Hawthorne South.

Twenty-four foot wide two way private drives provide access throughout the site and lead to the units and parking areas. A total of 314 parking spaces are provided including 14 accessible spaces disbursed throughout the site. Sixteen bicycle parking spaces are provided. Five-foot pedestrian pathways provide access throughout the development.

Landscaping required for the project includes buffering to the north and west, vehicular use area landscaping, building impact landscaping, and tree save area. All landscape calculations shown on the plans are compliant.

Fifteen percent of the total lot area is required to be dedicated as open space - 77,885 square feet. A total of 78,347 square feet of open space is provided.

No changed conditions have been requested.

This proposal was approved with conditions by the Technical Review Committee on December 1, 2014 and requires quasi-judicial review by the Asheville City Council and Final TRC review.

The Asheville Planning and Zoning Commission reviewed this proposal at a meeting on January 7, 2015. At this meeting the commission voted unanimously (7-0) to recommend approval of the conditional use permit to the Asheville City Council.

The site is currently zoned Highway Business (HB) and the applicant is proposing to meet the standards of that District with this development proposal.

Section 7-16-2(c) of the Unified Development Ordinance (UDO) states that Asheville City Council shall not approve the conditional use application and site plan unless and until it makes certain findings based on the evidence and the testimony received at the public hearing or otherwise appearing in the record of the case. The applicant has provided a statement on these findings.

Staff finds that the relevant standards of the City have been met or can be met with this application. The Asheville Planning and Zoning Commission voted unanimously to recommend approval of this conditional use permit to the Asheville City Council on January 7, 2015.

Mr. W. Louis Bissette, representing the owner Mr. Ed Harrington, asked that the applicant's application (Applicant Exhibit 1) and the Traffic Impact Analysis (Applicant Exhibit 2) be entered into the record. He said there is an existing project on Hendersonville Road containing 384 units, and of those existing units, 80% of them meet the affordable housing standards. This project is an addition to that existing project. This new project provides 168 units will not meet the affordable housing standards, but they are all 20% below the workforce housing standards. If you add the two projects together, 55% of the total units (552 units) will meet the affordable housing standards. The other 45% will be well within the workforce housing standards and close to 20% below the workforce housing maximum.

Using Applicant Exhibit 3 (Aerial Photo of Project Area), Mr. Chris Day with Civil Design Concepts, oriented the Council to the site and said that this will be an expansion of the multi-family community. The 168 units will be built in the northwest of the property so they can preserve the existing creek and about 20% of the site will remain undisturbed along the creek in the south portion of the site. The project meets all seven conditional use standards, noting they are not asking for any changed conditions. The size and layout of the site are compatible with the terrain and topography of the site.

In response to Councilman Smith about the price points for the 168 housing units, Mr. Day said the units fall between 88% of the AMI up to 112% of the AMI. Those numbers are $900-1,000 on the one-bedrooms; $1,100-1,200 on the two-bedrooms; and $1,300-1,400 on the three bedrooms.

Councilman Smith felt it would be helpful to have something at the lower end (80%) that we could be able to let people know who are not in the moderate-income bracket that they are important to us too. Mr. Day responded that any project is a balance. He felt that that with the current zoning they could have put in over 300 units on the site, however, they felt it would not be compatible with the site and we would have to max out the site to be able to bring in the density to lower the price points down. They felt what would be in the most harmonious of the area, the topography of the site, and the surrounding community would be the 168 proposed units at the price points proposed.

After hearing no questions about the procedure, Mayor Manheimer opened the public hearing at 9:11 p.m.

Councilman Smith said that $900 a month means affordability to someone making approximately $36,000 a year. Thirty-one percent of our service and hospitality workers are making less than $25,000 a year. The housing needs assessment showed that those making less than $15,000 make up about 20% of our population. Again, he looked forward to the City Council annual retreat and the re-committing that City Council is committed to implementing other pieces of the Comprehensive Housing Affordability Strategy.

Councilwoman Wisler moved to approve the conditional use permit for Hawthorne South located off of Turtle Creek Drive, subject to the site plan and elevations and conditions outlined in the Technical Review Committee report, because the proposal meets the seven conditional use permit standards as demonstrated by the applicant. This motion was seconded by Vice-Mayor Hunt and carried on a 6-1 vote, with Councilman Smith voting "no".

C. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR THE EXPANSION OF TUTCO FARNAM

RESOLUTION NO. 15-23 - RESOLUTION FOR AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR THE EXPANSION OF TUTCO FARNAM

Economic Development Specialist Brenda Mills said that this is the consideration of a resolution approving a $30,380 economic development incentive grant for Tutco Farnam. This public hearing was advertised on January 16, 2015.

Tutco Farnam is an existing manufacturing company located in South Asheville. The company produces a variety of air and surface heating units used in industrial applications. The company has been in Asheville for 30 years, starting in 1982. The company leases space and has outgrown the current building. The building owner has agreed to construct a new building addition and in return, the company will sign a new lease for the property. This has been accomplished with the dedication of the new expanded facility on October 10, 2014.

The company is planning a $2.5 Million expansion in its South Asheville campus and has requested consideration for a performance based incentive grant under the City of Asheville Economic Development policy. The company will retain 63 current employees and will create 50 new jobs within three years. The hourly wage of new employees will be $11.09 per hour these employees are provided comprehensive benefits by the company.

Tutco Farnam has requested consideration of a performance-based incentive grant under the City of Asheville Economic Development Incentive policy. The performance based grant for Tutco Farnam for this project is an amount not to exceed $30,380, to be paid in annual installments in an amount equal to 45% of ad valorem City property tax paid by the company in the prior calendar year, for a period of up to seven years; subject to compliance with an Economic Development Performance Agreement between the City and Tutco Farnam. Payments begin after the investment is made, taxes are paid and verified, and the company requests payment.

The City will fund the payments from the general fund. The grant supports the decision by Tutco Farnam to expand in Asheville with the support of the building owner to construct a new building addition and sign a new lease. The jobs created are in a niche market which provides the type of employment that is not common in our region and is a locally owned company.

The economic development incentive grant for Tutco Farnam supports the City Council's Strategic Operating Plan as it addresses multiple focus areas. Under the Job Growth and Community Development focus area, the project supports the Goal of creating more collaborative and effective working partnerships between the COA, the business community, and other key organizations to effectively manage the city's regulatory environment while accomplishing economic development goals by meeting the objective to support diversified job growth and small business development. It supports the goal of supporting a strong local economy by continuing to implement sustainable growth and development policies by promoting sustainable, high density infill development that makes efficient use of existing resources.

Pros:

- Performance driven grant that is distributed after job and investment is achieved;
- Supports job creation and capital investment in existing industry in Asheville;
- Supports development of an identified economic cluster in the City; and,
- Supports regional and state cooperation in the project.

Con:

- Grant is formulated based on use of 45% of value of property tax revenue for a 7 year period.

The project has an overall positive fiscal impact on tax revenues received by the city. Initially (during the grant period), the City will receive approximately 55% of the new incremental property tax revenues from the project. After 7 years, the City will henceforth receive 100% capture of new city taxes.

City staff recommends Council approve a resolution authorizing an economic development incentive grant for Tutco Farnam not to exceed $30,380.

Mayor Manheimer opened the public hearing at 9:16 p.m., and when no one spoke, she closed the public hearing at 9:16 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 15-23. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 26

D. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR THE HIGHLAND BREWING EXPANSION PROJECT

RESOLUTION NO. 15-24 - RESOLUTION FOR AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR THE HIGHLAND BREWING EXPANSION PROJECT

Economic Development Specialist Brenda Mills said that this is the consideration of a resolution approving a $60,000 economic development incentive grant for Highland Brewing. This public hearing was advertised on January 16, 2015.

Highland Brewing, a pioneer in the Asheville craft brewery industry is considering expansion. Highland Brewing began in Asheville 20 years ago. Today it is considered one of the region's premier breweries. Demand for Highland product continues to grow and the company, with second generation leadership is considering expansion in the City. Total grant eligible investment is $5,000,000. Capital investment in M/E etc. will be at least $3.8 Million, and improvements to existing real property/real estate will be at least $1.2 Million. Additionally the company will create 15 new jobs over a period of 3 years with average annual wage rate of $42,016. These jobs would offer comprehensive benefits to employees.

Highland Brewing has requested consideration of a performance-based incentive grant under the City of Asheville Economic Development Incentive policy. The performance based grant for Highland brewing for this project is an amount not to exceed $60,000. The grant would be subject to a performance agreement with the City, and would be paid in five annual installments, $12,000 a year, after the conditions of the performance agreement are met and the annual property taxes are paid by the company and verified by the City that company has made the required investment and that investment goes on the tax rolls. The amount of the annual payment will take into consideration the estimated annual ad valorem property tax revenue attributable to the capital improvements. Any amounts paid to Highland Brewing pursuant to the Agreement are subject to adjustment or recapture if the terms and conditions of the Agreement as to investment and job creation are not fulfilled.

The City will fund the payments from the general fund. The purpose of the proposed cash grant is to encourage Highland Brewing to proceed with its proposed expansion. Staff believes that the project will further the economic interests of the area served by the City in several ways, including, but not limited to: (a) creating new jobs having a wage at or above the median average wage for Buncombe County; (b) enhancing the City's tax base and the City's tax revenues; and (c) encouraging the retention and expansion of an industrial operation in an existing facility and in a jobs growth cluster.

Pros:

- Performance driven grant that is distributed after job and investment is achieved;
- Supports job creation and capital investment in manufacturing in Asheville;

- Supports retention and expansion of existing industry in the City;
- Supports development of an identified economic cluster in the city; and,
- Supports regional and state cooperation in the project.

Cons:

- The project has a positive fiscal impact to the City; however the Grant is formulated based on use of approximately 50% of the value of new incremental tax revenue for a five year period.

The project has a positive fiscal impact on tax revenues received by the City. The company indicates there may be potential for additional expansion. The project creates generation of local and state taxes from job creation. Initially (during the grant period), the City will receive approximately 50% of the new incremental real estate and M/E tax revenues from the project. After the grant period concludes as noted above, the City will henceforth capture 100% of the new taxes.

City staff recommends Council approve the resolution authorizing an economic development incentive grant for Highland Brewing not to exceed $60,000.

Mayor Manheimer opened the public hearing at 9:18 p.m.

Ms. Leah Long-Ashburn, President of Highland Brewing, appreciated City Council's support. They have already begun the expansion and they have now hired up to 49 employees full-time.

Mayor Manheimer closed the public hearing at 9:19 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Wisler moved for the adoption of Resolution No. 15-24. This motion was seconded by Vice-Mayor Hunt and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 27

E. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO WHITE LABS (FORMERLY PROJECT LAB)

RESOLUTION NO. 15-25 - RESOLUTION FOR AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO WHITE LABS (FORMERLY PROJECT LAB)

Economic Development Specialist Brenda Mills said that this is the consideration of a resolution approving an economic development incentive grant for White Labs. This public hearing was advertised on January 16, 2015.

White Labs Inc., a world leader in fermentation sciences for the brewing and winemaking industries, is proposing a new Asheville facility that will provide analytical laboratory services and product related training for industry professionals as well as serve as the base for sales and marketing for the eastern U.S. and global markets. White Labs' fresh yeast and related products, which are a vital link in the worldwide supply chain of the brewing industry, will be manufactured on-site for breweries, wineries and distilleries. The company has been recognized for its pioneering scientific studies on improving strains of yeast at a molecular level. The company is proposing new, taxable, capital investment of $8.1 Million for machinery and equipment and

facility improvements at the project site on S. Charlotte Street in downtown Asheville. The project also includes the creation of 65 new jobs with an average annual wage of $35,818.

The City of Asheville is considering offering a lease of property to White Labs for up to five years at $1/year. White Labs will pay taxes on improved property during the lease period. White Labs will have an option to purchase the improved property, for economic development purposes, at 80% of Fair Market Value (FMV), land only, for approximately $1,600,000 at or before the end of the five year period. Should White Labs choose not to exercise the option to purchase, the city will continue to lease the property to White Labs for an additional period of up to five (5) years at the fair market value rental rate. In addition, White Labs will be granted an exclusive option to purchase the adjacent 1.67 acre city owned parcel within the first year of the initial lease term for 80% of FMV (land only) **if** additional improvements and jobs are committed to by White Labs, or for FMV if no additional economic benefits are committed. White Labs shall have the right to renew this option for one (1) additional year for a non-refundable fee of ten thousand dollars ($10,000.00). If White Labs does not exercise its option to purchase the adjacent lot at the end of the second year, the City shall be free to market the property, subject only to a 30 day right of first refusal granted to White Labs during the remainder of the initial lease term.

The lease and purchase would be subject to a performance agreement with the City, and would be governed through the conditions of the lease, economic development performance agreement and option(s) to purchase.

Pros:

- Creates technology driven private sector use for Charlotte Street Corridor;
- Supports job creation and capital investment in Asheville;
- Activates an underperforming asset and places city owned property on the tax rolls;
- Supports development of an identified economic cluster in the City; and
- Supports regional and state cooperation in the project.

Cons:

- During the five year lease period, the city will lease the property below FMV, however, the property is currently providing no income to the City.

The project has an immediate overall positive fiscal impact on tax revenues received by the City since the property improvements made by White Labs will be valued at over $8.1 million dollars. Additionally, if White Labs exercises its option to purchase the property, the city will receive approximately $1,600,000 at the end of the lease. No cash payments will be provided by the City. The City will begin accruing M/E tax payments in year one estimated at $6200. After five years, the City will henceforth receive 100% capture of new city taxes for all investment valued at $8,100,000.

The economic development incentive grant for this project supports the City Council's Strategic Operating Plan as it addresses multiple focus areas. Under the Job Growth and Community Development focus area, the project supports the Goal of creating more collaborative and effective working partnerships between the COA, the business community, and other key organizations to effectively manage the city's regulatory environment while accomplishing economic development goals by meeting the objective to support diversified job growth and small business development. It supports the goal of supporting a strong local economy by continuing to implement sustainable growth and development policies by promoting sustainable, high density infill development that makes efficient use of existing resources.

City staff recommends Council approve a resolution authorizing an economic development performance agreement, lease, and option(s) to purchase between the City and White Labs.

Mayor Manheimer opened the public hearing at 9:24 p.m.

Ms. Lisa White, Vice-President of White Labs, thanked the City, County, Economic Development Coalition, and others, for helping them select Asheville as their new east coast facility. They will hopefully start ground breaking on March 1 and anticipate Phase I to be completed by August or September. They will begin hiring employees in July and August. They look forward to being a part of this community.

Mayor Manheimer closed the public hearing at 9:26 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 15-25. This motion was seconded by Councilwoman Wisler and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 28

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 15-26 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGRICULTURAL LEASE WITH BALSAM GARDENS, LLC, ON A PORTION OF CITY-OWNED REAL PROPERTY OFF OF HARDESTY LANE AT AZALEA PARK

Mayor Manheimer said that this item was considered on January 13, 2015, and continued until this date in order to allow staff to work with Balsam Gardens to see if they would be interested in a one-year lease.

The consideration of a potential agricultural lease with Balsam Gardens, LLC, a locally based certified organic farm, for 11 +/- acres of land for commercial agricultural production at Azalea Park.

Prior to the City's acquisition of the Azalea Park, the land was used as an agricultural farm. The former farmland has been converted to a state-of the-art soccer and park facility, however there is still potential for unused lands within the park to be utilized in farm production. For the past six years New Sprout Farms, LLC has leased 11+/- acres of Azalea Park for certified organic vegetable, fruit and hay production. This 11 +/- acre plot is located to the rear of Azalea Park, adjacent to the City's beneficial fill site and the leased site for Danny's Dumpster compost operation. At this time, New Sprout has moved to a permanent location in Buncombe County and the city property is available for a new agriculture lease. Balsam Gardens, LLC has expressed interest in leasing the property and has demonstrated the capacity and wherewithal to be a reliable tenant. Balsam Gardens intends to utilize the property for certified organic fruit and vegetable production for the local market.

Balsam Gardens has offered to enter into a three-year lease with option to renew for one additional three year term at a rent of $3,300 per year, with an annual escalation of 3%. The rental rate was generated through input provided by the NC Cooperative Extension Service, and the WNC LandLink program, a service that connects emerging farmers to vacant agriculture lands.

Balsam Gardens sells to wholesale markets, local grocers, area restaurants and in local farmers markets, therefore no retail or U-pick operations would exist on the City Park property. The proposed lease will respect all stream buffers, conservation easements, wetlands and proposed greenway paths that exist at Azalea Park. Balsam Gardens will maintain all necessary liability insurance for the property as well as limit access to authorized personnel and

representatives of Balsam Gardens. Only USDA organically certified fertilizers, pesticides and herbicides will be permitted at the property. The proposed agricultural use will have no impact on the recreational use of the Azalea Park or the soccer facility.

Pros:

- Supports Food Action Plan.
- Continues a successful use of city property with a new tenant.

Con:

- There is no negative impact.

The fiscal impact is $3,300 per year beginning in January 2015, with 3% annual escalations thereafter.

The Community and Economic Development staff recommends adoption of this resolution.

Mayor Manheimer said that members of Council have been furnished with a copy of the resolution and it would not be read.

A representative of Balsam Gardens was pleased to be working with the Food Policy Council.

Councilman Bothwell moved for the adoption of Resolution No. 15-26. This motion was seconded by Councilwoman Wisler and carried unanimously.

RESOLUTION BOOK NO. 37 - 29

VI. NEW BUSINESS:

A. BOARDS AND COMMISSIONS

RESOLUTION NO. 15-27 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

Vice-Mayor Hunt said that the terms of Rachael Tanksley-Russell and Mike Hahn, as members on the Asheville-Buncombe Community Relations Council, expired on December 31, 2014. In addition, there currently exists a vacancy until December 31, 2016, left by Fyffe Aschenbrenner.

The following individuals have applied for vacancies on the Community Relations Council: Kate Sampson, Sandra Houts, Roberto L. Hess, Dana Blake, Kelly Denson and Ben Scales.

On January 13, 2014, there was a motion and second to reappoint Rachael Tanksley-Russell and Mike Hahn, and interview Sandra Houts and Kelly Denson. Ms. Denson was unable to attend the interview, however, make individual contact with Council members.

After Council spoke highly of both candidates, Sandra Houts received 2 votes and Kelly Denson received 5 votes. Therefore, Councilman Smith moved to (1) reappoint Rachael Tanksley-Russell and Mike Hahn to each serve an additional three-year term respectfully, terms to expire December 31, 2017, or until their successors have been appointed; and (2) to appoint Kelly Denson to serve the unexpired term of Ms. Aschenbrenner, term to expire December 31, 2016, or until their successor is appointed. This motion was seconded by Councilwoman Wisler and carried on a 5-2 vote with Mayor Manheimer and Councilman Pelly voting "no".

RESOLUTION BOOK NO. 37 – PAGE 30

RESOLUTION NO. 15-28 - RESOLUTION APPOINTING A MEMBER TO THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT

Vice-Mayor Hunt said that the term of Matthew Raker, as a member on the Sustainable Advisory Committee on Energy & the Environment expired on December 31, 2014.

The following individuals have applied for a vacancy on the Sustainable Advisory Committee on Energy & the Environment: Katie Bray, Philip H. Pritchard, Julie Loveless, Jackson Tierney, John Noor, Jeremiah Mattysse, Erin Singer McCombs, Hanna Furgiuele, Grant Millin, Sam McLamb and Geoffrey Habron.

On January 13, City Council reappointed Lael Gray and appointed Katie Bray, and directed the City Clerk to arrange interviews for John Noor and Erin Singer McCombs.

After Council spoke highly of both candidates, John Noor received 6 votes and Erin Singer McCombs received 1 vote. Therefore, Councilwoman Wisler moved to appoint John Noor as a member to the Sustainable Advisory Committee on Energy & the Environment to serve a three-year term, term to expire December 31, 2017, or until his successor is appointed. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Bothwell voting "no".

RESOLUTION BOOK NO. 37 - PAGE 31

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Jonathan Robert spoke to Council about living wages to all City employees.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 9:37 p.m.

Magdalen Bunderson
CITY CLERK

MAYOR

Friday – January 30, 2015 - 9:00 a.m.
U.S. Cellular Center - Banquet Hall

Retreat

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; Interim City Attorney Martha Walker-McGlohon; and City Clerk Magdalen Burleson

Absent: None

Mayor Manheimer convened the meeting and introduced Ms. Laura Cohn, who would be facilitating the retreat.

Each Council member shared what they felt were some accomplishments and/or moments of pride that stood out for them when looking back at 2014, what their top 2-3 priorities are for 2015, and why those priorities are important to them.

City Manager Jackson, Executive Director of Planning and Multimodal Transportation Cathy Hall and Chief Financial Officer Barbara Whitehorn highlighted the 2014 accomplishments, the Strategic Operating Plan and Two-Year Work Plan, and financial concept in looking ahead.

City Council then invited the public to join them in the following three breakout sessions to discuss the 2015-16 Strategic Operating Plan: Economic Growth & Sustainability; Affordability & Economic Mobility; and High Quality of Life. Following the breakout sessions, facilitators presented a high level review from each breakout group.

City Council then discussed their priorities and goals for 2015-16, as follows:

Councilman Pelly - include pedestrian safety when we look to make Asheville one of the safest cities; make crosswalks safer on some state highways that run through the city; begin addressing the backlog of needed sidewalk linkages across the City; request the City commit to five miles of new sidewalks annually including $500,000 a year towards neighborhood sidewalks; and research bidding out leaf pick-up services rather than doing it in-house.

Councilman Davis - work closely with the Metropolitan Planning Organization on a regional basis for I-26 and to obtain connectivity on greenways, etc.; strongly pursue N.C. Dept. of Transportation funding for the River Arts District; work with Green Opportunities; double the CAYLA Program; update the Kimley-Horn Report on parking to see what the downtown parking needs are; review of the downtown street cleaning contract and continually assess or needs in keeping downtown clean; continue keeping public safety a high priority in the downtown which includes having the Police Department well staffed and visible; some areas in downtown are not adequately lit; need for new Christmas decorations as current ones are faded; request for fireworks at First Night of Asheville; and renovation of the Thomas Wolfe Auditorium.

Vice-Mayor Hunt - review of Council's goals for for infill density and how development relates to affordability and quality of life in neighborhoods; update the 2025 Comprehensive Plan; update the Unified Development Ordinance; dialogue with the community about the Asheville Police Department Strategic Plan; connection with boards/commissions and other advocacy groups; engage in the planning process for the Comprehensive Stormwater Plan; research a Pay as You Throw solid waste program to increase recyclables and move toward composting; continue improvement with partnering with Buncombe County; and continue to work with the Housing Authority for the revitalization of Lee Walker Heights.

Councilman Bothwell - need for mandatory review and mandatory compliance for architectural review of not only downtown and River Arts District projects, but projects throughout the City; review definition of Urban Place District; continue to fix pockets of mis-zoned areas; dissolve conditional zonings; need for Planning & Zoning Commission to do more planning and less review; need to increase parking fees downtown; research Pay as You Throw Program to reduce our waste streams; advocate for free-graffiti walls or some type of program where the walls are painted over after a certain period of time; and ban Styrofoam cups and containers and packing peanuts.

Councilman Smith - consciously plan for the land use and growth; complete the economic development incentive review and research minority business development; support a living wage for all City employees; looking forward to seeing how we act on the Classification and Compensation Study with our limited resources; support Green Opportunities; explore municipal broadband and what it would take to have it for our public housing residents; look for solutions to solve the affordable housing crisis, e.g., alternatives for gentrification, review of our accessory structure rules, institute tiny home regulations, move forward with land-banking, look at artist/live work spaces; increase Affordable Housing Trust Fund by $100,000 a year; work with the Housing Authority on the revitalization of Lee Walker Heights; move forward the River Arts District Transportation Improvement Program (RADTIP); work with the N.C. Dept. of Transportation on the I-26 Project; recommit to the Food Action Plan and work towards a Food Action Plan - Phase 2; update the Unified Development Ordinance and the 2025 Comprehensive Plan; review our stormwater infrastructure; review the Haywood Road Traffic Study; review downtown parking and attempt to work with surface property owners downtown to provide additional parking; be an accessible government with more portals for the people to interact, offer input and provide data to Council; and move towards open data.

Councilwoman Wisler - revisit the Unified Development Ordinance; update the 2025 Comprehensive Plan; tie the Multimodal Transportation Plan in with the land use policies; transparent Police Chief search process with community input; implementation of the Police Department Strategic Plan; review the Civil Service Board process; focus on pedestrian safety; work with the region on transit issues; focus on the goals outlined by the Sustainable Advisory Committee on Energy & the Environment; review of Parks & Recreation and other city-owned facilities (like the US Cellular Center) and come up with a strategic plan on what we want to spend on these facilities and if there is no future plan for growth and investment, what our exit strategy would be; Council to focus better on what they ask City staff to work on; and continue to focus on community engagement by better reach out and communication with them.

Mayor Manheimer - collaboration, community engagement and partnership with stakeholders, citizens, other cities and counties; and revitalization of Lee Walker Heights and other public housing projects.

Using the discussion by Council, along with the information from the breakout sessions, City Council discussed the priorities and goals for 2015, with the purpose of reviewing and updating the Strategic Operating Plan.

It was the consensus of Council to have City staff wordsmith their priorities and goals and provide them to the Governance Committee for review and finalization at a formal meeting for adoption within six weeks.

Director of Communication and Public Engagement Dawa Hitch provided Council an update on communication, which included a new City News Site, the State of the City production; additional resources; website improvements which also include an open government page, and communication campaigns; more opportunity for live streaming and videos; over 10,000 followers on Twitter; and a diverse portfolio.

At 3:15 p.m., Mayor Manheimer adjourned the meeting and announced that City Council will gather for dinner later that evening.

Magdalen Bourleson
City Clerk

Esther Manheimer
Mayor

Tuesday – February 10, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING FEBRUARY, 2015, AS "SEEING 'SELMA' MONTH" IN THE CITY OF ASHEVILLE

Councilwoman Wisler read the proclamation proclaiming February, 2015, as "Seeing 'Selma' Month" in the City of Asheville. She presented the proclamation to Ms. Carol Hallstrom, Mr. DeWayne Barton, Mr. Isaac Coleman, Ms. Tiffany DeBellott, Mr. Anthoni Clegg, and Asheville High School student Brittany Boseman, who said this is an important effort to provide opportunities for youth of our community to view the historical film "Selma".

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON JANUARY 27, 2015; AND THE ANNUAL RETREAT HELD ON JANUARY 30, 2015

B. RESOLUTION NO. 15-29 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A GRANT FROM THE N.C. DEPT. OF INSURANCE, OFFICE OF THE STATE FIRE MARSHAL, FOR SMOKE ALARMS WITH THE PURPOSE OF PROVIDING FREE SMOKE ALARMS TO THE CITIZENS OF ASHEVILLE

Summary: The consideration of a resolution authorizing the City Manager to accept a grant from the N.C. Dept. of Insurance, Office of the State Fire Marshal for smoke alarms with the purpose of providing free smoke alarms to the citizens of Asheville.

The N.C. Dept. of Insurance (NCDOI), Office of the State Fire Marshal (OSFM) has offered the City of Asheville 2015 Home Safety Grant. This non-matching grant includes smoke alarms, carbon monoxide alarms, hearing impaired smoke alarms, educational materials, and installation supplies valued at $10,180.

Nearly 3 out of 5 home fire deaths occur in homes without a working smoke detector. This grant will increase the number of households in Asheville with smoke and carbon monoxide alarms. As part of the program, the Asheville Fire Department in partnership with WNC Safe Kids will identify and visit neighborhoods, install the free smoke and carbon monoxide alarms, and deliver home safety education to the recipients.

This grant has been reviewed by the Public Safety Committee on January 26, 2015, and has been recommended for consideration by Council.

Pros:

- This grant will increase the number of households in Asheville with working smoke and carbon monoxide alarms resulting in a safer community. This program enhances the partnership between the City of Asheville, WNC Safekids and the NC OSFM.

Cons:

- None

There is no fiscal impact for this nonmatching grant. The smoke alarms, along with the education provided while installing the smoke alarms, will not have an impact on the Asheville Fire Department's operating budget. On duty firefighters will be used to provide the staffing needed for installing the smoke detectors, in conjunction with WNC Safe Kids volunteers.

City staff recommends that City Council support the adoption of a resolution authorizing the City Manager to accept a grant from the N.C. Dept. of Insurance, Office of the State Fire Marshal, for smoke alarms and associated fire safety materials.

RESOLUTION BOOK NO. 37 - PAGE 32

C. RESOLUTION NO. 15-30 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A GRANT AGREEMENT WITH BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY FOR $1.8 MILLION IN TOURISM PRODUCT DEVELOPMENT FUNDS

Summary: The consideration of a resolution authorizing the City Manager to sign a grant agreement with Buncombe County Tourism Development Authority (BCTDA) for $1.8 Million in Tourism Product Development Funds.

The purpose of the Tourism Product Development Fund (TPDF) Grant is to provide funding assistance for construction projects that will create new and additional lodging room nights in Buncombe County. In August 2014, Council approved a TPDF application for $3 million in grant funds to help construct $13 million worth of Riverfront Destination Development projects. The Buncombe County TDA announced an award of $1.8 Million to the City of Asheville in late October 2014.

Because the City did not receive full funding, the scope of the Riverfront Destination Development Project was reduced. She provided a comparison of the original project scope and current TPDF project scope, developed after careful consideration by the Riverfront Office team, which includes Finance staff. The reduction in TPDF project scope does not necessarily mean that the City will not construct the remaining projects; it means that 2014 TPDF funds will not be used to leverage existing or future funds for those projects.

The grant agreement outlines the required construction start and end dates, the construction cost reimbursement schedule, annual reporting requirements, and other legal requirements.

The Asheville Area Riverfront Redevelopment Commission reviewed this item at their August 14, 2014, meeting. The Commission voted unanimously to (1) authorize Chairperson Pattiy Torno to write a letter of support for the City's application; and (2) to advise City Council that the AARRC strongly supports the City's proposed application, and that if a grant is awarded, that the AARRC strongly recommend City Council accept the funds as part of a fiscally sustainable strategy for the implementation of the riverfront portions of the City's 5 year Capital Improvement Plan.

The City Council Planning & Economic Development Committee received an update from the Riverfront Office at their January meeting. The Committee affirmed the placement of this consideration on Council's February 10, 2015, agenda.

Pros:

- City Council has identified implementation of riverfront redevelopment capital investments as a key strategic goal for the city though the creation of Innovation District designation for the greater River Arts District; $1.8 Million of TPDF is a significant funding opportunity that allows the City to leverage and move forward on these investments.

Cons:

- The grant is a reimbursement grant, which means that for cash flow purposes the City will need to allocate its own capital dollars first and structure its financings to cover these cash needs.

Funding from grants and partnerships is a key component of the City's multi-year Capital Improvement Program (CIP). This $1.8 million grant will be used to provide funding for a number of projects in the CIP. Staff is currently updating cost estimates, and cash flow projections for the CIP and will present those updates as part of the upcoming FY 2015-16 budget process.

City staff recommends City Council authorize the City Manager to sign the grant agreement with BCTDA.

RESOLUTION BOOK NO. 37 - PAGE 33

D. RESOLUTION NO. 15-31 - RESOLUTION AUTHORIZING 2014-15 HOUSING TRUST FUND LOANS TO BIOTAT, LLC (OAK HILL COMMONS) AND BEAUCATCHER COMMONS, LLC (255 HAZEL MILL ROAD)

Summary: The consideration of a resolution authorizing 2014-15 Housing Trust Fund loans to Biotat, LLC (Oak Hill Commons) and Beaucatcher Commons, LLC (255 Hazel Mill Road).

Two (2) applications for 2014-15 Housing Trust Fund financing were received. The total amount requested is $320,000. The projected Fiscal Year 2014-15 balance in the Trust Fund available for new projects is $205,187, based on a conservative estimate of funds available. This amount could be increased this fiscal year should property acquired with Housing Trust Funds be sold. The applications were presented to the Housing and Community Development Committee (HCD) on January 19, 2015. After review and discussion, the HCD Committee recommended loan funding for the two applications:

1) Biotat, LLC. for the construction of 24 units of rental housing for the hard-to-house at 29 Oak Hill Drive in West Asheville, with a total loan amount of $200,000. This project has an existing approved 2014 commitment of $58,106, so the additional loan funds requested are $141,894; and
2) Beaucatcher Commons, LLC for the construction of twelve (12) rental units on what is currently one parcel located at 255 Hazel Mill Road, $120,000.

Oak Hill Commons – Biotat, LLC ($200,000)

Biotat, LLC, requests additional Housing Trust Funds for a proposed 24-unit affordable housing development project specifically targeting the hard to house, as part of a total 72 unit rental development. The project is proposed to occupy a portion of a vacant 3.71-acre site in West Asheville located off of New Leicester Highway, near the intersection of Patton Avenue. The property is zoned RM16, which would allow a total of 64 units; the developer will begin the

process for zoning approval for the increased density this month. The project will require Level 3 review. The developer owns the site.

The original approved amount was $58,106. The developer seeks an additional $141,894, for a total Housing Trust Fund loan of $200,000. The project was also conditionally awarded $100,000 of federal HOME funds. The developer proposes to relinquish that commitment of HOME funds if the Housing Trust Fund loan is approved.

The developer is seeking a total of $200,000 in HTF funding, with a 0% interest rate and no principal payment, for a term of 30 years. With a proposed rent structure at the Voucher Payment Standard of $723/month , the project is not eligible for special terms (for households earning less than 60% AMI) under HTF Policy Guidelines, although it is eligible for a 2.5%, 30 year term. Those special terms (with a one-bedroom rent limit of $548/month) are limited to either (1) a 0% interest amortized loan with a 20-year term, or (2) a 2% interest-only loan with deferred principal payments with a 20-year term. To meet the developer's request, a policy waiver would be required. The developer also intends to apply for a Land Use Incentive Grant.

Twenty-four (24) one-bedroom rental units are proposed. The units will be part of a single structure complex that will also include an office, security area, and common areas for communal area, and exam / treatment space. The intended occupants for the rental units are the hard to house, typically described as individuals who are homeless and have failed to successfully adapt to more traditional affordable housing placements. The intent of Oak Hill Commons is to provide a small permanent housing unit and the support services needed for the occupants to successfully maintain their residency. Homeward Bound will manage the tenant selection and services process. Buncombe County has committed $325,000 of capital to the project, as well as making a contribution to operations. Security will be provided from 3 PM to 9 AM, 365 days a year.

The total development cost is projected at $2,390,261. The developer has indicated that all 24 of the units will be reserved for tenants earning at or below 50% AMI. The project proposal meets the Housing Trust Fund's stated priority in that 100% of the units will be one-bedroom units. The proposed development is located within 1/4 mile of a transit line. Four of the units will be ADA accessible, and another 12 units will have partial accessibility as defined by HTF application criteria. All units will achieve Energy Star certification.

The requested per-unit subsidy is $8,333. The HTF loan request represents 8% of the total development cost. The average per-unit development cost (including the cost of common space) is $99,594. The project cost per square foot is $160.00.

Pros:

- Low per-unit HTF subsidy requested
- Development site within ¼ mile of jobs, services, groceries, and transit.
- Energy efficient with some ADA accessible and partially accessible units.
- Development strategy is innovative and has been used successfully in other communities.
- Creation of partnerships to provide assistance through existing service providers is intended to reduce costs that are already being paid by the community (i.e. – emergency services, police, etc.)
- Buncombe County commitment is firm.
- Staff thinks this project is better suited to the Housing Trust Fund than HOME.

Cons:

- The project will need Project-Based Vouchers in order to meet its financial targets;
- Ongoing grant funds will likely be necessary to support costs such as security;

- The developer pledges 10 years of affordability, based upon the expected life of housing vouchers.

255 Hazel Mill Road – Beaucatcher Commons, LLC ($120,000)

Mr. Kirk Booth, principal owner of Beaucatcher Commons, LLC has proposed a 12-unit rental development on a parcel located on Hazel Mill Road. The total project development cost as presented by the developer is $1,055,000. The proposed units will be infill development in an established neighborhood with water and sewer access available. The development parcel is currently zoned RM8. Each of the six newly developed lots will contain a three-bedroom single family rental home with a one-bedroom accessory apartment over a rear garage. The single family homes will be rented at 80% AMI ($961/month) and the accessory units at 60% AMI ($489/month). The owner will provide no utilities except trash pick-up. These rents are the maximum qualifying rents for affordable units and special terms units as proposed.

The applicant has the parcel under contract. The total acreage of the site is .73 acre. The proforma indicates a $100,000 equity investment. Mr. Booth and any other partners of Beaucatcher Commons, LLC will be required to execute personal guarantees covering the HTF debt.

The developer is seeking $120,000, with 50% of the note ($60,000) due as an amortizing loan over 30 years at 3.0% interest. In recognition of the 6 accessory units serving populations at or below 60% AMI, the developer is requesting that the remaining 50% of the note ($60,000) be financed as interest-only at 2.00% annual interest with principal deferred for 20 years. A similar loan structure has been approved for other Housing Trust Fund developments, including the two most recent project of Beaucatcher Commons, LLC.

The project proposal meets the funds' stated priorities in that 50% of the units will be one-bedroom floor plans. The current committed financing is pledged equity of $100,000 and a Buncombe County loan of $25,000 to the project. The developer has provided a letter of intent from a local lender to provide construction financing. No TRC or P&Z review is required (the garage apartments qualify as accessory apartments). The developer anticipates that the units could be completed and occupied by October 2015.

The proposed loan request represents 11% of the total development costs as submitted by the applicant. The average per-unit development cost for the three-BR units is $88,000; for the one BR-units, $45,000, and for the garages underneath, $27,000. The proposed development lots are located within 1/4 mile of a transit line. None of the units will be ADA accessible. The project will not be Energy Star certified but does incorporate many of the efficiency elements. The developer will actively market the project to homeless service providers, as well as the Housing Choice Voucher holders at the Asheville Housing Authority.

The twelve garages show a monthly rental income of $65 per month for each garage. The garage rental is optional for the house or apartment occupants; therefore the garage income is not included as part of the maximum rents for the project.

The developer has offered a $3,500 contribution to the City's sidewalk fund for that area, in return for a .25 percent reduction in the interest rate for the six 80% affordable units.

Pros:

- Infill development supports strategic planning goals.
- The developer has completed other local projects in a timely manner.
- Development site within ¼ mile of jobs, services, groceries, and transit.
- Developer is pledging affordability for 30 years for all units.

Cons:

- Questions of design quality have been raised by neighbors regarding one of the developer's recent projects. The developer appears to have addressed this in this project.

The current projected year-end balance (as of July 31, 2015) in the Housing Trust Fund is $205,187. The total of the loans recommended by the HCD Committee is $320,000. Two properties in foreclosure were purchased by the City using Housing Trust Funds, and both will be sold. Staff conservatively projects sale in FY 2016. The HCD Committee had recommended that $50,000 of unassigned fund balance be made available, if necessary, to allow the developers sufficient cash in this fiscal year for project construction. City staff recommends closely monitoring the Housing Trust Fund cash flow and deferring action on potential funding shortfalls until the necessity for corrective action is confirmed and all financial management options have been fully evaluated.

The Housing and Community Development Committee recommends approval of a resolution authorizing the following loans subject to the developers meeting all program requirements for loan closing: (a) Biotat, LLC, Oak Hill Commons: amend existing loan commitment of $58,106 with an additional $141,894, for a total loan of $200,000 at 0% interest rate and no principal payment, for a term of 30 years; and (b) Beaucatcher Commons, LLC: $60,000 at 2.75% interest, fully amortizing loan for a term of 30 years, with the developer making a cash contribution of $3,500 to the City at the time of closing; $60,000, interest-only at 2.00% annual interest with principal deferred for 20 years.

Mr. Staudinger responded to several questions raised by Council, some being, but are not limited to: why is the loan at 0% interest when the Housing Trust Fund has a policy of no 0% interest rates; what type of on-premise supervision and supportive services will be provided to the hard to house tenants; what provisions do we have in place if the Oak Hill Commons hard to house project doesn't survive in perpetuity; which position will the Housing Trust Fund be if payback is not achieved; and what will happen to the loan commitments should the Housing Trust Fund if there is a potential funding shortfall.

In response to Councilman Davis, Councilman Smith said that this is an exciting opportunity with broad community partners, some of which are Buncombe County, Mission Hospital and Homeward Bound. Should the Oak Hill Commons project run into problems, he felt sure that all partners will come together and solve that problem.

RESOLUTION BOOK NO. 37 - PAGE 34

E. RESOLUTION NO. 15-32 - RESOLUTION AUTHORIZING THE ASHEVILLE FIRE DEPARTMENT TO APPLY FOR A GRANT FROM THE U.S. DEPT. OF HOMELAND SECURITY TO OBTAIN FUNDING FOR REPLACEMENT OF 83 SELF-CONTAINED BREATHING APPARATUS, AND TO ACCEPT GRANT FUNDING IF AWARDED

Summary: The consideration of a resolution authorizing the Asheville Fire Department to apply for a grant in the amount of $655,700.00 from the US Dept. of Homeland Security to obtain funding for replacement of 83 Self Contained Breathing Apparatus (SCBA), and to accept grant funding if awarded.

The Department of Homeland Security has recently issued guidance for the FY 2014 Assistance to Firefighters Grant (AFG) program. This is a grant opportunity for fire departments to purchase needed equipment to enhance firefighter safety, service delivery, and effectively train personnel. The Asheville Fire Department would like to obtain through this program 83 Self Contained Breather Apparatus (SCBA)s with spare cylinders to replace equipment that is currently reaching its end of service life. The grant program requires communities of greater than 20,000 populations to match Federal grant funds equal to 10 percent of the total project cost, or

256.

$65,570. The SCBA is one of a firefighter's most critical tools for personal protection and regular replacement ensures that our personnel have the most up-to-date equipment available. The current SCBAs being used by AFD have been in service for greater than 10 years. Fire service best practices recommend that SCBAs be compliant with the most current National Fire Protection Association (NFPA) standards 1981 and 1982. The most recent issuance of these standards was in 2013. There were several significant changes in these standards, which AFD's current equipment does not meet.

The Fire Department recommends applying for the AFG Program for the following reasons: (1)The grant program was developed to assist in the purchase of critical firefighting equipment and tools to provide greater safety for firefighters; and (2) If awarded the grant will allow CoA to offset $655,700 in capital expenses with grant funding for the purchase of the equipment.

This grant was reviewed by the Public Safety Committee on January 26, 2015, and has been recommended for consideration by Council.

Pros:

- Improved safety and efficiency of firefighters when responding to dangerous environments.
- This grant will enable CoA to offset $655,700 capital expenses with the grant funding for the procurement of this equipment.

Cons:

- 10% matching amount of purchase required $65,570

As noted above, the current SCBA equipment is reaching the end of its service life. Funding to replace the equipment was included in the five-year Capital Improvement Program presented to City Council last spring. The grant funding will allow the City to replace the equipment with help offset the cost of this equipment replacement.

City staff recommends that City Council authorize the fire department to apply for a grant in the amount of $655,700 from the US Department of Homeland Security to obtain funding for 83 SCBAs.

RESOLUTION BOOK NO. 37 - PAGE 35

F. RESOLUTION NO. 15-33 - RESOLUTION AUTHORIZING APPROVAL OF AN AMENDMENT TO THE N.C. DEPT. OF CULTURAL RESOURCES RECORDS RETENTION AND DISPOSITION SCHEDULE ESTABLISHING A MINIMUM RETENTION PERIOD OF 30 DAYS FOR VIDEO AND AUDIO RECORDINGS CAPTURED BY FIXED AND MOBILE RECORDING DEVICES

Summary: The consideration of a resolution approving a Local Amendment to the N.C. Dept. of Cultural Resources Municipal Records Retention and Disposition Schedule establishing a minimum retention period of thirty (30) days for video and audio recordings captured by fixed and mobile recording devices.

Under N.C. Gen. Stat. and N.C. Gen. Stat. § 132-3, municipal governments may only dispose of public records with the consent of the North Carolina Department of Cultural Resources ("NCDCR"). The NCDCR primarily provides consent through the periodic publication of schedules listing hundreds of categories of records, and providing a minimum retention period for each category. If a municipality creates a type of record not listed in the schedule those records must be retained indefinitely absent a local amendment approved by the NCDCR and approved by the municipality's governing body.

The Asheville Police Department ("APD") is currently retaining a number of video records created by mobile non-vehicle cameras, and anticipates creating many more in the future in connection with the deployment of body cameras. Law enforcement video records created using fixed and mobile non-vehicle cameras do not fall under any existing records category in the NCDCR's current municipal schedule, however, the NCDCR has indicated to City staff an intention to include a thirty (30) day retention period for such records in the next schedule when it is updated at an unknown future date, and has agreed to a local amendment for Asheville in the meantime. This will allow APD to move forward with purging records already in its possession, and to set disposition policies in connection with body camera recordings.

At the Public Safety Committee on January 26, 2015, they recommended adoption of the proposed amendment.

Pros:

- Allows the APD to dispose of video records in accordance with state regulations.
- Allows for the setting of disposition policies in connection with body camera recordings.
- Conforms to anticipated statewide retention requirements, thus obviating the need for later policy revisions.

Cons:

- None.

Adoption of the proposed amendment is recommended.

In response to Councilman Smith, City Attorney Currin explained that this is approving a policy for video disposal.

Vice-Mayor Hunt noted that this policy does not preclude retaining some videos for historical significance purposes.

City Manager Jackson said that in terms of process, City staff will report to the City Council Public Safety Committee tentatively in March and share some administrative considerations about what is good records management, what makes sense for the City to retain and for what period of time for practical administrative reasons. There are liability considerations, statute of limitation considerations that may also enter into how long it would be wise to keep such video tapes. That will be something City staff will welcome City Council policy direction on. In addition, Interim Police Chief Steve Belcher and City staff will be looking at what our video taping policies are, what makes sense to be video-taped, who should make that call, who assesses the situation, etc. It would be Interim Police Chief Belcher's preference to someone at least the Captain's level be making some judgments.

RESOLUTION BOOK NO. 37 - PAGE 36

G. MOTION TO APPROVE THE FINDINGS OF FACT AND CONCLUSIONS OF LAW FOR THE CONDITIONAL USE PERMIT FOR HAWTHORNE SOUTH APARTMENT COMPLEX LOCATED ON TURTLE CREEK DRIVE

H. RESOLUTION NO. 15-34 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH HYPERSIGN/AVIONEX LLC TO PROVIDE DIGITAL MENU BOARD SOLUTIONS AND RELATED EQUIPMENT TO THE U.S. CELLULAR CENTER

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Hypersign/Avionex LCC.

Staff completed a bid process for digital menu display board and control software. The following bids were received on December 16, 2014:

- Christie Digital from Cypress CA, BID at $63,325 plus $6,500 annual costs
- MM Solutions from Knoxville TN, BID at $74,261 plus $1,200 annual costs
- Four Winds Interactive from Denver Colorado, BID at $97,264 plus $16,743 annual costs
- Allure Global from Atlanta GA, BID at $99,471 plus $9,720 annual costs
- TSA Choice from Asheville NC, Bid at $50,557 plus $9,613 annual costs
- Hypersign/Avionex LLC from Spartanburg SC, BID at $50,292 plus $5,988 annual costs

Staff has selected the winning bidder (Hypersign/Avionex LLC) for equipment & software licensing pricing. Staff is proposing a General Services contract not to exceed $80,000 over a three year term. Per the venue's sponsorship agreement with Pepsi-Cola the venue is obligated to install digital menu display boards at all possible concession areas. As part of the Pepsi-Cola sponsorship agreement, Pepsi-Cola has already provided the U.S. Cellular Center with $70,000 in cash to utilize towards the procurement and upkeep of the digital display board system. Additionally Pepsi-Cola will be providing the venue with $5,000 in cash annually to be directed towards software license fees for said digital display boards.

Comparable venues throughout the country have seen a lift is sales between 10-20% annually after installation of the displays. Hypersign/Avionex LLC provided a bid that met the requirements of the RFP and was most cost effective.

Pros:

- Top of the line digital menu board system with 100% cloud-based software.
- Automatic Emergency evacuation messaging system compatible.
- Potential sales increase
- Cost covered fully by venue sponsorship agreement.

Con:

- None

In FY15 the U.S. Cellular Center has received $70,000 in cash from Pepsi-Cola towards this project. Pepsi-Cola is contractually obligated to provide an additional $5,000 annually over the next three years fully covering the not to exceed $80,000 proposed general services contract with Hypersign/Avionex LLC. No impact to Civic Center General Fund Subsidy.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into contract with Hypersign/Avionex LLC. of Greenville, SC.

RESOLUTION BOOK NO. 37 - PAGE 37

I. ORDINANCE AMENDING SECTIONS 19-144 AND 19-164 OF THE CODE OF ORDINANCES TO ALLOW REVERSE ANGLE PARKING

Summary: The consideration of an ordinance amending Chapter 19 of the Code of Ordinances in order to allow for reverse angle parking (or back-in parking).

City Council approved a complete streets policy on June 26, 2012, via Resolution No. 12-154. A major purpose of a complete streets policy is to enable staff to consider all modes of transportation when designing and/or reviewing transportation-related projects. Staff would like to revise certain existing city ordinances to allow reverse angle parking (a change to prohibit parking in designated bicycle lanes will be coming forward at a later date combined with some changes that the Legal Department is working on).

Reverse angle parking (or back-in parking) is a new parking style that enables drivers to back into a parking space so that the front of the vehicle is facing the street. Benefits of reverse angle parking include improved driver visibility, easier loading and unloading, improved accessibility, and traffic calming. Assuming the amendments are made, staff would review future requests on a case-by-case basis to be sure that the most effective treatment is used.

This item was reviewed by the Council's Public Safety Committee on January 26, 2015, and has received their endorsement. This item was reviewed by the Multimodal Transportation Commission on January 28, 2015, and has received their endorsement.

Pros:

- Enhances the pedestrian and bicycle experience.
- Promotes complete streets principles and guidelines.
- Improves driver visibility.
- Provides easier loading and unloading.

Cons:

- "Learning curve" for drivers.
- Strict enforcement might be needed during the early stages of implementation.

City staff recommends that City Council approve an ordinance amending Chapter 19 of the Code of Ordinances in order to allow for reverse angle parking (or back-in parking).

Director of Transportation Ken Putnam responded to Mayor Manheimer's question regarding reverse angle parking, in particular around the Grove Arcade area. Because it was felt that reverse angle parking needs to be defined, it was the consensus of Council to delay action on this item and place it on the February 24, 2015, agenda.

J. ORDINANCE NO. 4380 - TECHNICAL BUDGET AMENDMENT IN THE CITY'S HOUSING TRUST FUND TO APPROPRIATE FROM RESTRICTED FUND BALANCE THE REQUIRED BUDGET AUTHORIZATION FOR PRIOR YEAR COMMITMENTS THAT ROLLED FORWARD TO FISCAL YEAR 2014-15

Summary: The consideration of a technical budget amendment in the City's Housing Trust Fund to appropriate from restricted fund balance the required budget authorization for prior year commitments that rolled forward to Fiscal Year (FY) 2014-15.

As a part of the FY 2013-14 annual audit, staff identified prior year commitments and carry-over appropriations to roll forward to FY 2014-15, and these dollar amounts were deducted from the unassigned fund balance amounts that were reported in the Comprehensive Annual Financial Report (CAFR). At its December 9, 2014, meeting, Council approved a technical budget amendment to appropriate from restricted fund balance the required budget authorization for these prior year commitments that rolled forward to FY 2014-15. Staff, however, inadvertently did not include the Housing Trust Fund as part of the December 9th Council action. This technical budget amendment will rectify this oversight and provide authorization to officially appropriate an FY 2014-15 budget for prior year Housing Trust Fund commitments.

Pros:

- Provides budget authorization for prior year commitments that rolled forward to FY 2014-15.

Cons:

- None.

As noted above this budget amendment simply provides budget authorization for prior year commitments which have already been reserved in the City's FY 2013-14 financial statements. There is no impact on unassigned/available fund balance in the City's General Fund or Housing Trust Fund.

City staff recommends City Council approve the technical budget amendment in the City's Housing Trust Fund to appropriate from restricted fund balance the required budget authorization for prior year commitments that rolled forward to FY 2014-15.

ORDINANCE BOOK NO. 29 - PAGE 354

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda with the deletion of Consent Agenda Item "I". This motion was seconded by Councilwoman Wisler and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. FOOD POLICY ACTION PLAN UPDATE

Executive Assistant for Planning & Multimodal Transportation Joey Robison said that the City of Asheville continues to make progress on the action items identified in the City of Asheville Food Action Plan that was adopted in 2013.

On January 22, 2013, Asheville City Council passed a resolution establishing the City of Asheville's Food Action Plan in support of the Asheville Buncombe Food Policy agenda. The Food Policy Action Plan included 14 specific areas to review or take action on to support the shared goals of the City of Asheville and the Asheville Buncombe Food Policy Council.

Since its adoption, City staff has made – and continues to make – significant progress on the action items identified in the plan as shown below. An update was given to the Planning and Economic Development Committee in January 2015.

Council Approved Action Item	Timeline	Update
Utilize the Unified Development Ordinance (UDO) and Animal Ordinance as a tool to support food policy goals by amending the UDO as needed to remove barriers to local food production and distribution. For example, but not limited to, priorities such as community gardens, urban agriculture, and use of mobile markets in residentially zoned districts under certain circumstances such as farmers markets.	Complete	Ordinance No. 4233 (also known as the Agricultural Amendment), adopted on September 24, 2013, amended chapter 7 of the UDO to clarify and modify regulations addressing agriculture and increase flexibility for agricultural uses. Changes included: • Allowing agricultural structures (i.e. small barns/storage buildings, greenhouses) on residentially zoned properties with no home structure • Allowances for farm stands in residentially zoned areas Existing City code allows fowl (§3-3-50) on urban lots with a permit and not less than 100 feet away from neighboring households (50 feet for fowl). Livestock is generally not permitted within the City limits, except

		when permitted for clearing of land and only in temporary instances.
Optimize permitting and regulatory services for farmers markets.	Complete	In Spring 2013 the fees for farmers markets were lowered and the fee approval process was shortened to three days.

Prioritize partnering to find a long term permanent location for the Asheville City Market.	Complete	The City extended the terms of the partnership with ASAP to allow use of the conference rooms in Public Works to serve as an Indoor City Market. The City has renewed the MOU with ASAP for continued use of the outdoor parking lot for the regular City Market for the spring, summer and fall seasons.
Pursue establishing local food purchasing policies for the City of Asheville through clarity on existing state legislation as well as state enabling legislation where needed.	No progress	No progress at this time. Not currently identified on the Council legislative agenda.
Seek partnerships to incorporate regional food and beverage options into the U.S. Cellular Center concessions, as well as city-run events.	Ongoing assessment/ evaluation	Current USCC local offerings: • 5 local breweries which represents 78% of sales • 1 local cider company • Serving The Hop Ice Cream for 100% of ice cream sales • The Hop Ice Creams provides the product for 100% of organic lemonade sales USCC was already contracted with a food service provider when the action plan was adopted. That contract expires June 30th. USCC staff intends to put out an RFP in February for food service designed to provide an opportunity for local options. This may result in a cost increase, so Council may see this issue in the spring with the option for more local products at an increase in underwriting.
Create a public private partnership for implementing a citywide curbside composting program that complements trash and recycling services. A successful partnership would improve regional economic development and provide compost regionally to support healthy ecological soil systems.	Study in process	A compost feasibility study with Buncombe County is currently being conducted, with results expected in the spring of 2015. Next steps and timeline will depend on the results of the feasibility study.

Include use of edible landscaping as a priority for public property such as parks, greenways and/or right of ways. In support of this, foster relationships with strong community partners who wish to access edible landscaping	Ongoing assessment	The City does not have an active landscaping program in City parks. Due to resource constraints, minimal maintenance occurs and minimum requirements are met with low-maintenance native plants. New plantings are mainly achieved through partnerships with community groups. Some of these partners include edibles in their landscape plans.

and/or use underutilized public land for food production.		While species selection for new or replacement plantings is determined in large part by soil type and conditions, edible plant options such as service berry trees and blueberry bushes have been both considered and planted more often since the Food Action Plan was adopted.
Encourage partnerships for food production that supports organic and permaculture principles by identifying arable underutilized city-owned land for lease or sale. Pursue methods to make information about such land available to the public.	Complete/ Ongoing	Because City-owned land is programmed for existing and/or future municipal uses, and because agriculture requires specific conditions (such as a water source and amended soil), there are limited sites that are attractive for food production in the City's portfolio. The City's current lease portfolio supports the following leases of City-owned property to benefit food production and promote food access: • Ongoing MOU for City real property at DSD/Public Works parking lot for City Market farmer's market • Second year agreement in place for indoor City space at DSD/Public Works for City Market Indoor Winter market • Ongoing lease of City real property at Hardesty Lane for 10 Acres organic Vegetable production, currently with Balsam Gardens. • Ongoing lease of City real property at Hardesty Lane for Danny's Dumpster Industrial Compost City staff met with Buncombe County Cooperative Extension in 2014 to explore partnership opportunities. The Cooperative Extension's interest is in education, small farm business services, and potentially hosting a demonstration garden on City property near the Nature Center. They do not have the capacity / mission to act as a land manager (i.e. managing city community gardens, or city farm leases.)
Update the city recommended plant list for developers to include edible plants and remove exotic and invasive species.	In process	SACEE and the Tree Commission updated this list of recommendations provided to developers if they inquire to meet UDO landscaping design requirements. Staff is currently working with the Tree Commission on another update to make the list more user-friendly.

Include safe and convenient pedestrian, bicycle, and transit connections between residential neighborhoods and community gardens, food banks, grocery stores and farmers markets as a priority when evaluating transportation projects.	Ongoing	
Include achieving food policy goals as a priority when allocating Community Development Block Grants.	Annual application process	Proposals are welcome and will be considered.
Support Asheville Buncombe	In process	City staff is working with the Asheville Buncombe Food

Food Policy Council efforts to set baselines and metrics for achieving food policy goals. Play an active role in providing access to existing city data when needed.		Policy Council to include existing City data on Buncombe County's Community Health Improvement Process (CHIP) online indicators dashboard in the area of Healthy Food Goals.
Encourage food distribution by engaging underserved communities who live in food deserts. Support community efforts by co-designing incentives that establish neighborhood based markets that provide healthy food.	Ongoing	City staff has been doing outreach to the many urban food and gardening efforts in the area to review opportunities for partnerships. Staff is currently in discussion with the West End Clingman Area Neighborhood Association about the development of a pilot community garden on the City-owned transit facility property on West Haywood.
Incorporate food policy goals into education programs for city staff and the general public.	Ongoing	Educational summer programming at City community centers was provided to 120 youth in summer 2013.

Pros:

- Significant progress has been made in multiple departments on those action items that require no additional resources.
- The City is in the process of identifying what the City's role should be in supporting the Food Policy Council.

Con:

- While the City has park property, we have not identified partners to provide materials and maintain the edibles in parks.

Many of the recommendations in the plan are based upon making resources that we currently have available, such as information about the number of community market we have permitted. One exception is adding edibles or community gardens on City property.

Ms. Robison responded to the following two questions raised at the City Council Planning & Economic Development Committee - why we have been seeing increased Fire Marshal inspections at farmers markets in the community; and what is the status of the recommended species list for commercial property.

Staff recommends that City Council provide feedback on progress and direction.

Ms. Laura Cheatham, representing the Food Policy Council, briefly spoke about the partnership process and the data gathering going on.

Regarding edibles in our parks and rights-of-way, Councilman Smith asked how receptive has the Buncombe County Fruit and Nut Club been to partnering with our Parks Department, noting they are actively partnering with Buncombe County Government. Ms. Robison responded that we have worked with the Buncombe County Fruit and Nut Club over the years and the Parks & Recreation Department has recently met with the group.

Councilman Smith said that since we continue to seek out policy improvements, it might be better to describe the initial action item on the plan as "Ongoing" rather than "Completed."

B. LEGISLATIVE UPDATE PROCESS

City Attorney Currin updated City Council on the process for legislative monitoring and updates to Council.

She said that the regular session 2015-2016 biennium of the North Carolina General Assembly convened on January 14, 2015, to elect officers and adopt rules, and adjourned until January 28, 2015. Since that time, over 54 bills have been filed in the House of Representatives and over 40 have been filed in the Senate. Staff is monitoring and reviewing legislation as it is introduced for impact to the City of Asheville.

In order to keep the City Council informed on legislative issues, regular updates will be made in the following ways:

1. A tracking matrix will be provided to Council throughout the session and will focus on the advocacy principles and policy positions adopted in the Council's Legislative Agenda. The matrix will be updated and posted for the public on the City Council's website, http://www.ashevillenc.gov/CityCouncil.aspx.

2. Staff will provide the City Council a "week-in-review" email newsletter highlighting events and legislation significant to Asheville and Council's Legislative Agenda.

3. Staff will provide a Legislative Update presentation during meetings of the Asheville City Council as needed or by request.

Mayor Manheimer briefly explained her concern with the eminent domain issue. She will be travelling to Raleigh to meet with some of our legislature to get a better feel of what we might expect to see during this session.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A CONDITIONAL ZONING OF PROPERTY LOCATED ON BROAD STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO CBI/CZ COMMUNITY BUSINESS I DISTRICT/CONDITIONAL ZONING TO CONSTRUCT A 2-STORY BUILDING WITH OFFICE SPACE ON THE FIRST FLOOR AND 3 RESIDENTIAL UNITS ON THE SECOND FLOOR, WITH A MODIFICATION REQUEST TO THE LANDSCAPE REQUIREMENTS.

ORDINANCE NO. 4381 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED ON BROAD STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO CBI/CZ COMMUNITY BUSINESS I DISTRICT/CONDITIONAL ZONING TO CONSTRUCT A 2-STORY BUILDING WITH OFFICE SPACE ON THE FIRST FLOOR AND 3 RESIDENTIAL UNITS ON THE SECOND FLOOR

Urban Planner Julia Fields said that this is the consideration of an ordinance for a conditional zoning of property located on Broad Street from RM-16 Residential Multi-Family High Density District to CBI/CZ Community Business I District/Conditional Zoning to construct a 2-story building with office space on the first floor and 3 residential units on the second floor, with a modification request to the landscape requirements. This public hearing was advertised on January 30 and February 6, 2015.

Ms. Fields said that the applicant is requesting review of a conditional zoning request to rezone property from RM-16 Residential Multi-Family High Density District to Community Business I District/Conditional Zoning in accordance with Section 7-7-8 of the UDO, for the construction of a two-story building containing 1800 square feet of "commercial business" space (first floor) and 1800 square feet (second floor) containing three one-bedroom apartments.

The subject property consists of an existing 6,624 square foot parcel (PIN 9649.53-7557) located at what will be addressed 135 Broad Street off of Charlotte Street. The closing of an unopened right of way between 135 and 137 Broad Street (recently approved by Council) would add an additional 1040 square feet to the subject property creating a development parcel 7,664 square feet in size (.176 acre). The property is currently vacant (with the exception of some storage crates to the rear of the property) and zoned RM-16 (Residential Multi-Family High Density). The site is bordered by properties zoned RM-16 (to the west containing a single family home) and CBI (to the north, east, and south). The surrounding CBI properties contain office buildings and a restaurant.

The applicant, Michael Derrig, AIA, for Broad Properties, LLC, proposes to construct a new mixed use building (24 feet in height) on the southern side of Broad Street, near the intersection of Broad and Charlotte Streets. The building will contain 1800 square feet (first floor) of "commercial business" space (limited to offices or instructional services by agreement) and 1800 square feet of residential space (second floor) containing three one-bedroom apartments. The applicant has also agreed to limit signage to a maximum of ten square feet per sign face and four feet in height.

Access to the site is proposed via a 14-foot driveway off of Broad Street. The drive leads to an area containing six parking spaces at the rear of the building. Parking for four bicycles and handicapped parking (one space) is shown on the site plan. There are existing sidewalks along Broad Street and an accessible pedestrian path planned to the west of the proposed new structure.

Landscaping is required for this project and includes street trees, parking lot landscaping, and a property line bufferyard to the west. A request to add a condition for Council consideration to reduce the required 20 foot buffer to 10 feet (for 51'6" of the property line) and 4 feet (for 43'4" of the property line) where there is a fence on the adjoining property has been submitted. The buffer yard shown contains all the requisite plantings but does not meet the required width. Staff is supportive of this condition feeling that it meets the spirit of the ordinance. Open space is not required as the property is less than an acre in size.

This proposal was approved with conditions by the Technical Review Committee on October 20, 2014, and requires review by the City Council and Final TRC prior to zoning approval. Many of the TRC comments have been addressed in the plans that are before the Asheville City Council.

The Asheville Planning and Zoning Commission reviewed this proposal at a meeting on January 7, 2015. At this meeting the commission voted unanimously (7-0) to recommend approval of this conditional zoning to Asheville City Council with conditions as presented. The motion also requested that the applicant provide outdoor balcony space for each of the three residential units and provide articulation to identify the entry to the residential units. Both these requests have been addressed in the elevations presented to City Council. One adjacent property owner spoke at the meeting concerned about buffering, parking and the cutting down of a particular tree.

The applicant is proposing to conditionally rezone the site from RM-16 to Community Business I Conditional Zoning to allow for a mixed use building. They have stipulated that the uses in the non-residential portion would be limited to instructional services and offices.

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff finds this request to be reasonable.

Considerations:

- The project proposes a mixed use building that will serve as a transition from the higher impact uses found along Charlotte Street to the residential uses along Broad Street.
- The project is being designed to be compatible in design and scale with many of the residential structures found in the vicinity.

Staff recommends approval of the proposed conditional zoning to allow for a mixed use building of office/instructional services space and three dwelling units at what will be addressed 135 Broad Street. The Asheville Planning and Zoning Commission unanimously recommended approval of this conditional zoning to the Asheville City Council.

Mayor Manheimer opened the public hearing at 5:58 p.m., and when no one spoke, she closed the public at 5:58 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Hunt moved to approve the conditional zoning request of Broad Properties, LLC for property located at what will be addressed 135 Broad Street from RM-16 Residential Multi-Family High Density District to Community Business I District/Conditional Zoning) and find that the request is reasonable, is in the public interest, and consistent with the Comprehensive Plan and other adopted plans in that: (1) The proposed uses on the property are in keeping with other uses in the area and create a good transition between higher intensity uses and lower intensity residential uses; and (2) The proposal supports the goal found in the City's comprehensive plan of pursuing compatible infill development. This motion was seconded by Councilwoman Wisler and carried unanimously.

ORDINANCE BOOK NO. 29 - PAGE 356

B. PUBLIC HEARING TO CONSIDER A SUBDIVISION WITH CONDITIONAL ZONING ON PROPERTY LOCATED AT 141, 145 AND 149 COURTLAND AVENUE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8/CZ RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL ZONING TO (1) ALLOW THE CONVERSION OF THREE EXISTING GROUP HOME BUILDINGS INTO MULTI-FAMILY UNITS AND THE SUBDIVISION OF LAND TO LOCATE THOSE BUILDINGS ON SEPARATE LOTS; AND (2) TO ESTABLISH 7 ADDITIONAL SINGLE-FAMILY HOME LOTS, WITH A CHANGED CONDITION TO THE LANDSCAPE AND OPEN SPACE STANDARDS

ORDINANCE NO. 4382 - ORDINANCE TO APPROVE A SUBDIVISION WITH CONDITIONAL ZONING ON PROPERTY LOCATED AT 141, 145 AND 149 COURTLAND AVENUE FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RM-8/CZ RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT/CONDITIONAL ZONING TO (1) ALLOW THE CONVERSION OF THREE EXISTING GROUP HOME BUILDINGS INTO MULTI-FAMILY UNITS AND THE SUBDIVISION OF LAND TO LOCATE THOSE BUILDINGS ON SEPARATE LOTS; AND (2) TO ESTABLISH 7 ADDITIONAL SINGLE-FAMILY HOME LOTS, WITH A CHANGED CONDITION TO THE LANDSCAPE AND OPEN SPACE STANDARDS

Urban Planner Julia Fields said that this is the consideration of an ordinance to approve a subdivision with conditional zoning on property located at 141, 145 and 149 Courtland Avenue from RS-8 Residential Single-Family High Density District to RM-8/CZ Residential Multi-Family Medium Density District/Conditional Zoning to (1) allow the conversion of three existing group home buildings into multi-family units and the subdivision of land to locate those buildings on separate lots; and (2) to establish 7 additional single-family home lots, with a changed condition

request to the landscape and open space standards. This public hearing was advertised on January 30 and February 6, 2015.

Ms. Fields clarified that City Council is only considering a conditional zoning and subdivision has already been decided by Planning & Zoning Commission, subject to City Council approval of the conditional zoning.

Ms. Fields said that the applicant is requesting conditional zoning for a single parcel along Courtland Avenue from RS-8 Residential Single-Family High Density District to RM-8CZ Residential Multi-Family Medium Density District/Conditional Zoning in accordance with Section 7-7-8 of the UDO with conditions for buffering and open space. The conditional zoning request would allow the creation of a major subdivision consisting of ten lots and the conversion of three existing units into multi-family dwellings. The major subdivision was conditionally approved by the Planning and Zoning Commission on January 7, 2015.

The project site (PIN 9639.91-5403) is 2.63 acres in size and is located at 141, 145, and 149 Courtland Avenue in the Montford community. The current zoning of the property is RS-8. The property is surrounded by properties that are unzoned (to the west - Department of Transportation right-of-way) or zoned RS-8. The properties in the surrounding area are predominately single-family residential in nature. There are three residential structures on the site which have been previously used as a group home. The property contains a number of large trees. A stream runs along the southern property line of the project site.

RPMM Properties, LLC proposes to subdivide the project site into ten new residential lots. Seven of the lots will be used for single-family development. The three existing buildings on the property will be located on the remaining three lots and it is proposed that the buildings be renovated to convert them to two- or three-unit residential structures. All buildings are proposed to be designed to reflect the character of the surrounding neighborhood. All lots meet the standards for lots in the RM-8 District. A water line will be extended along Courtland to service all the properties

Access to all properties is via driveways off of Courtland Avenue. Sidewalk is not required per the ordinance. There is an existing sidewalk along a portion of the property. The applicant has agreed to provide an easement for the remaining frontage to facilitate sidewalk construction in the future. Parking is provided for each lot on that lot with shared driveways utilized to reduce curb cuts.

Street trees are required and will be provided; perhaps some with existing vegetation. A 20 foot buffer is required along the two sides of the project site which abut RS8 zoning. A request has been submitted to add a condition for Council consideration to eliminate this buffer as it largely would require buffering single-family residences from other single-family residences. Staff is supportive of this modification.

Open space (20%) is required and can be provided along the rear of the properties. However, this open space, while compliant with base square footage requirements, does not meet the restrictions on the amount of open space that can be over 25% slope. Staff is supportive of adding a condition for Council consideration that 9,660.5 square feet of required buffer be waived because to require open space compliance would necessitate the construction of retaining walls which would not enhance the compatibility of the proposed development with surrounding properties. There is a public park in close proximity to the development site.

This proposal was approved with conditions by the Technical Review Committee on December 14, 2014, and requires review by the City Council and Final TRC prior to zoning approval. Most of the TRC comments have been addressed in the plans that are before the Asheville City Council.

The Asheville Planning and Zoning Commission reviewed this proposal at a meeting on January 7, 2015. At this meeting the commission voted unanimously to approve the major subdivision and recommend approval of the conditional zoning to Asheville City Council with conditions. One adjacent property owner spoke at the meeting concerned about traffic along Courtland.

City Council will have the final review of the conditional zoning. It will return to the Technical Review Committee for Final TRC review, if approved by Asheville City Council.

The applicant attended a meeting of the Montford Neighborhood Association to introduce this project to the community. Questions/concerns were raised over traffic and whether the rezoning to multi-family conditional zoning would allow the single-family lots to be developed subsequently for multi-family use. Staff has communicated with the neighborhood explaining the stipulations that come with conditional use rezonings.

The three existing residential units were approved as a group home in 2004. The structures have, however, been vacant for some time.

The applicant is proposing to conditionally rezone the site from RS-8 to RM-8CZ to allow for the subdivision of the property into ten lots. Seven of the lots will be used for single-family dwelling with allowable accessory structures. The other three lots, contain existing buildings that will be renovated to create two units on two of the lots and three units on the remaining lot.

The property is surrounded on three sides with parcels zoned RS-8 and containing single family homes. To the west the project site abuts unzoned Department of Transportation right-of-way. As this project is largely single-family in nature, the development is compatible with the development in the immediate vicinity. Additionally, the conversion of the previous group home buildings to small multi-family structures is more in keeping with the surrounding development.

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff finds this request to be reasonable.

Considerations:

- The project proposes a largely single-family subdivision in an area with similar development patterns.
- The project involves the adaptive reuse of three existing vacant structures in a manner compatible with the surrounding area.
- The proposed size and design of the structures to be constructed as part of this project are in keeping with many of the residential structures found in the vicinity.

Staff recommends approval of the proposed conditional zoning to allow for the subdivision of the subject parcel into ten lots and the conversion of three existing units into multi-family dwellings.

The Planning and Zoning Commission recommended approval of the conditional zoning request with conditions as presented at their meeting on January 7, 2015. The Commission also approved the major subdivision subject to approval of the conditional zoning application.

Ms. Lucy Crown, representing the owner, said that they are in the process of due diligence but noted that the units will be sold as condos or town houses. They have brief conversations with the Planning staff about the possibility of affordable housing, and although their decision has not been made yet, they are relatively aware of what the conditions are and are not adverse to it.

Mayor Manheimer opened the public hearing at 6:09 p.m., and when no one spoke, she closed the public hearing at 6:09 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved to approve the conditional zoning request of RPMM Properties, LLC for property located at 141,145, and 149 Courtland Avenue from RS-8 Residential Single-Family High Density District to RM-8CZ Residential Multi-Family Medium Density District/ Conditional Zoning and find that the request is reasonable, is in the public interest, and is consistent with the Comprehensive Plan and other adopted plans in that (1) The proposal supports the goal found in the City's comprehensive plan of promoting compatible adaptive reuse of existing structures; (2) The proposal supports the goal found in the City's comprehensive plan of pursuing compatible infill development. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 29 - PAGE 362

C. PUBLIC HEARING TO CONSIDER A MAJOR SUBDIVISION WITH CONDITIONAL ZONING ON PROPERTY LOCATED AT 95 CRAGGY AVENUE, 180 LOUISIANA AVENUE AND 178 LOUISIANA AVENUE, FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RS-8/CZ RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CREATION OF 45 LOTS IN TWO PHASES AND ASSOCIATED INFRASTRUCTURE, WITH A CHANGED CONDITION REQUEST FOR LOT SIZES AND SETBACKS, SIDEWALK STANDARDS AND PAVEMENT AND RIGHT OF WAY WIDTHS.

This public hearing has been removed from consideration at this meeting. The public hearing will be held on February 24, 2015.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. CONFIRMATION OF ESSAY QUESTIONS TO ELIGIBLE ASHEVILLE CITY BOARD OF EDUCATION CANDIDATES

Vice-Mayor Hunt said that the Boards & Commissions Committee reviewed all essay questions, for eligible Asheville City Board of Education candidates, submitted by City Council and narrowed them down to five final questions to ask the eligible candidates to respond to in writing.

Vice-Mayor Hunt said that there has been media coverage regarding background checks for Board of Education appointments. As this is an important topic, staff will continue to work with the Asheville City Schools Superintendent as this process moves forward. He said that any eligible candidate for an Asheville City Board of Education seat may have to submit to a background check.

It was the consensus of Council to accept the Boards & Commission's committee five recommended essay questions and wait until the deadline of February 24 before the essay questions are sent to all eligible candidates.

Mayor Manheimer announced that the deadline for Asheville City Board of Education applications is Tuesday, February 24, 2015, at 5:00 p.m. and to please contact City Clerk Burleson for an application form.

B. BOARDS & COMMISSIONS

At the recommendation of the African American Heritage Commission, it was the recommendation of the Boards & Commissions Committee and consensus of City Council to delay appointments until March 10, 2015.

RESOLUTION NO. 15-35 - RESOLUTION APPOINTING A MEMBER TO THE GREATER ASHEVILLE REGIONAL AIRPORT AUTHORITY

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that Mr. Douglas Tate has resigned as a member of the Greater Asheville Regional Airport Authority and the Asheville Regional Airport Authority, leaving an unexpired term until June 30, 2016.

The following individuals have applied for a vacancy on the Authority: Stephanie Pace Brown.

The Boards & Commission Committee recommended appointing

Mayor Manheimer moved to appoint Stephanie Pace Brown to the Greater Asheville Regional Airport Authority and the Asheville Regional Airport Authority, to serve the unexpired term of Mr. Tate, term to expire June 30, 2016, or until her successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 38

RESOLUTION NO. 15-36 - RESOLUTION APPOINTING A MEMBER TO THE CITIZENS-POLICE ADVISORY COMMITTEE

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that Mr. Brad Galbraith has resigned as a member of the Citizens-Police Advisory Committee, leaving an unexpired term until June 30, 2017.

The following individuals have applied for a vacancy on the Committee: Larry McCallum and Clifford T. Joslin.

At the recommendation of the Citizens-Police Advisory Committee, the Boards & Commission Committee recommended appointing Clifford Joslin.

Councilman Davis moved to appoint Clifford Joslin to serve the unexpired term of Mr. Galbraith, term to expire June 30, 2017, or until his successor has been appointed. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 39

RESOLUTION NO. 15-37 – RESOLUTION APPOINTING THE CHAIRMAN TO THE CIVIL SERVICE BOARD

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that Mr. Marvin Rosen as asked to step down as Chair to the Civil Service Board, thus leaving an unexpired term of Chair until June 25, 2015, or until their successor is appointed, whichever occurs first.

It is the responsibility of City Council to appoint the Chair of the Civil Service Board and the Chair of the Civil Service Board shall be appointed annually by City Council.

In 2013, a process was established for future appointments to the chair role of the Civil Service Board. Said process offered members of the Civil Service Board to express interest in serving as Chair.

On January 5, 2014, all members were advised to contact City Clerk Burleson if they were interested in serving as Chair. Mr. Alan Coxie was the only interested member.

Councilwoman Wisler moved to appoint Mr. Alan Coxie as Chairman of the Civil Service Board to serve the unexpired term of Mr. Rosen; term to expire June 25, 2015, or until his successor is duly and annually appointed by the City Council, as provided by law. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37- PAGE 40

RESOLUTION NO. 15-38 - RESOLUTION APPOINTING A MEMBER TO THE HOMELESS INITIATIVE ADVISORY COMMITTEE

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that Mr. Richard Leatherman has resigned as a member of the Homeless Initiative Advisory Committee, leaving an unexpired term until November 1, 2015.

The following individuals have applied for a vacancy on the Committee: Warren Furmann and Allison Bond.

At the request of the Homeless Initiative Advisory Committee, the Boards & Commission Committee recommended appointing Allison Bond.

Councilman Smith moved to appoint Allison Bond to serve the unexpired term of Mr. Leatherman, term to expire November 1, 2015, and then a full three-year term until November 1, 2018, or until her successor has been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 41

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Carl Solesbee spoke about the noise ordinance and urged City Council to amend their ordinance that the Noise Ordinance Appeals Board can hear appeals filed by one property owner.

Councilman Pelly said that he has received a letter from the State Board of Transportation that they have approved a traffic light and pedestrian crossing at the intersection of Coleman Avenue and Merrimon Avenue. He said they are also evaluating other intersections on Merrimon Avenue as well.

Closed Session

At 6:25 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C. Gen. Stat. § 143-318.10(3). The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(1); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including but not limited to, a lawsuit involving the following parties: City of Asheville v. Robert

272.

Frost. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3). This motion was seconded by Councilman Pelly and carried unanimously.

At 7:27 p.m., Councilwoman Wisler moved to come out of closed session. This motion was seconded by Vice-Mayor Hunt and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 7:27 p.m.

Magdalen Bulleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – February 24, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

MOMENT OF SILENCE

Mayor Manheimer asked for a moment of silence on the passing of Mr. J.W. "Red" Hoyle on December 20, 2015, who was Vice-Mayor from December, 1971 - December 1973 and a Councilmember from December 1973 - December 1977. On behalf of City Council, she expressed Council's condolences to Mr. Hoyle's family.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of City staff, it was the consensus of Council to add a the following resolution to the Consent Agenda "Resolution approving the submission for a re-accreditation application, on behalf of the WNC Nature Center, to the Association of Zoo and Aquariums."

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 10, 2015

B. RESOLUTION NO. 15-39 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL ENGINEERING SERVICES AGREEMENT WITH SCHNABEL ENGINEERING SOUTH, PC, FOR THE NORTH FORK WATER TREATMENT PLANT DAM/SPILLWAY UPGRADE PHASE 1: DESIGN PROJECT

Summary: The consideration of a resolution authorizing the City Manager to enter into a professional engineering services agreement with Schnabel Engineering South, PC, for the North Fork WTP Dam/Spillway Upgrade Phase I: Design project for the proposal in the amount of $3,903,350.

On June 27, 2014, the Water Resources Department issued a Request for Qualifications (RFQ) for professional engineering services for the upgrade of the North Fork Dam/Spillway. As outlined in the RFQ, engineering services for the project will be conducted in two phases: Design and Construction Services. The selected engineering firm will be responsible for all of the design phase (Phase I) and construction phase (Phase II) aspects of the project. Phase I and II are the engineering phases of the $30 million dam/spillway construction upgrade project to occur at the North Fork Water Treatment Plant in Black Mountain.

Phase I Design includes design services, geotechnical exploration, assessment of the existing gated spillway, environmental permitting, bid process support, and public outreach. Phase II Construction Services includes contract administration, observation of all construction-

related activities, field and laboratory quality control testing, full-time onsite representation, attendance at construction meetings, preparation of reports, and final record drawings. Engineering services will be divided into two phases because the cost of Phase II Construction Services will not be known until Phase I Design is complete. Since the RFQ included that the selected firm would provide services for both phases, the department will not have to issue another RFQ for Phase II. The department will seek Council approval for the Phase II contract with the selected firm once the amount of that contract is known.

In response to the RFQ, the department received three Statements of Qualifications from the following firms responding:

1. Gannett Fleming / Hazen and Sawyer (a joint effort) – Raleigh, NC
2. Rizzo Associates – Columbia, SC
3. Schnabel Engineering South, PC – Greensboro, NC

Schnabel has presented a scope of work and cost proposal in the amount of $3,903,350.00 for Phase I Design engineering services associated with this project. Due to the firm's intimate knowledge of the North Fork Dam, Schnabel Engineering is the most qualified firm to complete Phase I and subsequent Phase II once that contract amount is known.

Pros:
- Schnabel Engineering has provided engineering services on various dam and spillway projects for the City of Asheville. The firm's experience and extensive knowledge of the dam and spillway at North Fork make them the most qualified firm.
- This project will allow the Water Resources Department to upgrade the North Fork dam and spillway to comply with State regulations.

Cons:
- The cost for the engineering services agreement while substantial, is typical for a construction project of this size. The overall construction project is estimated at $30 million.
- Failure to award an engineering services agreement would prevent Water Resources from making the necessary upgrades to the North Fork dam and spillway.

The funding needed for the professional engineering services contract is currently allocated within the North Fork WTP Dam/Tunnel Repairs project in the Water Resources Capital Improvement Projects fund.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a professional engineering services agreement with Schnabel Engineering South, PC, for the North Fork WTP Dam/Spillway Upgrade Phase I Design project for the proposal amount of $3,903,350.

Director of Water Resources Steve Shoaf responded to Councilwoman Wisler regarding the agreement.

RESOLUTION BOOK NO. 37 - PAGE 42

C. RESOLUTION NO. 15-40 - RESOLUTION CHANGING THE NAME OF "SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT" TO "SUSTAINABILITY ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT"

RESOLUTION BOOK NO. 37 - PAGE 43

D. RESOLUTION NO. 15-41 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT THE HIGH INTENSITY DRUG TRAFFIC AREA GRANT

ORDINANCE NO. 4383 - BUDGET AMENDMENT TO ACCEPT THE 2015 HIGH INTENSITY DRUG TRAFFIC AREA GRANT

Summary: The consideration of (1) a resolution authorizing the City Manager to accept the 2015 High Intensity Drug Traffic Area (HIDTA) grant in the amount of $30,980 as a fiduciary for the Asheville Area HIDTA Task Force; and (2) a budget amendment, in the amount of $30,980, to establish the budget.

The High Intensity Drug Trafficking Areas (HIDTA) program was authorized by the Anti-Drug Abuse Act of 1988 and is administered by the Office of National Drug Control Policy. The HIDTA's mission is to reduce drug trafficking in the most critical areas of the country, thereby reducing the impact of illegal drugs in other areas. Asheville HIDTA, which has been in place for many years, serves as a key drug trafficking reduction effort, critically positioned between the Atlanta HIDTA and the Appalachia HIDTA. The Asheville HIDTA, a component of the Asheville United States Drug Enforcement Administration (DEA) Task Force, is comprised of members of the DEA, Asheville Police Department, the Buncombe County Sheriff's Office, Henderson County Sheriff's Office and McDowell County Sheriff's Office. The HIDTA task force primarily concentrates on high volume, high value drug trafficking. As an example the task force was recently involved in the seizure of several hundred grams of crack cocaine tied to local and national gangs, a seizure of 30 pounds of marijuana and $65,000 cash; multi pounds of methamphetamine and the seizure of 335.3 grams of heroin. All of the cases mentioned involved people trafficking narcotics in the regional area and beyond. In several of the cases it involved organized gang activity and weapons.

The City of Asheville serves as the fiduciary for the Asheville HIDTA. The allotted funds form the federal government will go for investigative purposes. The expenditure of all funds are tracked and audited by both local and federal authorities.

Pro:

- Federal HIDTA monies to cover the cost of investigative special purposes

Con:

- None noted

There is no impact to the City's General Fund budget. The grant funds will be received and disbursed through the City's Special Revenue Fund.

City Staff recommends City Council (1) adopt the resolution to accept the HIDTA 2015 grant funds; and (2) adopt the budget amendment in the amount of $30,980.

RESOLUTION BOOK NO. 37 - PAGE 44
ORDINANCE BOOK NO. 29 - PAGE 368

E. ORDINANCE NO. 4384 - ORDINANCE AMENDING SECTIONS 19-144 AND 19-164 OF THE CODE OF ORDINANCES TO ALLOW REVERSE ANGLE PARKING

Summary: The consideration of an ordinance amending Chapter 19 of the Code of Ordinances in order to allow for reverse angle parking (or back-in parking).

City Council approved a complete streets policy on June 26, 2012, via Resolution No. 12-154. A major purpose of a complete streets policy is to enable staff to consider all modes of transportation when designing and/or reviewing transportation-related projects. Staff would like to

revise certain existing city ordinances to allow reverse angle parking (a change to prohibit parking in designated bicycle lanes will be coming forward at a later date combined with some changes that the Legal Department is working on).

Reverse angle parking (or back-in parking) is a new parking style that enables drivers to back into a parking space so that the front of the vehicle is facing the street. Benefits of reverse angle parking include improved driver visibility, easier loading and unloading, improved accessibility, and traffic calming. Assuming the amendments are made, staff would review future requests on a case-by-case basis to be sure that the most effective treatment is used.

This item was reviewed by the Council's Public Safety Committee on January 26, 2015, and has received their endorsement. This item was reviewed by the Multimodal Transportation Commission on January 28, 2015, and has received their endorsement.

Pros:

- Enhances the pedestrian and bicycle experience.
- Promotes complete streets principles and guidelines.
- Improves driver visibility.
- Provides easier loading and unloading.

Cons:

- "Learning curve" for drivers.
- Strict enforcement might be needed during the early stages of implementation.

City staff recommends that City Council approve an ordinance amending Chapter 19 of the Code of Ordinances in order to allow for reverse angle parking (or back-in parking).

ORDINANCE BOOK NO. 29 - PAGE 370

F. RESOLUTION NO. 15-42 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AMENDED SUB-RECIPIENT AGREEMENT WITH THE CITY OF HENDERSONVILLE FOR 2012 NEW FREEDOM FUNDS

Summary: The consideration of a resolution authorizing the City Manager to amend the sub-recipient agreement with the City of Hendersonville to: (1) provide increased New Freedom grant funding-$21,498; (2) expand the scope of services; and (3) extend the period of performance.

The City of Asheville (City) is the Designated Recipient of grant funding by the Federal Transit Administration (FTA) entitled, "New Freedom Grant Funds (NF)."

The provision of adequate transportation is deemed a primary barrier to integrating those with disabilities into the workforce. The New Freedom Grant Program administered by the FTA, is intended to provide new public transportation services and public transportation alternatives beyond those required by the Americans with Disabilities Act of 1990.

As a Designated Recipient of New Freedom Grant Funds, the City was required to undergo an intensive planning process to develop a Coordinated Public Transportation and Human Services Transportation Plan (CTP-HSTP) based on community participation. Since inception of the program and to ensure neutrality, this plan has been developed by the French Broad Metropolitan Planning Organization, with participation of the City, Buncombe, Henderson and Haywood Counties, human services agencies, public and private transportation providers, the North Carolina Department of Transportation and the general public to assess current transportation needs, identify gaps and to set goals. Consistent with the City's preference as approved by FTA, the CTP-HSTP was approved on March 29, 2012 by the French Broad River

MPO's governing body (the Board). The MPO Board consist of elected representatives from the eighteen local governments which make up the MPO The CTP-HSTP set the rules to apply for projects and the projects were selected in a competitive process that was approved by the Board.

In September 2012, MPO recommended and the City approved NF funding for the City of Hendersonville and Customer Inspired Services. The 2012 Program of Projects for NF funding was approved by FTA. The City entered into a sub-recipient agreement with the City of Hendersonville but, Customer Inspired Services (CIS) closed its doors and no sub-recipient agreement was executed. While the CIS project, which provided for operating funds to hire an additional dispatcher, and capital funds for the rehabilitation of a van, is different in scope and services, the MPO on June 26, 2014, approved a transfer of the CIS funds to the City of Hendersonville Project, in that both the CIS and Hendersonville projects were chosen at the same time, in the same call for projects, and the construction by the City of Hendersonville of sidewalks would allow for the construction of a longer sidewalk, and is the only feasible project at this time for additional NF funds. FTA has approved the transfer of funding.

The project funding changes are listed as follows:

Sub-Recipient	Project	Program	Previous federal amount	New federal amount	Sub-Recipient's match
City of Hendersonville	Pedestrian improvements along US 64	NF	$239,918	$257,116	$64,279

Both projects are under the same MUNIS project code and do not require a budget ordinance amendment. Since the transfer of additional funds constitutes a change to the 2012 Program of Projects, the sub-recipient agreement must be amended to comply with FTA requirement.

The City as the Designated Recipient is responsible for program management and the proper administration of funding. The program management requires the use of City resources, mainly staff. As a Designated Recipient the City is using $28,567 of NF funds for program administration for a period of four years. These funds are already budgeted in the operating budget.

Pro:

- Project funding is provided by the FTA, 80% of capital projects. The sub-recipients are responsible for the local match.

Con:

- None.

This program is fully funded with federal grant funds and sub-recipients match; there is no impact to the City's General Fund budget.

Staff recommends that City Council adopt the resolution authorizing the City Manager to execute an amended sub-recipient agreement with the City of Hendersonville for 2012 New Freedom Funds.

RESOLUTION BOOK NO. 37 - PAGE 45

G. ORDINANCE NO. 4385 - BUDGET AMENDMENT TO ADD ADDITIONAL COMPONENTS TO A REPLACEMENT COMPRESSED NATURAL GAS BUS FOR HENDERSON COUNTY'S TRANSIT SYSTEM

Summary: The consideration of a budget amendment in the amount of $5,000 to increase the budget project to add additional components to a replacement Compressed Natural Gas (CNG) bus for Henderson County's transit system.

As a result of the 2000 Census, the City of Asheville was reclassified from a non-urbanized area to an urbanized area with a population greater than 200,000 persons and now includes municipalities in Buncombe, Haywood, and Henderson counties. After the reclassification, Henderson County's transit system became part of the transit systems operating in the overall urbanized area. The Federal Transit Administration named the City of Asheville the designated recipient and as a result, the City of Asheville oversees all of the Federal funding administration. The City of Asheville and Henderson County have signed a sub-recipient agreement that specifies how the funds are disbursed. The City of Asheville is accountable to the Federal Transit Administration regarding the use of all Federal funds and owns all the capital items that Henderson County purchases with their share of the Federal funds.

The estimated total cost of the subject project is $148,600.4. Federal funds will provide $115,976 covered with grant NC-90-X439; this grant requires a match of $28,994.4 provided by Henderson County, plus $3,630 for the title, tag and graphics. The City of Asheville performs all of the administrative tasks including the bidding process, requests for funding, review of documentation, and reporting. The bus has been ordered and these components will be added to the order.

Pros:

- The bus will produce savings in maintenance and fuel costs for Henderson County.
- The Federal Transit Administration (FTA) provides 80% of the cost of the bus.
- Henderson County provides 20% of the total estimated project cost plus tag, title's costs and graphics.
- There is no cost obligation for the City of Asheville other than administrative expenses.

Con:

- The City of Asheville is responsible for administrative expenses including staff time to oversee the project.

The total estimated project cost is $148,600.4, $115,976 or 80% of the cost of the bus are coming from Federal funds, 20% or $28,994.4 and tag and title in the amount of $3,630 coming from Henderson County. There is no direct fiscal impact to the City of Asheville, however the City's cost of administering the project is not recovered.

City staff recommends that City Council adopt the budget amendment in the amount of $5,000 to increase the budget project to add additional components to a replacement Compressed Natural Gas (CNG) bus for Henderson County's transit system.

ORDINANCE BOOK NO. 29 - PAGE 371

H. ORDINANCE NO. 4386 - BUDGET AMENDMENT FOR LED EXTERIOR LIGHTING UPGRADES AT TWO TRANSIT FACILITIES

Summary: The consideration of a budget amendment from General Fund and Federal Transportation Administration grant money to establish a Fiscal Year 2015 budget in the City's Special Revenue Fund the amount of $10,000 for procurement and installation of LED exterior lighting at two transit facilities.

The City of Asheville has access to Federal Transportation Administration (FTA) grant monies to fund energy efficiency projects at transit facilities. Staff has identified exterior lighting upgrade opportunities at both the Asheville Redefines Transit station on Coxe Avenue as well as the Transit Maintenance Facility on West Haywood Street. The total cost for the project is

estimated at $10,000. The FTA grant can cover up to 80% of this cost, while the City's match of $2,000 will come from the Green Sustainability budget.

Pros:

- Energy saving opportunity will cut energy consumption of exterior lighting in half
- Better, brighter light will create a safer environment for both ART riders and ART staff

Con:

- None foreseen

The lighting project will be paid with a combination of $8,000 FTA grant money and $2,000 of the City's Green Sustainability money, which is from streetlight avoided costs.

City staff recommends City Council adopt a budget amendment to perform exterior LED lighting upgrades at ART Station downtown and ART Maintenance Facility.

ORDINANCE BOOK NO. 29 - PAGE 373

I. ORDINANCE NO. 4387 - BUDGET AMENDMENT FOR THE BINGHAM ROAD WATER MAINTENANCE FACILITY

Summary: The consideration of a budget amendment in the amount of $3,525,000 to move funds from Water Resources Fund Balance to the Bingham Road Water Maintenance Facility capital project in order to fund the purchase and renovation of 200 Bingham Road.

In recognition of the deteriorating condition of the Water Maintenance/Meter Services facility at 174 S. Charlotte Street, the Water Resources Department (Department) started setting aside capital project funds for a new facility in Fiscal Year 2008-09. For the next several years, additional funds were added to the project. As an economic development proposal, White Labs recently expressed an interest in purchasing part of the Water Maintenance property at 172/174 South Charlotte Street. The transformation of South Charlotte Street to a higher use has been an economic development goal, and the White Labs project is a major step towards realizing that goal. The Department, with assistance from the Community & Economic Development Department expedited the search for a new facility.

Utilizing a consultant engaged in commercial real estate, several properties were investigated. There were very limited choices for buildings and property sized to house the two divisions being relocated. The building needed to accommodate two operating divisions and the surrounding property needed space for heavy equipment and service vehicles. The search led to 200 Bingham Road in northwest Asheville. This site has the necessary space both inside and outside. The location re-purposes a property that is outside the central business district.

The building at 200 Bingham Road is larger than what is needed by the Water Maintenance /Meter Services divisions. The Department is in discussion with the Finance Department about relocating the Central Stores portion of Purchasing to this location. That would free up another City-owned parcel along the South Charlotte Street corridor. Additionally, there should be space to accommodate needs from another City department.

In a September 23, 2014, closed session, Council authorized the acquisition of the property at 200 Bingham Road. Thereafter, the seller and City representatives engaged in negotiations and subsequent due diligence and executed a purchase and sale agreement. A February closing date has been set with a final purchase price of $2,855,000. This price is discounted to less than the square foot fair market value in recognition of some necessary repairs. The Department will need to make renovations to the property (immediately and over the next five years) and with those costs factored in the final price will be just over the square foot fair

market value. By making the renovations, the value of the property will increase, protecting the investment.

In order to proceed to closing, a budget amendment is necessary to ensure the project budget is in place for financial reconciliation of the sale and associated expenses. As part of the budget amendment, funds are included to modify the facility's systems and retrofit it and the property to better serve the needs of Water Resources. The property will be purchased and renovated with Water Resources funds and will remain with the Department if there is a future disposition of the property, thus it is in compliance with the Sullivan Act(s) I, II, and III.

Pro:

- Approval of the budget amendment will ensure that the necessary funds are in place for the purchase and renovation of 200 Bingham Road.

Con:

- If the budget amendment is not approved, the Department will not be able to complete the transactions necessary to fund the purchase and renovation of 200 Bingham Road.

The Water Resources Department currently has $764,264 budgeted for the Bingham Road Water Maintenance Facility project. The remaining funds of $3,525,000 needed for the purchase and renovation of 200 Bingham Road will be transferred from the Water Resources Fund Balance. In order to transfer funds from fund balance, a budget amendment is necessary.

Amount Budgeted in Bingham Road Water Maintenance Facility project	$ 764,264
Additional Amount Needed for Purchase & Renovation	$3,525,000
Total Amount Needed for Project	$4,289,264

Water Resources began FY 2014-15 with more than $17.7 million in fund balance. With an operating budget of $34.6 million, this equated to a fifty-one percent fund balance. The drawdown of $3,525,000 will leave Water Resources with a fund balance of $14.2 million, or forty-one percent of their operating budget for the year. Finance staff believes that this fund balance is sufficient for any operating needs and demonstrates the continued fiscal health of the fund. Staff will seek Council approval of contracts associated with the renovation project for amounts required by the City of Asheville Procurement, Purchasing and Contracting Policy.

City staff recommends City Council approve a budget amendment in the amount of $3,525,000 to move funds from Water Resources Fund Balance to the Bingham Road Water Maintenance Facility capital project in order to fund the purchase and renovation of 200 Bingham Road.

ORDINANCE BOOK NO. 29 - PAGE 375

J. ORDINANCE NO. 4388 - BUDGET AMENDMENT TO AUTHORIZE THE USE OF NORTH CAROLINA STATE DRUG SEIZURE FUNDS

Summary: The consideration of a budget amendment in the amount of $20,600 to authorize the use of North Carolina State Drug Seizure Funds to fund the purchase of covert surveillance equipment ($14,000), and support of Changing Together ($6,600).

The North Carolina State drug seizure program is an equitable sharing program between the North Carolina State government and local law enforcement agencies which divides the proceeds from illegal drug dealing. It is designed to allow local law enforcement agencies to use seized monies for equipment, training, and improvements that might not necessarily be budgeted for by the agency. The proceeds from illegal drug dealing are divided with 25% going to the North Carolina Department of Revenue and 75% going to the local law enforcement agency initiating the seizure.

This amendment will authorize the use of $20,600 in North Carolina State drug seizure funding for: 1) The purchase of covert surveillance equipment to be utilized to secure evidence of criminal activities related primarily to drugs sales and prostitution; and 2) Funding the partnership with Changing Together for services related to Violent Criminal Offenders and the Domestic Violence Task Force.

Pros:

- North Carolina State drug seizure revenue used to fund covert surveillance equipment, and the Changing Together partnership.
- Reduction in cost to the City of Asheville for the purchase of this equipment by use of the forfeiture funds
- Increase officer and public safety by providing covert audio/video equipment
- Support of partnership with Changing Together

Con:

- None noted

Accepting and allocating these State Forfeiture Funds is a financial benefit to the City allowing the Asheville Police Department to better equip employees and provide safety measures to protect the public. There is no impact to the General Fund budget.

City staff recommends City Council adopt a budget amendment in the amount of $20,600 authorizing the use of North Carolina State Drug Seizure Funds to fund the purchase of covert surveillance equipment and support of Changing Together.

In response to Mayor Manheimer, Interim Police Chief Steve Belcher, provided the specifics on the use of the equipment, which 90% of its use will be for narcotics surveillance. This equipment is not used for demonstrations or freedom of speech issues - use is strictly for criminal issues. These actual criminal surveillance videos are commissioned and coordinated with the District Attorney's Office and closely managed by command staff at the Police Department.

Councilman Smith hoped that going forward there will be a public process about civil liberties and about what is going to be appropriate in the community so we can make sure that everyone is as safe as we can make them and make sure we are still protecting civil liberties.

ORDINANCE BOOK NO. 29 - PAGE 377

K. ORDINANCE NO. 4389 - BUDGET AMENDMENT TO ALLOW THE PARKS & RECREATION DEPARTMENT TO USE FUNDS FROM THE SALE OF A DUMP TRUCK TO THE STREET CUT UTILITY FUND TO PURCHASE AN EXCAVATOR

Summary: The consideration of a budget amendment increasing the budgeted expenditures of the Parks and Recreation Department in the General Fund in the amount of $73,000 to be offset by a revenue in the same amount from the Street Cut Utility Fund.

The Street Cut Utility Fund has budgeted funds to purchase a dump truck in the 2014-2015 budget year. The Parks and Recreation Department has a dump truck available to sell to the Street Cut Utility Fund and would like to use the funds received to purchase an excavator which will serve their needs better. The Street Cut Utility Fund would pay the General Fund the book value of the dump truck and the Parks and Recreation Department would use those funds to purchase an excavator.

Pros:

- The Parks and Recreation Department of the General Fund and the Street Cut Utility Fund would each gain a piece of equipment that would better serve their needs.
- City resources will be put to their most effective use.

Cons:

- None

There is a net fiscal impact of $0 on the General and Street Cut Utility Funds. The budget amendment will increase the City's General Fund revenue and expenditure budgets by $73,000 and there will be no effect on the Street Cut Utility Fund's budget. The Street Cut Utility Fund already has sufficient funds budgeted to purchase a dump truck and the General Fund will use the payment from the Street Cut Utility Fund's purchase of the dump truck to purchase an excavator.

Staff recommends City Council approve the budget amendment authorizing the City Manager to increase the General Fund revenues and appropriations by $73,000 to reflect the Street Cut Utility Fund's purchase of a dump truck from the General Fund and the appropriation of those funds in the General Fund to allow the Parks and Recreation Department to purchase an excavator.

ORDINANCE BOOK NO. 29 - PAGE 379

L. RESOLUTION NO. 15-43 - RESOLUTION APPROVING THE SUBMISSION OF A RE-ACCREDITATION APPLICATION, ON BEHALF OF THE WNC NATURE CENTER, TO THE ASSOCIATION OF ZOO AND AQUARIUMS

Summary: The consideration of a resolution authorizing the City Manager to approve the submission of the City of Asheville's (City) re-accreditation application on behalf of the WNC Nature Center (Nature Center) to Association of Zoos and Aquariums (AZA).

The Nature Center has been an accredited member of AZA since 1999. The accreditation process, which occurs every five years and is due again in 2015, requires the consideration and approval of the City's governing authority.

Pros:

- Maintains the Nature Center as an AZA accredited institution
- Demonstrates the high standards of the Nature Center operations and credibility

Con:

- None

The AZA application fee of $3,250 is included in the Nature Center's FY 2014-2015 adopted budget.

City staff recommends City Council to adopt a resolution authorizing the City Manager to approve the submission of the City's re-accreditation application on behalf of the Nature Center to AZA.

RESOLUTION BOOK NO. 37 - PAGE 46

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. FISCAL YEAR 2014 CARBON FOOTPRINT UPDATE

Interim Sustainability Manager Kerby Smithson updated City Council on the Fiscal Year 2014 carbon report.

In 2008, City Council established a 2% annual carbon footprint reduction goal. That goal was increased in 2011 to 4%. In Fiscal Year 2014 the City of Asheville reduced our carbon footprint from municipal operations by 4.5%. For the 6th year in a row, the City has met the goal by reducing its greenhouse gas emissions by 1,328 metric tons of CO2 equivalent.

Last year's increase was due, in large, to conversion of the biodiesel the City uses from B-5 to B-20 for all fleet and transit operations. The lower carbon footprint of the B-20 fuel alone accounted for 40% of the year's improvement. In concert with the fuel change, the City's fleet overall managed a 2.1% reduction in fuel volume consumption of diesel, gasoline and CNG. More efficient vehicles purchased through the more robust Fleet CIP had a large part to do with this achievement.

Additional actions that resulted in the reduction included:

- 1,500 more streetlights were converted in the City's fourth phase of LED streetlight installations;
- Efficiency improvements in water production and distribution operations; and
- Efficiency improvements in City buildings.

City reduced its energy spending to $5.6 Million, a reduction of $164,000 from the previous year.

When Councilman Bothwell asked what areas we can next see progress in, Mr. Smithson said that there is still a lot of opportunity in downtown street lighting and electrification of our fleet.

B. MID-YEAR FINANCIAL REPORT

Budget Manager Tony McDowell provided the Council with a brief report which reflects the City's overall financial position for the fiscal year through December 2014.

Amendments. The General Fund budget presented in this second quarter report reflects the adopted budget of $99,547,954 along with six budget amendments approved by City Council. A summary of the budget amendments is presented below. The budget amendments that involved an appropriation from fund balance are noted with an asterisk.

Adopted Budget	99,547,954
Budget Amendments:	
Parks & Recreation Grants/Donations	53,795
WNC Diversity Engagement Coalition Support*	10,000
Traffic Signal Pole Replacement	16,590
City Workforce Investments	500,000
Thomas Wolfe Auditorium Roof Repairs*	60,000
Senior Center and Harvest House Grants	7,786
12/31/2014 Budget	$100,196,125

*Fund Balance Appropriation

Revenues. Through December 31, 2014, the City has collected $23,759,568 in General Fund revenue, which represents approximately 24% of the total General Fund revenue budget. Staff received assessed valuation data from Buncombe County in early February that showed tax base growth was less than originally expected. Fiscal 2014-15 property tax revenue estimates have been adjusted downward to reflect this data. Sales tax revenue, which is up approximately 9% compared to the same period last fiscal year, is expected to exceed budget. Through two quarters, state utility tax revenue is up 6.6% compared to the prior year. Revenue from Development Service fees continues to trend higher than anticipated and is at 58% of budget at the end of December. Overall, staff is currently projecting that *FY 2014-15 General Fund revenue will exceed budget by $450,000 or 0.46%.*

Expenditures. General Fund expenditures through December 31, 2014 total $46,469,381 or 46% of the budget, which is slightly ahead of where expenditures were last fiscal year after two quarters. Personnel expenses, the largest component of the General Fund budget, are running right on budget through the first two quarters. With the drop in gas prices, expenditures for fuel and fleet maintenance are performing better than budget through December. *Based on current trends, staff is projecting that expenditures will finish the year under budget by approximately $1.0 million (99% of budget).*

Fund Balance. The City began FY 2015 with unassigned fund balance of $15.0 million. As noted above, an additional $70,000 has been appropriated from unassigned fund balance during the first two quarters of FY 2015. Based on *current revenue and expenditure projections for FY 2015, staff estimates that unassigned fund balance at June 30, 2015 will be $16.4 million or 16.6% of estimated expenditures.*

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A CONDITIONAL ZONING ON PROPERTY LOCATED AT 95 CRAGGY AVENUE, 180 LOUISIANA AVENUE AND 178 LOUISIANA AVENUE, FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RS-8/CZ RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING THAT WILL ALLOW FOR THE CREATION OF 45 LOTS IN TWO PHASES AND ASSOCIATED INFRASTRUCTURE, WITH A CHANGED CONDITION REQUEST FOR LOT SIZES, SETBACKS AND SIDEWALK STANDARDS

ORDINANCE NO. 4390 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 95 CRAGGY AVENUE, 180 LOUISIANA AVENUE AND 178 LOUISIANA AVENUE, FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RS-8/CZ RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING THAT WILL ALLOW FOR THE CREATION OF 45 LOTS IN TWO PHASES AND ASSOCIATED INFRASTRUCTURE

Interim Planner Director Alan Glines said that this is the consideration of a conditional zoning on property located at 95 Craggy Avenue, 180 Louisiana Avenue and 178 Louisiana Avenue, from RS-8 Residential Single-Family High Density District to RS-8/CZ Residential Single-Family High Density District/Conditional Zoning that will allow for the creation of 45 lots in two phases and associated infrastructure, with a changed condition request for lot sizes, setbacks and sidewalk standards. This public hearing was advertised on February 14 and 21, 2015.

City Attorney Currin said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property.

Mr. Glines said that the applicant is requesting conditional zoning for four parcels located off of Louisiana Avenue and Craggy Avenue from RS-8 Residential Single Family High Density District to RS-8/CZ Residential Single Family High Density District/Conditional Zoning in accordance with Section 7-7-8 of the UDO with conditions for smaller lots and setbacks with larger areas of common open space, which will allow creation of a major subdivision with 45 lots conditionally approved by the Planning and Zoning Commission on January 7, 2015.

The applicant is proposing to create 45 residential lots including two new street sections. The project is proposing a space saving compact development proposal to protect some of the sensitive areas of the site as common space. The subdivision was approved by the Planning and Zoning Commission subject to approval of the conditional zoning request.

The project site consists of four parcels which join in the center but are accessed from two city streets: Louisiana Avenue on the east side and Craggy Avenue on the south side. The developer proposes a recombination and subsequent subdivision of an overall project area of 8.58 acres. The property has a stream through the center which currently acts as the property boundary. There is a significant grade change from the higher portions of the parcels and the lower area near the stream. To reduce the impact to the stream and other natural areas, and to provide a lower impact development, the development is proposing: smaller sized lots, narrower street pavement and right-of-way widths and reduced building setbacks. The lot dimension reductions require approval as specific conditions through the conditional zoning process. The narrower rights of way and pavement widths were approved through the Technical Review Committee process completed on December 1, 2014.

There are three existing dwellings and several associated structures on the parcels. One of the homes will be retained as a part of the site development. To the north of the project area are two parcels owned by the City of Asheville. One of the properties known as the Falconhurst Preserve, is a 7.9 acre parcel that has a conservation easement to protect it in its natural state. The proposed subdivision would provide a walking path near this property for future public access.

Adjacent to this area again on the north side is the second property that is currently leased to the Army Reserve. This 8.76 acre parcel has access from Louisiana Avenue and is zoned Institutional. There are no proposed connections to this parcel and the new development either.

Access to the site is proposed via two separate roadways: roadway A-B with access from Louisiana Avenue. Roadway C is accessed from Craggy Avenue. The project is proposing sidewalk sections along the two street connections but there is a request to reduce the length of the sidewalk to not include the entire roadway. There are also secondary walkway sections that connect through the common green space areas. It is the intent of the developer to allow the public to access the green space.

Landscaping is required but limited for this project and includes street trees meeting UDO standards and tree save areas. The landscaping plans meet the requirements of the ordinance. Tree save plantings are required to cover 30% of the lot area and provide for additional plantings if needed. Trees that are protected and saved can also be used as credits.

Open space is required for the development and is required to be a minimum of 15% of the lot area. Since the development is adjacent to City owned property known as the Falconhurst Preserve, this permits the development to qualify for a reduction of 25% of required open space reducing it from 20% to 15% as described in 7-11-4(e)(2). The subdivision is adjacent to the Falconhurst Preserve land but any future connections will need to be coordinated with the city Parks and Recreation Department after submitting a separate proposal for use. That process has not been initiated at this time.

The amount of open space required for the project is 1.29 acres but the development is providing **1.59** acres. The proposal exceeds this amount even considering the number of exclusions to open space described in the UDO (steep portions of the land, wetland areas, narrow portions, etc.) There will be additional 'community common area' of **.77** acre which will be provided in the development for reservation.

The Technical Review Committee (TRC) reviewed this application at their meeting on December 1, 2014, and approved it with conditions along with the narrower right of way and pavement widths. As with all conditional zoning applications, this development proposal was reviewed by the Planning and Zoning Commission who completed their review on January 7. City Council will have the final review of the conditional zoning. It will return to the Technical Review Committee for a final TRC review, if approved by Asheville City Council. The subdivision portion of the application was approved by the Planning and Zoning Commission subject to the approval of the CZ request by the City Council.

Although not required, the developer held several neighborhood meetings during the design stage before the project was officially submitted. Since those meetings staff had two meetings with neighborhood residents who wanted additional information regarding the proposal and shared some concerns about the lots sizes proposed, additional traffic using neighborhood streets, loss of tree cover and additional stormwater runoff.

Council conditions requested to modify development standards: City Council may consider conditions modifying dimensional requirements as a part of the conditional zoning approval process.

- Lot size- 35 of the lots are requesting the approval of area less than the district standard of 5,000 square feet. The lot sizes range in size from 2,691 to 4,972 square feet.

- Lot Setbacks- The development is seeking setback reductions from the district standards (Front/ rear 15' and 6' sides) to be a consistent 5 foot front and side setbacks and 10 foot rear setbacks. A single lot, Lot 11 is seeking a front setback of 2 feet.

- Lot Width- 23 lots are requesting the approval of lot width reduction less than the district standard of 50 feet. The proposed lot widths will range between 30 and 48 feet.

- Sidewalk sections- The developers are seeking to reduce the length of sidewalk provided for several portions of both street sections. There will be a sidewalk at the street intersections at existing roads which will continue into the development to a point. The development team is proposing several foot paths to link major sections of the development. The Technical Review Committee reviewed this request and asked that easements be provided for the street sections without sidewalks in case sidewalks are ever requested at a future date. The Planning and Zoning Commission conditioned their recommendation for approval subject to the developer studying options for increasing the length of pedestrian connectivity throughout the development.

The subject parcels and adjacent lots are zoned RS-8, with an Institutional parcel to the north of the site. The properties are immediately surrounded by single-family homes with the Army Reserve occupying the city parcel. The proposed development area taken with the additional open space area provides a density of about 5.25 units per acre and like the proposal, single-family homes are common in the surrounding area. The property is located along a bus line and is within walking distance of a number of services and retail businesses on Patton Avenue and Haywood Road.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use

permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- Infill development furthers the goals and objectives of the comprehensive plan.
- The proposed development provides residential lots in an area close to many services, transit and within walking distance to the pedestrian-oriented Haywood Road.
- Additional areas of open space and common space centered around riparian areas of the property are the basis of the development plan.
- The project requires a number of modifications to development standards under the current RS-8 zoning district prompting the need for the conditional zoning application.
- Concern has been voiced by surrounding neighbors regarding increased traffic, changes in community character and storm water runoff.

Staff recommends approval of the proposed conditional zoning along with the conditions requested, finding it consistent with City-adopted plans and strategic goals for development. The Planning and Zoning Commission recommended approval of the conditional zoning request at their meeting on January 7, 2015. They asked that the developer investigate additional pedestrian connections adjacent to the proposed street. The Commission also approved the subdivision subject to approval of the conditional zoning application.

Conditions agreed upon by the developer include:

1. The zoning designation will be RS 8 CZ
2. Site plans show 45 residential lots and open space based on the conditional zoning approval. The development will be in substantial compliance with the site plan which is incorporated herein.
3. Tree Save areas will be provided as required by the UDO.
4. Street trees will be provided along street frontages as illustrated in the plan.
5. Open space is designated as shown on plans and totals approximately 1.59 acres.
6. Additional community commons areas are also provided on the plans.
7. Walking paths will be provided in the areas of open space or community common areas as show on the plans.
8. Sections of street length without adjacent sidewalks will be provided for by easement 10 feet wide.
9. Of the 45 residential lots, 35 lots are approved on the site plan with sizes ranging from between 2,691 square feet to 4,972 square feet.
10. The development is approved for 5 foot front setbacks, 5 foot side setbacks and 10 foot rear setbacks. A single lot, Lot 11 is approved for a front setback of 2 feet.
11. Of the 45 lots, 23 lots are approved on the site plan with a lot width of between 30 and 48 feet.
12. Stormwater and grading will be approved by separate permits. A combination of curb and gutter and swales will be used to manage storm water runoff.
13. Retaining walls will meet retaining wall standards for design and plantings.
14. Along the road in Phase II and the 'Y', traffic control and crosswalks needed per engineering requirements.
15. Retaining walls will meet City and building code standards for landscaping and guardrail protection where required.
16. Pedestrian bridge will require a separate building permit.
17. The developer will need to obtain all right of way and utility cut permits.
18. All street lights to be LED lights.
19. The Property owner will work with the Asheville Design Center to further the design and development of the Smith Mill Creek Greenway.

20. The Property owner agrees to pursue restoration for the streams located on the Property in Areas and 3 and 10 on the Site Plan at page C-16, and to work with RiverLink and/or other similar organizations to effectuate such restoration.

    Clarification requested from the development team: The property owner agrees to pursue restoration of the streams located on the Property in Areas 3 and 10 on the Site Plan at page C-16, and to work with RiverLink and/or other similar organizations, **if there is a grant to do the work for stream restoration**, to effectuate such restoration. **If there is no grant to do the work, the property owner agrees to provide stream enhancements.**

21. The property owner will create and post a sign at or near the boundary of the Property and the adjoining Falconhurst Natural Area (PIN No. 9638-17-3304-00000)(the "Natural Area") informing the public as to the condition of the Natural Area and any rules and regulations which are applicable to the Natural Area. The sign characteristics and language must be approved by the City Parks and Recreation Department.

Vice-Mayor Hunt was interested in a condition that the developer commit to establishing an easement or a commitment for public access across their property along the stream to ultimately connect to the Falconhurst Natural Area.

Councilman Bothwell felt that larger lots tend to have more greenspace around the homes. He felt that by permitting more homes in a denser area, we are reducing the actual greenspace in this neighborhood.

In response to Councilman Pelly, Mr. Glines explained how the site plan might change if the developer were required to build in the RS-8 Residential Single-Family High Density District with no conditional zoning request.

In response to Councilman Davis, Mr. Glines believed that there is an additional five years left on the Army Reserve lease and he has not heard any indication that they plan on moving their facility. Councilman Smith said that when the lease is re-negotiated, the City may have an opportunity to extend this public access space down to the Smith Mill Creek Greenway.

Mr. Brian Nelson, Principal of East West Craggy, said they committed to transform this property into a neighborhood where people who care about green living will be aspired to live. They designed a low impact development that takes into consideration a careful balance of the environment, the community and the economic realities of infill developments in the City. They have worked to define plans that actually fit the land and the fabric of the community. They sent out 400 mailings to surrounding homes, held two community meetings and held numerous one-on-one meetings with neighbors. Without going through the conditional zoning process, a different development would require substantial grading and impact to the property in order to yield enough units to make it economically feasible. This project serves the community with real economic benefits - 45 new GreenBuilt homes in a market that is scare of supply. He asked that Council approve the conditional zoning request to help maintain the sensitive balance of environmental and economic factors.

Mr. David Tuch, President and Landscape Architect at Equinox, gave a brief background of Craggy Park which includes (1) zoned RS-8 Single-Family High Density District; (b) developed compact clustered development pattern to maximize open space and tree preservation; (c) utilized low impact development to reduce overall impacts to the landscape and watershed; (d) located near goods and services, including shopping, employment, recreation, transit corridor, and park land; and (e) conducted two public meetings to gain feedback from the community and neighbors. He said that their goal is to (1) provide infill development; (2) meet the City's smart growth goals; (3) create a healthy housing project; (4) utilize sustainable design techniques; (5) comply with the City's Comprehensive Plan; (6) locate near a transit line; and (7) be compatible

with surrounding development. The primary goal of low impact development is to design a development to protect or restore the natural hydrology of the site so that the overall integrity of the watershed is protected. Benefits to low impact development include (1) preserves the quality of water of downstream water bodies; (2) reduces flood occurrence; (3) reduces impervious cover as compared to traditional development; (4) maintains hydrology; and (5) preserves habitat. He pointed out specific design elements as follows: (1) innovative stormwater control measures/low impact development; (2) reduced impervious surfaces (3) green space/open space/preservation; (4) stream enhancements; (5) pedestrian oriented amenities/public access; (6) GreenBuilt homes; and (7) provides much needed housing through infill.

Mayor Manheimer opened the public hearing at 6:01 p.m.

The following individuals spoke in opposition of the conditional zoning request for various reasons, some being, but are not limited to: need to protect the natural environment and inhabitants of the natural environment; loss of green space that is critical to the quality of life of our citizens; request for a fence on the developer's property to prohibit public access to the Falconhurst Preserve; pedestrian concerns on Craggy Avenue; suggestion to decrease the number of homes allowed; development does not fit into the neighborhood unless conditional modifying the requirements are granted; increased in traffic on Craggy Avenue, which is narrow and steep, especially with Village of Haywood project approved; need for neighborhood repurposing program to help neighborhoods cope with infill development; safety concerns for young children and older adults who walk on Craggy Avenue; if the development residents are allowed to have access to the Falconhurst Preserve property, the the rest of the area should also be allowed to have that access; concern that homes abutting the Falconhurst Preserve will take advantage of that natural area; concern that developer has asked for modifications but has not offered any money to alleviate neighborhood concerns; and need for a park in the area:

Ms. Catherine Morris, resident of the Falconhurst neighborhood
Mr. Paul Olszewski, resident on Craggy Avenue
Mr. David Dvorscak, resident on Craggy Avenue
Resident at 46 Blue Ridge Avenue
Resident at 39 Blue Ridge Avenue
Ms. Monica Hall, area resident
Ms. Deidra Duffy, resident on Craggy Avenue
Mr. Michael Kohnle, resident on Craggy Avenue
Resident on Blue Ridge Avenue

In response to Councilman Smith, Mr. Mike Figura, representing Mosaic Realty, said that their target date for breaking ground on Phase I is May 5, 2015. As far as the trail, they would like to get started on that soon, but realize that this is part of the larger conservation that they are having with the community. That is why they have hired the Asheville Design Center. If the project is approved by City Council, the next step is the community design charette.

Mr. Tuch also provided the City with letters of support from RiverLink, Asheville on Bikes, Kieran Roe (who has worked in land conservation for 20 years) and WNC Green Building Council.

Mayor Manheimer closed the public hearing at 6:51 p.m.

In response to Councilman Smith, City Traffic Engineer Jeff Moore said that any conversation about closing Druid Drive would be part of a broader conversation around the Haywood Road Traffic and Parking Study.

Councilman Smith felt a Neighborhood Repurposing Program is a good idea and suggested the Neighborhood Advisory Committee (NAC) look into that suggestion. Councilman

Pelly said that the NAC is hosting a Festival of Neighborhoods on March 15, 2015, at which time they will be having workshops on how neighborhoods can more effectively address these type growth and development issues. He encouraged the neighborhood to attend.

Councilman Bothwell felt that the letters of support provided by the developer only supported elements of the project, not the actually endorsement of the entire project. He felt the City should protect the green space and neighborhood and not facilitate the developer in making as much money as possible.

Vice-Mayor Hunt felt that a different developer may not plan a project with the best interest of the neighborhood and environment in mind. He felt that there is a demand for housing and felt that infill development in the City is important to avoid urban sprawl.

Councilman Pelly felt that even if the development was reduced from 45 units, the developer would still have to put in all the improvements, i.e., stormwater, etc. He felt that how much the developer is trying to make a profit should not be a factor in this decision. We know that we don't want sprawl and there is a need for housing in the City.

Councilman Davis has seen other projects constructed by this development team and felt this will also be a quality project.

Mayor Manheimer agreed with Councilman Smith that a clarifying the process for neighborhoods and opening up communication is a good idea, and suggested that be a project for the new permanent Planning Director.

Mr. Tuch explained the clarification of Condition No. 20 request. City Council and the developer agreed that Condition No. 20 read "The property owner agrees to support restoration for the streams located on the Property in Areas 3 and 10 at page C-16, and to work with RiverLink and/or other similar organizations to effectuate such restoration; however, should such restoration not occur, the Property owner agrees to provide stream enhancements for the same area.

Vice-Mayor Hunt asked for a new condition that the developer grant an easement to the City for public access across their property along the stream to ultimately connect to the Falconhurst Natural Area, subject to acceptance by the City after the infrastructure is built out.

After discussion, City Council and the developer agreed to the following new Condition No. 23 - "The property owner will make an offer of dedication of an easement to the City for a trail beginning at Tanglewood Drive and terminating at the north end of the open space area adjacent to Lots 31 and 32 on the Site Plan, and which approximately follows the patch indicated on the Site Plan and Exhibit B-2 attached hereto. The trail will be located so as to provide the ability to connect to the Falconhurst National Area in the future. The easement area shall be 20 feet in width where available, but in no event less than 10 feet wide. The final location of the easement and design shall comply with all local, state and federal regulations and shall be subject to final approval by the City of Asheville. The offer of dedication shall be in a form acceptable to the City Attorney and shall be executed and recorded at the Buncombe County Register of Deeds on or before the issuance of building permits for infrastructure for Phase II. The City shall have no obligation to accept the offer of dedication, but should the City choose to accept, this right must be exercised within one year following the date the offer of dedication is recorded."

Councilman Davis moved to approve the conditional zoning request for Craggy Park on Louisiana Avenue and Craggy Avenue from Residential Single Family High Density District (RS-8) to Residential Single Family High Density Conditional Zoning (RS-8 CZ), with the conditions to: lot size, lot widths, setbacks and sidewalk waivers for certain areas, based on the master plan and find that the request is reasonable, is in the public interest, and is consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) Infill development is encouraged in areas close to shopping, employment, recreation and near transit corridors; (2) Riparian areas will be protected in the plan as open space which is adjacent to city parkland; (3) The proposed lots are sufficiently sized for single family use; (4) The conditional rezoning request

allows flexibility for development standards which are reviewed based on specific site plans and details of the proposal. This motion was seconded by Councilwoman Wisler and carried on a 6-1 vote, with Councilman Bothwell voting "no".

ORDINANCE BOOK NO. 29 - PAGE 381

Closed Session

At 7:22 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: City of Asheville v. Robert Frost. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3). This motion was seconded by Councilman Pelly and carried unanimously.

At 7:46 p.m., Councilman Bothwell moved to come out of closed session. This motion was seconded by Councilwoman Wisler and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 40 COXE AVENUE FOR BUNCOMBE COUNTY'S HEALTH & HUMAN SERVICES BUILDING ADDITION AND PARKING STRUCTURE

City Attorney Currin reviewed with Council the conditional use permit hearing process, which is quasi-judicial. At this public hearing, all the testimony needs to be sworn and due process protections afforded to the Applicant.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

Interim Planner Director Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that Buncombe County is requesting approval of a Conditional Use Permit for an addition to the Health and Human Services Building and a new 650 space parking structure located at 40 Coxe Avenue. The application for a government use in the CBD requires that the project be reviewed as a conditional use permit following in 7-5-5 of the UDO (City Exhibit 4 - Application).

Using City Exhibit 5 (drawings, site plan, landscape plan, floor plans, building elevations and context renderings), Mr. Glines said that the site consists of a 1.91 acre parcel located on Coxe Avenue, The parcel is zoned Central Business District (CBD) and currently houses the existing 71,000 square foot Health and Human Services building (HHS) at 40 Coxe Avenue (the former Sears Building). The parcel is bordered by four streets or rights of way: Sears Alley to the north, Buncombe Street to the east, Aston Street to the south and Coxe Avenue to the west. Neighboring uses include, surface parking, a church and commercial offices, the downtown post office and the Asheville Transit Center. The site also provides surface parking for visitors and clients of the HHS building.

The proposal consists of a 69,000 square foot, 7-story addition to the existing Buncombe County HHS Building located at 40 Coxe Avenue. In addition, an 8-tier parking structure is

proposed in the center of the parcel fronting on Sears Alley and Buncombe Street. The parking structure will have two driveway connections from Sears Alley.

Sears, Roebuck & Co. opened the three-story Moderne-style brick store in 1948. The block-long building is noted for its simple stylish embellished brick banding with flat cast concrete canopies on the Coxe Avenue facade. The structure will be redeveloped with interior renovations to support the HHS expansion.

The proposal consists of a 69,000 square foot, 7-story addition with frontage on Coxe Avenue connecting to the existing structure. The design of the proposed addition is a modern interpretation of a base-middle-cap composition with subtle differences between the three zones. The base includes the first two stories of the office building and the cap reintroduces a masonry material (that is used in vertical pilasters on the building) to create a horizontal cap proportion. Coxe Avenue is a key pedestrian street, so the minimum windows, doors and openings standard is 70% fenestration which the project exceeds. The primary pedestrian entrance is provided along Coxe Avenue in compliance with development standards.

Pedestrians will access the building directly from the Coxe Avenue entrance with a secondary entrance adjacent to the garage elevator. Vehicular access to the site is from Coxe Avenue using Sears Alley as access to the parking structure. Sears Alley provides two-way movement and drivers can access Buncombe, Commerce Street and Aston Street to exit the property. There is a light at the intersection of Aston Street and Coxe Avenue. Sidewalks surround the parcel and except for the existing Aston Street sidewalk which will remain in place, all sidewalks will be improved and provide space for street trees. Bicycle parking will also be provided in the parking structure totaling 30 spaces.

The parking structure is proposed to be 8-levels providing 650 parking spaces. It will provide parking for staff and clients of the HHS building. The new construction will free up several lots along Coxe Avenue that are currently being leased for surface parking.

Landscaping required for the project is limited to street trees. These are being provided along all street frontages. The project requested alternative compliance from the Tree Commission for the spacing of street trees along Coxe Avenue which is needed to avoid the existing metal awnings on the HHS Building and for the number of street trees provided along Aston Street. The Tree Commission approved the request at their meeting on February 16, 2015. Open space is not required for downtown projects but there will be a small plaza space in front of the elevator tower.

This proposal was approved with conditions by the Technical Review Committee on July 7, 2014. The Downtown Commission reviewed the proposal at their meeting on July 11, 2014. The application also requires a quasi-judicial review by the Asheville City Council and Final TRC review.

The site is currently zoned Central Business District and Buncombe County is proposing to meet the standards of this District and the building design requirements.

Section 7-16-2(c) of the Unified Development Ordinance (UDO) states that Asheville City Council shall not approve the conditional use application and site plan unless and until it makes certain findings based on the evidence and the testimony received at the public hearing or otherwise appearing in the record of the case. There are total of ten standards that the project must meet; seven findings are usual for all conditional use permits and three additional findings are specific to governmental uses in the Central Business District. The applicant has provided a statement on these findings which is attached to the staff report.

Staff finds that the relevant standards of the City have been met or can be met with this application. The Downtown Commission reviewed the site plan and building design and voted

unanimously to recommend approval of this conditional use permit to the Asheville City Council on July 11, 2014 (by a vote 9-0 with Councilman Davis excused from the review proceedings and vote). They also provided these recommended conditions that Buncombe County (1) strongly consider adding public restrooms; and (2) strongly consider allowing public use of the parking garage after hours. These Downtown Commission recommendations are not binding for City Council.

When Councilman Davis asked if there was any partnership opportunities for underground utilities, Mr. Glines said that that is budgeted in the Capital Improvement Plan at this time, but that would really be outside of this project in some ways.

Buncombe County Senior Staff Attorney Michael Frue asked for City Council's support of this project.

In response to Councilman Smith, Assistant County Attorney Jon Creighton said that the County does plan on having general public use of the parking deck during the day and also at night.

Mr. Creighton then spoke about how the demand for human services continues to rise and asked for Council's support.

Mr. Keith Hargrove, architect, explained the project, using Applicant Exhibit 1 (renderings of different views, materials, elevations and site plan).

After hearing no questions about the procedure, Mayor Manheimer opened the public hearing at 8:12 p.m.

Mr. Byron Greiner, representing the developers on the S&W building, the Bank of America Building and the Swicegood Building, said they intended to build a luxury hotel but have now decided to put their properties on the market, due to this proposed project. They wanted to invest in Asheville, but their feeling that if this project is built at this location, it will increase the population of undesirables that we deal with everyday in terms of homeless and panhandling. He has been talking with homeless providers, Buncombe County Commissioners, some members of City Council, and Mission Hospital to locate a campus of service providers in one location, where it would be cost efficient, delivery better services, and alleviate some of the issues with Mission and the emergency rooms. They have identified a location and shared that with the Commissioners. He noted that the Downtown Commission requested that this building contain public restrooms but that is not part of their design. If this project were in a different location, there would be over $10 Million worth of property possibly back on the tax roles.

Ms. Nancy Hayes felt that a lot of people have invested in downtown and felt that allowing this building at that location will drive business out of downtown. This property is a very expensive piece of real estate and the health and human services component of the County should be located in the Innsbruck Mall.

After rebuttal, Mayor Manheimer closed the public hearing at 8:18 p.m.

Mr. Frue said that the County concurs with the statement on the findings which are attached to City Exhibit 1.

In response to Councilman Davis, Mr. Creighton said that one out of five people in our community get assistance of some sort, and their clients are not only homeless and panhandlers, but everyday working people. Out of 100,000 clients a year, the homeless population is a very small percentage of their clients.

Councilman Smith said that the City & County 10-Year Plan to End Homelessness has reduced homelessness by over 82% in the community and they are looking at getting this to zero in the near future. The transient homeless folks that come through is a whole different population. He felt his proposed building is at the epic center of the bus service. It's the best place for this especially for families in need. He said that downtown is not just for the wealthy, but for everyone.

Councilman Bothwell felt that the project is a good idea; however, felt the parking deck is a waste of downtown real estate.

Councilwoman Wisler moved to approve the conditional use permit for Buncombe County Health and Human Services building and parking garage located at 40 Coxe Avenue, subject to the site plan and elevations and conditions outlined in the Technical Review Committee report, because the proposal meets the ten conditional use permit standards as demonstrated by the applicant. This motion was seconded by Councilman Pelly and carried unanimously.

C. PUBLIC HEARING RELATIVE REZONING PROPERTY NEAR 230 HILLIARD STREET AT 99999 S. FRENCH BROAD AVENUE AND AT 99999 S. GROVE STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 4391 - ORDINANCE TO REZONE PROPERTY NEAR 230 HILLIARD STREET AT 99999 S. FRENCH BROAD AVENUE AND AT 99999 S. GROVE STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 4392 - ORDINANCE AMENDING OFFICIALLY ADOPTED MAP PERTAINING TO THE CENTRAL BUSINESS DISTRICT: MASTER PLAN CONCEPTS - CONTEXT TRANSITION EDGE AND HEIGHT ZONE MAP PERTAINING TO THE REZONING OF 226 HILLIARD AVENUE

Urban Planner Sasha Vrtunski said that this is the consideration of an ordinance to rezone property near 230 Hilliard Street at 99999 S. French Broad Avenue and at 99999 S. Grove Street from RS-8 Residential Single-Family High Density District to Central Business District. This public hearing was advertised on February 14 and 21, 2015.

The site proposed for rezoning consists of two parcels with a combined area of .66 acres, located at the southwest corner of Hilliard and South French Broad Avenues. The site does not have any buildings and is landscaped. The larger parcel is split zoned Central Business District (CBD) and Residential Single-Family High Density (RS-8) with the majority of the parcel already being CBD. The smaller, interior parcel is zoned RS-8 and is .03 acre or 1300 square feet. The total area that would be re-zoned from RS-8 to CBD is approximately .11 acre (less than 5000 square feet).

The applicant is proposing a standard rezoning of two parcels to Central Business District (CBD).

This is the second standard rezoning request received by staff in this immediate location to expand the CBD along its southwest boundary. In the past year, City Council approved a rezoning request along Hilliard Avenue and including the corner of Hilliard and Asheland Avenues to the east (1.65 acres from RB and RS-8 to CBD at 226 Hilliard on June 24, 2014). In 2013, there were two other re-zonings on the east side of Asheland Avenue.

Approval of the rezoning request would require an adjustment to the Downtown Height Zones map. Similar to the previous requests along Asheland Avenue, staff proposes extending the intermediate height zone in this location, which would allow for a maximum height of 145 feet.

Additionally, the context transition edge, which is already in place in this area, would be applied along the parcel boundary adjacent to RS-8 zoning and would limit the building height allowed adjacent to that neighborhood.

As the Context Transition Zone is already in effect along this boundary, no additional review is required, but the Zone will extend farther south along a new boundary between the CBD and RS-8 if approved. Staff gave an update to the Downtown Commission on December 12, 2014. The proposal was reviewed by the Planning & Zoning Commission at their meeting on February 4, 2015, and recommended for approval by a vote of 7-0.

This site sits at the corner of Hilliard and South French Broad Avenues at the edge of the CBD with Aston Park to the west (zoned RM-8); offices and commercial uses (United Way Building) to the north (zoned CBD); commercial properties to the east (zoned CBD); and single-family residential to the south (zoned RS-8). Uses allowed in the CBD would be appropriate and compatible on this site. Design standards found in the UDO would require that any future development be pulled up towards Hilliard Avenue. While the maximum height permitted (145 feet) would be significantly greater than current RS-8 zoning (40 feet), the context transition edge would limit the height of structures within 100 feet of the neighborhood and provide a gradual scale at that property line.

There are policies throughout the *Asheville City Development Plan 2025* supporting the need for higher-densities and a mix of uses, especially concentrating on downtown and areas close to the CBD for this type of development. CBD zoning allows for a greater variety of uses and higher residential densities while maintaining and requiring design elements that will encourage multi-modal transportation and an urban form of development that is more amenable to the pedestrian experience.

Although the area proposed for rezoning is small, rezoning it to CBD will allow a greater use of the overall larger parcel. The smaller parcel, zoned RS-8, is not large enough to build upon, thus it makes sense to rezone it and allow it to be potentially consolidated with the parcel to the north in the future.

Similarly, the *Downtown Master Plan* anticipated that growth on the edges of the Central Business District would occur. A number of maps in the plan expanded beyond the current CBD boundary because these edge areas were noted as having the potential to grow and improve following an urban development pattern.

The *Strategic Plan* includes several objectives supporting higher density infill development with investment downtown and efforts that continue to implement the *Downtown Master Plan*. If the proposed rezoning is approved, future development on the site would be allowed higher residential densities and follow strict design requirements with emphasis on the pedestrian experience which would be consistent with goals of the *Strategic Plan* pertaining to downtown vitality and overall quality of life.

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff finds this request to be reasonable.

Considerations:

- This request would clean up the zoning district lines along parcel lines. It is current practice to have zoning district boundaries follow parcel lines.
- The zoning district lines were originally drawn at a time when there was not a Context Transition Zone, and therefore there was no protection for adjacent neighborhoods.
- Expansion of the CBD is generally recommended in the *2025 Plan,* and this rezoning will allow a greater use of the land on the corner of Hilliard and South French Broad.

- Application of the context transition edge and development standards in the UDO pertaining to building placement will minimize some impact to the adjacent neighborhood with future development
- Several similar requests have been approved in this immediate location over the past year and a half.

Staff recommends approval of the proposed rezoning, finding that the request to expand the CBD is consistent with City-adopted plans and strategic goals for development in this area.

Mayor Manheimer opened the public hearing at 8:30 p.m. and when no one spoke, she closed the public hearing at 8:30 p.m.

Mayor Manheimer said that members of Council have been previously furnished with copies of the ordinances and they would not be read.

Councilman Pelly moved to approve the zoning map amendment from RS-8 and Central Business District to Central Business District as a standard rezoning and the amendment to the height zone map and find that the request is reasonable, is in the public interest and is consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) the 2025 Plan and the Downtown Master Plan recommend CBD expansion; and (2) Design standards and the application of the context transition edge should minimize impact from future development on adjacent neighborhood. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 29 – PAGE 387
ORDINANCE BOOK NO. 29 – PAGE 390

D. PUBLIC HEARING TO CONSIDER A MAJOR SUBDIVISION WITH CONDITIONAL ZONING ON PROPERTY LOCATED ON WELLEN WAY FROM RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CREATION OF 7 SINGLE FAMILY LOTS AND ROADWAY TO SERVE THOSE LOTS, WITH A MODIFICATION REQUEST FOR LOT WIDTH.

Mayor Manheimer announced that the applicant has withdrawn this item from City Council's consideration.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Todd Stimson asked for City Council support of cannabis for medical use. Mayor Manheimer said that the City Council Governance Committee would review the request.

Councilman Davis was pleased to announce the Southern Conference starting on March 5-9, 2015, and encouraged the public to attend and enjoy themselves.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 8:38 p.m.

Magdalen Burleson
City Clerk

Esther E. Manheimer
Mayor

Tuesday – March 10, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; Acting City Manager Cathy Ball; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Councilman Davis, Consent Agenda Item "K" was removed from the Consent Agenda for discussion and/or individual vote.

At the request of Councilman Smith, Consent Agenda Item "M" was removed from the Consent Agenda for discussion and/or individual vote.

At the request of Mayor Manheimer, it was the consensus of Council to add the following resolution to the Consent Agenda: "Resolution supporting the North Carolina Historic Preservation Tax Credit Program's reinstatement in the North Carolina Tax Code."

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 24, 2015

B. RESOLUTION NO. 15-44 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONSTRUCTION AGREEMENT WITH HAREN CONSTRUCTION COMPANY FOR THE NORTH FORK WATER TREATMENT PLANT DAM INTAKE TOWER & CONDUIT REPAIRS PROJECT

Summary: The consideration of a resolution that authorizes the following relative to the North Fork Water Treatment Plant Dam Intake Tower and Conduit Repairs Project (1) the City Manager to enter into a construction agreement with Haren Construction Company, Inc., for the bid amount of $1,658,000; (2) the City Manager to execute any change orders to said contract or documents which may arise during construction of said project up to the budgeted amount; and (3) a contingency amount of $165,800.

The North Fork Water Treatment Plan Dam Intake Tower and Conduit Repairs Project (Project) consists of the construction and installation of all materials, labor, incidentals, and equipment necessary to: (1) remove and replace selected metal features inside the intake tower; (2) prepare, prime and re-paint remaining metal features inside the intake tower, on the access bridge and inside the conduit; (3) install fiberglass reinforced plastic (FRP) platforms, designated stem guides, ladder with fall arrest, and appurtenant features in the intake tower; (4) miscellaneous removal of utilities from within the conduit; (5) construct two reinforced concrete bulkheads in the conduit; (6) fabricate and install a steel gate on the upstream bulkhead in the conduit; (7) replace a portion of the existing raw water line at the downstream end of the conduit; (8) install a new HDPE access pipe, PVC carrier pipe and PVC drainage pipe and appurtenant features in the existing conduit; (9) fill the annular space of the existing conduit with leveling and

cellular concrete; and (10) install a new filter diaphragm around the existing conduit at the North Fork Water Treatment Plant in Black Mountain, North Carolina.

In response to an Advertisement for Bids for the construction project on June 9, 2014, the Department received one bid. Pursuant to N.C.G.S. § 143-132, three competitive bids are required for formal construction projects. Upon rebidding the project on August 6, 2014, the Department received five (5) bids in response to the second advertisement. Since the proposed award of the contract was protested by a bidder, all bids were rejected and the project was rebid on January 8, 2015. In response to the second rebid, the Department received three bids from the following:

1. Haren Construction Company, Inc. – Etowah, TN
2. NHM Constructors, LLC – Asheville, NC
3. Crowder Construction Company – Charlotte, NC

Following a review of bids by the City's project engineers, Schnabel Engineering project and City Staff, Haren Construction Company, Inc., was selected as the lowest responsible, responsive bidder for the bid amount of $1,658,000. If a contingency amount of $165,800 is approved, the total project budget would be $1,823,800.

Pros:
- This project will bring the intake tower and conduit up to code in preparation for construction of a new spillway.
- This project is aligned with the City and Departmental goal to provide safe and reliable service through continued investment and improvement of the City's water system through Capital Improvement Projects.

Con:
- Failure to award a construction contract would prevent the completion of this project, which is required in order to bring the intake tower and conduit up to code in preparation to construct a new spillway.

The funding needed for the construction agreement is currently allocated within the North Fork Water Treatment Dam/Tunnel Repairs Project in the Water Resources Capital Improvement Projects fund. No budget adjustment is necessary.

Staff recommends Council approval of a resolution that authorizes the following relative to the North Fork Water Treatment Plant Dam Intake Tower and Conduit Repairs Project (1) the City Manager to enter into a construction agreement with Haren Construction Company, Inc., for the bid amount of $1,658,000; (2) the City Manager to execute any change orders to said contract or documents which may arise during construction of said project up to the budgeted amount; and (3) a contingency amount of $165,800.

RESOLUTION BOOK NO. 37 - PAGE 47

C. RESOLUTION NO. 15-45 - RESOLUTION AUTHORIZING THE MAYOR AND DESIGNATED CITY STAFF TO PERFORM GRANT-RELATED ADMINISTRATIVE TASKS TO ACCESS FEDERAL TRANSIT ADMINISTRATION FUNDING

Summary: The consideration of a resolution authorizing the Mayor and designated City staff to perform grant related administrative tasks to access Federal Transit Administration (FTA) funding.

The City of Asheville became a designated recipient after the 2000 Census, because the region reached the 200,000 population threshold. The designation is defined by 49 U.S.C Section

5307 (A)(2) with the Federal Transit Administration for federal assistance authorized by 49 U.S.C chapter 53, Title 23, United States Code.

In order to access financial assistance through the FTA, the City of Asheville, as designated recipient of the French Broad River Metropolitan Region needs to perform administrative tasks for funding that comes to the region; this funding is made available through the FTA's website interface. Some of these tasks require specific officials and personnel to be accountable for. Tasks are as follows:

- Execute and file Certifications and Assurances, performed by the Mayor, the Deputy City Attorney or the City Attorney.
- Creation and submission of grants, performed by the Transportation Planning Manager or his/her designee.
- Grant execution, performed by the Mayor.

Last time a similar resolution was passed was on June 13, 2006. During the last Triennial Review conducted by FTA in 2013, the auditors recommended updating the titles of personnel that performs the grant administration tasks.

Pro:

- Performing FTA administrative tasks will allow access to transportation funding.

Con:

- The Federal Transit Administration funds partially transit operations, and some other transit related projects; the lack of compliance can put in jeopardy the funding allocated to those projects.

Though there is no direct impact, lack of compliance with FTA requirements can affect funding.

City staff recommends that City Council adopt a resolution authorizing the Mayor and city staff to perform FTA administrative tasks to access transportation funding, as listed above.

RESOLUTION BOOK NO. 37 - PAGE 49

D. MOTION TO ADOPT THE FINDINGS OF FACT AND CONCLUSIONS OF LAW FOR THE CONDITIONAL USE PERMIT FOR THE ADDITION TO THE HEALTH AND HUMAN SERVICES BUILDING AND NEW 650 SPACE PARKING STRUCTURE LOCATED AT 40 COXE AVENUE

E. RESOLUTION NO. 15-46 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT THE CONVEYANCE OF REAL PROPERTY AT 880 NEW HAW CREEK ROAD FROM HAW CREEK FIRE AND RESCUE INC. FOR THE CONTINUED OPERATION OF CITY OF ASHEVILLE FIRE STATION 12

Summary: The consideration of a resolution authorizing the City Manager to accept the conveyance of real property at 880 New Haw Creek Road for the continued operation of the City of Asheville Fire Station #12.

In 1962, AR and Hazel Masters donated 0.2 acres of land (PIN# 9659953741) to Haw Creek Fire and Rescue, Inc. for the exclusive purpose of operating a fire station from the property. In 2002, an additional 0.56 acres (PIN# 9659953914) was conveyed by Edward and Julie Masters for a total site measuring 0.76 acres. Haw Creek Fire and Rescue operated out of the site until the area became part of Asheville City limits. At that point, the City extended fire service to the area, and subsequently entered into a lease agreement with Haw Creek Fire and

Rescue for use of the building and premises to operate a community fire station, known as Fire Station #12.

The lease agreement between the City and Haw Creek Fire and Rescue, Inc. has now expired and according to specific provisions of the lease, the property is to be transferred to the City. The original deed restrictions that limit the use to fire protection services will remain in place, and the City will continue to utilize the property for this purpose.

Pros:

- Donation of an existing Community Fire Station
- Fee simple ownership of fire station facilities is preferable to leaseholds, in terms of potential future capital improvements and long term maintenance of the site

Cons:

- None

No monetary consideration required for the conveyance.

Staff recommends that Council adopt the resolution authorizing the City Manager to accept the property transfer of 880 New Haw Creek Road from Haw Creek Fire and Rescue, Inc.

RESOLUTION BOOK NO. 37 - PAGE 50

F. RESOLUTION NO. 15-47 - RESOLUTION AMENDING THE 2015 CITY COUNCIL MEETING SCHEDULE TO (1) CANCEL THE CITY COUNCIL COMMUNITY MEETINGS SCHEDULED FOR THE 5TH TUESDAYS OF ANY MONTH AND INSTEAD HOLD COMMUNITY ENGAGEMENT EVENTS ON SPECIFIC TOPICS THROUGHOUT THE YEAR; (2) ADD A COMMUNITY ENGAGEMENT EVENT REGARDING SHORT TERM RENTALS ON MARCH 25, 2015, AT 5:00 P.M. IN THE US CELLULAR CENTER BANQUET HALL; (3) ADD BUDGET WORKSESSIONS ON APRIL 28, 2015, AND MAY 12, 2015, AT 3:00 P.M. IN THE FIRST FLOOR NORTH CONFERENCE ROOM IN CITY HALL; (4) SCHEDULE A PUBLIC HEARING ON JUNE 9, 2015, TO CONSIDER THE FISCAL YEAR 2015-16 ANNUAL OPERATING BUDGET; AND (5) CANCEL THE DECEMBER 22, 2015, CITY COUNCIL FORMAL MEETING

RESOLUTION BOOK NO. 37 - PAGE 51

G. RESOLUTION NO. 15-48 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL SERVICES AGREEMENT WITH HAZEN & SAWYER FOR FAIRVIEW SERVICE AREA WATER SYSTEMS IMPROVEMENTS PHASE II

Summary: The consideration of a resolution authorizing the City Manager to enter into a professional services agreement with Hazen and Sawyer for the proposed amount of $967,500 plus a 5% contingency amount of $48,375 for a total project budget in the amount of $1,015,875 for the Fairview Service Area Water System Improvements Phase II Part 1.

The southeastern portion of the City of Asheville's (City) water system, referenced as the Fairview service area, is currently serviced with a high capacity pumping station and two major ground storage reservoirs. The South Buncombe Reservoir (5 MG) supplies suction to the South Buncombe booster pumping station, which discharges into the Concord Road reservoir (1 MG) creating the Concord Tank pressure zone. The Concord Tank reservoir pressure is reduced through a pressure reducing valve to create the Mine Hole Gap pressure zone. Formerly, the

Mine Hole Gap pressure zone was supplied by its own pumping station and reservoir. There are also several small pressure zones served by localized pump stations and ground storage tanks within these two major pressure zones.

Over time, increased growth and changes to the water system have made it more difficult to meet water capacity demands in this service area. It is the City's desire to improve capacity and delivery methods for the service area. Also, lower areas within these pressure zones, particularly along the Cane Creek Road corridor, experience operating pressures in excess of what is required or desirable. Investigating options for pressure reduction strategies in the Fairview Service area will be another component of this study.

In January of 2013, the Water Resources Department (Department) issued a Request for Qualifications (RFQ) for Engineering Services related to the project. The RFQ specified that the project would be divided into two phases and completed by the same engineering firm. In response to that RFQ, the department received ten (10) proposals. A review team, comprised of Department staff reviewed these proposals and recommended the firm Hazen and Sawyer.

The overall water system improvement initiative was subdivided into two phases. The scope of the first phase included existing facility investigations, hydraulic modeling, development of design alternatives with preliminary engineering and cost analysis. On May 14, 2013, Council approved a resolution to award an Engineering Services Contract for Phase I of the project to Hazen and Sawyer in the amount of $95,700. A contingency amount of $9,570 was added for a total project budget in the amount of $105,270.

Hazen and Sawyer successfully completed Phase I of the project and Department staff selected the design alternative to best address an array of water issues in the Fairview Service Area. The selected alternative will result in the construction of a series capital improvement projects. It is anticipated that these series of capital improvement projects will be constructed in three parts over an 8 year period with a total estimated design and construction cost of $17.6 million. Part 1 consists of a new Booster Pumping Station, a new 0.5 Million Gallon Water Storage Reservoir and 4 pressure reducing valve stations. Part 2 will consist of a new 3 mile section of 12 inch water transmission main along Hwy 74-A . Part 3 will consist of 5 miles of new 12 inch water transmission main along Cane Creek Rd and Lower Christ School Road.

This proposed professional services agreement is for the full engineering survey and design, property acquisition, permitting and contract administration work for part 1 of the capital improvements. The preliminary opinion of cost for part 1 of the capital improvements is $3,250,000 with a construction completion date of June 2017. Department staff met with Hazen and Sawyer and negotiated an Engineering Services Contract for Phase II Part 1 of the project in the amount of $967,500 plus a 5% contingency amount of $48,375 for a total project budget in the amount of $1,015,875.

Pros:

- This project will improve water capacity and delivery methods for the Fairview Service Area.
- Reliability of water delivery will be improved with an additional connection to the distribution system from a different portion of the distribution network.
- This project will also lead to strategies targeting areas of low and high pressures in the service area.

Con:

- None.

The funding needed for the professional services agreement is currently allocated within the Fairview Service Area Waterline Improvements Project in the Water Resources Capital Improvement Projects fund. No budget adjustment is necessary for the professional services agreement.

Amount Available in Fairview Service Area WL Project	$2,544,730.00
Amount Needed for Hazen and Sawyer Engineering Contract	$1,015,875.00
Amount Remaining in Fairview Service Area WL Project	$1,528,855.00

The amount remaining in the Fairview Service Area Waterline Improvements Project will be saved for the construction portion of the project, which is estimated at $12 million over the next eight years. The WRD is in consultation with the Finance Department to determine if the cost of this project can be added to the 2017 Revenue Bond issue, along with the $40 million North Fork WTP Dam/Spillway Upgrade Project for a total issue of $52 million. A requested reimbursement resolution would allow some expenditures to be recovered retroactively.

Staff recommends City approval of a resolution to (1) authorize the City Manager to enter into a professional services agreement with Hazen and Sawyer for the proposed amount of $967,500; (2) approve a 5% contingency amount of $48,375 for a total project budget in the amount of $1,015,875 for the Fairview Service Area Water System Improvements Phase II Part I; and (3) authorize the City Manager to execute any change orders arising during the project up to the project budget amount.

RESOLUTION BOOK NO. 37 - PAGE 52

H. RESOLUTION NO. 15-49 - RESOLUTION AUTHORIZING THE STANDARDIZATION OF CITY OF ASHEVILLE PURCHASES WITH MUELLER SYSTEMS LLC FOR THE 5/8" RESIDENTIAL WATER METERS FOR CONSISTENCY IN OPERATION AND FUNCTIONALITY

Summary: The consideration of a resolution authorizing the standardization of City of Asheville purchases with Mueller Systems, LLC, for the 5/8" Residential Water Meter for consistency in operation and functionality.

The Water Resources Department (Department) has been utilizing the Mueller Systems 5/8" residential water meter throughout the entire water system since 2009. As the time draws near to request updated bids for water meters, the Department would like to continue to use the Mueller Systems 5/8" residential water meter. By continuing to use the Mueller Systems 5/8" residential water meter, the Department will (a) ensure compatibility with the existing system of meters and the Mueller Systems Automated Meter Reading (AMR) devices, and (b) reduce costs to maintain, repair, and test meters. The Department has been able to purchase meters with the AMR device factory-attached, avoiding in-field splices which could create problems. In the past, Mueller Systems has offered a 2% discount on invoices if paid in a timely manner.

If approved, the City's authorization for standardization shall be effective for up to 5 fiscal years (FY '19). At that point, the matter would be re-visited to determine if authorization to standardize should continue or if it should be released.

Pros:

- Standardization of the Mueller Systems 5/8" residential water meter will ensure consistency with training and equipment used.
- Standardization will ensure compatibility with the Mueller Systems AMR devices. The AMR project cost the department approximately $8.3 million, so it is in the City's best interest that the meter be compatible with the AMR system.

Con:

- If standardization is not authorized and a bid for water meters is issued, the lowest bidder may not be Mueller Systems. The Department would then have to order a complete new

inventory of residential water meters, retraining of staff on the new equipment, and potential compatibility issues with the Mueller Systems AMR system.

The Department budgets for the purchase of water meters in the Meter Services annual operating budget. Standardizing the Mueller Systems 5/8" residential water meters will not change how their procurement is budgeted.

Staff recommends Council adopt a resolution authorizing the standardization of City purchases with Mueller Systems, LLC, for the 5/8" Residential Water Meter for consistency in operation and functionality.

RESOLUTION BOOK NO. 37 - PAGE 53

I. ORDINANCE NO. 4393 - ORDINANCE AMENDING SECTION 1-5 OF THE CODE OF ORDINANCES REGARDING CHANGES TO NOTICE REQUIREMENTS FOR ALL CIVIL PENALTIES

Summary: The consideration of amending Section 1-5 of the Asheville City Code.

1. City of Asheville Code Section 1-5

Section 1-5 of the City of Asheville Code of Ordinances (Ordinance number 2585), is entitled "General penalty; civil remedies; enforcement of ordinances; continuing violations." Subsections (j) and (k) in part read as follows:

(j) Upon determination of a violation of any section of this Code, the penalty for which is a civil penalty, **the city shall cause a warning citation to be issued to the violator** ... **The warning citation shall specify that a second citation shall incur a civil penalty.**

(k) **Upon failure of the violator to obey the warning citation, a civil citation shall be issued** by the appropriate official of the city and either served directly on the violator ....

(emphasis added)

2. City of Asheville Ordinances Assessing Civil Penalties

The City's authority to assess civil penalties to enforce its ordinances is found in N.C. Gen. Stat. § 160A-175(c). That statute reads:

> (c) An ordinance may provide that violation shall subject the offender to a civil penalty to be recovered by the city in a civil action in the nature of debt if the offender does not pay the penalty within a prescribed period of time after he has been cited for violation of the ordinance.

There are many ordinances in Asheville's City Code that subject violators to a civil penalty. Currently, pursuant to Section 1-5(j) and (k), before assessing any civil penalty for a violation of any City ordinance, the violator must be issued a "warning citation." This section is both ineffective and problematic for several reasons, including but not limited to:

1. Many of the City's ordinances that subject offenders to civil penalties independently require a warning citation or notice prior to assessing a civil penalty. (See, e.g., Sections 7-18-3 and 16-3(e)); and

2. The enforcement of other ordinances is hindered by the notice requirement of Section 1-5. For example, Section 19-143(c) makes it illegal to park a vehicle along a street or

alley in the Central Business District, unless there is a marking that designates that parking is specifically allowed within an area in the CBD. A violation of Section 19-143(c) subjects the offender to a $10.00 penalty. Pursuant to Section 1-5, before assessing a civil penalty for illegally parking in the CBD, the violator must first be issued a warning citation. This procedure hinders the City's ability to properly enforce illegal parking in the CBD. The same result occurs with overtime parking at metered or nonmetered spaces, handicapped parking violations, safety equipment at skateboard parks, violations regarding pushcarts, outdoor dining areas and outdoor merchandise areas, animal control violations and noise violations.

3. The Transportation Department has also expressed concern with Section 1-5, as they must be able to issue parking tickets for overtime parking without first issuing a warning citation. With the proposed amendment, Staff will still be able to issue warning citations in their discretion, however, it will no longer be a mandatory requirement.

Based on all of the above, amending Section 1-5 to remove the requirement for a warning citation is in the City's best interest. Staff presented the proposed amended ordinance to the Public Safety Committee on February 23, 2015, and the Committee unanimously agreed to recommend approval of the amended ordinance to City Council.

Pros:

- Removes repetitive and unnecessary notice requirements prior to assessing civil penalties.
- Improves enforcement of ordinances.
- Complies with the authority granted in N.C. Gen. Stat. § 160A-175.
- Clarifies ambiguities.

Con:

- None noted.

There is no known fiscal impact associated with this amendment.

City staff recommends City Council adopt the ordinance amending Section 1-5.

ORDINANCE BOOK NO. 29 - PAGE 393

J. ORDINANCE NO. 4394 - BUDGET AMENDMENT TO MOVE FUNDING FOR THE DESIGN OF THE CRAVEN STREET GREENWAY PAVILION

Summary: The consideration of a technical capital project budget amendment in the amount of $16,070 to move funding for the design of the Craven Street Greenway pavilion from the General Fund to the Craven Street Project in the General Capital Projects Fund.

Additional design is required to accommodate a pavilion at the trailhead of the Craven Street Greenway. The design contract is with Equinox Environmental. The construction will be funded by the Tourism, Product Development Fund grant.

This component of the Craven Street capital project was not included in the adopted budget for the project. Staff initially planned to fund the design by utilizing existing funds within the Economic Development Department's Fiscal Year 2014-15 General Fund budget. In order to provide more accurate fixed asset accounting, Finance Department staff is recommending that the expense instead be charged to the Craven Street capital project. In order to accomplish this, the Craven Street capital project budget must be increased by $16,070. The amendment is funded by a transfer from the General Fund to the General Capital Projects Fund.

Pros:

- Provides budget authorization for project expenses.

- Conforms the City's financial records with generally accepted accounting and reporting standards.

Con:

- None.

There is no net fiscal impact to this budget amendment. Budget is simply being transferred from one fund to another.

City staff recommends City Council adopt the technical capital project budget amendment in the amount of $16,070 to move funding for the design of the Craven Street Greenway pavilion from the General Fund to the Craven Street Project in the General Capital Projects Fund.

ORDINANCE BOOK NO. 29 - PAGE 395

K. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A DONATION AGREEMENT WITH THE 26TH NORTH CAROLINA FOR THE RESTORATION OF THE VANCE MONUMENT. AND TO ACCEPT THE PROJECT UPON SATISFACTORY COMPLETION OF THE RESTORATION

This item was removed from the Consent Agenda for discussion and/or an individual vote.

L. ORDINANCE NO. 4395 - ORDINANCE AMENDING THE 2014 FEES & CHARGES MANUAL FOR FEE ADJUSTMENTS AT THE ASTON PARK TENNIS CENTER

Summary: The consideration of an ordinance amending the Fees & Charges Manual for proposed fee adjustments at the Aston Park Tennis Center (Tennis Center) for the Fiscal Year 2014-2015.

The major types of revenue available to North Carolina counties and municipalities are local taxes (including property taxes); local fees, charges and assessments; and intergovernmental and miscellaneous revenue. Municipalities have increasingly looked for appropriate opportunities to implement local fees and charges in order to align service provision directly with payment; therefore, the person or entity receiving the benefit of a service pays for the service.

A study of the Tennis Center's operations, completed by City staff, reviewed opportunities to reduce the level of subsidy. The study included a public engagement process with Tennis Center users that was conducted during the summer of 2014 and fee proposals were shared.

In a concurrent process, the City engaged Matrix Consulting Group (consultants) to conduct a Cost of Services Study (User) Fee Study (Cost of Services Study) for the Parks & Recreation Department. The consultants reviewed direct and indirect costs of providing fee-based recreation services. The Tennis Center was included as a component of the study.

Based on the results of the Cost of Services Study and staff analysis, staff recommends amending the current fees at the Tennis Center effective immediately, in order for staff to implement the change prior to the Tennis Center's opening on April 1, 2015. Amending the general user fees will help reduce the level of operational subsidy at the Tennis Center, in accordance with direction provided by the Finance Committee.

Proposed FY 2014-15 Fee Amendment:

1. *Changes to Aston Park Tennis Center pass holder fees.* If approved, the staff recommended changes to pass holder fees at the Aston Park Tennis Center would generate additional revenue as summarized below.

Fund	Projected Range of Additional Revenue
General Fund	$14,668 -- $43,125

The proposed FY 2014-15 fee adjustments were reviewed by the Council Finance Committee on February 24, 2015.

Pros:

- Provides additional revenue to help balance the FY 2014-15 budget.
- Provides staff with time to begin communicating and implement fee changes to citizens, customers and stakeholders in advance of the April 1, 2015 opening of the Aston Park Tennis Center.

Con:

- None

The following are fiscal impacts: (1) Recreation best practices show that tennis facilities of this type shift a greater burden of the costs from the taxpayer subsidy to the individual users. The current Tennis Center subsidy is approximately $150,000 annually. The goal of fee increase is to enhance revenues with an end goal of reducing the subsidy to $70,000 annually. (2) The proposed set of fee increases is projected to cut the level of subsidy by at least 18% in FY 2015/16; (3) The proposed fee increase is the first phase in a 3-year step up fee proposal; and (4) The anticipated General Fund subsidy for the Tennis Center in FY 2015-16 is projected at $135,332 based on revenue enhancements alone. Further reductions in the subsidy may be realized through operational changes impacting expenses.

Staff recommends that Council adopt the ordinance amending the Fees & Charges Manual for proposed fee adjustments at the Aston Park Tennis Center (Tennis Center) for the Fiscal Year 2014-2015.

ORDINANCE BOOK NO. 29 - PAGE 397

M. ORDINANCE AMENDING CHAPTER 11 OF THE CODE OF ORDINANCES TO REGULATE E-CIGARETTES TO THE SAME EXTENT AS TRADITIONAL LIGHTED CIGARETTES

This item was removed from the Consent Agenda for discussion and/or an individual vote.

N. RESOLUTION NO. 15-51 - RESOLUTION SUPPORTING THE NORTH CAROLINA HISTORIC PRESERVATION TAX CREDIT PROGRAM'S REINSTATEMENT IN THE NORTH CAROLINA TAX CODE

Summary: The City of Asheville supports the reinstatement of the North Carolina Historic preservation Tax Credit Program back into the North Carolina Tax Code as a tool to spur economic recovery in our community.

RESOLUTION BOOK NO. 37 - PAGE 55

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda, with the deletion of Consent Agenda Items "K" and "M", and the addition of Consent Agenda Item "N". This motion was seconded by Councilwoman Wisler and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

K. RESOLUTION NO. 15-50 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A DONATION AGREEMENT WITH THE 26TH NORTH CAROLINA FOR THE RESTORATION OF THE VANCE MONUMENT. AND TO ACCEPT THE PROJECT UPON SATISFACTORY COMPLETION OF THE RESTORATION

Summary: The consideration of a resolution authorizing the City Manager to enter into a donation of services agreement with the 26th North Carolina (26th) for the restoration of the Vance Monument; and for staff to accept the project upon satisfactory completion of the restoration.

The Vance Monument, constructed in 1897 at the west end of Pack Square Park, commemorates the life of Zebulon B. Vance, Governor of North Carolina during the Civil War, and U.S. Senator from North Carolina.

In 2008, the City of Asheville (City) conducted a condition report of its public art collection that includes the Vance Monument. The report found the monument and its associated plaques and fence to be in fair to poor condition with deterioration in mortar joints, corrosion, deteriorated paint, and over all dirty and stained.

In 2012, the 26th North Carolina entered into an agreement with the City to adopt the Vance Monument as a preservation project in which the 26th was authorized to raise the funds to support the cost of restoration. In 2014, the 26th accomplished its fundraising goal of $115,000 to support the project.

As cited on its website, 26nc.org., the 26th is a non-profit organization designed to commemorate the lives of North Carolina soldiers and civilians during the period of the American Civil War; and to support the preservation of land, places and structures that played a role in that historic time period.

During the project, the 26th will (a) serve as the project manager, (b) retain all funds and assume liability for the project, and (c) contract with Kestrel Construction for project management, and with Karkadoulias Bronze Art for the actual restoration of the monument. The scope of the restoration includes 1) clean granite, replace all deteriorated chalk and repoint, 2) repair and clean all bronze plaques, 3) clean and paint the iron fence surrounding the monument.

The City, which will serve as the project administrator and provide oversight, will contribute $11,000 to the overall project cost, prepare the site for work, repair the wrought iron fence, and remove, preserve and replace the existing time capsule located in the base of the monument.

The project work will occur in April 2015 and is anticipated to take three to four weeks to complete. During that time, a construction fence will surround the base of the monument, and scaffolding will extend to the full height of the monument. A rededication ceremony is anticipated to be held by the 26th following the completion of work on May 16, 2015.

The City's Community and Economic Development Department is responsible for the overall management of the City's Public Art Program. The Parks and Recreation Department is responsible for the maintenance and repair of the public art collection.

Pro:

- Assist the city in accomplishing the restoration of the most prominent and highly valued historic landmark in downtown Asheville.

Con:

- None

The Vance Monument restoration will not increase the City's annual operating budget. Funds for future maintenance of the monument will be available in the Public Art and Maintenance Budget.

Staff recommends that Council adopt a resolution authorizing the City Manager to enter into a donation of services agreement with the 26th North Carolina for the restoration of the Vance Monument, and to accept the project upon the satisfactory completion of the restoration valued at $115,000.

Assistant Park and Recreation Director Debbie Ivester said that the Vance Monument is part of the City of Asheville's public art collection. In 2008, the City conducted a condition assessment on the monument which revealed a significant amount of corrosion, failing mortar joints, corroded markers, and over all dirt and stain. The 26th North Carolina has made a generous donation to the City of Asheville to make restoration possible. Even though the City of Asheville is contributing $11,000, the credit really goes to the 26th North Carolina for their $115,000 donation. The restoration will be conducted by a professional conservator following the guidelines of the American Institute for Conservation.

Mr. Chris Roberts, representing the 26th North Carolina, said that during the restoration, the monument will be enclosed in a construction fence, and encased to its full height in scaffolding. The restoration will involve meticulous repair of mortar joints and sealant, followed by an overall cleaning of the monument and the bronze plaques. The final touch will be to repair and paint the wrought iron fence surrounding the monument. He looked forward to the opportunity of restoring the monument and restoring the story behind the lifespan of the monument.

On behalf of City Council, Councilman Davis appreciated the work of the 26th North Carolina.

When Mayor Manheimer asked for public comment, no one spoke.

Councilman Davis moved for the adoption of Resolution No. 15-50. This motion was seconded by Councilwoman Wisler and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 54

M. ORDINANCE NO. 4396 - ORDINANCE AMENDING CHAPTER 11 OF THE CODE OF ORDINANCES TO REGULATE E-CIGARETTES TO THE SAME EXTENT AS TRADITIONAL LIGHTED CIGARETTES

Summary: The consideration of an ordinance amending Chapter 11 of the Code of Ordinances to regulate e-cigarettes to the same extent as traditional lighted cigarettes.

The use of e-cigarettes, a noncombustible product that employs a mechanical heating element, battery, or electronic circuit regardless of shape or size and that can be used to heat a liquid nicotine solution contained in a vapor cartridge, continues to gain popularity among

traditional cigarette smokers. Following a number of complaints from riders of the City's transit buses, pertaining to secondhand exposure to vapors released from e-cigarettes, the City's Transit Committee asked that the City's Smoking Ordinance be amended to include e-cigarettes.

Since e-cigarettes are not lighted tobacco products, they cannot be regulated the same as traditional cigarettes under Chapter 130A of the North Carolina General Statutes. Research revealed that the Federal Government and North Carolina State Government were both considering legislation to regulate the use of e-cigarettes, and perhaps totally pre-empt local regulation. Although the Federal Drug and Food Administration and the State of North Carolina have enacted rules/legislation respectively, regulating the sale and distribution of e-cigarettes to minors, neither pre-empts local regulation. According to the School of Government, the City may (and many North Carolina cities and counties have), adopt an ordinance regulating the use of e-cigarettes under Chapter 160A-174 of the North Carolina General Statutes, known as the "Police Powers." Chapter 160A-174 allows the City to define, regulate, prohibit, or abate acts, omissions, or conditions detrimental to the health, safety or welfare of citizens.

While the long term health effects of exposure to 2nd hand vapors emitted from e-cigarettes are unknown, according to a Study conducted by the Federal Drug and Food Administration, on 2 leading e-cigarette brands, there was evidence of toxic chemicals in both. Critics point to studies revealing that exhaling vapors from e-cigarettes releases measurable amounts of carcinogens and toxins into the air. Finally, in the last six months, there have been battery explosions either during charging of the e-cigarette or while in use.

The proposed ordinance prohibits the use of e-cigarettes to the same extent as traditional lighted cigarettes with enforcement being the same as traditional lighted cigarettes.

The proposed ordinance was presented to the Transit Committee on February 3, the Public Safety Committee on February 23 and the Multi-Modal Commission on February 25, with all three bodies unanimously approving and recommending placement on City Council's agenda for adoption.

Pro:

- Allows for the regulation and enforcement of e-cigarettes the same as traditional lighted cigarettes

Con:

- Require additional signage to be placed alongside the current "No Smoking" signs

Potential fiscal impacts, such as the addition of signage, are expected to be minimal.

Staff requests that City Council adopt the amended ordinance to regulate e-cigarettes to the same extent as traditional lighted cigarettes.

Councilman Smith asked to hear the Public Safety Committee's process and deliberations. Councilman Pelly, member of the Public Safety Committee, said that staff expressed concern that in our public facilities we do not allow smoking, and there are concerns that the health effects of e-cigarettes are unknown at this time. To err on the side of caution, the Committee felt it was appropriate to regulate e-cigarettes to the same extent as traditional lighted cigarettes.

Councilman Davis noted that this would regulate e-cigarettes, as traditional lighted cigarettes, in City property controlled by the City of Asheville, i.e., City parks, buses, Transit Center, etc.

Councilman Bothwell said that the FDA is still waiting to make a determination. Their concern is there are approximately 250 different e-cigarette devices available and there is no consistency on what is in them. Some don't cause the kind of second hand pollution that lighted

cigarettes are known to cause, but others may cause that. He felt the same rules should apply to e-cigarettes as lighted cigarettes until we know something different.

Deputy City Attorney Martha McGlohon provided the Council with an amended ordinance, which revised the definition of e-cigarettes. She thanked Ms. Karen Collins with the N.C. Dept. of Health and Human Services for her assistance with the revised definition.

When Mayor Manheimer asked for public comment, no one spoke.

Councilman Bothwell moved for the adoption of Ordinance No. 4396. This motion was seconded by Councilman Pelly and carried unanimously.

ORDINANCE BOOK NO. 29 - PAGE 399

III. PRESENTATIONS & REPORTS:

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF GREYMONT VILLAGE APARTMENTS LOCATED ON SARDIS ROAD FROM INDUSTRIAL DISTRICT AND COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION FO A MULTI-FAMILY APARTMENT DEVELOPMENT, WITH CONDITIONS REGARDING ACCESS AND LOT FRONTAGE

At the applicant's request, Councilman Smith moved to continue this public hearing until May 12, 2015. This motion was seconded by Councilman Bothwell and carried unanimously.

B. PUBLIC HEARING TO CONSIDER A REQUEST FOR A CONDITIONAL ZONING FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR A NINE-LOT MAJOR SUBDIVISION LOCATED OFF OF SHELBURNE DRIVE

At staff's request, Councilman Bothwell moved to continue this public hearing until March 24, 2015. This motion was seconded by Councilman Pelly and carried unanimously.

V. UNFINISHED BUSINESS:

A. CONFIRMATION OF ASHEVILLE CITY BOARD OF EDUCATION INTERVIEWEES

Vice-Mayor Hunt said that the terms of Jacquelyn Hallum and Precious Folston, as Asheville City Board of Education members, expire on April 1, 2015.

The following individuals have applied for a vacancy on the Asheville City Board of Education: Joanna Best, John S. Brigham, Martha L. Geitner, Elizabeth Hampton Jones, James "Drew" Shelfer, Melissa Sites, Greg Walker Wilson, Verita Brown Woods, Shaunda Sandford, James E. Lee III, Maceo Z. Keeling, Kate Fisher, Steve Dykes and Erica Englesman Rawls.

Ms. Sites did not submit responses to essay questions, therefore, she will not be considered for appointment.

After reviewing all applications and essay questions, and after speaking highly of all applicants who applied, Joanna Best received 4 votes; John Brigham received no votes; Steve Dykes received 7 votes; Kate Fisher received 2 votes; Martha Geitner received 4 votes; Elizabeth Hampton Jones received 2 votes; Maceo Keeling received 1 vote; James Lee received 6 votes; Erica Englesman Rawls received 1 vote; Shaunda Sandford received 6 votes; Drew Shelfer received no votes; Greg Walker Wilson received 7 votes; and Verita Brown Woods received 2 votes.

Therefore, it was the consensus of Council to interview Joanna Best, Steve Dykes, Martha L. Geitner, James Lee, Shaunda Sandford and Greg Walker Wilson. Those interviews will be held in the afternoon of March 24, 2015, with appointments being made later that evening in the formal session. Both appointments will be effective April 1, 2015.

Vice-Mayor Hunt explained how the background check process will work for those candidates selected for interviews, noting that the results will not be public record.

VI. NEW BUSINESS:

A. BOARDS & COMMISSIONS

Regarding the HUB Community Economic Development Alliance, it was the consensus of the Commission to re-advertise, since only two applicants responded to the two seats available: Kendra Penland and Ted Figura.

RESOLUTION NO. 15-52 - RESOLUTION APPOINTING MEMBERS TO THE AFRICAN AMERICAN HERITAGE COMMISSION

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that Ms. Jan Goffney and Mr. Al Whitesides have resigned from the African American Heritage Commission, thus leaving two unexpired terms - July 1, 2017, and July 1, 2016.

The following individuals have applied for a vacancy on the African American Heritage Commission: Mychal Bacoate, Jesse Junior, Georgia Shannon, Daniel Jonas Young, Viola Spells, Damita Jo Wilder, Willie Cameron Jr. DeWayne Barton, Tiffany DE'Bellott and Alberta Williams.

The African American Heritage Commission recommended, and the Boards & Commission Committee concurred, to recommend appointing DeWayne Barton and Viola Spells.

Councilman Pelly moved to (1) appoint DeWayne Barton to serve the unexpired term of Ms. Goffney, term to expire July 1, 2017, or until his successor has been appointed; and (2) appoint Viola Spells to serve the unexpired term of Mr. Whitesides, term to expire July 1, 2016, or until her successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 56

RESOLUTION NO. 15-53 - RESOLUTION APPOINTING A MEMBER TO THE PUBLIC ART & CULTURAL COMMISSION

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that Mr. Victor Palomino has resigned from the Public Art & Cultural Commission, thus leaving an unexpired term until June 30, 2017.

The following individuals have applied for a vacancy on the Commission: Jay Miller, Nancy S. Long and Irene Morris.

The Public Art & Cultural Commission recommended, and the Boards & Commission Committee concurred, in appointing Dr. Jay Miller.

Councilman Smith moved to appoint Jay Miller to serve the unexpired term of Mr. Palomino, term to expire June 30, 2017, or until his successor has been appointed. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 57

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Chef Good and Chef Liam urged City Council to ask candidates for the Asheville City Board of Education about how they feel about changing the child nutrition to healthy foods in City schools.

Closed Session

At 5:30 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) to prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3). This motion was seconded by Councilman Pelly and carried unanimously.

At 5:43 p.m., Councilman Bothwell moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 5:43 p.m.

Magdalen Bowlson
CITY CLERK

Edwin C. Manheimer
MAYOR

Tuesday – March 24, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING APRIL 6, 2015, AS "TARTAN DAY" IN THE CITY OF ASHEVILLE

Mayor Manheimer read the proclamation proclaiming April 6, 2015, as "Tartan Day" in the City of Asheville. She presented the proclamation to Mr. Judson Lohr, who briefed City Council on some activities taking place during the day.

II. CONSENT AGENDA:

At the request of Councilman Smith, Consent Agenda Items "E" was removed from the Consent Agenda for discussion and/or individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 10, 2015

B. MOTION TO REQUEST THE BUNCOMBE COUNTY BOARD OF ELECTIONS TO ARRANGE FOUR ADDITIONAL EARLY VOTING SITES (ONE EACH IN NORTH, SOUTH, EAST AND WEST SECTIONS OF ASHEVILLE) THE ONE WEEK (INCLUDING SATURDAY) IMMEDIATELY PRECEDING THE 2015 CITY COUNCIL GENERAL ELECTIONS

Summary: The Buncombe County Board of Elections has asked if the City of Asheville will be requesting remote additional early voting sites for the General election on November 3, 2015. There are 37 normal polling places for City Council elections - during the primary and the general elections. The City must notify the Board of Elections 30-45 days prior to the election if they would like to have more remote sites, in order for them to submit a plan of implementation to the State Board of Elections for approval. The City can let the Board of Elections know what locations they would like for a remote site; however, the Board of Elections will ultimately have to find a suitable site in that area.

In 2013, City Council approved four additional early voting sites (one each in the North, South, East and West sections of Asheville, preferably at a library or community center) the one week (including Saturday) immediately preceding the City Council general election. The cost for those additional sites was approximately $20,000. In 2013, 2,453 people voted in the four additional early voting locations.

If City Council chooses to move forward with the additional early voting sites, the Budget staff will include that amount in the City Manager's recommended budget which will be considered by City Council in May.

At the March 10, 2015, Governance Committee meeting, the Committee recommended the City move forward with requesting the four additional early voting sites, with suggestions that the East location be in the East Asheville Community Center, and if a different location is necessary for the Election Services Office, that the Stephens-Lee Community Center or the Senior Opportunity Center sites be considered.

C. RESOLUTION NO. 15-54 - RESOLUTION ACCEPTING AYR COURT AND AN EXTENSION OF QUAIL HOLLOW DRIVE AS CITY- MAINTAINED STREETS

Summary: The consideration of a resolution to accept Ayr Court and an extension of Quail Hollow Drive as city-maintained streets.

Code of Ordinances Sec. 7-15-1(f)(4)a requires that streets dedicated for public use be accepted by resolution of the City Council. The developer submitted a written request via e-mail message on November 10, 2014 asking the City to accept the subject streets as city-maintained streets.

Ayr Court from Quail Hollow Drive to its dead-end is a developer-constructed street that has an average width of 22 feet with valley curb, a length of 0.05 mile, and a right-of-way width of 45 feet.

Quail Hollow Drive (extension) from its dead-end to Quail Hollow Drive is a developer-constructed street that has an average width of 22 feet with valley curb, a length of 0.10 mile, and a right-of-way width of 45 feet.

Transportation Department staff, Fire Department staff, and Public Works Department staff inspected the subject streets and determined that they were constructed according to current standards as indicated in the City of Asheville's Standard Specifications and Details Manual.

Following City Council's approval of this resolution, the subject streets will be added to the official Powell Bill List.

Pros:

- The City of Asheville will receive Powell Bill Funds from the North Carolina Department of Transportation (NCDOT) to help maintain the streets.
- The streets provide access in a residential community.

Con:

- Powell Bill Funds will not cover 100% of the total cost to maintain the streets.

There will be no initial financial impact to the City, although the responsibility of maintenance will belong to the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the streets.

Staff recommends that City Council accept Ayr Court and an extension of Quail Hollow Drive as city-maintained streets.

RESOLUTION BOOK NO. 37 - PAGE 58

D. RESOLUTION NO. 15-55 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO PROVIDE A SECTION 5307 CAPITAL GRANT TO BE

USED FOR THE STATE MATCH TO PURCHASE A COMPRESSED NATURAL GAS REPLACEMENT BUS FOR HENDERSON COUNTY'S TRANSIT SYSTEM

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) to provide a Section 5307 Capital Grant to be used for the State match to purchase one Compressed Natural Gas replacement bus for Henderson County's transit system.

As a result of the 2000 Census, the City of Asheville was reclassified from a non-urbanized area to an urbanized area with a population greater than 200,000 persons and now includes municipalities in Buncombe, Haywood, and Henderson counties. After the reclassification, Henderson County's transit system became part of the transit systems operating in the overall urbanized area. The Federal Transit Administration named the City of Asheville the designated recipient and as a result, the City of Asheville oversees all of the Federal funding administration. The City of Asheville and Henderson County have signed a sub-recipient agreement that specifies how the funds are disbursed. The City of Asheville is accountable to the Federal Transit Administration regarding the use of all Federal funds and owns all the capital items that Henderson County purchases with Federal funds.

The estimated total cost of the subject project is $148,600. Federal funds will provide $115,976 covered with grant NC-90-X439; this grant requires a match of $28,994, $14,103 provided by NCDOT and the remaining $18,521 provided by Henderson County. The City of Asheville performs all of the administrative tasks including the bidding process, requests for funding, review of documentation, and reporting. The bus has already been ordered, but confirmation from the state's participation came recently.

Pros:

- The CNG bus will produce savings in maintenance and fuel costs.
- The Federal Transit Administration (FTA) provides approximately $115,976 of the total estimated project cost.
- Henderson County provides $18,521 of the total estimated project cost and NCDOT provides the remaining $14,103.
- There is no cost obligation for the City of Asheville other than administrative expenses.

Con:

- The City of Asheville is responsible for administrative expenses including staff time to oversee the project.

The total estimated project cost is $148,600, with $115,976 coming from Federal funds, $18,521 coming from Henderson County and $14,103 from the NCDOT. There is no direct fiscal impact to the City of Asheville, however the City's cost of administering the project is not recovered.

City staff recommends that City Council approve a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation in the amount of $14,103, as State match to purchase one CNG bus.

RESOLUTION BOOK NO. 37 - PAGE 60

E. RESOLUTION ADOPTING THE 2015-16 CITY COUNCIL STRATEGIC OPERATING PLAN

This item was removed from the Consent Agenda for discussion and/or an individual vote.

F. RESOLUTION NO. 15-57 - RESOLUTION OF INTENT TO PERMANENTLY CLOSE A PORTION OF BRADLEY STREET AND SETTING A PUBLIC HEARING ON APRIL 28, 2015

Summary: The consideration of a resolution of intent to permanently close a portion of Bradley Street and setting a public hearing on April 28, 2015.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjoining property owners, Sandra Alexander of 8 Moore Avenue Megan and John Griffin of 430 State Street, Jay Fiano – multiple properties adjacent to the closure area, Aaron Marmaret and B. J. Harden Jones of 147 Bradley Street, have requested the City of Asheville to permanently close a portion of Bradley Street. A copy of this resolution of intent shall be sent by registered or certified mail to all owner of this property abutting this alley, not joining in the petition to close.

The Multimodal Transportation Commission met on February 13, 2015, and approved the closure.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of intent to permanently close a portion of Bradley Street and set a public hearing on April 28, 2015.

RESOLUTION BOOK NO. 37 - PAGE 65

G. ORDINANCE NO. 4397 - TECHNICAL BUDGET AMENDMENT TO PARTIALLY FUND THE CONTRACT WITH HYLAND SOFTWARE AND OTHER SUPPLIERS FOR THE INTEGRATED DOCUMENT MANAGEMENT SOFTWARE REPLACEMENT PROJECT

Summary: The consideration of a technical budget amendment in the amount of $32,750 to move available budget from the City's General Capital Projects Fund to the General Fund to partially fund the contract with Hyland Software and other suppliers for the Integrated Document Management Software Replacement Project.

In 2012, the City of Asheville entered into a contract with Sire Technologies to implement a document management system including the conversion of more than two million records from a legacy software system. In late 2012, Sire Technologies was acquired by Hyland Software. Since that time, Hyland has announced that Sire Technologies will no longer be developed and is now in end-of-life status. However, Hyland has offered existing customers the opportunity to migrate to primary document management product, OnBase. At this point, Sire is actively being used by multiple City departments including Police, Fire, Legal, Water, and Public Works. Plans are underway to expand use within Police as well as to move Human Resources records from paper to digital.

The project will provide an integrated software system that will support City staff

throughout the organization in the appropriate use, storage, retrieval, archiving, and potential disposal of documents following defined business rules and state regulations in a manner that takes advantage of best practices and improves the efficient use of documents and related information resources.

Funding for the original implementation of the document management system, including the contract with Sire Technologies, was budgeted in the City's General Capital Projects Fund. There is currently $32,750 remaining in that project budget which staff intends to utilize to partially fund the contract with Hyland Software. A technical budget amendment is needed to move this budget from the General Capital Projects Fund to the General Fund. The remainder of the funding for the contract with Hyland will come from the existing Information Technology Services Department's General Fund budget.

Pros:

- Replaces a system that has reached its end of life
- Enhances ability to streamline and eliminate paper-based processes
- Provides secure, long-term digital storage and retrieval of critical documents throughout the organization, including the conversion of more than 2 million existing documents
- Improves quality and accessibility of information for decision support and business planning.

Con:

- Any software implementation causes some degree of organizational turbulence during implementation

As outlined above, the technical budget amendment is only needed to move budget from one fund to another. Otherwise, this project is fully funded with existing resources.

City staff recommends City Council adopt a technical budget amendment in the amount of $32,750 to move available budget from the City's General Capital Projects Fund to the General Fund to partially fund the contract with Hyland Software and other suppliers for the Integrated Document Management Software Replacement Project.

ORDINANCE BOOK NO. 29 - PAGE 402

H. ORDINANCE NO. 4398 - BUDGET AMENDMENT FOR LEGAL FEES ASSOCIATED WITH CIVIL SERVICE BOARD GRIEVANCE HEARINGS

Summary: The consideration of a budget amendment in the amount of $45,018 from unassigned fund balance to appropriate funding for outside legal services for grievance related matters that have exceeded the initial budget for the Civil Service Board (CSB).

The Civil Service Act, as amended on August 3, 2009 by the General Assembly, requires the City of Asheville (City) to provide and pay for independent legal counsel to the Board for the purpose of advising the board during or in connection with grievance hearings. The Human Resources Department's Fiscal Year 2014-15 adopted budget included a total of $20,000 in funding for third party legal services relative to non-grievance and grievance related items handled by the CSB. Historically, the $20,000 allocation for third party legal services has been adequate to cover items that are grievance and non-grievance related. As a result of increased grievance activity in the current fiscal year, expenses for Civil Service Board legal services have already exceeded the appropriation by a total of $25,017.25. Staff estimates that an additional $20,000 is needed to meet outside legal expenses for the remainder of the current fiscal year. The budget amendment appropriates $45,018 from unassigned fund balance to meet this need.

Pro:

- Provides budget authorization for FY 2014-15 outside legal expenses as required by the Civil Service Act.

Con:

- Requires an appropriation from unassigned fund balance.

Based on current unassigned fund balance estimates, the City has sufficient resources to appropriate $45,018 associated with this budget amendment and still maintain an unassigned fund balance that exceeds the City's 15% policy target.

City staff recommends City Council approve the budget amendment in the amount of $45,018 from unassigned fund balance to appropriate funding for Civil Service Board independent legal services for grievance related matters that have exceeded the initial budget.

ORDINANCE BOOK NO. 29 - PAGE 404

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Bothwell moved for the adoption of the Consent Agenda, minus Consent Agenda "E". This motion was seconded by Vice-Mayor Hunt and carried unanimously.

ITEM REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

E. RESOLUTION NO. 15-56 - RESOLUTION ADOPTING THE 2015-16 CITY COUNCIL STRATEGIC OPERATING PLAN

Summary: The consideration of a resolution affirming City Council's Strategic Plan for fiscal year 2015-2016.

At the January 30, 2015, City Council retreat, Asheville City Council discussed and prioritized focus areas for the coming year. During the retreat, it was noted that presenting goals in a way that highlights the interconnected nature of Council's strategic goals would be ideal.

The focus areas are:

- Economic Growth & Sustainability - Seek to ensure a sustainable financial future for Asheville by promoting an environment where citizens and businesses want to live, work and invest.

- Affordability & Economic Mobility - Seek to ensure a sustainable future for Asheville through a standard of living that is affordable and attainable for people of all incomes, life stages and abilities.

- High Quality of Life - Seek to ensure a sustainable future for Asheville by promoting a safe environment where basic needs are met and all people can enjoy a high quality of life.

City Manager will produce a comprehensive quarterly report and Committee Chairs will produce updates on policy initiatives designed to further achievement of strategic goals for Economic Growth and Sustainability, Affordability and Economic Mobility, and High Quality of Life.

Pros:

- Provides Council and City staff with an overall direction and goals of the organization.
- Provides Council and City staff with a measure of success.

Con:

- None.

The Strategic Operating Plan will provide direction for Council and the Executive Management Team throughout the budgeting process.

City staff recommends that City Council adopt the resolution reaffirming Council's Strategic Operating Plan.

Councilman Smith asked that Focus Area 2, Goal 1, the third action item be amended to read "Identify and initiate use of city owned land for development of affordable housing projects."

When Mayor Manheimer asked for public comment, no one spoke.

Councilman Smith moved for the adoption of Resolution No. 15-56, as amended. This motion was seconded by Councilwoman Wisler and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 61

III. PRESENTATIONS & REPORTS:

A. MAYOR'S DEVELOPMENT TASK FORCE

Mr. Brian Moffitt, representative of the Mayor's Development Task Force, said that beginning in September, the City hosted a task force designed to review and discuss challenges associated with developing in the City of Asheville. The group of 23 stakeholders met once a month for four months and identified numerous issues commonly experienced during the development process.

Prior to the formation of the Task Force, Development Services staff had independently identified a variety of priorities to be considered in the coming year and had initiated action on several. These priorities, not surprisingly, significantly overlapped the priorities identified by the task force. The work of the task force helps to focus current and future actions and begins to identify what resources may be needed, the most significant one being "staff time" which is repeated throughout the summary table. With many competing demands, it is helpful to identify the highest priorities and those other initiatives that may easily be accomplished as part of a larger initiative. The spread sheet identifies the task force recommendations and priorities, and staff had added possible initiatives that could be considered to address the concerns raised.

With the assistance of our colleagues in other departments, Development Services anticipates being able to accomplish many of the initiatives identified on the master list with the highest priorities focused on:

1. Simplifying/expediting the submittal and review process
    - Offering formalized early assistance
    - Expanding options for on-line submittals
    - Looking at opportunities for expedited submittals and reviews

2. Improving communication between departments, and between customers and staff
    - Improve permitting system to communicate project status
    - Develop consistency meetings between departments

- Explore options for sharing/posting valuable information

3. Improving the delivery of our service
   - Implement an electronic lobby q-ing system
   - Improve permitting system to simplify permit numbers
   - Build knowledge base and confidence in staff

In addition to the initiatives identified in these focus areas, staff is also exploring the potential benefits of establishing a Development Services Advisory Group for the limited purpose of helping staff review, research and discuss strategies for implementation of the task force recommendations. The conceptual behind forming this group would be:

- Assemble a committee of 9 members representing different stakeholder groups in the development community (contractors, design professionals, real estate professionals, property owners, business owners, financial institutions, etc.)
- Meet once a month for 1 ½ hours to review priorities, schedules, progress and offer feedback, ideas, research and perspectives on various initiatives
- DSD staff to be primary staff assigned to group, with representatives from other departments invited to participate as applicable
- Committee to report out every 6 (12 months?) months to the Planning & Economic Development Committee

Progress - As an example of the on-going efforts to improve the efficiency and effectiveness of our development related services, the following accomplishments have been completed in the last three months:

1. Filled four key vacancies
2. Enabled email notification for all final inspections
3. Moved all inspectors to two trades to increase comfort level in areas of expertise (trial program)
4. Established a mentoring rotation pairing more junior inspectors with experienced inspectors
5. Added credit card payment options in water resources
6. Updated TCO policy and broadcasted to the development community
7. Reviewed and tested two different digital submittal software programs and met with vendors
8. Developed a pre-assistance (a.k.a. pre-application) program to be implemented July 1
9. Reviewed and tested three different electronic lobby queuing systems
10. Established a phone tree to direct customers to the most appropriate extension

Implementing these recommendations will require additional resources, the exact amount has yet to be determined but conservative estimates fall around $300,000 spread over two years. Included in this number is: a full-time, benefited employee to perform and manage technology based improvements; consultant fees; and technology based capital investments (primarily focused on digital plan submittal and review). Needed resources would be derived from development fees and charges. A fee increase is not now planned and we are hopeful for continued levels of permit activity.

This report is for informational purposes only and no Council action is needed.

Councilman Bothwell said that despite constant complaints, he agreed that the Unified Development Ordinance is complex but clear.

On behalf of City Council, Mayor Manheimer thanked the Task Force for their hard work, time and dedication on this project.

B. FRENCH BROAD WHITEWATER PARK IN RIVER ARTS DISTRICT

Using a PowerPoint, Mr. Wilson Sims updated Council on the French Broad Whitewater Park in the River Arts District (RAD). He introduced Mr. Ben Van Camp as a key partner for fundraising/partnering purposes. He provided an overview and asked for authorization of the next step in project feasibility as they would tie into the broader RAD planning by the City.

He explained there are two whitewater parks - artificial and in-stream. This would be a public park amenity, but they would be eager to support making it largely privately funded. He emphasized that this is about an in-stream park which is simpler, much more natural/harmonious, and much less expensive. The preliminary design and permitting for an in-stream park would be $149,000, the final design and modeling would be $249,000, and construction would be $1,383,000 - for a total of $1,781,000. There would need to be modifications to the riverbed to create whitewater features that do not otherwise exist. On-shore amenities would include greenway trails, river access viewing points, and parking.

The most successful are ones in urban areas and engage community with river. The suddenness of the current push relates to suddenness of TIGER 6 announcement and quick evolution of RAD redevelopment.

He said this is a bold and cutting-edge vision; those rarely are developed in a broad master-planning process, rather they typically emerge as new and different ideas from outside advocates just like this has (e.g., Pack Place, Azalea Park, Carrier Park, Waller Tract – some of most important innovations in last 15 years).

Three locations were studied. The Bowen Bridge site was selected as it has an existing gradient of river, its proximity to public land, parking and other recreational amenities, separation from core of arts/culture district. He then pointed out some of the locations of planned parking.

Much of required on-shore amenities (parking, greenway, parkland) are being developed anyway, but some additional cost is required for expanded spectator areas and access to river. The reaction by many has been how inexpensive the estimate is for the benefits that will derive. This will be primarily funded from non-city sources.

Per FEMA Flood Insurance Program and Army Corps, impacts on flooding must be acceptable. Project permitting must be in combination with other plans.

He emphasize tight schedule to meet permitting timetable. With a few months, 30% of the design and permitting applications would be due. The final design and modeling would occur in 2018 or later, with construction in 2019 or later. There is sufficient time to raise funds and construct, once permitting is achieved.

There are many community benefits. This unique 21st century park reinforces Asheville as the whitewater capital city of the United States. It will not be just for advanced users, as a novice channel must be included. There is a growing popularity of river recreation here and recreational popularity of other communities who have whitewater parks. This will engage youth, schools, and families with river. With the public attention to river, there will be stronger stewardship ethic. The impact on the riverbed will be modest – aquatic life can still migrate. This will bring traffic to RAD artists, and its branding Asheville as a growing center for outdoor product manufacturing. This will also bring in the outfitting industry, along with tourism.

In conclusion, the aim of advocates group is to be a constructive partner, facilitate, support with fundraising, but not to own or develop or be primary driver. This will be a rightfully city-led project. He asked the City to evaluate the project for inclusion in its RAD redevelopment initiative. They asked for Council to allow City staff to do necessary research/analysis over next

few weeks so that $150,000 design phase can move forward in time for flood permitting. He believed that external funding for this project is within reach, and the group wants to work under auspices of Parks and Greenways Foundation to support project with necessary external funding. He asked that Council authorize City staff to continue the necessary research/analysis so that Phase I can move forward. They understand that there are various ways that permitting can be accomplished and they have every confidence they will be able to work with the City to help make it happen.

Mayor Manheimer felt this was a really exciting project and felt that it fits in with the transformation in the River Arts District. She hoped City Council would support continuing in this process.

Vice-Mayor Hunt hoped that Council will agree that there is so much potential with this project and that it's worth to take the next steps.

In response to Councilman Bothwell, City Manager Jackson said that staff is in the process of researching the other 20 models that have been planned and constructed. In the grand scheme, we are doing a $50 Million make-over and there are a lot of moving parts, along with state, federal, Tourism Development Authority, and private monies. Some of the work (like permitting) will need to be integrated and led by the City. We have some conceptual plans for the parking and the trail heads. We have the expectation that we will take some of the capital money and apply that towards the project management. His role is to make sure that everyone has very clear responsibilities. We have the staff and structure which we are putting in place to carry out the $50 Million project and with Council's approval they will add this $2 Million to the scope of it and start identifying what additional work would need to be done. The permitting, integration of the plan, any design contracts, etc. will go through the City as well. There is quite a bit of coordination work that needs to be done, some of which we already have in-house staff to handle. If there is going to be fund-raising for the project, it might as well be applied toward any of these out of pocket expenses that we have to put into managing the project.

Councilman Davis said that the Pack Square Project cost the City a lot of money and this project makes him step back and request additional information because he did not see a lot of process up to this point, and he did not want Council to be in that kind of position again.

Councilman Smith agreed with Councilman Davis in that Council's role is a deliberative body and they must approach projects in the most responsible manner that they can. He was curious about on-going operating costs, noting that the Finance Committee is talking about what level of subsidy to provide which amenities and questioned how this project would fold into that philosophical discussion. Another question would be what the additional costs around access and spectators might be. He did not want the presumption made that moving forward with responses to these questions means that the project is green-lighted.

Councilman Pelly said that the City is facing a lot of challenges and we will have some big impacts on the City, so we will really be relying on the Parks and Greenways Foundation and other advocates to support the majority of the fund-raising on this project.

City Manager Jackson said that after Council's approval, staff will evaluate the project for integration into the River Arts District redevelopment. Those results will come back to Council will then Council will decide if there needed to be a further planning phase and a formal agreement with the entity. He did not feel the City is ready to enter into a partnership agreement for financing this project.

It was the consensus of Council to instruct the City Manager to evaluate the project for integration into the River Arts District redevelopment.

C. MAYORS' CHALLENGE FOR SAFER PEOPLE AND SAFER STREETS

Councilwoman Wisler explained the Mayors' Challenge for Safer People and Safer Streets. She said that on Thursday, March 12, 2015, jurisdictions from across the country met at the U.S. Department of Transportation (USDOT) headquarters in Washington, DC at the Mayors' Challenge for Safer People, Safer Streets Summit, the start of a year long initiative to improve bicycle and pedestrian safety. City Manager Jackson and she represented Asheville. They spoke with modal experts at USDOT, bicycle and pedestrian safety resource partners, and one another to discuss current non-motorized activities within their communities and shared ideas on how to improve upon pedestrian and bicycle safety over the Challenge year and beyond. A few things we learned is (1) One in 5 traffic deaths in the US are bicyclist or pedestrian deaths; (2) More than ¼ of Americans rode a bicycle in the past year; (3) Low stress environments will encourage more walking and cycling; and (4) The safest thing for cyclists and pedestrians are more cyclists and pedestrians on the roads. There were seven identified challenge areas. City staff graded the City and in general we scored pretty well. The Mayor's Challenge activities include (1) Take a Complete Streets approach; (2) Identify and address barriers to make streets safe and convenient for all road users, including people of all ages and abilities and those using assistive mobility devices; (3) Gather and track biking and walking data; (4)Use designs that are appropriate to the context of the street and its uses; (5) Take advantage of opportunities to create and complete pedestrian and bicycle networks through maintenance; (6) Improve walking and biking safety laws and regulations; and (7) Educate and enforce proper road use behavior by all.

However, we did highlight a few areas that we could improve more substantially: (1) Gathering data such as three of people biking and walking, safety data such as crash information specific to Asheville, descriptions of trips and inventory of bicycle and pedestrian facilities. This will help in evaluating where and how we can improve our infrastructure; (3) Improve laws – while this is mostly a state issue, we can continue to be engaged in this; and (3) Educate and enforce proper road behavior by all -- reinforcing appropriate actions and attitudes for all users will substantially improve interactions on our roads.

We definitely want this initiative to be folded into the Multimodal Transportation Plan.

Improving our cycling and pedestrian infrastructure and experience not only will increase Asheville's quality of life but will improve economic and racial equity. People of color are increasing their use of bicycles at substantially higher percentages than white Americans.

She provided other statistics about cycling and economics. She was excited that Asheville has accepted Secretary Foxx's challenge, as this will continue to push Asheville to be a safer place to walk and ride.

When Councilman Bothwell stressed that it is legal to ride bicycles on sidewalks, Councilwoman Wisler said that education is one of the challenges the City is taking on.

City Manager Jackson said that Asheville is a national role model for building partnerships and turning that into funding partnerships.

D. ASHEVILLE POLICE DEPARTMENT ORGANIZATIONAL ASSESSMENT

The report lays out a short term and long range plan to accomplish a more functional, high performing Police Department. The analysis and recommendations in the report will take time, and buy in and participation of every employee in the organization.

Mr. Brady then reviewed the recommendations and/or improvement opportunities. The recommendations are structured in two ways - immediate change which should be implemented, a 180 Day Plan for the Interim Police Chief, and longer range recommendations in each

management systems of concern. The management issues which exist in the APD today took years for it to get to that point and it will take some time to address and remediate those issues. The new Interim Chief, with the support of the City, will initiate the process of change - changing the tone of the Department at the top; he will also start a process of change management that will outlast his tenure. For each recommendation a priority is accorded by the project team as well as a timeframe for its implementation.

Mr. Richard Brady, President of Matrix Consulting Group, provided Council with a summary of the scope of work for the APD Organizational Assessment, the methods for the conduct of the study and a summary of recommendations. He said that the project scope of work was (1) to evaluate the organization, management and organizational culture of the Police Department; (2) to compare the management systems and practices of the Police Department to best practices; and (3) to evaluate improvement opportunities in the management systems of the Asheville Police Department.

The project methodology was (1) extensive input from Asheville Police Department employees through interviews, employee surveys and focus group meetings; (2) documentation of management systems in use in the Department; (3) comparison of Police Department management practices to best practices in law enforcement; and (4) development of short term and longer range strategies for improving management systems and the organizational culture together with implementation plans.

Perceptions expressed in the project and addressed in the final report (1) poor and inconsistent internal communications; (2) the development of an "us" vs. "them" culture; (3) lack of accountability; (4) consistency issues in policies and disciplinary actions; (5) management training and knowledge transfer; (6) a lack of transparency; (7) all leading to a perceived lack of effective leadership; and (8) an organized culture has developed with makes it impossible for the Asheville Police Department to function as a high performing organization.

Results of the employee survey (1) the project team conducted many staff interviews. However, we also utilized an anonymous survey to which 100 people responded; (2) key positives arising from the survey focused on (a) high levels of service to the community; and (b) positive work group interactions; and (3) However, several significant issues were also identified (a) internal communications are poor; (b) the Department lacks consistency in many of its actions; (c) decision-making processes; (d) problem solving; and (e) leadership is a significant issue as it relates to vision and direction.

A new beginning (1) The Fire Chief initiated a process of enhanced employee involvement in determining strategic direction; (2) an Interim Chief came into the Department with a track record of assisting with the development of positive organizational culture and already initiated processes to improve internal communications and interactions; (3) the City has provided administrative assistance in human resource and financial processes; and (4) this study was intended to provide a road map to start on in developing a more positive organization and management culture.

Immediate needs - The 180 Day Plan - (1) Establish a broadly-based Chief's Advisory Committee to empower staff to develop a plan with accountable action steps to transition to a more effective organization; (2) continue with recent efforts at improving internal communications (a) regular meetings with top and mid-managers/supervisors; (b) executive staff attending more staff briefings; (c) regular meetings with employee groups; and (d) develop a code of conduct; (3) begin to develop a more effective approach to monitoring performance and communicating performance; (4) a plan needs to be developed to target and increase the amount of training that managers receive on promotion and annually; (5) the City needs to continue to show its support through human resource and administrative assistance, management training and work group facilitation; (6) a year from now re-apply the employee survey to gauge the magnitude of change

from this point; and (7) once the new chief is hired, hold a management and supervisory retreat to involve him/her in the new team approach.

Longer range improvements (1) develop a training and career development plan for all staff; (2) develop job task guides for each assignment in the Department; (3) implement minimum commitments for management and supervisory staff assignments; (4) discontinue the roundtable panel approach for disciplinary reviews and return to an improved disciplinary matrix approach; (5) begin immediately with replacing policies with a standardized law enforcement template; (6) develop more proactive public and media relations approaches relating to program review, budget, and use of the website and social media; and (7) with the assistance of human resources develop more effective performance evaluation and career development programs; (8) organizational changes should be made to help facilitate change (a) an administrative staff position for ongoing support; (b) the Treasury Services Manager position transferred to the Police Department should be made permanent; (c) the spans of control for Logistics and Special Operations Lieutenants should be narrowed; and (d) a second Deputy Chief position should be created; and (9) The City Police Department and employees need to improve the labor/management environment.

In summary, (1) the issues identified in the Asheville Police Department did not happen overnight; (2) the issues identified in the Asheville Police Department involves all levels in the organization; (3) resolving these issues will take a concerted short term and longer range commitments to change involving improved communication; inclusion and empowerment of staff; better accountability; and creating appropriate and modern management and personnel systems.

Councilman Davis, Chair of the Public Safety Committee, said that the Committee heard a more in depth presentation at the meeting. He stressed that we have a lot of good people working in the Asheville Police Department. We have a culture that needs changing and Council needs to be very supportive in how that happens.

Councilman Bothwell said that the report shows that the complaints about leadership in the Police Department are spread amongst the different divisions, not only about the leadership of the Chief of Police, as has been alluded to in the social media.

Councilman Pelly felt that we have challenges, but if we follow these recommendations, he felt we will be on track again.

On behalf of City Council, Mayor Manheimer appreciated the thorough and extensive report. She stressed that City Council supports the men and women in our Police Department and hoped that this will provide us with a clear path forward. She looked forward to positive outcomes in the future.

City Manager Jackson said that the action steps will be a consistent item on the Public Safety Committee and City Council will also be kept track of progress in their quarterly Strategic Operating Plan reports.

E. LEGISLATIVE UPDATE

Mayor Manheimer highlighted Council on some the following current bills with potential impact on the City of Asheville budget: regulation of bee hives; sales tax redistribution; local debt; tax value for property improvements; protest petitions; and historic preservation tax.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING ON PROPERTY LOCATED AT 1 SUNSET PARKWAY FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RM-6/CZ RESIDENTIAL MULTI-

FAMILY LOW DENSITY DISTRICT/CONDITIONAL ZONING TO ALLOW THE RENOVATION OF AN EXISTING CHURCH TO TWO SINGLE-FAMILY RESIDENCES

ORDINANCE NO. 4399 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 1 SUNSET PARKWAY FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RM-6/CZ RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT/CONDITIONAL ZONING TO ALLOW THE RENOVATION OF AN EXISTING CHURCH TO TWO SINGLE-FAMILY RESIDENCES

Urban Planner Julia Fields said that this is the consideration of an ordinance to conditionally zone property located at 1 Sunset Parkway from RS-4 Residential Single-Family Medium Density District to RM-6/CZ Residential Multi-Family Low Density District/Conditional Zoning to allow the renovation of an existing church to two single-family residences. This public hearing was advertised on March 13 and 20, 2015.

The subject property consists of a .82 acre parcel (zoned RS-4) located at 1 Sunset Parkway. The property contains a former place of worship and accompanying parking on a corner parcel with frontage along Sunset Parkway and Charlotte Street. The Parcel Identification Number for the proposed rezoning is 9649.65-3576. The site is bordered by properties also zoned RS4 to the north and east and containing single-family and two-family dwellings. To the west across Charlotte Street is property zoned Institutional (Unitarian Universalist Church) and to the south is property zoned HCU (Historic Conditional Use – Manor Apartments).

The applicant, Howard Stafford, proposes to convert the existing structure that has been used most recently as a place of worship into two dwelling units. One dwelling unit (Unit A) will have entrances fronting on Sunset Parkway and Charlotte Street. The other unit (Unit B) will have an entrance fronting on Charlotte Street. The existing structure is 12,663 square feet in size and 35 feet 4 inches in height.

Existing access points to the property on Charlotte Street and Sunset Parkway will be maintained. The Charlotte Street drive will lead to a reconfigured parking area with five parking spaces provided. The drive off of Sunset Parkway will function as a more typical residential driveway. Sidewalks exist along both street frontages. The applicant has agreed to provide the City with a 10 foot easement along both frontages to facilitate any future sidewalk improvements.

Landscaping provided for this project includes street trees, the screening of the parking area along Charlotte Street, and a twenty foot bufferyard with requisite plantings to the east adjacent to the RS-4 zoned neighboring residential property. Open space is not required.

This proposal was approved with conditions by the Technical Review Committee on February 2, 2015. The Asheville Planning and Zoning Commission recommended this project unanimously (6-0) for approval at a meeting on March 4, 2015. One person, representing the Grove Park/Sunset Neighborhood Association, spoke in favor of the project. This project requires Final TRC review should Council grant the requested condition zoning

The applicant is proposing to conditionally rezone the site from RS-4 to RM-6 to allow for conversion of the existing building into two dwelling units. This conversion could be done as a use by right subject to special requirements if there were not a duplex located on the property immediately adjacent to this parcel.

A conditional zoning application for this property was submitted in 2014 for rezoning to HBCZ to develop a residence and canine rehabilitation clinic and dog daycare facility on the property. The application was withdrawn by the applicant before it was heard by the Asheville City Council.

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff finds this request to be reasonable.

Considerations:

- The project proposes the adaptive reuse of a historic structure.
- The two family structure will be in an area with a mix of housing types (multi-family, duplex, single-family).

Staff recommends approval of the proposed conditional zoning to allow for the conversion of a building previously used as a place of worship into two dwelling units. The Asheville Planning and Zoning Commission unanimously recommended approval of this conditional zoning to the Asheville City Council.

Mayor Manheimer opened the public hearing at 6:44 p.m.

Mr. Buzz Barry, President of the Grove Park-Sunset Mountain Neighborhood Association Board, read the following letter dated March 4, 2015, into the record: "On February 26, 2015, the Grove Park-Sunset Mountain Neighborhood Association Board, representing over 600 households voted unanimously to support the conditional zoning request to rezone property at One Sunset Parkway. This vote is based upon information provided by City of Asheville Urban Planner Julia Fields."

Mr. Mark Allison, architect of 1 Sunset Parkway, urged the Council to support this great use of this building.

Mayor Manheimer closed the public hearing at 6:48 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Pelly moved to approve the conditional zoning request of Howard Stafford for property located at 1 Sunset Parkway from RS-4 (Residential Single-Family Medium Density District) to RM-6CZ (Residential Multi-Family Low Density District) and find that the request is reasonable and consistent with the Comprehensive Plan and other adopted plans in that: (1) The proposal supports the goal found in the City's comprehensive plan of promoting the adaptive reuse of the City's valuable commercial and residential historic resources; and (2) The proposal supports the goal found in the City's comprehensive plan of promoting adaptive reuse of vacant or underutilized structures, while ensuring that neighborhood compatibility is met. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 29 - PAGE 406

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING ON PROPERTY LOCATED AT 39 ELM STREET FROM COMMUNITY BUSINESS II DISTRICT TO COMMUNITY BUSINESS II DISTRICT/CONDITIONAL ZONING, WITH CONDITIONS TO BUILDING SIZE, IMPERVIOUS AREA AND SETBACK, FOR THE CONSTRUCTION OF A 5-STORY HOTEL WITH PARKING

At the applicant's request, Councilman Smith moved to continue this public hearing until August 25, 2015, in order to provide more time for N.C. Dept. of Transportation and the City to continue with their current pedestrian study for the Merrimon Avenue corridor and determine what is appropriate for improvements and to propose a solution to benefit all parties. This motion was seconded by Councilman Davis and carried unanimously.

C. PUBLIC HEARING TO CONSIDER AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES TO INCREASE THE ALLOWANCES FOR REAL ESTATE AND CONSTRUCTION SIGNAGE

Process Manager for the Development Services Department Chris Collins said that this is the consideration of an ordinance amending Chapter 7 of the Code of Ordinances to increase the allowances for real estate and construction signage. This public hearing was advertised on March 13 and 20, 2015.

In December of 2014, City Zoning Enforcement staff served a notice of violation (NOV) to the City Centre and Hilton Garden Inn projects for construction signage in excess of that allowed by Section 7-13-2(d)(7) at 301 and 309 College Street. The NOV was generated due to the fact that the above listed construction projects are currently displaying construction signage that is in violation of the UDO allowance of two (2) signs with a maximum of 32 square feet in area per sign face with a required ten (10) foot setback from the right-of-way.

In response to the serving of this NOV, the developer met with City staff and subsequently submitted a formal request for a wording amendment to Section 7-13-2(d)(7) to increase the allowed number of and size of construction signs when attached to construction fence screening materials. The request noted the following benefits of allowing further construction signage when attached to screening materials:

- Screening attached to construction fencing makes for a much better appearance to the public; and
- This type of signage assists in vendor and delivery identification for construction sites; and
- The ability to advertise on construction screening helps mitigate the cost to developers of installing the screening material itself.

In receipt of this request which is centered on an active construction site within the Central Business District (CBD) zoning district, staff prepared a report and proposed wording amendment for presentation to the City's Downtown Commission. On February 13, 2015, staff presented the option of allowing unlimited 32 square foot sign panels on construction fencing screening materials when said panels were spaced at least 50 linear feet apart and eliminated the requirement of a 10 foot setback for this type of signage within the CBD. The majority of the Downtown Commission members demonstrated support for increasing the allowance for the construction signage. Several members identified the possibility of allowing a greater size and quantity than that identified in the staff report.

On March 4, 2015, the City's Planning & Zoning Commission unanimously adopted a motion to recommend approval of an amended and less restrictive ordinance allowing unlimited sign faces that are no more than 50 square feet in area and no closer than 20 linear feet to the next sign face.

Research by City staff has found that many other cities have a regulation in place mirror our current 32 square foot requirements. Research has also indicated that this type of construction screening materials is often not regulated nor enforced by other cities. If the trend of relaxing the proposed restrictions on construction screening signage is an indicator, Council may want to consider exempting this type of signage from regulation. The use of construction screening material on construction fencing is not required by City ordinance.

Currently, the text of Section 7-13-2(d) (7) reads as follows:

7) *Construction Signs.* Construction signs shall be allowed provided such signs do not exceed one sign per street frontage with a maximum of two signs per construction site. Such signs shall not exceed four square feet in area per display face, two faces per sign

for single-family or duplex residential construction or 32 square feet in area per display face for multi-family residential or non-residential construction, and a maximum of ten feet in height. Construction signs shall not be erected prior to the issuance of a building permit and shall be removed within seven days of the issuance of a certificate of compliance. A minimum setback of ten feet is required.

This proposed UDO text amendment adds one new definition to Section 7-2-5. These definitions are as follows:

Construction Screening: Temporary and opaque material attached to a perimeter fence or barrier surrounding an active construction site for the purpose of minimizing the visual distraction and safety issues of the subject site.

Additionally, the proposed text amendment revising the wording of Section 7-13-2(d)(7) as follows (additions are underlined):

7) *Construction Signs.*

a. *Freestanding Construction Signs*: Shall be allowed provided such signs do not exceed one sign per street frontage with a maximum of two signs per construction site. Such signs shall not exceed four square feet in area per display face, two faces per sign for single-family or duplex residential construction or 32 square feet in area per display face for multi-family residential or non-residential construction, and a maximum of ten feet in height. ~~Construction signs shall not be erected prior to the issuance of a building grading permit and shall be removed within seven days of the issuance of a certificate of compliance.~~ A minimum setback of ten feet is required.

b. *Construction Signs Attached to Construction Screening*: When used in lieu of a Freestanding Construction Sign, construction signage may be attached to construction screening materials subject to the following:

i. Sign area shall not exceed 50 square feet per sign.
ii. Individual signs may be repeated an unlimited number of times but shall be spaced a minimum of 20 linear feet apart, measured from the closest two edges of the sign face.

c. Construction signs shall not be erected prior to the issuance of a ~~building~~ grading permit and shall be removed within seven days of the issuance of a certificate of compliance.

This wording amendment may support (1) Focus Area 1 (Economic Growth & Stability) of the Strategic Plan by adding allowances for a common practice in large developments thereby promoting important projects within the community; an (2) Focus Area 2 (High Quality of Life) may be promoted through this wording amendment by the improved visual quality and pedestrian safety offered by the use of construction screening materials. This amendment also supports the following goals from the City Development Plan 2025: (1) Economic Development Goal I: Insure that Asheville's urban planning, zoning, and permitting processes, as created and administered by the City, facilitate sustained and positive development; and (2) Transportation Goal II: Making Asheville a more walkable and livable city.

Considerations:

- Provides a specific definition for *Construction Screening* within the UDO.
- Incentivizes the use of construction screening material thereby assisting with the aesthetics of active construction sites and reducing the risk of an attractive distraction.

- Signage affixed to screening materials eliminates the more commonly used free-standing signs which may contribute to visual clutter.
- Higher allowances may improve project recognition within the community and communicate valuable information.
- Benchmarking from the standards of other jurisdictions has produced mixed results. The large majority of those surveyed enforce a similar standard to that currently found in the UDO. However, many of those surveyed noted that signage affixed to screening is not commonly regulated.

City staff recommends approval of this wording amendment.

After a brief discussion about whether the City wanted to regulate this type of construction screening material, noting that even with this amendment the City Centre and Hilton Garden Inn projects would still be out of compliance, Council agreed that screening is a good idea, but having advertising on the screening is not.

Mayor Manheimer opened the public hearing at 7:04 p.m. and when no one spoke, she closed the public hearing.

Councilman Davis moved to approve the proposed wording amendment to Sections 7-2-5 and 7-13-2(d)(7) of the UDO of the City of Asheville and find that this request is reasonable and is consistent with the Comprehensive Plan and other adopted plans, based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilwoman Wisler and said motion failed on a 2-5 vote, with Mayor Manheimer, Vice-Mayor Hunt, Councilman Bothwell, Councilman Smith and Councilman Pelly voting "no."

In response to Councilman Bothwell, Director of Development Services Shannon Tuch said that if Council chooses to direct staff to craft a different wording amendment, any enforcement action against City Centre and Hilton Garden Inn projects would be suspended, as they are currently in violation of the Unified Development Ordinance for construction signage.

City Attorney Currin said that Ms. Tuch will contact the developer and give them some time to come into compliance, noting that they have already exhausted a larger period of their grace time already.

D. PUBLIC HEARING TO CONSIDER A REQUEST FOR A CONDITIONAL ZONING FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR A NINE-LOT MAJOR SUBDIVISION LOCATED OFF OF SHELBURNE DRIVE

Mayor Manheimer said that this item does not need City Council consideration as all City requirements can now be met.

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 15-58 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE CITY BOARD OF EDUCATION

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Asheville City Board of Education. He said that all background checks on the potential candidates came back with no flags or negative items.

The terms of Jacquelyn Hallum and Precious Folston expire on April 1, 2015. Ms. Hallum and Ms. Folston are not eligible for reappointment.

The following individuals have applied for the vacancies: Joanna Best, John S. Brigham, Martha L. Geitner, Elizabeth Hampton Jones, James "Drew" Shelfer, Melissa Sites, Greg Walker Wilson, Verita Brown Woods, Shaunda Sandford, James E. Lee III, Maceo Z. Keeling, Kate Fisher, Steve Dykes and Erica Englesman Rawls. Ms. Sites did not complete the written essay questions and was therefore not considered for these vacancies.

It was the consensus of City Council to interview Joanna Best, Martha L. Geitner, Greg Walker Wilson, Shaunda Sandford, James E. Lee III and Steve Dykes.

Council spoke highly of all the very qualified candidates and after noting it was a hard decision, Joanna Best received 1 vote, Steve Dykes received 3 votes, Martha Geitner received 3 votes, James Lee received no votes, Shaunda Sandford received 6 votes, and Greg Walker Wilson received 1 vote.

Because there was a tie between Mr. Dykes and Ms. Geitner, City Council voted again as follows: Joanna Best received no votes, Steve Dykes received 3 votes, Martha Geitner received 4 votes, James Lee received no votes, and Greg Walker Wilson received no votes.

Therefore, Shaunda Sandford and Martha Geitner were appointed as members of the Asheville City Board of Education, to each serve a four year term respectively, terms to begin April 1, 2015, and expire April 1, 2019. All terms are until their successors have been appointed.

RESOLUTION BOOK NO. 37 – PAGE 67

VI. NEW BUSINESS:

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Rev. Christopher Chiaronmonte spoke to Council.

Mr. Todd Stimson urged City Council to adopt a resolution in support of medical cannabis.

Closed Session

At 7:24 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C. Gen. Stat. § 143-318.10(3). The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(1); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3). This motion was seconded by Councilman Pelly and carried unanimously.

At 7:37 p.m., Councilman Smith moved to come out of closed session. This motion was seconded by Councilman Pelly and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 7:37 p.m.

Magdalen Burleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – April 14, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. EMPLOYEE RECOGNITIONS

City Manager Jackson recognized Accreditation Manager - Battalion Chief Wes Rogers; Senior Firefighter Trey Young; Engineer Ken Myrick; Lieutenant Rich Rauschenbach; and GIS Technician Stephanie Osbourn for the reaccreditation of the Asheville Fire Department; and McCray Coates, Tim Bayless, Amy Deyton, Steve Shoaf, Al Kopf, Stephanie O'Conner, Erin Marie Wheeler, Tony McDowell, Greg Shuler, Cathy Ball, Dan Phairas, and Tony Rathbone for the roadway and river improvements project at Azalea Road.

Mayor Manheimer thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

B. PROCLAMATION PROCLAIMING APRIL AS "PARKINSON'S DISEASE AWARENESS MONTH"

Councilman Bothwell read the proclamation proclaiming April, 2015, as "Parkinson's Disease Awareness Month" in the City of Asheville. He presented the proclamation to Nancy and Jim Hall, and others, who briefed City Council on some activities taking place during the month.

C. PROCLAMATION PROCLAIMING APRIL 2015 AS "CHILD ABUSE PREVENTION MONTH"

Mayor Manheimer read the proclamation proclaiming April, 2015, as "Child Abuse Prevention Month" in the City of Asheville. She presented the proclamation to Ms. Jennifer Nehlsen, the current Chair of the Community Child Protection Team and Ms. Katie Swanson, Social Work Program Administrator for BCHHS, and others, who briefed City Council on some activities taking place during the month.

D. PROCLAMATION PROCLAIMING APRIL 2015 AS "CHILD SEXUAL ABUSE PREVENTION MONTH"

Councilwoman Wisler read the proclamation proclaiming April, 2015, as "Child Sexual Abuse Prevention Month" in the City of Asheville. She presented the proclamation to Ms. Laura Warren, Membership Engagement Director, Asheville YMCA, who briefed City Council on some activities taking place during the month.

E. PROCLAMATION PROCLAIMING APRIL 18, 2015 AS "ASHEVILLE NEIGHBORHOOD CLEAN UP DAY"

Councilman Pelly read the proclamation proclaiming April, 17, 2015, as "Asheville Neighborhood Clean Up Day" in the City of Asheville. He presented the proclamation to Ms. Dawn Chavez from Asheville Greenworks, and others, who briefed City Council on some activities taking place during the month.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 24, 2015

B. ORDINANCE NO. 4400 - BUDGET AMENDMENT FOR DONATION FOR THE MAINTENANCE AND REPAIR OF THE WNC VETERANS' MEMORIAL LOCATED IN PACK SQUARE PARK

ORDINANCE NO. 4401 - BUDGET AMENDMENT FOR DONATION FOR COMMUNITY SERVICE WORKDAY MATERIALS IN CARRIER PARK

Summary: The consideration of budget amendments in the amount of (1) $10,860 from the WNC Veterans' Memorial Fund for improvements to the Western North Carolina (WNC) Veterans' Memorial located in Pack Square Park; and (2) $5,000 from BB&T for materials for a community service workday in Carrier Park.

WNC Veterans Memorial - In 2011, the WNC Veterans' Memorial Board, a non-profit organization, donated the WNC Veterans' Memorial in Pack Square Park to the City. At the same time, the WNC Veterans' Memorial Board established two trust funds held by the Community Foundation of Western North Carolina. Both trust funds are designed to provide resources to support the perpetual upkeep and maintenance of the Memorial. $10,860 will be used to repair the brick pavers, replace landscape materials, and other improvements in the Memorial.

Branch Banking and Trust Company (BB&T) Donation - In 2014, BB&T selected the City of Asheville's Carrier Park as its 2014 community service project to perform maintenance. Twenty five BB&T employees volunteered to sand and seal park furnishings and to spread mulch on trails. $5,000 reimburses the city for its cost to provide the materials and supplies for the community service work day.

Pro:
- Provides funds for improvements WNC Veterans' Memorial located in Pack Square Park.

Con:
- None

A budget amendment increasing the project budget authorizing recurring maintenance and repair to the WNC Veterans' Memorial located in Pack Square Park will authorize expenditures up to $10,860. These expenditures will be fully funded with trust fund contributions from the WNC Veterans' Memorial Fund held by the Community Foundation of Western North Carolina in the amount of $10,860 that has been received; thus, there is no net fiscal impact to the City's operating budget.

A budget amendment in the amount of $5,000 will reimburse the City of Asheville for cost of materials for a community service day at Carrier Park. The reimbursement is fully funded with a contribution from BB&T; thus, there is no net fiscal impact to the city's operating budget.

Staff recommends City Council to approve the budget amendments authorizing the City Manager to (1) accept the trust fund contributions from the WNC Veterans' Memorial Fund held by the Community Foundation of Western North Carolina in the amount of $10,860 for maintenance and repair of the WNC Veterans' Memorial located in Pack Square Park; and (2) accept the contribution from BB&T in the amount of $5,000 for community service workday materials.

ORDINANCE NO. 4400 - ORDINANCE BOOK NO. 29 - PAGE 411
ORDINANCE NO. 4401 - ORDINANCE BOOK NO. 29 - PAGE 413

C. RESOLUTION NO. 15-59 - RESOLUTION ADOPTING THE BOND ORDER AUTHORIZING THE ISSUANCE OF WATER SYSTEM REVENUE REFUNDING BONDS OF THE CITY OF ASHEVILLE, NORTH CAROLINA

RESOLUTION NO. 15-60 - RESOLUTION PROVIDING FOR THE ISSUANCE, SALE AND DELIVERY OF WATER SYSTEM REVENUE REFUNDING BONDS

Summary: The consideration of (1) a Bond Order authorizing the issuance of not to exceed $60 million Water System Revenue Refunding Bonds, Series 2015 of the City of Asheville, North Carolina (the "2015 Refunding Bonds"); and (2) a Resolution providing for the sale of the 2015 Refunding Bonds and setting the terms and conditions upon which the 2015 Refunding Bonds will be sold.

Based on internal analysis and advice from the City's financial advisor and bond counsel, staff is recommending that City Council take action to move forward with refunding the Water System Revenue Refunding and Revenue Bonds that were issued in 2005 and 2007, respectively (the "Refunded Bonds"). Based on current interest rates (at March 31, 2015), the refunding is expected to produce total debt service savings of approximately $8.8 million. This figure may increase or decrease prior to the sale of the 2015 Refunding Bonds based on potential changes in interest rates and overall municipal market conditions.

The Bond Order provides the following:

- In order to raise the money required to refund the Refunded Bonds, the 2015 Refunding Bonds are authorized by City Council and shall be issued pursuant to North Carolina General Statues, Section 159-80;
- The principal amount of the 2015 Refunding Bonds shall not exceed $60 million;
- The 2015 Refunding Bonds shall be paid solely from revenues from the operation of the water system; NOT from general funds, credit or taxing power of the City;
- The proceeds from the sale of the 2015 Refunding Bonds shall be deposited in accordance with the Series Indenture; and
- The Bond order shall be effective upon adoption.

The resolution for the sale of 2015 Refunding Bonds provides the following:

- Makes certain statements of fact to support the City's application to the Local Government Commission (LGC) and approves the financing team;
- Approves the issuance of the 2015 Refunding Bonds in a principal amount not to exceed $60 million;
- Approves, confirms and incorporates by reference the provisions of the General Indenture and Series Indenture; stipulates that the 2015 Refunding Bonds shall be special obligations of the City and shall not be payable from the general funds of the City;
- Authorizes and directs the Mayor, City Manager, City Clerk and Chief Financial Officer to execute and deliver the Series Indenture and other financing documentation and do all

things necessary to effect the issuance of the 2015 Refunding Bonds and to carry out and comply with the Series Indenture;
- Approves the form and content of the Bond Purchase Agreement and stipulates that the 2015 Refunding Bonds will be sold to the underwriters pursuant to the terms of the Bond Purchase Agreement; and
- Authorizes and approves the form and content of the Preliminary Official Statement and Official Statement and their use by the underwriters in the sale of the 2015 Refunding Bonds.

Pro:
- Anticipated total debt service savings based on current market conditions is approximately $8.8 million. Actual savings level will be determined on the date the 2015 Refunding Bonds are sold, which is scheduled for May 12, 2015.

Con:
- None noted.

As noted above, anticipated total debt service savings based on current market conditions is approximately $8.8 million.

City staff recommends City Council adopt (1) a Bond Order authorizing the Issuance of Water System Revenue Refunding Bonds, Series 2015 of the City of Asheville, North Carolina; and (2) Resolution authorizing the issuance and sale of City of Asheville, North Carolina Water System Revenue Refunding Bonds, Series 2015.

RESOLUTION NO. 15-59 - RESOLUTION BOOK NO. 37 - PAGE 68
RESOLUTION NO. 15-60 - RESOLUTION BOOK NO. 37 - PAGE 70

D. RESOLUTION NO. 15-61 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CODE STUDIO TO DEVELOP A FORM BASED CODE FOR THE GREATER RIVER ARTS DISTRICT

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Code Studio to develop a Form Based Code.

In 2014 Asheville City Council allocated $100,000 in the FY 2015 general fund budget for the development of the next area-specific Form Based Code. Council was supportive of staff's recommendation that the next new code be developed for the greater River Arts District, and an RFQ was released in January 2015 to hire a consultant to lead the process. Three members of staff plus Mr. Karl Koon, a Planning and Zoning Commission member that also sits on the Asheville Area Riverfront Commission (AARRC), and Mr. Tim Schaller, a member of the River Arts District Business Association, evaluated the proposals. The selection process is complete, and staff desires to contract with the top ranked consultant, Code Studio. If authorization is received by Council, the project will be managed by Urban Planner II Sasha Vrtunski.

The Asheville Area Riverfront Commission endorsed this as an implementation item when recommending Council adopt the Riverside Drive Development Plan.

Pros:
- Implements parts of Council Strategic Operating Plan and the Riverside Drive Development Plan
- Updates zoning regulations in a market based manner that complies with City's Comprehensive Plan

Cons:

- Requires use of City funds to pay consultant
- Requires use of City employees to manage process

As noted earlier, funding for this contract is already included in the FY 2015 general fund budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Code Studio to develop a Form Based Code for the greater River Arts District.

RESOLUTION BOOK NO. 37 - PAGE 74

E. RESOLUTION NO. 15-62 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH THRESHOLD ACOUSTICS LLC FOR ACOUSTICAL AND STRUCTURAL ANALYSIS OF THE THOMAS WOLFE AUDITORIUM

ORDINANCE NO. 4402 - BUDGET AMENDMENT TO REDIRECT FUNDING FOR THE ACOUSTICAL AND STRUCTURAL ANALYSIS OF THE THOMAS WOLFE AUDITORIUM

Summary: The consideration of (1) a resolution authorizing the City Manager to enter into a contract with Threshold Acoustics LLC for Acoustical and Structural Analysis of the Thomas Wolfe Auditorium; and (2) a technical budget amendment in the amount of $60,000 to redirect funding from the US Cellular Center Capital Fund to the US Cellular Center Operating Fund to fund the contract.

In December of 2014 the U.S. Cellular Center issued a Request for Qualifications for professional services associated with analysis of structural and acoustical conditions of the Thomas Wolfe Auditorium. The RFQ requested that responding teams have the ability to:

- Complete a site inspection;
- Review existing data;
- Interview key staff members and tenant (Asheville Symphony);
- Investigate and measure the existing acoustical conditions of the auditorium, including the solicitation of input from the Asheville Symphony;
- Evaluate the structural capabilities and acoustical enhancements required, current code compliance requirements and cost estimation for implementation any identified condition improvements;

Six firms responded and through a two phase interview process by a review panel, Threshold Acoustics LLC of Chicago, Illinois, was deemed as the most responsive and qualified firm. Staff was able to negotiate an acceptable scope of services and price.

The proposed Contract is not to exceed $60,000. The terms of this contract were discussed at the Civic Center Commission meeting on March 3, 2015, and the Civic Center Commission supported staff's recommendation to enter into a contract with Threshold Acoustics LLC.

Pros:

- City will receive deliverable; in the form of acoustical models of the Thomas Wolfe
- City will receive a list of suggested needed improvements along with pricing for each item

Con:

- None.

Funding for the contract was included in the adopted FY 2014-15 US Cellular Center Capital Fund budget. Since the analysis will not result in the acquisition of a fixed asset, staff is recommending that the budget for the contract be moved to the US Cellular Center's operating budget.

Staff recommends that City Council adopt: 1) a resolution authorizing the City Manager to enter into a professional services contract with Threshold Acoustics LLC; and 2) a technical budget amendment in the amount of $60,000 to redirect funding from the US Cellular Center Capital Fund to the US Cellular Center Operating Fund to fund the contract.

RESOLUTION BOOK NO. 37 - PAGE 75
ORDINANCE BOOK NO. 29 - PAGE 415

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Pelly and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. LEGISLATIVE UPDATE

Mayor Manheimer highlighted Council on some the following current bills with potential impact on the City of Asheville budget: sales tax redistribution; local planning and development regulation; Building Code regulation reform bill; amongst others. She will continue to track legislation with trips to Raleigh to get a better feeling of what becomes a reality in this session.

In response to Councilman Smith, Mayor Manheimer said that nothing has been introduced or addressed about the privilege tax replacement.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AMENDMENTS TO CHAPTER 7 OF THE CODE OF ORDINANCES TO INCLUDE REASONABLE ACCOMMODATION PROCEDURES

ORDINANCE NO. 4403 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES TO INCLUDE REASONABLE ACCOMMODATION PROCEDURES

Assistant City Attorney Catherine Hofmann said that this is the consideration of amendments to the Unified Development Ordinance ("UDO") to provide for a procedure for handicapped and disabled persons to request and obtain a reasonable accommodation from UDO provisions, pursuant to federal law. This public hearing was advertised on April 3 and 10, 2015.

A. Summary of Federal Law.

The federal Fair Housing Act, 42 U.S.C. § 3601 et seq. ("FHA") and the Americans with Disabilities Act, 42 U.S.C. § 12131 et seq. ("ADA") are intended to eliminate discrimination against protected individuals. The FHA applies specifically to discrimination in housing opportunities, while the ADA applies more generally to discrimination against disabled individuals.

The FHA makes it unlawful to discriminate, make unavailable or otherwise deny a dwelling to any person because of a handicap. See 42 U.S.C. § 3604(f). A "handicap" is defined as "(1) a physical or mental impairment which substantially limits one or more of such person's major life activities, (2) a record of having such an impairment, or (3) being regarded as having such an impairment.". However, the term handicap "does not include current, illegal use of or addiction to a controlled substance." Id. Prohibited discrimination includes a municipality's refusal to make a reasonable accommodation in its rules, policies, practices, or services, when such accommodation may be necessary to afford a person an equal opportunity to the use and enjoyment of a dwelling.

Similarly, the ADA prohibits discrimination against persons with a disability. Under the ADA, a disability is defined in the same way that the FHA defines a handicap. Like the FHA, the ADA also does not consider an individual who is currently engaged in the illegal use of drugs to be a person with a disability. The ADA makes it unlawful for a local government to discriminate against any qualified individual with a disability, by reason of such disability.

B. Department of Justice's Investigation into Asheville's Housing Practices.

On July 7, 2011, the United States Department of Justice ("DOJ") informed the City that it opened an investigation into the zoning and land use practices of the City, pursuant to the FHA and ADA. The DOJ's investigation is focused generally on the City's treatment of residential housing for persons in recovery from substance abuse. This investigation was initiated by a complaint from the owners of 22 Brucemont Circle; who claim to be operating a "family care home." The DOJ informed the City in July 2011 that their investigation was preliminary in nature, and the DOJ has still not made any determination as to whether the City has violated the FHA or the ADA.

Between July 7, 2011, and January 24, 2013, the DOJ requested additional information from the City regarding the City's zoning practices, which the City provided. Having heard nothing from the DOJ for several years, our office contacted the DOJ to inquire about the status of the investigation last fall. This was prompted, in part, by continued complaints from neighbors related to 22 Brucemont Circle and its residents. In or around November 2014, the DOJ informed the City that, in order for the DOJ to finalize their investigation, among other things, the DOJ would like to see the City's process for disabled or handicapped persons to request a reasonable accommodation pursuant to the FHA and ADA. While the City had provisions and practices which could allow reasonable accommodations, the DOJ provided us with examples of ordinances from other jurisdictions, which it had accepted in the past. Since that time, the City Attorney's office and Development Services have had several conversations with the DOJ regarding the adoption of an ordinance which would provide the Board of Adjustment with authority to grant a reasonable accommodation and would be in keeping with other DOJ approved provisions.

C. Current Proposed UDO Amendments.

After discussions with the DOJ, and after reviewing several reasonable accommodation ordinances from municipalities throughout the country, it is our recommendation that the City adopt the proposed reasonable accommodation ordinance to allow the Board of Adjustment to hold a quasi-judicial hearing on applications for a reasonable accommodation. This process would require applicants for a reasonable accommodation to present competent, material and substantial evidence that the proposed accommodation will be used by persons defined as disabled or handicapped under federal law and is both reasonable and necessary.

Other provisions of the UDO would also need to be amended in order to adopt the reasonable accommodation ordinance. These provisions include the title to UDO Article VI, as well as, portions of Section 7-3-3, which addresses the Board of Adjustment's powers, and

Section 7-16-1(31), which addresses family care homes. We have provided copies of these proposed amendments to the DOJ, and have incorporated all of their suggested comments.

D. Planning and Zoning Commission.

On March 19, 2015, the Planning and Zoning Commission held a public hearing on the proposed UDO amendments. At the hearing, the Planning and Zoning Commission voted unanimously, on a 6-0 vote, to approve the proposed UDO amendments.

Pros:

- Provides a specific procedure for handicapped and disabled persons to obtain a reasonable accommodation from UDO provisions as required by federal law.
- Furthers completion of DOJ investigation and ensures compliance with federal law, including the FHA and ADA.

Con:

- None noted.

Adoption of the UDO Amendments specifying and setting forth a quasi-judicial procedure for qualified individuals to request and obtain a reasonable accommodation from UDO provisions, pursuant to federal law.

Mayor Manheimer opened the public hearing at 5:43 p.m., and when no one spoke, she closed the public hearing at 5:43 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved to approve text amendments to the UDO which add Section 7-6-3, and which revise Article VI, Section 7-3-3 and Section 7-16-1(3) and find that these amendments are reasonable, in the public interest and are consistent with the Comprehensive Plan and other adopted plans because they provide a procedure to protect individuals against discrimination and to request a reasonable accommodation under federal law. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 29 – PAGE 417

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. RESOLUTION NO. 15-63 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE ANY AND ALL DOCUMENTS NECESSARY TO AMEND THE INTERLOCAL AGREEMENT WITH HENDERSON COUNTY AND EFFECTUATE THE SALE OF THE FERRY ROAD PROPERTY TO BUNCOMBE COUNTY

Executive Director of Planning & Multimodal Transportation Cathy Ball said that this is the consideration of a resolution authorizing the Mayor to execute any and all documents necessary to amend the Interlocal Agreement with Henderson County and effectuate the sale of the Ferry Rd. property to Buncombe County.

Beginning in late 2008, elected officials and staff of the City of Asheville and Henderson County held meetings to discuss the Regional Water Supply and Water Service Agreement between Henderson County and the Asheville Buncombe Water Authority (and its participating

members) to supply water to parts of Henderson County (herein "1995 Agreement"). Included in the 1995 Agreement was a provision for the City to transfer to Henderson County a piece of property approximately 137 acres in size. The property is located near Brevard Road, off of Ferry Road, on the west side of the French Broad River, across the entrance to the Arboretum (herein "Ferry Road Site" or the "Property"). Pursuant to a Consent Judgment entered into in Buncombe County Superior Court in 2002 (file number 01 CVS 344), the property was conveyed by the City to Henderson County by deed recorded July 15, 2002, in Book 2852, Page 775, Buncombe County Registry. Subsequently, the City and Henderson County entered into an Interlocal Agreement (approved by City Council per Resolution No. 14-83) on April 16, 2014, in order to modify certain conditions of the 1995 Agreement regarding conveyance of the property by Henderson County.

The Interlocal Agreement contained the following terms and conditions: 1) Henderson County was authorized to secure a Purchase and Sale Agreement for the Ferry Road Site Property at a purchase price not less than the fair market value; 2) the Property was to be conveyed with specific conditions on the use of the property for an economic development purpose, pursuant to NCGS 158-7.1 (Economic Development) and with the condition that an easement on the Property be granted to the City of Asheville for use as a greenway and related recreational purposes (exact location to be determined by the City); 3) Henderson County and Asheville are to divide the proceeds from the sale equally; 4) Asheville's share of the proceeds from the sale are to be paid to Buncombe County for use for public safety purposes; and 5) Henderson County is to use it's share of the proceeds from the sale for the purchase and construction of a local law enforcement training center.

At this time, Buncombe County has been working with a potential economic development partner which is considering expanding its operations into Buncombe County which requires a large tract with nearby highway access and therefore, Buncombe County has agreed to purchase the Ferry Road Property from Henderson County for the appraised fair market value price of $6,815,00 (County Commissioner Resolution 15-04-01 dated April 7, 2015) and in accordance with the other aforementioned conditions of the Interlocal Agreement. Henderson County will consider the sale of the Property at their April 15, 2015, Commission meeting. Therefore, the purpose of this resolution is to grant City Council's approval of this sale and acknowledgment that the terms of the Interlocal Agreement have been met. Additionally, Henderson County has requested that the Interlocal Agreement be amended to delete the condition that limits its use of the proceeds from the sale to the purchase and construction of a local law enforcement training center as this is no longer a need at this level of funding for the County.

Pro:

- The sale of the Property is accordance with the terms of the Interlocal Agreement and as such is at fair market value will be used for economic development purpose which in turn will is likely to benefit the City in terms of increased taxed base and potential new job creation.

Con:

- There is no negative impact.

As per the terms of the Interlocal Agreement, the City's share of the proceeds from the sale of this Property will go to Buncombe County for use for public safety purposes. However, the eventual use of the property for economic development purposes should benefit the City in terms of increased revenues from an expanded tax base.

City staff recommends adoption of the resolution authorizing the Mayor to execute any and all documents necessary to amend the Interlocal Agreement with Henderson County as described and to effectuate the sale of the Ferry Road property to Buncombe County.

Mr. Tim Harrison said that since the agreement is contingent upon the property being conveyed to Buncombe County for economic development use, he asked if that would be an ongoing provision if this potential buyer does not work out. Assistant City Attorney Jannice Ashley replied that it will be an ongoing provision, regardless of the buyer.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved to adopt Resolution No. 15-63. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 76

B. ORDINANCE NO. 4404 - ORDINANCE ADOPTING THE FISCAL YEAR 2015-16 FEES AND CHARGES

Budget and Financial Reporting Manager Tony McDowell said that this is the consideration of an ordinance adopting fee adjustments for Fiscal Year 2015-16.

The major types of revenue available to North Carolina counties and municipalities are local taxes (including property taxes); local fees, charges and assessments; and intergovernmental and miscellaneous revenue. Local governments have increasingly looked for appropriate opportunities to implement local fees and charges because they have the advantage of aligning service provision directly with payment; therefore, the person or entity receiving the benefit of a service pays for the service. In Asheville, these fees make up about 10% of the City's General Fund revenue and 36% of city-wide revenue. These fees generally fall into three major categories: general user fees and charges; regulatory fees, and; public enterprise fees and charges.

Proposed FY 2015-16 Fee Changes:

1. ***Continuation of Planned Multi-Year Adjustments to Water and Stormwater Fees.*** Based on financial analyses completed in prior years, staff is proposing the following rate adjustments:

   a. Water Resources:
   - Single Family, Multi-Family, Small Commercial/Manufacturer: 1.5% increase
   - Large Commercial/Manufacturer (>1,000 CCF/month): 3.5% increase
   - Wholesale & Irrigation: 5.0% increase
   - Capital Improvement Fee: 1.5% increase (all meter sizes)

   b. Stormwater: 5% increase
   - Single Family properties 225-2,000 sq ft: $2.50/mo. to $2.63/mo.
   - Single Family properties 2,001-4,000 sq ft: $4.00/mo. to $4.20/mo.
   - Single Family properties >4,000 sq ft: $5.50/mo. to $5.78/mo.
   - Non-Single Family properties: $4.00/mo. to $4.20/mo.

2. ***Minor Changes to Other General Fund and Transit Services Fund Fees.*** Staff is recommending minor changes to several fees in these two funds.

The proposed FY 2015-16 fee adjustments were reviewed by the City Council Finance Committee on March 24, 2015. A full summary of the proposed fees and charges was provided to Council. The proposed Solid Waste fee adjustment, which was presented to the Finance Committee on March 24, will be discussed at a future Council budget worksession, and is

therefore not included in the fee package under consideration tonight. As staff continues preparation of the FY 2015-16 Manager's Recommended Budget, there may also be additional fee adjustments that are brought forward as part of the budget presentation in May.

Fees	FY15 Annual Cost	FY16 Annual Cost	Increase
Water - Single Family (5 CCF avg. monthly usage)	$315.24	$319.44	$4.20
Stormwater – Single Family (2,001-4,000 Sq. Ft.)	$48.00	$50.40	$2.40
Total Avg. Cost	$363.24	$369.84	$6.60

The chart below summarizes by fund the additional revenue that will be generated by the proposed FY 2015-16 fee changes:

Fund	Additional Revenue
General Fund	$450 decrease
Transit Services Fund	$200
Stormwater Services Fund	$239,600
Water Resources Fund	$465,130

City staff recommends City Council adopt fee adjustments for Fiscal Year 2015-16.

Regarding water fees, Councilman Smith said that Council years ago hired a consultant group to look at all our water charges. As a result of the study, it was discovered that residential users were paying out of proportion to commercial users. So, Council set a multi-year course to correct that inequity. What this is now is the next step in the multi-year plan.

When Mayor Manheimer asked for public comments, none were received.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Bothwell moved for the adoption of Ordinance No. 4404. This motion was seconded by Councilwoman Wisler and carried unanimously.

ORDINANCE BOOK NO. 29 - PAGE 423

C. BOARDS & COMMISSIONS

Regarding the Civil Service Board vacancies, the following individual has applied for a vacancy on the Board: Pamela Holcombe. It was the consensus of Council to re-advertise for the vacancies on said Board.

Regarding the HUB Community Economic Development Alliance, the following individuals applied for a vacancy: Kendra Penland, Ted Figura, Hunter Goosmann, Ed Manning, Grant Millin and Adrian Vassallo. It was the consensus of Council to interview Kendra Penland, Hunter Goosmann, Ed Manning, Adrian Vassallo and Ted Figura.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Rev. Christopher Chiaronmonte commented about no prayer at the beginning of the City Council meetings and panhandling.

Ms. Sabrah n'haRaven said that the Transit Subcommittee reviewed recommendations to eliminate the downtown fare free zone at their last meeting, but had asked that the item be tabled until their next meeting for real public discussion. Councilman Smith said that fees and charges must be included in the budget cycle in order to adopt the budget prior to the end of the fiscal year. In response to the elimination of the downtown fare free zone, at the Finance Committee, staff responded that (1) it is difficult for the drivers to monitor when people would get on and off; and (2) there are very limited numbers of users.

Closed Session

At 6:05 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(3). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3). This motion was seconded by Councilman Pelly and carried unanimously.

At 6:57 p.m., Vice-Mayor Hunt moved to come out of closed session. This motion was seconded by Councilman Bothwell and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 6:57 p.m.

Magdalen Bowlesson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – April 28, 2015 - 3:00 p.m.

Budget Worksession

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

Finance Director Barbara Whitehorn provided the Council with a preliminary overview of the Fiscal Year 2015-16 Operating Budget, including the enterprise funds, and presented operating budget scenarios for balancing the Fiscal Year 2015-16 budget.

She explained the revenues come from (1) property tax; (2) sales and other taxes; (3) charges for services; (4) licenses and permits; (5) intergovernmental revenue; and (6) other review. Challenges include (1) the North Carolina General Assembly voted to disallow the Privilege License Tax effective July 1, 2015; (2) charges for services are not keeping up with costs (a) solid waste fee, $7.00/month; taxpayer subsidy of service: $2.4 Million; and (b) Nature Center subsidy at 65% of operating budget; and (3) several bills introduced in the 2015 General Assembly could significantly reduce sales tax receipts for the City; one bill could increase tax receipts.

Assumptions for 2015-16 include (1) property tax - County Tax Office predicts value increase of 1.8%; (2) sales tax (a) N.C. League of Municipalities projects growth of 4.0%; and (b) current year trend 14% over prior year; and (3) local revenue - building permits for Fiscal Year 2014-15 is trending 8.5% above budget; (4) Intergovernmental revenue - State utility tax receipts in Fiscal Year 2015 are $600,000 over prior year.

Assumptions for 2015-16 for the General Fund expenditures include (1) 2015 election costs; (2) transit operations; (3) Graffiti Program continuation; (4) maintain contribution to workers compensation and liability funds; (5) fleet maintenance and fuel; (6) enhanced Fire Inspection Program; (7) Police Department's first steps in the Strategic Operating Plan and Organizational Assessment; (8) health care; (9) other benefits; and (10) classification and compensation study. Overall, the General Fund expenditures are anticipated to increase 2.7% over Fiscal Year 2014-15. Estimated expenditures of $102 Million.

She reviewed various revenue strategies to balance the General Fund budget, recommending (1) a 1.5 cent increase per $100 valuation to offset the loss privilege license; (2) decreasing taxpayer subsidy of the Nature Center (a) new gate admission rates; and (b) membership contribution to operations; (3) decreasing taxpayer subsidy at the Aston Park Tennis Center (a) new membership rates; and (4) planned increase in solid waste fee of $3.50/month. With these recommendations, along with managed savings and re-engineering, the budget would be balanced. Staff will continue to seek and implement innovative cost savings models.

She then reviewed the enterprise funds: (1) Water Fund (a) continued stable performance; (b) minor rate adjustments based on financial model were approved on April 14; and (c) $12 Million pay-go investment in water capital improvements; (2) Transit Fund (a) continued financial pressure; (b) no service changes budgeted; and (c) General Fund support increased by $90,000; (3) Parking Fund (a) strong revenue growth; (b) no adjustments to garage or meter rates; (c) maintain $616,000 in support to Transit Fund; and (d) capital program being developed; (4) US Cellular Center Fund (a) moderate performance in Fiscal Year 2014-15 (revenue and expenses adjusted down to reflect lighter event load); (b) no increase in General Fund operating support; and (c) Thomas Wolfe acoustical study funded; and (5) Stormwater Fund

(a) 5% rate increase approved April 14; (b) additional crew added for enhanced maintenance program; and (c) continuation of service and capital investment.

Throughout Ms. Whitehorn's presentation, she responded to various questions/comments from Council, and those which could not be readily responded to would be provided to Council in a memorandum format. Some questions raised include where is the savings from the LED street lights in the budget; request to see how funding is being proportioned out to community programs; how are fees established for outdoor dining; what is the impact on tipping fees since there is success with residents using recycling; is the reinstatement of the leaf trucks in this budget cycle; and request to look at raising parking meter fees in certain corridors.

Ms. Whitehorn then reviewed the upcoming dates associated with adoption of the budget.

Discussion then occurred regarding the different revenue strategies recommended to balance the budget, with each Council member voicing their suggestions, and the City Manager outlining how (if Council rejects the recommended revenue strategies) the $2.5 Million impact might be absorbed.

The majority of Council supported the revenue strategies outlined by Ms. Whitehorn and directed her to move forward with them in order to present a balanced budget.

At 4:05 p.m., Mayor Manheimer adjourned the worksession.

Tuesday – April 28, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MAY 3-9, 2015, AS "NATIONAL DRINKING WATER WEEK"

Mayor Manheimer read the proclamation proclaiming May 3-9, 2015, as "National Drinking Water Week" in the City of Asheville. She presented the proclamation to Director of Water Resources Steve Shoaf, who briefed City Council on some activities taking place during the week.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 14, 2015

B. RESOLUTION NO. 15-64 - RESOLUTION SETTING A PUBLIC HEARING ON MAY 12, 2015, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO SUPPORT POLYLINKS INC.

Summary: The consideration of a resolution authorizing a public hearing to be held on May 12, 2015, to consider an economic development incentive grant for PolyLINKS Inc.

City of Asheville has been requested by Buncombe EDC for consideration of a performance based incentive grant under the City of Asheville Economic Development policy to PolyLINKS Inc. PolyLINKS Inc. is an existing precision metal working company (in the formerly owned Citizen-Times Production Plant on Sardis Road) and they have proposed expansion of their building. The company is investing $1.1 Million in building upgrades and $1.2 Million in machinery & equipment, for a total of $2.3 Million. The expansion will add 12 new jobs with an average wage of $36,000 to the existing 17 employees at the company. The City of Asheville is considering offering a performance-based grant in an amount not to exceed $31,000.

North Carolina state law requires a public hearing be held before an incentive grant can be officially awarded.

Pros:

- Performance driven grant that is distributed after job and investment is achieved or mutually agreed performance bench marks are established;
- Supports job creation and capital investment in Asheville;
- Supports regional and state cooperation in the project.

Con:

- Grant is formulated based on use of a portion of the new incremental increase from property tax revenue generated by the project for a 5 year period.

The project has an overall positive fiscal impact on tax revenues received by the city. Initially (during the grant period), the City will receive a portion of the new incremental property tax revenues from the project. After 5 years, the City will henceforth receive 100% capture of new city taxes. As noted above, the City of Asheville performance-based grant amount will not exceed $31,000 in total.

City staff recommends Council approve a resolution authorizing a public hearing to be held on May 12, 2015, on an economic development incentive grant agreement to support PolyLINKS Inc.

Councilwoman Wisler asked that at the public hearing staff provide information regarding the range of wages.

RESOLUTION BOOK NO. 37 - PAGE 77

C. RESOLUTION NO. 15-65 - RESOLUTION SETTING A PUBLIC HEARING ON MAY 12, 2015, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT TO SUPPORT THE EXPANSION OF HI-WIRE BREWING

Summary: The consideration of a resolution authorizing a public hearing to be held on May 12, 2015, to consider an economic development incentive grant for Hi-Wire Brewing.

Hi-Wire Brewing opened its doors in June 2013 and the company was named Best New N.C. Brewery in 2013 by RateBeer and was awarded the most medals at the 2014 N.C. Brewer's Cup. The continued growth has prompted the company to invest $1.62 million over the next 3 years in a new brewing facility and equipment. Additionally, the company will create 15 new jobs

over a period of 3 years with an average wage rate of 37,400. The company provides 50% of coverage for health insurance and other benefits to employees.

The City's incentive policy would justify an incentive grant of $25,000 to the company. The grant would be subject to a performance agreement with the City, and would be paid in five annual installments, $5,000 a year, after the conditions of the performance agreement are met and the annual property taxes are paid by the company and verified by the City that company has made the required investment and that investment goes on the tax rolls.

North Carolina state law requires a public hearing be held before an incentive grant can be officially awarded.

Pros:

- Performance driven grant that is distributed after job and investment is achieved;
- Supports job creation and capital investment in existing industry in Asheville;
- Supports development of an identified economic cluster in the City; and,
- Supports regional and state cooperation in the project.

Con:

- Grant is formulated based on use of a portion of property tax revenue for a five year period.

The project has an overall positive fiscal impact on tax revenues received by the city. Initially (during the grant period), the City will receive a portion of the new incremental property tax revenues from the project. After five years, the City will henceforth receive 100% capture of new city taxes.

The economic development incentive grant for Hi-Wire Brewing supports the City Council's Strategic Operating Plan as it addresses multiple focus areas. Under the Job Growth and Community Development focus area, the project supports the Goal of creating more collaborative and effective working partnerships between the COA, the business community, and other key organizations to effectively manage the city's regulatory environment while accomplishing economic development goals by meeting the objective to support diversified job growth and small business development. It supports the goal of supporting a strong local economy by continuing to implement sustainable growth and development policies by promoting sustainable, high density infill development that makes efficient use of existing resources.

City staff recommends Council approve a resolution authorizing a public hearing to be held on May 12, 2015, on an economic development incentive grant agreement to support the expansion of Hi-Wire Brewing.

Councilwoman Wisler asked that at the public hearing staff provide information regarding the range of wages.

RESOLUTION BOOK NO. 37 - PAGE 78

D. RESOLUTION NO. 15-66 - RESOLUTION ACCEPTING W. SUMMIT STREET AS A CITY MAINTAINED STREET

Summary: The consideration of a resolution to accept West Summit Avenue as a city-maintained street.

Code of Ordinances Sec. 7-15-1(f)(4)a requires that streets dedicated for public use be accepted by resolution of the City Council. The developer submitted a written request via e-mail message on November 14, 2014 asking the City to accept the subject street as a city-maintained street.

West Summit Avenue from US 25 (Hendersonville Road) to its dead-end is a developer-constructed street that has an average width of 22 feet with 24-inch curb and gutter, a length of 0.18 mile, and a variable right-of-way width of 50 to 100 feet. The original 100-foot right-of-way is recorded in Plat Book 1 Page 62 and City Council approved Resolution # 14-8 to permanently close portions of excessive right-of-way along West Summit Avenue on January 14, 2014 leaving a minimum right-of-way width of 50 feet.

Transportation Department staff, Fire Department staff, Planning Department staff, and Public Works Department staff inspected the subject street and determined that it was constructed according to current standards as indicated in the City of Asheville's Standard Specifications and Details Manual.

Following City Council's approval of this resolution, the subject street will be added to the official Powell Bill List.

Pros:

- The City of Asheville will receive Powell Bill Funds from the North Carolina Department of Transportation (NCDOT) to help maintain the street.
- The street provides access in a residential community.

Con:

- Powell Bill Funds will not cover 100% of the total cost to maintain the street.

There will be no initial financial impact to the City, although the responsibility of maintenance will belong to the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the street.

Staff recommends that City Council accept West Summit Avenue as a city-maintained street.

RESOLUTION BOOK NO. 37 - PAGE 79

E. RESOLUTION NO. 15-67 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE EARTH FARE 5K EVENT

RESOLUTION NO. 15-68 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE DOWNTOWN AFTER 5 EVENTS

RESOLUTION NO. 15-69 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE SUNDAY MUSIC IN THE PARK EVENTS
RESOLUTION NO. 15-70 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE MOUNTAIN SPORTS FESTIVAL

RESOLUTION NO. 15-71 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE BEER CITY FESTIVAL

RESOLUTION NO. 15-72 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE ASHEVILLE HALF MARATHON

RESOLUTION NO. 15-73 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE RACE TO THE TAPS

RESOLUTION NO. 15-74 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT ORGANICFEST

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at Earth Fare 5K on May 9, 2015; Downtown After 5 on May 15, June 19, July 17, August 21, and September 18, 2015; Sunday Music in the Park on May 17, May 31, June 14, June 28, and July 12, 2015; Mountain Sports Festival on May 22, May 23 and May 24, 2015; Beer City Festival on May 30, 2015; Asheville Half Marathon on June 6, 2015; Race to the Taps on August 8, 2015; and Organicfest on August 30, 2015.

- Asheville Track Club has requested through the City of Asheville Community & Economic Development Department that City Council permit the sale of beer and/or unfortified wine at Earth Fare 5K and allow for consumption at this event.

  Earth Fare 5K will be held on Saturday, May 9, 2015, from 6:30 a.m. – 11:30 a.m. within the interior of the velodrome at Carrier Park, located at 220 Amboy Road as per the event area limits referenced on the accompanying site map.

- The Asheville Downtown Association has requested through the City of Asheville Community & Economic Development Department that City Council permit them to serve beer and/or unfortified wine at Downtown After 5, Sunday Music in the Park and Race to the Taps – South Slope and allow for consumption at these events.

  Downtown After 5 will be held on Fridays, May 15, June 19, July 17, August 21 and September 18, 2015, from 5:00 p.m. – 10:00 p.m. on Lexington Avenue between the intersections of Hiawassee and the I-240 underpass, extending within the metered parking lot located at the I-240 underpass as per the event area limits referenced on the accompanying site map.

  Sunday Music in the Park will be held on Sundays, May 17, May 31, June 14, June 28 and July 12, 2015, from 4:00 p.m. – 6:00 p.m. at Pack Square Park's Roger McGuire Green and within the City Hall/Courthouse Parking Lot as per the area limits referenced on the accompanying site map.

  Race to the Taps – South Slope will be held on Saturday, August 8, 2015, from 4:30 p.m. – 10:00 p.m. on Banks Avenue between the intersections of Coxe Avenue and Church Street as per the event area limits referenced on the accompanying site map.

- Mountain Sports Festival has requested through the City of Asheville Community & Economic Development Department that City Council permit them to serve beer and/or unfortified wine at the Mountain Sports Festival and allow for consumption at this event.

  The Mountain Sports Festival will be held on Friday, May 22 from 4:00 p.m. – 10:00 p.m., Saturday, May 23 from 10:00 a.m. – 10:00 p.m., and Sunday, May 24, 2015, from 10:00 a.m. – 6:00 p.m. within the interior of the velodrome at Carrier Park, located at 220 Amboy Road as per the event area limits referenced on the accompanying site map.

- Big Brothers Big Sisters of WNC has requested through the City of Asheville Community & Economic Development Department that City Council permit them to serve beer and/or unfortified wine at the Beer City Festival and allow for consumption at this event.

The Beer City Festival will be held on Saturday, May 30, 2015, from 12:00 p.m. –7:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green, Spruce Street between the intersections of South Pack Square & College Street, and within the City Hall/Courthouse Parking Lot as per the area limits referenced on the accompanying site map.

- The Asheville Buncombe Regional Sports Commission has requested through the City of Asheville Community & Economic Development Department that City Council permit the sale of beer and/or unfortified wine at the Asheville Half Marathon and allow for consumption at this event.

  The Asheville Half Marathon will be held on Saturday, June 6, 2015, from 7:00 a.m. – 12:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green and within the City Hall/Courthouse Parking Lot as per the area limits referenced on the accompanying site map.

- Asheville Greenworks has requested through the City of Asheville Community & Economic Development Department that City Council permit the sale of beer and/or unfortified wine at Organicfest and allow for consumption at this event.

  Organicfest will be held on Sunday, August 30, 2015, from 10:00 a.m. – 6:00 p.m. at Pack Square Park as per the event area limits referenced on the accompanying site map.

Pro:

- Allows fundraising opportunities for Asheville Track Club, Asheville Downtown Association, Mountain Sports Festival, Big Brothers Big Sisters of WNC, Asheville Buncombe Regional Sports Commission, and Asheville Greenworks

Con:

- Potential for public safety issues

City staff recommends City Council adopt resolutions authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Earth Fare 5K, Downtown After 5, Sunday Music in the Park, Mountain Sports Festival, Beer City Festival, Asheville Half Marathon, Race to the Taps – South Slope, and Organicfest.

F. RESOLUTION NO. 15-75 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN EASEMENT TO DUKE ENERGY PROGRESS INC. FOR AN ELECTRIC POWER LINE ON PROPERTY LOCATED ON THOMPSON STREET

Summary: The consideration of a resolution authorizing the City Manager to convey an easement to Duke Energy Progress, Inc. over a portion of city-owned property on Thompson Street.

The City of Asheville owns real property at PIN # 9648813481 and it is currently vacant. The City plans to use the property for future greenway expansion. It contains .35 acres and there are no improvements on site. This property is directly adjacent to the Swannanoa River and the highest and best use appears to be floodplain protection and infrastructure.

Duke Energy is replacing transmission lines on Thompson Street in order to improve reliability to the East Asheville community.

The easement area being requested extends approximately 237 feet along the river side of the property. The total width of the easement is 15' on either side of the line. This is approximately 7100.28 square feet or 0.063 acres of permanent easement that is being requested. In consideration for the easement, Duke has agreed to compensate the city at the fair market value of $37,500. Additionally, Duke Energy Progress has agreed to work with the City to insure that a 10 foot greenway can be constructed on this easement at a later date and this will be reflected in the recorded easement. The Transportation Department's Greenway Planner has reviewed the easement document.

Pros:

- Granting of the easement will allow Duke Energy to upgrade power infrastructure to provide improved service to the East Asheville neighborhood.
- Granting of the easement will not affect the long range plans for greenway construction.
- Conveyance of the easement at fair market value.

Con:

- None noted.

The monetary consideration from the sale of the easement will benefit the General Fund and will be designated for future economic and community development projects.

City staff recommends City Council approve a resolution authorizing the City Manager to convey a 7,100.28 square foot easement over a portion of City-owned property at Thompson Street to Duke Energy Progress, Inc.

RESOLUTION BOOK NO. 37 - PAGE 105

G. RESOLUTION NO. 15-76 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A PROFESSIONAL AGREEMENT WITH CLARK NEXSEN INC. FOR ARCHITECTURAL AND ENGINEERING DESIGN SERVICES FOR THE 200 BINGHAM ROAD PROJECT

Summary: The consideration of a resolution authorizing the City Manager to enter into a professional services agreement with Clark Nexsen, Inc., for the proposed amount of $102,000 plus a 10% contingency amount of $10,200 for a total project budget in the amount of $112,200 for Architectural and Engineering Design Services for the 200 Bingham Road project.

City Council authorized the acquisition of property at 200 Bingham Road for the relocations of Water Maintenance / Meter Services. On February 19, 2015, the City acquired the property. Upon acquisition, the Water Resources Department (Department) started making plans to retrofit the building and property to better serve its needs. On February 24, 2015, City Council approved a budget amendment to transfer $3,525,000 from the Water Fund Balance to the 200 Bingham Road project. The budget transfer included funds for the final purchase price of $2,855,000 and additional funds for the architectural and engineering design services agreement along with anticipated construction expenses.

On February 9, 2015, the Department issued a Request for Qualifications (RFQ) for Architectural Services for the Water Maintenance / Meter Services Facility at 200 Bingham Road. In response to that RFQ, the department received six submittals from the following:

1. Architectural Design Studio – Asheville, NC
2. Clark Nexsen, Inc. – Asheville, NC
3. Innovative Design – Raleigh, NC
4. Mathews Architecture, PA – Asheville, NC
5. Padgett & Freeman Architects, PA – Asheville, NC
6. Sparc Design, PC – Asheville, NC

A Departmental staff team reviewed these submittals and recommended the firm of Clark Nexsen, Inc.

The scope of the project will include architectural and engineering design services for two phases. Phase I will consist of: (1) a stone shed with storage areas for sand/dirt, washed stone, and rip rap; (2) layout of the yard area for storage of the department's equipment; (3) roof membrane repair and replacement; and (4) fence/gate work. Phase II will consist of interior retrofit based on the layout to include office space, conference areas, crew quarters, equipment storage, locker rooms, HVAC, elevator repairs/replacement to provide access to the second floor, an exercise area, and a video conference area. Also included are a site survey, bidding for Phase II construction, and construction administration. While there will be a Phase III of the project, design efforts for that work are not included as part of this proposal.

Pro:

- Approval of the professional services agreement with Clark Nexsen will keep the project on schedule to relocate Water Maintenance / Meter Services in late December 2015 or early January 2016.

Con:

- If the agreement is not approved, the design and renovations will be delayed, thereby delaying the relocation date past the anticipated goal of January 2016.

The Water Resources Department currently has a $1,234,685 available budget for the 200 Bingham Road Water Maintenance Facility project. The available budget will be used for design and construction expenses.

Available Budget in 200 Bingham Road project	$1,234,685.74
Amount Needed for Clark Nexsen agreement	$ 112,200.00
Amount Remaining for Construction	$1,122,485.74

The architect has provided a preliminary construction estimate of $1 million. There will also be Information Technology needs for an added cost of approximately $80,000. Council approval of additional contracts associated with this project will be sought in accordance with the City's Procurement, Purchasing and Contracting Policy.

Staff recommends City Council approval of a resolution to enter into a professional services agreement with Clark Nexsen, Inc., for the proposed amount of $102,000 plus a 10% contingency amount of $10,200 for a total project budget in the amount of $112,200 for Architectural and Engineering Design Services for the 200 Bingham Road project.

RESOLUTION BOOK NO. 37 - PAGE 106

H. ORDINANCE NO. 4405 - ORDINANCE TO RESCIND THE ELIMINATION OF THE DOWNTOWN FARE FREE ZONE AND REFER THE ACTION TO THE

MULTIMODAL TRANSPORTATION COMMISSION FOR FURTHER DISCUSSION

Summary: The consideration of an ordinance to rescind the elimination of the Downtown Fare-Free Zone approved by Council on April 14, 2015.

On April 14, 2015, City Council adopted fees adjustments which involved the elimination of the Downtown Free-Fare Zone by Ordinance 4404.

The Transit Committee has asked staff to allow for more opportunities to discuss this change with their members, the Multimodal Transportation Commission and the public, due to the effect this measure could have on low-income residents.

After further consideration, staff is recommending City Council to consider an ordinance to rescind the elimination of the Downtown Fare-Free Zone, allowing for a 120-day review and evaluation of policy alternatives.

Pros:

- This action allows staff to review and reevaluate options for the fare-free zone.
- Eliminates the potential unintended effects on low-income residents that use the fare-free zone to access to their daily activities.

Cons:

- None.

This action has no fiscal impact.

City staff recommends that City Council consider an ordinance to rescind the elimination of the Downtown Fare-Free Zone.

Councilwoman Wisler asked that for the next budget cycle, the Transportation Department, in conjunction with the Multimodal Transportation Commission and the Transit Subcommittee, look at all transit fares and report back to Council with a recommendation on those fares.

ORDINANCE BOOK NO. 29 - PAGE 428

I. RESOLUTION NO. 15-77 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CHANGE ORDER WITH JOHNSON PRICE SPRINKLE PA FOR THE ASHEVILLE POLICE DEPARTMENT SPEED MEASURING INSTRUMENTS AUDIT

Summary: The consideration of a resolution authorizing the City Manager to execute a change order in contract with Johnson Price Sprinkle PA to an amount not to exceed $120,000, for the Asheville Police Department (Police Department) speed measuring instruments audit.

The City of Asheville Finance Department is seeking to enter a change order for the current general services agreement with Johnson Price Sprinkle PA to complete a review of the the Police Department's speed measuring instruments and officer certifications, which will be completed in May. This contract was entered on November 7, 2014, to provide independent, external review of the Police Department's speed measuring instruments and officer certifications from January 2011 through November 2014 after concerns were raised regarding expired calibrations and certifications.

This change order is needed due to the time involved in reviewing an increased volume of information.

Pros:

- City will receive deliverable in the form of a final report of the speed measuring instruments certifications review.
- City will receive a list of suggested needed improvements.

Con:

- None.

The funding needed for this agreement is currently allocated within the Finance Department Administration Division's contracted services budget.

Staff recommends that City Council adopt a resolution authorizing the City Manager to enter a change order for the general services contract with Johnson Price Sprinkle PA for an amount not to exceed $120,000 with the understanding that funding is project-specific.

RESOLUTION BOOK NO. 37 - PAGE 107

J. ORDINANCE NO. 4406 - BUDGET AMENDMENT TO REFLECT THE COST SHARING OF A NEW VEHICLE PURCHASE WITH STREET CUT ENTERPRISE FUND

Summary: The consideration of a technical budget amendment in the amount of $13,190 in the General Capital Projects Fund, funded by debt proceeds, to reflect the cost sharing of a new vehicle purchase with Street Cut Enterprise Fund.

Certain City employees and equipment are used both to perform General Fund and Enterprise Fund activities for the citizens of Asheville. In order to properly account for the recent fixed asset vehicle purchase of a new Ford Explorer, one-half of the total expense is being transferred through a budget amendment from the Street Cut Enterprise Fund to the General Capital Projects Fund.

Pro:

- Properly accounting for the fixed asset purchase to help to ensure the City's financial reports are correct.

Con:

- None.

This transaction requires a technical budget amendment to reduce the budget in the Street Cut Utility Fund and increase the budget in the General Capital Projects Fund.

City staff recommends City Council adopt the technical budget amendment in the amount of $13,190 in the General Capital Projects Fund, funded by debt proceeds, to reflect the cost sharing of a new vehicle purchase with Street Cut Enterprise Fund.

ORDINANCE BOOK NO. 29 - PAGE 429

K. ORDINANCE NO. 4407 - BUDGET AMENDMENT TO ACCEPT THE DONATION FROM HUMANA FOR MATERIALS AND SUPPLIES FOR THE 2015 ASHEVILLE BUNCOMBE SENIOR GAMES

Summary: The consideration of a budget amendment in the General Fund in the amount of $1,000 for materials and supplies for the Asheville Buncombe Senior Games.

Each year the City of Asheville in conjunction with Buncombe County produces the Asheville Buncombe Senior Games, a sports competition for people age 50 and older under the

direction of North Carolina Senior Games through the State of North Carolina Division of Aging and Adult Services.

The 2015 Asheville Buncombe Senior Games will occur April 23 – May 8 at sport venues located throughout Buncombe County. This year the City received a $1,000 donation from Humana to support the cost of supplies and materials for the games.

Pro:
- Provide materials and supplies for the 2015 Asheville Buncombe Senior Games.

Con:
- None

The budget amendment increases the General Fund budget for materials and supplies by $1,000. These expenditures are fully funded by a donation in the amount of $1,000 that has been received; thus, there is no net fiscal impact to the City's operating budget.

Staff recommends City Council to approve a budget amendment authorizing the City Manager to accept the donation from Humana in the amount of $1,000 to support the cost of materials and supplies for the 2015 Asheville Buncombe Senior Games.

ORDINANCE BOOK NO. 29 - PAGE 431

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Wisler moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Pelly and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. LEGISLATIVE UPDATE

Mayor Manheimer highlighted Council on some the following current bills with potential impact on the City of Asheville budget: County Tax Flexibility/Municipal Revenue Options; Sales Tax Fairness Act; Restrict Municipal Eminent Domain, Referendum for Certain Local Debt; and new Historic Preservation Tax Credit.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE ASHEVILLE OUTLETS SIGN PACKAGE LOCATED AT 800 BREVARD ROAD, ASHEVILLE, N.C.

ORDINANCE NO. 4408 - ORDINANCE AMENDING THE ASHEVILLE OUTLETS SIGN PACKAGE LOCATED AT 800 BREVARD ROAD, ASHEVILLE, N.C.

Urban Planner Julia Fields said that this is the consideration of an ordinance to amend the Asheville Outlets sign package located at 800 Brevard Road, Asheville, N.C. This public hearing was advertised on April 17 and 24, 2015.

On April 22, 2014, the Asheville City Council approved a master signage plan for the Asheville Outlets development located at 800 Brevard Road. The subject property at that time was comprised of approximately 60 acres.

The signage package approved by Council included provisions for:

- Freestanding Development Identification Signage (total of 5 signs)
- Attached Identification Signage (based on linear footage of the exterior façade of the center)
- Banners (on building facades [20] and parking lot light poles [20])
- Vehicular Directional Signs (total of 6 signs)
- Parking Area Location Signs
- Service Door Identity Signs

Since that time the retail center development has been expanded to include the property on which the former Belk Department Store was located (an addition of approximately nine acres to the project site). The project site is zoned Regional Business (RB). The applicant is asking that this area be added to the area covered by the signage plan.

The applicant is not proposing any additional freestanding signs or vehicular directional signs, nor is the applicant increasing the number of banners permitted. The addition of the former Belk property to the development will only affect:

- The linear footage of the exterior façade of the center which affects the amount of attached identification signage that will be allowed.
- The possible location of such attached identification signage – expanding to allow attached signage at the entrance of a building tenant who has an exterior public entrance (not just at the general public access points to the center).
- The location of permitted banners (the number permitted does not change).
- The area in which parking area location and service door identity signs could be placed.

Anything not addressed in this sign package must meet City of Asheville standards.

The stated purpose in the City's Unified Development Ordinance of allowing the consideration of a separate signage plan is as follows: *The purpose of allowing the consideration of a separate signage plan is to permit creativity in sign placement to address issues and constraints associated with topography, pedestrian-orientation, way-finding, and other conditions unique to the subject development.*

When Council reviewed the proposed signage plan in 2014, it was found that the signage proposed met this stated purpose. The amendment currently before Council does not change the main elements of the previously approved plans. The amendment expands the area for which the package applies.

Pros:

- Provides clear and recognizable signage for a major regional shopping center.
- Provides only limited expansion of the application area for the previously approved sign package.
- Promotes a coordinated unifying theme for the development.

Con:

- Exceeds existing standards found in the UDO.

City staff recommends that City Council adopt the ordinance approving the amendment to the sign package for 800 Brevard Road (Asheville Outlets) as submitted subject to the

condition that any signage not addressed in the package would have to comply with the City's sign regulations or an amendment to this sign package would have to be approved.

Mr. W. Louis Bissette, attorney representing the developer, explained what a great retail experience this project will create, noting that it will provide hundreds of new jobs.

Mayor Manheimer opened the public hearing at 5:17 p.m., and when no one spoke, she closed the public hearing at 5:17 p.m.

Councilman Bothwell felt that all businesses, large and small, should comply with the existing sign regulations. He voted against the original signage plan, and would vote against this amendment.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Pelly moved to approve the amendment to the signage plan for the Asheville Outlets project located at 800 Brevard Road subject to the condition that any signage not addressed in the package would have to comply with the City's sign regulations or an amendment to this sign package would have to be approved. This motion was seconded by Vice-Mayor Hunt and carried on a 6-1 vote, with Councilman Bothwell voting "no."

ORDINANCE BOOK NO. 29 – PAGE 433

B. PUBLIC HEARING TO CONSIDER ADOPTION OF THE CONSOLIDATED STRATEGIC HOUSING AND COMMUNITY DEVELOPMENT PLAN FOR 2015-19

RESOLUTION NO. 15-78 - RESOLUTION APPROVING THE 2015-2019 CONSOLIDATED STRATEGIC HOUSING AND COMMUNITY DEVELOPMENT PLAN

Assistant Community & Economic Development Director Jeff Staudinger said that this is the consideration of a public hearing and resolution approving the City's Consolidated Strategic Housing and Community Development Plan for 2015-19, which will guide Community Development Block Grant and HOME funding decisions during that time period. This public hearing was advertised on April 17 and 24, 2015.

Every five years the City of Asheville, as the Participating Jurisdiction of the Asheville Regional Housing Consortium and as a Community Development Block Grant (CDBG) Entitlement Community must prepare a plan for the use of CDBG and HOME funds for the next five years. The Plan establishes priorities for the use of these federal funds, based upon an analysis of need and impact.

The Community Development Division began preparation of the Plan in December of 2014. An extensive citizen engagement process elicited broad stakeholder participation. The Housing Needs Assessment report prepared by Bowen National Research provided essential information about existing and projected affordable housing needs. The Asheville Regional Housing Consortium Board and the City Housing and Community Development Committee, serving as the advisory boards for the plan, reviewed data and citizen comments and have recommended priorities.

The highest priority in the proposed plan is to increase housing affordable to households earning 60% or less of median income.

The final Plan, as approved by Council, will be submitted to HUD on or before May 15, 2015. Submittal is made electronically through HUD's "IDIS" system. A copy of the plan will be available on the City's web site, and distributed to all Asheville Regional Housing Consortium members.

All funding decisions for 2015 CDBG and HOME funding must be in accord with the 2015-2019 Consolidated Plan. Staff considers all funding recommendations before Council to be supported by the Plan.

Pros:

- Approval of the Consolidated Plan will ensure continued eligibility for federal CDBG and HOME funding;
- Because of the extensive research and community engagement, the Consolidated Plan is a relevant and meaningful source of information about the needs of the communities served by the Plan;
- Priorities established in the Consolidated Plan will guide applicants as they seek to develop programs and projects that meet the greatest needs in the communities served by the Plan.

Con:

- None.

The 2015-2019 Consolidated Plan guides the use of federal funds during that time period. The priorities of the Plan, by guiding the investment of federal funds for affordable housing and other eligible activities, may affect City decisions about investments in CDBG and HOME funded projects during this time frame. The submittal of the Plan and its acceptance by HUD is a requirement for the continued receipt of CDBG and HOME funds.

Staff recommends that Council approve the 2015-2019 Consolidated Plan for CDBG and HOME.

Mayor Manheimer opened the public hearing at 5:34 p.m.

Mr. Greg Borom, representing Children First of Buncombe County, thanked the Council for addressing issues surrounding affordable housing with bold and creative ideas. Investing in children is a long-term proposition for our community's viability and future and we know that the stress of homelessness as well as the stress of being in an unsafe or unstable housing can impact children's health and educational outcomes for years to come.

Mayor Manheimer closed the public hearing at 5:36 p.m.

Councilman Smith noted that the Plan does reflect the community's needs, but does not provide nearly enough money. However, he noted that several thousands of people will be helped. We have dwindling resources for growing needs.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 15-78. This motion was seconded by Vice-Mayor Hunt and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 108

C. PUBLIC HEARING TO RECEIVE COMMENTS REGARDING THE CONSOLIDATED ACTION PLAN FOR FISCAL YEAR 2015-16 WHICH SETS

OUT THE PROPOSED USE OF FEDERAL COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME INVESTMENT PARTNERSHIP ACT FUNDS FOR THE COMING YEAR

RESOLUTION NO. 15-79 - RESOLUTION AUTHORIZING SUBMISSION OF THE CITY'S CONSOLIDATED ANNUAL ACTION PLAN FOR 2015-16 TO THE U.S. DEPT. OF HOUSING AND URBAN DEVELOPMENT

Community Development Manager Heather Dillashaw said that this is a public hearing to receive comments regarding the proposed Consolidated Action Plan for Fiscal Year (FY) 2015-16, which sets out the proposed use of federal Community Development Block Grant (CDBG) and HOME Investment Partnership Act (HOME) funds for the coming fiscal year; followed immediately by Council's consideration of a resolution authorizing submission of this Consolidated Action Plan to the US Department of Housing and Urban Development. This public hearing was advertised on April 17 and 24, 2015.

The City will have $1,083,621 in CDBG funds and $1,088,257 in HOME funds available for the fiscal year beginning July 1, 2015. The City's Housing and Community Development Committee has made recommendations for the use of CDBG funds, which must be used in housing or community development programs in Asheville, and the Asheville Regional Housing Consortium has recommended uses for the HOME funds, which must be used for housing programs within the four-county Consortium area (Buncombe, Henderson, Madison, and Transylvania counties). A total of 18 CDBG and 8 HOME programs are recommended for funding. Allocations are consistent with the proposed Strategic Housing & Community Plan for 2015-2019.

20% of CDBG funds and 10% of HOME funds are available for administration. Funding for City management and administration is relatively flat in comparison to last year. The Community Development Division will maintain its staffing this year, but with increased federal administrative requirements program administration is an on-going challenge.

If the proposed projects receive the funding from other sources necessary to make them possible, HOME funds and CDBG funds will assist in creating 162 new affordable units, improve 16 housing units and helping an additional 100 households afford housing Consortium-wide. CDBG funds will also benefit almost 2,500 low-income City residents through homeless services, financial counseling, small business assistance, and other needed services. Our CDBG partner agencies leverage $4.82 of other funding for every $1.00 of CDBG funding. Our HOME partners will raise over $25.00 for every $1.00 of HOME funds invested in their projects.

A public hearing will be held at the Council meeting of April 28. Comments received at the meeting will be incorporated into the Plan, as will comments submitted in writing. The plan is due to be submitted to HUD by May 15.

Pros:

- Approval of the Action Plan paves the way for the receipts of over $2,170,000 of HUD funding to the City and region, which will be used to create affordable housing and create jobs.
- HUD funding will leverage approximately $34,900,000 of additional funding for these projects.
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee and the Asheville Regional Housing Consortium.

Con:

- It is not possible to fund all the applications received, and most of those funded will receive less than the amount requested.

The Action Plan is fully funded from federal CDBG & HOME entitlement grants, unused funds from previous completed projects, and estimated program income. Staff costs to administer the program are also fully paid from federal sources. The funded programs will provide new construction and other economic activity in the City and region, creating and sustaining employment.

Staff recommends approval of the resolution authorizing submission of the City's Consolidated Annual Action Plan for 2015-16 to the U. S. Dept. of Housing and Urban Development.

Mayor Manheimer opened the public hearing at 5:41 p.m.

Ms. Kendra Penland, interim Executive Director of Green Opportunities, thanked City Council for their support.

Mayor Manheimer closed the public hearing at 5:43 p.m.

Councilman Smith thanked City staff for their assistance in evaluating the applications as it is very difficult to decide how to dispense the allowed CDBG funds and HOME funds to the very deserving applicants.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 15-79. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 109

D. PUBLIC HEARING TO CONSIDER THE PERMANENT CLOSING OF A PORTION OF BRADLEY STREET

RESOLUTION NO. 15-80 - RESOLUTION TO PERMANENTLY CLOSE A PORTION OF BRADLEY STREET

Mr. Chad Bandy, Streets Manager, said that this is the consideration of a resolution to permanently close a portion of Bradley Street. This public hearing was advertised on March 27, April 3, April 10 and April 17, 2015.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Fiano Properties, property owner on both sides of the proposed closure area, have requested the City of Asheville to permanently close a portion of Bradley Street. Other property owners in the immediate area, not abutting the proposed closure area, signed the petition and submitted affidavits to close permanently close a portion of Bradley Street. Said other property owners include Sandra Alexander of 8 Moore Avenue; Megan and John Griffin of 430 State Street; and Aaron Marmaret and B. J. Harden Jones of 147 Bradley Street. Notice of this closing was via the posting onsite of the closure.

He said that the closing is subject to Fiano Properties, dedicating a new right of way to the City of Asheville that will be of equal width to the proposed closure and will allow for a continuous right of way around the proposed closed portion. In addition, the closing is subject to the retention by the City of Asheville Water Resources Department, its successors and assigns, of a 20 foot wide permanent easement, for the operation and maintenance of a water line lying 10 feet on each side of the center line of said water line located within the portion of

Bradley Street proposed to be closed.

The Multimodal Transportation Commission met on February 13, 2015, and approved the closure.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution to permanently close a portion of Bradley Street.

Mayor Manheimer opened the public hearing at 5:48 p.m., and when no one spoke, she closed the public hearing at 5:48 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Wisler moved for the adoption of Resolution No. 15-80. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 36 – PAGE 110

E. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR A 97-UNIT APARTMENT BUILDING LOCATED AT 128 FLORENCE STREET AND WHITE FAWN LANE KNOWN AS BEAUCATCHER FLATS

City Attorney Currin reviewed with Council the conditional use permit hearing process, which is quasi-judicial. At this public hearing, all the testimony needs to be sworn and due process protections afforded to the Applicant.

City Attorney Currin asked if any Council member has any special knowledge associated with this project that they disclose it at this time. All Council members noted that they have had outside contact but would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

Urban Planner Jessica Bernstein submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Bernstein said that this is the consideration of the issuance of a conditional use permit for a 97-unit apartment building located at 128 Florence Street and White Fawn Lane.

The site consists of two parcels with a combined area of 3.24 acre parcel located at 128 Florence Street with additional frontage on White Fawn Place (PINs 9648.46-8032 and 9648.46-8234) (Attachment to City Exhibit 3 - Aerial Map). The site is accessed from Biltmore Avenue just north of Mission Hospital, is zoned Institutional and is currently vacant. Some previous site work was done on the parcel in 2007, including the construction of retaining walls that will be incorporated into the proposal.

Adjacent zoning and uses include Institutional to the west (medical and office/institutional uses), RS-8 to the north (single-family homes); Institutional and RS-2 to the east (vacant and Helpmate); and Institutional to the south (Mission Hospital).

The developer, South Slope Partners, LLC., is proposing a 97-unit multi-family apartment building on the site with associated parking and improvements related to residential amenities - (Attachment to City Exhibit 3 - Site Plan). The structure is shown as four levels with a maximum height of 42 feet. There are 76 one-bedroom and 21 two-bedroom units proposed. Site improvements include an outdoor terrace with a pool and open space.

Access to the site is via two twenty-four foot driveways from Florence Street at either end of the parcel frontage along this public street. There is an existing 5.5 foot sidewalk on the opposite side of Florence Street and none is proposed along the project side or along White Fawn Place.

Parking is provided to the side and rear of the building and a total of 106 spaces are shown on plans, including five accessible spaces and the required bike parking. Pedestrian pathways provide access throughout the site.

Landscaping required for the project includes property line buffer buffering to the north (Type B - 30'), street trees on both frontages, vehicular use area landscaping, building impact landscaping, and tree save area and are indicated on plans. There are a number of existing and proposed retaining walls. Compliance with standards found in Section 7-10-5 of the UDO will be required for new walls.

Fifteen percent of the total lot area is required to be dedicated as open space - 21,196 square feet. A total of 25,225 square feet of open space is provided.

The site is currently zoned Institutional; the use proposed is permitted by-right and the applicant is proposing to meet the standards of the District with this development proposal. Maximum residential density was recently increased for the Institutional zoning district to 30 units per acre; this project proposes 29.9 units per acre.

This proposal was approved with conditions by the Technical Review Committee on March 16, 2015 and requires quasi-judicial review by City Council and Final TRC review prior to zoning approval.

The Asheville Planning and Zoning Commission reviewed this proposal at a meeting on April 1, 2015. At this meeting the Commission voted unanimously (6-0) to recommend approval of the conditional use permit to the Asheville City Council.

The applicant held a neighborhood meeting on March 26, 2015, and has met separately with several neighboring property owners. Staff has heard from neighbors with concerns about increased traffic and overflow parking on Florence Street.

Section 7-16-2(c) of the Unified Development Ordinance (UDO) states that Asheville City Council shall not approve the conditional use application and site plan unless and until it makes certain findings based on the evidence and the testimony received at the public hearing or

otherwise appearing in the record of the case. The applicant has provided a statement on these findings.

Staff finds that the relevant standards of the City have been met or can be met with this application.

Mayor Manheimer opened the public hearing at 5:56 p.m.

Mr. W. Louis Bissette, attorney representing Beaucatcher Flats, said that the site is zoned institutional and is permitted by right. The applicant will meet all standards of that district. The Project was approved with conditions by the Technical Review Committee and unanimously by the Planning & Zoning Commission. The applicant has held a neighborhood meeting and has met several times with two of its closest neighbors - Helpmate and Mission Health System. He read a letter from Ms. Sonya B. Greck, Sr. VP of Mission Health System expressing their support (Applicant Exhibit 1). The applicant has met with staff and Helpmate Board members on three occasions. Regarding Helpmate, the developer understands the security concerns and is committed to assist them in the following ways (which are not meant to be conditions) (1) provide Helpmate with a $10,000 contribution to assist in the acquisition of an upgraded security system; (2) consult with Helpmate in designing the project's landscaping and lighting packages; (3) not oppose a no-parking area on the lower section of Florence Street adjacent to Helpmate (understanding that is the City's prerogative); and (4) provide a discounted rental rate to a local law enforcement officer who would live in the apartment complex. This property is an infill development that utilizes existing City streets, has adequate previously installed water and sewer and retaining walls - all of which are incorporated into this proposal. He said that their application (Applicant Exhibit 2) and the testimony presents adequate factual information to support each of the required findings by the Council. He then reviewed the seven conditional use permit standards (Attachment to City Exhibit 3 - Conditional Use Permit Application Statement on Findings). The project does not contain enough residential units to require a traffic study. Rental rates are anticipated to be well under the City's current workforce housing maximum. The one-bedroom units would be $1,050/month and the 2-bedroom units would be $1,450/month. The average rent across the 97 units will be approximately $1,140/month. The property currently pays $8,646 annually in City, County and Asheville City School System taxes, and upon completion, the estimated taxes will be approximately $120,000 annually.

Mr. Matt Sprouse, landscape architect, reviewed with Council the site plan. Using a PowerPoint (Applicant Exhibit 3), he oriented the Council to the location and showed the different views of the area from the site. The site was previously much graded flat from the previous development. This is a good example of infill development, which is within one mile from Pack Square. They are designing within the existing site improvements. The project gives ample opportunity for multimodal transportation options for the residents. The traffic study was not required, however, the developer did consult with a traffic engineer to do a study. That study indicated that in terms of additional traffic, what this development would add is approximately 1 car per minute through those peak hours. Most of the traffic will go down to the stop light at Florence Street and Biltmore Avenue. Over the last five years there have been 11 incidents at that intersection and 7 were property damage car accidents.

Mr. Chris Warren, part of the development team, urged Council to support this project.

Ms. April Burgess Johnson, Executive Director of Helpmate, said that Helpmate is well aware of the critical lack of housing stock in Asheville and fully support the development of additional housing units; however, she expressed concern about the increased pedestrian and vehicular traffic in this area and the security risk it poses to their shelter. There will be increased pedestrian traffic on the very steep street leading down to Biltmore Avenue. She asked that the sidewalk be extended on Florence Street going towards Biltmore Avenue. Another main concerns is parking along Florence Street (which is in front of their domestic violence shelter), since it seems likely there will be on street parking given there are 97 units with only 106 parking

spaces. Overnight parking will make is easy for a batterer to stalk their victim which is residing in the shelter. She asked Council to designate all of Veronica Lane and the portion of Florence Street that has a direct site line of their shelter (and 100 feet beyond that site line) as a no parking zone. They are in the process of hiring a security consultant to provide them with a detailed report about where their greatest amount of security risk and exposure will be in relationship to the building of Beaucatcher Flats, with the overflow parking on the street and increased traffic and pedestrian traffic. She asked Council to continue the public hearing so they will be able to bring forward additional information about what the security risks are.

The following individuals reiterated Ms. Johnson's concerns regarding safety of the residents at Helpmate:

Ms. Bonnie Spradling, Helpmate Board Member
Mr. Joe Fishleigh, Helpmate President
Ms. Cindy Hamilton, Immediate Past President of Helpmate
Ms. Cindy Ireland, Secretary of Helpmate (Neighborhood Exhibit 1)

Mr. Chad Pierce, resident at 41 White Fawn Drive, felt that the dumpster should be moved to the south side of the property and locate it deeper into the industrial zone (Neighborhood Exhibit 2). He also requested a condition to eliminate the secondary entrance onto White Fawn Drive (or prohibit lend hand movements) so as to eliminate the traffic into the residential White Fawn neighborhood.

City Attorney Currin said that the statutes states that Council cannot consider evidence relating to traffic safety from a lay witness (someone who is not an expert). People can testify as to their concerns, but the law does not allow Council to consider that.

Mr. Sprouse responded to the relocation of the dumpster request. Using a portion of the plan (Applicant Exhibit 4), he showed the location of the dumpster which will be screened, noting that there will be 30 feet of landscape buffer, then 20 feet of right-of-way, and then an additional 30 feet to the rear of the nearest neighbor, for a total of 80 feet from the residents to the dumpster location.

Using the site plan (Applicant Exhibit 5), Mr. Sprouse explained that the developer would be willing to construct a sidewalk (approximately 200 feet) on their property (in the City's right-of-way) leading down to Biltmore Avenue. At the end of their property, there is an asphalt parking lot that goes all the way down to Biltmore Avenue.

Regarding the elimination of the second entrance, Mr. Sprouse said that the secondary entrance was a requirement from the Fire Department.

In response to Councilman Smith, Mr. Bissette said that the developer is committed to assisting Helpmate with their security concerns as outlined above; however, they did not view them as conditions. City Attorney Currin said that if they are included as conditions, the City can enforce them. Ms. Johnson said that they are not asking Council to include the four items as conditions as they have a good working relationship with the developer.

When Councilwoman Wisler asked if the developer would be willing to continue the public hearing, per Helpmate's request, Mr. Bissette said that they had not heard that request until this meeting. He said that timing of this small project is important and would not support a continuation request. Mayor Manheimer also noted that the City has a timeline within which to act after receiving the material.

In response to Councilman Davis, City Traffic Engineer Jeff Moore said that should a concern arise from excessive traffic into the White Fawn neighborhood, after study, the City could restrict left turn lanes.

In response to Councilman Davis regarding eliminating on-street parking on Florence Street, Ms. Bernstein said that as you go into the single family neighborhood to the north, most of those residents rely on on-street parking. Mr. Moore agreed with Ms. Bernstein and said that we would want to study that carefully so as not to create an unintended consequences for other area residents as generally on-street parking serves the neighbors close to that parking. City Attorney Currin said that the City Traffic Engineer can study that issue and report to Council at a later time, since it is not a condition of the conditional use permit.

Using Applicant Exhibit 6, Mr. Bissette said that he believed that Helpmate was requesting the City designate all of Veronica Lane and the portion of Florence Street that has a direct site line of their shelter (and 100 feet beyond that site line) as a no parking zone.

Mr. Sprouse said that at this time the developer has a potential fee in lieu of for the sidewalk that would be required on White Fawn Place. After speaking with the developer, he asked that instead of being conditioned to construct the approximately 200 feet of sidewalk on their property (in the City's right-of-way) leading down to Biltmore Avenue, that that fee in lieu of be transferred to the sidewalk on their property leading down to Biltmore Avenue - so they would not have to pay a fee in lieu of twice. It was the consensus of Council that the condition be that the sidewalk be constructed on the developer's property leading down to Biltmore Avenue, and that a fee in lieu of be granted for the sidewalk required on White Fawn Place.

Mayor Manheimer closed the public hearing at 7:00 p.m.

Councilman Smith briefly looked at what Mission Hospital pays their employees and many could not afford to live at this project. Council is well aware that we can't meet all the affordable housing needs and we are seeking partners to provide housing for people who want to live close to where they work.

When City Attorney Currin said that staff has recommended that the approval also be conditioned on the developer's compliance with the site plan and the Technical Review Committee conditions, Mr. Bissette said that they are agreeable to that condition.

Mayor Manheimer noted that Council is looking for a condition for the construction of the sidewalk on the developer's property leading down to Biltmore Avenue, as shown on Applicant Exhibit 5. She noted that that per the City's requirements there is already a fee in lieu of being contemplated for the sidewalk on White Fawn Place.

Councilman Smith did not want to make all our housing exclusive and understood that the conditional use permit standards do not allow him to consider affordable housing for approval. While he has concerns, he hoped that the relationship will grow with this developer.

Vice-Mayor Hunt stated that the City needs more sidewalks and he felt that where appropriate he would prefer to have sidewalks constructed rather than granting a fee in lieu of.

Councilman Davis moved to recommend approval of the conditional use permit for Beaucatcher Flats located at 128 Florence Street and White Fawn Lane, subject to (1) the developer's compliance with the site plan; (2) the Technical Review Committee conditions; and (3) the construction of the sidewalk on the developer's property leading down to Biltmore Avenue. This motion was seconded by Councilman Bothwell and carried unanimously.

City Attorney Currin said that on the May 26 agenda, a motion will be placed approving the Findings of Fact and Conclusions of Law for Beaucatcher Flats located at 128 Florence Street and White Fawn Lane.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. MOTION AUTHORIZING THE MAYOR TO SIGN A LETTER TO THE WNC REGIONAL AIR QUALITY BOARD TO STRENGTHEN THE PERMIT LIMIT FOR SULFUR DIOXIDE (S02) TO PROTECT OUR COMMUNITY FROM IMPACTS OF HARMFUL AIR POLLUTION

Said letter reads: "On behalf of the Asheville City Council, I am writing to express concern about the draft Title V air permit recently issued by the Western North Carolina Regional Air Quality Agency (WNCRAQA) for Duke Energy's Asheville Steam Electric Plant. Specifically, Council is concerned that the suggested permit limit for sulfur dioxide (SO2) is insufficient to protect city and county residents from harmful air pollution, and we ask that you strengthen that limit to ensure our residents can breathe healthy air.

"As you know, even short-term exposure to SO2 is linked with an array of adverse respiratory effects, including bronchoconstriction and increased asthma symptoms. Elevated concentrations of SO2 in the air leads to more emergency room visits and hospital admissions, particularly for children, the elderly, and people with asthma.

"According to a recent report that uses a model approved by the Environmental Protection Agency (EPA) for tracking SO2 pollution, emissions from the Asheville plant have been causing violations of the ambient air quality standard for SO2 established by EPA. Indeed, the report states that the pollution in residential and recreational areas is at concentrations up to 3.5 times higher than levels EPA has determined to be safe. These exceedances have occurred approximately one out of every three to four days since 2010.

"I am concerned that the newly released draft air permit maintains the same SO2 emissions limit that the plant has had for years. This limit is nearly 80 times higher than the limit necessary to attain EPA's public health-based SO2 standard, and we believe it is insufficient to protect our community from the impacts of air pollution.

"The final Title V permit should contain limits that allow ambient air in the Asheville area to meet EPA's standard. We understand that limit to be no more than 61.7 lb/hr of SO2 for each coal-burning unit, or a plant-wide average of 0.029 lb/MMBtu. We also understand that these levels are achievable if the plant's air pollution controls are run at full efficiency, as they were when they were first installed, or if the plant stops using high sulfur content coal.

"Part of our job as elected officials is to ensure the safety of our community. There seems to be a clear path to addressing this problem and ensuring healthy air for our residents, and the first step on that path is for plant's air permit to contain appropriate SO2 limits."

Ms. Emma Greenbaum, representing the Asheville Beyond Coal Campaign, thanked City Council for their support.

Councilman Bothwell moved to authorize the Mayor to sign a letter to the WNC Regional Air Quality Board to strengthen the permit limit for sulfur dioxide (S02) to protect our community from the impacts of harmful air pollution. This motion was seconded by Councilwoman Wisler and carried unanimously.

B. RESOLUTION NO. 15-81- RESOLUTION AMENDING RESOLUTION NO. 06-55 RELATING TO CLAIMS AND JUDGMENTS SOUGHT OR ENTERED AGAINST CITY OFFICERS AND EMPLOYEES

City Attorney Currin said that this is the consideration of an amendment to Resolution No. 06-55, regarding the City's policy relating to claims and judgments sought or entered against City officers and employees.

N.C. Gen. Stat. § 160A-167 authorizes the City, in its discretion, to provide for the defense of any civil or criminal action or proceeding brought against any employee or officer of the City, for an act alleged which is done in the scope and course of his or her employment. The statute also gives the City the discretion to appropriate funds for the purpose of paying all or part of any civil judgment entered against any of its employees or officers. In order for the City to defend or pay all or part of a claim or civil judgment, the statute requires the City to adopt uniform standards to determine which claims or civil judgments entered against employees the City will pay.

The City currently has a policy for defending against and paying, civil claims and judgments sought or entered against City officers and employees. In the past, the City has periodically revised this policy, to reflect City policy and to ensure that it is current and in accordance with applicable law. The last time the policy was revised was on March 14, 2006. The City Attorney's Office recently reviewed the City's defense of employees policy, and based on that review and consultation with outside council, recommends that the current policy be amended. These amendments are intended to allow the City to exercise its full authority under the statute and to aid in the administration of the policy.

Pros:

- Ensures compliance with N.C. Gen. Stat. § 160A-167.
- Defines the City's rights under N.C. Gen. Stat. § 160A-167.
- Updates the existing policy and aids in its effective administration.

Con:

- None noted.

There is no known fiscal impact associated with this amendment.

Adoption of the proposed resolution amending the City's policy relating to claims and judgments sought or entered against City officers and employees.

When Mayor Manheimer asked for public comments, none were received.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 15-81. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 114

C. RESOLUTION NO. 15-82 - RESOLUTION APPOINTING MEMBERS TO THE HUB COMMUNITY ECONOMIC DEVELOPMENT ALLIANCE

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that Ms. Sarah Nunez has resigned from the HUB Community Economic Development Alliance, thus leaving an unexpired term until August 22, 2015. In addition, Mr. Richard Stiles has also resigned from the Alliance, thus leaving an additional unexpired term until August 22, 2015.

The following individuals have applied for a vacancy on the Board: Kendra Penland, Ted Figura, Hunter Goosmann, Ed Manning, Grant Millin and Adrian Vassallo.

At the April 14, 2015, meeting, it was the consensus of Council to interview Kendra Penland, Ted Figura, Hunter Goosmann, Ed Manning and Adrian Vassallo. Mr. Goosmann and Mr. Manning were unavailable for an interview.

After Council spoke highly of all candidates, Kendra Penland received 5 votes; Ted Figura received one vote; Hunter Goosmann received 3 votes; Ed Manning received no votes; and Adrian Vassallo received 5 votes. Therefore, (1) Kendra Penland was appointed to serve the unexpired term of Ms. Nunez, term to expire August 22, 2015, and then a full three-year term, term to expire August 22, 2018, or until her successor has been appointed; and (2) Adrian Vassallo was appointed to serve the unexpired term of Mr. Stiles, term to expire August 22, 2015, and then a full three-year term, term to expire August 22, 2018, or until his successor has been appointed.

RESOLUTION BOOK NO. 37 – PAGE 116

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Proposed Duke Energy Substation to be Sited Next to Isaac Dickson Elementary School on Hill Street

Mayor Manheimer said that this is a project undertaken by Duke Power and City Council is familiar with Duke's need to site three substations in the downtown area in the next two years. City Council is aware that they have acquired from private land owners (not the City) the properties to do that. The City has a limited role in this process. The City has some ability to require screening and buffering of a substation site. We have consulted with our attorney who has looked into this and City Council does not have the ability to zone them out. The part that the City or the County could potentially play in this situation is if the City or County had land available that was suitable for an alternative site. The City has exhaustively looked to see if we do and we do not. She appreciated there is a great concern about this very serious issue and the City has tried hard to see what opportunities we have to play a part in this situation. Last week she met with the co-director of Isaac Dickson's PTO; the City Schools Superintendent; the Chair of the Asheville City Board of Education and other School Board members; several Duke representatives; the City Manager and Assistant City Manager; the City's Real Estate Manager; and some City Council members so we could understand the complexity of the issue and see what opportunities there were to address the problem. It is a very challenging issue and she felt confident that they have looked very hard at what opportunities the City has to try to see if there was any land available for an alternative site. She said that the County is also concerned about this matter as well.

Ms. Angi Everett, co-president of Isaac Dickson PTO, asked Council to oppose the Duke Energy substation to be built next to the new Isaac Dickson Elementary School. Some have questions about possible health effects of the substation and the electromagnetic fields it will produce. She hoped that Duke Energy will find an alternative location. She presented City Council with approximately 200 letters which read "As an Isaac Dickson Elementary School parent, I am very concerned about the location of a Duke Energy Power Substation next to our new school. There are potential, serious health and safety risks for our children if the substation is built close to the school. Potential risks may include electrocution (a child was electrocuted when he entered a power substation near a park in Florida just last fall) and possible increased cancer risks for our children due to electromagnetic fields (EMF). Given these potential risks, it is not prudent to move forward with the current plan to build the substation next to Dickson. Why would we risk the health and safety of our children, given that the body research about the effects of EMF on children is inconclusive? I am writing to ask that you work with the Dickson PTO and the Asheville City School Board to help Duke Energy find an alternative site for the substation and avoid potential risk to our children's health and safety. Our community is investing a great deal in building a healthy new school for our children and the location of a power substation right next to it seriously diminishes this community investment. Thank you for your consideration. I hope that

you will join us and provide leadership to move the location of the substation away from our children's school. This is the right thing to do for our children."

The following individuals reiterated Ms. Everett's concerns and asked for the City's leadership in basically protecting the health of our children by finding an alternative location for the Duke Energy Substation, or those parents that can will pull their children out of the school, thus leaving the minority and low income children to live with the possible health effects:

Katie Russell
Calvin Tomkins
Sarah Patten
Rustan Adcock
Christine Aiken
Valeria Wyder
Holly Kirschbaum
A young girl
Lisa Harkema
Carol Paulsgrove
James Shaw
Charlotte Wilkerson
Jada Bloomfield
River Harland
Will Harland
Papias Sabo

Vice-Mayor Hunt asked that City Attorney Currin share her findings with a representative of the opposition regarding the City not having zoning power authority to pre-empt the substation going in on that site.

Councilwoman Wisler suggested the parents reach out to the N.C. Utilities Commission.

Councilman Bothwell felt the parents biggest weapon against Duke is publicity and urged them to continue to fight for an alternative location.

Closed Session

At 8:18 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(3). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); and (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(5). This motion was seconded by Councilman Pelly and carried unanimously.

At 9:07 p.m., Councilman Pelly moved to come out of closed session. This motion was seconded by Councilwoman Wisler and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 9:07 p.m.

Magdalen Burleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – May 12, 2015 - 3:00 p.m.

Budget Worksession

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

Classification and Compensation Study

The City contracted with Segal Waters Consulting Company to complete a Classification and Compensation Study for fiscal year 2015-16 budget planning. Ms. Linda Wishard, a consultant with Segal Waters, presented (1) Segal Waters Consulting overview; (2) compensation philosophy; (3) project overview; and (4) recommendations and cost impact. After the study, she observed that our salaries are competitive. Recommendations and cost impact include (1) new pay ranges for exempt and non-exempt positions; (2) new Police and Fire pay structures were developed changing the step progressions to 2.5%; (3) remove first quartile of current Executive pay structure to reflect competitive minimums; (4) base pay adjustments to range minimum for all employees whose current base salary is below range minimum; and (5) pay adjustments based on time in position to address salary salary compression. The total cost impact would be $1,130,792.63. Additional recommendations include (1) annual funding for pay for performance for general employees and for public safety step increases; (2) review structure annually or biannually to maintain market competitiveness; and (3) continue using the systematic process for job evaluation.

HR Director Kelley Dickens then provided Council with the following staff recommendations and impact (1) across the board increase - 1% for all employees; (2) full implementation of Segal Waters at July 1, 2015 (a) new classification and pay structures; (b) compression/time in position adjustments; and (c) increases capped at mid-point of new structures; and (3) guidelines for administration and maintenance. Total General Fund budgetary impact for Fiscal Year 2015-16 - $1.6 million.

Ms. Wishard and Ms. Dickens responded to various questions from Council regarding the study and their recommendations.

Other Human Resources Topics

Ms. Dickens provided Council with a presentation in response to the temporary and seasonal living wage discussion (with staff continuing to do due diligence with future discussions with City Council), and provided an update on the City's health insurance program.

Councilman Smith asked for staff to generate an update of the cost benefit analysis of the Asheville Project, e.g., what does it contribute to our favorable health insurance cost estimate.

Capital Improvement Program

Director of Finance Barbara Whitehorn said that the Capital Improvement Program (CIP) is a rolling five-year program for general capital expenditure in the City of Asheville. The program began with the two-cent tax increase in Fiscal Year 2013-14, which added $2.2 million to the capital program. In order to use these funds most effectively, the City has entered into a long-term debt program leveraging the additional money to fund more than $150 million in projects through 2020. She then presented an overview of the CIP along with the status of the projects.

Because the CIP is at capacity, if Council would like to add a project, either a project will need to be dropped or pushed out to a further date.

After a brief discussion where Ms. Whitehorn and City Manager Jackson responded to various questions, it was the consensus of Council to provide information on (1) the cost projections for the Thomas Wolfe Auditorium and what bearing that will have on the CIP; (2) keeping the Charlotte Street improvements project moving; and accelerating investments in forming an affordable housing land bank.

The worksession was adjourned at 4:19 p.m.

Tuesday – May 12, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. RECOGNITION OF CITY OF ASHEVILLE YOUTH LEADERSHIP ACADEMY STUDENTS

Mayor Manheimer eight years ago, former Mayor Terry Bellamy and the Asheville City Council envisioned a new program that would place students with meaningful summer internships with City departments and partnering organizations throughout Asheville. This program would empower its students to get involved in their communities, support them in their quest for college, and reward them with a generous scholarship. After a rigorous application process, the CAYLA students are placed in prestigious summer internships that allow them to explore careers and learn from caring adult professionals. Members of the CAYLA Class of 2015 interned with valuable community partners, including Buncombe County, the Asheville Area Chamber of Commerce, MAHEC, Habitat for Humanity, and Big Brothers Big Sisters. Each Friday during the summer, the students attended day-long leadership workshops that focused on the "Habitudes" – the habits and attitudes that lead to success. Of the graduating seniors, all have been accepted to four-year colleges – and many have earned significant merit scholarships, including the Gates Millennium Scholarship, the Dell Scholarship, the Horatio Alger Scholarship, the Bonner Scholarship, and the local Civitan and Rotary scholarships. This year, the total merit scholarship money earned by CAYLA students since 2008 surpassed $1 million. Beginning last June, the CAYLA students have completed 28 different community service projects, with organizations including MANNA Foodbank, the Salvation Army, Brother Wolf, Asheville City Schools, and Habitat for Humanity. Over the years, CAYLA students have given more than 3,200 volunteer hours to our community. In recognition of their accomplishments and the critical role they will play in Asheville's future, the City of Asheville awards each CAYLA student a scholarship in the amount of $2,000.

With that, she provided a certificate to the following 2015 CAYLA students: Candida Alas-Ortega, Kanaje Allen, Brittany Boseman, Korina Dariy, Michael Davis, Joshua Garcia-

Billings, Itzel Garcia-Ruiz, Jahni Gilliland, Raekwon Griffin, Taekwon Griffin, Ella Heldreth-Schmitt, Phoenix Keyser, Antares Lance, Mariah Lee, Josue Lomeli-Garcia, Shaunessy Lofton, Diana Marquez, Oscar Marquez, Cindy Marquez, Randesha Neely, Mikayla Ray, Jamie Rhodes, Symone' Simmons, Satorrius Uddyback and Promyss Watley.

Mayor Manheimer praised Erika Germer for her hard work on this program.

B. PROCLAMATION PROCLAIMING MAY 17-23, 2015, AS "NATIONAL PUBLIC WORKS WEEK"

Councilman Pelly read the proclamation proclaiming May 17-23, 2015, as "National Public Works Week" in the City of Asheville. He presented the proclamation to Greg Shuler, representing Public Works; Mark Allen, representing Utility Street Cuts; Tim Bayless, representing Stormwater; Antonio Green, representing Sanitation; Vicky Haskell, representing Graffiti; and Walter Ear, representing Capital Projects Management.

C. PROCLAMATION PROCLAIMING MAY, 2015, AS "MOTORCYCLE AWARENESS MONTH"

Councilman Bothwell read the proclamation proclaiming May, 2015, as "Motorcycle Awareness Month" in the City of Asheville. He presented the proclamation to Mr. Steve Ensley who briefed City Council on some activities taking place during the month.

D. PROCLAMATION PROCLAIMING MAY 15-22, 2015, AS "STRIVE NOT TO DRIVE WEEK"

Councilwoman Wisler read the proclamation proclaiming May 15-22, 2015, as "Strive Not To Drive Week" in the City of Asheville. She presented the proclamation to Ms. Julie Mayfield, who briefed City Council on some activities taking place during the week.

E. PROCLAMATION PROCLAIMING MAY 30, 2015, AS "RELAY FOR LIFE DAY"

Vice-Mayor Hunt read the proclamation proclaiming May 30, 2015, as "Relay for Life Day" in the City of Asheville. He presented the proclamation to Ms. Laura Clark, Event Leader accepting on behalf of Relay For Life Leadership Team; and Ms. Sandra Dennison, Community Manager for American Cancer Society, who briefed City Council on some activities taking place during the day.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 28, 2015

B. RESOLUTION NO. 15-83 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A CONTRACT WITH CHERRY BEKAERT & HOLLAND FOR AUDITING SERVICES FOR FISCAL YEAR 2014-2015

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Cherry Bekaert & Holland (hereinafter referred to as Cherry Bekaert) for auditing services for Fiscal Year 2014 - 2015.

North Carolina General Statute 159-34 requires that local governments audit its accounts each fiscal year and submit a copy of the audit to the Local Government Commission. In response to the aforementioned general statute, staff recommends retaining the services of

Cherry Bekaert to conduct the audit of the city's accounts for the fiscal year ending June 30, 2015. The estimated fee for fiscal year 2014-2015 audit and financial statement preparation is $85,500.

As part of the engagement, Cherry Bekaert will provide a document required by the Auditing Standards Board that provides a framework for the auditor's communication with the Mayor and City Council and identifies some specific matters to be communicated. Pursuant to the Auditing Standards Board requirement, Cherry Bekaert will communicate timely and directly with the Mayor and City Council on matters related to the financial statement audit that are, in the auditor's professional judgment, significant and relevant to the responsibilities of those charged with governance in overseeing the financial reporting process. Additionally, Cherry Bekaert will provide an audit schedule with milestones and timetables in an effort to improve audit planning and ensure that the audit report is delivered timely to the Local Government Commission.

Execution of this contract complies with City Council's Strategic Operating Plan of operating the City of Asheville's organization to the highest fiscal responsibility, as well as the Audit Policy portion of City Council's Financial Policies which states that the City "shall enter into multiyear agreements of not more than five years in duration through a series of single-year contracts as consistent with applicable legal requirements." This will be the third consecutive year of contracting Cherry Bekaert to perform the City's audit. No competitive bid process was conducted this year.

Pro:

- Contracting with Cherry Bekaert aligns with City Council's financial policy, and will help ensure the timely and successful completion of the annual audit.

Con:

- None noted.

A fee of $85,500 has been proposed for the audit and is included in the Finance Department's portion of the annual operating budget.

Staff recommends adoption of the resolution authorizing the Mayor to execute a contract with Cherry Bekaert & Holland in the amount of $85,500 for auditing services for Fiscal Year 2014-2015.

RESOLUTION BOOK NO. 37 - PAGE 117

C. MOTION TO APPROVE THE FINDINGS OF FACT AND CONCLUSIONS OF LAW FOR THE CONDITIONAL USE PERMIT FOR FLORENCE STREET APARTMENTS LOCATED AT 128 AND 99999 FLORENCE STREET

D. ORDINANCE NO. 4409 - BUDGET AMENDMENT FOR THE SOUTH LEXINGTON UTILITY RELOCATION PROJECT

Summary: The consideration of a budget amendment, in the amount of $30,000, from debt proceeds to provide adequate funding for the projected expenses for the South Lexington Utility Relocation Project.

This project is part of a public private partnership which will bring much needed workforce housing to the Central Business District. The utility relocation involves the undergrounding of overhead utilities along S. Lexington Ave. from the intersection of Aston St. and S. Lexington to a point approximately 300 feet south of said intersection. Utility providers along this corridor include Duke Energy, AT&T, Charter, and ERC Broadband. Contractual agreements for this project with said utility providers are as follow:

Duke Energy	$232,936.00
Charter Communication	$ 30,000.00
AT&T	$ 4,476.00

Pros:

- Community Investment
- Increase property tax revenues

Con:

- Project management and contract administration will consume staff time.

The project budget will be $280,000. The budget amount consists of $250,000.00 that was originally budgeted in the City's Capital Improvement Program plus the additional $30,000.00 that will be funded with debt proceeds.

City staff recommends the City Council adopt the associated budget amendment in the amount of $30,000.

ORDINANCE BOOK NO. 29 - PAGE 459

E. RESOLUTION NO. 15-84 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH MOTOROLA SOLUTIONS FOR A REPLACEMENT OF THE PUBLIC SAFETY RADIO SYSTEM AND SUPPORTING SYSTEMS

Summary: The consideration of the City Manager awarding and entering into a contract with Motorola Solutions for a replacement of the City of Asheville's radio system and supporting systems.

The City's public safety radio system and many of its supporting components have reached the end of supported life. End of life means that parts are no longer available, that commercial support is "best effort," with no service guarantee, and that protracted service interruptions are possible. To proactively plan for the replacement of the system and the supporting components, staff previously researched replacement costs and included a $6MM replacement budget in the City's Capital Improvement Program.

A structured Request For Proposal (RFP) process for a replacement system, which included an assessment of Asheville Fire and Police departments' current operational requirements, was undertaken last year. A project team, which included representatives from the City's Police, Fire, Finance, Information Technologies Department, evaluated four proposals received from interested vendors in response to the RFP. The team also communicated and interfaced with Buncombe County during the process, since interoperability was a primary goal of the project.

Based on coverage and operational requirements, expert guidance from Trott Communications Group, and scoring from the City's project team, the team recommends moving forward with the most responsive proposal as detailed below.

The proposal that was deemed by the City project team to be the most responsive was received from Motorola Solutions (Motorola). The proposal, which scored 89/100 on the RFP scoring matrix, includes specifics as to interoperability, coverage, and quality of service. A "best and final offer" has been obtained from Motorola. Although other support items (such as connectivity components) will be purchased through other mechanisms (such as state contract), this competitive RFP represents the bulk of the radio system replacement. The contract offers

various system options to be selected during deployment; the maximum total of the contract will be $4,397,762.

Pros:

- Enables the City to move forward with replacement of a critical communication system that has reached the end of its supported lifecycle
- Addresses needs identified by Asheville Fire and Asheville Police departments
- Maximizes system coverage
- This standards-based system (P25) allows for better interoperability with both state and local agencies

Con:

- None noted

This procurement is funded via the City of Asheville's Capital Improvement Budget

City staff recommends entering into a contract with Motorola Solutions for a replacement of the City of Asheville's radio system and supporting systems.

RESOLUTION BOOK NO. 37 - PAGE 118

F. RESOLUTION NO. 15-85 - RESOLUTION AUTHORIZING ACCEPTANCE OF THE ASHEVILLE-BUNCOMBE CONTINUUM OF CARE HOMELESS MANAGEMENT SYSTEM GRANT

Summary: This is the consideration of a resolution authorizing acceptance of the Asheville-Buncombe Continuum of Care Homeless Management Information System Grant.

Participation in the Homeless Management Information System (HMIS) is required for each HUD-designated Continuum of Care (CoC). The Asheville-Buncombe CoC has participated in the North Carolina HMIS implementation since 2005. Participation and user fees for this system have historically been paid directly to the Lead HMIS Agency. The statewide system is being transitioned to a new HMIS Lead Agency May 1, 2015, and a new model of participation and implementation will be used. In the new model, each CoC can be the grant recipient for CoC HMIS grants, allowing more funds to stay at the local level for system support for the CoC Lead (the City of Asheville) and the provider agencies using the system.

We have been informed by the regional HUD office in Greensboro that the City of Asheville can be the grant recipient for the NC-501 HMIS Grant. This will be effective for the current HMIS grant that expires December 31, 2015, as well as the renewal grant already in process to begin January 1, 2016.

Grant award amount on an annual basis: $67,500. The current grant, January 1, 2015 – December 31, 2015, will be prorated based on final expenses from the current HMIS Lead Agency whose contract will terminate April 30, 2015.

These awards are conditional on providing to HUD additional information needed and/or assurances that must be provided. These conditions will include, but are not limited, to adequate documentation of required matching funds. These matching funds can be provided by partner agencies.

The HMIS is utilized to capture real-time data on homelessness services and housing for homeless programs, directly supporting individuals and families experiencing homelessness to access an appropriate affordable housing.

Pros:

- Approval of the HMIS Grant acceptance supports on-going efforts to reduce and end homelessness through strong data collection and analysis, supporting City staff and partner agencies of the Homeless Initiative.
- Reflects the recommendations of the City's Homeless Initiative Advisory Committee to transition to a new Lead Agency to administer the statewide Homeless Management Information System.

Con:

- Federal funding for homelessness programs, including Continuum of Care funds, is at the discretion of Congress on an annual basis.

The HMIS Grant is fully funded from federal Continuum of Care funds. Staff costs to administer the program are also fully paid from federal sources. Partner agencies' matching funds are sufficient to cover the federal match requirement with no fiscal impact on the City of Asheville.

Staff recommends approval of the resolution authorizing acceptance of the NC-501 HMIS Grant for the current grant that expires December 31, 2015, and the renewal grant to begin January 1, 2016.

RESOLUTION BOOK NO. 37 - PAGE 119

G. RESOLUTION NO. 15-86 - RESOLUTION SETTING A PUBLIC HEARING ON MAY 26, 2015, TO CONSIDER A LAND USE INCENTIVE GRANT AGREEMENT FOR 300 MILL RIVER DRIVE (MILL RIVER LOFTS LLC)

Summary: The consideration of a resolution setting a public hearing on May 26, 2015, for a land use incentive grant agreement for 300 Mill River Drive (Mill River Lofts LLC).

The developer of River Mill Lofts has applied for a Land Use Incentive Grant per the policy adopted by Council, and amended on August 26, 2014.

River Mill Lofts LLC, led by Pace Burt, seeks to develop the 9.52 acre site at 300 Mill River Drive The site is located at the intersection of Thompson Street and Stoner Street, east of Biltmore Village. The developer estimates a total development cost of $25 million. The project consists of:

- 254 residential rental apartments (248 two-bedroom apartments and 6 three-bedroom apartments), in two buildings;
- 8,000 square feet of commercial space, with 4,000 square feet located in each building.

The project, as presented to staff, appears to meet the following Eligibility Requirements,

- Equity: A 20% equity contribution is required. The project developer indicates he will contribute at least 20% equity to the project.
- Energy Star Certification: The developer indicates the project will achieve Energy Star certification.
- Residential development: The development consists of at least two residential units.
- Location: The project is located within the City of Asheville city limits.

The project is not located within 1/4 of a mile of a designated major transportation corridor (Biltmore Avenue/Hendersonville Road). The project is located .4 mile from Biltmore Avenue. The developer requests a waiver of this policy eligibility requirement.

Public Benefit: The project proposes the following Public Benefit Elements:

- Green Building/Energy: Energy Star certified, 5 points.
- Affordable Housing: 18 units, which is 7% of the total units. The developer requests 10 points.
- Workforce Housing units: 216 units, which is 85% of total units. The developer requests 15 points.
- Mixed Use Development/Sustainability/Brownfield: The developer requests 20 points. The developer does not qualify for these points based upon existing policy. The develop asks for consideration of the following:
    1. The project is a mixed-use development that will be a pioneer for "early adapter mixed-use project."
    2. The project meets City-goals of sustainability- it requires no new utility infrastructure; it is served adequately by the existing traffic systems; it will use "best management practices (BMPs) in treatment of storm water runoff; it will enhance public access to the Swannanoa River.

The developer has scored the project with 50 points, and requests a 5 year Land Use Incentive Grant.

According to LUIP Policy, the project qualifies for 25 points:

- Green Building/Energy: Energy Star certified, 5 points
- Affordable Housing: 18 units, which is 7% of the total units. 5 points.
- Workforce Housing units: 216 units, which is 85% of total units. 15 points.

This assumes that the project is deemed eligible by Council. As mentioned above, the project is .4 miles from a major commercial corridor named in the policy (Biltmore Avenue/Hendersonville Road). Rationale for waiver of the policy includes:

- The development and others proposed for that area have the potential to create significant new transit demand. Over 500 units are now being planned for this area. Three transit routes are with .4 mile of the site.
- A multi-modal route, via the Wilma Dykeman Riverway, is master-planned contiguous to the site.
- Therefore, the location of the project meets the goals of the program, and a waiver of the eligibility requirement is justifiable.

The project meets the following 2014-15 Strategic Plan Goals: (1) *Economic Growth and Financial Sustainability:* The project Invests and leverages investment in community infrastructure; and creates economic development and community investment opportunities through partnerships, planning and incentives. (2*) Affordability and Economic Mobility:* The project expands Asheville's supply of quality, affordable homes for current and future residents.

This proposal is aligned with the *Asheville City Development Plan 2025* in several areas. Smart Growth policies encourage mixed-use developments and higher-density residential infill with an emphasis on locating projects in an area walkable to amenities and proximate to bike paths. Infill development along transit corridors is also highlighted but this site is a little over 2,000 feet to three routes that cross in Biltmore Village. The plan also supports projects that design landscapes to absorb stormwater using bio-swales and natural stormwater filters.

Affordable housing options are highlighted throughout the Plan as a strong community need.

The area is included in the planning for the Wilma Dykeman Riverway Master Plan and infill development, recreation amenities and roadway improvements are a part of that proposal. Planning for roadways has occurred in the River Arts District area but has not proceeded to this

section of the river at this time. The proposed development though seems to fit in with the intent of the Dykeman plan with the inclusion of the river yard and the wide sidewalk along Thompson Street.

Pros:

- The proposed development will provide 18 units of housing affordable for ten years, and 216 units of workforce housing.
- The proposed development is located close to jobs and services.
- The proposed development is located within the Wilma Dykeman Riverway corridor, and proposes public benefit through alignment with planned multi-modal transportation ways.

Cons:

- The development does not meet with minimum policy requirement to be located with .25 miles of a named transportation corridor.
- The development is not currently connected by sidewalk or pathway to Biltmore Avenue.
- The proposal creates 18 units of affordable housing, 7 units short of the 25 units that would yield a 10% affordable composition.

Estimated maximum value of Land Use Incentive: The current assessed value of the property is $705,000 (land only). The developer's estimate of completed project taxable value is $25,000,000. The current annual city tax, based on current assessed value, is $3,243. The annual estimated city tax post completion, based on the developer's estimate of value is $115,000. Thus, the estimated annual Land Use Incentive Grant would be $111,757, the exact amount to be determined by the length, in years, of the grant award, and the actual assessed value of the development upon completion. If approved for 5 years, the estimated Grant would be $558,785. If approved for three years, the amount would be $335,271.

300 Mill River Drive	
Current Value	$ 705,000
Current Tax	$ 3,243
Est Value	$ 25,000,000
Minus current value	$ 24,295,000
Est Tax	$ 111,757
Value of LUIG for 5 years	$ 558,785
Value of LUIG for 3 years	$ 335,271

The estimated amount of fees payable for Zoning Permit, Building Permit, Driveway Permit, Grading Permit, Plan Review Fees and Water Service Connection Fee is $50,000. The value of each 10% of the fee rebate would be $5,000. The exact amount would be determined by the percentage of fee rebate awarded as part of the Land Use Incentive Grant. If approved at the 50 point level, the fee rebate would be $25,000; at a three year level, $15,000.

The Housing and Community Development Committee reviewed the proposal and discussed it with Pace Burt at their January 20, 2015 meeting. Both the Committee and developer agreed at that meeting to take no action. The developer has since requested that the proposal as described above be moved forward to Council.

Staff recommends that Council set the public hearing on May 26, 2015, for the consideration of the Land Use Incentive Grant for 300 Mill River Drive (Mill River Lofts LLC).

RESOLUTION BOOK NO. 37 - PAGE 120

H. RESOLUTION NO. 15-87 - RESOLUTION SETTING A PUBLIC HEARING ON MAY 26, 2014, FOR A LAND USE INCENTIVE GRANT AGREEMENT FOR 146 ROBERTS STREET (RAD LOFTS)

Summary: The consideration of a resolution setting a public hearing on May 26, 2015, for a land use incentive grant agreement for 146 Roberts Street (RAD Lofts).

The owners/developers of RAD Lofts seek to amend their Land Use Incentive Grant per the policy adopted by Council, and amended on August 26, 2014.

On August 26, 2014, City Council approved a Land use Incentive Grant (LUIG) for the RAD Lofts development. In summary, the RAD Lofts LLC proposed a 209 unit residential, 38,500 square foot commercial development on the 2.88 acre site formerly home to the Dave Steel Company, located at the intersection of Roberts Street and Clingman Extension in the River Arts District of Asheville. The developer estimated a total development cost of $52 million. The project consisted of 209 residential rental apartments, a two story parking deck with 356 parking spaces, and street front retail spaces, live work spaces and second floor office space.

Council approved a five-year (50 points) LUIG, based on the following:

Eligibility Requirements:

- Equity: A 20% equity contribution is required. The project developers indicate they will meet this requirement;
- Energy Star Certification: The developers indicate the project will achieve Energy Star certification.
- Location: The project is located within 1/8 of a mile of a designated major transportation corridor (Riverside Drive).

Public Benefit: Council awarded 50 Public Benefit Elements points, as follows:

- Affordable Housing units: 10 points for providing 5% (11 units) affordable residential units;
- Workforce Housing units: 20 points for providing 95% (231 units), workforce residential units.
- Green Building/Energy: *Energy Star certified*, 5 points.
- 20% non-residential, 5 points.
- Within the Sustainability Bonus area, 5 points.
- Brownfield Redevelopment, 5 point)

The developer has slightly altered the composition of the project, and needs an amended Land Use Incentive Grant approval from City Council. The proposed development now consists of 243 residential units, an increase of 34 units. The developer will continue to provide 5% affordable units, which increases the number of affordable units by one unit, to 12 units. The percentage of workforce units does not change, while the number of workforce units increases to 231.

Concurrently, the developer proposes to reduce the commercial square footage by approximately 20,000 square feet, reducing the total square footage to approximately 34,000 square feet. This reduces the total commercial space to 16% of the total development.

The developer requests that the Land Use Incentive Grant, as awarded by City Council, remain unchanged.

The project meets the following 2014-15 Strategic Plan Goals: (1) *Economic Growth and Sustainability:* The project contributes significantly to the objective of supporting a mixed use neighborhoods in the River Arts District. (2*) Affordability and Economic Mobility*: the project creates locationally efficient affordable and workforce housing;

The project meets applicable Master Plans in the following ways: (1) The project supports the goals of the *2009 City Transit Master Plan* by its location "along major transit corridors..." ; and (2) The project supports the goals of the *2009 Sustainability Management Plan*, which calls for the City to encourage Transit Oriented Development.

Estimated maximum value of Land Use Incentive: The current assessed value of the property is $501,800 (land only). The developer's estimate of completed project taxable value is $40,000,000, and has estimated the value on which the LUIG is made at 80% of that ($32,000,000). The current annual city tax, based on current assessed value, is $2,308. The annual estimated city tax post completion, based on the developer's estimate of value is $184,000. Thus, the estimated annual Land Use Incentive Grant would be $144,891.72, the exact amount to be determined by the length, in years, of the grant award, and the actual assessed value of the development upon completion. If approved for 5 years, the estimated Grant would be $724,458.60.

The estimated amount of fees payable for Zoning Permit, Building Permit, Driveway Permit, Grading Permit, Plan Review Fees and Water Service Connection Fee is $81,806.40. The value of each 10% of the fee rebate would be $8,181. The exact amount would be determined by the percentage of fee rebate awarded as part of the Land Use Incentive Grant. If approved at the 50 point level, the fee rebate would be $40,903.20.

The project is also eligible for a State Brownfield Grant, which would provide a five year sliding grant equal to approximately $823,000. This grant is also calculated from the taxes owed by the project, and is applicable to both state and county taxes. The developer requests that the City's LUIG be applied to the amount not covered by the Brownfield Grant over the five year period, as opposed to equal payments over the requested five-year period. This would result in a grant disbursement that would increase annually over the five year term; and may lead to an extension of the grant period until the total maximum grant amount is paid.

Staff recommends that Council set a public hearing date on May 26, 2015, for a land use incentive grant agreement for 146 Roberts Street (RAD Lofts).

RESOLUTION BOOK NO. 37 - PAGE 121

I. **RESOLUTION NO. 15-88 - RESOLUTION AUTHORIZING THE CITY MANAGER ENTER INTO A CONTRACT WITH PATTON CONSTRUCTION GROUP INC. FOR THE WESTOVER DRIVE STORM DRAINAGE IMPROVEMENTS CONSTRUCTION PROJECT**

ORDINANCE NO. 4410 - BUDGET AMENDMENT FOR THE WESTOVER DRIVE STORM DRAINAGE IMPROVEMENTS CONSTRUCTION PROJECT

Summary: The consideration of a resolution authorizing the City Manager to enter a contract with Patton Construction Group, Inc. for the construction services necessary to complete the Westover Drive Storm Drainage Improvements; and the consideration of a budget amendment in the amount of $250,289 from the Stormwater Operating Fund to fund the contract and a 15% contingency.

Currently there is not an existing storm drainage system along Westover Drive. Citizens in this area have been experiencing issues during heavy rainfall events with water over-toping an existing asphalt curb.

Within the scope of the project, Patton Construction Group will install approximately 1100 linear feet of new storm drainage infrastructure and install approximately 670 feet of curb. The area will be resurfaced following the installation of the new infrastructure.

The project was posted for bid on April 2, 2015. A mandatory pre-bid meeting was held with a moderate turnout on April 8, 2015. The bids were scheduled to be opened on April 16, 2015. Two bidders were all that showed up to the bid opening and the bids were not opened and returned to the contractors. Follcwing the re-bid process, the bids were opened on April 29, 2015, and the following were the results:

Patton Construction Group, Inc.	565 Long Shoals Road, Suite 101, Arden, NC	$385,675
NHM Constructors, LLC	PO Box 6385, Asheville NC	$512,496.50

The City received bids from qualified contractors to perform the construction activity outlined in the approved documents for the Westover Drive Storm Drainage Improvement Project and the City of Asheville determined that Patton Construction Group, Inc and their bid of $385,675 as the low responsive and responsible bidder.

Pros:

- Installation of a new storm drainage system in this area will prevent future roadway maintenance issues.
- Provides safe access for the citizens that visit this area.
- Moves forward with the goals of the Stormwater Utility program to make capital investments through projects.

Con:

- Construction will be disruptive to the area for approximately 3 months.

The total amount of the contract is $385,675. Adding in a 15% contingency ($57,851) brings the total required budget to $443,526. A budget of $200,000 was approved for this project in FY 2013-14 in the Stormwater Capital Project Fund, and some initial engineering work was charged to the project in that year. There is currently a balance of $193,237 remaining in the project. In order to fund the construction contract and the 15% contingency, a budget amendment is required in the amount of $250,289. Funding for the budget amendment will come from the existing Stormwater Operating Fund budget (pay-go transfer). The FY 2014-15 Stormwater Operating Fund budget includes approximately $575,000 for planned contracted construction projects. The $250,289 in additional funding for Westover Drive part of that budget amount and is included in the year-end expenditure estimates for the Stormwater Fund.

City staff recommends City Council approve a resolution authorizing the City Manager to enter a contract with Patton Construction Group, Inc for the construction services necessary to complete the Westover Drive Storm Drainage Improvements for $385,675 and to enter into change orders to this contract not to exceed an additional 15% of the original contract or $57,851; and a budget amendment in the amount of $250,289 from the Stormwater Operating Fund to fund the contract and a 15% contingency.

RESOLUTION BOOK NO. 37 - PAGE 122
ORDINANCE BOOK NO. 29 - PAGE 461

J. RESOLUTION NO. 15-89 - RESOLUTION RE-AFFIRMING THE AUTHORIZATION OF THE EXECUTION OF A LICENSE AGREEMENT FOR AN ENCROACHMENT IN NORTH FORK WATERSHED

Summary: The consideration of a resolution re-affirming the authorization of the execution of a license agreement for an encroachment in North Fork Watershed.

In 2001 City Council adopted Resolution No. 01-10, authorizing the City Manager to execute a license agreement for encroachment on real property owned by the City. Leigh and Katherine Kimmel own real property adjacent to, but downstream from the North Fork reservoir spillway. A fence separates the two properties. The Kimmels property line stops far short of the fence, indicating either that (a) the fence is set back within the City's property line or (b) that there is a gap in the two properties. Without a survey of the City's property, there is no definitive answer.

Ms. Kimmel desires to list her property with a Real Estate Agency and has been informed that in order to do so, a copy of the executed license is needed. According to Ms. Kimmel, neither she nor her attorney has a copy of the executed license agreement. Based upon a thorough search of City files, an executed license agreement could not be located. It is believed that due to oversight, the license agreement was never executed.

The City's Water Resources Director, Real Estate Manager and City Attorney are in concurrence that a resolution re-affirming the authorization of the execution of a license agreement for an encroachment in the North Fork Watershed is appropriate.

City staff recommends City Council adopt a resolution re-affirming the authorization of the execution of a license agreement for an encroachment in North Fork Watershed.

RESOLUTION BOOK NO. 37 - PAGE 123

K. RESOLUTION NO. 15-90 - RESOLUTION AUTHORIZING THE CITY MANAGER TO IMPLEMENT A FARE-FREE DAY DURING THE STRIVE NOT TO DRIVE WEEK FOR FISCAL YEAR 2015 AND FISCAL YEAR 2016

Summary: The consideration of a resolution authorizing the City Manager to implement a fare-free day to promote transit during the Strive Not To Drive Week in Fiscal Year 2015 and Fiscal Year 2016.

Twenty-five years ago Bike to Work Day was launched in Asheville. Over the years this event evolved into Strive Not To Drive (SNTD) Week focusing more broadly on a variety of transportation alternatives to the single-occupant car, including carpooling, walking, and public transit.

SNTD Week is an annual event encouraging people to avoid driving their car for a day or part of a day in order to experience the benefits and opportunities of walking, bicycling, riding the bus, carpooling, telecommuting, etc. The SNTD week occurs usually during the month of May.

Every year the Transit Subcommittee of the SNTD Committee offers commuters a Riders Appreciation Day, which includes breakfast at the Transit Station and free fare for the day.

This action has been endorsed by the Transit Subcommittee and the Multimodal Transportation Commission.

Pros:

- The fare-free day would help promote the Strive Not To Drive activities.

- Fare-free day during the SNTD week would show appreciation for transit system's core riders.
- The free fare would potentially attract new riders.

Con:

- The system would lose about $2,200 in revenue per year.

The system would lose about $2,200/year in revenue from current riders.

Staff recommends a resolution authorizing the City Manager to implement a fare-free day for Fiscal Year 2015 and Fiscal Year 2016 as part of the Strive Not To Drive activities to promote transit use and reward core riders.

At Councilman Smith's suggestions, it was the consensus of Council that in Fiscal Year 2016 staff investigate a fare free month.

RESOLUTION BOOK NO. 37 - PAGE 124

L. RESOLUTION NO. 15-91 - RESOLUTION AUTHORIZING THE PURCHASING MANAGER TO DISPOSE OF SURPLUS CITY-OWNED PERSONAL PROPERTY (JOHN DEERE 450J BULLDOZER) VALUED AT $30,000 OR MORE

Summary: The consideration of a resolution authorizing the sale of one (1) John Deere 450J Bulldozer deemed surplus City personal property.

The City's Water Resources Department, Division of Maintenance, identified a John Deere 450J Bulldozer, as surplus personal property, with no anticipation of utilization by the City. Pursuant to N.C.G.S. §160A-266, the Sale and Disposal of Personal Property valued at $30,000 or more must be approved by City Council. The City's Purchasing Manager has authority to dispose of personal property valued at less than $30,000 by private negotiation and sale. The estimated blue book value of the John Deere 405J Bulldozer is listed at $35,000. Bids were solicited and received from several potential purchasers. The final bid amount at the close of the Auction on Sunday, April 19, 2015, was $55,400.00. City Council is being asked to approve the sale of the Bulldozer for $55,400.00.

Pros:

- Promotes City of Asheville fiscal responsibility of disposing of surplus property which generates revenue.
- Space utilization eliminates the need to store large, unused equipment.
- Competitive process yielded market price, statute contemplates.

Con:

- None

The bulldozer is fully depreciated and the Water Resources Fund will recognize the entire $55,400 as revenue from the sale of assets.

City staff recommends City Council adopt a resolution approving the sale of the John Deere 405J Bulldozer to the prospective purchaser for the amount of $55,400.

RESOLUTION BOOK NO. 37 - PAGE 125

M. ORDINANCE NO. 4411 - BUDGET AMENDMENT TO BUDGET PROCEEDS RECEIVED FROM THE SALE OF THE FERRY ROAD PROPERTY AND THE

SUBSEQUENT PAYMENT OF THE CITY'S PROCEEDS TO BUNCOMBE COUNTY

Summary: The consideration of a technical budget amendment in the General Fund in the amount of $3,407,477 to budget proceeds received from the sale of the Ferry Road property and the subsequent payment of the City's proceeds to Buncombe County.

At its April 14, 2015, meeting, City Council approved a resolution authorizing the Mayor to execute any and all documents necessary to amend the Interlocal Agreement with Henderson County and to effectuate the sale of property on Ferry Road to Buncombe County. As per the terms of the Interlocal Agreement, the City's share of the proceeds from the sale of the property, which totaled $3,407,477, were wired to Buncombe County on May 4, 2015.

Accounting and financial reporting best practices and fiscal transparency dictate that the incoming and outgoing funds be recorded on the books as revenue and expense. The budget amendment will provide the necessary budget authorization for the transaction.

Pros:

- Provides budget authorization for the transfer of land sale proceeds to Buncombe County.
- Conforms the City's financial records with generally accepted accounting and reporting standards.

Con:

- None.

This amendment will increase the FY 2014-15 revenue and expense budget in the General Fund by $3,407,477; however there is no net fiscal impact to the budget.

City staff recommends City Council adopt the technical budget amendment in the General Fund in the amount of $3,407,477 to budget proceeds received from the sale of the Ferry Road property and the subsequent payment of the City's proceeds to Buncombe County.

ORDINANCE BOOK NO. 29 - PAGE 463

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Wisler moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. LEGISLATIVE UPDATE

Mayor Manheimer highlighted Council on some the following current bills with potential impact on the City of Asheville budget: Sales Tax Redistribution; Stormwater Management to Private Property; Privilege License Tax; Historic Preservation Tax Credit; and Revisions to Outdoor Advertising Laws.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF GREYMONT VILLAGE APARTMENTS LOCATED ON SARDIS ROAD FROM INDUSTRIAL DISTRICT AND COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION OF A MULTI-FAMILY APARTMENT DEVELOPMENT, WITH CONDITIONS REGARDING ACCESS AND LOT FRONTAGE

ORDINANCE NO. 4412 - ORDINANCE TO CONDITIONALLY ZONE GREYMONT VILLAGE APARTMENTS LOCATED ON SARDIS ROAD FROM INDUSTRIAL DISTRICT AND COMMERCIAL INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION OF A MULTI-FAMILY APARTMENT DEVELOPMENT, WITH CONDITIONS REGARDING ACCESS AND LOT FRONTAGE

Urban Planner Jessica Bernstein said that the applicant is requesting conditional zoning for a portion of a single parcel from Industrial (IND) to Residential Multi-family High Density Conditional Zoning District (RM-16 CZ), in accordance with Section 7-7-8 of the UDO with conditions regarding access and lot frontage. The conditional zoning request is for the construction of a multi-family apartment complex. This is a revision to the earlier proposal, which was heard by City Council on September 9, 2014, but no action was taken at that time. This public hearing was advertised on February 13 and 20, 2015. She explained that this project came before City Council on September 9, 2014, at which time the public hearing was continued. On February 4, 2015, the project went before the Planning & Zoning Commission. The revised public hearing notice was advertised on February 27 and March 6, 2015. On March 10, 2015, the applicant requested the public hearing be continued until this date.

She said that the amended proposal for the Greymont Village Apartments is nearly identical to the original submittal reviewed by City Council on September 9, 2014. Details such as number of buildings, number of units, etc. have not changed.

The revision:

- Reduces the size of the proposed area for development from 11.8 acres down to 9.3 acres.
- The amount of open space and tree save area required subsequently decreases.
- The remaining 2.5 acres of the current parcel are proposed to be recombined with the adjacent land fronting on Sardis Road (Industries for the Blind - IFB) and remain zoned Commercial Industrial and Industrial.
- The area eliminated from the original conditional application is primarily the "flag pole" of the parcel, which provides the only lot frontage for the project area. The requested zoning district, RM-16, requires a minimum of 50 feet of frontage on a public street or private street built to City standards – neither of which are provided by Greymont Lane.
- The proposal's future recombination results in a "land-locked parcel" which would require a condition by City Council. Lot frontage along a public street is required in order to maintain safe access to residential properties.
- The flag pole portion of the lot is encumbered by a Progress Energy transmission line easement and that frontage along Sardis Road was never shown as an access point into the project in the previous submittal, so the proposed amendment is not different in terms of access nor does it reduce access to the site. The single point of egress and ingress remains from Greymont Lane.
- Should this project be approved, staff recommends that a dedicated right-of-way or easement be established along Greymont Lane to ensure access by the public and residents to the portion of the development within the City limits (similar to the provisions

for access to non-residential uses on lots without frontage found in Section 7-11-2(k) of the UDO). The Planning & Zoning Commission included this condition in their recommendation. Additional standards and details recommended by staff regarding this condition are included in the staff report and suggested conditions of approval.

- The amendment leaves more land for future expansion of the IFB site. Previously, significant area would have to be reserved for property line buffers along the pole and to the rear of the building. This amendment has the potential to benefit future industrial expansion.
- The applicant has added an addendum to their purchase agreement with IFB regarding potentially reserving and upfitting residential units for employees, providing those units at a reduced rate and possibly providing an walking trail between the two uses. While these commitments are positive and beneficial to the IFB employees, they are not directly aligned with the City's goals and objectives towards affordability and are not securable or able to be monitored by the City.

Because of the reasons stated further in the staff report, based on preserving Industrially-zoned land and locating residential uses in areas with residentially-supportive infrastructure, staff maintains a recommendation not to support this requested conditional zoning.

As described above, the current proposal is essentially the same as the previous plan with the exception that only a portion of the parent parcel is now considered in the rezoning application, which reduces the overall project size and results in a project site lacking frontage on a public road or a road built to City standards (see section on conditions in this staff report for more detail).

The overall project location straddles the City of Asheville / Buncombe County line and consists of a total of approximately 38.6 acres (*previously 41.1 acres*). The extent of the project proposed within the City limits is a portion of a single parcel (PIN 9617.90-3637), approximately 9.3 acres in size. The original submittal, heard by Council in 2014, included the entire parcel rather than just a portion of the parcel as in the current revision. The parent parcel is split-zoned with a small part Commercial Industrial and the bulk (including the entire project area) zoned Industrial. The parent parcel (11.8 acres) is a "flag lot" with approximately 123 feet of frontage along Sardis Road; the "pole" (zoned CI) contains a 70 foot wide Progress Energy transmission line easement and will not be included.

Adjacent zoning includes CI to the north, IND to the east and County zoning to the west (EMP) and south (R3). The (City) site is currently owned by Industries for the Blind, with their use adjacent, located on Sardis Road. Other nearby uses include multiple car dealerships and light industrial uses (metal roofing, plastic manufacturing), the forestry service offices/garage and a truck rental business.

The multi-family apartment complex development proposes a total of 356 units in 14 residential buildings and one community building with 676 parking spaces throughout the site. The City and County portions are divided by a stream running through the site (with existing wetlands and a required 30 foot buffer area).

Buncombe County approved the project as a Conditional Use Permit in 2008; however those approvals lapsed. The proposal was re-approved by Buncombe County in 2014.

Within the City of Asheville jurisdiction, the project includes four buildings containing 108 units: one building is 3-stories and three buildings are a ¾ split configuration and all have a maximum height of 30.5 feet (44'3" to the top of the roof peak). Plans propose a mix of 1-bedroom (24 units), 2-bedroom (60 units) and 3-bedroom (24 units) layouts.

Vehicles access the site from Greymont Lane, which is within the Buncombe County jurisdiction and is proposed to be improved to 20 feet of pavement. No secondary access point is

proposed. Greymont Lane does not have an associated right-of-way.

Greymont Lane circles through the site and into the COA portion of the project, terminating in a parking area with a total of approximately 192 parking spaces, including six accessible spaces. Also, 10 bike parking spaces are provided, distributed among the buildings.

There are no sidewalks shown along the access road (Greymont Lane). There are internal walkways within the site, linking the parking area and buildings.

Landscaping is required for this project and includes parking lot landscaping, building impact landscaping and tree save area. There is a significant area of the site that will not be disturbed due to a required stream buffer and existing vegetation within this area may be used to satisfy some landscaping requirements if needed.

Fifteen percent of the total lot area is required to be dedicated as open space, which would be approximately 60,517 square feet (*previously 76,909 square feet*) for this site.

There are two retaining walls on the City's portion of the site, showing a maximum height of 17 feet. Aesthetic treatment or landscaping is required for all walls over eight feet in height, according to Section 7-10-5 of the UDO.

Conditions:

- Lot Frontage and Access – Section 7-8-7 of the UDO requires that all lots in the RM-16 zoning district have a minimum of 50 feet of road frontage along a City street or a street built to City standards. In the previous proposal, the "flag pole" portion of the parent parcel provided the necessary lot frontage along Sardis Road (although no access was proposed from Sardis Road). The amendment seeks to eliminate that portion of the lot from the project and would thereby eliminate the lot frontage once a recombination is undertaken.

  Also, section 7-11-2(j)(1)a. contains the same statement requiring residential lots to have frontage on a public street or approved private street built to City standards for access. Staff has recommended that if approved, the project should include a dedicated 45 foot easement or right-of-way following Greymont Lane as shown on plans. The easement or right-of-way must consist of 20 feet of pavement, containing curb and gutter and conform to all other specifications as required by the City Transportation, Public Works and Fire Departments. The easement or right-of-way must specifically allow ingress and egress to and from the project site within the City's jurisdiction by residents, the public and all emergency and service vehicles, across the property located in the County's jurisdiction and as indicated on plans. If these requirements are met, the project would not be required to directly abut a City street or private street built to City standards.

The previous proposal was approved with conditions by the Technical Review Committee on July 21, 2014, by the Planning & Zoning Commission on August 6th and initially reviewed by City Council on September 9, 2014, but continued at that meeting after some discussion. No vote was taken.

When the project was amended to reduce the size of the area considered in the conditional zoning, this request returned to the Planning & Zoning Commission on February 4, 2015. The Commission voted to support the application by a vote of 5-2 and included a condition that the applicant provide a 45-foot easement or right-of-way (along Greymont Lane) to satisfy access and frontage concerns. The applicant agreed to the general condition of a 45-foot easement but the specifics suggested above and in the staff recommended conditions have not been agreed to by the applicant as of the writing of this report.

Staff has received contact from a representative of the other business that depends on Greymont Lane for access (PolyLINKS). Their comments were not in support of this project due to the significant traffic increase on a small access road (Greymont Lane) and a preference to have complementary industrial neighbors to their industrial use, to support and sustain the employment and production efforts for the region.

The proposal requires a change in zoning due to the fact that the maximum residential density in the Industrial district is only 2 units per acre and would result in only approximately 24 units allowed on the City portion of the site. The current proposal for 108 units on 9.3 acres is approximately 11.6 units per acre.

Reducing the project size leaves more land for potential future expansion of the Industries for the Blind (IFB) site. With the previous proposal to rezone the entire flag lot, significant area would have to be reserved for required property line buffers along the flag pole and to the rear of the IFB site which would greatly reduce the area available for expansion. This amendment has the potential to benefit future industrial expansion along Sardis Road.

However, it is not permitted by-right to create a lot non-conforming due to access and frontage standards for residential development, which this project would seek to do with the eventual subdivision of land and recombination of the remainder with the IFB parcel. Lot frontage along a public street is required in order to maintain safe access to residential properties.

The applicant contends that the site is not suited to an industrial use due to the access and constraints on the buildable area due to stream buffers. Staff finds that a parcel of this size, access and topography is not unsuitable for uses allowed in the Industrial zoning district, based on an analysis of existing industrial parks throughout the City and Buncombe County. There are a variety of sizes of sites currently active with industrial uses across the region, ranging from less than one acre up to 19 acres, with varying topography and with similar access on two and three-lane roads. Also, "industrial" uses are constantly changing and are not only the typical, historical manufacturing operations often thought of with the term "industrial zoning." There is a wide breadth of lower impact manufacturing and technologically industrial uses that could be well suited for this location.

The most applicable zoning actions related to this project are not necessarily geographically-related but more so of a similar zoning nature. However, notable projects in the area include the Franklin School of Innovation (Level I); the Buncombe County Intermediate School and the larger piece of this residential development within the County.

Relating to zoning, most recently City Council approved a conditional rezoning from IND to RM-16 for the development of a multi-family apartment complex on Sweeten Creek Road (The Avalon; 5-2 vote, February 2014). While this request was ultimately approved by City Council, it was not without considerable discussion regarding balancing the loss of industrially-zoned land and the need for projects to meet City goals on residential density and affordability.

Zoning and uses adjacent to this site include CI to the north (vacant parcel, metal roof manufacturing, heating and cooling contractor); IND to the east (Industries for the Blind); Buncombe County R3 to the south (vacant, proposed extension of this residential development) and Buncombe County EMP to the west (Progress Energy sub-station). Along the northwest property line is a 70 foot wide high power transmission line easement. The current uses in the immediate vicinity are not definitively incompatible with a residential development; however the context is generally thought of as having a low level of compatibility. The character of the area is largely commercial and industrial.

The proposed development is located back off of Sardis Road behind and among industrial and manufacturing uses and bordered by the transmission line mentioned previously. There are no sidewalks proposed along Greymont Lane and no sidewalks existing along Sardis

Road either as well as no transit options either. When staff is evaluating the suitability of an area for a new use, the analysis includes examining factors such as whether or not there is residential infrastructure or amenities that would be found in a typical residential area and the answer is no, not at this time. Outside of the immediate area there are neighborhoods and residentially-supported community uses (library over a mile away, proposed intermediate school approximately 0.5 mile away, Buncombe County Sports park over two miles away) however the lack of sidewalks or transit is not conducive to safe pedestrian or bike access to these uses.

Ultimately, because of the existing non-residential nature of the immediate vicinity, the proposed use is not considered to be compatible with the location. Even with the construction of the County-portion of the project, staff does not believe that this is an appropriate and harmonious location for a residential development at this time.

One of the smart growth principles in the Asheville City Development Plan 2025 highlights the importance of [infill] development where infrastructure can be easily provided. Also there are comments within the Plan relating to schools as "places of...important neighborhood and community centers." There are two new schools proposed in close proximity to this site. However, the Plan does stress the importance of linking residential neighborhoods, schools and residential amenities with safe pedestrian and bike access and this location is lacking in that regard.

Also in the Plan is a recommendation for residential projects to have a higher density, especially able to support transit and the future expansion possibilities of the Asheville Regional Transit system (currently no City transit routes run along Sardis Road). This proposal is at just around 11 units per acre for the site which is at the low end of the minimum density determined as necessary for optimum transit performance and doesn't maximize the density potential for the site.

Affordable housing options are highlighted throughout the Plan as a strong community need; and as of the writing of this report, no dedicated affordable or workforce rents are proposed. The addendum provided by the applicant indicates an intent to provide units at a reduced rate for employees of the IFB, however there is no clear and stated information on rates or duration of dedication provided and this is not securable or able to be monitored by the City. Additionally, the applicant has indicated that the rents will be lower than the workforce rates determined by the City; however, they remain unwilling to dedicate units as such.

One of the City of Asheville's adopted Smart Growth Land Use policies noted in the Plan states that Industrially zoned land should be reserved for industrial purposes and not lost to lower density development. The proposed conditional rezoning does not comply with this policy. Additionally, the Sustainable Economic Development Strategic Plan (2000) notes that the shortage of industrial sites within the City as an area of potential concern, stating that the City should seek to ensure the availability of suitable sites will meet the business needs of the City into the future. Staff's analysis is that the size, access and slopes/encumbrances on this site are comparable to other industrial areas and do not impede its suitability for industrial uses.

City Council's adopted goals for 2014-2015 stress expanding Asheville supply of affordable housing and maintaining a high quality of life for residents. This project does not offer any dedicated affordable units and there is some question as to whether locating residential uses in an area surrounded by non-residential and industrial uses is the most ideal location to enhance quality of life. City Council has a goal on expanding the supply of housing and this proposal does not maximize the residential density in the proposed zoning district. Additionally, one of Council's strategic goals is to support economic growth and this rezoning would be a loss of scarcely available industrial land; a loss of land on which to locate a business that has the zoning in place to attract private investment and create jobs.

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff does not find this request to be reasonable, consistent with the comprehensive plan or within the best public interest.

Considerations:

- The Comprehensive Plan, as well as the Sustainable Economic Development Strategic Plan, includes a stated policy to preserve Industrially-zoned land for industrial uses and ensure the availability of sites for future business needs. Staff's analysis has found that the size of and access to the site is not inconsistent with other industrial sites through the City and that industrially-zoned land should be retained as the nature of "industrial uses" changes over time.
- The application does not propose to dedicate any units as affordable, which is a clearly stated goal for the City. The addendum information provided by the applicant is not measurable or securable by the City in terms of affordability.
- Staff has concern regarding locating a residential development in an area lacking in transit, pedestrian and bike access or other typical residential area amenities.
- The amended proposal will continue with a subdivision to create a lot that is non-conforming due to frontage which is typically not permitted for a residential use. If the applicant agrees to the specific conditions regarding the access along Greymont Lane, the concern would be mitigated.
- The project preserves sensitive environmental area through the stream buffer.
- The amended proposal reserves additional land for the IFB site, improving their potential to expand in the future.
- There are two new schools proposed in the vicinity and residential amenities nearby, which this proposal could support *(however there is not safe pedestrian or bike access along Sardis Road nor transit).*
- The larger portion of the overall project has been approved by the County, which would bring residential into this industrial area regardless of City support.

Based on policies stated in the Comprehensive Plan and other plans, as well as direction provided by City Council in recent policy discussions, staff cannot recommend support of the proposed rezoning. With the concern over the loss of Industrially-zoned land for a proposal that does not substantially align with City Council's adopted strategic plan goals, the basis for support is low.

However, both the Planning and Zoning Commission and City Council have supported similar rezoning actions in the past. The Commission and City Council may consider this rezoning independent of the existing policies. While staff still does not support approval, should the Commission and Council decide otherwise, staff strongly recommends that the *affordable component be revised to align with the City's measurable processes*; that *a specific number of units are reserved and dedicated for visually-impaired residents*; that the applicant provide a *suitable walking path for the visually-impaired residents between the development and the IFB*; that *the buildings on the City portion meet sprinkler requirements in NFPA 13*; and that a *dedicated right-of-way or easement for access by emergency and service vehicles, the public and residents of the development be secured along Greymont Lane (as described in the condition earlier in this report)* in order to allow the application to further some important City policies and the public interest.

The applicant has agreed to the following additional conditions (1) that all units will be offered at the workforce maximum or lower for a minimum period of five years. The workforce rent limits are according to income standards determined by the City of Asheville Community Development Department; (2) that access will be by a 45-foot easement or right-of-way constructed to City standards, including 20 feet of pavement, the installation of curb and gutter, and all other specifications as required by the City Transportation and Public Works Departments;

and (3) the owner shall offer rental of units to employees of the Industries for the Blind at a discount of 5% from otherwise applicable rates, for a period of five years.

During discussion, Ms. Bernstein responded to various questions/comments from Council, some being, but are not limited to: why are they rezoning only part of the property; what will happen to the flag lot property; how much of the area can be built on for an industrial use; and who would be the first responder in the case of a fire - the City or Enka-Candler Fire Department.

In response to Councilman Bothwell, Fire Chief Scott Burnette explained the difference between the NFPA 13-R vs. NFPA 13 standards for sprinklers. He said a project of this type would normally require a 13-R (which is one level of sprinkler protection) if it has two means of access/egress. Since this project only has one access/egress, the Code requirement is to have a 13. The Code allows the Fire Code Official to grant only one means of access/egress if there is a higher level of fire protection. What he is recommending is a NFPA 13 (higher level of sprinkler protection). He feels comfortable with only one access/egress if there is a higher level of sprinkler protection. He further explained that the two means of access/egress is for first responders to get in quickly and not be bottlenecked up with residents trying to get out from the emergency.

Mr. W. Louis Bissette, attorney representing the developer, explained that they have reduced the size of the proposed area for development from 11.8 acres down to 9.3 acres and of that, there is only 5.05 acres that is buildable. He explained why didn't feel that it would be economically feasible for a small industrial site. He said the remaining 2.5 acres of the current parcel are proposed to be recombined with the Winston-Salem Industries for the Blind (IFB) property. He reiterated that the developer and IFB have signed an addendum to agreement for purchase and sale of real property stating that (1) Buyer shall reserve at completion, an unlimited number of units in the proposed Greymont Apartment Complex for employees of the Asheville, North Carolina, location; (2) these units shall be upfitted by Buyer at Buyer's expense to "blind and visually impaired friendly" status, as mutually agreed to by Buyer and Seller; (3) all units properly reserved shall be leased at a five percent discount from Buyer's standard rental rate; and (4) Buyer shall construct at Buyer's expense a mutually acceptable walking trail from the Greymont Apartment Complex to the IFB-Asheville plant, provided that at least five units are leased by IFB-Asheville. This project meets one of the City's goals to provide affordable and accessible housing or special needs households. The County's portion of this project has already been approved by the Buncombe County Commissioners with the NFPA 13-R rating. To provide NFPA 13 rating to the buildings on the City's portion will add a tremendous cost to the project. He stressed that this area needs multi-family housing and asked for City Council's support.

Mr. Patrick Bradshaw, representing Civil Design Concepts, explained that they will be upgrading Greymont Lane to City standards. He felt the life safety aspects of NFPA 13 vs. 13-R are not different. All occupied spaces are just as sprinklered. The context of construction is an almost brick exterior which is a very low fire hazard. The County Fire Marshal recognizes that NFPA 13-R is amenable to the County, who has the predominance of the units.

Councilman Bothwell felt that since several units will be rented to blind people that the developer would want a high safety factor. He felt that Fire Chief Burnette's suggestion for NFPA 13 standards is reasonable.

Mr. Randy Buckner, Director of Operations for IFB, explained that blind people are very mobile during evacuation periods. He supported the project in that (1) they have currently over 20 employees that would be interested in living at the Greymont Apartments; (2) savings for those employees of transportation costs and commute time; (3) it will save the City and County money on subsidizing the transportation costs through Mountain Mobility for IFB employees; (4) the developer will give the employees a 5% discount on the rent; (5) the property will probably not be sold for many years if it remains industrially zoned; and (6) IFB has retained enough property for

future expansion. He felt this will help fill some of the rental property needs in Asheville and asked Council to support the project.

Given the average salary of IFB employees, Councilman Pelly questioned if employees will be able to live in the apartments.

There was a brief discussion regarding an e-mail from Mr. Ben Teague, Vice-President of Economic Development for the Chamber of Commerce, who said that this property is totally non-competitive and supported the rezoning. Mr. Buckner said sale of the property will allow them to finish their work on their capital campaign projects to improve the quality of life for their employees.

In response to Councilwoman Wisler, Mayor Manheimer felt, and it was the consensus of Council, that the City didn't need to include conditions that were already in the Addendum to the Agreement between the developer and IFB.

Mayor Manheimer opened the public hearing at 6:20 p.m.

Ms. Betty Ford, employee of IFB, supported this proposal because she and her husband would like to live in one of the apartments to save on their transportation costs which range from $200-240 a month.

The Controller at PolyLINKS said that her company and these proposed apartments will both access Greymont Lane. Their concerns range from an increase of traffic on Greymont Lane to their preference to have complementary industrial neighbors to their industrial use, to support and sustain the employment and production efforts for the region. A separation of residential and industrial is generally preferred by both parties. Often residents will complain about noise, lighting, smell, etc. from industrial. The company runs three full-time shifts, but not on Sunday.

Mayor Manheimer closed the public hearing at 6:25 p.m.

Councilman Smith felt there may be some opportunities for this industrial site that have not been explored and holding onto industrial sites is going to be important. He totally supported IFB, but felt that offering rental units at a discount for a period of five years is not meaningful.

Vice-Mayor Hunt felt that if the parcel had been divided prior to assigning zoning districts in the Unified Development Ordinance, the subject parcel might not be zoned institutional. If the property remains industrial, it might be years before the IFB could realize any proceeds on the property they do not intend to use. Regarding affordability, most developers need a bottom line rate of return out of their development and if they blend in 10% of the units as affordable, the likely affect is the other 90% of the units have rent rates increased to offset the 10% affordable. In this case where all units are workforce, if we condition 10% affordable, he felt the workforce units would be slightly less affordable. The way a project impacts our need for affordable housing across the community is very complex and he felt that adding the 108 units at workforce level for five years is a plus for affordable housing in this community. He was, however, concerned about the fire protection aspect.

Councilman Bothwell felt we are (1) granting an exemption on the lot frontage; (2) not taking the Fire Chief's suggestion regarding fire protection; (3) introducing residential into an area surrounded by industrial uses; and (4) not taking into account the nearest neighbor with reasonable objections to the project. He felt that if the property is developable as a residential pad then it is developable as an industrial pad.

Vice-Mayor Hunt moved to approve the conditional zoning request for Greymont Village Apartments on Sardis Road from Industrial to Residential Multi-family High Density-CZ based on the site plan and conditions agreed upon by the applicant, and find that the request is reasonable,

is in the public interest and is consistent with the Comprehensive Plan and other adopted plans, in the following ways: (1) the project adds needed residential rental units in the City; (2) the project will preserve a sensitive environmental area through the stream buffer; and (3) the project supports affordability of housing in the community. This motion was seconded by Councilman Davis and carried on a 4-3 vote, with Councilman Bothwell, Councilman Pelly and Councilman Smith voting "no".

ORDINANCE BOOK NO. 29 – PAGE 465

B. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR POLYLINKS

RESOLUTION NO. 15-92 - RESOLUTION APPROVING AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR POLYLINKS

Economic Development Specialist Brenda Mills said that this is the consideration of a resolution to approve a $31,000 economic development incentive grant for PolyLinks. This public hearing was advertised on May 1, 2015.

This is the consideration of an economic incentive grant under the City of Asheville Economic Development Incentive policy. PolyLINKS Inc. is an existing precision metal working company (in the formerly owned Citizen-Times Production Plant on Sardis Road) and they have proposed expansion of their building. The company is investing $1.1 Million in building upgrades and $1.2 Million in machinery & equipment, for a total of $2.3 Million.

The expansion will add 12 new jobs with an average annual wage of $42,557 to the existing 17 employees at the company. These jobs range in hourly salaries from $10.00/hour to $26.00/hour (average hourly salary is $20.46/hour) with only one job at the $10/hour range. All employees are provided health benefits by the company.

PolyLINKS Inc. has requested consideration of a performance-based incentive grant under the City of Asheville Economic Development Incentive policy. The performance based grant for PolyLINKS Inc. for this project is an amount not to exceed $31,000, to be paid in annual installments for a period of up to five years; subject to compliance with an Economic Development Performance Agreement between the City and PolyLINKS. Payments begin after the investment is made, taxes are paid and verified, and the company requests payment.

The City will fund the payments from the general fund. The grant supports the decision by PolyLINKS Inc. to expand in Asheville with the creation of 12 new jobs.

Pros:

- Performance driven grant that is distributed after job and investment is achieved or mutually agreed performance bench marks are established;
- Supports job creation and capital investment in Asheville;
- Supports regional and state cooperation in the project.

Con:

- None

The project has an overall positive fiscal impact on tax revenues received by the city. Initially (during the grant period), the City will receive a portion of the new incremental property tax revenues from the project. After 5 years, the City will henceforth receive 100% capture of new city taxes. As noted above, the City of Asheville performance-based grant amount will not exceed $31,000 in total.

City staff recommends Council approve a resolution authorizing an economic development incentive grant for PolyLINKS Inc. not to exceed $31,000.

Mayor Manheimer opened the public hearing at 6:40 p.m. and when no one spoke, she closed the public hearing at 6:40 p.m.

Councilman Smith felt that in the future we need to support grants that provide greater than average wages.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Wisler moved for the adoption of Resolution No. 15-92. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 36 – PAGE 126

C. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR HI-WIRE BREWING

RESOLUTION NO. 15-93 - RESOLUTION APPROVING AN ECONOMIC DEVELOPMENT INCENTIVE GRANT FOR HI-WIRE BREWING

Economic Development Specialist Brenda Mills said that this is the consideration of a resolution to approve a $25,000 economic development incentive grant for Hi-Wire Brewing. This public hearing was advertised on May 1, 2015.

This is the consideration of an economic incentive grant under the City of Asheville Economic Development Incentive policy. Hi-Wire Brewing is an existing craft brewery which began in 2013. Their continued growth has prompted the company to invest $1.62 million over the next 3 years in a new 26,000 square foot brewing facility and equipment in the historic Biltmore Village area.

The company will create 15 new jobs over a period of 3 years with an average wage per year is $34,000. These jobs range in annual salaries from $28,000 to $37,000. The company provides 50% of coverage for health insurance and other benefits to employees.

The City's incentive policy would justify an incentive grant of $25,000 to the company. The grant would be subject to a performance agreement with the City, and would be paid in five annual installments, $5,000 a year. Payments begin after the conditions of the performance agreement are met, the annual property taxes are paid by the company and verified by the City that company has made the required investment and that investment goes on the tax rolls and the company requests payment.

The City will fund the payments from the general fund. The grant supports the decision by Hi-Wire Brewing to expand in Asheville with the creation of 15 new jobs.

Pros:

- Performance driven grant that is distributed after job and investment is achieved;
- Supports job creation and capital investment in existing industry in Asheville;
- Supports development of an identified economic cluster in the City; and,
- Supports regional and state cooperation in the project.

Con:

- None

The project has an overall positive fiscal impact on tax revenues received by the city. Initially (during the grant period), the City will receive a portion of the new incremental property tax revenues from the project. After five years, the City will henceforth receive 100% capture of new city taxes.

City staff recommends Council approve a resolution authorizing an economic development incentive grant for Hi-Wire Brewing not to exceed $25,000.

Mayor Manheimer opened the public hearing at 6:44 p.m.

Mr. Adam Charnack, representing Hi-Wire Brewing, said they have already hired 10 new employees and thanked City Council for their support.

The Controller from PolyLINKS spoke in support of Hi-Wire Brewing and their work with charities.

Mayor Manheimer closed the public hearing at 6:47 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 15-93. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 36 – PAGE 127

D. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING FOR PROPERTY LOCATED AT 53 LOGAN CIRCLE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16/CZ RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION OF 16 TOWNHOME UNITS, WITH CONDITIONS REGARDING SETBACKS, SIDEWALKS AND INFRASTRUCTURE IMPROVEMENTS

Mayor Manheimer announced that this item has been removed from consideration at this meeting and will be rescheduled.

E. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO A PREVIOUSLY APPROVED CONDITIONAL ZONING FROM URBAN PLACE DISTRICT/CONDITIONAL ZONING TO URBAN PLACE DISTRICT/CONDITIONAL ZONING TO AMEND A PREVIOUSLY APPROVED MIXED-USE DEVELOPMENT PROJECT LOCATED AT 146 AND 99999 ROBERTS STREET

Councilwoman Wisler moved to continue this public hearing until May 26, 2015. This motion was seconded by Councilman Pelly and carried unanimously.

V. UNFINISHED BUSINESS:

A. POLICY GUIDANCE REGARDING SHORT TERM RENTALS AND HOMESTAYS

Executive Director of Planning & Multimodal Transportation Cathy Ball said that staff is requesting direction from City Council on revising the Unified Development Ordinance (UDO) to address concerns with short-term rental and homestays. After receiving feedback from City

Council, staff will, pursuant to Council's direction, prepare and request wording amendments for presentation to the Planning and Zoning Commission. Following the Planning and Zoning Commission action, City Council will take final action on the wording amendment. Currently, the UDO allows homestays and rentals of dwelling units for less than 30 days in some zoning districts, but not others..

As with most tourist cities, the City of Asheville is experiencing a high demand for visitors that want to stay in homes during their vacation. This trend has created concerns for both citizens that want to rent their homes and neighbors that feel the impact of more transient population is causing adverse impacts.

Ms. Ball then reviewed the timeline of the times the action has been before the Planning & Economic Development (PED) Committee and the Planning & Zoning Commission. City Council held a public forum on March 25, 2015, to hear from the community on this issue.

At the PED Committee, there was (1) review of current regulations; (2) a February 18, 2014, update which included research from other communities; and (3) a recommendation to move forward with changes to homestays regulations and defer consideration of Short Term Rentals until more research was complete on the impact to affordable housing.

From the Planning & Zoning Commission (1) staff recommended revising homestays to reduce the size from 2500 square feet to 1200 square feet and remove the requirement for a meal to be served; and (2) request was unanimously denied (only 4 of 7 present at the meeting) for the following reasons (1) lacked clear purpose and focus; (b) lacked enforcement mechanisms; and (c) should look holistically at all types of rental uses.

A December 2014 Short Term Rental Report, which was contracted with Urban Planning Analytics, LLC, addressed the following issues regarding short term rentals (1) impact on affordable housing; (2) strategies for reducing impacts on neighborhoods; and (2) balancing inequities between short term rentals, hotels and Bed & Breakfasts.

At the March 25, 2015, community forum, over 150 people were in attendance and the unofficial results from people who commented were: 13 people wanted no change except to increase enforcement, 18 people wanted to expand options for homestays, and 13 people supported short term rentals.

Staff is requesting direction from City Council on regulations for homestays and short-term rentals.

Director of Development Services Shannon Tuch and City Attorney Currin responded to various questions/comments from Council.

Regarding short term rentals, Mayor and Council voiced their opinions resulting in:

Councilwoman Wisler supported keeping the current regulations, with increased enforcement
Councilman Smith supported prohibiting short term rentals in all zones, with increased in fines and proactive enforcement plan
Councilman Bothwell supported keeping the current regulations
Councilman Pelly was open to considering short term rentals in a range of districts with strict guidelines
Vice-Mayor Hunt supporting keeping the current regulations, with increased enforcement and increase in fines
Councilman Davis supported keeping the current regulations
Mayor Manheimer supported keeping the current regulations with proactive enforcement plan and increase in fines

Regarding homestays, Mayor and Council voiced their opinions resulting in:

Mayor Manheimer supported no size of structure requirement; supported a long-term tenant (not only the owner of the property) be allowed to be the operator of the homestay; supported no separation requirement; did not support the accessory structure requirement

Vice-Mayor Hunt supported no size of structure requirement; supported a long-term tenant (not only the owner of the property) be allowed to be the operator of the homestay; support for the long-term tenant or owner of the property be required to stay overnight in the unit; supported proof of liability insurance for the use; supported an occupancy tax collected by Buncombe County; and supported an increase in fines; did not support the accessory structure requirement

Councilman Smith supported no size of structure requirement; no maximum of 25% Gross Floor Area of structure use; supported no parking requirement; supported cost recovery for enforcement; supported proof of liability insurance for the use

Councilwoman Wisler supported no size of structure requirement; supported no separation requirement

It was the consensus of Council to have staff prepare a brochure or flow cart for the public to understand the process for permitting homestays and/or short term rentals.

Mayor Manheimer said that staff will prepare an ordinance amendment based on Council's direction which will be reviewed by the Planning & Zoning Commission by a public hearing at their July 16, 2015, meeting, with the City Council public hearing on the matter on August 11, 2015.

VI. NEW BUSINESS:

A. RESOLUTION AUTHORIZING THE STANDARDIZATION PURCHASE OF THE TASER AVON FLEX THROUGH FISCAL YEAR 2019 FOR CONSISTENCY IN OPERATION AND FUNCTIONALITY

This item has been withdrawn from consideration at this time to be rescheduled after further development of the administrative policies regarding the usage of the footage.

B. BOARDS & COMMISSIONS

Regarding the Civil Service Board, the following individuals applied for a vacancy: Pam Holcombe, Mychal Bacoate, John P. Miall Jr. Thomas R. Duckett, Alan Escovitz, Kevin West and Carol Goins. Mr. West has not been separated from City of Asheville employment long enough, and is, therefore, not eligible for appointment. It was the consensus of City Council to interview Pam Holcombe, Mychal Bacoate, Thomas R. Duckett, Alan Escovitz and Carol Goins.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Lauren Noto provided Council with research she performed on the transit system pertaining to low income ridership.

Ms. Wendi Diamond, President of the Property Owners Association of the Oak Forest neighborhood, presented Council with a petition requesting the City to repave the streets in their neighborhood.

Mr. P. Acebo and a young girl spoke against the proposed location of the Duke Energy Substation and urged City Council to establish a moratorium on placement of substations and

direct City staff to set standards to prohibit substations to be relocated to places that may be inappropriate.

Mr. Timothy Sadler thanked Homeward Bound for their work on rental units for veterans; and supported additional funding opportunities for the City of Asheville Youth Leadership Academy Program.

Mr. Larry Merrell thanked City Council for their openness regarding discussions on the short term rentals and homestays.

Councilman Davis said that the ABC Board sent Council a commemorative ABC lapel pin and coasters from their Drink Responsibly campaign. He noted they are on target for a record distribution of revenue to the City.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 8:22 p.m.

Magdalen Burleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – May 26, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. RECOGNITION OF ASHEVILLE-BUNCOMBE TECHNICAL COMMUNITY COLLEGE PRESIDENT DR. DENNIS KING

Mayor Manheimer was pleased to recognize Dr. Dennis King who became the 6th President of Asheville-Buncombe Technical Community College on August 1, 2014. Dr. King spoke about the work of the College ad thanked City Council for their support.

B. RECOGNITION OF THE USS ASHEVILLE SSN 758

Mayor Manheimer said that carrying on a significant tradition for the City of Asheville, a fourth U. S. Navy ship named after the city was commissioned on September 28, 1991, and continues on active and commendatory service to our country. The USS ASHEVILLE SSN 758 and her crew maintain the legacy of the three previous U. S. Navy ships named after this city and continue a strong bond with the citizens of the City of Asheville. That connection with the City of Asheville is manifested in the current visit to the city by the Commanding Officer, Commander Paul R. Pampuro, Chief of the Boat Machinist Mate Chief Robert Campbell, Logistics Specialist 2nd Class Torey Walker and Machinist Mate 2nd Class Dalton Moore. The Asheville City Council, in session on this the 26th day of May, 2015 warmly welcomes and recognizes the Commanding Officer of the USS ASHEVILLE SSN 758 and his three crew members to the City of Asheville. In their continuing deployments in service to our country, we wish the entire crew of the USS ASHEVILLE much success and "Fair Winds and Following Seas".

She thanked Mr. Ken Vasilik for his work with the USS Asheville. They then exchanged gifts.

C. PROCLAMATION PROCLAIMING JUNE 1-7, 2015, AS "HEMP HISTORY WEEK"

Mayor Manheimer read the proclamation proclaiming June 1-7, 2015, as "Hemp History Week" in the City of Asheville. She presented the proclamation to Mr. Timothy Sadler, and others, who briefed City Council on some activities taking place during the week.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 12, 2015

B. ORDINANCE NO. 4413 - ORDINANCE TO ENACT SPEED LIMIT CHANGES ON SUNSET DRIVE, GLENDALE AVENUE, LIBERTY STREET AND PINECROFT ROAD

Summary: The consideration of an ordinance to enact a 20 mph speed limit on Sunset Drive from Baird Street to Griffing Boulevard-North; and a 25 mph speed limit on (1) Glendale Avenue from Dogwood Road to Fairview Road, (2) Liberty Street from Fairview Road to Merchant Street, and (3) Pinecroft Road from Beaverdam Road to the end of City Maintenance.

According to state law (NCGS # 20-141), the statutory speed limit in North Carolina is 35 mph inside municipal corporate limits for all vehicles and 55 mph outside municipal corporate limits for all vehicles except for school buses and school activity buses.

Furthermore, local authorities may authorize by ordinance higher speeds or lower speeds than the statutory 35 mph speed limit on locally-maintained streets provided that the higher speed limit cannot exceed 55 mph. Speed limits authorized by local authorities are effective when the appropriate signs are erected.

City staff recently completed traffic engineering investigations and determined that a 20 mph speed limit on Sunset Drive from Baird Street to Griffing Boulevard-North, and a 25 mph speed limit on Glendale Avenue from Dogwood Road to Fairview Road, Liberty Street from Fairview Road to Merchant Street, and Pinecroft Road from Beaverdam Road to the end of City Maintenance would be reasonable and safe.

Pros:

- City staff has been able to respond favorably to citizen's requests.
- The new speed limits will be consistent with roads of like character and design.
- This action will also bring some of the roads into line with our speed limit policies.
- Based on the 85th percentile speeds, most drivers would adhere to the recommended speed limits on these roads.

Cons:

- The initial cost to install the appropriate speed limit signs is about $500.00.
- Typically, speed limit signs have a serviceable life of five to seven years.

The initial cost to install the appropriate speed limit signs is about $500.00 and is included in the current operating budget for the Transportation Department.

City staff recommends that City Council approve an ordinance enacting a 20 mph speed limit on Sunset Drive from Baird Street to Griffing Boulevard-North, and a 25 mph speed limit on Glendale Avenue from Dogwood Road to Fairview Road, Liberty Street from Fairview Road to Merchant Street, and Pinecroft Road from Beaverdam Road to the End of City Maintenance.

ORDINANCE BOOK NO. 29 - PAGE 478

C. RESOLUTION NO. 15-94 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SUBMIT A GRANT APPLICATION TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY FOR THE 2015 TOURISM PRODUCT DEVELOPMENT FUNDS TO SUPPORT RIVERFRONT DESTINATION DEVELOPMENT

Summary: The consideration of a resolution authorizing the City Manager to submit a grant application to the Buncombe County Tourism Development Authority (TDA) for the Tourism Product Development Funding (TDPF) to support riverfront destination development.

The Buncombe County TDA's 2015 grant cycle for the TDPF opens in June of this year. TDPF grants support construction of brick and mortar projects that will add new or increase existing room nights in Buncombe County lodging facilities. The City of Asheville (City) intends to submit a Phase I preliminary application on June 3, 2015. The grantor will review applications to determine eligibility and will invite potential grantees to submit a more extensive Phase II application. Phase I applicants will receive notification of eligibility on June 24, 2015. If the City receives an invitation to continue with the grant process, a more extensive Phase II application is due on August 26, 2015. The Buncombe County TDA will announce grant awardees and amounts on October 28, 2015.

For Phase I, staff recommends applying for $2.5 million in grant funds that will support Capital Improvement Project construction costs of over $5.4 million. The City submitted a successful application in 2014 and was awarded $1.8 million for riverfront redevelopment projects. The projects proposed for the 2015 application are a continuation of that effort.

The City's application proposal is to construct a comprehensive set of brick and mortar projects that will help transform the River Arts District and its gateways from a place that has scattered and hard to find attractions, into a fully developed destination where points of interest and experiences are easy to find, attentive to visitor needs, and easily accessed.

The recommended application would include the following project elements:

1) River to Ridge Greenway Trail Connection ($1 Million)
   Beaucatcher Greenway – construction of a greenway trail from historic Helen's Bridge trailhead to recreational facilities at McCormick Field and Memorial Stadium

2) French Broad River Greenway Network ($1 Million)
   French Broad River Greenway West Bank connection -- This one-and-a-half mile multi-use path will connect the city's most beautiful riverfront park and the three miles of existing riverfront greenways and parks beyond it with the production and visitor's facilities and tasting room for the United States third largest craft brewery (New Belgium Brewing Asheville).

3) Improvements to connect visitors to riverfront recreation ($500,000)
   - Velodrome rebuild – park and track improvements to the existing Carrier Park velodrome, including complete resurfacing of the track
   - Crosswalk and river access – development of improved safety features across Amboy Rd. into Carrier Park, as well as construction of a river access point

Pros:

- City Council has identified implementation of riverfront redevelopment capital investments as a key strategic goal for the city.
- The TPDF is a significant funding opportunity that would leverage the City's investment to move forward on these investments.
- The City has already shown a commitment to implementing these projects as part of the Economic Development Capital Improvement Program.

Con:

- If awarded, the City is required to partner on marketing efforts for the French Broad riverfront as a destination, which may require shifting of current priorities or addition of resources not provided by this grant fund.

The Buncombe County TDA may choose to not award, partially award, or fully award the grant request of $2.5 million. If any award is offered and accepted, the city would experience a positive impact to the budget. Any award is contingent upon the availability of matching funds. These funds have been identified by staff.

An announcement of an award would begin the process of the City developing a grant agreement with Buncombe County TDA that further defines the specific funding amounts and project elements included in the partnership effort. Through proposed partnerships like these, staff continues to develop diverse funding sources for riverfront redevelopment capital investments that will increase the City's fiscal sustainability and the anticipated economic impact of the plan.

Staff recommends that the City Council adopt a resolution authorizing the City Manager to submit a grant application to the Buncombe County Tourism Development Authority for the Tourism Product Development Fund.

RESOLUTION BOOK NO. 37 - PAGE 128

D. RESOLUTION NO. 15-95 - RESOLUTION AUTHORIZING THE CITY MANAGER TO CONVEY A 0.947 ACRE EASEMENT LOCATED AT THE ASHEVILLE REGIONAL AIRPORT TO THE N.C. DEPT. OF TRANSPORTATION FOR RIGHT-OF-WAY PURPOSES

Summary: The consideration of a resolution authorizing the City Manager to convey a 0.947 acre easement located at the Asheville Regional Airport to the N.C. Dept. of Transportation for right-of-way purposes.

The City of Asheville holds title to the real property at the Asheville Regional Airport, and leases that property to the Asheville Regional Airport Authority (Airport). In order to convey real property at this location, the City of Asheville must execute the deeds of conveyance. Because the property was acquired with FAA financial assistance, and has been held for use by the Airport, all financial proceeds associated with the real property disposition are subject to FAA regulations governing the allocation of these proceeds; specifically, proceeds of sale of an easement must be utilized for airport capital projects.

In this instance, the N.C. Dept. of Transportation (NCDOT) has requested an easement on the southernmost property boundary of the airport. The roadway project involves the realignment of Old Fanning Bridge Road and the development of Ferncliff Park Drive. Overall, the project is substantially completed, with finalization of right-of-way acquisition underway. At this time, NCDOT has requested to purchase right-of-way and associated property rights at the Asheville Regional Airport, as follows.

Property Right	Area	Value
Permanent Right-of-way (easement)	0.947 acres	$93,000

The total offer is $93,000 for the real property needs of NCDOT. This value is based on an independent MAI fair market appraisal. The Airport is amenable to the transaction and will seek approval from the FAA for this conveyance.

Pro:

- The sale of property will support NCDOT's plans to improve traffic efficiency and safety.

Con:

- None.

All financial proceeds associated with the real property disposition are subject to FAA regulations governing the allocation of these proceeds; specifically, the proceeds of sale of an easement must be utilized for airport capital projects.

Economic Development staff recommends adoption of the resolution to convey real property at the Asheville Regional Airport to the NCDOT.

RESOLUTION BOOK NO. 37 - PAGE 129

E. RESOLUTION NO. 15-96 - RESOLUTION AUTHORIZING THE PURCHASING MANAGER TO DISPOSE OF SURPLUS CITY-OWNED PERSONAL PROPERTY (2004 JOHN DEERE 410G BACKHOE) VALUED AT $30,000 OR MORE

Summary: The consideration of a resolution authorizing the sale of one John Deere 410G Backhoe deemed surplus City personal property.

The City's Water Resources Department, Division of Maintenance, identified a John Deere 410G Backhoe, as surplus personal property, with no anticipation of utilization by the City. Pursuant to N.C.G.S. §160A-266, the Sale and Disposal of Personal Property valued at $30,000 or more must be approved by City Council. The City's Purchasing Manager has authority to dispose of personal property valued at less than $30,000 by private negotiation and sale. The estimated blue book value of the John Deere 410G Backhoe is listed at $5,000. Bids were solicited and received from several potential purchasers. The final bid amount at the close of the Auction on Monday, May 11, 2015, was $34,100. City Council is being asked to approve the sale of the Backhoe for $34,100.

Pros:

- Promotes City of Asheville fiscal responsibility of disposing of surplus property which generates revenue.
- Space utilization eliminates the need to store large, unused equipment.
- Competitive process yielded market price, statute contemplates.

Cons:

- None

The backhoe is fully depreciated and the Water Resources Fund will recognize the entire $34,100 as revenue from the sale of assets.

City staff recommends City Council adopt a resolution approving the sale of the John Deere 410G Backhoe to the perspective purchaser for the amount of $34,100.

RESOLUTION BOOK NO. 37 - PAGE 130

F. RESOLUTION NO. 15-97 - RESOLUTION AUTHORIZING THE CITY MANAGER ENTER INTO A SPECIAL MAINTENANCE AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO ALLOW PUBLIC PARKING UNDER A SECTION OF BRIDGE #322 AND #323 ON THE EAST SIDE OF THE FRENCH BROAD RIVER IN THE RIVER ARTS DISTRICT

Summary: The consideration of a resolution authorizing the City Manager to execute a special maintenance agreement between the North Carolina Department of Transportation and the City of Asheville to allow public parking under a section of bridge # 322 and # 323 on the east side of the French Broad River in the River Arts District.

Bridge # 322 and # 323 are known as the Capt. Jeffrey Bowen Bridges and they provide access for I-26, I-240, US 19-23, and US 74-A across the French Broad River. In addition, the bridges provide a critical connection between downtown Asheville and West Asheville. As a part of the overall improvements in the River Arts District, public parking will be needed and the identified areas will help to satisfy that need.

The City and the North Carolina Department of Transportation have similar agreements at other locations including the public parking under the I-240 bridge adjacent to North Lexington Avenue, the public parking under the US 25 (McDowell Street) bridge adjacent to SR 3556 (Meadow Road), the public parking under the SR 3548 (Haywood Road) bridge adjacent to Riverside Drive, the public parking under the subject bridges on the west side of the French Broad River (approved by City Council on January 14, 2014 via Resolution # 14-2), and the public parking adjacent to Cherry Street.

Pros:

- Increases the parking supply in the River Arts District.
- Establishes parking in an area that is not currently being used.

Cons:

- The City is responsible for all maintenance and liability responsibilities including security measures.
- The City is required to return the area to its previous condition upon termination of the agreement by either party.

There will be no immediate fiscal impact because an actual parking area has not been designed. Staff is considering adding this work to the ongoing design of the RADTIP project.

Staff recommends that City Council approve a resolution authorizing the City Manager to execute a special maintenance agreement between the North Carolina Department of Transportation and the City of Asheville to allow public parking under a section of bridge # 322 and # 323 on the east side of the French Broad River in the River Arts District.

RESOLUTION BOOK NO. 37 - PAGE 131

G. RESOLUTION NO. 15-98 - RESOLUTION AUTHORIZING THE CITY MANAGER ENTER INTO A FOUR-YEAR LEASE AGREEMENT WITH JOHN DEERE CREDIT FOR MOWING AND BALL FIELD MAINTENANCE EQUIPMENT

Summary: The consideration of a resolution authorizing the City Manager to enter into a four-year lease agreement with John Deere Credit for mowing and ball field maintenance equipment.

The lease with John Deere Credit, which includes two commercial mowers, two utility vehicles, four ball field groomers, and maintenance and equipment replacement, will cost $98,528.72 for the four-year term of the lease, or $24,632.18 per year.

Although not required by North Carolina General Statute for leasing, two competitive quotes were solicited from two commercial equipment companies, John Deere Credit and Toro. John Deere was higher than Toro by $60 annually. Due to the nominal difference in pricing, staff would opt to contract with John Deere Credit due to existing equipment, supplies, and staff's previous experience operating John Deere equipment providing substantial cost savings and efficiency to the city operations.

Pros:

- Investment to maintain and care for city-owned park facilities.
- Provide quality service for ongoing, core facility maintenance services.
- Fulfill commitment for maintenance of the park system.

Con:

- None

The four-year equipment lease, maintenance and equipment replacement cost will be $98,528.72 or $24,632.18 per year. The $24,632.18 per year to support the lease agreement is budgeted in the operating budget in the Parks and Recreation Department.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a four-year lease agreement with John Deere Credit for park maintenance equipment not to exceed $98,528.72.

RESOLUTION BOOK NO. 37 - PAGE 132

H. RESOLUTION NO. 15-99 - RESOLUTION ACCEPTING GRATITUDE DRIVE AS A CITY-MAINTAINED STREET

Summary: The consideration of a resolution to accept Gratitude Drive as a city-maintained street

Code of Ordinances Sec. 7-15-1(f)(4)a requires that streets dedicated for public use be accepted by resolution of the City Council. The developer submitted a written request via e-mail message on August 1, 2014 asking the City to accept the subject street as a city-maintained street.

Gratitude Drive from Burk Street/Grinnell Street to a point 0.03 mile east of Burk Street/Grinnell Street is a developer-constructed street that has an average width of 20 feet with grass shoulders, a length of 0.03 mile, and a right-of-way width of 25 feet.

Transportation Department staff, Fire Department staff, Planning Department staff, and Public Works Department staff inspected the subject street and determined that it was constructed according to current standards as indicated in the City of Asheville's Standard Specifications and Details Manual. In addition, the engineer of record has certified that the street has been constructed to current standards via a letter dated March 30, 2015.

Following City Council's approval of this resolution, the subject street will be added to the official Powell Bill List.

Pros:

- The City of Asheville will receive Powell Bill Funds from the North Carolina Department of Transportation (NCDOT) to help maintain the street.
- The street provides access in a residential community.

Con:

- Powell Bill Funds will not cover 100% of the total cost to maintain the street.

There will be no initial financial impact to the City, although the responsibility of maintenance will belong to the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the street.

Staff recommends that City Council accept Gratitude Drive as a city-maintained street.

RESOLUTION BOOK NO. 37 - PAGE 133

I. RESOLUTION NO. 15-100 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A FEDERAL AVIATION ADMINISTRATION GRANT FOR THE ASHEVILLE REGIONAL AIRPORT FOR RUNWAY CONSTRUCTION, PHASE 2

Summary: The consideration of a resolution authorizing the Mayor to approve a Grant Offer from the Federal Aviation Administration (FAA) in the amount of $12,560,480

The FAA has offered a grant agreement to the Asheville Regional Airport. This grant, in the amount of $12,560,480 is for construction runway (Phase 2 Construction - Temporary Runway 16/34 Paving, Lighting and NAVIDs).

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 3-37-0005-45-2015.

RESOLUTION BOOK NO. 37 - PAGE 135

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Hunt moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Wisler and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. PRESENTATION OF THE 2015-16 ANNUAL OPERATING BUDGET

Director of Finance Barbara Whitehorn provided an overview of the Fiscal Year 2015-16 Operating and Capital Budget. She reviewed the revenue strategies to a balanced budget, recommending (1) a 1.5 cent increase per $100 valuation to offset the loss of privilege license; (2) decreasing taxpayer subsidy of programs and services (a) Nature Center Changes to include new gate admission rates, and membership contribution to operations; (b) Aston Park Tennis Center new membership rates; and (3) decreasing taxpayer subsidy of programs and services - planned increase in solid waste fee of $3.50/month to a monthly charge of $10.50.

General Fund expenditures include (1) investment in human capital of (a) Classification and Compensation Study; (b) living wage evaluation; (c) Health Care; (d) planned increase in City contribution to OPED; and (e) maintain current level transfer from General Fund to Workers Compensation/Liability Fund. Expenditure strategies consist of (1) managed savings; and (2) reengineering and saving. Overall, the General Fund expenditures are anticipated to increase 3.6% over Fiscal Year 2014-15. Long term options include (1) evaluation of City property, departmental needs and possible efficiencies; and (2) inter-departmental shared services. City staff will continue to seek and implement innovative cost savings models.

Enterprise Funds include (1) Water Fund (a) continued stable performance; (b) minor rate adjustments based on financial model were approved on April 14, 2015; and (c) $12 Million pay-go investment in water capital improvements; (2) Transit Fund (a) continued financial pressure (4% increase in operating costs); (b) no service changes budgeted; and (c) General Fund support increased by $90,000; (3) Parking Fund (a) strong revenue growth; (b) no adjustment to garage or meter rates; (c) maintain $616,000 in support to Transit Fund; and (d) capital program being developed; (4) US Cellular Center Fund (a) moderate performance in Fiscal Year 2014-15 - revenue and expenses adjusted down to reflect lighter event load; (b) no increase in General Fund operating support; and (c) Thomas Wolfe acoustic study funded; and (5) Stormwater Fund (a) 5% rate increase approved April 14, 2015; (b) additional crew added for enhanced maintenance program; and (c) continuation of service and capital investment.

Current CIP includes the following for Fiscal Year 2016 (1) Affordable Housing - $5,502.748; Public Safety - $6,083,424; Multi-Modal Transportation - $6,008.147; Economic Development - $400,000; Quality of Life - $2,171,863; and Infrastructure & Maintenance - $7,111.651.

CIP funding project totals for Fiscal Years 2014-2020 include (1) Affordable Housing - $9,868,787; Public Safety - $12,505,794; Multi-Modal Transportation - $30,158,850; Economic Development - $7,445,170; Quality of Life - $8,738,865; and Infrastructure & Maintenance - $38,771,912.

Water System Refunding Bonds include (1) refunding 2005 and 2007 Revenue Bonds; and (2) Green Bonds. CIP Water projects for Fiscal Year 2015-16 total $11,985,500.

Vice-Mayor Hunt confirmed that the living wage evaluation of $250,000 is currently included in the budget and will be complete within the next several weeks.

Councilman Smith said that when Council implemented Sunday transit service, the idea was to look at that for a year, look at demand, and then re-evaluate what that level of service might need to be. It doesn't appear that there is any money budgeted should Council decide an expansion of that service would be warranted. He hoped there was flexibility in the budget mid-year since this Council has been steadfast in maintaining the transit budget.

In response to Councilman Smith, Director of Transportation Ken Putnam said that there has been a positive response to the Sunday transit service and that since the six months it has been implemented, the ridership has been solid.

In response to Councilwoman Wisler, Mr. Putnam said that over the past 4-5 years, we are hovering around 1.5 million riders a year. For the 10 months this Fiscal Year, we are running 2.3% higher than last year at the same time. He predicted that we will finish out this Fiscal Year with an increase in ridership.

Councilman Bothwell asked to see a breakdown of the community programs budget for this Fiscal Year.

In response to Councilwoman Wisler, City Manager Jackson said that for the budget presentation for 2016-17, the budget documents will include a column where we compare not only the projected budget to last year's budget, but also a column to show our estimate on where we think we will finish the year.

In response to Councilman Smith, Ms. Whitehorn explained the affordable housing funding with regard to the Housing Trust Fund and the Economic Development Capital Improvement Program (EDCIP). City Manager Jackson also said that staff will analyze the current estimate of the EDCIP (Parks Maintenance Relocation Project) to see if there is some leeway to reduce the EDCIP dollars, which will allow the reprogramming of those funds to either the Housing Trust Fund or other housing projects. He said that he would provide that information to Council at their June 9 meeting.

City Manager Jackson also said that staff will provide Council with further detail on the Fund Balance regarding the 5-10 year trend and what the City presented to the bond rating agencies.

Mayor Manheimer said that the public hearing will be held on June 9, 2015, with final budget adoption on June 23, 2015.

B. FINANCIAL REPORT

The following third quarter of 2014-15 Quarterly Financial Report was provided to Council by Budget Manager Tony McDowell:

"The following financial information reflects the City's overall financial position for the fiscal year through March, 2015.

Amendments. The General Fund budget presented in this third quarter report reflects the adopted budget of $99,547,954 along with eleven budget amendments approved by City Council. A summary of the budget amendments is presented below. The budget amendments that involved an appropriation from fund balance are noted with an asterisk.

Adopted Budget	99,547,954
Budget Amendments:	
Parks & Recreation Grants/Donations	53,795
WNC Diversity Engagement Coalition Support*	10,000
Energy Efficient Lighting Community Centers*	48,500
Traffic Signal Pole Replacement	16,590
City Workforce Investments	500,000
Energy Assessment US Cellular Center*	55,000
Thomas Wolfe Auditorium Roof Repairs*	60,000
Senior Center and Harvest House Grants	7,786
Parks Equipment	73,000
Document Imaging	32,750
Civil Service Legal Fees*	45,018
3/31/2015 Budget	$100,450,393

* Fund Balance Appropriation

Revenues. Through March 31, 2015, the City has collected $83,671,068 in General Fund revenue, which represents approximately 85% of the total General Fund revenue budget. Revenue collections through the first three quarters of this fiscal year are very similar to where they were one year ago in terms of budget versus actual. The City has received eight months of sales tax revenue, and collections are up 14.3% compared to the prior year. Sales tax revenue growth has far exceeded budget projections to date, and as a result, staff is projecting that sales tax revenue will come in over budget by $600,000. In the intergovernmental category, utility tax revenue is projected to exceed budget by $500,000 due to changes in the formula the state uses to distribute that revenue. Development Services Department (DSD) revenue continues to perform well; as of the end of March, DSD revenues were at 84% of budget. With the bulk of property tax revenue received in December and January, that revenue source is now at 95% of budget. Overall, staff is currently projecting that ***FY 2014-15 General Fund revenue will exceed budget by $1.1 million or 1.1%.***

Expenditures. General Fund expenditures through March 31, 2015 total $69,104,784 or 69% of the budget, which is slightly ahead of where expenditures were last fiscal year after three quarters. Personnel expenses, the largest component of the General Fund budget, are slightly under budget through the first three quarters. Expenditures for fuel, fleet maintenance, health care, and utilities continue to perform better than budget through the first three quarters. ***Based on current trends, staff is projecting that expenditures will finish the year under budget by approximately $1.1 million (98% of budget).***

Fund Balance. The City ended FY 2013-14 with $17.0 million in unassigned fund balance. The adopted FY 2014-15 budget included a $2.0 million fund balance appropriation, which brought that total down to $15.0 million. Since the start of the fiscal year, an additional

$218,518 has been appropriated from fund balance. Based on the positive revenue and expenditure trends observed through the first three quarters, staff is projecting that instead of decreasing, fund balance will actually increase slightly this fiscal year. ***Current revenue and expenditure projections for FY 2014-15 indicate that unassigned fund balance at June 30, 2015 will be $17.7 million or 18.0% of estimated expenditures.***"

Ms. Whitehorn responded to Councilman Pelly as it related to Fund Balance and the 1.5 cent staff recommended property tax increase.

C. NATIONAL CITIZEN SURVEY RESULTS

Community & Public Engagement Director Dawa Hitch said that in the High Quality of Life focus area, City Council outlined 5 goals. One of those goals was to continue to develop City Council communications and partnerships with citizens, community leaders, the media and elected officials. Administering a citizen's survey was one of the actions steps identified to achieve that goal.

The National Research Center Inc. (NRC) was chosen because it allowed comparisons with the responses given in the 2008 survey. The NRC also maintains a large database of cities for benchmarking.

The survey was mailed to 1200 homes within the city limits and responses were accepted both online and through return mail. All surveys were completed in English although a Spanish language survey was made available online. The sampling method was designed to closely mirror the overall housing unit density, including oversampling of multi-family housing units as residents of this type of housing typically respond to surveys at a lower rate than residents of single-family homes. A total of 337 surveys were received, yielding a 29% response rate. Response rates for citizen surveys are typically in the 25-40% range. She explained that 95% confidence interval means in most cases the true answers is within +/- 5 points around a given percentage. As we move into the results you will see that % positive response is what is reported.

While this presentation does not go into the subgroup comparisons, she thought it was worth mentioning for those in the community that want to dig further into the data. Zip codes were used to define geographic areas. Demographic information included number of years in Asheville; rent or own; annual household income; and age.

Of the 17 questions presented in the 2015 survey, 13 were benchmarked against other cities. Benchmark cities included 540 cities in the NRC database. As another benchmark comparison, Asheville responses were compared to a narrower subset of other destination/resort communities with populations less than 175,000. There were 42 cities in this subset.

Finally, the sampling method was designed to closely mirror the overall housing density, including oversampling of multi-family housing units since the survey administrators have found residents of multi-family housing typically respond to surveys at a lower rate than residents of single family homes.

The NRC captured resident's opinions within three pillars of community. The first is Community Characteristics. In other words, what makes a community livable, attractive and a place where people want to be? In responding to Asheville as a place to live, there was an 89% positive response. (similar to benchmark cities across the county.) The information in the chart digs a little deeper into the data and shows how Asheville compares against other benchmark cities.

The second pillar is Governance. This pillar relates to how well government meets the needs and expectations of its residents. In responding to overall quality of city services, 63% of

responses were positive. (similar to benchmark cities across the county.) Over 30 individual services were evaluated.

In summary, governance trends from 2008 to 2015 show (1) bus or transit services decreased from 2008 to 2015 from 45% to 33% (lower to benchmark cities across the county); (2) street repairs decreased from 2008 to 2015 from 27% to 20% (lower to benchmark cities across the county); (3) traffic enforcement decreased from 2008 to 2015 from 58% to 47% (lower to benchmark cities across the county); (4) emergency preparedness increased from 2008 to 2015 from 41% to 60% (similar to benchmark cities across the county); (5) natural area preservation increased from 2008 to 2015 from 20% to 47% (similar to benchmark cities across the county); and land use, planning and zoning increased from 2008 to 2015 from 16% to 31% (lower to benchmark cities across the county).

We couldn't cover all of them here and chose the following based on the greatest percent change in responses from 2008 to 2015.

The third pillar is Participation. Survey questions under this pillar relate to residents and their connections to the community and each other. 66% of residents responded positively when responding to feeling a sense of community (similar to benchmark cities across the county).

In addition to the standard questions in NRC's database. The City of Asheville opted to ask a few open ended questions.. She reviewed the summary of the responses for a question that asked respondents to rank the importance of the city investments. Eight facets of Community included: Mobility, Safety, Natural Environment, Economy, Built Environment, Recreation and Wellness, Education and Enrichment, and Community Engagement. Natural Environment and Economy were identified as priorities.

Many of the areas identified with favorable responses below national benchmarks and/or those areas trending down in favorable responses from 2008 and 2015 are areas where actions are being taken as demonstrated in the City of Asheville 2-year work plan. This includes areas in which City Council has current strategic goals as well as projects addressed in the operations section of the work plan. Staff will share this information with boards and commissions. Finally, in the realm of management strategies, she said that some items addressed in the City Manager's proposed budget.

D. LEGISLATIVE UPDATE

Mayor Manheimer highlighted Council on some the following current bills with potential impact on the City of Asheville budget: film tax credit; tiered historic preservation tax credit; renewable energy tax credit extension; funding for JDIG; no language on sales tax distribution; and graffiti vandalism punishment increase. She noted that the City's water lawsuit is pending with oral arguments next week.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO A PREVIOUSLY APPROVED CONDITIONAL ZONING FROM URBAN PLACE DISTRICT/CONDITIONAL ZONING TO URBAN PLACE DISTRICT/CONDITIONAL ZONING TO AMEND A PREVIOUSLY APPROVED MIXED-USE DEVELOPMENT PROJECT LOCATED AT 146 AND 99999 ROBERTS STREET

ORDINANCE NO. 4414 - ORDINANCE TO AMEND A PREVIOUSLY APPROVED CONDITIONAL ZONING FROM URBAN PLACE DISTRICT/CONDITIONAL ZONING TO URBAN PLACE DISTRICT/CONDITIONAL ZONING TO AMEND A PREVIOUSLY APPROVED

MIXED-USE DEVELOPMENT PROJECT LOCATED AT 146 AND 99999 ROBERTS STREET

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to amend a previously approved conditional zoning from Urban Place District/Conditional Zoning to Urban Place District/Conditional Zoning to amend a previously approved mixed-use development project located at 146 and 99999 Roberts Street. This public hearing was advertised on May 1 and 8, 2015. On May 12, 2015, this public hearing was continued to this date.

Ms. Bernstein said that, RAD Lofts, LLC, is requesting review of a conditional zoning request from Urban Place Conditional Zone (UP-CZ) to Urban Place Conditional Zone (UP-CZ), in accordance with Section 7-7-8 of the UDO, to amend a previously approved mixed-use development project. This is a revision to the earlier proposal, which was approved by City Council on October 22, 2013, under Ordinance No. 4241.

The project site at 146 Roberts Street consists of two separate parcels with a combined area of approximately 3.26 acres and frontage on Roberts Street, Clingman Avenue Extension and Park Avenue (north) in the River Arts District. The main parcel for development is 2.88 acres in size and the second parcel (0.379 acres) is located across Roberts Street to the south (PINs 9648.07-2183 & 9648.06-1953). The parcels (previously zoned CI and River) were conditionally rezoned to Urban Place by City Council in 2013.

The project area is currently vacant but was most recently the site of Dave Steel. All remaining structures (railroad tracks, walls and a small building) are to be removed.

Summary of Changes:

The applicant is proposing an amendment to the previous approval. The project is for the construction of a mixed-use development including residential, retail and office spaces and parking, both structured within the development as well as a separate surface lot.

- **Residential:** Plans indicate a total of 243 residential units with 146 1-bedroom and 97 2-bedroom units. This is an addition of 34 units or an approximately 16% increase. The previous approval was for 209 units.
- **Retail:** The retail component has decreased to 19,378 SF from 36,974 SF (a 55% reduction). The previous approval included retail spaces along both street frontages but now this use is only along Roberts Street.
- **Office**: The office component has decreased to 8,578 SF from 11,656 SF (26% reduction).
- **Access**: same as previous – 2-way driveway on each façade
- **Height**: similar – 5 levels with 2 parking below
- **Building Size**: The previous plan visually functioned as seven buildings above ground; the revision is just one building on the site.
- **Parking**: There is an increase from 338 spaces to 343 spaces (parking is proposed in the structured garage, surface lot across street & on-street spaces)
- **Pedestrian Activity:** The interior pedestrian promenade has been eliminated and streetscape activity is greatly decreased on Clingman Avenue Extension.

The design has been changed to one large building on the base of structured parking (rather than what previously appeared as seven buildings and two large pedestrian areas through the site). There are two levels of parking and five levels of retail/office/residential spaces but with the existing grade change on site, the overall height varies. The building is 60' on Clingman and 68' from Roberts Street.

The access is mostly unchanged from the previous proposal - there are two access

points into the site, one two-way driveway from Roberts Street and the other two-way driveway from Clingman Avenue. The parking lot has two single-access driveways off Roberts Street. New sidewalks are shown along both sides of Roberts Street (6.5' on the parking side and 10' minimum on the building side) as well as the project frontage on Clingman Avenue and range from 7.5 to 12 feet in width. Additionally, the project has been designed to incorporate areas of pedestrian amenities both at the corner of Clingman and Roberts; however the public pedestrian promenade through the site has been eliminated.

This project incorporates parking in several locations; there is a 343-space parking structure within the development *(previously 338 spaces)*; the separate parcel across Roberts Street to the south is shown as a standalone parking lot with 24 spaces (2 HC accessible) and approximately 8 on-street spaces will be delineated through streetscape enhancements *(previously 15)*. Bike parking is also included throughout the site. The increase in residential units balances out with the decrease in retail and office space to result in approximately 83 hourly spaces available to the public in the deck (not counting public spaces in the lot or on-street).

Landscaping is required on the site and includes street trees along all road frontages, building impact plantings, parking deck and dumpster screening and parking lot landscaping with a street buffer. Open space is also required in this zoning district, equal to 5% of the lot area. There is a requested condition related to landscaping.

Urban Place zoning includes specifics for building design and includes well-defined operable entrances at regular intervals, fenestration requirements for the ground and upper levels and treatments to break up long façades. The project design requires two conditions related to design and operational standards as detailed below.

Conditions: The current proposal includes the following conditions requested by the applicant that will need to be approved by City Council:

1. **Density** - The maximum density allowed by right in Urban Place is 64 units per acre, or 209 units for this site. The applicant is requesting an additional 34 units (a 16% increase - up to approximately 75 units per acre). Five percent of the units will be designated as affordable by the City's standards.

2. **Building Size –** For buildings exceeding three stories, the maximum footprint is limited to 50,000 square feet with a maximum gross floor area of 200,000. The proposed footprint of the building is 82,531 SF (an increase of 65%) and the gross floor area is 421,489 SF (an increase of 111%). Similarly with the previous proposal, this condition is a result of building upon a base of structured parking.

3. **Sidewalks** - Sidewalks in the Urban Place District are required to be a minimum of 10' in width. Sidewalks are shown down to 6.5' along the surface parking on Roberts Street and between 7.5' - 12' along Clingman Avenue. There is an existing 5' sidewalk along Park Avenue which will remain.

4. **Landscaping** – The applicant is requesting to greatly reduce parking deck landscaping requirements based on the existing site conditions where a grade change effectively shields the exposed deck levels and creates challenges to planting.

5. **Setback** on Roberts Street - The maximum front setback is 15' and there is an area along Roberts Street that exceeds this standard.

6. **Fenestration/Windows and Entrances** - The plans do not comply with requirements in the design and operational standards section of the code relating to entrances (to be placed at regular intervals not exceeding 60') along both frontages as well as the requirement for windows to be evenly distributed at the pedestrian level across the length

of the facade on the first floor of the building and make up at least 40% of the first floor area along Clingman (due to the parking structure and "brownstone" style access).

	UDO Requirement	Applicant Request	Condition
Distance between entrances	Well defined operable entrances required at intervals not exceeding 60 feet apart	Roberts Street: one instance of 85 feet between entrances Clingman Ext: 102'7.5" from end of building to door; 153' 3.5" from door to driveway opening heading north; two residential stair intervals spaced 64'1.5"	Roberts Street: requesting 25 feet additional distance Clingman Ext: requesting up to 93' 3.5" additional distance between entrances
Even distribution of windows and percent of fenestration	Windows required to be evenly distributed across the length of the façade and to make up 40% of the street facing façade	Clingman only: 22% provided from Roberts Street corner to parking entrance; 23% provided from parking entrance to northern end of building	Clingman only: requesting a reduction of up to 18% less of the fenestration requirement

The Urban Place zoning district was created to foster "higher density, mixed-use development that is economically viable, pedestrian oriented, visually attractive and contributing to the place making character of the City...to enhance the streetscape and offer a wide range of complementary land uses and employment opportunities... [and] intended in areas where the appearance of the built environment is important to the vitality of the area." Additionally, the zoning district was created with areas along the French Broad River in mind. Staff believes that this location in the River Arts District is ideal for Urban Place zoning. The proposed amendment is increasing residential density and decreasing commercial area, which are acceptable under the district and goals for the area; however, the design has greatly lessened the level of pedestrian interaction and activity along Clingman Avenue Extension which is concerning to staff.

This proposal was approved with conditions by the Technical Review Committee on March 16, 2015; recommended for approval by the Planning & Design Review Committee on March 11, 2015, and approved for design by the Asheville Area Riverfront Redevelopment Commission on March 12th. The Planning & Zoning Commission reviewed this proposal at their meeting on April 1, 2015, and voted unanimously to support this request, including the requested conditions as noted above, as well as with a condition that the sidewalk on the building side of Roberts Street be widened to 10 feet. The applicant agreed to make this revision and the current plans reflect the change.

Staff has received comment from representatives of the River Arts District Business Association regarding the need and high demand for parking in the general area, both on-street spaces as well as in surface lots and structures. There have been ongoing discussions regarding the potential to make Roberts Street and/or Clingman Avenue Extension one-way, which could result in more on-street parking spaces.

A Level II project was recently approved in the vicinity (95 Roberts Street, BP 14-16524).

This type of mixed-use, high density development is ideal (and intended) for areas such as the River Arts District and is expected to complement the adjacent shops, studios and uses and add to the fabric of the District in a valuable way. Streetscape improvements will greatly improve the pedestrian experience along Roberts Street and Clingman Avenue and the addition of parking in several locations will be a benefit to the area. While the building is taller and significantly larger than most in the immediate area, the scale of the building is mitigated through façade planes, roof line differentiation and changes in materials.

This site was previously developed and has a +/- 35 foot grade change from Park Avenue down to the Roberts Street / Clingman Avenue intersection with a steep bank along the northern end. The proposal focuses development activity (retail spaces, pedestrian plaza, parking garage entrances) down towards the previously graded areas and leaves the rear bank intact, more or less, functioning as the "back" of the site. Working with the grade changes on the parcel, the structured parking is only "exposed" along the rear of the site where there is no public interaction, integrating the design into the natural and topographic features on the parcel.

The design standards in Urban Place zoning are crafted to promote activity along the ground level and this amendment has a greatly reduced level of activity along the Clingman Avenue Extension façade. The applicant has indicated that they will create an active pedestrian feel along this corridor by the inclusion of street furniture, public art attached to the building, interpretive signage regarding the history of the area and creative screening on the parking deck openings.

This proposal is aligned with numerous aspects of the *City Development Plan 2025* including smart growth policies such as mixed-use buildings; higher density infill development; promoting a sustainable pattern (parking structured underneath building) and strengthening neighborhoods close to downtown (pg. 31). Land use and site planning goals stress encouraging "the mixing of residential and commercial development to increase walkability and reduce automobile dependence" and siting uses close to public transit and bicycle paths. The streetscape improvements will aid in safety for pedestrians in this highly-trafficked area and the additional parking in the deck, on-street and the small surface lot will be helpful. Lastly, the *Plan* addresses quality of life as an economic development incentive and the River Arts District is certainly a target area for enhancing cultural, residential and commercial activity for residents as well as tourists.

The WECAN Master Plan (2008) recommends infill development within the River Arts District, specifically for a mix of uses along Roberts Street with retail at the ground level and residential above.

Based on the above findings and the analysis provided in the staff report and as stated in the recommendation below, staff finds this request to be reasonable, consistent with the comprehensive plan and within the best public interest.

Considerations:

- The requested conditions exceed otherwise applicable structure size, density and setback maximums and reduce standards for sidewalk width, fenestration and landscaping.
- City goals support mixed-use, infill development, especially providing residential uses in a walkable location proximate to transit and the Central Business District.
- Streetscape improvements will enhance the pedestrian experience along Roberts Street and Clingman Avenue Extension.
- Urban Place zoning sets forth specific design and operational standards to ensure a development that will relate to and enhance activity at the street level. The amendment is problematic with meeting these goals along the Clingman Avenue Extension façade, however design elements proposed by the applicant should mitigate this somewhat.

243 residential units, an increase of 34 units. The developer will continue to provide 5% affordable units, which increases the number of affordable units by one unit, to 12 units. The percentage of workforce units does not change, while the number of workforce units increases to 231. He did note that in the conditional zoning, the amended condition provided that five percent of the units will be designated as affordable by the City's standards; and the remaining 95% of the units will be leased at or below the City's rates for workforce housing for the first full year of operation and following the first year, rental rates can be increased in an amount not to exceed 3% per year as indicated, per unit, for a period of ten years. At the end of the ten year period, this Condition will no longer apply.

Concurrently, the developer proposes to reduce the commercial square footage by approximately 20,000 square feet, reducing the total square footage to approximately 30,000 square feet. This reduces the total commercial space to 16% of the total development.

The developer requests that the Land Use Incentive Grant, as awarded by City Council, remain unchanged.

The project meets the following 2014-15 Strategic Plan Goals as follows: (1) *Economic Growth and Sustainability:* The project contributes significantly to the objective of supporting a mixed use neighborhoods in the River Arts District; and (2*) Affordability and Economic Mobility*: the project creates locationally efficient affordable and workforce housing. The project also meets applicable Master Plans in the following ways: (1) The project supports the goals of the *2009 City Transit Master Plan* by its location "along major transit corridors..." ; and (2) The project supports the goals of the *2009 Sustainability Management Plan*, which calls for the City to encourage Transit Oriented Development.

Exemption Request:

Fiscal Impact: Estimated maximum value of Land Use Incentive: The current assessed value of the property is $501,800 (land only). The developer's estimate of completed project taxable value is $40,000,000, and has estimated the value on which the LUIG is made at 80% of that ($32,000,000). The current annual city tax, based on current assessed value, is $2,308. The annual estimated city tax post completion, based on the developer's estimate of value is $184,000. Thus, the estimated annual Land Use Incentive Grant would be $144,891.72, the exact amount to be determined by the length, in years, of the grant award, and the actual assessed value of the development upon completion. If approved for 5 years, the estimated Grant would be $724,458.60.

The estimated amount of fees payable for Zoning Permit, Building Permit, Driveway Permit, Grading Permit, Plan Review Fees and Water Service Connection Fee is $81,806.40. The value of each 10% of the fee rebate would be $8,181. The exact amount would be determined by the percentage of fee rebate awarded as part of the Land Use Incentive Grant. If approved at the 50 point level, the fee rebate would be $40,903.20.

The project is also eligible for a State Brownfield Grant, which would provide a five year sliding grant equal to approximately $823,000. This grant is also calculated from the taxes owed by the project, and is applicable to both state and county taxes. The developer requests that the City's LUIG be applied to the amount not covered by the Brownfield Grant over its five year period, as opposed to equal payments for the requested five-year grant. This would result in a grant disbursement that would increase annually over the five year term and may lead to an extension of the grant period until the total maximum grant amount is paid. The total payout period is estimate to be eight years. However, the amount of the grant would not change, only the time frame for payment of it.

Staff recommend that Council approve an amendment to the Land Use Incentive Grant, as requested, and approve a five-year grant and a 50% fee rebate Land Use Incentive Grant for 146 Roberts Street (RAD Lofts).

In response to Councilwoman Wisler, Mr. Staudinger said that the total land use incentive grant for $144,891 will not change, since the estimate of the project value is the same.

Councilman Bothwell noted that the original land use incentive grant varied from the policy of 35 public benefit points.

In response to Councilman Smith, Mr. Staudinger said that as of today, the project has 35 public benefit points as follows: 5 points for 5% of affordable housing; 15 points for greater than 75% workforce housing; and 20 points for the energy star, the 20% non-residential, Sustainability Bonus area, and the brownfield redevelopment. But, because the total commercial space was decreased to 16%, there is a reduction of 5 points for a total of 35 points. He did note that the project does meet all of the eligibility requirements of the policy.

City Attorney Currin said that Council does have the flexibility under the policy to award more or less points, depending on the project.

Councilman Smith acknowledged that Council agrees that the land use incentive policy is not perfect and that staff will be bringing forward a revised policy in the near future for more predictability in the process.

Mayor Manheimer felt we need to allocate more points for affordability housing. As a Council and community we have learned that we value affordable housing more than the ratio that is reflected in this policy. This is an important policy for the transformation of the River Arts District. We need to welcome this kind of growth and this is the kind of project we were hoping to see incentivized through our land use incentive policy.

Councilman Bothwell felt it was best to be predictable when dealing with developers and he felt we need to adhere to the rules that are currently in place. He acknowledged that the policy might need to be revised, but Council should not be deviating from it over and over. Since the current policy would result in 35 points, he would not be able to support any points above that.

Mayor Manheimer opened the public hearing at 6:58 p.m. and when no one spoke, she closed the public hearing at 6:58 p.m.

Because Council agrees that the policy needs to be revisited and because he felt 35 points is an arbitrary number, Councilman Davis moved to approve an amendment to the Land Use Incentive Grant, with 50 points, and approve a five-year grant and a 50% fee rebate Land Use Incentive Grant for 146 Roberts Street (RAD Lofts).

Councilwoman Wisler and Councilman Smith both supported awarding 35 points.

Councilman Davis withdrew his motion.

Councilman Pelly then moved to approve an amendment to the Land Use Incentive Grant with 40 points, for four years, for a total of $579,653. This motion was seconded by Vice-Mayor Hunt and carried on a 5-2 vote, with Councilman Bothwell and Councilman Smith voting "no."

RESOLUTION BOOK NO. 37 – PAGE 136

C. PUBLIC HEARING TO CONSIDER A LAND USE INCENTIVE GRANT FOR RIVER MILLS LOFT LOCATED AT 300 MILL RIVER DRIVE

Staff recommends approval of the proposed conditional zoning request to amend a previously approved project for the construction of a mixed-use development, including the conditions as proposed by the applicant as detailed above. Staff recommends the inclusion of conditions as suggested by the River District Design Review Committee to better activate the blank section of brick façade along the street level of Clingman Avenue Extension (included in Exhibit B.1, No. 14).

Mr. W. Louis Bissette, attorney for the applicant, said that this will be a key to the redevelopment of the River Arts District. The developer has agreed to all conditions, with one exception - the developer agreed to 5% of the units being designated as affordable by the City standards, but because of their financing, the developer has requested an allowance of up to a 3% increase in the workforce housing allocation rents per year.

There was considerable discussion regarding the 3% increase in the workforce housing allocation rents per year. Assistant Community & Economic Development Director Jeff Staudinger felt that giving the developer the potential to increase those rents to meet rising costs within the workforce category is a reasonable approach to looking this pro forma in this project. He said it's not to say that the developer would increase those rents 3% on an annual basis, but the ability to do so is an essential element of obtaining the financing for the project.

In response to Councilman Smith, Mr. Staudinger said that workforce rents for a one-bedroom unit, including utilities - $1,344/month; and for a two-bedroom unit, including utilities - $1,513/month. He said that the developer's rents in the pro formas he has seen were below those workforce rents upon initiation.

After Mr. Harry Pilos, developer, explained his need for the potential 3% increase, Mr. Bissette said that the workforce housing for year one (95% of the units) will be at or below the City's standards for workforce housing, and then beginning in year two, the developer is asking for the potential 3% increase each year for the workforce units up to 10 years, after which time the condition will no longer be applicable.

Mayor Manheimer opened the public hearing at 6:42 p.m. and when no one spoke, she closed the public hearing at 6:42 p.m.

Councilman Smith said that this is an ambitious project and there is a lot to support, especially with the brownfield site, but regarding the incentive numbers, when it comes down to the affordability piece, we are talking about going over and above maximum density with 12 affordable units. We have approved over the past years thousands of apartment units in the City with fewer than a 100 of those mixed-income developments having meaningful affordable units.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Hunt moved to recommend approval of the conditional zoning request for RAD Lofts, LLC for property located at 146 Roberts Street from Urban Place Conditional Zone (UP-CZ) to Urban Place Conditional Zone (UP-CZ) including the requested conditions and find that the request is reasonable, is in the public interest and is consistent with the Comprehensive Plan and other adopted plans in that (1) The proposal supports the strategies found in the City's comprehensive plan on encouraging mixed-use development, especially in areas walkable to downtown and proximate to transit; (2) The proposal supports the goal found in the City's comprehensive plan of pursuing more intense infill development where appropriate; (3) The design and uses create a pedestrian-oriented streetscape along Roberts Street and part of Clingman Avenue Extension; and (4) an amendment to the Condition No. 8 providing that five percent of the units will be designated as affordable by the City's standards; and the remaining 95% of the units will be leased at or below the City's rates for workforce housing for the first full year of operation and following the first year, rental rates can be increased in an amount not to

exceed 3% per year as indicated, per unit, for a period of ten years. At the end of the ten year period, this Condition will no longer apply. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 29 – PAGE 479

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE LAND USE INCENTIVE GRANT FOR 146 ROBERTS STREET (RAD LOFTS)

RESOLUTION NO. 15-101 - RESOLUTION APPROVING AN AMENDMENT TO THE LAND USE INCENTIVE GRANT FOR 146 ROBERTS STREET (RAD LOFTS)

Assistant Director of Community & Economic Development Jeff Staudinger said that this is the consideration of a resolution to amend the land use incentive grant for 146 Roberts Street (RAD Lofts) for a five-year grant and a 50% fee rebate. This public hearing was advertised on May 15, 2015.

The owners/developers of RAD Lofts have applied for an amendment to their Land Use Incentive Grant for 146 Roberts Street (RAD Lofts).

On August 26, 2014, City Council approved a Land use Incentive Grant (LUIG) for the RAD Lofts development. In summary, the RAD Lofts LLC proposed a 209 unit residential, 48,500 square foot commercial development on the 2.88 acre site formerly home to the Dave Steel Company, located at the intersection of Roberts Street and Clingman Extension in the River Arts District of Asheville. The developer estimated a total development cost of $52 million. The project consisted of 209 residential rental apartments, a two story parking deck with 356 parking spaces, and street front retail spaces, live work spaces and second floor office space.

Council approved a five-year (50 points) LUIG, based on the following:

Eligibility Requirements:

- Equity: A 20% equity contribution is required. The project developers indicate they will meet this requirement;
- Energy Star Certification: The developers indicate the project will achieve Energy Star certification.
- Location: The project is located within 1/8 of a mile of a designated major transportation corridor (Riverside Drive).

Public Benefit:

Council awarded 50 Public Benefit Elements points, as follows:

- Affordable Housing units: 10 points for providing 5% (11 units) affordable residential units;
- Workforce Housing units: 20 points for providing 95% (231 units), workforce residential units.
- Green Building/Energy: *Energy Star certified*, 5 points.
- 20% non-residential, 5 points.
- Within the Sustainability Bonus area, 5 points.
- Brownfield Redevelopment, 5 point.

The developer has slightly altered the composition of the project, and needs an amended Land Use Incentive Grant approval from City Council. The proposed development now consists of

RESOLUTION NO. 15-102 - RESOLUTION WAIVING THE LOCATION ELIGIBILITY REQUIREMENTS AND APPROVING A LAND USE INCENTIVE GRANT FOR RIVER MILLS LOFT LOCATE DAT 300 MILL RIVER DRIVE

Assistant Director of Community & Economic Development Jeff Staudinger said that this is the consideration of a resolution to waive the location eligibility requirements and approve a land use incentive grant for River Mills Lofts, located at 300 Mill River Drive. This public hearing was advertised on May 15, 2015.

River Mill Lofts LLC, led by Pace Burt, seeks to develop the 9.52 acre site at 300 Mill River Drive The site is located at the intersection of Thompson Street and Stoner Street, east of Biltmore Village. The developer estimates a total development cost of $25 million. The project consists of (1) 254 residential rental apartments (248 two-bedroom apartments and 6 three-bedroom apartments), in two buildings; and (2) 8,000 square feet of commercial space, with 4,000 square feet located in each building.

The project, as presented to staff, appears to meet the following Eligibility Requirements,

- Equity: A 20% equity contribution is required. The project developer indicates he will contribute at least 20% equity to the project.
- Energy Star Certification: The developer indicates the project will achieve Energy Star certification.
- Residential development: The development consists of at least two residential units.
- Location: The project is located within the City of Asheville city limits.

The project is not located within 1/4 of a mile of a designated major transportation corridor (Biltmore Avenue/Hendersonville Road). The project is located .4 mile from Biltmore Avenue. The developer requests a waiver of this policy eligibility requirement.

Public Benefit: The project proposes the following Public Benefit Elements:

- Green Building/Energy: Energy Star certified, 5 points.
- Affordable Housing: 18 units, which is 7% of the total units. The developer requests 10 points.
- Workforce Housing units: 216 units, which is 85% of total units. The developer requests 15 points.
- Mixed Use Development/Sustainability/Brownfield: The developer requests 20 points. The developer does not qualify for these points based upon existing policy. The develop asks for consideration of the following:
    1. The project is a mixed-use development that will be a pioneer for "early adapter mixed-use project."
    2. The project meets City-goals of sustainability- it requires no new utility infrastructure; it is served adequately by the existing traffic systems; it will use "best management practices (BMPs) in treatment of storm water runoff; it will enhance public access to the Swannanoa River.

The developer has scored the project with 50 points, and requests a 5 year Land Use Incentive Grant.

According to LUIP Policy, the project qualifies for 25 points:

- Green Building/Energy: Energy Star certified, 5 points
- Affordable Housing: 18 units, which is 7% of the total units. 5 points.
- Workforce Housing units: 216 units, which is 85% of total units. 15 points.

This assumes that the project is deemed eligible by Council. A waiver of the eligibility requirements has been requested by the developer. As mentioned above, the project is .4 miles from a major commercial corridor named in the policy (Biltmore Avenue/Hendersonville Road). Rationale for waiver of the policy includes:

- The development and others proposed for that area have the potential to create significant new transit demand. Over 500 units are now being planned for this area. Three transit routes are with .4 mile of the site.
- A multi-model route, via the Wilma Dykeman Riverway, is master-planned contiguous to the site.
- Therefore, the location of the project meets the goals of the program, and a waiver of the eligibility requirement is justifiable.

The project meets the following 2014-15 Strategic Plan Goals as follows: (1) *Economic Growth and Financial Sustainability:* The project Invests and leverages investment in community infrastructure; and creates economic development and community investment opportunities through partnerships, planning and incentives. (2*) Affordability and Economic Mobility:* The project expands Asheville's supply of quality, affordable homes for current and future residents. This proposal also aligns with the *Asheville City Development Plan 2025* in several areas. Smart Growth policies encourage mixed-use developments and higher-density residential infill with an emphasis on locating projects in an area walkable to amenities and proximate to bike paths. Infill development along transit corridors is also highlighted but this site is a little over 2,000 feet to three routes that cross in Biltmore Village. The plan also supports projects that design landscapes to absorb stormwater using bio-swales and natural stormwater filters. Affordable housing options are highlighted throughout the Plan as a strong community need.

The area is included in the planning for the Wilma Dykeman Riverway Master Plan and infill development, recreation amenities and roadway improvements are a part of that proposal. Planning for roadways has occurred in the River Arts District area but has not proceeded to this section of the river at this time. The proposed development though seems to fit in with the intent of the Dykeman plan with the inclusion of the river yard and the wide sidewalk along Thompson Street.

Pros:

- The proposed development will provide 18 units of housing affordable for ten years, and 216 units of workforce housing.
- The proposed development is located close to jobs and services.
- The proposed development is located within the Wilma Dykeman Riverway corridor, and proposes public benefit through alignment with planned multi-modal transportation ways.

Cons:

- The development does not meet with minimum policy requirement to be located with .25 miles of a named transportation corridor.
- The development is not currently connected by sidewalk or pathway to Biltmore Avenue.
- The proposal creates 18 units of affordable housing, 7 units short of the 25 units that would yield a 10% affordable composition.

Estimated maximum value of Land Use Incentive: The current assessed value of the property is $705,000 (land only). The developer's estimate of completed project taxable value is $25,000,000. The current annual city tax, based on current assessed value, is $3,243. The annual estimated city tax post completion, based on the developer's estimate of value is $115,000. Thus, the estimated annual Land Use Incentive Grant would be $111,757, the exact amount to be determined by the length, in years, of the grant award, and the actual assessed

value of the development upon completion. If approved for 5 years, the estimated Grant would be $558,785. If approved for three years, the amount would be $335,271.

300 Mill River Drive	
Current Value	$ 705,000
Current Tax	$ 3,243
Est Value	$ 25,000,000
Minus current value	$ 24,295,000
Est Tax	$ 111,757
Value of LUIG for 5 years	$ 558,785
Value of LUIG for 3 years	$ 335,271

The estimated amount of fees payable for Zoning Permit, Building Permit, Driveway Permit, Grading Permit, Plan Review Fees and Water Service Connection Fee is $50,000. The value of each 10% of the fee rebate would be $5,000. The exact amount would be determined by the percentage of fee rebate awarded as part of the Land Use Incentive Grant. If approved at the 50 point level, the fee rebate would be $25,000; at a three year level, $15,000.

The Housing and Community Development Committee reviewed the proposal and discussed it with Pace Burt at their January 20, 2015, meeting. Both the Committee and developer agreed at that meeting to take no action. The developer has since requested that the proposal as described above be moved forward to Council. The Housing and Community Development Committee again reviewed the proposal at their May 18, 2015, meeting and decided to move the proposal forward to City Council without a recommendation regarding either the waiver of the location eligibility requirement or approval of the grant.

Staff recommends that Council approve a waiver of the location eligibility requirements, and approve a three-year Land Use Incentive Grant for the River Mill Lofts development.

Vice-Mayor Hunt noted that a future greenway along Swannanoa River Road is on the draft N.C. Dept. of Transportation Improvement Plan. That would be the opportunity the community has to make sure that bikeability and walkability is included. There is not a lot of room to squeeze a greenway in, so it would have to be integrated with the State's project.

Councilman Bothwell said that he would have to oppose this grant because it is an exception to our land use incentive grant policy.

Councilman Smith said that at the Housing & Community Development Committee meeting there was discussion on whether or not to waive the eligibility requirement. He would lean towards waiving that because there are so many options nearby and because of the future transportation plan in that area. Regarding the points, he felt that he could support 25 points.

When Vice-Mayor Hunt asked when staff would be bringing forward a revised policy on the land use incentive grant, City Attorney Currin said that a re-write could be as soon as two months. Mr. Staudinger also noted that their plan is to bring it to the Housing & Community Development Committee and the Planning & Economic Development Committee in June for review prior to City Council consideration.

Mr. Clay Mooney, landscape architect representing the developer, explained how they arrived at the points for the public benefit elements. He asked for their support of the waiver of the eligibility requirements as they are at the mercy of transportation, noting they are only 800 feet from a major commercial corridor. He said this is a pioneer development in the area. He

said the developer is working diligently to accommodate affordable and workforce housing in the project, but financing is a reality all developers must face. He clarified and explained their request as follows: (1) Workforce Housing units - The developer is requesting 20 points, not 15 as noted by Mr. Staudinger; and (2) Mixed Use Development/Sustainability/ Brownfield - The developer is requesting 15 points, not 20 as noted by Mr. Staudinger. The developer feels that the 50 points requested is the only means which he could provide the affordable and workforce housing. He said that if through the re-working of the land use incentive grant policy that it becomes such that they might be able to achieve the 50 points, they are willing to voluntarily come back (within a limited timeframe) and try to work something out. He noted that one of the conditions in the conditional use permit process was to proceed through the land use incentive grant process. He said that part of the land use incentive grant guidelines is that no project that has pulled its building permit would be able to apply. He hoped to get started as soon as all permits were in hand, but from the building permit standpoint they may be 4 months away.

In response to Councilman Bothwell, City Attorney Currin said that the policy reads that unless granted an exemption from City Council, no grant will be allowed under this policy for projects which have received building permits.

Mayor Manheimer opened the public hearing at 7:27 p.m., and when no one spoke, she closed the public hearing at 7:27 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Wisler moved to approve a waiver of the location eligibility requirements, and approve 30 points (three-year Land Use Incentive Grant) in the amount of $335,271, for the River Mill Lofts development, for the following reasons: (1) The proposed development will provide 18 units of housing affordable for ten years, and 216 units of workforce housing; (2) The proposed development is located close to jobs and services; and (3) The proposed development is located within the Wilma Dykeman Riverway corridor, and proposes public benefit through alignment with planned multi-modal transportation ways. This motion was seconded by Councilman Smith and carried on a 6-1 vote, with Councilman Bothwell voting "no."

RESOLUTION BOOK NO. 37 – PAGE 139

D. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING FOR PROPERTY LOCATED AT 53 LOGAN CIRCLE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16/CZ RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION OF 16 TOWNHOME UNITS, WITH CONDITIONS REGARDING SETBACKS, SIDEWALKS AND INFRASTRUCTURE IMPROVEMENTS

ORDINANCE NO. 4415 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 53 LOGAN CIRCLE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16/CZ RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION OF 16 TOWNHOME UNITS, WITH CONDITIONS REGARDING SETBACKS, SIDEWALKS AND INFRASTRUCTURE IMPROVEMENTS

Urban Planner Sasha Vrtunski said that this is the consideration of an ordinance to conditionally zone property located at 53 Logan Circle from RM-8 Residential Multi-Family Medium Density District to RM-16/CZ Residential Multi-Family High Density District/Conditional Zoning for the construction of 16 townhome units, with conditions regarding to setbacks,

sidewalks and infrastructure improvements. This public hearing was advertised on May 15 and 22, 2015.

She said the applicant is requesting conditional zoning from RM-8 (Residential Multi-Family Medium Density) to RM-16 CZ (Residential Multi-Family High Density Conditional Zoning District) for a single parcel located at 53 Logan Circle to allow for the construction of 16 townhomes. The proposal includes conditions relating to setbacks, sidewalks and infrastructure improvements.

The site is a 1.054 acre site (PIN 9638.87-3150) on Craven Street and is bordered to the west by Georgia Street and is across the street from the New Belgium Brewery. There is a grade change on the site with a steep hill toward the middle of the site that curves parallel to the streets. The upper portion of the site fronts on Logan Circle and includes 53 Logan Circle. Adjacent parcels are zoned RM-8 to the East, West and South. Across Craven Street to the North, New Belgium Brewery property is zoned River.

Currently there is one house occupied by the owners/applicants on the site, and one block and frame building on the corner of Craven and Georgia Streets.

The applicants/owners, Wanda and Joel Wingerter, are proposing the construction of 16 townhomes on just over 1 acre of land across the street from the New Belgium Brewery. There are two clusters of four units facing Craven Street, all with 2 bedrooms each. Along Georgia Street there are four units in one cluster, all with 2 bedrooms each. From Logan Circle, there are two clusters of two units, with 3 bedrooms each. All of the units are 3 stories tall with a maximum height of 37 feet above ground level. This height meets the standard for all residential districts.

In the middle of the site is a woodland garden used as a common area with landscaping and a 4 foot mulched path. There are several retaining walls on the site, the tallest being 16 feet high and located on the northeast corner of the site. The majority of the steep areas of the site are left as undisturbed open space.

Vehicular access to the site is proposed via all three street frontages. A driveway on Logan Circle accesses the upper four townhomes; townhomes on Georgia Street are proposed with individual driveways and garages, and the eight townhomes on Craven Street have pedestrian access on Craven Street, and parking areas to the rear and side.

The proposed project meets parking requirements with 1 space per 2 bedroom unit supplied either to the side, rear or in front garages. The 3 bedroom units have 1 space in a front garage and a second space in a parking area to the side. The project proposes to have 7 on-street parallel spaces on Craven Street.

The project will improve Georgia Street to be a 20 foot paved surface and a six-foot sidewalk will be provided along Georgia and Craven Streets. Staff is working with the applicants to coordinate Craven Street improvements with improvements needed for this project. . The applicants have proposed to rename Georgia Street to Brewery River Row, which will be handled either through Final TRC or a separate process.

Landscaping is required for this project and includes street trees, building impact and retaining wall landscaping and tree save areas. Street trees are provided along Georgia and Craven Streets in bulbouts and in front of the townhome units.

The proposal meets and exceeds open space requirements. Plans show 9185 sf of open space that has less than a 25% slope, and an additional 2812 sf of open space that has a slope greater than 25%. The total requirement for this development is 8000 sf.

This proposal was approved with conditions by the Technical Review Committee on March 16, 2015, and requires review by the City Council and Final TRC prior to zoning approval. Many of the TRC comments have been addressed in the plans that are before City Council.

The Asheville Planning and Zoning Commission reviewed this proposal at a meeting on April 1, 2015. At this meeting, the commission voted unanimously (6-0) to recommend approval of this conditional zoning to Asheville City Council with the conditions as presented (Exhibit B-1).

The applicant met with neighbors at the March 13, 2015 meeting of the East West Asheville Neighborhood Association (EWANA). At this time, staff has received two comments from neighbors on Logan Circle that they are concerned about townhomes on the Logan Circle side, but not other concerns from neighbors. The owner recently met with one of these neighbors and showed them revised architectural elevations for the Logan Circle townhomes, and the neighbor was pleased with the changes.

The applicant is proposing to conditionally rezone the site from RM-8 to RM-16 in order to achieve a higher density on the site. The parcel is outside of the River Design review area.

Current zoning to the east, west and south of the site is currently RM-8. The property is directly across from the New Belgium Brewery project on Craven Street. Staff anticipates increased visitors to the area, and Craven Street is currently being rebuilt with improved widths, bike lanes and sidewalks. Development with higher density is more appropriate along this corridor than single family detached housing. Adjacent property owners on Craven Street to the west have indicated that they are interested in a more dense development as well.

Townhomes are a suitable use in the zoning district as well as in this location. The requested conditions for reduced setbacks are evaluated on a case-by-case basis and while they may not be appropriate for the portion of the site deeper within the neighborhood, they are less objectionable given the context of this location.

On the Logan Circle portion of the site, the properties to either side all contain single-family houses that are two and three story structures. The townhomes will be set somewhat back with an access driveway, and their height will be compatible with these adjacent structures. The setback and greenspace in front will keep the new buildings from overwhelming the other houses on Logan Circle. The architecture of these townhomes has been revised to be more compatible with the neighboring homes.

The proposal supports strategies found in the *City Development Plan 2025* of allowing more intense infill development where appropriate and enhancing the pedestrian-environment. The project will provide sidewalk along Craven and Georgia Streets.

The proposal supports strategies found in the *City Development Plan 2025* of infill development occurring in areas with existing infrastructure, and where alternative transportation routes are available. The project is within a quarter mile of Haywood Road (Transit line) and will be very close to the greenway system that will run along the west side of the French Broad River.

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff finds this request to be reasonable.

Considerations:

- Infill development furthers the goals and objectives of the comprehensive plan.
- Besides the requested setbacks, the proposal is meeting the requirements of the RM-16 zoning district.
- Public investment in the Craven Street infrastructure and nearby greenways anticipate an increased urbanization of this corridor, and this higher density project will be compatible with the area.

- The applicant is working with the City to ensure that the Craven Street project is compatible with their plans.

Staff recommends approval of the proposed conditional zoning to allow for the construction of the 16 townhomes.

Mr. Gerald Green, representing the project team, stated how the developer worked hard to blend the townhouse development into the neighborhood, noting that the project developers currently live on the site, and will live on the site after completion. He noted Ms. Vrtunski showed images on Logan Street where they changed to a craftsman-style design to blend in with that community, and a more modern industrial style along Craven and George Streets to blend in with the brewery. He hoped that staff will look at possible ordinance amendments to allow townhome developments along certain streets in those areas that are appropriate. They will benefit the community by providing housing and contributions to the public infrastructure. Regarding costs, these units will be market rates. They are excited to be a part of the improvements in the River Arts District.

Councilman Smith said that townhome developments are an efficient use of space.

Mayor Manheimer opened the public hearing at 7:40 p.m.

An area resident on Logan Avenue is concerned that the top part of Logan Avenue is a single family neighborhood and this development will radically change that footprint.

Mayor Manheimer closed the public hearing at 7:42 p.m.

Councilman Pelly understood the concern of the houses off Logan Avenue, but felt this will be a relatively small change from the overall character of the neighborhood.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell moved to approve the conditional zoning request of Asheville Property, Inc. for property located at 53 Logan Circle from RM-8 (Residential Multi-Family Medium Density District) to RM-16 CZ (Residential Multi-Family High Density District Conditional Zoning) including the requested reduced setbacks on Georgia and Craven Streets, and find that the request is reasonable, is in the public interest, and is consistent with the Comprehensive Plan and other adopted plans in that: (1) The proposal supports the goal found in the City's comprehensive plan of pursuing more intense infill development where appropriate; and (2) The proposal supports the goal found in the City's comprehensive plan of infill development that takes advantage of existing infrastructure and is close to transit and alternative transportation options. This motion was seconded by Councilwoman Wisler and carried unanimously.

ORDINANCE BOOK NO. 29 – PAGE 487

E. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED AT 29 OAK HILL DRIVE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RM-16/CZ RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION OF 72 RESIDENTIAL UNITS IN THREE BUILDINGS WITH ASSOCIATED INFRASTRUCTURE, AND CONDITIONS FOR REDUCED BUILDING SETBACKS, REDUCED PARKING COUNTS, AND INCREASE IN RESIDENTIAL DENSITY

At the request of City staff, and concurrence by the developer, Councilman Pelly moved to continue this public hearing until June 9, 2015. This motion was seconded by Councilwoman Wisler and carried unanimously.

F. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ARTICLE 13 TO EXPAND OPTIONS FOR REAL ESTATE AND CONSTRUCTION SIGNAGE

ORDINANCE NO. 4416- ORDINANCE TO AMEND ARTICLE 13 THE UNIFIED DEVELOPMENT ORDINANCE TO EXPAND OPTIONS FOR REAL ESTATE AND CONSTRUCTION SIGNAGE

Development Services Process Manager Chris Collins said that this is the consideration of an ordinance to amend Article 13 of the Unified Development Ordinance to increase the current allowances for real estate and construction signage. This public hearing was advertised on May 15 and 22, 2015.

In December of 2014, City Zoning Enforcement staff served a notice of violation (NOV) to the City Centre and Hilton Garden Inn projects for construction signage in excess of that allowed by Section 7-13-2(d)(7) at 301 and 309 College Street. The NOV was generated due to the fact that the above listed construction projects are currently displaying construction signage that is in violation of the UDO allowance of two (2) signs with a maximum of 32 square feet in area per sign face with a required ten (10) foot setback from the right-of-way.

In response to the serving of this NOV, the developer met with City staff and subsequently submitted a formal request for a wording amendment to Section 7-13-2(d)(7) to increase the allowed number of and size of construction signs when attached to construction fence screening materials. The request noted the following benefits of allowing further construction signage when attached to screening materials:

- Screening attached to construction fencing makes for a much better appearance to the public; and
- This type of signage assists in vendor and delivery identification for construction sites; and
- The ability to advertise on construction screening helps mitigate the cost to developers of installing the screening material itself.

In receipt of this request which is centered on an active construction site within the Central Business District (CBD) zoning district, staff prepared a report and proposed wording amendment for presentation to the City's Downtown Commission. On February 13, 2015, staff presented the option of allowing unlimited 32 square foot sign panels on construction fencing screening materials when said panels were spaced at least 50 linear feet apart and eliminated the requirement of a 10 foot setback for this type of signage within the CBD. The majority of the Downtown Commission members demonstrated support for increasing the allowance for the construction signage. Several members identified the possibility of allowing a greater size and quantity than that identified in the staff report.

On March 4, 2015, the City's Planning & Zoning Commission unanimously adopted a motion to recommend approval of an amended and less restrictive ordinance allowing unlimited sign faces that are no more than 50 square feet in area and no closer than 20 linear feet to the next sign face.

On March 24, the request and Planning & Zoning Commission recommendation were heard by the Mayor and City Council. The council stated differing positions ranging from support for the recommended ordinance change to support for exempting this type of signage from regulation. The end result was a unanimous vote for denial of the text amendment as presented

and recommended. In response to this, the original applicant for this amendment has submitted a revised request to allow both freestanding construction signage and construction screening signage to exist simultaneously on the same site and exempt construction screening signage from regulations as to size and quantity.

Research by City Staff has found that many other cities have a regulation in place mirror our current 32 square foot requirements. Research has also indicated that this type of construction screening materials is often not regulated nor enforced by other cities. Larger jurisdictions such as the City of Atlanta (where a prevalence of urban projects creates a high incidence of this type of screening and signage) regulate the time of placement and content of the signage rather than the area of the sign. The use of construction screening material on construction fencing is not required by City ordinance.

During the May 6 meeting of the Planning & Zoning Commission, the revised request and staff recommendation were presented. The Planning & Zoning Commission unanimously approved the wording amendment presented in and recommended by this text.

Currently, the text of Section 7-13-2(d) (7) reads as follows:

7) *Construction Signs.* Construction signs shall be allowed provided such signs do not exceed one sign per street frontage with a maximum of two signs per construction site. Such signs shall not exceed four square feet in area per display face, two faces per sign for single-family or duplex residential construction or 32 square feet in area per display face for multi-family residential or non-residential construction, and a maximum of ten feet in height. Construction signs shall not be erected prior to the issuance of a building permit and shall be removed within seven days of the issuance of a certificate of compliance. A minimum setback of ten feet is required.

This proposed UDO text amendment adds one new definition to Section 7-2-5. These definitions are as follows:

Construction Screening. Temporary and opaque material attached to a perimeter fence or barrier surrounding an active construction site for the purpose of minimizing the visual nuisance and safety issues of the subject site.

Additionally, the proposed text amendment revising the wording of Section 7-13-2(d)(7) as follows (additions are underlined):

7) *Construction Signs.*

a. *Freestanding Construction Signs:* Shall be allowed provided such signs do not exceed one sign per street frontage with a maximum of two signs per construction site. Such signs shall not exceed four square feet in area per display face, two faces per sign for single-family or duplex residential construction or 32 square feet in area per display face for multi-family residential or non-residential construction, and a maximum of ten feet in height. ~~Construction signs shall not be erected prior to the issuance of a building grading permit and shall be removed within seven days of the issuance of a certificate of compliance.~~ A minimum setback of ten feet is required.

b. *Construction Signs Attached to Construction Screening:* When used in lieu of a Freestanding Construction Sign, construction signage may be attached to construction screening materials. Signs may only show the following:

i. Images and/or renderings of the project as it is to be constructed;

ii. Approved site and / or landscaping plans;
iii. The name and contact information of developer(s), contractors and/or financiers engaged in work on the site.

c. Construction signs shall not be erected prior to the issuance of a ~~building~~ grading permit and shall be removed within seven days of the issuance of a certificate of compliance.

Considerations:

- Provides a specific definition for *Construction Screening* within the UDO.
- Incentivizes the use of construction screening material thereby assisting with the aesthetics of active construction sites and reducing the risk of an attractive nuisance.
- Signage affixed to screening materials eliminates the more commonly used free-standing signs which may contribute to visual clutter.
- Higher allowances may improve project recognition within the community and communicate valuable information.
- Benchmarking from the standards of other jurisdictions has produced mixed results. The large majority of those surveyed enforce a similar standard to that currently found in the UDO. However, many of those surveyed noted that signage affixed to screening is not commonly regulated.

City staff recommends approval of the revised wording of Section 7-13-2(d)(7) to increase the allowed number of and size of construction signs when attached to construction fence screening materials.

Councilman Smith understood the aesthetic and safety pros of the screening, but felt essentially this would allow a series of billboards along a street.

Councilman Bothwell felt that a developer could put up a white or green cloth over the fencing and it would be cheaper than the $20,000 cost claimed for the screening at the City Centre. He was opposed to changing an ordinance to make one project legal.

Mayor Manheimer opened the public hearing at 7:54 p.m.

Mr. Brian Walker, representing Vannoy Construction, said that they want to keep a clean, presentable and safe site as much as possible during the construction process. Screening becomes expensive, so in order to help mitigate that cost, it is helpful to create opportunities for advertising and branding for the people involved with the construction process. They also want to incentivize other contractors to screen their areas. For their project along Long Shoals Road for a medical building they used this same screening process and was surprised when they found out they were in violation at this site. He said the $20,000 cost does include printing of the images. Their intent is not to clutter, but to provide images to the public of the project. He asked for City Council's support.

Mayor Manheimer closed the public hearing at 8:00 p.m.

Councilman Smith said that there are many prospectives on what signs should look like, but ultimately feels it is an incentive to provide screening for aesthetic improvement.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved to approve proposed wording amendment to Sections 7-2-5 and 7-13-2(d)(7) of the UDO of the City of Asheville; and find that this request is reasonable and is consistent with the Comprehensive Plan and other adopted plans, and is reasonable and in the

public interest in that it provides for a method of project identification while protecting pedestrians and motorist from visual distraction and public safety concerns presented by an active construction site. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Bothwell voting "no".

ORDINANCE BOOK NO. 29 – PAGE 492

G. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO SECTION 7-8-1 TO ALLOW REPLACEMENTS OF TELECOMMUNICATION TOWERS AND SUPPORT STRUCTURES IN ALL ZONING DISTRICTS

ORDINANCE NO. 4417 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO SECTION 7-8-1 TO ALLOW REPLACEMENTS OF TELECOMMUNICATION TOWERS AND SUPPORT STRUCTURES IN ALL ZONING DISTRICTS

Interim Planning Director Alan Glines said that this is the consideration of an ordinance to amend the Unified Development Ordinance for Section 7-8-1 to allow replacements of telecommunication towers and support structures in all zoning districts. This public hearing was advertised on May 15 and 22, 2015.

Currently, the definition for Section 7-2-5 of the UDO provides the following definition:

"Telecommunication tower/ support structure- Replacement tower- means a telecommunication tower intended to replace an existing approved tower where such replacement is (1) at or within 100 yards of the existing tower base, and (2) no higher than the existing tower."

Although this definition is provided in the UDO, there is not a corresponding use provision in the Table of Permitted Uses (7-8-1(d)) showing where this replacement tower is allowed. This may have been the result of an accidental omission during a prior amendment but no conclusive documentation has been discovered. This ordinance amendment then, would specify replacement towers as a use for all districts since the specific cell towers are located where they were originally permitted.

Replacing cell towers has become more of a burden since revisions for replacing cell towers was amended in the building code. Cell towers must now comply with higher wind loads and structural standards for the tower base. This is affecting both private carriers and the City of Asheville.

Providing cell towers at a new location is generally a *conditional use permit* that has a large number of requirements that need to be met and must be approved by City Council through a quasi-judicial process. Replacing these previously approved towers should be reviewed through submittal of new building permits but need not follow the extensive public hearing process required when the original towers were permitted.

Therefore, this ordinance amendment clarifies that cell towers may be replaced where they are located provided they meet the UDO definition for replacement. The Table of Uses under '*other use types*' will be changed to reflect this.

The proposed amendment in not directly addressed in the Asheville City Development Plan 2025. But telecommunications towers may be interpreted to be a part of the basic needed infrastructure of the community that supports economic development, public safety and other basic city services and is something that everyone has come to expect.

The proposed amendment most closely complies with Focus Area 1: *Economic Growth and Sustainability* - since the replacement of aging cell towers will encourage maintaining emergency communications infrastructure and reinvestment in basic community infrastructure which is stated as the second goal in the plan.

At their meeting on May 6, 2015, the Planning and Zoning Commission voted unanimously to recommend approval.

Staff recommends approval of this proposed amendment because it aligns the Table of Permitted Uses with the existing definition for replacement towers and clarifies where these are permitted.

Mayor Manheimer opened the public hearing at 8:04 p.m. and when no one spoke, she closed it at 8:04 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell moved to approve the proposed amendment to Section 7-8-1(d) as outlined in this report and find that the request is reasonable and is consistent with the Comprehensive Plan and other adopted plans, because it allows for community infrastructure to be maintained, enhances public safety and encourages economic growth and investment. This motion was seconded by Councilwoman Wisler and carried unanimously.

ORDINANCE BOOK NO. 29 – PAGE 494

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. RESOLUTION NO. 15-103 - RESOLUTION APPOINTING MEMBERS TO THE CIVIL SERVICE BOARD

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that the terms of Ms. Carolyn Worthington and Ms. Lynn Moffa, members on the Civil Service Board, expire on May 21, 2015.

The following individuals have applied for a vacancy on the Board: Pam Holcombe, Mychal Bacoate, John P. Miall Jr. Thomas R. Duckett, Alan Escovitz, Kevin West and Carol Goins. Mr. West has not been separated from City of Asheville employment long enough, and is, therefore, not eligible for appointment. Ms. Holcombe and Mr. Bacoate were unavailable for the interview time and date.

After speaking highly of all candidates, Pam Holcombe received no votes; Mychal Bacoate received no votes, Thomas Duckett received no votes, Alan Escovitz received 7 votes; and Carol Goins received 7 votes. Therefore, (1) Alan Escovitz and Carol Goins were appointed as members of the Civil Service Board to each serve a two-year term respective, terms to expire May 21, 2017, or until their successors have been appointed.

RESOLUTION BOOK NO. 37 – PAGE 140

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Rowdy Keelor, co-founder of a cigarette recycling organization called Friends Against Butts, offered to recycle the City's cigarette butts, collected at the recycling cans, at no cost to the

City. Mayor Manheimer suggested Mr. Keelor meet with City Manager Jackson to discuss his recycling request.

Mr. Jonathan Robert spoke to Council about the need to provide a living wage to all City employees.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 8:12 p.m.

Magdalen Bledsoe
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – June 9, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. RECOGNITION OF UNIVERSITY OF NORTH CAROLINA AT ASHEVILLE CHANCELLOR MARY K. GRANT

Mayor Manheimer was pleased to recognize the University of North Carolina at Asheville's 7th Chancellor Mary K. Grant who began her new post on January 5, 2015. Dr. Grant thanked City Council for their support and looked forward to being a good partner with the City.

B. RECOGNITION OF THE AC REYNOLDS GIRL SOCCER TEAM AS STATE CHAMPIONS

On behalf of City Council, Mayor Manheimer recognized Principal Doris Sellers, Coach Patrick Gladys and the AC Reynolds Girl Soccer Team as achieving the first-ever public school state championship in girls soccer for Buncombe County.

C. PROCLAMATION PROCLAIMING JUNE 11-21, 2015, AS "POLLINATION CELEBRATION WEEK"

Mayor Manheimer read the proclamation proclaiming June 11-21, 2015, as "Pollination Celebration Week" in the City of Asheville. She presented the proclamation to Ms. Phyllis Stiles, who briefed City Council on some activities taking place during the week.

D. PROCLAMATION PROCLAIMING JUNE 25, 2015, AS "KOREAN WAR DAY"

Mayor Manheimer read the proclamation proclaiming June 25, 2015, as "Korean War Day" in the City of Asheville. She presented the proclamation to Mr. Bill Lack, who briefed City Council on some activities taking place during the day.

II. CONSENT AGENDA:

Mayor Manheimer announced that Consent Agenda Item "M" has been removed from consideration.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 26, 2015

B. RESOLUTION NO. 15-104- RESOLUTION APPROVING THE ISSUANCE OF BONDS BY THE HOUSING AUTHORITY OF THE CITY OF ASHEVILLE FOR FOR SPRUCE HILL APARTMENTS

Summary: The consideration of a resolution approving the issuance of bonds by the Housing Authority of the City of Asheville for the Spruce Hill Apartments.

SP Affordable Housing Group III LLC (SP) has requested that the Asheville Housing Authority issue up to $10,000,000 in multi-family revenue bonds for the acquisition and renovation of Spruce Hill Apartments, consisting of 174 affordable apartments, located off Old Haw Creek Road in East Asheville. SP is seeking to keep these units affordable, using a combination of 4% Low Income Housing Tax Credits and bond debt.

Spruce Hill Apartments was constructed in 1975/1976 through the Federal Housing Administration ("FHA") 236 program, which provided the project with below-market rate financing in exchange for 104 rent-restricted units (60% of project units). This mortgage and its interest reduction payment subsidy are scheduled to expire in October 2017. The proposed prepayment of the 236 mortgage serves two purposes. First, it allows for a recapitalization of the Property with LIHTC equity and attractive long-term debt that will allow for a beneficial capital injection. Second, it triggers the issuance of HUD tenant protection vouchers to all qualifying residents. These vouchers act as a safety net for residents who might otherwise be rent burdened as existing subsidies expire.

The remaining 70 units (40% of project units) are supported by a project-based Section 8 Housing Assistance Payment ("HAP") contract. This contract will be extended for a 20-year term as part of the proposed recapitalization plan.

The Housing Authority approved a bond inducement resolution in August of 2014, and the North Carolina Housing Finance Agency approved the 4% LIHTC financing in February of this year.

On August 27, 2014, the Board of Commissioners of the Housing Authority of the City of Asheville ("HACA") approved a bond inducement resolution to issue multifamily revenue bonds in an amount up to $10,000,000 for the acquisition and renovation Spruce Hill Apartments. On February 2, 2015, the North Carolina Housing Finance Agency ("NCHFA") offered its approval of the financing proposal, issuing a 42(m) tax credit commitment letter. All units at Spruce Hill will be affordable to households earning no more than 60% of Area Median Income for 30 years. 18 units will be affordable to households at 50% of Area Median Income.

The resident-in-place renovation will address a variety of project needs ranging from deferred maintenance items to project upgrades that will let Spruce Hill compete favorable with market rate product. The proposed scope of work includes new siding and insulation; new design elements including entryway canopies; full kitchen and bathroom renovations including energy efficient appliances and fixtures throughout; new durable flooring; new kitchen countertops; fire alarm and electrical upgrades; new HVAC systems and energy-efficient hot water tanks; ADA-accessible play structures; and improved landscaping and signage.

At present, there are no ADA compliant units at Spruce Hill. As part of the renovation, nine (9) units will receive ADA upgrades, as will all common areas, including the basketball court and new play structures, will be made accessible. These capital improvements will extend the Property's useful life, while hopefully improving quality of life for Spruce Hill's residents.

SP Affordable Housing Group III LLC is the affordable housing arm of Seattle-based Security Properties, one of the largest owners, operators, and developers of multi-family housing in the United States. Security Properties was founded more than 45 years ago as a syndicator of low income housing properties prior to the introduction of the Section 42 LIHTC program in 1986. Today, Security Properties owns approximately 16,000 units nationwide, of which 8,600 are affordable. Since its formation in 1969, Security Properties and its partners have invested over $1.0 billion of equity in multifamily real estate, representing a portfolio value of nearly $4.0 billion.

Staff notes that the 4% LIHTC program is ideally suited for a purchase/renovation project such as this. Although either the City or the Housing Authority is authorized to issue bonds, historically the Housing Authority has played this role for multi-family rental developments.

The IRS requires that any bonds issued by Housing Authority for developments such as this have the approval of the plan of financing by City Council, following a public hearing with respect to such plan. On May 27, 2015 the Housing Authority held a public hearing and there were no comments. Staff notes that approval does not obligate the City in any way to issue or pay for the bonds, or for any debt taken on by the developer.

Pro:

- 174 units of affordable housing will be preserved and renovated.

Con:

- None.

This financing plan does not require City investment, and maintains and improves residential tax base.

Staff recommends that City Council approve the resolution approving in principal the issuance by the Housing Authority of the City of Asheville up to $10,000,000 of multi-family bonds for the Spruce Hill Apartments acquisition and renovation.

RESOLUTION BOOK NO. 37 - PAGE 141

C. RESOLUTION NO. 15-105 - RESOLUTION AUTHORIZING REVISIONS TO THE ASHEVILLE STANDARD AND SPECIFICATIONS AND MANUAL

Summary: The consideration of a resolution revising the Standard Specifications and Details Manual.

The updated Standard Specifications and Details Manual was approved by City Council on May 13, 2014, via Resolution No. 14-95. The purpose of the manual is to provide design guidelines and technical specifications for construction activities related to streets, sidewalks, water systems, storm drainage, parking lots, and pavement structure. It outlines the minimum construction standards which would be allowed within the City limits and it is applicable on both public and private property.

The various revisions include a unique numbering system throughout the manual, eliminating conflicts with the appeals process, making sure there are no conflicts with other regulations, adding new detail sheets, and making "housekeeping" adjustments.

The manual, which is in pdf format, is on the city's webpage under the Public Works Department and it can be copied at no cost.

This item was reviewed by City Council's Planning and Economic Development Committee on May 19, 2015, and it received a unanimous endorsement.

Pros:

- Makes clarification revisions and eliminates conflicts with the appeals process.
- Continues to provide minimum design and construction standards, guidelines, and specifications.
- Includes guidelines and specifications for complete streets principles.

Cons:

- There are no known negative impacts.

There is no known fiscal impact associated with this action.

City staff recommends that City Council approve a resolution revising the Standard Specifications and Details Manual.

RESOLUTION BOOK NO. 37 - PAGE 143

D. ORDINANCE NO. 4418 - BUDGET AMENDMENT WITHIN THE WORKERS' COMPENSATION FUND TO APPROPRIATE PREVIOUSLY UNBUDGETED WORKERS' COMPENSATION INSURANCE RECOVERY REVENUES TO FUND CLAIM EXPENSES IN FISCAL YEAR 2014-15

Summary: The consideration of a budget amendment within the Workers' Compensation Fund in the amount of $92,963.87 to appropriate previously unbudgeted Workers' Compensation Insurance Recovery revenues to fund claims expenses in Fiscal Year 2014-15.

Since July 1, 2014, the City workers' compensation program has been reimbursed $92,963.87 in workers' compensation claim costs by the City's excess workers' compensation insurance carrier. When the Fiscal year 2014-15 Workers Compensation Fund budget was adopted last spring, staff did not budget any revenue from insurance recovery. In order to fund claims expenses that are likely to be paid before June 30, 2015, staff is requesting that City Council appropriate this revenue and increase the claims expense budget by a like amount.

Pro:

- Provides funding for City workers' compensation claim expenses.

Con:

- None.

The insurance recovery funds have been fully received and deposited into the City Workers' Compensation Fund. Upon City Council approval, the overall budget of the City's Workers' Compensation Fund will increase by $92,963.87.

City staff recommends City Council adopt the budget amendment within the Workers' Compensation Fund in the amount of $92,963.87 to appropriate previously unbudgeted Workers' Compensation Insurance Recovery revenues to fund claims expenses in Fiscal Year 2014-15.

ORDINANCE BOOK NO. 30 - PAGE 1

E. RESOLUTION NO. 15-106 - RESOLUTION AUTHORIZING EXECUTION AN INSTALLMENT FINANCING CONTRACT WITH FIRST BANK FOR FISCAL YEAR 2015 CAPITAL IMPROVEMENT PROGRAM VEHICLES AND COMPUTER EQUIPMENT

Summary: The consideration of a resolution authorizing execution of a $3,225,000 installment financing contract for Fiscal Year (FY) 2015 Capital Improvement Program (CIP) Vehicles and Computer Equipment.

Appropriations for FY 2015 include $3,225,000 for various vehicles and computer equipment, with the capital expenditures financed through debt proceeds.

The City distributed on May 6, 2015, a Request for Proposal ("RFP") seeking competitive bids for the financing. Eleven proposals were received, the most favorable of which was

submitted by First Bank (the "Bank") at an interest rate of 1.15% per annum per annum for a term of 48 months (computer equipment) and 59 months (vehicles).

The proposed resolution authorizes an installment financing contract between the City of Asheville and the Bank for the purchase of the vehicles and computer equipment, and it authorizes the City Manager, City Attorney, Finance Director and City Clerk to execute and deliver any and all necessary documents. The contract will place a security interest in the vehicles and computer equipment in favor of the Bank in order to secure the City's obligation under the contract. Pursuant to a previously adopted reimbursement resolution, proceeds from this financing contract will allow the City to reimburse itself for the cost of the vehicles and computer equipment which have already been procured.

Pros:

- Provides funding of capital expenditures at a very favorable effective interest rate.
- Financing capital purchases spreads the cost of acquisition over several years of the useful life of the asset.
- Reimbursing this capital purchase with the proceeds of the financing, as opposed to paying for the purchase by using the City's available cash balances, increases currently available funds through restoration of fund balance.
- The financing conforms to the approved Financing Plan for capital expenditures.

Con:

- Financing the purchase increases nominally the lifetime cost of the acquisition due to the payment of interest and closing costs on the amount financed.

The annual debt service payments for this financing range between approximately $370,000 in the first year and approximately $301,000 in the fifth year. Funds are included in the City's FY 2015-16 proposed debt service budget to cover this cost.

City staff recommends that City Council adopt the resolution authorizing the City Manager to execute an installment purchase contract and closing process with First Bank for the acquisition of the vehicles and computer equipment.

RESOLUTION BOOK NO. 37 - PAGE 144

F. RESOLUTION NO. 15-107 - RESOLUTION TO ACCEPT AN OFFER BY ASHEVILLE AREA HABITAT FOR HUMANITY TO PURCHASE BY PRIVATE SALE REAL PROPERTY ACQUIRED THROUGH FORECLOSURE PROCEEDINGS FOR THE VILLAS AT CEDAR HILL LOCATED ON PISGAH VIEW ROAD

Summary: The consideration of an offer by Asheville Area Habitat for Humanity to purchase, by private sale, real property owned by the City known as the "Villas at Cedar Hill."

In summer 2003 and early 2004, a total of $217,000 was loaned from the Housing Trust Fund to Villas at Cedar Hill, LLC for the development of forty-two (42) units of affordable multifamily housing. Only ten (10) of the units were completed.

In May 2009, the senior lien holder, Blue Ridge Bank, gave notice of foreclosure. The outstanding principal balance owed to the Trust Fund by Villas at Cedar Hill, LLC was $206,785. The City became the successful bidder for two parcels, adjacent to the original site: a 9.8 acre and a 6.2 acre parcel for a total $397,195 (inclusive of foreclosure costs).

Sewer access to an MSD-owned pump station via an existing easement was contested. The City filed an eminent domain lawsuit which has now been resolved with sewer access provided. The property was recently appraised for $458.300.

In 2010, Asheville Area Habitat for Humanity proposed to purchase the property for $450,000, with $300,000 at closing and an additional $150,000 to be applied as second mortgages to be held by individual homeowners. The offer was contingent on access to the MSD Sewage Pump Station. That offer was accepted by City Council; but due to the eminent domain litigation, Habitat's offer expired.

Habitat has now renewed their offer to purchase the property, for the current appraised value of $458,300, with $300,000 in cash and the remainder as second mortgages to the Habitat homeowners. Repayment of the second mortgages would be deferred as long as the houses, when sold, were sold to households earning 80% or less of Area Median Income. City staff asked for changes from the original agreement that Habitat has accepted. These include changing the second mortgages from a 0% interest to a shared appreciation basis, and Habitat agreeing to explore both greater density and permanent affordability of the homes built there.

Pros:

- At least fifty-five (55) units of affordable housing will be created.
- Upon sale, an anticipated $300,000 of funds will be returned to the Housing Trust Fund for lending purposes
- The creation of fifty-five (55) single family homes will increase the City tax base by an estimated $7.5-$8 million in new development.
- The proposed development complements other City investment in the area.

Cons:

- An additional sales amount, estimated at $158,300 and to be determined as the ultimate composition of the project is established, will be deferred until homes are resold by assisted homeowners to households earning more than 80% of Area Median Income.

Although the sale would not fully recover the City investment, it would result in the development of at least 55 new affordable homes, being sold to households making 80% or less of median income; and has the potential to either result in a significant amount available to lend for new affordable housing, and/or the creation of Asheville's first permanently affordable single-family home development. The development will increase the City's tax base by an estimated $7-9 million. Staff anticipates returning to Council for final approval and a budget amendment if the structure of the sale changes.

Staff recommends that City Council concur with the HCD Committee recommendation to approve acceptance of the Purchase offer of Habitat for the City-owned property located at Pisgah View Road.

Mr. Paul Reeves, Director of Construction Services at Habitat for Humanity, thanked City Council for their past, current and future partnership with Habitat. He said that this is an exciting opportunity for the City and Habitat to partner to create 55 units of affordable housing.

RESOLUTION BOOK NO. 37 - PAGE 146

G. RESOLUTION NO. 15-108 - RESOLUTION GRANTING A FEE WAIVER TO THE NATIONAL PARK SERVICE FOR THE BLUE RIDGE QUARTER LAUNCH EVENT

Summary: The consideration of a resolution granting a fee waiver to the National Park Service for the Blue Ridge Quarter Launch event on June 25, 2015.

The United States Mint in partnership with the National Park Service/Blue Ridge Parkway has expressed interest in partnering with the City of Asheville to host a public event to

commemorate the release of the 2015 Blue Ridge Parkway quarter. The Blue Ridge Parkway quarter will be the 28th coin to be released in the US Mint America the Beautiful Quarters® Program.

The event and community celebration will be held at Pack Square Park's Roger McGuire Green on Thursday, June 25, 2015 between the hours of 10:00 a.m. and 11:00 a.m., and is expected to draw attendance of up to 2,000. Event components will include presentations and remarks from federal officials, a coin exchange in collaboration with Asheville Savings Bank, activities conducted by Parkway staff, and opportunities for all participants at the event 18 years of age or under to receive a new quarter in specially designed boxes from the United States Mint.

The fees and charges associated with this event include the special event application fee, park use fees, fees associated with the issuance of permits for temporary site additions, and fees for the closure of 7 metered parking spaces within City-County Plaza. The total of associated fees amounts to $1,007.

Pro:

- Promotes cross-agency collaboration, maximizing benefits and resources between partnering organizations

Con:

- Results in lost revenue from processing, permits, property use fees, parking meters

Fiscal impact is $1,007 of in-kind support and fee waivers

City staff recommends City Council approve a resolution authorizing the City Manager to waive $1,007 in fees & charges associated with the Blue Ridge Parkway Quarter Release event at Pack Square Park.

RESOLUTION BOOK NO. 37 - PAGE 147

H. RESOLUTION NO. 15-109 - RESOLUTION AMENDING THE CITY COUNCIL 2015 MEETING SCHEDULE TO CANCEL THE AUGUST 11, 2015, FORMAL MEETING

RESOLUTION BOOK NO. 37- PAGE 148

I. ORDINANCE NO. 4419 - BUDGET AMENDMENT TO APPROPRIATE INSURANCE RECOVERY FUNDS FOR A TOTALED BUS HENDERSON COUNTY LEASED TO UTILIZE TOWARDS THE PURCHASE OF A NEW BUS TO LEASE TO HENDERSON COUNTY

Summary: The consideration of a budget amendment in the Transit Capital Fund in the amount of $55,262.80 from insurance recovery funds for a totaled bus Henderson County leased to utilize towards the purchase of a new bus to lease to Henderson County.

On August 18, 2014, a bus owned by the City of Asheville and leased to Henderson County was totaled by a third-party and the City settled the property damage claim for $55,262.80. Henderson County seeks to lease a new bus from the City to replace the totaled bus and the Transportation Department seeks to utilize the settlement funds towards the purchase a new bus to lease to Henderson County.

Pro:

- Provides funding for Transportation Department bus purchase.

Con:

- None.

The insurance recovery funds are held in the City Property & Liability Fund. Upon City Council approval, the funds will be transferred to the City Transit Capital Fund to be utilized towards the purchase of a new vehicle.

City staff recommends City Council adopt the budget amendment in the Transit Capital Fund in the amount of $55,262.80 so the funds may be applied towards the purchase of a bus to lease to Henderson County.

ORDINANCE BOOK NO. 30 - PAGE 3

RESOLUTION NO. 15-117 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE BEER CITY CUP

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 5 Walnut Anniversary Party on June 17, 2015, the Ingle's Independence Day Celebration on July 4, 2015, LEAF Downtown on August 1 & 2, 2015, RiverFest on August 8, 2015, Asheville VegFest on August 16, 2015, Clips Beer & Film Tour on September 4, 2015, Asheville Running Experience on September 5, 2015, and Beer City Cup on September 6, 2015.

- Asheville Greenworks has requested through the City of Asheville Community & Economic Development Department that City Council permit them to serve beer and/or unfortified wine at the 5 Walnut Anniversary Party and allow for consumption at this event.

The 5 Walnut Anniversary Party will be held on Wednesday, June 17, 2015 from 5:00 p.m. – 10:00 p.m. at Walnut Street between the intersection of Broadway and Carolina Lane as per the event area limits referenced on the accompanying site map.

- The Asheville Downtown Association has requested through the City of Asheville Community & Economic Development Department that City Council permit them to serve beer and/or unfortified wine at the Ingle's Independence Day Celebration and allow for consumption at this event.

  The Ingle's Independence Day Celebration will be held on Friday, July 4, 2015 from 11:00 a.m. – 10:00 p.m. at Pack Square Park as per the event area limits referenced on the accompanying site map.

- LEAF Community Arts has requested through the City of Asheville Community & Economic Development Department that City Council permit the sale of beer and/or unfortified wine at LEAF Downtown and allow for consumption at this event.

  LEAF Downtown will be held on Saturday, August 1, 2015 from 12:00 p.m. – 10:00 p.m. and Sunday, August 2, 2015, from 10:00 a.m. – 8:00 p.m. at Pack Square Park as per the event area limits referenced on the accompanying site map.

- RiverLink has requested through the City of Asheville Community & Economic Development Department that City Council permit the sale of beer and/or unfortified wine at RiverFest and allow for consumption at this event.

  RiverFest will be held on Saturday, August 8, 2015, from 1:00 p.m. – 7:00 p.m. at French Broad River Park as per the event area limits referenced on the accompanying site map.

- Brother Wolf Animal Rescue has requested through the City of Asheville Community & Economic Development Department that City Council permit the sale of beer and/or unfortified wine at Asheville VegFest and allow for consumption at this event.

  Asheville VegFest will be held on Sunday, August 16, 2015, from 12:00 p.m. – 5:00 p.m. at Pack Square Park's Roger McGuire Green, Spruce Street, and Reuter Terrace as per the event area limits referenced on the accompanying site map.

- Asheville on Bikes has requested through the City of Asheville Community & Economic Development Department that City Council permit the sale of beer and/or unfortified wine at the New Belgium Clips Beer & Film Tour and allow for consumption at this event.

  The New Belgium Clips Beer & Film Tour will be held on Friday, September 4, 2015, from 6:30 p.m. – 10:00 p.m. at Pack Square Park as per the event area limits referenced on the accompanying site map.

- Blue Ridge Roller Girls has requested through the City of Asheville Community & Economic Development Department that City Council permit the sale of beer and/or unfortified wine at the Asheville Running Experience and allow for consumption at this event.

  The Asheville Running Experience will be held on Saturday, September 5, 2015, from 8:00 a.m. – 8:00 p.m. at Coxe Avenue between Banks and Hilliard as per the event area limits referenced on the accompanying site map.

- North Carolina Adult Soccer Association (NCASA) has requested through the City of Asheville Community & Economic Development Department that City Council permit the sale of beer and/or unfortified wine at Beer City Cup and allow for consumption at this event.

  Beer City Cup will be held on Sunday, September 6, 2015, from 9:00 a.m. – 11:00 p.m. at Memorial Stadium as per the event area limits referenced on the accompanying site map.

Pro:

- Allows fundraising opportunities for Asheville Greenworks, RiverLink, Brother Wolf Animal Rescue, and the North Carolina Adult Soccer Association

Con:

- Potential for public safety issues

City staff recommends City Council adopt resolutions authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 5 Walnut Anniversary Party, Ingle's Independence Day Celebration, LEAF Downtown, RiverFest, Asheville VegFest, Clips Beer & Film Tour, Asheville Running Experience and Beer City Cup.

K. RESOLUTION NO. 15-118 - RESOLUTION ESTABLISHING GOALS FOR THE PRODUCTION OF AFFORDABLE HOUSING PRODUCTION GOALS

Summary: The consideration of establishing a numerical goal for affordable housing production assisted by the City of Asheville.

In October of 2014, City Council met in work session to consider a Comprehensive Affordable Housing Strategy and Policy Framework. The Action Plan arising from that work session included the adoption by Council of short and long term goals for affordable production for the City of Asheville, pending an analysis of needs and resources.

The Affordable Housing Needs Assessment, completed in February of 2015, provides important information that is helpful in establishing a goal. According to that report, the four county region served by the Asheville Regional Housing has a overall rental vacancy rate of about 1%, and a projected regional supply gap of 5,575 units for households earning 120% or less of median income. In Asheville and Buncombe County alone, the rental supply gap for households earning 80% of median income or less is 4,175 units.

Staff has reviewed the tools and resources the City currently has available to assist in the production of affordable housing, including financial resources, land resources and regulatory tools. Staff has analyzed current and projected affordable housing production pipelines, and has estimated forward what are reasonable expectations about affordable housing production using the available resources and tools. These are:

- Financial resources considered include direct City investments in affordable housing: Housing Trust Fund, federal HOME and CDBG funds, the City's "EDCIP," and the Land Use Incentive Grant.

- Regulatory Tools include Density Bonuses, Accessory Apartments, UDO Changes, Conditional Zoning, Conditional use Permits, and Inclusionary Zoning (currently, voluntary only).
- City land resources include the Pisgah View Road parcel, Parks Maintenance, and an assumption that 3 additional parcels will be made available for affordable housing.

Other resources and tools may be made available that could increase the potential for affordable housing production assistance. However, using the above resources, staff estimates that the City could assist in the production of 2,800 units in the next seven years.

Affordable Housing Production Known/Projected Pipeline	2016	2017	2018	2019	2020	2021	2022
City Direct $ Investment	181	207	327	162	227	200	200
Zoning density	0	40	60	80	100	120	150
City Land	0	70	40	60	75	0	0
CZ	76	50	75	75	75	75	75
TOTAL	257	367	502	377	477	395	425
Total all years							**2800**

The Housing and Community Development Committee reviewed the staff analysis at their meeting on April 21, 2015. The Committee agreed with the analysis and recommended that the goals be presented to City Council.

Pro:

- Goals will assist staff and Council establish and evaluate programs designed to produce affordable housing;

Con:

- Achievement of the goals relies in part on funding and costs not under the City's control.

The establishment of this goal does not have a direct fiscal impact, but is predicated on the assumption that financial resources for affordable housing will continue to be available through the duration of this projection timeframe.

Staff recommends that City Council concur with the HCD Committee recommendation to adopt the annual and seven year goal for affordable housing production assisted by the City of Asheville.

Councilman Smith was grateful to City Council for taking this bold step of setting a seven year goal. This is a bold and important step and hoped to find more partners, more tools and more resources to get an additional 2,800 units.

RESOLUTION BOOK NO. 37 - PAGE 173

L. RESOLUTION NO. 15-119 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH B. ALLEN CONSTRUCTION INC. FOR THE CONSTRUCTION OF THE KENILWORTH PARK RENOVATIONS

ORDINANCE NO. 4420 - BUDGET AMENDMENT FOR THE KENILWORTH PARK RENOVATIONS

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with B. Allen Construction, Inc. to replace the existing tennis & basketball courts, retaining walls, steps, drainage, park sign, and construct accessible parking at Kenilworth Park for an amount not to exceed $298,884, and a budget amendment in the same amount from debt proceeds to fund the contract.

The City of Asheville (City) has determined the existing sports courts, retaining walls, steps, parking, and sports equipment at Kenilworth Park have exceeded their life expectancy, are in poor condition, and pose safety hazards for users. As a result, the city has identified the need for a renovation and has planned to complete the project under general capital improvement fund for Parks & Recreation Department.

The Parks and Recreation Department's ten-year Capital Improvement Plan and Outdoor Court deferred maintenance plan outline projects that have been prioritize and ranked based on the 2009 Parks and Recreation Master Plan, 2013 Assessment Report for Americans with Disabilities Act Compliance, The Recreation Advisory Board, and Public Feedback.

The Advisory Board reviews and prioritizes the deferred maintenance program with staff and input from the public in October of each year to make certain that the plan reflects the needs of the community.

The City issued an Advertisement for Bids for construction of the renovations and received two bids:

- Graham County Land Co., Robbinsville, NC ($447,750)
- B. Allen Construction, Candler, NC ($298,884)

The bid from B. Allen Construction, Inc. was selected as the lowest, responsible bidder with the base bid of $298,884.

Pros:

- Improves safety by replacing uneven and cracked surfaces from years of patching and repairing; replacement of outdated/broken sports equipment.
- Provides safe alternative for recreation.
- Improves performance through ongoing care and maintenance.

Con:

- None

The budget amendment will provide budget authorization for the contract. Project expenses have already been included in the cash flow model for the five year Capital Improvement Program.

Staff recommends that the City Council adopt (1) a resolution authorizing the City Manager to enter into a contract with B. Allen Construction, Inc., to renovate Kenilworth Park for an amount not to exceed $298,884.00; and (2) a budget amendment in the same amount from debt proceeds to fund the contract.

ORDINANCE BOOK NO. 30 - PAGE 5

M. RESOLUTION AUTHORIZING THE CITY TO APPLY FOR FUNDS THROUGH THE US OFFICE OF JUSTICE 2015 EDWARD BYRNE JUSTICE GRANT - STATE SOLICITATION

This item has been removed from consideration.

N. RESOLUTION NO. 15-132 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR FUNDS THROUGH THE US OFFICE OF JUSTICE 2015 EDWARD BYRNE JUSTICE GRANT - LOCAL SOLICITATION

Summary: The consideration of a resolution authorizing the City to apply for funds through the US Office of Justice 2015 Edward Byrne Justice Assistance Grant – Local Solicitation in the amount of $50,434.

The City of Asheville Police Department (APD) requests authorization to apply for the Byrne JAG – Local Solicitation. This is a predetermined amount of funds based on the Part 1 Uniform Crime Reporting Crimes. If the grant is approved the Asheville Police Department and Buncombe County Sheriff's Department will be allocated $50,434 based on the award matrix, with Asheville receiving $38,322 and Buncombe County receiving $12,112. The distribution of funds would be approved through a signed Memorandum of Understanding.

Funds will be utilized to purchase Taser devices which will serve to enhance officer safety and potentially reduce the propensity for injury that offenders could be exposed to during altercations with officers. Effective Taser applications have demonstrated the capability to incapacitate threatening subjects by using an electrical charge to target the motor nerves that control movement. Ideally, these devices facilitate effective restraint while reducing the opportunity for injury to all involved parties, thereby potentially reducing workers' compensation claims and liability claims.

There will be an expense of $38,322 by the APD for the purchase of approximately 30 Tasers. The Buncombe County Sheriff's Department will be awarded $12,112 for its identified needs. This accounts for the total allocation of $50,434 for this grant.

This is a 100% funded non-local match grant that will serve to enhance officer safety for substantially more patrol officers and potentially reduce the probability of injury for threatening offenders.

Pros:

- Increasing the number of Tasers for patrol officers will enhance officer safety and that of the community
- Increased accountability because of the downloadable content related to deployments
- Costs of the devices could offset the costs incurred by workers' compensation or liability claims

Cons:

- Additional burden on future operations budget for the cost of maintenance and replacement after the approximate five-year service life of the device
- Additional training costs associated with purchasing the training cartridges at an approximate cost of $40 per year per device.

If the grant is awarded, there is no local match required, however there would be maintenance and replacement costs for the equipment that would need to be included in future fiscal year budgets.

Staff recommends City Council adopt the resolution authorizing the City Manager to apply for grant funds through US Office of Justice Programs in the amount of $50,434.

RESOLUTION BOOK NO. 37 - PAGE 187

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Wisler moved for the adoption of the Consent Agenda, with the deletion of Consent Agenda "M". This motion was seconded by Councilman Smith and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. LEGISLATIVE UPDATE

Mayor Manheimer highlighted Council on some the following current bills with potential impact on the City of Asheville budget: pending sales tax redistribution, JDIG, graffiti vandalism bill, and zoning design and aesthetic control bill.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER ADOPTION OF THE FISCAL YEAR 2015-16 ANNUAL OPERATING BUDGET

Finance Director Barbara Whitehorn said that City Council conducts a public hearing each year to receive public input on the Proposed Annual Operating Budget prior to adoption of the Annual Budget Ordinance.

The Fiscal 2015/2016 Proposed Annual Operating Budget was presented to City Council on May 26, 2015. The Fiscal Year 2015/2016 Proposed Budget is balanced with an Ad Valorem tax rate of $0.475 per $100 of assessed value, which represents a $0.015 increase over the current year tax rate. All essential City services are continued in the Proposed Budget. A copy of the Proposed Budget is available for public inspection in the City Clerk's office. The Proposed Budget is also available for viewing on the City's website (www.ashevillenc.gov).

In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Proposed Budget along with a notice of the Public Hearing was published on May 29, 2015. Adoption of the Fiscal 2015/2016 Budget Ordinance is scheduled for June 23, 2015, at the regularly scheduled City Council meeting. The Proposed Budget may be changed by City Council in any way before adoption. It may also be changed by budget amendment after adoption, with the only exception being the Ad Valorem Tax rate, which cannot be changed once the Budget is adopted.

Staff recommends City Council conduct the public hearing on the City of Asheville Fiscal Year 2015/2016 Proposed Annual Operating Budget and include public input in its consideration of the Budget.

In response to Councilman Smith, Ms. Whitehorn explained the affordable housing funding with regard to the Housing Trust Fund and the Economic Development Capital Improvement Program (EDCIP). She said that staff analyzed the current estimate of the EDCIP (Parks Maintenance Relocation Project) to see if there was some leeway to reduce the EDCIP dollars, which will allow the reprogramming of those funds to either the Housing Trust Fund or other housing projects. It was determined that the Parks Maintenance Relocation Project would need approximately $350,000, but was budgeted $805,000.

At Mayor Manheimer's request, Ms. Whitehorn said that the budget includes funding for the living wage for part-time, seasonal and temporary workers. Staff is determining how it will be implemented.

Throughout discussion, Ms. Whitehorn responded to various questions/comments, some being, but are not limited to: how much property tax growth is forecast in the 2015-16 operating budget; does the forecast account for the projects in the development pipeline and their addition to the tax base; what is the fund balance trend; what is the effect of using fund balance as

opposed to increasing the tax rate; how is fund balance related to the City's debt rating; and what would the City have to do to get a AAA bond rating and what would the benefits to the City be.

There was discussion, initiated by Councilman Pelly, that the City could allocate a portion of fund balance for Fiscal Year 2015-16 for non-recurring, one-time capital expenditures and still maintain the 10% minimum relative growth. The proposed budget recommends a 17.2% unassigned fund balance of $17,722,000. A fund balance of $17,011,273 (16.5%) would keep the City at the 10% minimum relative growth, allowing for the reallocation of $700,000.

Mayor Manheimer opened the public hearing for the budget at 5:45 p.m.

Mr. Alan Ditmore felt the friction the City sees between police funding and housing funding is more budgetary. He felt there are other law enforcement agencies to protect commuters, tourists, etc.

Mr. Chris Peterson said that the average City employee salary is $70,000 and elsewhere in the City the average employee salary is $30,000. He was opposed to the addition 1.5-cent tax increase. He questioned Council's economic development incentive for New Belgium since there is infrastructure, etc. that the City will have to improve.

Mr. Ken Michalove provided City Council with a memorandum in which he felt the City Manager's solution to getting a higher spending budget approved is to raise taxes and fees. He felt the City Manager should not recommend an ad valorem tax or fee increase, but reduce the expense in the general government area.

Ms. Jenny Bowen supported a living wage for all City employees.

Vice-President of the Five Points Neighborhood Association explained why the budget for infrastructure that affects public safety and livability needs to be increased substantially. She raised four points as follows (1) multiple items that need dedicated funding include sidewalk repairs, new sidewalks to complete critical linkages, repainting and improving crosswalks including access to transit stops and greenways, traffic calming measures, better signage, ADA improvements, bike lanes, and increased law enforcement; (2) dilapidated unsafe sidewalks near schools or along streets where many children live are in dire need of immediate attention; (3) funds selected for other things that do not affect safety and mobility should be scrutinized and reduced and shifted to go towards these public safety issues; and (4) include infrastructure improvements when the fire station for Five Points is built, i.e. if a new traffic signal is installed, allow it to be activated by pedestrians; and a safer Broadway crossing.

Ms. Julie Mayfield, Chair of the Transit Commission, read a prepared statement thanking City Council for including limited Sunday service, for the continued transfer of over $600,000 from the Parking Fund to the transit system, and for the increase in the transit budget over the last five years. There are still many more improvements to be made to the system since the implementation of the Transit Master Plan in 2012, noting that we remain several years behind the anticipated schedule of improvements laid out in the Master Plan. The Committee asked that the following several key improvements to the system be included in the budget: (1) an additional bus on the S-3 Route to the Airport; (2) later service on several routes; (3) improved service to A-B Tech to downtown and Biltmore Village; and (4) an additional transportation planner. Implementing these requests would further advance the Master Plan and continue to enhance the quality of life of our citizens. They were disappointed there was no room in the budget for any of these improvements but they will remain steadfast in their request for these improvements in the next budget cycle. Mobility continues to be a top priority for people in Asheville.

Ms. Vickie Meath, Director of Just Economics, thanked City Council for continuing the limited Sunday bus service and also thanked Council for including in the budget a living wage for temporary and seasonal employees.

Ms. Billie Laughlin, resident of Five Points, thanked City Council for increasing funds for sidewalks and stressed the need for sidewalk maintenance.

Rev. L.C. Ray, CEO of One Youth at a Time, thanked City Council for their support of the One Youth at a Time program over the past years, and even though it is not slated to receive strategic partnership grant funding this year in the amount of $5,000, he hoped City Council re-consider their decision.

Mr. Mark Ramsey supported a living wage for temporary and seasonal employees.

Mr. Rich Lee, representing the East-West Asheville Neighborhood, provided City Council with a letter from Adam Chase, Board Chair of East-West Asheville Neighborhood Association. He asked that improvements to the Craven Street Bridge are very important to the East-West Asheville neighborhood and to New Belgium and should be advanced into the CIP or the RADTIP as quickly as possible. Improvements to the Craven Street - Riverside Drive intersection and to Riverside Drive under the Norfolk Southern trestle are critical to be performed this fiscal year and their preferred alternative is to shift Craven Street to allow for truck turns from all directions.

Ms. Dawn Chavez, Executive Director of Asheville Greenworks, said that they had applied for strategic partnership grant funding in the amount of $20,000 but were not one of the agencies chosen to receive the funding. She asked City Council to reconsider as they have worked closely with the City on a number of projects and they leverage all the funding they receive towards increasing their impact across the City.

Community Engagement Coordinator for Asheville Greenworks said that they have also applied for strategic partnership grant funding in the amount of $17,500 but was not awarded the grant. She asked Council to reconsider their funding as they work with the low income community.

Mayor Manheimer closed the public hearing at 6:18 p.m.

Vice-Mayor Hunt proposed that out of the excess $700,000 in fund balance (while still maintaining the 10% minimum relative growth) $500,000 be used to accelerate the Craven Street Bridge, and $200,000 be dedicated to the Affordable Housing Trust Fund.

Councilman Smith said that his priorities surround addressing the affordable housing crisis, living wage for all City employees, and transportation infrastructure. He would support the possible excess in the Parks Maintenance Relocation of $450,000 be allocated to the Affordable Housing Trust Fund. Regarding the excess $700,000 in fund balance, he supported $500,000 for the acceleration of the Craven Street Bridge project, with the remaining $200,000 be dedicated to more sidewalks, bus shelters at transit stops, or the Affordable Housing Trust Fund. He explained the uncertainty in our budget from the State level. He explained his concern by the Chamber of Commerce Economic Development Coalition (EDC) increase of $40,000 - to total $100,000. Regarding the strategic partnership funding, the City had $98,400 to allocate and received 17 good applications for a total request of $305,000. What Council will consider later in the meeting is a compromise with a recognition that the funds are not enough. He would be open to increasing the strategic partnership funding allowance, and also open to looking at a strategy that looks at all the agencies that are working with children that focus on the achievement gap.

After discussion, it was the consensus of the majority of Council to allocating an additional $50,000 ($25,000 from the $500,000 allocation for the Craven Street Bridge project and $25,000 from the $200,000 allocation for the Affordable Housing Trust Fund) to the Strategic Partnership Fund and refer the strategic partnership funding process back to the Housing & Community Development Committee for another recommendation at the Council's June 23, 2015, meeting. Said review should include all prior applications received but not funded.

Councilman Bothwell suggested that instead of the $50,000 coming out of the $700,000 fund balance excess, that the $40,000 increase that the EDC requested be dedicated to the Strategic Partnership Fund. He didn't feel the EDC has been a partner to the City in big issues recently.

Councilman Pelly felt it was important to maintain the City's AA rating and agreed that we are being squeezed by the state, but felt a tax increase should be the last resort. He did not feel Council was in the place yet that a tax increase was the only option available to Council. He could not support the 1.5-cent increase.

Councilman Davis agreed with Councilman Pelly and was uncomfortable in trying to amend the budget in piecemeal at this meeting. He felt that the $40,000 increase that the EDC is requesting might be better spent to attract more jobs.

Mayor Manheimer said that the 1.5-cent increase will help sustain what we anticipate to be expenditures that don't go away year after year. When we talk about taking from our fund balance (rainy day fund), it is for a one-time allocation. You cannot avoid a property tax increase by taking from fund balance and patch the budget because you may get the bond rating in trouble, and by taking it from fund balance you're doing it to patch a reoccurring expense. If Council is going to honor a living wage for all City employees, and honor the recommendation for adjustment to salaries for personnel, with no tax increase, we will be looking at a different budget and will have to make cuts.

Ms. Whitehorn explained the three metrics used by the rating agencies and the City's position.

Councilman Pelly felt that with the excess of $700,000 in property taxes this year coupled with the significant additional property taxes from additional projects in the pipeline ($552 Million), we should not have to raise property taxes this year.

When Councilman Pelly asked Ms. Whitehorn to talk about what $552 Million in development projects will be converted to in tax revenue, Ms. Whitehorn said that it is estimated that 80-90% of the projects will be completed. With a millage rate of $.475 per $100, if all of the projects in the 12-18 month timeline are completed and on the tax rolls within 18 months, Fiscal Year 2017-18 will see $1.6 Million in additional revenue. However, it is important to consider that several of the large projects that are coming on line (or have already been added to the tax base) have economic development incentives associated with them. These incentives provide that if a company meets specific benchmarks, a percentage of the additional property tax revenue generated will be refunded for a number of years.

Councilwoman Wisler agreed with Councilman Davis in that additional thought needs to be given to using excess fund balance. She would support the 1.5-cent increase.

It was the consensus of the majority of Council to not allocate the excess $700,000 in fund balance at this time, but allocate those funds later in the Fiscal Year via a budget amendment.

Discussion occurred regarding the increase of $40,000 to the EDC budget, with the majority of Council choosing to support the increase. It was noted that they will be asking for $100,000 a year for the next five years; however, each year the budget is reviewed.

It was the consensus of Council to reallocate the excess in the Parks Maintenance Relocation of $450,000 be allocated to the EDCIP, noting that mid-year a budget amendment to the Affordable Housing Trust Fund would be appropriate.

Mayor Manheimer said that adoption of the Fiscal Year 2015-16 Annual Operating Budget will occur on June 24, 2015.

Closed Session

At 7:18 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(3). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: Gannett Pacific Corp. and the City of Asheville. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3). This motion was seconded by Councilman Pelly and carried unanimously.

At 7:43 p.m., Vice-Mayor Hunt moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

B. PUBLIC HEARING TO CONSIDER REZONING 1 BUFFALO STREET FROM NEIGHBORHOOD BUSINESS DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

ORDINANCE NO. 4421 - ORDINANCE TO REZONE 1 BUFFALO STREET FROM NEIGHBORHOOD BUSINESS DISTRICT TO RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT

Urban Planner Vaidila Satvika said that this is the consideration of an ordinance to rezone 1 Buffalo Street from Neighborhood Business District to RM-8 Residential Multi-Family Medium Density District. This public hearing was advertised on May 29 and June 5, 2014.

The area of the subject property is approximately 0.21 acres, measuring 41 feet wide along Buffalo Street, and 244 feet long, abutting property owned by State DOT and I-240W. The lot is currently vacant and is a legally conforming lot based on the development standards of the Neighborhood Business (NB) zoning district. Historically, the lot most likely served as an overflow parking lot for an adjacent neighborhood grocery/convenience store to the north that was destroyed by a fire years ago. The parcel borders an unopened right-of-way (ROW) to the south that measures approximately 12 feet wide and 245 feet long; the ROW is not an essential part of the street network as it is not maintained and it dead-ends at property owned by State DOT, adjacent to the I-240W corridor.

Due to the fact that the subject lot is nested within a residential zoning district, the request to rezone the lot to RM-8 would be consistent with the context of the neighborhood, which is primarily single-family. The zoning action, however, would create a noncompliant lot because RM-8 requires 50 feet of frontage and the subject property has only 41 feet of frontage. According to the UDO section 7-17-2, lawfully established nonconforming lots having dimensional nonconformities may be used for any permitted use allowed in the zoning district in which the lot is located provided that any structure meets all applicable dimensional and numerical requirements (such as setbacks, for example) and all applicable procedures are followed.

The NB zoning district provides opportunities in the city to establish low-intensity businesses that are accessible to pedestrians from surrounding residential neighborhoods yet without a waiver from the Tree Commission, the landscape buffer standards would require the subject property to include a 20-foot-wide planted buffer along the southern edge of the lot, thereby reducing any structure's buildable width to 21 feet wide. In addition, a residential use is

not permitted by right in the NB zoning district. Assuming that infill housing is the best use for this site, a rezoning to RM-8 is an appropriate action.

The Asheville City Development Plan 2025 encourages compatible "adaptive reuse, redevelopment and infill development" and states, "areas within the existing urban fabric that are vacant should be targeted for compatible infill development that takes advantage of existing infrastructure." Staff feels this rezoning would be compatible with the goals of the Comprehensive Plan.

A consideration would be that the rezoning would create a noncompliant lot within the RM-8 zoning district.

Based on the above findings and the analysis provided in the report, staff finds this request to rezone 1 Buffalo Street from NB to RM-8 to be appropriate and consistent with the context of the neighborhood and broader city goals.

Mayor Manheimer opened the public hearing at 7:53 p.m. and when no one spoke, she closed public hearing at 7:53 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Pelly moved to approve the zoning map amendment from Neighborhood Business (NB) to Residential Multi-Family Medium Density (RM-8) District and (if approving) find that the request is reasonable and consistent with the Comprehensive Plan and other adopted plans because it 1) encourages the adaptive reuse of vacant property and 2) would promote compatible infill development within the urban fabric of the city. This motion was seconded by Councilwoman Wisler and carried unanimously.

ORDINANCE BOOK NO. 30 - PAGE 7

C. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED AT 29 OAK HILL DRIVE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RM-16/CZ RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION OF 72 RESIDENTIAL UNITS IN THREE BUILDINGS WITH ASSOCIATED INFRASTRUCTURE, AND CONDITIONS FOR REDUCED BUILDING SETBACKS, REDUCED PARKING COUNTS, AND INCREASE IN RESIDENTIAL DENSITY

ORDINANCE NO. 4422 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 29 OAK HILL DRIVE FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RM-16/CZ RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION OF 72 RESIDENTIAL UNITS IN THREE BUILDINGS WITH ASSOCIATED INFRASTRUCTURE

Interim Planning Director Alan Glines said that this is the consideration of an ordinance to conditionally zone property located at 29 Oak Hill Drive from RM-16 Residential Multi-Family High Density District to RM-16/CZ Residential Multi-Family High Density District/Conditional Zoning for the construction of 72 residential units in three buildings with associated infrastructure, and conditions for reduced building setbacks, reduced parking counts, and increase in residential density. This public hearing was advertised on May 15 and 22, 2015.

The proposal is for the construction of 72 residential units in three 3-story structures each with 24 residential units and a single large area for parking. The plan is for twenty four one-

bedroom units to be offered at 50% of AMI for a period of ten years. These units will use the housing voucher program which is only available for periods of ten years but is expected to be renewed for up to 30 years. These specific units have received City of Asheville Housing Trust Funds to provide supportive affordable housing to qualifying households experiencing difficulties finding stable housing. In addition, five other units will be offered at 80% of AMI for a period of ten years. Staff also expects that the developer will submit an application for a land use incentive grant (LUIG) although at the time of this writing, there is not one in-hand.

The requested density for the proposal is 19.41 units per acre. The property is zoned residential multifamily high density (RM-16) and the proposal is to rezone to residential multifamily high density conditional zone (RM-16 CZ).

The site is a 3.70 acre site located at 29 Oak Hill Drive located about 450 feet from New Leicester Highway. The site is accessed from a driveway along Oak Hill and then opens to a wider area below the level of the road. Prior to this application the site was graded to its current condition and has few existing trees except at the top of the site at the street. The railroad is adjacent to this parcel and the right of way area (RR ROW) covers a significant portion of the parcel and affects placement of site improvements including buildings and plantings. The site also has a section of sewer line that crosses this property. Trees and structures are not allowed in the sewer line easement area.

The area has a variety of commercial uses along New Leicester Highway and single-family uses surrounding the proposed site to the east and north along Oak Hill Drive.

Access to the property is from Oak Hill Drive. This road has several connections to local streets including New Leicester Highway to the west and Hazel Mill Road to the northeast. A new sidewalk is proposed along Oak Hill Drive along the frontage area and an internal sidewalk will provide access into the site. There are 81 parking spaces provided on the plans which also will accommodate a required fire truck turn-around. The site is within 500 feet to transit service on New Leicester Highway. The ART route W4 travels along New Leicester Highway and back to downtown Asheville.

Landscaping is required for this parcel including street trees, parking lot landscaping, building impact landscaping, dumpster screening and tree-save plantings. The proposed landscaping meets or can meet the requirements of this section.

Open space is required for the development in compliance with 7-11-4 of the UDO. Open space is required at the rate of 500 square feet per unit for a total of .83 acre. The site plans show sufficient area to meet this standard.

The Technical Review Committee (TRC) reviewed this application at their meeting on April 20, 2015 and approved it with conditions. The Planning and Zoning Commission review the project at their meeting on May 6, 2015. City Council provides the final review of the conditional zoning proposal. If approved by Council, the proposal will return to the Technical Review Committee for a final TRC review.

City Council may consider conditions modifying requirements pursuant to 7-7-8 of the UDO which is a part of the conditional zoning approval process.

- *Density*- The project is seeing approval of 19.41 units per acre. The district standard is 16 units per acre. There is a verified shortage of residential units in Asheville and even accounting for the additional density the site can still meet other development standards. Affordable units are also needed for qualifying households at a variety of income levels. This proposal will provide 24 units targeted for qualifying households at 50% of AMI and 5 units for qualifying households at 80% of AMI.

- *Setbacks*- Setbacks in RM-16 are generally 40 feet from side and rear property lines when a single structure contains over 14 residential units. The project is seeking a setback reduction from 40 feet to 20 feet due to the location of the RR ROW which constrains the site and limits the locations where buildings may be located. The RR ROW is about .4 acre and does not permit any other features in this area.

- *Parking*- The UDO provides a formula for parking based on the land use and the number of bedrooms. The UDO requires 86 spaces and the current plans show 81 spaces. Staff recommends that 10 additional bicycle parking spaces be provided (over the minimum of 5%) to help offset the lower number of parking spaces for automobiles.

The applicant is proposing to conditionally rezone the site from RM-16 (residential multifamily high density) to the RM-16-CZ (residential multifamily high density conditional zone) as a way to impose conditions different from the zoning district standards as explained in the conditions section above. Properties to the north, west, and east are also zoned RM-16. These areas have mostly single family residential uses on them with some areas with larger vacant tracts. The existing cemetery on the south-east side of the tract is zoned RS-2. The area to the south is zoned Highway Business (HB) which allows a wide range of commercial and residential uses. The Salvation Army operates a donation center and store there. The proposed residential use is compatible with the residential uses in the surrounding area. Higher density zoning areas are often located where community infrastructure is in place and community services such as shopping centers and employment opportunities are nearby. Higher density multifamily zoned areas can act as a reasonable buffer from commercial areas and other lower density residential areas.

The Comprehensive Plan supports affordable housing as a crucial community need with concerns about the lack of available units. In addition the Comprehensive Plan is supportive of infill development where the infrastructure is sufficient and community services are close by to support the use. Other council adopted plans and studies have highlighted the continued scarcity of affordable units.

The proposal is aligned with the second focus area of the Strategic Plan, *Affordability and Economic Mobility*. The plan seeks to promote affordable housing close to the CBD, jobs and transportation. The proposal provides 29 of the 72 units at affordable rates and is located with access to transit service, employment and other community services.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations:

- The proposal provides 72 residential units with an affordable component included at a rate of 24 one-bedroom units provided at 50% of AMI for a period of ten years (renewable for up to 30 years) and 5 additional units provided at 80% of AMI for a period of ten years.
- The proposal is conveniently located to transit and transportation systems.
- Shopping and employment centers are also in close proximity to the project site.
- The existing railroad right of way impacts the placement of structures and parking area on the parcel.

On May 6, 2015, the Planning and Zoning Commission recommended approval with a 5-0 vote. At the meeting four neighbors who live near the project site spoke during the public hearing. The main concerns were about existing traffic on Oak Hill Drive. Oak Hill Drive provides a connection between New Leicester Highway and Hazel Mill Road. Some neighbors were also concerned about existing condition and width of Oak Hill Drive. The project itself is not expected to have a major impact on traffic volumes.

Staff recommends approval of the proposed Oak Hill Village conditional zoning along with the conditions requested, finding the proposal consistent with City-adopted plans and strategic goals.

When Councilwoman Wisler asked where people would park if more parking was needed, Mr. Glines said that there is at least one parking space per unit and that if there was no landscape buffer in the front of the project, people might park there.

Mayor Manheimer opened the public hearing at 8:02 p.m.

Mr. Ward Griffin, applicant, said that he was excited with this great site and great design. They will have 29 of their 72 units at an affordable level. He said that will also complete the City's land use incentive grant where they intend to commit to another 10 units to affordability. He noted that a concern expressed by the community that Oak Hill Drive is being used as a cut through. They are prepared to commit to $5,000 for traffic calming measures off site. He asked for Council's support.

In response to Councilman Pelly, Mr. Griffin said that there will not be a full-time property manager for the 72 units on site, but they will have areas for case managers and some property management in one of the buildings on site.

Councilman Pelly acknowledged the small portion of sidewalk on Oak Hill Drive.

Mr. Rich Lee, representing the Greenway Commission, said that the railroad is the potential future West Asheville Rails to Trails Greenway and when that happens, he hoped we are committed to making sure that West Asheville Rails to Trails Greenway happens.

Mr. Glines noted that a condition regarding the owner/developer providing $5,000 for traffic calming measures will be added to the list of conditions.

Mr. Alan Ditmore said that when people have a problem parking they use alternative transportation modes. He suggested the City stop actively creating parking.

Mayor Manheimer closed the public hearing at 8:10 p.m.

In response to Councilman Pelly, City Traffic Engineer Jeff Moore said that Oak Hill Drive is number three on the list of traffic calming projects. That project is funded for this year and the $5,000 offered will be placed in the traffic calming fund.

When Councilman Pelly asked what the schedule is on Leicester Highway sidewalks, Mr. Moore only knew that the project is in process; however, he felt that Transportation Director Ken Putnam would follow-up with Council on the timing of that project.

In response to Councilman Pelly, Mr. Moore acknowledged that there is no traffic light at the intersection of Leicester Highway and Oak Hill Drive to allow people to cross Leicester Highway to catch the bus. He said that Leicester Highway is a N.C. Dept. of Transportation road and felt that as demand grows the likelihood of a signal would increase.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved to conditional zoning request for Oak Hill Village on 29 Oak Hill Drive from zoning RM-16 (residential multifamily high density) to the RM-16-CZ (residential multifamily high density conditional zone) and find that the request is reasonable, is in the public interest, and is consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) the proposal provides 72 residential units and of these 29 will be affordable units which

are needed in the community (2) the site is conveniently located for transit and transportation facilities, and (3) shopping and employment centers are located nearby. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 30 - PAGE 10

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO A CONDITIONAL ZONING OF PROPERTY LOCATED ON 673 SAND HILL ROAD TO ALLOW THE DEVELOPMENT OF ONE ADDITIONAL RESIDENTIAL UNIT IN AN UNFURNISHED SPACE IN AN EXISTING BUILDING

ORDINANCE NO. 4423- ORDINANCE TO AMEND CONDITIONALLY ZONE PROPERTY LOCATED ON 673 SAND HILL ROAD TO ALLOW THE DEVELOPMENT OF ONE ADDITIONAL RESIDENTIAL UNIT IN AN UNFURNISHED SPACE IN AN EXISTING BUILDING

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to amend conditionally zone property located on 673 Sand Hill Road to allow the development of one additional residential unit in an unfinished space in an existing building. This public hearing was advertised on May 15 and 22, 2015.

The original conditional zoning was approved by City Council in 2007, under Ordinance no. 3546.

The overall project site consists of two parcels (PINs 9627.59-1752 & 9627.49-9750) with a combined area of approximately 5.9 acres located at 673 Sand Hill Road. The parcels were conditionally rezoned from RM-6 to RM-8 by City Council in 2004 and 2007 and the Sand Hill Apartments are complete and occupied. Adjacent zoning includes RS-4 to the north, RM-6 to the east and west and Institutional-CZ to the south.

In 2004, City Council approved a conditional use rezoning (RM-6 to RM-8) for parcel 9627.49-9750 for the renovation and construction of a multi-family residential project, resulting in 25 units in six buildings. In 2007, a similar conditional zoning request for the adjacent parcel (9627.59-1752) was approved for the construction of 23 units in six buildings. The development has been constructed and under operation since then. With the 2007 approval, a condition was placed requiring the 23 units on the second parcel/phase to be deed restricted as affordable for a period of ten years, however since then the development went through a bank foreclosure process that eliminated the deed restriction for the new owner. This proposal would propose to add one unit in Building G on the second phase/parcel, resulting in a total of 49 units for the overall development.

Building G contains an unfinished space and the current owner is requesting to create one additional residential unit within this area of the building. No additional site work is required by the additional unit.

The parcels are accessed via a 20 foot private right-of-way (Deed Book 1400, Page 415) to Sand Hill Road. No changes to access are proposed or required.

The overall site is compliant with regards to parking and no additional spaces are required by the additional unit. Additionally, landscaping and open space were compliant from the 2007 approval.

The additional unit brings the residential density for the overall site up to 49 units; a total of 51 units would be the maximum allowed for the project area.

This proposal was approved with conditions by the Technical Review Committee on May

4, 2015. The Planning & Zoning Commission unanimously recommended approval at their meeting on May 21, 2015. Final TRC review is required prior to issuance of a zoning permit. No communication has been received from the public as of the writing of this report.

The apartment complex was approved and constructed through two separate conditional zoning actions, in 2004 and 2007. The development was approved with compliant parking, landscaping and open space and as the application is to finish out one additional residential unit within an existing building with no other site work, this proposal is considered compatible with the surrounding area.

One of the smart growth principles in the Asheville City Development Plan 2025 highlights the importance of higher density infill development where infrastructure can easily be provided. This is an existing development that was approved in 2007 and the additional unit can be included without site work or impact. Also, the Plan speaks at length about the issue of affordable housing. Staff has confirmed with the Housing Authority that this applicant is an established provider of dedicated housing units. Seven of the apartments are currently coordinated with the Housing Authority, which amounts to approximately 15% of the total number of units in the development being affordable.

Based on the above findings and the analysis provided in the staff report and as stated in the recommendation below, staff finds this request to be reasonable, consistent with the comprehensive plan and within the best public interest.

Considerations:

- The development is existing and established; the additional unit will be provided in an unfinished space requiring no additional site work outside of the structure.
- The applicant is a provider with the Housing Authority to provide dedicated units within the existing development.

Staff recommends approval of the proposed conditional zoning amendment to add one residential unit in the existing development, finding it consistent with City-adopted plans and strategic goals for development.

Mayor Manheimer opened the public hearing at 8:17 p.m. and when no one spoke, she closed the public hearing at 8:17 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell moved to recommend approval of the conditional zoning request for 673 Sand Hill Road from RM-8 CZ to RM-8 CZ and find that the request is reasonable, is in the public interest and is consistent with the Comprehensive Plan and other adopted plans in that: (1) The development is existing and established through the 2007 conditional zoning; and (2) The one additional unit will be in an existing building and does not require any site work or disturbance. This motion was seconded by Councilman Pelly and carried unanimously.

ORDINANCE BOOK NO. 30 - PAGE 17

E. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO SECTION 7-11-8 (b) (4) TO CORRECT AN EARLIER AMENDMENT THAT PROVIDES A CLARIFICATION FOR A THRESHOLD FOR WHEN SIDEWALKS ARE REQUIRED

ORDINANCE NO. 4424 - ORDINANCE TO AMEND THE UNIFIED DEVELOPMENT ORDINANCE TO SECTION 7-11-8 (b) (4) TO CORRECT AN

EARLIER AMENDMENT THAT PROVIDES A CLARIFICATION FOR A THRESHOLD FOR WHEN SIDEWALKS ARE REQUIRED

Interim Planning Director Alan Glines said that this is the consideration of an ordinance to amend the Unified Development Ordinance to Section 7-11-8(b)(4) to correct an earlier amendment that provides a clarification for a threshold for when sidewalks are required. This public hearing was advertised on May 29 and June 5, 2015.

Currently, among the variety of conditions for when sidewalks are required, item (4) reads:

> *"All existing office, institutional, commercial, and industrial development additions or expansions to structures where the expansion results in an increase of more than 50 percent value of the structure as defined in section 7-11-1 of this chapter;"*

An amendment was approved in 2009 that revised the 50 percent threshold up to 75 percent. This was done to provide some minor relief for when properties were being renovated or retrofitted for new uses to encourage reinvestment and new business uses. During a later amendment, this same threshold was changed back to 50 percent by what appears to have been a typographical error. This has resulted in some inconsistencies within in the UDO.

Therefore, this ordinance amendment seeks to correct this requirement to say that, "*All existing office, institutional, commercial, and industrial development additions or expansions to structures where the expansion results in an increase of more than **75** percent value of the structure as defined in section 7-11-1 of this chapter*"

The Comprehensive Plan speaks to the need for and support for community infrastructure such as sidewalks and seeks to balance new investment and reinvestment in new construction activities in support of community infrastructure.

Staff recommends approval of this proposed amendment because it corrects an inconsistency in the ordinance and supports the construction of needed sidewalk infrastructure. The Planning and Zoning Commission reviewed the amendment at their meeting on May 6, 2015 and voted unanimously to recommend approval.

Mayor Manheimer opened the public hearing at 8:19 p.m. and when no one spoke, she closed the public hearing at 8:19 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Wisler moved to approve the proposed amendment to Section Sec. 7-11-8(b)(4) as outlined in this report and find that the request is reasonable and is consistent with the Comprehensive Plan and other adopted plans, because it supports the construction of needed community infrastructure and provides a correction to the ordinance. This motion was seconded by Councilman Pelly and carried unanimously.

ORDINANCE BOOK NO. 30 – PAGE 24

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. RESOLUTION NO. 15-121 - RESOLUTION AUTHORIZING THE APPROVAL OF THE 2015-16 STRATEGIC PARTNERSHIP FUND GRANTS

Community Development Manager Heather Dillashaw said that this is the consideration of a resolution approving the recommendations of the Housing & Community Development Committee for the 2015-16 Strategic Partnership.

The Housing & Community Development (HCD) Committee received applications from 17 eligible organizations for Strategic Partnership Funds for 2015-16, for a total of $315,885. One application was withdrawn after submittal. The Committee considered these applications at their meeting on May 19, 2015, and recommends six applications for funding. The recommendations are:

Agency	Funding Support Purpose	2015 Funding Recommendation
Asheville Design Center	Support of the Asheville Design Center's effort to design and construct an Outdoor Learning Center at Hall Fletcher Elementary.	4,000
Blue Ridge Food Ventures	Support-shared use production at Blue Ridge Food Ventures through 90 unique food and natural products businesses.	25,000
Children First/Communities in Schools	Learning Center program: an afterschool safe haven where economically disadvantaged students receive academic assistance, a healthy snack, and enrichment activities, completely free of cost. Our Learning Centers emphasize education and reduce the achievement gap by offering academic assistance and mentoring relationships for students.	20,000
Homeward Bound of WNC	Fund will support the new AHOPE Coordinated Assessment Program from July 1, 2015 through June 30, 2016.	28,400
Pisgah Legal Services	Pisgah Legal Services will utilize the Strategic Partnerships Fund grant to research and draft policies related to increasing and improving affordable housing in the City of Asheville, including an incentive-based inclusionary zoning policy.	9,000
YWCA	Support the MotherLove Program for pregnant and parenting teens with goals of ensuring participants graduate high school, enroll in secondary education, vocational training or employment at a livable wage and delay a subsequent pregnancy.	12,000

Total recommended funding is $98,400. This amount is unchanged from last year's Strategic Partnership Fund Program.

Pros:

- Approval of the Strategic Partnership Fund provides operating support to Asheville-based organizations that are providing direct services for Asheville residents.
- The Strategic Partnership Fund reflects the carefully considered recommendations of the City's Housing & Community Development Committee.

Con:

- Budget constraints continue to curtail the availability of funds; supported organizations will need to find alternate sources of program support. All worthy proposals could not be funded.

Strategic Partnership Funds are funded from the City's general fund. The funding recommendations do not exceed the fiscal limits included in the FY 2015-2016 Proposed Budget of $98,400.

The HCD Committee recommends approval of the 2015-16 Strategic Partnership Fund grants as presented.

After a brief discussion, it was the consensus of Council to

After discussion, it was the consensus of the majority of Council to allocating an additional $50,000 (from the excess $700,000 fund balance) to the Strategic Partnership Fund and refer the strategic partnership funding process back to the Housing & Community Development Committee for another recommendation at the Council's June 23, 2015, meeting. Said review should include all prior applications received but not funded, with an emphasis on agencies that have been partners with the City in the past.

Rev. L. C. Ray, CEO of One Youth at a Time, thanked City Council for this re-consideration of funding.

Mr. Alan Ditmore spoke about the small amount of funding for the YWCA.

Community Engagement Coordinator for Asheville Greenworks also thanked Council for their re-consideration of funding, again noting their work with the low income community.

Ms. Kathy Peterson, representing Blue Ridge Food Venture, thanked City Council for their support.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 15-121. This motion was seconded by Councilwoman Wisler and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 176

B. RESOLUTION NO. 15-120 - RESOLUTION APPOINTING A CHAIR TO THE CIVIL SERVICE BOARD

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said it is the responsibility of City Council to annually appoint the Chair of the Civil Service Board.

In 2013, a process was established for future appointments to the chair role of the Civil Service Board. Said process offered members of the Civil Service Board to express interest in serving as Chair.

At the Civil Service Board meeting on June 4, 2015, all members were advised to contact City Clerk Burleson if they were interested in serving as Chair. Mr. Coxie was the only interested member.

Mayor Manheimer moved to reappoint Mr. Alan Coxie as Chairman of the Civil Service Board to serve a one-year term until your successor is duly appointed or until your term on the Civil Service Board expires, whichever occurs first. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37- PAGE 175

C. BOARDS & COMMISSIONS

RESOLUTION NO. 15-122 – RESOLUTION APPOINTING A MEMBER TO THE AFRICAN AMERICAN HERITAGE COMMISSION

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the African American Heritage Commission.

The term of Marvin Chambers expires on July 1, 2015.

The following individuals applied for a vacancy: Tiffany DE'Bellott and Alberta Williams.

It was the consensus of the Boards & Commissions Committee to reappoint Mr. Chambers.

Vice-Mayor Hunt moved to reappoint Marvin Chambers to serve a three-year term, term to expire July 1, 2018, or until his successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 37- PAGE 177

RESOLUTION NO. 15-123 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ELECTRICAL EXAMINERS

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Board of Electrical Examiners.

The terms of Tommy Wilson, Phil Wilson, David Martin, Gus Sims and Ken Frisbee expire on July 1, 2015.

The following individuals have applied for a vacancy: George Grigg and Charlie Wheeler.

The Boards & Commissions Committee recommended (1) reappointing David Martin (utility representative), Gus Sims (licensed engineer), and Ken Frisbee (layman); and (2) appointing George Grigg (electrical contractor) and Charlie Wheeler (journeyman electrician).

Vice-Mayor Hunt moved to (1) reappoint David Martin (utility representative), Gus Sims (licensed engineer), and Ken Frisbee (layman); and (2) appointing George Grigg (electrical contractor) and Charlie Weaver (journeyman electrician). All terms to expire July 1, 2018, or until their successors have been appointed. This motion was seconded by Councilwoman Wisler and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 178

460

RESOLUTION NO. 15-124 - RESOLUTION APPOINTING MEMBERS TO THE CIVIC CENTER COMMISSION

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointment members to the Civic Center Commission.

The terms of Joel Storrow, Chris Bubenik and J. Michael Burke expire on June 30, 2015.

The following individuals applied for a vacancy: Greg Duff, Anthony Mitchell, Harris Livingstain and Shelia Surrett.

It was the consensus of the Boards & Commission Committee to reappoint Mr. Storrow and Mr. Bubenik and appoint Greg Duff

Vice-Mayor Hunt moved to (1) reappoint Mr. Storrow and Mr. Bubenik to each serve a three year term respectively, terms to expire June 30, 2018; and (2) appoint Greg Duff to serve a three-year term, term to begin July 1; 2015, and expire June 30, 2018, or until his successor is appointed. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 179

RESOLUTION NO. 15-125 – RESOLUTION APPOINTING A MEMBER TO THE DOWNTOWN COMMISSION

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Downtown Commission.

Mr. Bruce Hazzard has resigned from the Downtown Commission, thus leaving an unexpired term until December 31, 2015.

The following individuals applied for the vacancy: Brent Campbell, John Menkes, Guillermo Rodriguez, Constance Richards, Drea Jackson, Audra Gaiziunas, Rae Geoffrey and Kelly Prime.

It was the consensus of the Boards & Commissions Committee to appoint Brent Campbell.

Vice-Mayor Hunt moved to appoint Brent Campbell to serve the unexpired term of Mr. Hazzard, term to expire December 31, 2015, or until his successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 37- PAGE 180

RESOLUTION NO. 15-126 – RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Asheville-Buncombe Historic Resources Commission.

The terms of William Eakins and Tracey Rizzo expire on July 1, 2015.

No individuals applied for a vacancy.

It was the consensus of the Boards & Commissions Committee to reappoint Mr. Eakins and Ms. Rizzo.

Vice-Mayor Hunt moved to reappoint William Eakins and Tracey Rizzo to each serve a three-year term, terms to expire July 1, 2018, or until their successors have been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37- PAGE 181

RESOLUTION NO. 15-127 - RESOLUTION APPOINTING MEMBERS TO THE MULTIMODAL TRANSPORTATION COMMISSION

Vice-Mayor Hunt said that this is the consideration of appointing members to the Multimodal Transportation Commission.

The terms of Julie Mayfield, Mary Weber and Don Kostelec expire on July 1, 2015. In addition, there currently exists a vacancy left by Robert Roepnack, whose term will expire July 1, 2016.

Vice-Mayor Hunt moved to (1) reappoint Julie Mayfield (representing Transit Committee), Mary Weber (representing Greenway Commission), and Don Kostelec (representing the Bike and Pedestrian Task Force), to each serve a three-year term, terms to expire July 1, 2018, or until their successors have been appointed; and (2) postpone the appointment of the Neighborhood Advisory Committee representative until the Neighborhood Advisory Committee has a full board. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 182

RESOLUTION NO. 15-128 – RESOLUTION APPOINTING MEMBERS TO THE NEIGHBORHOOD ADVISORY COMMITTEE

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Neighborhood Advisory Committee.

The terms of Spencer Hardaway, Saul Chase and Joe Fioccola expire on July 1, 2015. In addition, Mr. Robert Roepnack has resigned, thus leaving an unexpired term until July 1, 2017.

The following individuals applied for a vacancy: Julie Hansbury, Philip Lenowitz and Greta Bush.

It was the consensus of the Boards & Commissions Committee, and recommendation from the Neighborhood Advisory Commission, to reappoint Mr. Hardaway and Mr. Fioccola and appoint Greta Bush and Philip Lenowitz.

Vice-Mayor Hunt moved to (1) reappoint Spencer Hardaway (representing 28803 or 28704 zip code), and Mr. Joe Fioccola (representing 28801 zip code); to each serve a three-year term, terms to expire July 1, 2018, or until their successors have been appointed; and (2) appoint Greta Bush (representing at-large) to serve a three-year term, term to expire July 1, 2018, or until her successor has been appointed; and (3) appoint Philip Lenowitz (representing 28804 zip code) to fill the unexpired term of Mr. Roepnack, term to expire July 1, 2017, or until his successor has been appointed. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37- PAGE 183

RESOLUTION NO. 15-129 – RESOLUTION APPOINTING MEMBERS TO THE NOISE ORDINANCE APPEALS BOARD

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Noise Ordinance Appeals Board.

The terms of Beau Dean (Regular member) and Elizabeth Franks (Alternate member) expire on July 1, 2015.

The following individuals have applied for a vacancy: Robert Glenn and Tod Leaven.

It was the consensus of the Boards & Commissions Committee to appoint Tod Leaven as a Regular member and appoint Robert Glenn to the Alternate seat.

Vice-Mayor Hunt moved to (1) appoint Tod Leaven as a Regular member to serve a three-year term, term to expire July 1, 2018; and (2) appoint Robert Glenn as an Alternate member to serve a three-year term, term to expire July 1, 2018. Both appointments will be until their successors have been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 184

RESOLUTION NO. 15-130 – RESOLUTION APPOINTING MEMBERS TO THE PUBLIC ART & CULTURAL COMMISSION

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Public Art & Cultural Commission.

The terms of Sharon Trammel, Robert Todd and Constance Richards expire on June 30, 2015.

The following individuals have applied for a vacancy: Nancy Long, Irene Morris, Rob Laboray, K. Johnson Bowles, Monika Gross and Audra Gaiziunas.

It was the consensus of the Boards & Commissions Committee to reappoint Ms. Trammel and Ms. Richards and appoint K. Johnson Bowles.

Vice-Mayor Hunt moved to (1) reappoint Sharon Trammel and Constance Richards to each serve a three-year term respectively, terms to expire June 30, 2018, or until their successors have been appointed; and (2) appoint K. Johnson Bowles to serve a three-year term, term to expire June 30, 2018, or until her successor has been appointed. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37- PAGE 185

RESOLUTION NO. 15-131 – RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Recreation Board.

The terms of Barry Mundt, Forest Merithew, Robert Pierce, Hutch Kerns and Ashley Arrington expire on June 30, 2015. In addition, Josh O'Conner and Patrick Dennehy have resigned from the Commission, thus leaving two unexpired terms until June 30, 2017.

The following individual has applied for a vacancy: Dean Pistor.

It was the consensus of the Boards & Commissions Committee to reappoint Mr. Mundt, Mr. Merithew, Mr. Pierce and Ms. Arrington; and to re-advertise.

Vice-Mayor Hunt moved to (1) reappoint Barry Mundt, Forest Merithew, Robert Pierce, and Ashley Arrington to each serve a three-year term respective, terms to expire June 30, 2018, or until their successors have been appointed; and (2) re-advertise. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 186

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 8:47 p.m.

Magdalen Bullock
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – June 23, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; Assistant City Manager Paul Fetherston; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING JUNE 22-26, 2015, AS "BLUE RIDGE QUARTER PARKWAY WEEK"

Mayor Manheimer read the proclamation proclaiming June 22-26, 2015, as "Blue Ridge Quarter Parkway Week" in the City of Asheville. She presented the proclamation to Ms. Leesa Sutton Brandon, Partnerships & Public Information for the Blue Ridge Parkway, who briefed the Council on some activities taking place during the week.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 9, 2015

B. TECHNICAL BUDGET AMENDMENTS

ORDINANCE NO. 4425 - TECHNICAL BUDGET AMENDMENT (1) FROM UNBUDGETED DEGRADATION FEE REVENUE COLLECTED IN THE GENERAL FUND THAT IS DESIGNATED FOR THE RESURFACING PROGRAM AND (2) FROM UNBUDGETED LAND SALE PROCEEDS COLLECTED IN THE GENERAL FUND THAT ARE TO BE DESIGNATED FOR THE CAPITAL IMPROVEMENT PROGRAM

Summary: The consideration of two year-end Fiscal Year (FY) 2015 technical budget amendments: (1) in the amount of $328,314.33 from unbudgeted Degradation Fee Revenue collected in the General Fund that is designated for the resurfacing program; and (2) in the amount of $308,249.51 from unbudgeted land sale proceeds collected in the General Fund that are to be designated for the Capital Improvement Program (CIP).

Degradation Fee Revenue

When the City began the Street Cut Program in FY 2011, it included a degradation fee component of the program. This fee allows utilities that are participating in the Street Cut Program to pay a fee instead of overlaying its cut when the road condition is failing (usually below a rating of 60). This fee is calculated by using the Pavement Condition Rating (PCR) and a percent of an estimated overlay cost. Revenue from the degradation fee is set aside to fund the City's resurfacing program. Up until this current fiscal year, the resurfacing program has been budgeted in the General Fund with degradation fee revenue also budgeted and recorded in the General Fund rather than the Street Cut Fund. From the Street Cut Program's inception through

this current fiscal year, the City has collected $328,314.33 more in degradation fee revenue than has been budgeted. This unspent revenue has been shown as assigned fund balance in the annual audited financial report each year, and therefore not included in the City's unassigned (available) fund balance. The technical budget amendment would appropriate this $328,314.33 in the General Fund and transfer it to the General Capital Projects Fund where it would be added to the FY 2015 street resurfacing project budget. It should be noted that beginning in FY 2016, degradation fee revenue will be recorded in the Street Cut Fund. This revenue will be utilized as it comes in by the City through the Public Works Department to execute smaller paving contracts outside the main resurfacing contract.

Land Sale Revenue

During FY2013, the City began designating land sale revenue to directly support the City's Capital Improvement Program (CIP). As the City has sold land over the last few years, proceeds from the sales have been recorded in the General Fund with the plan of eventually transferring the revenue over to the General Capital Projects Fund to support the CIP. Like degradation fee revenue, land sale proceeds have been shown as assigned fund balance in the annual audited financial report each year, and therefore not included in the City's unassigned (available) fund balance. To date, the City has collected $308,249.51 in land sale revenue. The technical budget amendment would appropriate this $308,249.51 in the General Fund and then transfer it to the General Capital Projects Fund.

Pros:

- Provides additional budget authorization for the FY 2015 resurfacing project.
- Reduces the amount of funds that staff must track and reported as assigned in the City's Comprehensive Annual Financial Report (CAFR).

Con:

- None.

As noted above, both degradation fee revenue and land sale revenue were recorded in the assigned portion of General Fund fund balance in the FY2014 CAFR. Therefore, this budget amendment will have no impact on the City's General Fund unassigned fund balance.

Staff recommends City Council approve the following technical budget amendments: (1) in the amount of $328,314.33 from unbudgeted Degradation Fee Revenue collected in the General Fund that is designated for the resurfacing program; and (2) in the amount of $308,249.51 from unbudgeted land sale proceeds collected in the General Fund that are to be designated for the Capital Improvement Program.

ORDINANCE BOOK NO. 30 - PAGE 26

C. ORDINANCE NO. 4426 - BUDGET AMENDMENT IN THE WATER RESOURCES FUND TO BUDGET THE REFUNDING OF THE SERIES 2005 AND 2007 WATER REVENUE BONDS

Summary: The consideration by City Council of a technical budget amendment in the Water Resources Fund in the amount of $57,002,939 to budget the refunding of the Series 2005 and Series 2007 Water Revenue Bonds.

On June 11, the City closed on the 2015 Water System Revenue Refunding Bond (Green Bonds) transaction. The financing generated $57,002,939 in bond proceeds which are being used to refinance the Series 2005 and Series 2007 Water Revenue Bonds. The financing was completed at an All-in True Interest Cost (TIC) rate of 2.702% with a final maturity in Fiscal Year (FY) 2033. The refunding generated total cash flow savings (new debt service, including all costs compared to the old debt service) of approximately $8,240,000 through 2033.

The FY 2014-15 Water Resources Fund budget did not include appropriations reflecting this refunding transaction. This technical amendment incorporates into the budget the refunding and the costs of execution and delivery.

Pro:

- Amends the FY 2014-15 budget to provide sufficient budget authorization to record the 2015 Water System Revenue Refunding Bond (Green Bonds) transaction.

Con:

- None.

As noted above, the refunding generated total cash flow savings (new debt service, including all costs compared to the old debt service) of approximately $8,240,000 through Fiscal Year 2033.

Staff recommends Council approve the technical budget amendment in the Water Resources Fund in the amount of $57,002,939 to budget the refunding of the Series 2005 and Series 2007 Water Revenue Bonds.

ORDINANCE BOOK NO. 30 - PAGE 28

D. RESOLUTION NO. 15-133 - RESOLUTION ADOPTING A POLICY TO PREQUALIFICATION OF BIDDERS FOR CONSTRUCTION PROJECTS

Summary: The consideration of a resolution to adopt a prequalification policy applicable to particular construction or repair projects and first tier subcontractors on construction manager at risk projects.

In 2014, the North Carolina General Assembly adopted Session Law 2014-42, which amended NCGS §143-135.8 and NCGS §143-128.1, regarding prequalification of construction contractors and Construction Manager at Risk projects. The statutory amendments provide general authorization to local governments to prequalify contractors for construction or repair projects that are bid under the single-prime, separate-prime (multi-prime), or dual bidding methods as well as the first tier subcontractors on Construction Manager at Risk projects.

Prequalification is defined under the amended N.C.G.S. 143-135.8(f)(2) as "a process of evaluating and determining whether potential bidders have the skill, judgment, integrity, sufficient financial resources and ability necessary to the faithful performance of a contract for construction or repair work."

In order to prequalify bidders, City Council must adopt an objective prequalification policy prior to the advertisement of the contract for which the City intends to prequalify bidders.

The Prequalification Policy was prepared by the City's Purchasing Division and Legal Department, borrowing language from the State of North Carolina and other North Carolina local government prequalification policies. All affected City Departments have reviewed the Prequalification Policy.

Pros:

- Policy enables the City to prequalify bidders for certain construction/repair projects.
- Provides for uniformity, consistency and transparency.
- Ability to identify contractors with proven performance before the bid process is started, particularly on large projects and projects that require specialized skills or are fast-tracked.

Con:

- None

Staff recommends City Council adopt a resolution adopting the prequalification policy.

RESOLUTION BOOK NO. 37 - PAGE 188

E. RESOLUTION NO. 15-134 - RESOLUTION AMENDING THE COMPOSITION OF THE CITIZENS-POLICE ADVISORY COMMITTEE BY CONVERTING THE ASHEVILLE POLICE OFFICER - SERGEANT IN COMMUNITY RELATIONS MEMBER POSITION FROM A VOTING MEMBER TO A NON-VOTING MEMBER

Summary: The consideration of a resolution amending the composition of the Citizen-Police Advisory Committee (CPAC) by converting the Asheville Police Officer – Sergeant in Community Relations member position from a voting member to a non-voting member.

In 1989, a Citizen-Police Advisory Committee was appointed by City Council in an ad-hoc capacity to study the relationship between the community as a whole, the African American community in particular, and the Police Department. Following its initial ad-hoc work and submission of a final report that recommended the appointment of a permanent CPAC, Council adopted Resolution No. 91-67 which created CPAC as an on-going committee. The composition of voting members currently include the following:

- Five community representatives from the North, East, South, West and Central portions of Asheville;
- Asheville-Buncombe Community Relations Council Chair;
- Asheville Police Officer – Sergeant in Community Relations or designee;
- Asheville Housing Authority Chair or designee; and
- Two ad hoc members appointed on a temporary basis in response to specific problems, incidents or events.

Non-voting members include the following:

- City Council member; and
- Asheville Chief of Police.

In reviewing the composition of the Commission, the City Manager's Office identified the voting status of the Asheville Police Officer – Sergeant in Community Relations on CPAC as a priority to address. The input and counsel provided by a member of the Asheville Police Department is important to CPAC – and can be provided more effectively in a non-voting capacity similar to the Chief of Police position.

The Boards and Commissions Committee reviewed this item at their June 9 meeting and recommended approval.

Pro:

- Enhances the integrity of the process by providing CPAC with the resource of a sworn member of the Police Department.

Con:

- None identified

City staff recommends City Council adopt a resolution amending the composition of the Citizen Police Advisory Committee by converting the Police Officer – Sergeant in Community Relations member position into a non-voting member.

RESOLUTION BOOK NO. 37 - PAGE 195

F. RESOLUTION NO. 15-135 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN ADOPT-A-PARK AGREEMENT WITH JUST FOLKS FOR A WAIVER OF PARK USE AND SPECIAL EVENTS PERMIT FEES FOR TRIANGLE PARK FOR FISCAL YEAR 2015-16

Summary: The consideration of a resolution authorizing the City Manager to sign an Adopt-a-Park Agreement with Just Folks to include a waiver of park use and permit fees for Triangle Park for FY 2015-2016.

Just Folks is a local non-profit organization whose primary purpose is to support community-building activities in the Eagle/Market Street area known as "The Block". On June 26, 2012, City Council approved a resolution authorizing the City Manager to sign an Adopt-a-Park Agreement with Just Folks that included a waiver of park use fees of up to $2,500 at the reduced rate provided for local non-profits. The waiver has made it possible for them to produce events that activate Triangle Park by providing a variety of positive activities including music festivals, community cookouts and other community-building events in the Park May to December on Saturdays and Sundays. These events have contributed to more positive use of the area and resulted in the park being used by a more diverse group of city residents and visitors.

Since May 2014, Just Folks has expanded the activities included in their events so that they require tents and food preparation in the park. This in turn has made additional permit fees for tent use and operational fire permits necessary. The City Legal Department and the Special Events/Economic Development Specialist recommended amending the original agreement to include permit fees in order to make it possible for Just Folks to produce their events as planned for this fiscal year. The additional permitting fees were minimal and could be covered by the original fee waiver amount of $2,500. Council approved the amended agreement on October 14, 2014.

The presence of Just Folks members and their programming in the park continues to contribute to the reduction of nuisance behaviors in and around the park and an improved appearance for the park. Over the past four (4) years their efforts have made the park safer and more attractive to downtown visitors and community members and helped the city meet specific City Council goals for economic and community development. The group was also instrumental in the installation of a mural commemorating the contributions of African American businesses, residents and professionals to the success of "The Block", thereby creating a visual record of the historic nature of the area and a sense of place to help preserve the legacy of the once thriving community that existed in this location.

Pros:

- Strategic partnerships allow the city to leverage programming and events to reach a wider and more diverse audience.
- Provides additional quality cultural programming and diversity in a park that is generally not used for this type of event.
- Reduces staff time in processing fee and permitting waiver requests related to this group's events.
- This action is consistent with other partnerships the City has entered into for park programming in key community development areas.
- Creates a sense of place in an historic area of the city.

Con:

- The reduction in park use and permit fees result in lost revenue for the city; however, the city has not budgeted for this revenue in FY 2015-2016.

The estimated value of the waived park usage plus the permit fees is $2,500; however, this revenue has not been included in the FY 2015-2016 budget.

Staff recommends that City Council authorize the City Manager to sign the Adopt-a-Park Agreement with Just Folks including a fee waiver for park usage and permit fees associated with programming in Triangle Park.

RESOLUTION BOOK NO. 37 - PAGE 196

G. RESOLUTION NO. 15-136 - RESOLUTION AUTHORIZING THE CITY MANAGER ENTER INTO A PROFESSIONAL SERVICES CONTRACT WITH JOHN DAVENPORT ENGINEERING INC. FOR THE REDESIGN OF LIVINGSTON STREET AND A PORTION OF DEPOT STREET INTO A COMPLETE STREET FOR CONSTRUCTION AS ONE OF THE CITY'S TIGER VI-FUNDED PROJECTS

Summary: The consideration of a resolution authorizing the City Manager to enter into a professional services contract with John Davenport Engineering, Inc., dba Davenport, for the redesign of Livingston Street and a portion of Depot Street into a complete street for construction as one of the city's TIGER VI-funded projects.

This agreement is for the design, construction documents, and environmental review stages of a project to improve Livingston Street and a portion of Depot Street from approximately 372 Depot Street to Victoria Road. This multimodal transportation project is envisioned in the TIGER II-funded East of the Riverway Connections plan, and construction is one of the city's TIGER VI projects. The project includes improving the corridor for pedestrians, bicyclists, and transit users while cycle use while maintaining functionality for motorized vehicles.

The City issued a Request for Qualifications (RFQ) for Engineering and Design Services for construction documents, including plans, specifications and estimates for complete street improvements, which included providing required environmental documents, in April 2015. The RFQ closed on April 30, 2015. Nine proposals were received from the following firms:

1. Michael Baker International, Asheville, NC
2. Davenport, Asheville
3. The Jaeger Company, Gainesville, GA
4. Mattern & Craig, Asheville, NC
5. Ramey Kemp & Associates, Raleigh, NC
6. Stewart, Inc., Raleigh, NC
7. JM Teague Traffic Engineering, Inc., Waynesville, NC
8. Vaughn & Melton Consulting Engineers, Asheville, NC
9. Wetherill Engineering, Raleigh, NC

The evaluation committee recommended Davenport as the firm to provide the services for this project. The firms were evaluated based on their qualifications, relevant experience, and technical expertise. Scope and cost were successfully negotiated with the recommended firm.

The project cost will be $233,000 and $17,000 in contingency. This plan will be completed by March 1, 2016, in order to meet TIGER VI grant deadlines.

The evaluation committee consisted of a multi-disciplinary, multi-departmental group of city staff and a member of the community.

Pro:

- This project is the first step to implementing a complete streets project that has been identified in the city's TIGER VI grant and the city's capital budget.

Con:

- The total maximum cost of the subject project is $250,000.

The cost of the design, construction documents, and environmental review for the Livingston Complete Street project will be up to $250,000. This project is already budgeted in the adopted Capital Improvement Program.

City staff recommends that City Council adopt a resolution authorizing the City Manager to enter into a professional services contract with Davenport to develop the design and construction documents, including plans, specifications and estimates, and to perform the environmental review for the Livingston Complete Streets project for the City of Asheville.

RESOLUTION BOOK NO. 37 - PAGE 197

H. ORDINANCE NO. 4427 - FIRST READING OF AN ORDINANCE GRANTING A NON-EXCLUSIVE FRANCHISE TO EXTENET SYSTEMS INC. FOR INSTALLATION OF TELECOMMUNICATIONS FACILITIES IN THE PUBLIC RIGHT-OF-WAY OF THE CITY OF ASHEVILLE

Summary: The consideration of an ordinance granting a franchise to ExteNet Systems, Inc., pursuant to the City's Telecommunications Ordinance (3056).

The City of Asheville (City) adopted Article III of the Code of Ordinances (the Telecommunications Ordinance) in 2003 to provide for the granting of revocable and non-exclusive franchises to install telecommunications facilities in the City's right-of-way. ExteNet Systems, Inc. wishes to begin operations in Asheville and requires the granting of a franchise agreement under the Telecommunications Ordinance.

Most of the substantive terms applicable to this or any telecommunications franchise are set forth in the Telecommunications Ordinance, and ExteNet Systems, by accepting the franchise, agrees to abide by the provisions of the ordinance. The main issues to be determined in connection with this particular franchise are the fee that the City will receive and the length of the franchise term.

Franchise Fee: In accordance with §4.5-85(a) of the City's Code of Ordinances, the grantee of any franchise shall pay a franchise fee or may provide non-monetary consideration including additional facilities and excess capacity to be reserved for the city's use.

With regard to a franchise fee, the Information Technologies Department determined that a two-tiered fee structure based on density would reflect the value of the right-of-way in high density areas while encouraging the extension of service into under-served and less dense areas. Within the downtown area (defined as Charlotte/South Charlotte Streets on the east; Beaumont/Hilliard Streets on the south; Clingman/Haywood Streets on the west; and I-240 on the north), the rate is proposed to be $.10 per foot per month for each linear foot of right-of-way used for the installation. Outside of this core area, the rate drops to $.02 per foot per month. In lieu of an estimated fee of approximately $2,850/year for the initial installation of 2 ¼ miles of fiber running along S. Tunnel Road, White Pine Ct. and River Hills Road, ExteNet Systems has agreed to provide the City with the exclusive use of 8 strands of fiber. The estimated value of this fiber is approximately $70,000. ExteNet also has agreed to provide 8 strands of fiber in all subsequent fiber build requests.

Franchise Term: ExteNet Systems has requested a 10-year term, renewable for two 10-year terms, unless either party terminates.

Installation: Pursuant to §4.5-85(d), any installation relative to a franchise in the public rights-of-way must submit a construction plan and receive approval from the City Engineer.

Considerations:

1. This will be the City's third franchise agreement of this type.
2. The City has the obligation to protect and preserve its right-of-way for public use, and the right to expect fair compensation for its use by profit-making enterprises. The compensation that we receive should be fair and equitable, and we may not prefer one provider over another.
3. There is significant public interest in enabling telecommunications providers to provide their service, and especially to enable, or at least not obstruct, provision of such service to less densely populated and underserved areas.

Staff recommends that Council grant a franchise to ExteNet Systems by adoption of the ordinance. Staff is available to assist in determining options relative to the proposed fee schedule and the term. Since this is a franchise ordinance, a second reading of it will be required.

ORDINANCE BOOK NO. 30 - PAGE 30

I. ORDINANCE NO. 4428 - BUDGET AMENDMENT TO COVER COSTS ASSOCIATED WITH THE UNEXPECTED REPAIR NEEDS TO THE EXHIBIT HALL AIR CONDITIONING UNITS AT THE U.S. CELLULAR CENTER

Summary: The consideration of a budget amendment in the amount of $72,038 in the U.S. Cellular Center Capital Fund utilizing savings in the U.S. Cellular Center Operating Fund to cover costs associated with unexpected repair needs to the Exhibit Hall Air Conditioning units.

The original to the building (1974) air conditioning units designed to cool the Exhibit Level space at the U.S. Cellular Center have experienced a major part failure, resulting in the in-ability to cool one of the four levels of rentable event space at the facility. After review and consultation from the City's purchasing department, multiple repair companies and suppliers staff determined repair of the AC coils is the best option for the City as compared to replacement of the units as a whole.

Pros:

- Repair to currently non-functional Air Conditioning Unit
- 1 year parts and labor warrantee
- Will allow for space to be cooled during contracted events which the building will be hosting in August & September.

Con:

- $72,037.46 cost is an unplanned expense

The budget amendment will authorize a project budget in the U.S. Cellular Center Capital Fund in the amount of $72,038 for the repair work. The funding for the project will come from savings within the U.S. Cellular Center Operating Fund's FY 2014-15 budget.

City staff recommends City Council adopt a budget amendment in the amount of $72,038 in the U.S. Cellular Center Capital Fund utilizing savings in the U.S. Cellular Center Operating Fund to cover costs associated with unexpected repair needs to the Exhibit Hall Air Conditioning units.

ORDINANCE BOOK NO. 30 - PAGE 54

J. ORDINANCE NO. 4429 - BUDGET AMENDMENT FOR JOB ACCESS AND REVERSE COMMUTE PEDESTRIAN SIGNAL GRANT

Summary: The consideration of a budget amendment in the General Capital Projects Fund in the amount of $13,063 from General Fund savings to increase city funding for the existing Job Access and Reverse Commute (JARC) pedestrian signal grant.

In 2010, the city successfully applied to the French Broad River Metropolitan Planning Organization (MPO) for Federal Transit Administration (FTA) JARC funding to install pedestrian signals at intersections that connect people to transit and jobs; the intersections are as follows:

1) Haywood Road and Louisiana Avenue,
2) Clingman Avenue and Hilliard Avenue,
3) Choctaw Street and McDowell Road, and
4) Biltmore Avenue and Southside/South Charlotte Street.

The project's original plan and cost estimates were based on the traffic engineering and signal work being carried out by the N.C. Dept. of Transportation (NCDOT) and/or it's contractors under a reimbursable agreement between NCDOT and the city, but that proved impossible. NCDOT was able to provide signal plans for one of the intersections, Clingman Avenue and Hilliard Avenue. The city subsequently used JARC funding to have the pedestrian signals at that intersection installed by a contractor. The city also proceeded with design for the remaining three signals using the JARC grant, but insufficient funding remained to purchase and install the signals at the three intersections.

Operational savings in the Transportation Planning budget have made funds available to add to the signal project. This additional funding will still leave a gap, but will help, and can serve as match or partial match if additional grant funding is found.

Additionally, a required reimbursable agreement with NCDOT to cover design review and inspections for the signal projects was paid from the Traffic Safety Capital Project, and that expense should be moved to the project in order to better track project costs and grant funds, and to justify the local match.

This proposed budget amendment moves savings from the General Fund Transportation Planning operations budget to the project, and moves the reimbursable agreement expense from Traffic Safety Capital Project to the JARC project.

Pro:

- Allows planned pedestrian safety improvements to continue.

Con:

- The $13,063 transferred to the project will not be enough to complete all of the signal installations.

This action transfers $13,063 in General Fund operating savings to the pedestrian signal project, continuing investment in Asheville's pedestrian network. NCDOT will maintain the signals, so there will be no increase in ongoing city costs for maintenance of the signal. The movement of the reimbursable agreement expense from Traffic Safety Capital Project to the JARC project has no net fiscal impact; there is no budget amendment needed for this part of the transaction.

City staff recommends City Council adopt the budget amendment in the General Capital Projects Fund in the amount of $13,063 from General Fund savings to increase city funding for the existing Job Access and Reverse Commute pedestrian signal grant.

ORDINANCE BOOK NO. 30 - PAGE 56

K. RESOLUTION NO. 15-137 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT THE CONVEYANCE OF REAL PROPERTY LOCATED ON LAKEWOOD DRIVE AND CHILES AVENUE FROM BUNCOMBE COUNTY

Summary: The consideration of a resolution authorizing the Mayor to accept the conveyance of real property located on Lakewood Drive and Chiles Avenue (PIN # 9648-93-4502-00000) from Buncombe County.

The City of Asheville maintains Lakewood Park in Kenilworth as a neighborhood park with recreational playground amenities. The real property is currently titled in Buncombe County's name and at this time the County wishes to convey the real property to the City in fee simple.

The parcel was originally acquired by the Board of Tax Supervision through a tax foreclosure in 1937. In the 1980's, the Board of Tax Supervision was dissolved and all properties held by the Board were conveyed to Buncombe County. This property was conveyed to the County, yet the historical use as Lakewood Park continued. At present, the City maintains the playground equipment and bathrooms on the property and will continue to use the property for the public purpose of open space and recreation. The conveyance of this property to the City will correct the ownership issue and all real property rights will vest in the City. The Buncombe County Commission approved this conveyance in their meeting on June 16, 2015.

Pro:

- Corrects ownership issue for Lakewood Park

Con:

- None

City staff recommends that City Council adopt the resolution authorizing the Mayor to accept the conveyance of real property located on Lakewood Drive and Chiles Avenue (PIN # 9648-93-4502-00000) from Buncombe County.

RESOLUTION BOOK NO. 37 - PAGE 198

L. RESOLUTION NO. 15-138 - RESOLUTION AUTHORIZING THE CITY MANAGER EXECUTE A CONTRACT WITH ROGERS GROUP INC. FOR THE FISCAL YEAR 2015 ASPHALT PAVING PROJECT

Summary: The consideration of a resolution authorizing the City Manager to execute a contract in the amount of $1,784,404.42 plus a contingency of 12% ($215,595.58) with Rogers Group, Inc. for the project known as Asphalt Paving Improvements – Fiscal Year 2015, City of Asheville Project #CPM-14-15-010, and further authorizing the execution any change orders to said contract which may arise during construction of said project up to the budgeted amount of $2,000,000.00.

A list of warranted streets was put together to be addressed by this contract. The project was advertised on April 27, 2015, and due to an insufficient number of bids, advertised again on May 28, 2015. Bids were opened on June 4, 2015 with the following results:

Rogers Group, Inc. of Nashville, TN,	$1,784,404.42

Harrison Construction Company of Asheville, NC $2,118,546.84.

A 12% contingency ($215,595.58) has been added to allow payment for any unforeseen costs that typically arise during construction and to do additional street resurfacing. The work produced from this contract would fix a number of roads that are in need of repair.

Pro:

- Will repair approximately 4.47 miles of roadways within the Asheville City limits.

Cons:

- The project will cost the City approximately $1,784,404.42.
- Project management and contract administration will consume staff time.

The total budget for this project, including contingency, is $2 million, and is included as part of the Fiscal Year 2014-15 Capital Projects budget.

City staff recommends City Council adopt the resolution awarding the contract to Rogers Group, Inc. and authorizing the City Manager to execute, on behalf of the City of Asheville, a contract in the amount of $1,784,404.42 PLUS a contingency of 12% ($215,595.58) with Rogers Group, Inc. for the project known as Asphalt Paving Improvements – Fiscal Year 2015, City of Asheville Project #CPM 14-15-010 and authorize the execution any change orders to said contract which may arise during construction of said project up to the budgeted amount of $2,000,000.00.

RESOLUTION BOOK NO. 37 - PAGE 199

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. LEGISLATIVE UPDATE

Mayor Manheimer highlighted Council on some the current bills with potential impact on the City of Asheville budget, specifically noting that one of the biggest issue of sales tax redistribution, which will cause a significant annual loss to Asheville and other Buncombe County municipalities.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO A PREVIOUSLY APPROVED CONDITIONAL ZONING FOR PROPERTY LOCATED AT 275 AND 281 HAZEL MILL ROAD TO DEVELOP 113 MULTI-FAMILY UNITS

ORDINANCE NO. 4430 - ORDINANCE AMENDING A PREVIOUSLY APPROVED CONDITIONAL ZONING FOR PROPERTY LOCATED AT 275 AND 281 HAZEL MILL ROAD TO DEVELOP 113 MULTI-FAMILY UNITS

Urban Planner Julia Fields said that this is the consideration of an amendment to a previously approved conditional zoning for property located at 275 and 281 Hazel Mill Road to

develop 113 multi-family units (9 additional units and amenities). This public hearing was advertised on June 12 and 19, 2015.

The project site consists of two parcels [PINs 9638.39-9191 and 6188] located off of Hazel Mill Road, just north of Patton Avenue, with frontage along Clayton Avenue, Hazel Mill Road and Nancy Street. The project proposes a recombination which would result in an overall project area of 6.501 acres. The property slopes gently from west to northeast.

There are two vacant dwellings and several associated structures existing on the parcels which will be removed for this project.

In 2014, the subject property was conditionally zoned to RM-16CZ to allow for a 104-unit apartment complex in 10 buildings. The applicant is still proposing to construct a multi-family development that will consist of ten (10) buildings. The buildings are either two-story (one building) or two/three split configurations (maximum height of 40 feet) and contain a mix of one (36) and two (77) bedroom units for a total of 113 residential units. [The previous mix was 32 one bedroom and 72 two bedroom units]. The developer is still proposing that 10% (now 12 units) of the dwelling units be affordable meeting the City's standards. The remaining units will meet the City's criteria for "workforce" housing. A number of amenities are provided on the property for the benefit of the residents including a dog park, fitness center, community garden, and picnic areas. The buildings will be constructed to meet North Carolina Healthy Built Homes standards. [Amendment proposes to add a fitness center and leasing office to the amenities previously approved].

Access to the site is still proposed via two drive entrances off of Clayton Avenue. It is proposed that Clayton Avenue be widened to accommodate some on-street parking (18 spaces) while allowing for two-way traffic on that street. 188 parking spaces are provided on site. All parking spaces on site will be constructed using pervious pavers. Provisions are made for the parking of 40 bicycles. Sidewalks are provided along both Clayton Avenue and Hazel Mill Road. Both sidewalks are proposed to be 6 feet back of curb. The developer plans to meet the previously approved condition concerning the provision of $14,000 toward the construction of sidewalks along Hazel Mill Road.

The applicant is still proposing compliant landscaping including: street trees, street buffer, building impact, tree save, and parking lot landscaping. The applicant is proposing 2.53 acres of open space, well above the 1.3 acres of open space required.

The Technical Review Committee (TRC) reviewed this application at their meeting on May 18, 2015, and approved it with conditions. The developer has addressed many of the conditions noted by TRC in the submittal that is before the Asheville City Council.

The Asheville Planning and Zoning Commission reviewed this proposal at a meeting on June 3, 2015. At this meeting the commission voted 5-1 to recommend approval of the conditional zoning to Asheville City Council with conditions as presented (Exhibit B.1). One neighboring property owner spoke at the meeting requesting an evergreen buffer be placed on the eastern boundary of the project site. The applicant has changed the site plan to add in a row of hemlocks on the northeastern property line as was requested at Planning and Zoning Commission by a resident of the area.

City Council will have the final review of the conditional zoning. It will return to the Technical Review Committee for Final TRC review, if approved by Asheville City Council.

The subject parcels are zoned RM-16CZ, with RM-8, Highway Business, Institutional, Office, Resort, and RS-8 zoned properties in the general vicinity. The properties are immediately surrounded by single family homes and townhomes with a large car dealership, offices and a church in close proximity. The proposed development, with a density of approximately 17 units

per acre, is of greater density than is found on the immediately surrounding residential properties, however, the property is within approximately ¼ mile of transit service and within walking distance of a number of service and retail businesses. The developer is still planning to meet the previously approved condition concerning bus passes.

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff finds this request to be reasonable.

Considerations:

- Higher density development furthers the goals and objectives of the comprehensive plan.
- The proposed amendment provides housing in an area close to many services.
- The project will be designed to qualify for Healthy Built Homes certification.
- The project proposes 10% affordable units.
- The project adds nine units to a previously approved development.
- Concern has been voiced by surrounding neighbors regarding increased traffic.

Staff recommends approval of the proposed conditional zoning amendment to add nine additional units and amenities to the previously approved project, finding it consistent with City-adopted plans and strategic goals for development.

The Planning and Zoning Commission recommended approval of the conditional zoning amendment request with conditions as presented at their meeting on June 3, 2015.

Mayor Manheimer opened the public hearing at 5:15 p.m.

Mr. Bob Grasso, applicant, explained that their goal is to break ground in mid-September for the approximate year-long project. Regarding the type of hemlocks to be planted, he said that as a landscape architect he understands there will be on-going responsibility for maintenance regarding the treatment of the hemlocks. He explained the uses for the three non-residential units, which include a leasing office and the flexibility for a bike storage unit and fitness center.

Mayor Manheimer closed the public hearing at 5:20 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Wisler moved to approve the conditional zoning amendment request for White Oak Grove Apartments on Hazel Mill and Clayton Roads and find that the request is reasonable, is in the public interest, and is consistent with the Comprehensive Plan and other adopted plans in that: (a) The plans for increased density on this site further City goals promoting higher density residential infill in appropriate areas; and (b) The plan for 10% of the units (one additional proposed with the amendment) to meet the City's affordability standards respects City goals working to address the needs of the community for increased affordable housing. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 30 – PAGE 58

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ADJUST THE SIZE LIMITS OF ACCESSORY APARTMENTS

ORDINANCE NO. 4431 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES TO ADJUST THE SIZE LIMITS OF ACCESSORY APARTMENTS

Urban Planner Vaidila Satvika said that this is the consideration of a wording amendment to revise the current regulations for *Accessory Apartments* to create more useful and appropriate parameters for homeowners that better align with city goals. This presentation is not about short term rentals (STRs) or the City's Homestay rules. STRs and Homestay issues will come before the City Council on August 25, 2015. This public hearing was advertised on June 12 and 19, 2015.

Since we are proposing to adopt Industry standard terminology for *Accessory apartments* in order to call them Accessory Dwelling Units (or ADUs), he referred to them as ADUs throughout this report. He would be using charts and visuals as well.

He explained that ADUs are additional living quarters on single-family lots that are independent of the primary dwelling unit. The separate living spaces are equipped with kitchen and bathroom facilities, and can be either attached or detached from the main residence.

- An *attached* accessory dwelling unit is a part of the primary dwelling but is a separate, complete dwelling unit with its own entrance and exit. These units share the same roof and are within the envelope of the main house.
- A *detached* accessory dwelling unit is separated from the primary dwelling as a stand-alone structure (e.g. granny flat, garage apartment, small cottage).

ADUs provide practical housing options for the elderly, disabled, empty nesters, and young students, and can provide additional rental income for homeowners. ADUs are smaller in size, do not require the extra expense of purchasing land, can be developed by converting existing structures, and do not require the extension of city infrastructure for the additional housing units. ADUs are an inexpensive way for municipalities to increase housing supply, while also increasing the property tax base. As smaller housing units, ADUs are also typically more affordable and thereby provide housing options for low- and moderate-income residents that might otherwise be priced out of the housing market.

ADUs have been a part of Asheville's zoning for at least the last 70 years. The 1948 Zoning Ordinance allowed ADUs in all residential districts without restriction. In fact, there is no record of size limits for ADUs until the adoption of the UDO in 1997. In recent years as the city's housing shortage has become pronounce, there has been renewed discussion about revising the city's ADU rules. The city's Affordable Housing Advisory Committee has been particularly direct in seeking changes to ADU rules—the Committee sought input through an intensive six-months of interviews with non-profits and developers, the results of which are available in the 2014 Affordable Housing Policy Recommendations report. That Committee's seven year goal for affordable housing production, which includes recommendations to ADUs, received Council's unanimous approval last month.

Today, the rules governing ADUs permit them to be no larger than 50% of the primary dwelling and not taller than 40' in height. We propose changes to both the maximum size and to the maximum height. We also propose to have different standards for attached ADUs than for detached ADUs.

He then reviewed the current ordinance to understand what's allowed today.

1) The proposed wording amendment would change the permitted size of <u>detached</u> ADUs from a maximum 50% to 70% of the primary dwelling but would cap their maximum size to 800 SF.

2) The proposed wording amendment would also change the permitted size of <u>attached</u> ADUs from a maximum 50% to 70% of the primary dwelling but would cap their maximum size to 1000 SF. This is a new concept that the current rules do not address.

A few other considerations:

The wording amendment would allow the provision of lots that were legally established but under today's zoning rules are no longer conforming.

a. In Asheville there are about 4000 residential single-family use parcels that have some type of dimensional nonconforming that currently preclude them from permitting an ADU. This wording amendment would allow these parcels to permit an ADU as long as they met their setbacks and other requirements.
b. In addition, existing primary dwellings that are nonconforming would be allowed to permit an ADU within the envelope of the primary structure. This change will allow an older building to permit an ADU within the building in spite of, for example, not meeting a setback developed under recent policy.

Parking: We also propose that parking would be required if required for residential dwellings. There would be no removal of residential parking to accommodate an ADU and ADU parking would not be permitted to be placed in front of the house.

Height: We propose to increase of base height limit to 25' to allow for cathedral ceilings but to limit the maximum height of ADUs to that same height: 25'.

Staff presented the essential concepts of this proposed wording amendment to the Affordable Housing Advisory Committee (AHAC) and to the Coalition of Asheville Neighborhoods (CAN) on 5/7/15. It was referred to at the City Manager's Development Forum on 5/15/14, and then presented to the Planning and Economic Development (PED) and Housing and Community Development (HCD) Committees on 5/19/15. AHAC is strongly in support. CAN expressed concerns about neighborhood impact, in particular in regards to parking and neighborhood context. The proposed amendment addresses both parking and neighborhood context by reducing the maximum building height and setting maximum size limits for ADUs.

This wording amendment complies with the City's Comprehensive Plan by seeking to explore the full range of zoning tools necessary to increase both the supply and compatibility of housing within existing neighborhoods and by identifying infill opportunities and making them readily available. It also complies with the City Council's Strategic Plan by encouraging and incentivizing private investment for the creation of additional in-fill housing.

Staff recommends approval of this proposed amendment because it is consistent with goals outlined in the Comprehensive Plan and City Council Strategic Plan. At their meeting on June 3, 2015, the Planning and Zoning Commission voted 6-1 to recommend approval. The dissenting commissioner was concerned about the maximum building height of 40', which we have reduced to 25'.

In summary, for a city that is facing a housing supply crisis, we believe this wording amendment will give more flexibility to property owners so that more ADUs can be built. And considering that smaller units are typically more affordable, the provision of more ADUs indirectly supports affordable housing. We believe that ADUs are a viable form of neighborhood-scaled subordinate housing units that are a very context-sensitive approach, especially considering that they are located behind homes and dispersed throughout the city.

In response to Councilman Bothwell, Mr. Satvika said the minimum 6 foot setback requirement has not been changed with this amendment. The UDO basically allows for ADUs to encroach into setbacks. As far as the height for detached ADUs, the current ordinance allows for 40 feet (top of ceiling) and staff proposes 25 feet (top of ceiling).

Councilman Bothwell felt that we are discriminating against small property owners. He felt that if a person owns 1,000 square foot home with an 1,000 square foot basement that could be converted into an apartment, he questioned why we are limiting that property owner to 700 square foot apartment. Mr. Satvika said that ADUs have been understood to be subordinate housing units, so we are trying to respect concern that the ADUs may be too big, thus increasing the current maximum size from 50% of the primary dwelling to the proposed 70% of the primary dwelling.

Councilman Bothwell felt there was confusion in the community regarding these changes and suggested the public hearing be held; however, a vote be postponed until after further community engagement.

Councilwoman Wisler agreed with Councilman Bothwell in that there is a lot of misconception about this amendment in the community. She felt there would not be a lot of opposition if the community understood the details, as outlined in Mr. Satvika's presentation.

In response to Councilman Pelly regarding the increase of cars on the street, Mr. Satvika said the amendment proposes that off-street parking would be required if it is required for residential district. The UDO states that for areas within 1 mile of the downtown Central Business District, off-street parking is not required.

At the suggestion of Councilman Smith, Director of Transportation Ken Putnam said that the City is working on the Haywood Road Corridor Parking Study and felt that once that study is completed, we will be able to take any lessons learned and generalize them into other similar neighborhoods.

When Councilman Bothwell asked if there was a way we could assign two parking spaces per house, Mr. Putnam explained that we need to be careful not to breach the idea that we are assigning personal parking spaces within the public right-of-way. He said that we do have a successful program with 150 permitted parking spaces in the Central Business District which is available on a first come/first served basis. He noted that the City is currently working on a comprehensive parking study that, when completed, will provide Council the information on how they would like to set policy in the next 10 years.

Mayor Manheimer opened the public hearing at 5:53 p.m.

The following individuals spoke in support of the amendment:

Ms. Lindsey Simerly, Chair of the Affordable Housing Advisory Committee
Mr. Teal Brown, owner of Wishbone Tiny Homes
Ms. Wendy Dean
Mr. Jayden Gurney, member of the Affordable Housing Advisory Committee
Ms. Laura Lavoy, owner of a tiny house
Ms. Joanne Stephenson, member of the Historic Resources Commission

The following individuals felt the community should be allotted additional time within which to review the details of the proposed ordinance, particularly the parking:

Ms. Barber Melton, member of the Coalition of Asheville Neighborhoods
Mr. Mike Lewis, Grace neighborhood resident
Ms. Billie Laughlin, Five Points neighborhood resident

Mayor Manheimer closed the public hearing at 6:10 p.m.

Mr. Satvika responded to Councilman Davis' concerns regarding the minimum setbacks, using an example of a corner lot.

Councilman Smith thanked the Affordable Housing Advisory Committee for spending more than two years on this issue. The Council has made a priority of more affordable housing and after they received the Housing Needs Assessment Report, Council learned that 47% of the renters in the City are spending more than 30% of their income on their rent. Council has also adopted a 7-year affordable housing goal which the ADU reform was a part. He does understand the anxiety with this ordinance; however, the amendment sets size limits, sets a lower height limit, and parking remains the same as in the current rules. He felt this amendment is a good change. He felt it was important to provide community education regarding this amendment and would support further examination of whether Council wants to increase some of these sizes.

Councilman Smith moved to approve the proposed amendments to Sections 7-14 and 7-16 and associated definitions and table of uses that modify accessory apartments, and (if approving) find that the request is reasonable, is in the public interest, and is consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) by employing zoning tools to increase the supply of housing that is compatible with existing neighborhoods; (2) by providing incentives for infill development throughout the city, and (3) by providing needed residential units while making efficient use of existing housing stock, parcels of land and community infrastructure. This motion was seconded by Councilman Pelly.

Councilman Bothwell supported looking at increasing the minimum size, and if it has to be smaller to be a subsidiary structure, then he suggested 10 square feet less than the primary structure. He said that even though he supported the amendment, he would have to vote against it because he felt the community needed to understand the details prior to voting.

Vice-Mayor Hunt felt there is broad support for this amendment and acknowledged this ordinance is a work in progress. He felt that revisions regarding setbacks and ratios of square footage are adjustments that can be made when the ordinance is revisited in a year or two.

Councilwoman Wisler would support the amendment if the City commits to a community education plan to where staff talks to property owners and let the know how this will affect their neighborhoods. Director of Community and Public Engagement Dawa Hitch acknowledged that would occur.

Mayor Manheimer felt that this is a helpful movement that will add to our community. She agreed with Councilwoman Wisler that the key is communication and suggested Mr. Satvika's PowerPoint be placed on the City's website to help those understand the details.

Councilman Pelly acknowledged the urgency to address the affordable housing needs in our community. He also heard legitimate concerns expressed by the neighborhoods. He was pleased that a comprehensive parking study will be coming forward to help Council make policy decisions regarding parking. Regarding tap fees, he suggested the City investigate a way to waive the tap fees which would make the ADU more affordable. And, as a member of the Metropolitan Sewerage District Board of Directors, he would bring the MSD tap wavier suggestion to their attention. Since the City provides economic development incentives for large companies, a tap fee waiver might be a way to provide that same level of economic development to property owners which will be making an investment in the community.

It was the consensus of Council to have the Finance Committee provide information regarding ADU tap fees at their September meting.

The motion made by Councilman Smith and seconded by Councilman Pelly carried on a 6-1 vote, with Councilman Bothwell voting "no."

ORDINANCE BOOK NO. 30 – PAGE 67

V. UNFINISHED BUSINESS:

A. ORDINANCE NO. 4432 - ORDINANCE ADOPTING THE FISCAL YEAR 2015-16 ANNUAL OPERATING BUDGET AND AMENDMENTS TO THE FEES & CHARGES MANUAL

Director of Finance & Management Services Barbara Whitehorn said that this is the consideration of an ordinance to adopt the Fiscal Year 2015/2016 Annual Budget along with changes to the Fees and Charges Manual discussed below.

The Fiscal 2015/2016 Proposed Annual Operating Budget was presented to City Council on May 26, 2015. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Proposed Budget along with a notice of the Public Hearing was published on May 29, 2015. City Council conducted a public hearing on the Proposed Budget on June 9, 2015. The Fiscal 2015/2016 Proposed General Fund Budget is balanced with an Ad Valorem tax rate of $0.475 per $100 of assessed value, which represents a $0.015 increase over the current year tax rate. All essential City services are maintained in the Proposed Budget.

Changes to the Proposed Budget - Since the Proposed Budget was presented to City Council, there have been two adjustments that have altered the budget that is presented tonight for Council adoption.

- **Strategic Partnership Funding:** At the June 9 City Council meeting, Council agreed to consider budgeting an additional $50,000 in Strategic Partnership grants, pending the recommendations of the Housing and Community Development (HCD) Committee. At their June 16 meeting, the HCD Committee considered applications from ten eligible organizations that had not been granted funds at the June 9 City Council meeting and granted $50,000 in additional funding. Council is taking action on these recommendations in a separate agenda item. Staff has adjusted the FY 2015/2016 Proposed General Budget to reflect this expenditure increase, and the sales tax revenue budget has been increased by $50,000 to provide the necessary funding.

- **Capital Improvement Program – Craven Street Bridge:** Funding for this project was shown in the Proposed Budget Document Capital Improvement Program (CIP) section as part of the overall RADTIP cash flow. The Adopted Budget Document will show cash flow, including $300,000 in funding from Buncombe County, for Craven Street Bridge separately from RADTIP. The overall cash flow totals for the five-year CIP remain unchanged.

Fees and Charges Manual Amendments - In conjunction with adoption of the Fiscal 2015/2016 Annual Operating Budget ordinance, staff is also seeking Council approval of the following amendments to the City's Fees and Charges Manual:

- **Residential Solid Waste Fee:** As discussed with City Council during the budget process, staff is proposing an increase in the solid waste fee from $7.00 per month to $10.50 per month. Revenue from this fee increase is included in the Proposed General Fund Budget.

- **Nature Center Fees:** Also, as discussed with City Council previously, the Proposed Budget includes various increases in admission fees at the Nature Center.

Pros:

- Ensures City's compliance with North Carolina General Statutes that require local governments to adopt a balanced budget ordinance by July 1 of each year.
- General Fund Budget is balanced with no fund balance appropriation and all essential City services are continued.

Con:

- None.

As noted above, the Proposed FY 2015/2016 General Fund budget is balanced with no fund balance appropriation and the maintenance of all existing programs and services. Based on revenue and expenditure projections for FY 2014/2015, staff estimates that the City's unassigned fund balance in the General Fund will be $17.7 million on June 30, 2015. With a Proposed FY 2015/2016 General Fund budget total of $103 million, this $17.7 million in unassigned fund balance equates to 17.2% of total budgeted expenditures.

Staff requests that Council (1) adopt the FY 2015/2016 Annual Budget Ordinance; and (2) amend the Fees and Charges Manual with the changes noted above.

Mayor Manheimer stated that since the public hearing was held on June 9, 2015, no public comment would be accepted.

In response to Councilman Bothwell, Assistant City Manager Fetherston said that a plan should be available in 60 days to address how the living wage raises will be implemented, and at that time City Council can direct staff to make the pay adjustment retroactive to July 1.

In response to Vice-Mayor Hunt, Ms. Whitehorn said that the $50,000 additional funding for the strategic partnership fund grants have been included what is before Council, as there was clear direction by Council at the June 9 meeting.

Councilman Pelly supported the budget, however, he felt we should allocate a portion of fund balance for Fiscal Year 2015-16 for non-recurring, one-time capital expenditures while still maintaining the 10% minimum relative growth, instead of raising property taxes by 1.5 cents.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell moved for the adoption of Ordinance No. 4432. This motion was seconded by Councilwoman Wisler and carried on a 6-1 vote, with Councilman Pelly voting "no".

ORDINANCE BOOK NO. 30 – PAGE 72

B. RESOLUTION NO. 15-139 - RESOLUTION AUTHORIZING THE APPROVAL OF ADDITIONAL 2015-16 STRATEGIC PARTNERSHIP FUND GRANTS

Assistant Director of Economic & Community Development Jeff Staudinger said that this is the consideration of a resolution approving the recommendations of the Housing & Community Development (HCD) Committee for additional grants from the 2015-16 Strategic Partnership Fund program.

At the June 9 City Council meeting, Council agreed to consider budgeting up to an additional $50,000 in Strategic Partnership Fund grants, pending the recommendations of the Housing and Community Development Committee. At their June 16 meeting, the HCD Committee considered applications from 10 eligible organizations who had not been granted Funds at the

June 9 City Council meeting. The HCD Committee recommends the following applications for funding:

Agency	Funding Support Purpose	2015 Funding Recommendation
One Youth at a Time	Funds will provide mentoring and tutoring, guided growth activities, job training and placement assistance to at-risk and critically at-risk youth ages 8-19.	5,000
Partners Unlimited	Year-round high school credit recovery on-line learning program through the Academic Enhancement Program. Partners Unlimited will decrease high school dropout and increase college opportunities for minority and economically disadvantaged high school students.	5,000
Asheville GreenWorks	Activities include educating public housing residents on practices and benefits of recycling; launching classroom composting programs in 17 public schools; engaging 10 low-income youth in paid environmental stewardship internships; and coordinating the Adopt-a-Street program	15,350
Green Opportunities	Go will pilot the GO Maintenance Crew maintenance training and job placement service. The pilot will be run for one year to test its feasibility as an ongoing social enterprise, provide more advanced training options, and create career ladder-oriented jobs.	17,150
Project Lighten Up	Support for a community summer day camp that blends education and recreation into daily activities, accomplished through Science, Technology, Engineering and Math (STEM) and Expeditionary Learning (EL) projects.	3,500
Read to Succeed Asheville	Read to Succeed helps lower the achievement gap in Asheville City Schools (ACS) by identifying Kindergarten students who are challenged by learning to read, and matching them with volunteer reading coaches. Coaches make a commitment to mentor and tutor this student in reading until the student is a proficient reader and in the third grade.	4,000

Total recommended additional recommended funding is $50,000.

Pros:

- Approval of the Strategic Partnership Fund provides operating support to Asheville-based organizations that are providing direct services for Asheville residents.
- The Strategic Partnership Fund reflects the carefully considered recommendations of the City's Housing & Community Development Committee.

Con:

- Budget constraints continue to curtail the availability of funds; supported organizations will need to find alternate sources of program support. All worthy proposals could not be funded.

Strategic Partnership Funds are funded from the City's general fund. The funding recommendations add $50,000 to the earlier recommended SPF fund allocation of $98,400, for a total recommended allocation of $148,400. Staff will adjust the FY 2015-16 Proposed Budget to include this additional $50,000 in the general fund budget.

The HCD Committee recommends approval of the 2015-16 Strategic Partnership Fund grants as presented.

Rev. Spencer Hardaway, representing Project Lighten Up, thanked Council for providing the additional funding.

Councilman Smith, Chair of the Housing & Community Development Committee, said that the Committee initiated a process to examine how we can best leverage future funds towards our achievement gap goal as outlined in Council's Strategic Operating Plan.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Hunt moved for the adoption of Resolution No. 15-139. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 200

VI. NEW BUSINESS:

A. RESOLUTION NO. 15-140 - RESOLUTION REVISING THE CITY ECONOMIC DEVELOPMENT INCENTIVE POLICY

Economic & Community Development Director Sam Powers said that this is the consideration of a resolution revising the City Economic Development Incentive Policy, to use the median wage rate of new jobs created as a benchmark to determine quality job creation; and establish a benchmark for a living wage for companies that receive city economic development incentives.

City Council has adopted Strategic Goals for 2015-16, affirming priorities to ensure that Asheville is a City that provides Economic Growth and Sustainability, Affordability and Economic Mobility, and High Quality of Life. In the focus area of Economic Growth and Sustainability, Council adopted an action item that directed staff to review the City's current economic development incentive policy, analyze its alignment and utility regarding Council's overall strategic goals, and recommend changes to current policy if appropriate, with special emphasis on consideration of establishing a baseline minimum pay rate for eligibility under the Incentive Policy.

At its May 19, 2015, meeting, the City Council Planning and Economic Development (PED) Committee reviewed the existing incentive policy and made two recommendations to City Council: use the median wage rate of new jobs created as a benchmark to determine quality job creation; and establish a benchmark living wage for companies that receive city economic development incentives.

The current criteria in the City Economic Development Incentive Policy utilizes the Average Weekly County Wage Rate for Buncombe County to determine "equity and quality of jobs created". PED recommended that the policy be revised to use the median wage rate of the new jobs to determine equity and quality of jobs created. Using the median wage for job creation and retention will provide an accurate representation of central tendency in the job creation, and will meet the intent of the policy that the majority of jobs being created should be high quality jobs.

A Living Wage Certification Program administered by the non-profit organization Just Economics provides a certification platform and through that program, certified employers pay at least the current Living Wage which is $11/hour with employer provided health insurance. PED's recommendation to City Council is that the city should consider only participating in projects that create jobs that pay at or above a Living Wage, which is currently $11/for positions that provide health benefits. There is a Universal Living Wage Formula that the city can utilize to determine the current living wage at the time a company applies for consideration for incentives. PED also suggested that full Council discuss the option of only incenting the new jobs created above the benchmark versus only participating in projects that pay the living wage.

Other key requirements of the Policy will remain:

- Minimum new capital investment by the applicant of $1.5 Million
- Project does not transfer existing employment from one location in the City to another
- Have a human resources benefit policy
- Project is a new location or retention/expansion of an existing qualifying business in the City of Asheville
- In accordance with NCGS 158-7.1 other incentives outside of this policy may be provided on a case by case basis
- Performance based grant, paid after jobs are created, capital investment is made, taxes are paid and verified
- Performance contract with the City of Asheville

Pro:

- Aligns with Council Strategic Goals and 2025 Comp Plan.

Con:

- Eliminating participation in any projects unless all jobs are Living Wage could cause potential projects, especially if the project begins with a written RFP response to a site consultant, to be eliminated from consideration before the City has an opportunity to fully engage in a meaningful discussion about the City as a project location.

There is no change in financial impact of the policy revision. All economic development incentive grants are performance based, there is no up-front granting of incentives. Additionally all incentive grants have positive cash flow in that only a portion of new incremental ad valorem taxes created by the company are utilized in the incentive grant. A percentage of ad valorem tax paid by the company stays in the General Fund.

Staff recommends Council accept the PED recommendations to revise the City Economic Development Incentive Policy, to use the median wage rate of new jobs created as a benchmark to determine quality job creation; and establish a benchmark for a living wage for companies that receive city economic development incentives.

There was a brief discussion regarding the option of only incenting the new jobs created above the benchmark versus only participating in projects that pay the living wage. It was the consensus of Council to only participate in projects that pay the living wage.

When Mayor Manheimer asked for public comments, none were received.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Wisler moved for the adoption of Resolution No. 15-140. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 201

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

On behalf of City Council, Mayor Manheimer expressed the community's grief regarding the tragedy in Charleston, South Carolina.

Ms. Sherry Christenson, Aging Program Specialist at Land of Sky Regional Council, brought to Council's attention the 40th Anniversary of April 12-18 being National Volunteer Week, and the 50th Anniversary of May being Older Americans Month.

Rev. James Lee, member of the Ad Hoc Committee for the African American Heritage Commission, and Ms. Sasha Mitchell, Chair of the African American Heritage Commission, presented Council with a petition containing 2,042 signatures, along with support from numerous organizations, which proposed "That in conjunction with this major effort to repair and restore the Vance monument, plans be made now to create in Pack Square an equally-significant monument to recognize the enormous sacrifices of African Americans during the period of Slavery and Segregation and also to celebrate the many contributions of African Americans to the physical, economic and cultural like of Asheville and Buncombe County since their arrival here in the late 1700s." The Commission asked for the City's support which will go a long way towards fundraising. The Commission will create the plans and gather input. Mayor Manheimer said that the City is eager to partner with the Commission's efforts to construct some type of marker or monument to the African American's historical contributions to the City. The City is eager to stand ready to help support your efforts and we are hoping to see some momentum on the fundraising and plans by the Commission.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 7:10 p.m.

Tuesday – July 28, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: Councilman Gordon D. Smith

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

ADDITION TO AGENDA

At Mayor Manheimer's request, a LEAF Community Art's request was added to New Business.

I. PROCLAMATIONS:

A. INTRODUCTION OF NEW CITY COUNCIL DEPARTMENT DIRECTORS

City Manager Jackson was pleased to introduce Water Resources Director Jade Dundas and Chief of Police Tammy Hooper.

B. PROCLAMATION PROCLAIMING JULY 30, 2015, AS "ELVIS IN ASHEVILLE DAY"

Mayor Manheimer read the proclamation proclaiming July 302015, as "Elvis in Asheville Day" which is keyed around the 40th anniversary of Elvis' landmark shows in Asheville. She presented the proclamation to Mr. Jon Elliston, Chairman of the Board of the Grateful Steps Foundation, and Mr. Jason Sandford, Founder and Editor of Ashvegas.com, who briefed City Council on some activities taking place during the day.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 23, 2015

B. SECOND READING OF ORDINANCE NO. 4427 - ORDINANCE TO ADOPT A FRANCHISE AGREEMENT WITH EXTENET SYSTEMS

Summary: First reading of Ordinance No. 4427 was adopted on June 23, 2015.

ORDINANCE BOOK NO. 30 - PAGE 30

C. RESOLUTION NO. 15-141 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO FUND THE APPRENTICE/INTERN PROGRAM FOR FISCAL YEAR 2015-16

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) to fund the Apprentice/Intern Program for FY 2015-16.

The NCDOT Public Transportation Apprenticeship Program gives current college seniors the opportunity to work in the field of public transportation management upon receiving their undergraduate degree. The 12-month program, which starts July 1st, provides exposure to all aspects of a transit system and allows apprentices to gain experience in managing public transportation operations.

The City applied for this program and was granted funding. After a selection program was conducted by the NCDOT the City is in the process to hire the apprentice to work in the Transportation Planning Division, Transportation Department. The apprentice will assist with route planning, analysis of transit related surveys and procurement processes and special projects.

FY 2015-16 funding totals $37,748. The NCDOT will provide 90% of the anticipated funding ($33,748), and the City will provide the remaining 10% ($3,750). The grant funding and the City's local match in the amount of $3,750 are currently budgeted in the Transportation Department's approved budget for the current fiscal year.

The Transit Committee supports the subject action.

Pros:

- The subject grant supplements funding for an apprentice position for FY 2015-16.
- The subject grant enables the City of Asheville to use $33,748 in State funds for transit planning activities.

Con:

- A 10% local match in the amount of $3,750 is required.

The total grant funding for Fiscal Year 2015-16 is $37,748. The City is required to provide a 10% local match in the amount of $3,750. The anticipated grant funding and the City's local match in the amount of $3,750 are currently budgeted in the Transit Services fund.

City staff recommends that City Council adopt a resolution authorizing the City Manager to enter into an agreement with the NCDOT to fund the Apprentice/Intern program for FY 2015-16.

RESOLUTION BOOK NO. 37 - PAGE 207

D. RESOLUTION NO. 15-142 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE FIVE POINT FILM FESTIVAL KICKOFF PARTY ON AUGUST 14, 2015

RESOLUTION NO. 15-143 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE GOOMBAY FESTIVAL ON SEPTEMBER 11, 12 AND 13, 2015

RESOLUTION NO. 15-144 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE VENTURE LOCAL FAIR ON SEPTEMBER 26, 2015

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 5 Point Film Festival Kickoff Party

on August 14, 2015; the Goombay Festival on September 11, 12 and 13, 2015; and the Venture Local Fair on September 26, 2015.

- 5 Point Film Festival has requested through the City of Asheville Community & Economic Development Department that City Council permit the sale of beer and/or unfortified wine at the 5 Point Film Festival Kickoff Party and allow for consumption at this event.

  The 5 Point Film Festival Kickoff Party will be held on Friday, August 14, 2015 from 4:00 p.m. – 7:00 p.m. within the boundaries of the City of Asheville Surface Parking Lot #18 located on the corner of Haywood Street & Page Avenue as per the event area limits referenced on the accompanying site map.

- The YMI Cultural Center has requested through the City of Asheville Community & Economic Development Department that City Council permit them to serve beer and/or unfortified wine at the Goombay Festival and allow for consumption at this event.

  The Goombay Festival will be held on Friday, September 11, 2015 from 5:00 p.m. – 10:00 p.m., Saturday, September 12, 2015 from 10:00 a.m. – 10:00 p.m. and Sunday, September 13, 2015 from 1:00 p.m. – 6:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green, Reuter Terrace, Vance Median and Raised Lawn areas including South Spruce Street between the intersections of South Pack Square and College Street, North Pack Square between the intersections of Biltmore Avenue and South Pack Square, South Pack Square between the intersections of Biltmore Avenue and South Market Street and within the City Hall/Courthouse Parking Lot as per the area limits referenced on the accompanying site map.

- Asheville Downtown Association has requested through the City of Asheville Community & Economic Development Department that City Council permit them to serve beer and/or unfortified wine at the Venture Local Fair and allow for consumption at this event.

  The Venture Local Fair will be held on Saturday, September 26, 2015 from 12:00 p.m. – 6:00 p.m., within the boundaries of Banks Avenue between the intersections of Coxe Avenue and Church Street, Buxton Avenue between the intersections of Coxe Avenue and Millard Avenue, and Collier Avenue between the intersections of Buxton Avenue and Millard Avenue as per the event area limits referenced on the accompanying site map.

Pro:

- Allows fundraising opportunities for 5 Point Film Festival, YMI Cultural Center, and Asheville Downtown Association

Con:

- Potential for public safety issues

There is no fiscal impact.

City staff recommends City Council adopt resolutions authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 5 Points Film Festival Kickoff Party, the Goombay Festival, and the Venture Local Fair.

RESOLUTION NO. 15-142 - RESOLUTION BOOK NO. 37 - PAGE 208
RESOLUTION NO. 15-143 - RESOLUTION BOOK NO. 37 - PAGE 211
RESOLUTION NO. 15-144 - RESOLUTION BOOK NO. 37 - PAGE 214

E. RESOLUTION NO. 15-145 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT COMMUNITY WASTE REDUCTION AND RECYCLING GRANT FUNDS FROM THE N.C. DEPT. OF ENVIRONMENT

AND NATURAL RESOURCES TO DEVELOP A PUBLIC HOUSING RECYCLING PILOT PROJECT

ORDINANCE NO. 4433 - BUDGET AMENDMENT TO DEVELOP A PUBLIC HOUSING RECYCLING PILOT PROJECT

Summary: The consideration of a resolution authorizing the City Manager to accept Community Waste Reduction and Recycling (CWRAR) grant funds from the N.C. Dept. of Environment and Natural Resources (NCDENR); and a budget amendment in the amount of $25,950 in the Special Revenue Fund to budget the grant and the City's match.

The City of Asheville has partnered with the Housing Authority of the City of Asheville (HACA) in order to develop a public housing recycling pilot project, to be implemented in the 280 units of the Erskine, Walton and Livingston Street communities. The residents of these communities will be able to utilize "Big Blue" recycling roll carts just like other Asheville residents, which will greatly enhance their ability to recycle and reduce waste. The pilot project will run from October 2015 through June 2016. The City has been awarded a CWRAR grant from NCDENR in order to help fund this pilot project.

The total cost for the pilot project is $25,950. The CWRAR grant would require a 20% cash match from the City of Asheville. Thus $4,325 would be contributed by the City, from the sustainability street light savings in the general fund, while the grant would cover the remaining $21,625.

Pros:

- Provides more equitable access to recycling services for residents of public housing
- Helps to meet City's waste reduction goal while leveraging state funding

Con:

- None can be identified

As noted above the total cost of the project is $25,950, with the grant covering $21,625 or 80% of the cost. The 20% City match of $4,325 will come from sustainability street light savings that have been designated for green projects.

City staff recommends City Council adopt a resolution authorizing the City Manager to accept $21,625 in grant monies from NCDENR; and a budget amendment in the amount of $25,950 in the Special Revenue Fund to budget the grant and the City's match.

RESOLUTION BOOK NO. 37 - PAGE 217
ORDINANCE BOOK NO. 30 - PAGE 80

F. RESOLUTION NO. 15-146 - RESOLUTION AUTHORIZING THE CITY MANAGER ENTER INTO A CONTRACT WITH KIMLEY-HORN AND ASSOCIATES INC. TO CONDUCT PHASE II OF A PARKING STUDY ALONG THE HAYWOOD ROAD CORRIDOR IN WEST ASHEVILLE

Summary: The consideration of a resolution authorizing the City Manager to enter into a general services contract with Kimley-Horn and Associates, Inc. to conduct Phase II of a parking study along the Haywood Road corridor in West Asheville.

The Haywood Road Vision Plan, which was adopted by City Council via Resolution # 14-37 on February 25, 2014, recommended that a parking study be prepared along the Haywood Road corridor. Staff decided to accomplish the work in two distinct phases using two separate general services contracts. This decision was made so that we would be able to better define the scope of services for the Phase II contract. Phase I included collecting, summarizing, and

analyzing the existing data, meeting with the directly affected stakeholders, and documenting concerns and suggestions. The Phase I contract (contract # 91500124) was executed during September 2014 and completed during June 2015 at a total cost of $53,400.

The Phase II contract includes collecting, summarizing, and analyzing the existing data along the neighborhood streets in the study area, meeting with the stakeholders who live along the neighborhood streets, developing and analyzing strategies to manage parking demand, developing recommendations, and preparing the final report which will include potential projects to be considered in the capital improvements process. The anticipated cost for the Phase II contract is $48,800 and the anticipated completion date is December 2015.

The total cost of both contracts is $102,200 which is over the $90,000 threshold for City Manager execution without City Council approval. As a result, staff is asking City Council to consider approving the subject resolution so that this project can move forward.

This item was included in a memorandum regarding parking that was shared and reviewed by the Council's Planning and Economic Development Committee on April 21, 2015, and one council member attended one of the Phase I public meetings.

Pros:

- Identify and document parking supply and demand.
- Enhance vehicle, bicycle, and pedestrian mobility.
- Encourage additional economic development.

Con:

- More potential projects for the capital improvement program.

The Phase I contract at a total cost of $53,400 was funded under the Parking Enterprises Fund FY 2014-15 operating budget and the Phase II contract, which is anticipated to cost $48,800, is funded under the Parking Enterprises Fund FY 2015-16 operating budget. The total amount budgeted including contingencies is $60,000.

City staff recommends that City Council approve a resolution authorizing the City Manager to enter into a general services contract with Kimley-Horn and Associates, Inc. to conduct Phase II of a parking study along the Haywood Road corridor in West Asheville.

RESOLUTION BOOK NO. 37 - PAGE 218

G. RESOLUTION NO. 15-147 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH DR. PAUL MARTIN, MD, D/B/A ASHEVILLE ADDICTION CONSULTANTS, PA, TO CONTINUE TO PROVIDE PHYSICIAN SERVICES TO EMPLOYEES, RETIREES AND THEIR FAMILIES

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement for physician services provided through the City of Asheville Health Services Division of the Human Resource Department (City).

In January 1995, the City Council (Council) authorized the City Manager to enter into an agreement for part-time physician services provided through the Health Services division. Currently, Dr. Paul Martin provides episodic care on-site at the clinic for two days a week to City employees and their eligible dependents and retirees. He also provides administrative services as requested by the City.

In the coming year, the Human Resource Department will continue to analyze the Health Services Clinic to ensure the model and services maximize services to employees in a manner

that is sustainable. This analysis will include utilizing a Request for Proposal for physician services.

Pros:

- The Health Services Clinic provides on-site care for non-critical health needs.
- Onsite care and services for employees, retirees and dependents saves the City money in expenses that are not paid in unnecessary doctor, urgent care and emergency room visits
- The on-site employee health clinic is a valuable benefit for City employees, their dependents and retirees.
-

Con:

- There are no foreseen cons for these services

This is a one year contract in the amount of $120,000, and funds have been budgeted and will be encumbered from the Health Care Fund to cover the cost.

City staff recommends Council adopt a resolution authorizing the City Manager to sign an agreement for physician services with Dr. Paul Martin, MD, DBA Asheville Addiction Consultants, PA to continue to provide physician services to employees, retirees and their families.

RESOLUTION BOOK NO. 37 - PAGE 219

H. RESOLUTION NO. 15-148 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE CHANGE ORDERS TO THE AGREEMENT WITH CDM SMITH FOR ENGINEERING AND DESIGN SERVICES FOR THE RIVER ARTS DISTRICT TRANSPORTATION IMPROVEMENT PROJECT AND FIVE POINTS ROUNDABOUT

Summary: The consideration of a resolution authorizing the City Manager to execute changes to a contract with CDM-Smith to perform additional engineering services for the RADTIP and Five Points Roundabout for $560,452, plus a 20% contingency for an amount not to exceed $672,542.

In January 2014 the City Council authorized approval of a contract with CDM Smith to provide 100% complete construction plans for the RADTIP.

In September 2014 the City received notice of a TIGER VI grant award from the Federal Highway Administration which put the RADTIP, the Five Points Roundabout, and several other projects on an accelerated construction schedule.

Since the time of the original approval, city staff and the consultants have identified changes that will improve the design of the RADTIP and the Five Points Roundabout.

Based on these factors, city staff and CDM Smith have identified additional engineering services that will be required in order to deliver plans on schedule that address the goals for the project. These additional engineering services will achieve the following objectives:

- The consultants will complete plans for the Five Points Roundabout to the 100% level and combine them with the RADTIP plans into one set of construction bid documents. In addition, the consultants will engineer several design changes and improvements to the roundabout.

- The consultants will accelerate the schedule for RADTIP plan review, permitting, and utility coordination to meet all of the milestones for the TIGER VI grant.

- The consultants will modify the RADTIP design to include a protected bicycle lane, also known as a two-way cycle track, for roughly half of the project. The protected bicycle lane will improve bicycle safety. The lane will be the first in the City of Asheville, and the change reflects the current best practices in bicycle planning.

- The consultants will design additional off-street parking under the Jeff Bowen Bridges at I-240, providing a significant number of new parking spaces for the River Arts District and the greenway system.

The City Council Planning & Economic Development Committee met on July 21, 2015, and recommended approval.

Pros:

City Council has identified implementation of the RADTIP and the Five Points Roundabout as a key strategic goal for the city. Continued development of construction designs for the RADTIP will advance this goal. The project is programmed and budgeted in the Capital Improvements Program.

The proposed changes will result in improved designs which include a protected two-way cycle track additional off-street parking, and improved operation of the Five Points Roundabout.

Cons:

The additional engineering costs require financial commitment, but are within budget for the projects.

These funds are budgeted in the Capital Improvements Program.

City staff recommends City Council adopt a resolution authorizing the City Manager to execute changes to the contract with CDM Smith to perform additional engineering services in the amount of $560,452, and further authorizes the City Manager to execute change orders to the contract up to the amount of $672,542.

RESOLUTION BOOK NO. 37 - PAGE 220

I. RESOLUTION NO. 15-149 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH GULF COAST LLC TO PROVIDE THE RIGHT-OF-WAY SERVICES FOR THE RIVER ARTS DISTRICT TRANSPORTATION IMPROVEMENT PROJECT

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Gulf Coast LLC to provide the right of way services that are needed for the River Arts District Transportation Improvement Project.

The City of Asheville was awarded Transportation Investment Generating Economic Recovery (TIGER) discretionary funding from the Federal Highway Administration (FHWA) in the fall of 2014 to fund the construction phase of the River Arts District Transportation Improvement Project. In order to accomplish the designated improvements of sidewalks, multiuse paths, road improvements, pedestrian amenities, dedicated bike paths and other improvements designed to improve safety for all riverfront users, additional right of way must be acquired from private property owners. Right of way acquisition activities must take place in compliance with the Federal Uniform Relocation Act because of the involvement of federal funds. Engaging a professional right of way acquisition firm will enable the City to access services such as

negotiation, claim calculation, appraisal, relocation, title and easement services that will be needed.

City staff has engaged in a procurement process that has been competitive, transparent and in compliance with federal, state and local rules and regulations for securing a qualified property acquisition firm. Six firms participated in the procurement process and the top three firms were interviewed. At this time, staff recommends Gulf Coast, LLC to provide turnkey acquisition services for the City at a total cost not to exceed $240,000.

Pros:

- The selection of a property acquisition firm well versed in the Federal Uniform Relocation Act will enable the City to meet its FHWA deadline while protecting property owner rights.

Con:

- There is no negative impact.

The total cost of the contract is not to exceed $240,000; this amount was budgeted in FY 2016 in the CIP allocation for the RADTIP project. This contract is funded through a grant from the French Broad River Metropolitan Planning Organization that passes through NCDOT. The grant is a 80/20 match with the City paying 20% ($48,000) of the cost.

City staff recommends that the City Council direct the City Manager to enter into a contract with Gulf Coast LLC to provide these property acquisition services.

RESOLUTION BOOK NO. 37 - PAGE 221

J. RESOLUTION NO. 15-150 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A MEMORANDUM OF UNDERSTANDING WITH BEAUCATCHER COMMONS, LLC FOR THE IMPROVEMENT OF NANCY STREET

Summary: The consideration of a Memorandum of Agreement with Beaucatcher Commons, LLC for the improvement of a section of Nancy Street to City of Asheville specifications.

Beaucatcher Commons, LLC was approved in February 2015 for a Housing Trust Fund loan of $120,000 to create 12 units of affordable housing on Hazel Mill Road and Nancy Street.

As Kirk Booth, the developer, sought subdivision permits for the project, he discovered that the section of Nancy Street proposed for the development of six of those units had never been accepted as a City street, though it was the site of other development and had been the subject of correspondence with the City dating back to 2008. The section in question runs from Townview Drive to a private Right of Way (ROW), and is approximately 225 feet in length. This length of roadway is used extensively by local residents, is paved, but does not meet City specification for width or condition.

In order for the development project to move ahead, the street must be brought to City standards and, at that time, accepted by City Council.

Staff has researched the current roadway condition and has estimated the cost of the improvement to be $12,480. Staff, including the Directors of Public Works, Transportation and Development Services- have agreed to a draft agreement with the developer to make the needed improvements. The major elements of the draft agreement are:

- The City will provide the labor at its cost to make the needed improvements.

- The developer, as part of the Housing Trust Fund loan, agreed to provide the City with $3,500 for sidewalk improvements to Hazel Mill Road. The City will agree to accept this $3,500 toward the cost of the Nancy Street improvements.
- The City will match the $3,500 with an equal amount from the CIP funds allocated to affordable housing.
- The developer will pay all other costs of materials, estimated to be $5,480.
- The developer will also grant the City a voluntary easement for sidewalks on his lots on Hazel Mill Road.

Pros:

- Six units of housing affordable for thirty years will be created.
- Nancy Street will be improved to City specifications, and when accepted by Council, will be in excellent condition;
- Funds originally intended for the Hazel Mill Street sidewalk are not needed for that purpose;
- Current and future residents of Nancy Street will benefit from the improvements.

Cons:

- The City does not generally expend its own funds to improve a private right-of-way so that it can meet City standards and be accepted as a public street. However, since this work is being done to benefit an affordable housing development and Capital Improvement Plan (CIP) funds are budgeted for such improvements, the request is supported by staff as being in alignment with Council goals.

The labor to be done by the City is already a budgeted expense. CIP funds for affordable housing are also already budgeted.

Staff recommends that City Council approve the City Manager entering into a Memorandum of Agreement with Beaucatcher Commons, LLC for the improvement of Nancy Street.

RESOLUTION BOOK NO. 37 - PAGE 222

K. RESOLUTION NO. 15-151 - RESOLUTION DIRECTING THE CITY CLERK TO ADVERTISE FOR UPSET BIDS FOR THE SALE OF 110 SQUARE FEET OF AIR RIGHTS AT 723 HAYWOOD ROAD TO DOUGLAS R. OSTER

Summary: The consideration of a resolution directing the City Clerk to advertise for upset bids for the sale of 110 square feet of air rights at 723 Haywood Road to Douglas R. Oster.

The City of Asheville controls the sidewalk and street right-of-way located at 723 Haywood Road and in turn controls encroachments into the overhead airspace above the sidewalk. At this time, Douglas R. Oster is planning to renovate the current structure in order to convert it into a multi-use commercial building with an apartment on the second floor. The plans call for the apartment to have a balcony extending into the City controlled air space. Being that balconies are permanent, this encroachment into the public air space must be treated as a sale, and therefore the City requires that the sale of air rights follow certain disposition procedures; specifically the upset bid process.

On July 1, 2015, a qualifying bid was received from Douglas R. Oster in the amount of $220 for the purchase of 110 square feet of air space for the purpose of constructing permanent balconies to a proposed building renovation at 723 Haywood Street. This bid was based on a 2015 Commercial Appraisal of the property and reflects fair market value for the air rights. If the City Council approves the following resolution, the City Clerk will be directed to publish an advertisement for upset bids for a period of 10 days, in which any interested party may upset the

current bid of $220. The statutes require that a qualifying bid must increase the current offer by 10% of the first $1,000 and 5% of the remainder (i.e. $242 or higher). Since the function of the upset bid process is to confirm fair market value, this resolution provides that if no qualifying, competing bid is received, then the City Council agrees to convey this specified area of air rights to Douglas R. Oster for $220.

Pro:

- The sale will be at fair market value.

Con:

- There is no negative impact.

Financial proceeds associated with this disposition are to benefit the Economic and Community Development Capital Improvement Project budget.

City staff recommends City Council adopt a resolution directing the City Clerk to advertise for upset bids for air rights located at 723 Haywood Road.

Councilwoman Wisler asked that when the new Planning Director is hired that they revisit selling air rights over public property.

RESOLUTION BOOK NO. 37 - PAGE 223

L. RESOLUTION NO. 15-152 - RESOLUTION AUTHORIZING A LEASE AGREEMENT AGREEMENT WITH KEVIN T. AND LISA A FOX FOR THE HEALTH SERVICES OFFICE AT 155 BILTMORE AVENUE

Summary: The consideration of a resolution authorizing the City Manager to execute a Lease Agreement between Kevin T. and Lisa A. Fox (Landlord) and the City of Asheville (City) for office and medical space located at 155 Biltmore Avenue for the Health Services Office.

In 2011, the City established a Health Services Office at 155 Biltmore Avenue (identified as PIN # 9648-48-2474-00000) to provide medical care to City employees and eligible dependents with the goal of providing quality health care to City employees and reduce overall medical care costs. The City leases the property at 155 Biltmore Avenue for this specific use and the lease is set to expire on December 31, 2015. At this time, the City is seeking to renew the terms of the lease.

The subject property at 155 Biltmore provides approximately 3,422 square feet of medical and office space in good condition. The property is easily accessible with ample parking. The space is ADA Accessible, and offers all the required needs of a medical office including a waiting/reception area, exam rooms, lab area, doctor's offices, etc.

The term for this proposed lease is three years, with mutual rights to terminate at six months notice. The base rental rate for the leased premises has increased from the current rate of $4,188.50 per month to $4,500 per month, effective January 1, 2016, with a 3% annual increase commencing each year thereafter. The City is responsible for paying related tenant expenses, including utilities, property tax, maintenance and insurance. The Landlord is responsible for major repairs to the roof and structure. Staff has performed analysis of area comparables for medical and office space, and found rental rate and terms to be consistent with fair market value.

Pros:

- The property is right-sized for the City's use and is provides the convenience of parking and proximate location for most users

- A fully operational Health Services Office reduces the City's overall burden of health care costs

Con:

- None noted.

For Fiscal Year 2015-16, the rental costs plus estimated annual costs of property taxes, maintenance, insurance and all utilities were budgeted in the operational budget of the Human Resources Department for the current fiscal year. Beyond Fiscal Year 2015-16, the base rental rate will increase by 3% per year.

City staff recommends City Council adopt a resolution authorizing the City Manager to execute the lease agreement for 155 Biltmore Avenue.

RESOLUTION BOOK NO. 37 - PAGE 224

M. RESOLUTION NO. 15-153 - RESOLUTION OF INTENT TO PERMANENTLY CLOSE AN UNNAMED ALLEY BETWEEN WYOMING ROAD AND KEEBLER ROAD AND SETTING A PUBLIC HEARING ON SEPTEMBER 8, 2015

Summary: The consideration of a resolution of intent to permanently close an unnamed alley between Wyoming Road and Keebler Road and setting a public hearing on September 8, 2015.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjoining property owners, SABA Holding Group, LLC, Thomas Wolfe, Manager, owner of parcels 9648-64-5150 and 9648-64-6029, and Stephen Carr, owner of parcels 9648-64-5116 and 9648-64-5197, have requested the City of Asheville to permanently close the unnamed alley between Wyoming Road and Keebler Road. A copy of this resolution of intent shall be sent by registered or certified mail to all property owners abutting the unnamed alley, not joining in the petition to close.

The Multimodal Transportation Commission met on May 27, 2015, and approved the closure.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of intent to permanently close an unnamed alley between Wyoming Road and Keebler Road, and set a public hearing on September 8, 2015.

RESOLUTION BOOK NO. 37 - PAGE 225

N. RESOLUTION NO. 15-154 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE BUNCOMBE

COUNTY SHERIFF'S OFFICE CONCERNING DWI TASK FORCE OPERATIONS

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the Buncombe County Sheriff's Office (BCSO) concerning operation of the Asheville/Buncombe DWI Task Force.

The number of impaired drivers on our roads has been a serious concern to citizens and law enforcement in Asheville and Buncombe County for many years. Following a review of statistics on arrests, collisions and fatalities in Buncombe County involving impaired drivers, the North Carolina Governor's Highway Safety Project contacted APD and suggested a special task force with a goal of reducing those numbers and educating the public on impaired driving and its effects. Now in its second year, the APD and BCSO have agreed to memorialize certain practices such as which agency's policies will govern task force operations, supervisory responsibilities over task force personnel and vehicle markings.

APD Interim Chief of Police Steve Belcher and Buncombe County Sheriff Van Duncan reached agreement on terms in June, and staff now seeks authorization from City Council to finalize the agreement as required by N.C. Gen. Stat. § 160A-461.

Pros:

- Provides clarity about each agency's role and responsibilities as members of the DWI task force.

Cons:

- None noted

There is no fiscal impact associated with this action.

Staff recommends City Council authorize the City Manager to enter into an agreement between the City and BCSO memorializing operational practices of the Asheville/Buncombe DWI Task Force.

RESOLUTION BOOK NO. 37 - PAGE 227

O. ORDINANCE NO. 4434 - BUDGET AMENDMENT FOR THE REHABILITATION OF THE SMITH-MCDOWELL HOUSE

Summary: The consideration of a budget amendment, in the amount of $28,200, to accept a federal pass through grant in the amount of $19,000 from the National Park Service Historic Preservation Fund via the North Carolina State Historic Preservation Office; and to dedicate local matching funds from Asheville-Buncombe Technical Community College in the amount of $9,200 for the rehabilitation of the Smith-McDowell House.

Smith-McDowell House is the oldest surviving house in Asheville and the oldest brick structure in Buncombe County. Today Smith-McDowell House is a blend of architectural styles dating from its original 1840s construction and additions completed in the late 19th and early 20th centuries. It is a Local Historic Landmark and is listed in the National Register of Historic Places.

Smith-McDowell House currently functions as an historic house museum, and is leased by the Western North Carolina Historical Association (WNCHA) from Asheville-Buncombe Technical College for that purpose. WNCHA is seeking funding for rehabilitation of the house to repair sections of the slate roof and gutter system to prevent further water damage to the building's interior. Water damage causing the interior plaster and woodwork to be severely compromised is present in several locations throughout the house, including in the WNCHA special collections storage room that houses more than 4,000 objects and other culturally

significant archival materials. Additionally, funding is being sought to address drainage issues on the exterior of the property that could potentially impact the long-term viability of the organization's Olmsted Landscape rehabilitation project begun in 2014.

The scope of work included in the grant project includes the repair of sections of the slate roof and gutter system of the Smith-McDowell House. Drainage issues along the exterior of the house will also be addressed. In addition to the needed repairs, a conditions assessment of the roof will be conducted. All work will be accomplished according to the *Secretary of Interior's Standards for Treatment of Historic Properties and* under the supervision of staff of the North Carolina Historic Preservation Office.

Pros:

- Funding will be made available to rehabilitate the Smith-McDowell House.
- Local matching funds have been provided Asheville-Buncombe Technical Community College.

Con:

- None noted.

As noted above, this budget amendment is fully funded with grants and other non-General Fund revenue sources.

City staff recommends that City Council approve a budget amendment, in the amount of $28,200, to accept a $19,000 grant from the Historic Preservation fund, via the NC State Historic Preservation Office and dedicate $9,200 in local matching funds from Asheville-Buncombe Technical Community College.

ORDINANCE BOOK NO. 30 - PAGE 82

P. ORDINANCE NO. 4435 - BUDGET AMENDMENT TO BUDGET THE PURCHASE OF EQUIPMENT FUNDED THROUGH INSTALLMENT LOAN PROCEEDS FOR STORMWATER EQUIPMENT

Summary: The consideration of a budget amendment in the Stormwater Fund in the amount of $414,000 to budget the purchase of equipment funded through installment loan proceeds.

The adopted FY 2015-16 Stormwater Fund budget included funding to hire an additional crew to enhance the stormwater maintenance program. The crew will be utilized to perform additional preventative maintenance services including performing ditching activities and replacing failed drainage systems. Staff has evaluated the needs of the new crew to be hired and recommends that the new equipment be purchased out of the FY 2015-16 budget funded with installment loan proceeds. The Stormwater Fund has adequate fund balance to purchase the equipment; however, installment financing allows the City to match the debt service payments to the life of the equipment and to maintain cash reserves for planned projects in the future. The amendment will provide sufficient budget authorization to move forward with the purchase of the new equipment.

Pro:

- Provides budget authorization for the purchase equipment for the new Stormwater Fund maintenance crew.

Con:

- None.

This amendment will increase the FY 2015-16 revenue and expense budget in the Stormwater Fund by $414,000. Debt service on the installment loan for the equipment purchases, which is estimated at $125,000 over five years, will not begin until FY 2016-17. Available fund balance in the Stormwater Fund totaled approximately $1.7 million at the end of FY 2013-14; staff is estimating for FY 2014-15, available fund balance will be $2.1 million. This budget amendment will have no impact on available fund balance.

City staff recommends City Council adopt the budget amendment in the Stormwater Fund in the amount of $414,000 to budget the purchase of equipment funded through installment loan proceeds.

ORDINANCE BOOK NO. 30 - PAGE 84

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Wisler moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Pelly and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. LEGISLATIVE UPDATE

Mayor Manheimer highlighted Council on some the following current bills with potential impact on the City of Asheville: sales tax redistribution proposal; municipal service districts; elimination of protest petitions; and state now regulating urbers.

IV. PUBLIC HEARINGS:

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. ORDINANCE NO. 4436 - ORDINANCE AMENDING THE ANIMAL CONTROL ORDINANCE REMOVING EXEMPTIONS FOR CIRCUSES AND ANIMAL EXHIBITIONS RELATED TO WILD ANIMALS AND OTHER CLARIFYING REVISIONS

Assistant City Attorney Jannice Ashley said that this is the consideration of an amendment to the City Animal Ordinance removing exemptions for circuses and animal exhibitions related to wild animals and other clarifying revisions.

At its January 9, 2015, meeting, the Governance Committee confirmed support for a change in the U.S. Cellular booking policy to exclude events which include any performing wild or exotic animals. This change effectively acts to prohibit circuses with animal acts from appearing at the U.S. Cellular Center. A local animal advocacy interest group, Asheville Voice for Animals, had first come before City Council in April 2014 to request that city officials consider a ban of circuses that use wild or exotic animals from performing at the U.S. Cellular Center due to general concerns about treatment of animals in circuses across the country. In May of 2014, U.S. Cellular staff was asked to review and suggest revisions to its booking policy related to performances of wild or exotic animals. The review also considered the impact on entertainment programming of 'family-friendly' events and the fiscal impact on the U.S. Cellular Center. The results of this review were reported to the Governance Committee at the January 9th meeting and

it was decided that the U.S. Cellular Center's policy should be revised. The revision to booking policy reads as follows: "*Excluded Events: The U.S. Cellular Center elects to refrain from contracting with promoters producing events which include any performance of wild or exotic animals.*"

As part of the consideration of this matter, the Legal staff was asked to review the City's animal ordinance as it related to the keeping or performance of wild or exotic animals. The review of the animal ordinance revealed that several provisions regarding the performance and keeping of wild animals specifically exempted circuses and animal exhibitions (as well as zoological parks). Further legal analysis concluded that there was no legal reason why such exemptions must be granted (i.e. local governments are not pre-empted by State of Federal law from regulating circuses). In order to ensure consistency between the U.S. Cellular Center's new booking policy and the City's animal ordinance and prevent a situation in which circuses or other events involving wild or exotic animal performances are prohibited at the U.S. Cellular Center, but allowed at other locations with the City limits, several revisions to the animal ordinance are recommended.

Asheville's ordinance concerning the regulation and treatment of animals is found in Chapter 3 of the City Code. Generally, in terms of provisions which relate to wild or exotic animals, the keeping of wild animals within the city limits is prohibited (with the aforementioned exceptions) but exotic pets may be kept if a permit has been issued by the animal control administrator.

Section 3-4 of the animal ordinance, defines "**Wild animals**", as "*any animal which can normally be found in the wild state, particularly those feral, dangerous or non-domesticated animals which generally do not live in or about the habitation of humans, including, but not limited to, bears, deer, lions, monkeys, raccoons, skunks, squirrels, turkeys, tigers, venomous snakes and wolf hybrids.*" The City animal ordinance also defines, "**Exotic pet**" as "*any animal that is not classified as domesticated, livestock or a wild animal. This definition does not include feral animals.*"

As a result of public input at the Public Safety Committee, a slight change in the definition of "Wild Animals" is recommended. Unless otherwise directed by the City Council, changes in the definition of "Exotic Pet" or in the ordinance allowing exotic pets with a permit are not considered necessary or recommended at this time.

It is recommended that the definition of "Wild Animal" be revised as follows, with the elimination of deer, lions, monkeys, turkeys, tigers, and wolf hybrids:

Sec. 3-4- Definitions

Wild animal means any animal which can normally be found in the wild state, particularly those feral, dangerous or non-domesticated animals which generally do not live in or about the habitation of humans, including, but not limited to: bears, non-human primates, all felines (other than the domestic house cat), raccoons, skunks, squirrels, venomous snakes, elephants, camels, coyotes, wolves, and any hybrid or crossbreed of such animals which have similar characteristics of the animals specified herein.

As later explained in this report, it is also recommended that the following definition for "Wildlife Sanctuary" be added to the City ordinance:

Wildlife Sanctuary means a charitable organization that is exempt from taxation under section 501(c)(3), Internal Revenue Code of 1986, that: a) Operates a place or refuge where abused, neglected, unwanted, impounded, abandoned, orphaned, or displaced animals are provided care for the lifetime of the animal; b) Does not conduct any commercial activity with respect to wild animals, including but not limited to, (i) the sale, trade, auction, or lease of wild

animals or their parts or (ii) the use of wild animals in any manner in a for-profit business or operation; c) Does not use wild animals for entertainment purposes or in a traveling exhibit; d) Does not breed any wild animals.

There are two additional sections of the animal ordinance for which revisions are recommended in order to make it consistent with new U.S. Cellular booking policy and the intent of the Governance Committee in regard to the keeping or performance of wild or exotic animals.

First, Section 3-12 of the ordinance currently reads as follows:

Sec. 3-12. - Animal care.

(h) It shall be unlawful for any person to sponsor, promote, or train a wild or domesticated animal to participate in any unnatural behavior in which the animal is wrestled, fought, harassed or displayed in such a way that the animal is abused or harmed. This section shall in no way apply to zoological parks, animal exhibitions or circuses.

It is recommended that the underlined portion of this provision be deleted in its entirety, as there should be no exemption for any organization or entity which allow the abuse or harm of an animal. Additionally, a few other minor additions are recommended.

The revised provision would read as follows:

(h) It shall be unlawful for any person to sponsor, promote, exhibit or train a wild, exotic or domesticated animal to participate in any unnatural behavior in which the animal is wrestled, fought, made to perform, harassed or displayed in such a way that the animal is abused or harmed.

Secondly, Section 3-14 of the ordinance currently reads as follows:

Sec. 3-14. - Wild animals.

No person shall keep or permit to be kept on his/her premises a wild animal. This section shall not apply to zoological parks, animal exhibitions or circuses nor apply to the possession, exhibition or handling of reptiles by employees or agents of duly constituted museums, laboratories, educational or scientific institutions in the course of their educational or scientific work.

It is recommended that this provision be revised to pertain to both persons and entities within the city limits, to delete the exemption for allowing wild animals in animal exhibitions or circuses and to modify the exemption as it relates to zoological parks to apply only to zoological parks that are accredited by the Association of Zoos and Aquariums ("AZA") (this recommendation was made in consultation with Nature Center Director Chris Gentile. The AZA is a highly regarded national organization which has an Accreditation Commission consisting of experts who are leaders in their fields and have many years of experience and education in zoo and aquarium operations, animal management, and veterinary medicine. Once accredited, each zoo or aquarium must go through the entire accreditation process every five years to maintain this status. The City's Nature Center is AZA accredited, one of only 6 such organizations in the State of North Carolina, the others are the NC Zoo, the Greensboro Science Center and the three NC Aquariums).

Additionally, changes are recommended to the remainder of the underlined portion of the ordinance for clarification purposes. At Public Safety Committee, there was discussion of consideration to add an exception for wild animals that are used for "bona fide medical, scientific or educational purposes", which is language used in the ordinances of Chapel Hill and Charlotte. However, based on discussion and input from the public, it became clear that such a general

provision would be subject to varying interpretations. Therefore, the current proposed revision is more specific in this regard and clearly allows for "wildlife sanctuaries" or "wildlife rehab programs" as directed by members of the Public Safety Committee.

As noted above, it is recommended to add a definition of "Wildlife Sanctuary". This definition comes from House Bill 554 which is currently under consideration in the 2015 legislature. Additionally, the NC Wildlife Resources Commission issues licenses for "wildlife rehabilitation" which is defined as the volunteer practice of providing care and treatment to injured or orphaned wild animals or birds until such time as those animals are at an adequate level of health to be successfully returned to their natural environment. Wildlife rehabilitators are not allowed to rehabilitate raccoons, skunks, foxes, bats, coyotes, bears, deer, wild turkeys, wild boar, or endangered, threatened or special concern species-many of the animals that fall under the City's definition of "wild animal".

The proposed revision to this Section would read as follows:

Sec. 3-14. - Wild animals.

No person or entity shall keep or exhibit, or permit to be kept or exhibited on his/her/its premises a wild animal within the City limits. This section shall not apply to:

a) An exhibition or educational outreach program by a zoo or aquarium accredited by the Association of Aquariums and Zoos ("AZA");
b) A wildlife sanctuary or wildlife rehabilitator properly licensed and permitted by the NC Wildlife Resources Commission; or
c) A university, college or laboratory, or other research facility registered under the Animal Welfare Act (7 U.S.C. sec. 2132(e)).

This matter was presented to the Public Safety Committee on May 25, 2015, which supported the proposed revisions, and directed that they be sent to Council for action.

Pro:

- The proposed ordinance revisions will ensure consistency between the U.S. Cellular Center's new booking policy and the City's animal ordinance and prevent a situation in which circuses or other events involving wild or exotic animal performances are prohibited at the U.S. Cellular Center but allowed at other locations with the City limits, consistent with the intent of the Governance Committee decision.

Con:

- Though no change to the definition of "wild animal" is being proposed, the revisions to these other sections of the animal ordinance may raise awareness of the existing regulation and may lead to some enforcement action against individuals who may not have realized they were keeping a prohibited "wild animal", for example, a wolf-hybrid or venomous snake.

City staff recommends City Council revise City's current animal ordinance provisions Sec. 3-4, Sec. 3-12 and Sec. 3-14 as described above to remove exemptions for circuses and animal exhibitions related to wild animals and to make other clarifying revisions as described.

When Councilman Bothwell questioned why we were eliminating deer in the wild animal definition, Ms. Ashley said that after reviewing the wildlife rehabilitation section of State Licensing, she removed deer and turkey from the definition. She would be happy to include deer and turkey back into the definition.

Mayor Manheimer opened the public hearing at 5:26 p.m.

Ms. Nancy Brown, President of Full Moon Farm, Inc. (Wolf-Dog Rescue & Sanctuary), felt that residents should be allowed to own wolf-hybrids. She said that such hybrids are usually many generations removed from full-blooded wild wolves and that the U.S. Dept. of Agriculture categories them as domestic. She provided information to Council to back-up her opinion that wolves and dogs are the same species.

The following individuals spoke in support of the amendment to the animal ordinance:

Ms. Robbie Coleman, member of Asheville Voice for Animals
Ms. Dianne Prescott, member of Asheville Voice for Animals
Mr. Lafayette Prescott, member of Asheville Voice for Animals
Mr. Donald Kimbell

Mayor Manheimer closed the public hearing at 5:39 p.m.

In response to Councilman Bothwell, Ms. Ashley said that the Humane Society of the United States says that wolf-dogs are not domesticated.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell moved for the adoption of Ordinance No. 4436, with the amendment to include deer and turkeys in the wild animal definition. This motion was seconded by Councilwoman Wisler and carried unanimously.

ORDINANCE BOOK NO. 30 – PAGE 86

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CHARTWELL STAFFING SOLUTIONS FOR TEMPORARY SERVICES IN THE PARKING GARAGES

Transportation Director Ken Putnam reviewed with Council highlights of the current and future plans.

Short term steps for overall cleanness include (1) additional full-time position(s); and (2) contract options (a) power washing contract being processed; (b) pending temporary services contract includes general cleaning; (c) painting restrooms in Biltmore Avenue garage being considered; (d) steam cleaning restroom floors in Biltmore Avenue garage being explored; (e) paint/seal stairwells in three older garages being considered; and (3) extend restroom hours.

Mid-term steps for the operations include (1) elevator major overhaul in 3 older garages; and (2) heavy-duty structural maintenance at the Civic Center garage. A Comprehensive Parking Study to help guide policy direction is a mid-term step regarding policy. The contract will be in place by October 2015 and scheduled for completion by February 2016.

He then said that he is asking for consideration of a resolution authorizing the City Manager to enter in to a contract with Chartwell Staffing Solutions, Inc. for temporary services in the City's parking garages, surface parking lots, and other facilities during the period of August 1, 2015, through June 30, 2018.

The City of Asheville, through the Parking Services Division, currently operates four parking garages and several monthly parking and pay-by-space surface parking lots downtown. Parking Services Division uses a combination of City employees and contract temporary workers to provide service and customer assistance in these facilities and lots. Generally, City employees work during the business day and early evenings while contract temporary services are used for fill-ins, special events, and to extend garage and public restroom hours during late evenings,

weekends, and holidays. Use of temporary workers allows the greatest flexibility as needs vary greatly depending on time of year and events booked at the U.S. Cellular Center, outside special events, and other large venues downtown. On some days Parking Services may only need one temporary service employee to fill in for a City employee sick or on vacation. At other times, Parking Services may need six to 15 to support a major event downtown.

In late March 2015 Parking Services requested and received bids from interested vendors in providing temporary service employees. Eight vendors responded. Chartwell Staffing Solutions provided the lowest bid for the service. They are located in Charlotte, North Carolina with local recruiters in the Asheville area servicing their existing clients. The total cost of the three-year contract will be $390,000 not to exceed $130,000 per fiscal year.

Pros:

- Provides safe and convenient facilities for residents and visitors parking.
- Using temporary service employees is the most cost effective and flexible manner to augment the Parking Services Division's staffing requirements.
- Allows parking Services to capitalize on extended weekend/nights/holiday hours and special event parking to provide better customer service and to bring in additional revenue.

Con:

- Total cost of $390,000.

The necessary funds for the first year of the contract are already budgeted in the Parking Services' Operating Budget for FY 2015-16.

City staff recommends that City Council adopt a resolution authorizing the City Manager to sign a contract with Chartwell Staffing to Solutions to provide temporary services in the City's parking garages and lots at a total cost of $390,000 not to exceed $130,000 per fiscal year.

Vice-Mayor Hunt suggested the current contract be extended on a month-to-month basis and that this item be postponed until a comprehensive cleaning plan is in place and possibly added in the the current agreement.

Councilman Davis asked that consideration be given to extend the restroom hours the 29 Haywood Street restroom hours to include afternoons on Sundays. He felt that we should try to garner tourism dollars to help with the maintenance of the restrooms.

Vice-Mayor Hunt felt that with all the activity in downtown Asheville after 5:00 p.m. that restroom hours be significantly more extended.

Mayor Manheimer said that the City needs to think innovatively about our transportation/ transit/parking, noting that there is some underutilization of what we already have.

City Manager Jackson said that staff will provide Council with a comprehensive cleaning plan that might include investing additional resources for a higher level of citizen and customer service.

C. RESOLUTION NO. 15-155 - RESOLUTION AUTHORIZING THE CITY MANAGER ENTER INTO A SERVICE CONTRACT WITH LEAF COMMUNITY ARTS TO EXPAND YOUTH SERVICES IN THE CITY OF ASHEVILLE

City Manager Jackson said that LEAF Community Arts proposes to expand youth services in the City of Asheville under a one-year service agreement in the amount of $15,000.

LEAF Community Arts is well-established as a partner with the City of Asheville, currently operating under a multi-year service agreement. Currently, LEAF Community Arts receives office space at the East Asheville Community Center in return for partnering on camps, events and educational/cultural programming.

This proposal is aligned with Council's strategic operating plan objective to create "a strong public/private partnership to provide cultural opportunities to the community." Staff believes that an agreement in the amount of $15,000, if approved by City Council, may be absorbed within the existing Parks, Recreation and Cultural Department operating budget.

Ms. Jennifer Pickering, Executive Director of LEAF Community Arts, explained that they are dedicated to our local community youth with a focus on serving youth living in public housing communities or marginalized communities with limited resources. They have been an 11-year City of Asheville partner. They are requesting $15,000 from the City to support LEAF's Art Education programs through LEAF Schools & Streets and The Easel Rider dedicated to the City of Asheville Youth Services for the operating budget year of 2015 (Jan-Dec). The proposed additional youth services above and beyond their current partnership with the City will be (1) $2,500 - Burton Street One Mic Program; (2) $10,000 - Easel Rider Programs Expanded; and (3) $2,500 - Wesley Grant LEAF Southside Drummers Program Enriched and Expanded.

Ms. Schree Chavdarov, LEAF's Community Arts Coordinator, explained the Easel Rider Program. The LEAF agreement with the City Parks and Recreation Department allots up to 10 hours a week dedicated to Easel Rider. In our current operations we are dedicating 15-25 hours of combination events, preparation, teaching artists and coordination. Programs are planned to be expanded beyond their dedicated 48 per year to 80 this year. As of August 1, the U-LEAF Mobile Stage, designed by AVL Design Center Students, will become an additional community-building tool often used in conjunction with the Easel Rider Program.

Ms. Chavdarov also explained the Wesley Grant LEAF Southside Drummers Program. The Program was expanded from 1 week to 2 weeks for 3 months between August and November at a cost of $1,250. Parent Community Coordinator, Shuvonda Harper, will be hired August 1 - December 31 at a cost of $1,000. Uniforms will be purchased for all participating youth that have been in the program currently. Most have been participating for two or more years. Uniforms are their number 1 request for self-esteem and growth of program and recognition in community.

Ms. Jocelyn Reese, LEAF's Schools & Streets Director, explained the Burton Street One Mic Program. She said this program was launched in January as a pilot program. It has quickly grown, and is now a dedicated part of LEAF programming. With the support funds they are able to commit to expanding to three teaching artists three times weekly.

Councilwoman Wisler supported the LEAF programs, noting that their partnership with the City is important. However, she asked that any action be postponed for the following reasons: (1) request for what in the Parks & Recreation Department budget will be cut or reduced since this will be absorbed into their budget; (2) request that the Recreation Board review the request; and (3) place it on a formal agenda so the public will be aware that this item is being considered.

Vice-Mayor Hunt felt it was unfortunate that this request did not come to Council through the annual process, but thinks that it is worth supporting.

In response to Councilman Davis, Ms. Pickering apologized for not understanding the process; however, she said she has tried to understand that process since November 1. If the $15,000 is not granted, it will be a cut in the number of children served and their programming.

Councilman Davis said that Council and staff has worked hard to streamline the strategic partnership grant funding and it is unfortunate that this request did not follow that process since one main goal was to help children.

Mayor Manheimer explained that she felt this request doesn't fit the mold of the strategic partnership grant funding process, but more of the City of Asheville Youth Leadership Academy.

When Mayor Manheimer asked for public comment, no one spoke.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Hunt moved for the adoption of Resolution No. 15-155, while respecting the need for process. This motion was seconded by Councilman Bothwell and carried on a 5-1 vote, with Councilwoman Wisler voting "no".

RESOLUTION BOOK NO. 37 - PAGE 228

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Rich Davis presented City Council with a petition to "request Asheville City Council to name an area of the US Cellular Center in honor of Councilman Jan Davis upon the completion of his third term. His role of leadership and his service to the community for over forty years has played a definitive part in the modernization and success of the US Cellular Center. His work as a volunteer with numerous civic groups such as Asheville Jaycees, Rotary West and Quality Forward and service areas such as Planning and Zoning, Civic Center Commission, Downtown Association and Asheville-Buncombe Sports Commission led ultimately to Asheville City Council. This placed him in a unique position to have helped facilitate the cooperation necessary to make a City-owned property successful and vital to our downtown. Councilman Davis has stayed true to his belief that all great cities have a great gathering place. Whether through sports, entertainment or cultural events, Councilman Davis has maintained the importance of having the Civic Center being more than an economic driver. Just as important, is the need for a gathering spot for Asheville citizens and a place to put our best face for our visitors. We hope you accept this request for consideration and feel this is an appropriate way to recognize a man of distinguished service. Because he holds the building and its people in such high regard we feel this naming as an expression of appreciation would be most heartfelt and deserving." Mr. Mike Burke, former Chair of the Civic Center Commission, Mr. Joel Storrow, Chair of the Civic Center Commission, Mr. Wes Wright, member of the Civic Center Commission, and Mr. Bill Jones, Vice-Chair of the Civic Center Commission, each endorsed Councilman Davis for this honor. Councilman Davis said this was a very humbling experience and that it is a great honor. Mayor Manheimer said that a resolution naming an area of the US Cellular Center in honor of Councilman Davis would be placed on the August 25, 2015, agenda for formal action.

Dr. Kae Livsey requested Council's assistance in addressing a concern related to what they believe is an administrative oversight in transferring ownership of Grandview Circle to the City, when their neighborhood was annexed into the City in 1994. City Manager Jackson said that he would have our Neighborhood Coordinator Marsha Stickford follow-up with Dr. Livsey on this concern.

Mr. Mike Soule appreciated the Transportation Department for the inclusion of the protected bike lane as part of the RADTIP, and also the implementation of the first on-street bicycle parking on Haywood Street.

Mr. Timothy Sadler suggested the City look at the implementation of the License Recognition System in the parking study to generate additional revenue for the City.

Closed Session

At 6:46 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(3). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); and (3) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(5). This motion was seconded by Councilman Pelly and carried unanimously.

At 7:21 p.m., Councilman Davis moved to come out of closed session. This motion was seconded by Councilwoman Wisler and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 7:21 p.m.

Magdalen Burleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – August 25, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING SEPTEMBER 18, 2015, AS "2015 ASHEVILLE BUNCOMBE TIME CAPSULE DAY"

Councilman Davis read the proclamation proclaiming September 18, 2015, as "2015 Asheville Buncombe Time Capsule Day" in the City of Asheville. He presented the proclamation to Ms. Constance Richards, member of the Public Art & Cultural Commission and member of the Time Capsule Selection Panel, who briefed City Council on some activities taking place during the day.

B. PROCLAMATION PROCLAIMING AUGUST 25, 2015, AS THE 75TH ANNIVERSARY OF THE HOUSING AUTHORITY OF THE CITY OF ASHEVILLE

Mayor Manheimer read the proclamation proclaiming August 25, 2015, as the "75th Anniversary of the Housing Authority of the City of Asheville" in the City of Asheville. She presented the proclamation to Mr. Gene Bell, Executive Director of the Housing Authority of the City of Asheville, and Mr. Lewis Isaac, Chair of the Housing Authority of the City of Asheville, who briefed City Council on some activities taking place during the day.

C. RESOLUTION NO. 15-156- RESOLUTION NAMING THE U.S. CELLULAR LOBBY AS THE "JAN DAVIS LOBBY"

Economic Development Director Sam Powers said that this is the consideration of naming the U.S. Cellular Center Lobby after Asheville City Council Member Jan Davis.

City of Asheville Council Member Jan Davis has been a community leader and supporter on behalf of the Asheville Civic Center/US Cellular Center for over 30 years. City Council received a naming petition request from civic center members that a suitable area of the facility be named for Mr. Davis in recognition of his contributions towards the facility. City Council referred the request to the Civic Center Commission for a recommendation as to location of the area to be named. The Asheville Civic Center Commission voted unanimously to recommend renaming the Lobby area of the U.S. Cellular Center to the 'Jan Davis Lobby'.

Pro:

- The naming of this public property is in accordance with the City Of Asheville's Naming City Public Owned Property Policy dated March, 25, 2014.

Con:

- None

The purchase of a plaque commemorating the naming would be the associated expense to this consideration.

Staff and the Civic Center Commission recommends City Council approve naming the U.S. Cellular Center lobby as the 'Jan Davis Lobby.'

On behalf of the Civic Center Commission, Mr. Joel Storrow, Chairman of the Civic Center Commission, was proud to recommend the naming of the lobby in honor of Councilman Jan Davis.

Council members expressed how proud they were of Councilman Davis' service not only to the U.S. Cellular Center, but to the City of Asheville.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 15-156. This motion was seconded by Councilman Bothwell and carried unanimously (with Councilman Davis recusing himself).

RESOLUTION BOOK NO. 37 - PAGE 229

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 28, 2015

B. RESOLUTION NO. 15-157 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A GRANT FROM RAFTELIS FOUNDATION ELEMENTARY FOR THE ACCEPTANCE OF A SCHOLARSHIP

ORDINANCE NO. 4437 - BUDGET AMENDMENT FROM THE RAFTELIS FOUNDATION ELEMENTARY EDUCATION SCHOLARSHIP FOR ACCEPTANCE OF A SCHOLARSHIP

Summary: The consideration of (1) a resolution allowing the City Manager to receive funds from the NC-AWWA-WEA Raftelis Foundation Elementary Education Scholarship and to execute any necessary documents that may be required; and (2) a budget amendment in the amount of $1,000 to budget the scholarship money in the Stormwater Fund.

The City of Asheville, NC, currently has a stormwater educational program which ultimately involves protecting our water resources by educating school age kids on the importance of protecting the environment. Staff continues to provide education to the community as to how stormwater affects the environment.

Staff had the opportunity to request funding from the Raftelis Foundation Elementary Education Scholarship program. This program is targeting elementary awareness to promote water resource stewardship. The goal of this program is to promote educational programs, provide reading and video materials and fund environmental sustainability and water stewardship educational initiatives. The efforts the City continues to promote partners well with the goals of the foundation. As staff has found one of the most successful educational tools concerning environmental issues is through water stewardship programs that work to educate school age students. Students take this knowledge and materials back home and discuss them with their

parents/gardens. Some items staff utilizes to promote the educational program during this past fiscal year (July 1, 2014 – June 30, 2015) included:

- EnviroScape Presentations – This watershed model shows students the effects that pollution can have on water quality. It is a great education tool that teaches the watershed concept in addition to point and non-point source pollution. We exposed 90 students to this activity and they figured out how human activities in a watershed affect water quality.
- Project Wet activities and tours of our water treatment plants – There were 450 participants that toured our water treatment plants through this partnership with the water department. During these tours staff focused on sustainability, wise water use, water production and treatment. Staff also did either an enviroscape presentation or included project wet activities where students learn about water quality and how to protect their watershed.
- Mills River Day – Stormwater staff participated in the Mills River Day and shared our message with approximately 800 participates. We distributed brochures that included the following: dumping & illicit discharge; what stormwater runoff is; benefits of minimizing stormwater pollution; best management practices; flood safety; and the harm that pet waste can cause to our waterways.
- Adopt-a-Street Program – We partner with Asheville Greenworks to provide this program. Groups and organizations are encouraged to help reduce litter by participating in Asheville's Adopt-A-Street program. Participants agree to pick up litter from their adopted street at least six times per year. Greenworks provides groups with bags, vests, gloves, and pick-up sticks. The City of Asheville provides garbage pickup and signs on the street to recognize the litter reduction efforts.
- Adopt-a-Stream Program – The City of Asheville partners with RiverLink for this program. This is a hands-on way for local residents and businesses to get actively involved in improving the water quality of the French Broad River Watershed. Participants are required a minimum of two cleanups per year and report any water related issues/problems to RiverLink. The City of Asheville provides garbage pickup and installation of signs on the streams to recognize the litter reduction efforts. There are a total of 40 active stream cleanup teams.
- Storm drain marking – Stormwater staff partnered with Mountain True to work with volunteers and placed storm drain markers on 500 storm drains in downtown Asheville. These items note that the drains flow into the rivers and streams.

In order to improve these ongoing educational efforts for school-aged students, we applied for and were awarded the Raftelis Foundation Elementary Education Scholarship for $1,000. This money will be used to purchase educational material to further assist the programs currently in place.

Pros:

- Accepting this scholarship money will improve the ongoing education efforts for school-aged students.

Con:

- None

The scholarship from the Foundation will assist in funding existing programs.

Staff recommends Council approve (1) a resolution allowing the City Manager to execute any necessary contracts or documents associated with the Raftelis Foundation Elementary Scholarship for the acceptance of this scholarship in the amount of $1,000; and (2) a budget amendment in the amount of $1,000 to budget the scholarship money in the Stormwater Fund.

RESOLUTION BOOK NO. 37 - PAGE 230
ORDINANCE BOOK NO. 29 - PAGE 88

C. RESOLUTION NO. 15-158 - RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO BE THE LOCAL GOVERNMENT PARTNER FOR THE ASHEVILLE AREA ARTS COUNCIL GRANT APPLICATION TO THE NATIONAL ENDOWMENT FOR THE ARTS 2016 OUR TOWN GRANT

Summary: The consideration of a resolution authorizing the City of Asheville to be local government partner for the Asheville Area Arts Council grant application to the National Endowment for the Arts 2016 *Our Town* grant and consideration of match funding request for this grant.

The National Endowment for the Arts (NEA) offers numerous grants in a variety of art and design categories. For 2016, the NEA is offering the *Our Town* grant for projects that contribute toward livability of communities. To submit an application, eligible primary partners must be eligible local governments and local arts agencies or other departments, agencies or entities within an eligible local government. Only one application per city/town/county will be accepted. The grant requires a non-federal dollar for dollar match, which may include in-kind, cash and volunteering. Matching funds for this grant must be confirmed prior to award (August 1, 2016).

The AAAC has worked with the Buncombe Cultural Alliance (BCA) to seek matching funds in addition to the funds requested from the City of Asheville. The BCA has agreed on an initial project to conduct a cultural asset inventory. It is a cross sector collaborative assessment of Buncombe County's cultural resources.

A Cultural Resources Asset Inventory captures important information about the scope of the economic activity of creative industry not captured in the area using traditional industry codes.

1. The data captured provides new information about the scale and nature of economic activity that is related to cultural and creative industry based businesses.
2. Information gathered provides feasibility for arts based development and related uses.
3. The inventory creates a common use, business to business database of arts and culture partners.
4. Increases the area's eligibility for additional Creative Place making funding from the National Endowment for the Arts, ArtPlace, SmArt Initiative, and similar funds.

The request to the National Endowment for the Arts will be $80,000. Support is being sought from the City as part of the match in the amount of $25,000.

Staff Review:

- If awarded funds, AAAC and its partners will conduct a public process, coordinating with other national and local processes, to capture the scope of activity in Buncombe County.
- This application was approved by the Public Art & Cultural Commission on July 23, 2015.
- Staff recognizes the need for the AAAC to build capacity and AAAC understands NEA Our Town Grant is to support collaborative efforts that bring results for community goals.

Request for consideration of this grant partnership was presented to PED at their meeting on July 21, 2015. They approved this item for consideration and approval with the following:

- Continue efforts to outreach to other local government to assist in supporting the work and consideration of matching funds as benefit will have an impact to all of Buncombe County.
- If approved, the city's match will be contingent upon support from other local governments.
- Funding support should be a combination of cash and in-kind support since City staff resources will be required.

- Consider how to sustain this work once the initial investment is made for the inventory.

Pros:
- The City of Asheville will not have fiduciary responsibility on this grant.
- The City would partner with the Asheville Area Arts Council and other arts, culture and entertainment agencies in the fulfillment of this grant programming.
- It provides a compass for the development of the identified Innovation Areas, especially the River Arts District.

Cons:
- None noted at this time.

The City's support is grant matching funds in the amount of $25,000. If Council approves this request, staff will include funding for the match in the proposed budget for FY 2016-17. Additionally, staff time and resources will be required in the performance of this grant.

Planning & Economic Development Committee (1) approval by City Council for the local government partnership; and (2) consideration of the matching funds requested in the amount of $25,000, subject to (a) other local government match funding; and (b) combination of cash (no amount specified) and in kind.

Councilman Smith thanked the Asheville Area Arts Council for making this effort. The work for the grant will provide a foundation for future artists as well as new collaborations in the River Arts District.

RESOLUTION BOOK NO. 37 - PAGE 231

D. RESOLUTION NO. 15-159 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CHANGE ORDER WITH CAVANAUGH AND ASSOCIATES P.A. FOR THE VAULT RENEWALS AND DISTRICT METERING AREAS ZONE METERING PROJECT

Summary: The consideration of a resolution authorizing the City Manager to execute a change order with Cavanaugh and Associates, P.A., (Cavanaugh) to increase the engineering design services contract in the amount of $8,000 from a total project budget of $190,136 to $198,136 for the Vault Renewals and District Metering Areas (DMA) Zone Metering Project.

On December 10, 2013, City Council (Council) awarded the engineering design services contract to Cavanaugh, for the Vault Renewals and DMA Zone Metering Project. The contract originally consisted of a survey, engineering design, construction administration, and other related professional services to replace existing substandard and failing large water meters and vaults with new metering infrastructure designed and constructed in accordance with the City of Asheville (City) standards. The initial time for the construction contract was 150 days. However, due to unknown site issues, meter technology issues and weather impacts, the construction contract has been extended by 43 days for a total of 193 days. The extension of the construction contract requires that Cavanaugh spend additional time providing construction administration. Also, due to the encountered unknown site conflicts and meter technology issues, Cavanaugh is being required to perform some additional redesign and troubleshooting to resolve these issues.

The additional engineering services for the increased construction contract time and site issues creates the need for a change order to increase the contract amount by an additional $8,000 for a total project budget of $198,136.

Pro:

- Approval of the change order will allow the city to complete the engineering services for the entire project.

Con:

- If the change order is not approved, then the project cannot be finished.

The funding needed for the change order is currently allocated within the Meter / Vault Repair Project in the Water Resources Capital Improvement Projects fund. No budget amendment is necessary.

Current Amount of Cavanaugh and Assoc. Contract	$190,136
Amount Needed for Change Order	$ 8,000
Total Amount for Project	$198,136

The amount remaining in the Meter / Vault Repair Project will be saved for the construction portion of the project. Staff will seek Council approval of contracts associated with this project if the amount of the contract requires Council approval per the City's Procurement, Purchasing and Contracting Policy.

Staff recommends Council approval of the resolution authorizing the City Manager to execute a change order with Cavanaugh to increase the engineering design services contract in the amount of $8,000 from a total project budget of $190,136 to $198,136 for the Vault Renewals and District Metering Areas (DMA) Zone Metering Project.

RESOLUTION BOOK NO. 37 - PAGE 232

E. RESOLUTION NO. 15-160 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR THE NORTH CAROLINA APPALACHIAN REGIONAL COMMISSION EMERGING OPPORTUNITIES GRANT PROGRAM

Summary: The consideration of a resolution authorizing the City of Asheville to submit a grant application for the North Carolina Appalachian Regional Commission Emerging Opportunities Grant Program.

The North Carolina Appalachian Regional Commission (NC ARC) offers numerous grants to create opportunities for self-sustaining economic development and improved quality of life for the people of Appalachia. Buncombe County is categorized as a Transitional County, and one of twenty-nine counties in the Appalachian portion of North Carolina. For 2015, the NC ARC is offering the new *Emerging Opportunities* grant for projects that help create a region with:

1. An economy where employment in the manufacturing sector is growing;
2. Vibrant main streets and robust retail activity centers;
3. Communities that use technology to break down barriers of geographic isolation and enable rural communities to market locally-produced goods and services around the world;
4. An economy that respects the importance of heritage, history and place, and recognizes that an asset-based approach to economic development integrates these features at every opportunity;
5. Development of a skilled workforce where improving levels of education and training result in increased opportunity for all residents.

Projects must address ARC Goal 1, to increase job opportunities and per capita income in Appalachia and target a specific NC Strategy comprised of the following:

- Develop leaders and strengthen community capacity
- Diversity the economic base

- Enhance entrepreneurial activity in the region
- Develop and market strategic assets for local economies
- Increase the domestic and global competitiveness of the existing economic base
- Foster the development and use of innovative technologies
- Capitalize on the economic potential of the Appalachian Development Highway System
- Encourage sustainable and effective economic use of natural resources
- Encourage investments in energy projects that create jobs

Applicants must be a 501(c)(3) non-profit or governmental/educational institution. Applications are due by August 28, 2015. Matching funds must be confirmed prior to application submittal. Projects that are selected by the Governor will be recommended to ARC headquarters in October, 2015.

Staff Review:

- Economic development studies are identified as a qualifying project.
- The City of Asheville submitted a pre-application proposing an economic development study on special events to Land of Sky Regional Council and was selected to submit a full application by NC ARC.
- *The Entrepreneurial Impact of Outdoor Special Events* study will:
    - Quantify the impact of special events on local entrepreneurship
    - Generate data to support the development of policy recommendations designed to motivate entrepreneurship and job creation through special events
    - Create a practical, research-based survey tool that can be shared with surrounding communities in the region.
- The proposed study is in alignment with NC ARC Strategic Objective 1.4, to develop and market strategic assets for local economies.
- The proposed study seeks to address NC ARC Strategy 1.4.3, to provide new opportunities to demonstrate cooperation with the private sector, which have the potential of directly creating new jobs and are replicable in other areas of the region or the state.
- The maximum project estimate is $50,000 and requires a 1:1 cash match ($25k/$25k).
- The proposed project performance period is March 2016 – March 2017.

This proposal was presented and approved by the Planning and Economic Development Committee at their meeting on August 18, 2015. They approved this item to be place on your agenda for consideration and approval.

If awarded funds, a Request for Proposal will be issued to secure a contract with a strategic research consulting firm. Staff will work closely with the research consultant to identify the most appropriate analytical techniques and assist in the development of unique survey instruments for each event selected for participation. Staff will serve as a liaison between local businesses, the event organizers, and the research consultant to assure successful implementation, transparency, and optimal inclusion in the survey process.

The proposed research study will encompass a practical examination of various event types, sizes and lengths. The study will identify the most popular events for attendees and vendors, the distance they travel, and to what measure special events contribute to their lives and livelihoods. The study will analyze the most profitable events for local brick & mortar businesses, impact on attendee response and behavior, and pinpoint unique attributes of events that provide the most ideal climate for local business support that drives and motivates entrepreneurship and job creation.

The final report will reveal recommendations as to how local governments can leverage their outdoor public spaces and public-owned land to encourage special events that support job creation and motivate entrepreneurship. The data generated will be used to support

recommendations on incentives for special events that maintain the strongest overall return on investment. The data will be used to support new policies that enhance entrepreneurial activity through outdoor special events. The City will distribute a copy of the final report and surveys to each of the 6 counties adjacent to Buncombe County, and will make an electronic copy of the report available to all other counties in the Western North Carolina Region.

The grant will support City Council's goal to create economic development and community investment opportunities through partnerships, planning and incentives, continue to support Asheville as a culturally diverse city, and continue to develop communications and partnerships with citizens, community leaders, the media and elected officials.

Pros:
- Strengthens the City's relationship with the North Carolina Department of Commerce and the Appalachian Regional Commission
- Provides critical data with which to base sound policy recommendations
- Creates opportunities to engage, support and partner with the private sector
- Establishes a platform to share City efforts and provide assistance throughout the region

Con:
- None noted at this time.

The fiscal impact of the City's support to this grant application is grant matching funds an amount not to exceed $25,000 from the existing Community and Economic Development budget funds. No budget amendment would be required.

City staff recommends City Council (1) approve the NC ARC *Emerging Opportunities* grant application; and (2) consider matching funds requested in the amount not to exceed $25,000 from the existing Community & Economic Development budget.

RESOLUTION BOOK NO. 37 - PAGE 233

F. RESOLUTION NO. 15-161 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE LEXINGTON AVENUE ARTS & FUN FESTIVAL ON SEPTEMBER 6, 2015

RESOLUTION NO. 15-162 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT OKTOBERFEST ON OCTOBER 10, 2015

RESOLUTION NO. 15-163 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT HOWLIN HALLOWEEN ON OCTOBER 31, 2015

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Lexington Avenue Arts & Fun Festival on September 6, 2015; Oktoberfest on October 10, 2015; and Howlin Halloween on October 31, 2015.

- Arts 2 People has requested through the City of Asheville Office of Economic Development that City Council permit them to serve beer and/or unfortified wine at Lexington Avenue Arts & Fun Festival and allow for consumption at this event.

  Lexington Avenue Arts & Fun Festival will be held on Sunday, September 6, 2015 from 11:00 a.m. – 9:00 p.m. at Lexington Avenue, Walnut Street & Hiawassee Street as per the event area limits referenced on the accompanying site map.

- Asheville Downtown Association has requested through the City of Asheville Office of Economic Development that City Council permit the sale of beer and/or unfortified wine at Asheville Oktoberfest and allow for consumption at this event.

  Asheville Oktoberfest will be held on Saturday, October 10, 2015, from 1:00 p.m. – 6:00 p.m. on Woodfin Street between the intersection of Central Avenue & Oak Street as per the event area limits referenced on the accompanying site map.

- Brother Wolf Animal Rescue has requested through the City of Asheville Community & Economic Development Department that City Council permit them to serve beer and/or unfortified wine at Howlin Halloween and allow for consumption at this event.

  Howlin Halloween will be held on Saturday, October 31, 2015 from 12:00 p.m. – 4:00 p.m. at Carrier Park as per the event area limits referenced on the accompanying site map.

Pro:

- Allows fundraising opportunities for Arts 2 People, Asheville Downtown Association and Brother Wolf Animal Rescue

Con:

- Potential for public safety issues

City staff recommends City Council adopt resolutions authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Lexington Avenue Arts & Fun Festival, Oktoberfest, and Howlin Halloween.

RESOLUTION NO. 15-160 - RESOLUTION BOOK NO. 37 - PAGE 234
RESOLUTION NO. 15-161 - RESOLUTION BOOK NO. 37 - PAGE 237
RESOLUTION NO. 15-162 - RESOLUTION BOOK NO. 37 - PAGE 240

G. ORDINANCE NO. 4438 - FIRST READING OF AN ORDINANCE GRANTING A NON-EXCLUSIVE FRANCHISE TO SPIRIT COMMUNICATIONS FOR INSTALLATION OF TELECOMMUNICATIONS FACILITIES IN THE PUBLIC RIGHT-OF-WAY OF THE CITY OF ASHEVILLE

Summary: The consideration of an ordinance granting a franchise to Spirit Communications pursuant to the City's Telecommunications Ordinance (3056).

The City of Asheville (City) adopted Article III of the Code of Ordinances (the Telecommunications Ordinance) in 2003 to provide for the granting of revocable and non-exclusive franchises to install telecommunications facilities in the City's right-of-way. Spirit Communications wishes to begin operations in Asheville and requires the granting of a franchise agreement under the Telecommunications Ordinance.

Most of the substantive terms applicable to this or any telecommunications franchise are set forth in the Telecommunications Ordinance, and Spirit Communications, by accepting the franchise, agrees to abide by the provisions of the ordinance. The main issues to be determined in connection with this particular franchise are the fee that the City will receive and the length of the franchise term.

Franchise Fee: In accordance with §4.5-85(a) of the City's Code of Ordinances, the grantee of any franchise shall pay a franchise fee or may provide non-monetary consideration including additional facilities and excess capacity to be reserved for the city's use.

With regard to a franchise fee, the Information Technology Services Department determined that a two-tiered fee structure based on density would reflect the value of the right-of-way in high density areas while encouraging the extension of service into under-served and less dense areas. Within the downtown area (defined as Charlotte/South Charlotte Streets on the east; Beaumont/Hilliard Streets on the south; Clingman/Haywood Streets on the west; and I-240 on the north), the rate is proposed to be $.10 per foot per month for each linear foot of right-of-way used for the installation. Outside of this core area, the rate drops to $.02 per foot per month. In lieu of an estimated fee of approximately $10,000/year for the proposed installation of approximately 3 miles of fiber running from the intersection of Charlotte St and I-240 along College Street and ending up at the West Gate Mall area, Spirit Communications has agreed to provide the City with the exclusive use of 8 strands of fiber. The estimated value of this fiber is over $90,000. Spirit Communications also has agreed to provide 8 strands of fiber in all subsequent fiber build requests.

Franchise Term: Spirit Communications has requested a 10-year term, renewable for two 10-year terms, unless either party terminates.

Installation: Pursuant to §4.5-85(d), any installation relative to a franchise in the public rights-of-way must submit a construction plan and receive approval from the City Engineer.

Considerations:

1. This will be the City's fourth franchise agreement of this type.
2. The City has the obligation to protect and preserve its right-of-way for public use, and the right to expect fair compensation for its use by profit-making enterprises. The compensation that we receive should be fair and equitable, and we may not prefer one provider over another.
3. There is significant public interest in enabling telecommunications providers to provide their service, and especially to enable, or at least not obstruct, provision of such service to less densely populated and underserved areas.

In lieu of an estimated fee of approximately $10,000/year for the proposed installation of approximately 3 miles of fiber running from the intersection of Charlotte St and I-240 along College Street and ending up at the West Gate Mall area, Spirit Communications has agreed to provide the City with the exclusive use of 8 strands of fiber. The estimated value of this fiber is over $90,000. Spirit Communications also has agreed to provide 8 strands of fiber in all subsequent fiber build requests.

Staff, recommends that Council grant a franchise to Spirit Communications by adoption of the ordinance, will be available to assist in determining options relative to the proposed fee schedule and the term if requested by Council. Since this is a franchise ordinance, a second reading of it will be required which will occur during the September 8 Council meeting, after which Council will be in the position to act.

ORDINANCE BOOK NO. 30 - PAGE 90

H. RESOLUTION NO. 15-164 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH PATTON CONSTRUCTION GROUP INC. FOR THE HAYWOOD ROAD MULTIMODAL IMPROVEMENTS PROJECT

ORDINANCE NO. 4439 - BUDGET AMENDMENT FOR THE HAYWOOD ROAD MULTIMODAL IMPROVEMENTS PROJECT

Summary: The consideration of (1) a resolution authorizing the City Manager to execute on behalf of the City of Asheville a contract in the amount of $243,750.00 plus a contingency of

15% ($36,562) with Patton Construction Group, Inc. for the project known as Haywood Road Multimodal Improvements, City of Asheville Project # ENG-12-13-013; and (2) a budget amendment in the amount of $82,128 from debt proceeds to fully fund the contract and the contingency.

Haywood Road is a busy corridor with vehicular, bicycle and pedestrian traffic. The existing infrastructure is insufficient to handle the growing demands of the area. Partnering with the City in making multimodal improvements on Haywood Road, New Belgium Brewery has donated $50,000 to the project. The project was advertised on July 15, 2015 and on August 6, 2015, bids were opened with the following results:

1. Patton Construction Group, Inc., Asheville, NC $243,750
2. Armen Construction LLC, Charlotte, NC $255,630
3. Moore and Son Site Contractors, Inc., Mills River, NC $261,550

Patton Construction Group, Inc., of Asheville NC, was the lowest responsible bidder with a bid of $243,750. A 15% contingency ($36,562) has been added to allow payment for any unforeseen costs that typically arise during construction.

Pros:

- Will construct approximately 1,700 linear feet of new sidewalk within the Asheville City limits.
- Creates a new bike lane from Craven Street to Beecham's Curve.
- Improves pedestrian and bike safety.
- Encourages walking and biking, thereby reducing carbon emissions.
- Will create a needed linkage between West Asheville and the River Arts Districts.
- New Belgium Brewery donated $50,000 towards the project.

Cons:

- Project management and contract administration will consume staff time.

The contract ($243,750) and the 15% contingency ($36,562) total $280,312. From the original project budget of $220,000, there is currently a remaining balance of $198,184. The budget amendment will increase the project budget by $82,128. With a twenty year amortization schedule for the debt, this budget amendment will have a negligible impact on future annual debt service payments.

City staff recommends City Council adopt (1) the resolution awarding the contract to Patton Construction Group, Inc. and authorizing the City Manager to execute on behalf of the City of Asheville a contract in the amount of $243,750.00 PLUS a contingency of 15% ($36,562) with Patton Construction Group, Inc. for the project known as Haywood Road Multimodal Improvements, City of Asheville Project # ENG-12-13-013 and further authorizing the execution any change orders to said contract which may arise during construction of said project up to the budgeted amount of $280,312; and (2) a budget amendment in the amount of $82,128 from debt proceeds to fully fund the contract and the contingency.

ORDINANCE BOOK NO. 30 - PAGE 103

I. **RESOLUTION NO. 15-165- RESOLUTION AUTHORIZING THE CITY MANAGER TO NEGOTIATE AND EXECUTE A CHANGE ORDER WITH COLEJENEST & STONE FOR THE CRAVEN STREET IMPROVEMENTS PROJECT**

ORDINANCE NO. 4440 - BUDGET AMENDMENT FOR THE CRAVEN STREET IMPROVEMENTS PROJECT

Summary: The consideration of (1) a resolution authorizing the City Manager to negotiate and execute a change order in the amount of $195,052.50 to the previously approved contract with ColeJenest & Stone for professional services for the Craven Street Improvements project for completing the design and construction administration of the project; and (2) a budget amendment in the amount of $195,052.50 from debt proceeds to provide sufficient budget authorization for the change order.

On June 12, 2012, City Council approved a contract in the amount of $852,604 with ColeJenest & Stone for professional services for the design of the Craven Street Improvement project. This project includes improvements to the existing two lane roadway by adding the following complete street facilities: bike lanes, sidewalks, stormwater improvements, stream stabilization, a greenway section, trailhead and public parking areas. The City had previously selected ColeJenest & Stone through a Request for Qualifications process in which 14 other teams had submitted. This change order will increase the original contract amount by $195,052.50 to $1,047,656.50.

The City currently has four funding partners on this project: Golden Leaf Foundation at $300,000, the US Department of Commerce at $1.12M, and the NC Clean Water Management Trust Fund through RiverLink at $365,000, and the latest funding partner, Buncombe County Tourism Development Authority at $160,000. The remaining cost of the project will be paid through the Stormwater, Water, and Parking Funds and General Fund debt proceeds.

As the construction project has progressed there have been many challenges that have resulted in additional services required by the professional services team. The project area is a Brownfield site and special requirements are necessary in dealing with the construction activities associated. Staff and the professional services team have worked diligently to stay within the existing budget. As the site conditions change, additional professional services outside of the original scope are needed.

As this site is a Brownfield, the material must be either hauled off site to a permitted landfill in Lenoir, or the material must be utilized within the existing footprint of the Brownfield site. New Belgium Brewing has worked diligently with City Staff to find locations for as much of the material as possible on their site. If the City has to transport this material off site, the cost is estimated at $500,000. City staff, New Belgium Brewing and the Clean Water Management Trust Fund have partnered to find a solution to keep this material on site by creating an earthen berm where a proposed stormwater bio-swale was designed to go. The partnership will still incorporate a stormwater component in an oversized pipe (stormwater quantity) and a filter system at each drop inlet. By incorporation this into the project, new designs are necessary.

Additional professional services are needed to re-design the trail head to shift away from a potential future Craven Street Bridge Improvement that will support critical bicycle and pedestrian facilities and fulfill Council's resolution to address truck traffic issues in the area.

As the project had developed, additional services have been identified for the design, construction inspection and material testing of the project. As this is a Brownfield site, specialized construction activities have taken longer than originally anticipated requiring inspectors on site more.

Pros:

- Allows the project to continue to move forward and meet the opening date of operation for our partner New Belgium Brewery of December 2015
- Provides additional professional services necessary for the completion of the project which includes a complete street approach to roadway design, provides a greenway linkage, installs bike lanes, provides parking facilities and improves stormwater management

- Allows the City to be sustainable by maintaining as much of the Brownfield material on site as possible and not hauling that material away to a permitted landfill.
- Continue to be proactive in leveraging partnerships for the ongoing project.

Con:

- The project management and contract administration will consume staff time and City Funds

The total additional professional services amount is $195,052.50. A budget amendment in this amount is included with the change order resolution. The City's share of the cost of the Craven Street Improvements project is being funded with debt proceeds. This budget amendment will increase the amount that the City borrows by $195,052.50. With a likely amortization period of twenty years on this debt, the impact on future annual debt service payments of this budget amendment are minimal.

The consideration of 1) a resolution authorizing the City Manager to negotiate and execute a change order in the amount of $195,052.50 to the previously approved contract with ColeJenest & Stone for professional services for the Craven Street Improvements project for completing the design and construction administration of the project; and 2) a budget amendment in the amount of $195,052.50 from debt proceeds to provide sufficient budget authorization for the change order. The total professional services contract is not to exceed $1,047,656.50.

RESOLUTION BOOK NO. 37 - PAGE 244
ORDINANCE BOOK NO. 30 - PAGE 105

J. RESOLUTION NO. 15-166 - RESOLUTION RATIFYING AN AGREEMENT WITH PATTON CONSTRUCTION GROUP FOR EMERGENCY REPAIRS TO A FAILED DRAINAGE SYSTEM AT ON CITY-OWNED REAL PROPERTY LOCATED AT 174 S. CHARLOTTE STREET

ORDINANCE NO. 4441 - BUDGET AMENDMENT FOR EMERGENCY REPAIRS TO A FAILED DRAINAGE SYSTEM ON CITY-OWNED REAL PROPERTY LOCATED AT 174 S. CHARLOTTE STREET

Summary: The consideration of a resolution ratifying an Agreement between the City and Patton Construction Group for emergency repairs to a failed drainage system causing a hole on City owned real property and a budget ordinance amendment, in the amount of $190,233 to set up a project budget for the contract and the 15% contingency, with 50% of the funding coming from White Labs and the remaining amount coming from reserves in the Stormwater Fund and the Water Resources Fund.

On July 15, 2015, the City of Asheville was notified of a failure in the storm drainage system, resulting in a large hole, had formed on City owned real property, known as the Water Maintenance Facility, located at 174 S. Charlotte Street, currently leased to White Labs. The hole was due to the rock culvert failure on this property. Public Work staff immediately met onsite with three contractors to assess the urgency and provide bids. As heavy rain continued to fall, the hole grew, placing the Water Maintenance Facility along with equipment located therein, in dire jeopardy of being flooded and public safety compromised.

Immediately thereafter, two of the three contractors provided the City with bids:

- Patton Construction Group, Arden, NC $101,250*
- Steppe Construction, Mills Springs, NC $182,300

*Please note that additional unforeseen items have been added to the contract to increase the amount to where it is today versus where we originally bid it.

The City entered into a contract with Patton Construction Group, who was the lowest responsive and responsible bidder. Patton was authorized to move forward with the construction of the repair and instructed to open the hole at the failed drainage system in order to allow the stormwater to flow-into the existing closed system. The repairs included realigning the drainage system to minimize conflict with White Labs' future silos and improve the hydraulic capacity of the system. Staff has proposed to tie into the existing system with two manholes joined by approximately 80 feet of 54" reinforced concrete pipe and abandoning the previous connection and to also provide for future connections of the existing system. Once this is complete the area is to be backfilled and the parking area repaved.

The current repairs were the minimum needed to mitigate the present, immediate and existing emergency. However, a more permanent fix is warranted. City Staff and representatives from White Labs have communicated about the Project and also have discussed the requirement for a Phase Two to support the emergency repairs and provide a more permanent and long term fix, that will be based upon an engineering analysis of the drainage system, with every effort having been made to incorporate the emergency repairs into a larger, more holistic future permanent repair project.

The total cost of the emergency contract with Patton Construction is $165,420 with a contingency of $24,813, for a total project cost of $190,233. White Labs has agreed to pay 50% of the actual costs for repairs. The remaining 50% will be paid from the Stormwater and Water Resources Funds.

Pros:

- Remove a potential liability issue from the City's stormwater system and protect the public's safety.
- Improve hydraulic capacity of the system.
- Continue a partnership with White Labs

Con:

- Unforeseen financial obligations to fund project.

As noted above, the City will pay 50% and White Labs will pay 50% of this project. The City's portion of the budget, which totals $95,116.50, will be shared equally between Stormwater and Water funds by appropriating reserves in those two funds.

City staff recommends City Council ratify the contract between the City and Patton Construction Group for emergency repairs to City-owned property located at 174 S. Charlotte Street, and a budget amendment in the amount of $190,233 to set up a project budget for the contract and the 15% contingency, with 50% of the funding coming from White Labs and the remaining amount coming from reserves in the Stormwater Fund and the Water Resources Fund.

RESOLUTION BOOK NO. 37 - PAGE 245
ORDINANCE BOOK NO. 30 - PAGE 107

K. RESOLUTION NO. 15-167 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH RIVERTOP CONTRACTING INC. FOR THE FISCAL YEAR 2016 DOWNTOWN CLEANING PROJECT

Summary: The consideration of a resolution authorizing the City Manager to execute, on behalf of the City of Asheville, a contract in the amount of $250,026 PLUS a contingency of 15% ($37,504) with Rivertop Contracting Inc. for the project known as Downtown Cleaning – Fiscal Year 2016, City of Asheville Project #DC-16-01, and further authorizing the execution of any

change orders to said contract which may arise during execution of said project up to the budgeted amount of $300,000.

The project was advertised on June 12, 2015, and bids were opened on July 15, 2015, with the following results:

Perfection First Services, Marion NC	$48,080 (Bidder withdrew bid)
Diversified Industry Services, Albany, GA	$83,718 (Bidder did not sign several forms)
Rivertop Contracting, Inc. Swannanoa, NC	$250,026
Treece Pressure Washing, Inc. Ringgold, GA	$256,260
Appalachian Paving and Concrete, Swannanoa, NC	$305,120

The contractor will pressure wash sidewalks in the Central Business District. The contractor will also pressure wash City owned street furniture and garbage cans in the Central Business District. This will be the third year that this contract is in place. In addition, the contractor will remove weeds and other undesirable vegetation from City owned sidewalks, curblines and tree grates. This will be the first year that undesirable vegetation removal is included as part of the contract.

The City may elect to renew the contract for two additional one year periods.

Pros:

- Will result in the most heavily used areas of the CBD being pressure washed completely 4 times in the life of the contract and the lesser used areas being pressure washed completely 2 times in the life of the contract.
- Will result in undesirable vegetation being removed from City sidewalks, curblines and tree grates

Con:

- Project management and contract administration will consume staff time.

$300,000 was budgeted for Downtown Cleaning in the general fund. This amount was approved by City Council and included in the Fiscal Year 2015-2016 budget.

City staff recommends City Council adopt the resolution awarding the contract to Rivertop Contracting Inc. and authorizing the City Manager to execute, on behalf of the City of Asheville, a contract in the amount of $250,026 PLUS a contingency of 15% ($37,504) with Rivertop Contracting, Inc. for the project known as Downtown Cleaning – Fiscal Year 2015, City of Asheville Project #DC-16-01 and further authorizing the execution of any change orders to said contract which may arise during execution of said project up to the budgeted amount of $300,000.

Councilman Davis was pleased that the vegetation removal from City owned sidewalks, curblines and tree grates will be a part of this contract as it will make a huge difference.

RESOLUTION BOOK NO. 37 - PAGE 246

L. RESOLUTION NO. 15-168 - RESOLUTION TO ACCEPT ADDITIONAL EMERGENCY SOLUTIONS GRANT FUNDS TO EXPAND EXISTING RAPID REHOUSING PROGRAM

ORDINANCE NO. 4442 - BUDGET AMENDMENT FOR THE RAPID REHOUSING PROGRAMS FROM THE EMERGENCY SOLUTIONS GRANT

Summary: The consideration of a resolution accepting additional 2014-2015 Emergency Solutions Grant (ESG) funds in order to expand existing Rapid Rehousing Program and increase

administrative support, and a budget amendment in the amount of $40,188 to the budget for the Emergency Solutions Grant in the City's Special Revenue Fund..

City Council approved the acceptance of the 2014-2015 Emergency Solutions Grant in the amount of $194,492 on November 11, 2014, on the recommendation of the Housing and Community Development Committee.

Additional funds in the amount of $40,188 have been allocated to the City of Asheville by the State Division of Aging and Adult Services (DAAS), Housing and Homeless Unit. $35,648 is available for Rapid Rehousing for Homeward Bound due to high performance of their existing program, and $4,548 for administrative costs to the City of Asheville.

The Housing and Community Development Committee approved the recommendation of these additional funds at their August 18, 2015, meeting.

Pro:

- ESG funding is a key funding resource for emergency shelter, and is now becoming an important resource for rapid re-housing of persons experiencing homelessness.

Con:

- None noted.

Program funding is entirely from the US Department of Housing and Urban Development, through the State of North Carolina. Existing Community Development Division staff will administer the program. No general funds are requested to support this program.

City staff recommends City Council (1) accept these funds, and sub grant those funds to the agencies for the programs approved by the State Division of Aging and Adult Services (DAAS), Housing and Homeless Unit; and (2) adopt a budget amendment in the amount of $40,188 to the budget for the Emergency Solutions Grant in the City's Special Revenue Fund.

RESOLUTION BOOK NO. 37 - PAGE 247
ORDINANCE BOOK NO. 30 - PAGE 109

M. ORDINANCE NO. 4443 - BUDGET AMENDMENT FROM INSURANCE RECOVERY FUNDS FOR A DAMAGED BUS SHELTER

Summary: The consideration of a budget amendment in the Transit Capital Fund in the amount of $9,421.10 from insurance recovery funds for a damaged bus shelter to utilize towards the repair of the bus shelter.

On March 8, 2015, a bus shelter located at the corner of Merrimon Avenue and Larchmont Road was damaged by a third-party and the City settled the property damage claim for $9,421.10. The Transportation Department seeks to utilize the settlement funds to repair said bus shelter.

Pro:

- Provides funding for Transportation Department bus shelter repair.

Con:

- None.

The insurance recovery funds are held in the City Property & Liability Fund. Upon City Council approval, the funds will be transferred to the City Transit Capital Fund to be utilized to repair the bus shelter.

City staff recommends City Council adopt the budget amendment in the Transit Capital Fund in the amount of $9,421.10 so funds may be applied towards bus shelter repairs located at the corner of Merrimon Avenue and Larchmont Road.

ORDINANCE BOOK NO. 30 - PAGE 111

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Bothwell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Wisler and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

III. PRESENTATIONS & REPORTS:

A. LEGISLATIVE UPDATE

RESOLUTION NO. 15-169- RESOLUTION REQUESTING THE LOCAL DELEGATION OF NORTH CAROLINA GENERAL ASSEMBLY FOR THE CITY OF ASHEVILLE OPPOSE SALES TAX REDISTRIBUTION LEGISLATION

Mayor Manheimer explained the passage of the sales tax redistribution legislation threatens to take an estimated $1-3 Million in sales tax revenue from the City of Asheville, and asked for Council's support in adoption of a resolution opposing that legislation. Several cities across North Carolina have signed resolutions opposing this legislation.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

When Mayor Manheimer asked for public comment, no one spoke.

Councilman Bothwell moved to adopt Resolution No. 15-169. This motion was seconded by Councilwoman Wisler and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 248

B. MAYOR'S COMMITTEE FOR VETERANS AFFAIRS

Mr. Ron Kennedy, representing the Mayor's Committee for Veterans Affairs, briefed Council on their activities and urged the community to consider joining the Committee.

On behalf of City Council, Mayor Manheimer thanked Mr. Kennedy and Committee members for their efforts and hard work.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING ON PROPERTY LOCATED AT 39 ELM STREET FROM COMMUNITY BUSINESS II DISTRICT TO COMMUNITY BUSINESS II DISTRICT/CONDITIONAL ZONING, WITH

CONDITIONS TO BUILDING SIZE, IMPERVIOUS AREA AND SETBACK, FOR THE CONSTRUCTION OF A 5-STORY HOTEL WITH PARKING

At the applicant's request, Councilman Smith moved to continue this public hearing until November 10, 2015. This motion was seconded by Councilman Pelly and carried unanimously.

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING FOR PROPERTY LOCATED AT 960 AND 966 TUNNEL ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT AND OFFICE DISTRICT/CONDITIONAL ZONING TO COMMUNITY BUSINESS I DISTRICT/CONDITIONAL ZONING TO ALLOW FOR THE OPERATION OF OFFICES AND OTHER USES WITHIN TWO EXISTING STRUCTURES

ORDINANCE NO. 4444 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 960 AND 966 TUNNEL ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT AND OFFICE DISTRICT/ CONDITIONAL ZONING TO COMMUNITY BUSINESS I DISTRICT/CONDITIONAL ZONING TO ALLOW FOR THE OPERATION OF OFFICES AND OTHER USES WITHIN TWO EXISTING STRUCTURES

Urban Planner Julia Fields said that this is the consideration of an ordinance to conditionally zone property located at at 960 and 966 Tunnel Road from RM-6 Residential Multi-Family Low Density District and Office District/Conditional Zoning to Community Business 1/Conditional Zoning to allow the operation of offices and other sues within two existing structures. This public hearing was advertised on August 14 and 21, 2015.

Ms. Fields said that the applicant is requesting review of a conditional zoning submittal proposing to rezone property from RM-6 Residential Multi-Family Low Density District and Office District/Conditional Zoning to Community Business I/Conditional Zoning in accordance with Section 7-7-8 of the Unified Development Ordinance, to allow for the potential use of two properties/buildings for office, health and fitness, residential, low impact artist studios, and instructional services purposes.

The project site (PINs 9658.97-8942 and 9658.98-9020) consists of two separate lots, .212 and .649 acres in size. The properties are addressed 960 and 966 Tunnel Road East. The smaller parcel, 960 Tunnel Road, is currently zoned RM-6 (Residential Multi-Family Low Density District) and contains a vacant residential structure. The .649 acre parcel, 966 Tunnel Road, is zoned Office Conditional Zoning and contains a building that is used for offices and instructional services.

The applicant, Monmovin, LLC, proposes to continue to utilize the structure at 966 Tunnel Road for offices and instructional services (with the potential for residential use) as was established through a conditional zoning process that occurred in 2005. Additionally, they propose to renovate the structure at 960 Tunnel Road for potential use for offices, instructional services, health and fitness facilities, low impact artist studios, or residential purposes. The applicant is requesting rezoning of both parcels, to CBI CZ (Community Business I Conditional Zoning), to allow for this new development and to provide for shared parking and ingress and egress. The parcels will remain separate.

Access to the site is proposed off of Tunnel Road (ingress and egress) at the existing access point for Tract 2. It is proposed that a new access point (one-way, egress only) be established onto Governor's View Road. Eighteen parking spaces are proposed (8 existing) on the properties. An agreement will be entered into to allow for the use of additional spaces on the Groce United Methodist Church property across Governor's View Road. A raised pedestrian crosswalk with high visibility markings will be provided from the subject properties to the church parking area. There are existing sidewalks on Tunnel Road. A sidewalk will be provided along

the Governor's View Road frontage for Tract 1 and either a sidewalk will be constructed or a fee in lieu and 10 foot easement will be provided to the city for the remaining 160 linear feet of frontage along Governor's View Road.

Landscaping is required for this project and includes street trees, parking lot landscaping, and building impact landscaping on Tract 1. Primarily the landscaping on this tract is provided for with existing vegetation. Landscaping planted and required for the previous conditional zoning on Tract 2 is to remain, with the exception of the existing buffer between the properties and landscaping that is in conflict with the proposed egress onto Governor's View Road or any sidewalk construction. Open space is not required as the property is less than an acre in size.

This proposal was approved with conditions by the Technical Review Committee (TRC) on June 15, 2015. Most of the TRC comments have been addressed in the plans that are before the Asheville City Council.

The Asheville Planning and Zoning Commission reviewed this proposal at a meeting on July 16, 2015. At this meeting the commission voted unanimously (5-0) to recommend approval of the conditional zoning to Asheville City Council with conditions as presented (Exhibit B-1).

City Council will have the final review of the conditional zoning. It will return to the TRC for Final TRC review, if approved by Asheville City Council.

The applicant held a meeting for residents and property owners in the area on July 14, 2015, to introduce this proposal to the community. Those in attendance were generally supportive of the proposal.

Tract 2 is currently zoned Office CZ and the building on this parcel will continue to be limited to use for offices and instructional services (with the potential to be used for residential purposes). While properties to the north, east, and across Tunnel Road to the south are zoned residentially and contain single-family homes, the corner parcel (Tract 1) is wedged between the Office CZ parcel and a large place of worship (across Governor's View Road) which is adjacent to properties zoned Community Business I along Tunnel Road. Staff feels this property can be utilized for limited business uses without disturbing the surrounding residential area. Buildings on both properties will remain of a design and scale that is compatible with the residential structures found in the area.

The Planning and Zoning Commission recommended approval of the conditional zoning request with conditions as presented at their meeting on July 16, 2015.

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff finds this request to be reasonable.

Considerations:

- The project proposes the adaptive reuse of a dilapidated residential structure for limited business purposes.
- The project has compliant parking on site but will provide a parking agreement with the neighboring place of worship to handle any potential overflow parking.
- The project is being designed to be compatible in design and scale with the residential structures found in the vicinity.
- The proposal will result in the loss of one dwelling unit (currently vacant and in need of repair) in the city.

Staff recommends approval of the proposed conditional zoning to allow for the renovation of one structure at 960 Tunnel Road for office, health and fitness, instructional services, residential, or low impact artist studio purposes with shared parking and ingress/egress with another structure at 966 Tunnel Road used for offices, instructional services, or residences. This

recommendation includes all conditions listed on Exhibit B.1 (which includes limitations on signage and hours of operation in addition to use).

Mayor Manheimer opened the public hearing at 5:40 p.m.

Ms. Terry Hasty, Vice-President and co-owner of MindSpring Consulting, Inc. explained their plans are to expand the leadership development for the Wellspring Wellness Center.

Mr. Allen Queen, property owner of 11 Bull Mountain Road, asked what other uses might be allowed within the two existing structures and why does 960 Tunnel Road look like it is being gutted.

Ms. Hasty responded to Mr. Queen and said that Precision Pilates will be moving their business into 960 Tunnel Road. And, that building will look very similar to the current property.

Urban Planner Julia Fields said that this is a conditional zoning and the site plan and conditions will be made a part of the ordinance. She then read the potential uses, from the conditions, noting that everything will remain residential in character.

Mayor Manheimer closed the public hearing at 5:47 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Pelly moved to approve the conditional zoning request of Monmovin, LLC for property located at 960 and 966 Tunnel Road from RM-6 Residential Multi-Family Low Density District and Office District/Conditional Zoning to Community Business I District/Conditional Zoning, and find that the request is reasonable, is in the public interest, and consistent with the Comprehensive Plan and other adopted plans in that (1) The proposed uses on the properties are limited in scope and additional parking, although not required, is provided for so as not to impact the surrounding residential areas; and (2) The proposal supports the goal found in the City's comprehensive plan of pursuing compatible adaptive reuse of properties. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 30 - PAGE 113

C. PUBLIC HEARING CONSIDER AMENDING SECTIONS 7-2-5, 7-8-1, 7-16-1(C)(9) AND 7-18-2(B) OF THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO THE DEFINITION OF "HOMESTAY" AND THE DISTRICTS IN WHICH HOMESTAYS ARE PERMITTED IN THE TABLE OF PERMITTED USES; THE STANDARDS REQUIRED FOR HOMESTAYS WHICH ARE DESIGNATED AS A USE BY RIGHT SUBJECT TO SPECIAL STANDARDS

Mayor Manheimer clarified that City Council is considering an ordinance governing homestays. A homestay is where you rent out some portion of your home for a short period of time. Homestays have been legal in Asheville since 2006. The short term rental issue is not before City Council at this time. A short term rental is the renting of a stand alone home for overnight stays less than 30 days and those have been illegal in residential districts for many years. The City of Asheville does not the receive room tax and we don't get any more sales tax.

Principal Planner Shannon Tuch said that this is the consideration of an ordinance to revise and simplify existing regulations for Homestays to expand the opportunity to a greater number of residents in the City. This public hearing was advertised on August 14 and 21, 2015.

Ms. Tuch said that Asheville's appeal as a tourist destination has helped to support a growing interest in home based lodging as an alternative to visitors travelling to the area. While

Asheville does not allow a stand-alone vacation rental, it does allow a *Homestay* rental as an alternative. Both typically rent a residential home for periods of less than 30 days, however, the stand-alone rental is often an investment property that remains unoccupied (except by visitors) while the *Homestay* requires that the owner of the property, or a full-time resident, reside in the home with the guests.

With the amazing success and growth in the Air B&B, Vacation Rental by Owner (VRBO) and other internet reservation websites, the number of unpermitted short term rentals has skyrocketed in the last several years. This unregulated growth has resulted in numerous nuisance complaints raising concern in a city where quality of life in our residential areas is a top community priority. Another high priority in the City has been the preservation and creation of safe and affordable housing for all residents. The issue of short term rentals heightened awareness and concern over the lack of available rental housing in the area, and a consultant was hired to review this and other concerns and offer options for consideration. While the research into the short term rental market's impact on available housing was inconclusive, the report offered a number of other thoughtful considerations and sound research into the practices in other communities.

The proposed standards strive to achieve two things:

1) Clarify that a non-resident occupied short-term rental is prohibited in residential districts, and
2) Provide increased opportunity for residents in Asheville to operate resident occupied and run *Homestays* while protecting the character of the residential neighborhoods

(A third goal of supporting pro-active enforcement and increased penalties for violating the Unified Development Ordinance are addressed through a separate draft ordinance.)

Clarifying that non-resident occupied rentals are prohibited in residential districts is achieved primarily by amending the current definition of a *Homestay*. The current definition reads:

> *Homestay* (formerly known as 'bed and breakfast homestay') means a private, owner occupied dwelling with one to three guest rooms where overnight accommodations and a morning meal are provided to transients for compensation and where the use is subordinate and incidental to the main residential use of the building.

The amended definition reads as follows:

> *Homestay* means a private, resident occupied dwelling, with up to three guest rooms where overnight lodging accommodations are provided to transients for compensation and where the use is subordinate and incidental to the main residential use of the building. A homestay is considered a "Lodging" use under this UDO.

This new definition clarifies that the renting of a residential dwelling to transients is considered a lodging use and can be classified as a *Homestay* only if it is a resident occupied, and resident run operation. If it is not resident occupied and run, then it is classified as a lodging facility which would not be allowed in residential districts.

The second goal is accomplished by updating and clarifying the development standards, and by removing existing standards that have proved difficult for a great number of residences to satisfy. The complete list of standards is detailed in the Ordinance but can be summarized as follows:

Removed

- 500-foot separation requirement
- Minimum home size
- Additional off-street parking
- Need to provide a morning meal
- Option for a full-time employee
- Option for signage

Added

- Urban Residential (UR) as a zoning district where the Homestay use will be permitted
- Only one homestay shall be permitted per lot/parcel
- Homestay may not be operated concurrently with a home occupation
- Must carry liability insurance for the homestay use
- Must pay all applicable taxes
- Must comply with all building codes
- Will be permitted and inspected annually

Retained/Clarified/Updated

- No displays of goods or services
- Manager/Operator of the Homestay shall be a full-time resident of the dwelling
- A maximum of 25% of the home may be used exclusively for the Homestay guests
- No activities other than lodging shall be allowed
- No accessory structures or dwelling units shall be used to accommodate guests
- Exterior lighting shall be residential in nature

In an effort to understand the position of the community at large, the City of Asheville has supported and held numerous public input sessions including three different meetings of the Planning and Economic Development Committee, a hearing at the Planning & Zoning Commission, and more recently, the Asheville City Council held a community forum on March 25, 2015. This forum allowed residents, through a variety of media, the opportunity to voice their opinions on the subject of a stand-alone rental, homestay, or other related issues. The Asheville City Council reviewed the results of these public discussions in the context of other city goals and priorities and provided staff direction at their meeting on May 12, 2015.

The Planning & Zoning Commission reviewed this amendment at their June 18, 2015, meeting where it was approved 4-2 (Ms. Carter & Mr. Koon opposed). A moderate amount of public comment included the following concerns:

- Commercial activity impacting the quality of life (harmony) in neighborhoods
- Problems with availability of on-street parking
- Loss of housing units
- Need for more public review and input
- Challenges to effective enforcement

The Commissioners also posed several questions, including:

- How will the inspection process work?
- What is the rationale for restricting the use of accessory units for guests?
- Are accessory units in a home treated differently than detached units? Why?

In response to these questions and some of the concerns raised, a Frequently Asked Questions page has been drafted.

This proposal was also shared with the Affordable Housing Advisory Committee at their August 6 regular meeting and whose members supported the clarification that no accessory dwelling units be used for the homestay operation. This sentiment was also supported by the Coalition of Asheville Neighborhoods when the proposal was shared at their August 10 regular meeting. The Coalition of Asheville Neighborhoods raised a number of other concerns including:

- On-street parking congestion
- The inability to enforce against large groups of unrelated people
- Removing the separation requirement or other consideration of another cap or limit
- The difficulty with enforcement, particularly ensuring that the operator is on-site

Increased opportunity for Homestays in Asheville will increase the number of applications placing a greater burden on staff resources. This combined with the effort to increase pro-active regulation and enforcement requires the addition of one full-time staff person. Estimated impact is approximately $60,000.

This proposal is consistent with goals outlined n the Comprehensive Plan and City Council Strategic Plan, and because allowing and regulating homestays is a reasonable response to a social and economic phenomenon that effectively seeks to balance a variety of city adopted goals, Staff recommends approval of the wording amendment modifying *Homestay* standards with the following clarifications:

1) Clarify that no Accessory Dwelling Unit (ADU) may be used for either guest or host accommodations.
2) Remove language specifying that the owner/operator be on-site during "overnight accommodations".

As this proposal is consistent with goals outlined in the Comprehensive Plan and City Council Strategic Plan, and because allowing and regulating homestays is a reasonable response to a social and economic phenomenon that effectively seeks to balance a variety of city adopted goals, City staff recommends approval of the revised wording amendment modifying Homestay standards, as recommended by the Planning & Zoning Commission, with the following changes: (1) Sec. 7-16-1(c)(9)(c) shall read: *c. The homestay operation shall be managed and carried on by a full-time resident of the property; and (2)* Sec. 7-16-1(c)(9)(g) shall read: *g. No accessory structures or accessory dwelling units shall be used as any part of the homestay operation.*

In response to Mayor Manheimer, Ms. Tuch said that the ordinance reads that Homestays must be managed and carried on by a full-time resident property. She explained that a homestay operator is not required to own the home but must have the owner's permission to operate the homestay. She said that the language specifying that the owner/operator be on-site during "overnight accommodations" was removed because there was some concern that people would interpret that too strictly (physically present during every minute that the guest was there). So, "full-time" resident language was inserted.

In response to Councilwoman Wisler, City Attorney Currin said we changed the ordinance from owner-occupied to resident operator because that standard is to comply with state law.

When Councilman Pelly asked about the removal of the additional off-street parking, Ms. Tuch said that previously there was a requirement that they provide some off-street parking based on the number of bedrooms. That requirement is being removed. In discussing the most significant barriers for people obtaining a homestay permit, the off-street parking was more of the common ones. In order to make this an opportunity that is available to a larger number of residents in Asheville, a policy recommendation by the Planning & Economic Development Committee, and Council direction in May, was it would be best to remove the requirement.

Councilman Bothwell suggested clarity by rewording that a homestay may not be operated concurrently with a home occupation if the occupation requires a home occupation license.

In response to Councilman Bothwell, City Attorney Currin explained the rationale behind no kitchen facilities in homestays. The term "dwelling unit" is defined in the UDO as being an independent housekeeping establishment with separate toilets, and facilities for sleeping and cooking. A dwelling unit is not a homestay and cannot be rented for less than a month. Just having a kitchen or stove is very hard to regulate but when these components are added, the use becomes a dwelling unit and is a separate short term rental.

When Councilman Bothwell asked about the enforcement program, Ms. Tuch said that City Council supported an enforcement program which will consist of a full-time position ($60,000) to perform proactive enforcement, both with permitting and inspections. That position is currently being advertised. After the rush of applications (which they may bring in another person to help), that position may be able to take on other work. The renewal of permit will be a more simplified, more expedited process. She was not sure about anticipated revenues associated with the permitting for homestays; however, permitting fees are intended to be cost recovery - what it would cost the City to actually review and administer the permit. All of our enforcement costs are not necessarily cost recovery. Our standard level on one permit is $104.00

Councilman Davis asked if there has been thought given to grandfathering those people in who are currently operating a home occupation in a homestay. Ms. Tuch said that would be a policy decision on whether to craft language for a grandfather exemption.

Mayor Manheimer opened the public hearing at 6:25 p.m.

Leaving out comments regarding short term rentals, the following individuals expressed concern on the proposed homestay regulations as follows: restrict the homestays to owner-occupied; one full-time person is not adequate to manage the enforcement of homestay requirements; if kitchens are not allowed in homestays, that should be written into the ordinance; retain additional off-street parking; retain the 500-foot separation requirement; residents should not have to police the ordinance by complaints; with the revised definition of "homestays" individuals who own multiple properties in Asheville will now be allowed to utilize a resident property manager to operate homes as full-time commercial inns under the auspice of a homestay; proposed changes are insufficient to protect the residential character of neighborhoods; need for definition of "full-time resident" and provide a specific mechanism for verification of residency; no more than 25% of bedrooms, not square footage (which is unverifiable) be used exclusively for homestay guests; limit the number of annual stays; require off-street parking at the rate of 1 parking spot per bedroom rented out; prohibit signage advertising the homestay and prohibit the sale of goods; prohibit homestays in all single-family residential neighborhoods, in all low-density residential multi-family districts, and in all residential historic districts; reduce the maximum number of guest rooms from 3 to 2; reduce the maximum number of lodgers at one time to 2; need thoughtful approach on additional burdens on infrastructure; homestay rules need to stand up in court; wealthy people will find loopholes in the ordinance; accessory dwelling units should be allowed to be used as a homestay; possible future decrease in property values; housing units should be for those who live and work in Asheville; possibly consider allowing accessory dwelling units on a case by case basis; and reinsert the phrase that the full-time resident that manages the property must be present during overnight stays:

Mr. David Nutter, Montford resident, felt there are two sets of values in this case - a well-regulated amount of Internet-based lodging can improve the connectivity with the broad world and help protect us from civic and fiscal damage in the face of serious opposition by the State vs. the traditions of localness, authentic neighborhoods, history and character and stability that we must preserve. He felt the two actually support each other.

Lisa Shoemaker, representative of Asheville Sharable Short Term Rental Association, supported the proposed homestay regulations.

Leaving out comments regarding short term rentals, the following individuals felt City government should not be involved in this process or be told what they can do with their properties:

Laurie Fisher
Christopher Chiaronmonte
Brian Monteleone
William Stanhope
Greg Meade

Mayor Manheimer closed the public hearing at 8:26 p.m.

Vice-Mayor Hunt recommended we continue this discussion and provide staff with additional policy direction before a vote is taken. He noted there are compelling arguments on both sides. He explained his results from his research from other cities to see how other communities are addressing this issue. He asked that staff do further research to help ensure that the ordinance we pass meets the test of casual and incidental and not commercial. He suggested staff revisit the number of bedrooms; number of nights per year; limit the number of guests in any one homestay; definition of "full time resident"; reconsider whether the phrase full-time resident that manages the property should be present during overnight stays; and revisit the elimination of off-street parking. He said that enforcement is important and we need to move forward with that piece. He has found from his research that cost of enforcement was more than they anticipated, so he wanted to be sure that the cost of the permits cover the amount we need to enforce the regulations.

City Attorney Currin said that if a motion is made today to continue this matter without a date certain, it will need to be re-noticed for another public hearing. If moved to a date certain, it will depend on how extensive the amendments are that it might be required to go back to the Planning & Zoning Commission for review.

Councilman Bothwell suggested one way to address the question of commercial interests moving in and establishing resident managers might be to only allow one permit per land owner. He felt that accessory dwelling units should be allowed to be homestays, especially since we are encouraging people to build them. He continued to be concerned that we don't allow a kitchen facility in a homestay. He said that in every city he has researched, the enforcement is complaint-based. He felt the enforcement piece needs to be revisited.

Mayor Manheimer said that one purpose of living in a city is to have the protection of zoning. It protects your investment. We can argue what kind of zoning or what kind of regulation is appropriate; what serves to protect your interest; and what is too much of an intrusion on your life and how you want to run your home. We need to try to find that balance to ensure that we have the integrity of our neighborhoods, since our great sense of community is in large part to our neighborhoods. She is very much concerned about protecting the integrity of our neighborhoods, and wondered how we can make a decision that looks more broadly at the whole picture in Asheville. The City hired the School of Government to do a study to look at other cities and how they handled this issue. From research, she learned that Asheville has more short term rentals (the term captures homestays and short term rentals) on-line than any other city in North Carolina by hundreds. She felt this is a major issue for our community. No one knows what the long-term effect will be for these in Asheville. Another community similar to ours (Duluth, Minnesota) allows short term rentals and they recently had a Council meeting where they were trying to decide whether or not to have a moratorium because it had gotten so out of control. They permitted 30 and had 50 on-line. They were worried that 20 of them were advising on-line and weren't permitted. Asheville has 900. We do not want to get our ordinance wrong. Using the example of visiting the beach, every single house is a rental and people rent one a week. No one knows each other but the owners are making a mint. It's just a resort community - it's not a community where people raise children, or a place where you know your neighbor. She wanted to balance the private interest of what you should be able to do with your house with the broad interest of preserving the integrity of the community. She feels that homestays do provide an opportunity for people to afford to live in their home that need other means of providing some income, but crafting that ordinance is difficult. We are close to getting it right, but we need to look at making sure we prevent the commercialization. She was not interested in limiting the nights per year or the number of bedrooms or the number of guests. She felt we accomplished that through the maximum of 25% of the home rule. She did think we need to revisit looking at whether to require off-street parking. This is a very serious issue for our community and we need to look thoughtfully at it.

Councilwoman Wisler supported a slower approach. She felt we are moving in the right direction, but would like to revisit the removal of additional off-street parking; craft a definition of a "full-time resident;" look at whether the phrase full-time resident that manages the property should be present during overnight stays; revisit the number of guest rooms. She did want enforcement of what is currently on our books more rigorously than we have.

Councilman Smith wanted locals who need housing to be able to find it and for them to have direct access to some of these tourist dollars. What he didn't want is predatory investors to gobble up our neighborhoods and our housing stock, which is happening in other cities. Let's not pretend it won't happen here. Investors who are seeking to buy up housing are ready to kick out renters, and we need to consider them. Air B&B, VRBO and other internet reservation websites are multi-billion dollar corporations who don't care about Asheville, so we have to take care of ourselves. He felt this issue is too big to get wrong and supported taking a go slow approach. He is open for this to look different, but the bottom line is we have to protect ourselves from the predators and offer some of these opportunities to locals.

Councilman Davis felt that taking time to make the right decision is important. He also noted that Buncombe County collects the hotel/motel tax and then it goes to the State to be redistributed. The Buncombe County Tourism Development Authority received their first check from Air B&B and he will be interested in seeing that amount.

Councilman Bothwell calculated that if there are 900 short term rentals within the City limits it's 1.6% of the houses in the City, so it's not an enormous problem at present.

Councilman Pelly also agreed this is this s complex issue. He too has heard the valuable contributions for homestays, but also heard clear from the neighbors that zoning should mean something and that the integrity of the neighborhood should be protected. He did not think we should make property owners police the ordinance.

Regarding any amendments, Vice-Mayor Hunt hoped they would be in place in advance of next spring and summer, which would be helpful to the people operating homestays.

Vice-Mayor Hunt wanted to reaffirm that the majority of Council wants to move away from purely reactive complaint driven enforcement to something more proactive.

Vice-Mayor Hunt moved to defer consideration. This motion was seconded by Councilman Bothwell and then carried unanimously.

Closed Session

During the lengthy public hearing, Mayor Manheimer announced a closed session during the Council's break. Therefore, at 7:26 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(3). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); and (3) To discuss matters relating to the location or expansion of industries. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(4). This motion was seconded by Councilman Pelly and carried unanimously.

At 7:58 p.m., Councilman Smith moved to come out of closed session. This motion was seconded by Councilman Bothwell and carried unanimously.

D. PUBLIC HEARING TO CONSIDER AMENDING SECTION 7-18-2(B) OF THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO THE CIVIL PENALTIES FOR VIOLATIONS OF THE CITY'S ORDINANCES RELATING TO THE USE OF RESIDENTIAL STRUCTURES FOR A LODGING USE

ORDINANCE NO. 4445 - ORDINANCE TO AMEND SECTION 7-18-2(B) OF THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO THE CIVIL PENALTIES FOR VIOLATIONS OF THE CITY'S ORDINANCES RELATING TO THE USE OF RESIDENTIAL STRUCTURES FOR A LODGING USE

Principal Planner Shannon Tuch said that this is the consideration an ordinance to consider amending Section 7-18-2(b) of the Unified Development Ordinance relating to the civil penalties for violations of the city's ordinances relating to the use of residential structures for a lodging use. This public hearing was advertised on August 14 and 21, 2015.

50

A. Summary of City's authority to access civil penalties for violations of its ordinances.

The General Assembly grants the City the authority to enforce its ordinances, including zoning ordinances, by assessing fines and civil penalties for ordinance violations. Penalties for a violation of that ordinance. The General Assembly does not determine the amount of the civil penalties assessed for violations of the City's ordinances, but instead, defers to the City to decide what amount is appropriate. The City has the discretion to determine what amount is reasonable to deter violations, encourage compliance and enforce its ordinances.

B. Asheville's ordinances relating to the use of a residential structure for a Lodging Use.

The UDO addresses and regulates certain "Lodging Uses," including but not limited to "Lodging Facilities" and "Homestays."

The UDO defines "dwelling unit" as follows:

> one or more rooms physically arranged so as to create an independent housekeeping establishment for occupancy by one family with separate toilets and facilities for cooking and sleeping. In no case shall a dwelling unit be rented or leased for intervals of less than one month.

See UDO Section 7-2-5 (definition of a "dwelling unit."). A "dwelling unit" rented or leased for less than one month does not fall within the definition above, therefore, is considered a "Lodging Facility" under the UDO. Pursuant to UDO Section 7-2-5, a "Homestay," is a resident occupied dwelling, in which rooms are rented to guests for overnight lodging. See UDO Section 7-2-5 (definition of a "homestay"); Section 17-16-1(c)(9) (special requirements for homestays in certain districts).

Currently, if a person violates the ordinances set forth above he or she is subjected to a penalty in the amount of $100.00 per day, for each day the violation continues. See UDO Section 7-18-2(b). This penalty, however, has proved to be an ineffective method to enforce these ordinances and to deter violations. Specifically, due to the proliferation of internet lodging websites, such as Air BnB and Vacation Rental by Owner, dwelling units illegally used as Lodging Facilities and Homestays, often provide the owners with rates far in excess of the $100.00 per day fine. City enforcement staff reports that violators are willing to pay the fine because the illegal lodging uses still provide sufficient profit to justify the violation. As a result, the current penalty has not proved to be a deterrent. Increasing the daily penalty to $500.00 per day would not allow violators to benefit (or will at least decrease the benefit) from disregarding the requirements of the UDO.

By deterring violations and promoting enforcement, the proposed amendment will further the Comprehensive Plan and other adopted plans, because it will preserve residential neighborhoods, ensure neighborhood compatibility, and protect against non-residential encroachment.

For the reasons set forth above, staff recommends increasing the civil penalty for violations relating to the use of residential structures for a Lodging Use; including: 1) the renting or leasing of a dwelling unit for less than one month; and 2) the use of property as a Homestay, to $500.00 per day. Given the nature of the offense and the City's goal to deter violations of these ordinances, a $500.00 per day fine is reasonable.

This amendment was reviewed by the Planning & Zoning Commission at their June 18, 2015, meeting where it was approved unanimously (6-0).

Pros:

- Complies with the City's authority under N.C. Gen. Stat. § 160A-175 to assess civil penalties for violations of the City's ordinances.
- Proposed fine is more reasonably related to the nature of the offense.
- Allows more effective enforcement of the City's ordinances.
- More efficiently deters violations.

Con:

- None noted.

Staff recommends approval of the text amendment to the UDO which revises Article XVIII, Section 7-18-2(b) to increase the fine for violations of the City's ordinances regulating and restricting the use of a residential structure for certain Lodging Uses.

Mayor Manheimer opened the public hearing at 9:06 p.m.

Leaving out comments regarding short term rentals, the following individuals spoke in opposition of the increase of the fine for violations, some requesting this action be deferred until the homestay amendment is adopted:

Arwen Hawes
Stuart Tait
Melissa Crouch
Brandee Boggs
Michael Greene
Julie Nelson
Carol Saltzman
Patricia Lord
Paul Heathman

Leaving out comments regarding short term rentals, the following individuals spoke in support of increasing the penalty and encouraged proactive enforcement:

David Rodgers
Derek Wiles
Jane Mathews

Mayor Manheimer closed the public hearing at 9:29 p.m.

Vice-Mayor Hunt felt it's clear that City Council will not move to allow short term rentals, and there is direction for staff to amend the homestay ordinance. In May, Council agreed to step up enforcement and directed staff to increase the fines to $500. He felt we need to move forward in a seriously way.

In response to Vice-Mayor Hunt, Ms. Tuch said that the enforcement process always begins with a notice of violation (sent to the tenant and property owner), informing the property owner that a violation has been discovered, what the violation is, and an invitation to discuss how to cure the violation. There is a 30-day period of time to cure the violation, and at times they have extended that 30 days to add an additional 30 days. It's only after that, if they fail to comply that any citations are considered. Fines are not common. We pride ourselves about bringing properties into compliance without fines, but when it is necessary, having it is an effective tool.

In response to Councilman Smith on how staff follows-up to make sure the violation is cured, Ms. Tuch said that it depends on the circumstances. In some instances, the short term rentals have adjusted their occupation and they either get a homestay permit, they shut down the operation and turn it back into a long-term rental, or find some other solution. Staff makes sure

the website is closed and might ask for an Affidavit stating that the operation is shut down. City Attorney Currin also said there is the ability to appeal to the Board of Adjustment within the first 30 days.

In response to Vice-Mayor Hunt, Ms. Tuch said that the enforcement has been on a case by case basis. We have approximately 28 cases in the last 6-9 months. Some of the 28 cases have been resolved, and two or three of the 28 had to pay the citation.

Councilman Davis wasn't sure we have a big problem, but felt better that they are getting a notice of violation and an opportunity to correct.

Councilman Bothwell expressed concern with how the violation days would be determined. He noted that Council is not united on this amendment. He felt we should legalize license, inspect and regulate short term rentals than stalk the internet. He felt we are aiming for an enforcement policy that will be ineffective and really hurt a few people who get caught.

Councilman Pelly wanted to see how this fits into the full context of the proposed homestay ordinance.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved to approve the text amendment to the UDO which revises Article XVIII, Section 7-18-2(b) and find that the amendment is reasonable, in the public interest and is consistent with the Comprehensive Plan and other adopted plans because the amendment: a) will more efficiently deter UDO violations and improve enforcement; b) will preserve residential uses in residential areas of the City; and c) will ensure neighborhood compatibility and non-residential encroachments. This motion was seconded by Councilwoman Wisler and carried on a 5-2 vote, with Councilman Bothwell and Councilman Pelly voting "no".

ORDINANCE BOOK NO. 30 – PAGE 120

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. CONFIRMATION OF THE PLANNING & ZONING COMMISSION CANDIDATE ESSAY QUESTIONS AND DEADLINE TO ACCEPT APPLICATIONS EXTENDED

It was the consensus of City Council that all applicants, including the incumbents, respond in writing to the following five questions: (1) Please take time to review the City's 2025 Plan land use plan. How strongly does your own vision align with that plan, and in what ways might it differ?; (2) Name one Planning & Zoning Commission decision in the last 18 months you've agreed with and one you've disagreed with or would have struggled with. Please explain your rationale for each; (3) What are some of the positive or negative effects of Asheville's zoning regulations?; (4) How has existing zoning promoted/inhibited the construction of affordable housing in Asheville? What changes could be made to further the creation of affordable housing?; and (5) Are there any changes to the City's processes, including but not limited to public input, for addressing zoning changes that you would like to see made?

Councilman Bothwell moved to confirm the Planning & Zoning Commission essay questions. This motion was seconded by Vice-Mayor Hunt and carried unanimously.

City Council, with a focused interest in effective public engagement, wanted to ensure that the applicant pool represents a broad cross section of the community, and therefore, it was

the consensus of Council to re-opened the application process, with a deadline of Tuesday, September 29, 2015.

After the deadline and all written responses have been received, the City Clerk will send all responses to City Council to narrow the field for interviews. Those interviews will take place in the afternoon of October 27, 2015, with appointments to be effective immediately.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 9:51 p.m.

Magdalen Burleson
CITY CLERK

Edna E. Manheimer
MAYOR

54

Tuesday – September 8, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. INTRODUCTION OF NEW DIRECTOR OF PLANNING & URBAN DESIGN

City Manager Jackson was pleased to introduce Mr. Todd Okolichany, the City's new Director of Planning & Urban Design.

B. PROCLAMATION PROCLAIMING SEPTEMBER 14-18, 2015, AS "MINORITY ENTERPRISE DEVELOPMENT WEEK"

Mayor Manheimer read the proclamation proclaiming September 14-18, 2015, as "Minority Enterprise Development Week" in the City of Asheville. She presented the proclamation to members of the Board of Minority Enterprise Development Week who briefed City Council on some activities taking place during the week.

C. PROCLAMATION PROCLAIMING SEPTEMBER 21, 2015, AS "DAY OF PEACE"

Councilman Bothwell read the proclamation proclaiming September 21, 2015, as "Day of Peace" in the City of Asheville. He presented the proclamation to Ms. Rachael Bliss and others who briefed City Council on some activities taking place during the day.

D. PRESENTATION TO CITY MANAGER GARY JACKSON

On behalf of City Council, Councilman Davis recognized City Manager Jackson for his win in his class in the recent Grand Fondo, and presented him with a picture of that celebratory moment.

II. CONSENT AGENDA:

At the request of City Manager Jackson, Consent Agenda "H" was removed from the Consent Agenda for consideration on October 13, 2015.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 25, 2015

B. SECOND READING OF ORDINANCE NO. 4438 - ORDINANCE TO ADOPT A FRANCHISE AGREEMENT WITH SPIRIT COMMUNICATIONS

Summary: First reading of Ordinance No. 4438 was adopted on August 25, 2015.

ORDINANCE BOOK NO. 30 - PAGE 90

C. RESOLUTION NO. 15-170 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH GRAHAM COUNTY LAND COMPANY, LLC, FOR THE HENDERSONVILLE ROAD SIDEWALK IMPROVEMENTS PROJECT

Summary: The consideration of a resolution authorizing the City Manager to execute a contract with Graham County Land Company, LLC, for the amount of $2,997,301.75 plus 15% contingency and any change orders within the project budget for the project known as Hendersonville Road Sidewalk Improvements Project, City of Asheville Project #ENG-12-13-015, pending concurrence with award by the N.C. Dept. of Transportation.

The 4.5-mile stretch of Hendersonville Road (US 25) from Seminole Street to Long Shoals Road is populated by many commercial properties, offices, and residential complexes, and lacks consistent pedestrian infrastructure. The project connects existing isolated sidewalks with the construction of approximately 13,000 linear feet of new sidewalk, and also includes new retaining walls, storm water drainage structures, a pedestrian boardwalk, pedestrian crossing signal facilities, and all associated appurtenances. Federal funding administered through the North Carolina Department of Transportation will account for 80% of the project, with the City of Asheville matching the remaining 20%.

This project was initially advertised on May 28, 2015, but no bids were received. The project was re-advertised on July 30, 2015. Bids were opened and the following bids were received:

Graham County Land Company	Robbinsville, NC	$2,997,301.75
GLF Construction	Asheville, NC	$3,590,704.00
NHM Constructors	Asheville, NC	$4,040,975.90
Buchanan and Sons	Whittier, NC	$3,197,469.50

Graham County Land Company, LLC was the lowest responsible bidder with a bid of $2,997,301.75. Adding in a 15% contingency, the total required budget for construction is $3,446,897.01. The work produced from this contract would resolve liability issues associated with inadequate pedestrian facilities. The work complies with the City of Asheville's Strategic Operating Plan Focus Area 1 Goal 2, and Focus Area 3 Goal 1.

Pros:

- Provides connectivity for needed linkage.
- Ensures pedestrian safety.
- Confirms investment in community infrastructure

Con:

- Project management and contract administration will consume staff time and resources.

The budget for this project, which totals $4,125,000, is already included in the City's adopted Capital Improvement Program. The table below shows actual expenses and contracts to date for items such as right of ways, design, and project management. Staff anticipates at this point that the remaining budget of $151,765 will be fully spent on project management and inspection costs. If costs exceed the remaining budget, staff will return to Council to amend the budget. As noted above, federal funding administered through the North Carolina Department of Transportation will cover 80% of the project costs, with the City of Asheville matching the remaining 20%.

Total Budget	4,125,000
Less:	
Expenses & Encumbrances to Date	(526,338)
Graham County Land Co. Contract + 15% Cont.	(3,446,897)
Remaining Budget	151,765

City staff recommends City Council adopt the resolution awarding the contract to Graham County Land Company, LLC, pending concurrence with award by the North Carolina Department of Transportation, and authorizing the City Manager to execute on behalf of the City of Asheville a contract in the amount of $2,997,301.75 plus a contingency of 15% ($449,595.26), for a total of $3,446,897.01, with Graham County Land Company, LLC for the project known as Hendersonville Road (US 25) Sidewalk Improvements Project.

Councilman Pelly was pleased to see these new sidewalks being constructed.

RESOLUTION BOOK NO. 37 - PAGE 250

D. RESOLUTION NO. 15-171- RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A NON-WARRANTY DEED CONVEYING ANY AND ALL INTEREST THE CITY MAY HAVE IN THE CLOSED ALLEY OFF OF BROAD STREET

Summary: The consideration of a resolution authorizing the City Manager to execute a North Carolina Non-Warranty Deed conveying any and all interest the City may have in the closed alley off of Broad Street.

By Resolution No 15-10, dated the 13th day of January, 2015, the City Council of the City of Asheville closed an unnamed Alley off of Broad Street pursuant to the provisions of N.C.G.S. §160A-299. Subsequent thereto, the attorney for the petitioning property owner inquired as to why the City only closed five-feet of the 10-feet unnamed alley, as more specifically set forth in the metes and bounds description describing the closing.

To the extent the public had any interest in the alley, based upon deed research, the only interest the public could have acquired was a 5-feet interest, since the western 5-feet was never part of the alley but, instead, a part of the fee simple title to the property owner adjoining the alley to the west.

Due to a number of issues and confusion regarding the status of the unnamed alley, in order to resolve title issues with the title company, the attorney for the petitioning property owner, asked that the City convey whatever interest, if any, the City has in the alley tc the petitioning property owner, who owns the property on both sides of the alley.

Both the Transit Committee and the Multimodal Transportation Commission previously unanimously agreed to the closure.

Pros:

- Eliminates all confusion as to any public interest in the alley
- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

City staff recommends City Council adopt the resolution authorizing the City Manager to execute a non-warranty deed conveying any and all interest the City may have in the alley off of Broad Street.

RESOLUTION BOOK NO. 37 - PAGE 251

E. RESOLUTION NO. 15-172 - RESOLUTION AUTHORIZING THE CITY MANAGER TO AUTHORIZE AN EXCHANGE OF CITY-OWNED REAL PROPERTY ALONG NORTH FORK LEFT FORK ROAD FOR PROPERTY OWNED BY 10 SUGAR MAPLE LLC FURTHER NORTH ON NORTH FORK LEFT FORK TO ASSEMBLE LAND AREA IMMEDIATELY TO THE ENTRANCE OF NORTH FORK RESERVOIR

Summary: The consideration of a resolution authorizing the exchange of City–owned real property on North Fork Left Fork Road (S.R. 2576) for property owned by 10 Sugar Maple LLC also located on North Fork Left Fork Road.

The City of Asheville has learned that the access road to the North Fork Water Treatment Plant crosses property owned by Sharon Came of 10 Sugar Maple LLC. She is developing a subdivision south of the water treatment plant on North Fork Left Fork Road and had the area surveyed. She provided this information to Water Resources. She has agreed to convey ownership of a tract of land (4,316 square feet or 0.10 acres), labeled Tract C that encompasses the existing entrance gate and a portion of the driveway into North Fork. In return, the City proposes to convey a tract of land of equal size labeled Tract B to 10 Sugar Maple LLC. This will eliminate a sliver of property between the new subdivision and North Fork Left Fork Road. The majority of the City land being exchanged is located within the NCDOT right of way on North Fork Left Fork. In addition to the land being exchanged, Water Resources has agreed to install a 2-inch waterline, within an existing City of Asheville waterline easement, that would allow water meters to be installed for the developer's three new lots. Ms. Came and her attorney have approved the preliminary survey and the proposed land exchange agreement.

Pros:

- This assemblage of land will cure the encroachment issue at the North Fork Water Treatment Plant.
- The tracts to be swapped are of equal size and approximate value.

Cons:

- Water Resources has agreed to install the water line for meter connections.
- The City Attorney's office will prepare both deeds.

There are no financial proceeds associated with this disposition, but the conveyance would clear the title should the City want or need to sell any of the property in the future. The City's legal office will perform the closing, therefore no additional costs are anticipated for this transaction.

City staff recommends City Council adopt a resolution authorizing the exchange of real properties located off of North Fork Left Fork Rd.

RESOLUTION BOOK NO. 37 - PAGE 252

F. RESOLUTION NO. 15-173 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH MOTOROLA INC. FOR RADIO SYSTEM MAINTENANCE FROM AUGUST 1, 2015, THROUGH JULY 31, 2016

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with Motorola, Inc. to provide maintenance coverage for the City's radio system.

Motorola, Inc. has provided maintenance services for the City's radio communications system since installation of the system in 1992. The service agreements are renewed annually. The maintenance agreement covers what should be the final year of use for the existing radio system during the renewal period of August 1, 2015, through July 31, 2016. The new radio system is scheduled to be complete and come online near the end of this maintenance term.

Pros:

- The primary benefit of this contract is to keep the City's radio system reliable and operational for public safety officers. By keeping the radio system in optimal condition the City is also able to provide communication services to several outside agencies, thereby improving interagency communications.

Cons:

- None noted.

The renewal agreement reflects an annual charge of $148,634.88. Funding for this contract was appropriated in the FY 15/16 budget process.

City staff recommends the adoption of the resolution for radio maintenance coverage for the term of August 1, 2015, through July 31, 2016.

RESOLUTION BOOK NO. 37 - PAGE 253

G. RESOLUTION NO. 15-174 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE BREWGRASS FESTIVAL

RESOLUTION NO. 15-175 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT BLUE RIDGE PRIDE

RESOLUTION NO. 15-176 - RESOLUTION AUTHORIZING THE POSSESSION AND/OR CONSUMPTION OF ALCOHOLIC BEVERAGES AND/OR UNFORTIFIED WINE AT THE NEW YEAR'S RESOLUTION RUN & WALK

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at Brewgrass Festival on September 19, 2015; Blue Ridge Pride on October 3, 2015; and the New Year's Resolution Run & Walk on January 1, 2016.

- Big Brothers Big Sisters of WNC has requested through the City of Asheville Community & Economic Development Department that City Council permit them to serve beer and/or unfortified wine at the Brewgrass Festival and allow for consumption at this event.

  The Brewgrass Festival will be held on Saturday, September 19, 2015 from 12:00 p.m. – 8:00 p.m. within the boundaries of Memorial Stadium including a fenced extension of the premises as per the area limits referenced on the accompanying site map.

- Blue Ridge Pride has requested through the City of Asheville Community & Economic Development Department that City Council permit them to serve beer and/or unfortified wine at Blue Ridge Pride and allow for consumption at this event.

Blue Ridge Pride will be held on Saturday, October 3, 2015 from 11:30 p.m. – 7:00 p.m. at Pack Square Park as per the event area limits referenced on the accompanying site map.

- YMCA of WNC has requested through the City of Asheville Community & Economic Development Department that City Council permit the sale of beer and/or unfortified wine at the New Year's Resolution Run & Walk and allow for consumption at this event.

  The New Year's Resolution Run & Walk will be held on Friday, January 1, 2016, from 8:30 a.m. – 12:30 p.m. at Pack Square Park as per the event area limits referenced on the accompanying site map.

Pro:

- Allows fundraising opportunities for Big Brothers Big Sisters of WNC, Blue Ridge Pride, and YMCA of WNC

Con:

- Potential for public safety issues

City staff recommends City Council adopt resolutions authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Brewgrass Festival, Blue Ridge Pride , and the New Year's Resolution Run & Walk.

H. RESOLUTION TO ESTABLISH AN OPEN DATA POLICY FOR THE CITY OF ASHEVILLE FOR SUSTAINING PUBLIC DATA AVAILABILITY USING OPEN DATA STANDARDS

This item was removed from the Consent Agenda for consideration in two weeks.

I. RESOLUTION NO. 15-177 - RESOLUTION TO SUPPORT REDISTRICTING REFORM

Summary: The current redistricting process creates a conflict of interest – as State legislators are effectively choosing their own constituents. The redistricting process should be conducted in an open manner with real opportunities for public dialogue and feedback, not behind closed doors. Legislative incumbents often draw districts that are not compact and split communities of interest. Important principles such as the protections of the Federal Voting Rights Act of 1965 and respect for neighborhoods and cities should be clearly listed for a Commission to abide by. Voters are more likely to participate when they feel that their vote will count and that they have a reasonable chance of electing candidates who represent their interests. Elected officials are more responsive to constituents when voters have a choice of candidates, thus increasing accountability and serving the best interests of the voters on North Carolina.

Therefore, The State of North Carolina should establish an independent redistricting process that ensures diversity, partisan balance and geography, for all future redistricting.

In response to Councilwoman Wisler, Mayor Manheimer said that this resolution will be made available to the folks lobbying the legislation for redistricting reform.

RESOLUTION BOOK NO. 37 - PAGE 263

J. MOTION TO REFER THE AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING HOMESTAYS TO THE CITY COUNCIL PLANNING & ECONOMIC DEVELOPMENT COMMITTEE

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Wisler moved for the adoption of the Consent Agenda with the removal of Consent Agenda "H". This motion was seconded by Councilman Pelly and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. SIMPLICITY

This presentation was moved until October 13, 2015.

B. LEGISLATIVE UPDATE

Mayor Manheimer stated that the legislation is still in session working on the budget. She also said that cities are watching a provision that would shift the cost of bicycle lane infrastructure to cities, even if it is a N.C. Dept. of Transportation project.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER ADOPTION OF THE HISTORIC PRESERVATION MASTER PLAN FOR ASHEVILLE AND BUNCOMBE COUNTY AS PART OF THE ASHEVILLE CITY DEVELOPMENT PLAN 2015

RESOLUTION NO. 15-178 - RESOLUTION ADOPTING THE HISTORIC PRESERVATION MASTER PLAN FOR ASHEVILLE AND BUNCOMBE COUNTY AS PART OF THE ASHEVILLE CITY DEVELOPMENT PLAN 2025

Historic Resources Director Stacy Merten said that this is the consideration of a resolution adopting the Historic Preservation Master Plan for Asheville and Buncombe County. This public hearing was advertised on August 28 and September 4, 2015.

The Historic Preservation Master Plan for Asheville and Buncombe County represents the work of many individuals, conducted over the past 18 months with the assistance of Heritage Strategies, the planning consultants.

Although the Historic Resources Commission (HRC) currently has a successful preservation program, which has been in place since 1979, this plan will help guide the future work of the commission and further historic preservation efforts as supported through the city's adopted comprehensive and downtown development plans. This will ensure that historic preservation remains integral to quality urban design, sustainability and the strategic planning vision of Asheville and Buncombe County.

The following goals were identified early in the process and all subsequent strategies outlined in the plan are intended to facilitate these four overarching goals.

- Heighten public appreciation of Asheville and Buncombe County's heritage and historic resources.

- Ensure that public sector initiatives and actions are models for best practices in the preservation and treatment of historic resources.
- Support private initiative as a primary method through which historic resources are recognized, preserved, and enhanced.
- Enlist historic preservation in the quest for great 21st century growth – make historic preservation central to Asheville and Buncombe County's pursuit of livability and a high quality of life, including economic and environmental sustainability.

The work of Heritage Strategies was guided by an advisory committee chaired by Brendan Ross, the chair of the HRC. Membership of the advisory committee represented a diversity of interests including Buncombe County, the Asheville business community, Asheville neighborhoods, the Preservation Society of Asheville and Buncombe County and the Historic Resources Commission. The community was further engaged through a series of public meetings, focus groups and individual interviews to gather information for input and preparation of the plan.

The plan has been reviewed by the Historic Resources Commission, the Downtown Commission, the Planning and Zoning Commission, and the Planning and Economic Development Committee and was recommended for approval by all.

HRC staff has also consulted with city staff from Planning and Urban Design, and Economic and Community Development, as well as staff from the Preservation Society of Asheville and Buncombe County to gain support for the specific strategies involving those agencies.

Planning staff from Buncombe County were also involved in the planning process and it is the intent of the Historic Resources Commission to work with Buncombe County on adoption of the plan well.

Considerations:

- Provides a clear focus and direction for historic preservation work in Asheville and Buncombe County
- Promotes quality urban design that reflects Asheville's architectural legacy
- Identifies opportunities and partnerships to enhance the historic preservation program
- Outlines strategies for neighborhood and small area planning efforts
- An adopted plan is a tool for local governments to further partnerships and pursue funding opportunities for implementation of the plan
- Is consistent with the Asheville City Development Plan 2025.

City staff recommends City Council adopt a resolution to accept the Historic Preservation Master Plan for Asheville and Buncombe County as part of the officially adopted comprehensive plan for the City of Asheville.

In response to Councilman Bothwell, Ms. Merten explained that there was considerable discussion regarding mandatory downtown design review, but voluntary compliance. Discussion surrounded whether we should try to make downtown a local historic district or not. Ultimately the Advisory Committee didn't think it was the most appropriate thing to do, but they did support a number of strategies to strengthen the downtown review process and bring it more in alignment with preservation goals. Also, there is a possibility that we could create small conservation districts in commercial areas even with some of the changes by the legislature.

Mayor Manheimer opened the public hearing at 5:30 p.m.

Mr. David Nutter spoke in support of the Plan.

Mr. Jack Thomson, Executive Director of The Preservation Society of Asheville and Buncombe County, urged City Council to support the Plan.

Mayor Manheimer closed the public hearing at 5:35 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Bothwell moved to adopt a resolution to accept the Historic Preservation Master Plan for Asheville and Buncombe County as part of the officially adopted comprehensive plan for the City of Asheville and find that the request is reasonable, in the public interest, and is consistent with the Asheville City Development Plan, 2025 in the following ways: 1) the Plan will encourage the protection of downtown's wealth of historic buildings, 2) a high quality design, in new construction projects, 3) the identification, evaluation and documentation of Asheville's historic resources, 4) the continuation of efforts to preserve and manage change within historic districts, 5) the continuation of education towards preservation of Asheville's historic resources, and 6) the strengthening of a strong positive identity and sense of place for all. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 264

B. PUBLIC HEARING TO PERMANENTLY CLOSE AN UNNAMED ALLEY BETWEEN WYOMING ROAD AND KEEBLER ROAD

RESOLUTION NO. 15-179 - RESOLUTION TO PERMANENTLY CLOSE AN UNNAMED ALLEY BETWEEN WYOMING ROAD AND KEEBLER ROAD

Street Division Manager Chad Bandy said that this is the consideration of a resolution to permanently close an unnamed alley between Wyoming Road and Keebler Road. This public hearing was advertised on July 31, August 7, 14 and 21, 2015.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjoining property owners, SABA Holding Group, LLC, Thomas Wolfe, Manager, owner of parcels 9648-64-5150 and 9648-64-6029, and Stephen Carr, owner of parcels 9648-64-5116 and 9648-64-5197, have requested the City of Asheville to permanently close the unnamed alley between Wyoming Rd. and Keebler Rd.

The Multimodal Transportation Commission met on May 27, 2015, and approved the closure.

On June 7th, 2015 Duke Energy, PSNC Gas, Charter Communication, Metropolitan Sewage District (MSD) and AT&T were contacted about the request to close an unnamed alley between Wyoming Road and Keebler Road. At that time PSNC and Duke Energy both expressed no concern with the closing of this right of way. Charter Communication and AT&T made no comment. MSD does have a facility located within the current R/W and the applicant, Thomas Wolfe, has been in conversation about the dedication of an MSD R/W upon completion of the closure.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

City staff recommends City Council adopt the resolution to permanently close an unnamed alley between Wyoming Road and Keebler Road.

Mayor Manheimer opened the public hearing at 5:38 p.m., and when no one spoke, she closed the public hearing at 5:38 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 15-179. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 365

C. PUBLIC HEARING RELATIVE TO REZONING 200 ASHELAND AVENUE FROM REGIONAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT AND AMENDMENT TO THE HEIGHT ZONE MAP

ORDINANCE NO. 4446 - ORDINANCE TO REZONE 200 ASHELAND AVENUE FROM REGIONAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 4447 - ORDINANCE AMENDING THE OFFICIALLY ADOPTED HEIGHT ZONE MAP IN THE CENTRAL BUSINESS DISTRICT

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to rezone 200 Asheland Avenue from Regional Business District to Central Business District and an amendment to the Height Zone Map. This public hearing was advertised on August 28 and September 4, 2015.

Ms. Bernstein said that the site proposed for rezoning consists of a single parcel owned by Jim F. Hughes of Beacon Properties, is located at 200 Asheland Avenue (PIN 9648.37-0638). There is a single building existing on the approximately 0.48 acres site, one-story in height and approximately 5,000-square feet in size, currently operating with office uses. The site is accessed via a single driveway from Asheland Avenue to the surface parking spaces surrounding the building.

The applicant is proposing a standard rezoning of the single parcel to Central Business District (CBD).

The parcel to the north (172 Asheland) was rezoned from RB to CBD in 2013. Several other parcels in the vicinity have been similarly rezoned in 2013 and 2014. Staff continues to pursue a large-area rezoning along Asheland Avenue and anticipates this action in the early fall.

Because of the repeated requests, staff and the Downtown Commission (DTC) continue to discuss a multi-parcel, City-initiated rezoning on the remaining parcels along Asheland Avenue from Hilliard Avenue to Southside Avenue. Various maps provided in the Downtown Master Plan (2009) included this area along Asheland Avenue due to its proximity to the CBD, wide right-of-way and potential for urban growth. Staff and members of the DTC held a meeting with Asheland Avenue property owners in January 2014 and plan to continue the dialogue with affected neighbors this year, intending to pursue the corridor rezoning and expand the CBD.

Approval of the rezoning request requires an amendment to the Downtown Height Zones map and this parcel would be placed within the Intermediate Height Zone. Asheland Avenue is already considered a Key Pedestrian Street. Extension of the context transition edge is not

applicable as there is no adjacent residential zoning. Any future development would be required to comply with Central Business District design requirements and review standards.

The Downtown Commission evaluated this proposal at their meeting on July 10, 2015, and unanimously supported the rezoning request as well as the application of the intermediate height zone. At their meeting on August 5, 2015, the request was unanimously supported by the Planning & Zoning Commission.

Zoning in this area includes CBD with office and medical uses to the north; a recently approved apartment building (185 Coxe Avenue) in CBD zoning to the west; printing and medical offices in Regional Business zoning to the south; and vacant land and supplies/distribution in Regional Business zoning across Asheland Avenue to the east. Uses allowed in the CBD would be appropriate and compatible on this site. Design standards mandated by the UDO would require that any future development be pulled up towards the corner and focused on the street rather than set back with parking in the front, as seen with the current suburban-style of development on the site and along the corridor. The maximum height permitted (145 feet) would be significantly greater than current RB zoning (80 feet) but is less than the properties adjacent to the west along Coxe Avenue, which are within the tallest height zone.

There are policies throughout the *Asheville City Development Plan 2025* supporting the need for higher-densities and a mix of uses, especially concentrating on downtown and areas close to the CBD for this type of development. CBD zoning allows for a greater variety of uses and higher residential densities while maintaining and requiring design elements that will encourage multi-modal transportation and an urban form of development that is more amenable to the pedestrian experience.

The Land Use & Transportation section contains a specific goal to "continue to look for opportunities to expand the boundaries of the CBD to areas appropriate for that type of development".

The *Downtown Master Plan* recommends strategies for the continued vitality of the downtown and specifically included this section of Asheland Avenue as an area of potential growth and expansion for the CBD. A number of maps in the plan expanded beyond the current CBD boundary because these edge areas were noted as having the potential to grow and improve following an urban development pattern.

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff finds this request to be reasonable.

Considerations:

- Expansion of the CBD is generally recommended in the *2025 Plan* and specifically recommended along Asheland Avenue in the *Downtown Master Plan*
- Four similar requests have been approved in this immediate location since 2013, leading to staff and the Downtown Commission pursuing a multi-parcel rezoning effort.

Staff recommends approval of the proposed rezoning, finding that the request to expand the CBD is consistent with City-adopted plans and strategic goals for development in this area.

Mayor Manheimer opened the public hearing at 5:42 p.m., and when no one spoke, she closed the public hearing at 5:42 p.m.

Mayor Manheimer said that members of Council have previously received copies of the ordinances and they would not be read.

Councilman Davis moved to approve the zoning map amendment from Regional Business to Central Business District as a standard rezoning and find that the request is

reasonable and is consistent with the Comprehensive Plan and other adopted plans, based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilwoman Wisler and carried unanimously.

ORDINANCE BOOK NO. 30 – PAGE 122

Councilwoman Wisler moved to approve the amendment to the Height Zone Map and find that the request is reasonable and is consistent with the Comprehensive Plan and other adopted plans, based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 30 – PAGE 125

D. PUBLIC HEARING AND APPROVAL OF MODIFICATION TO A CONDITIONAL USE PERMIT FOR BILTMORE GARDENS ORIGINALLY APPROVED IN 2005 (NOW KNOWN AS COMMERCIAL PROPERTIES AT BILTMORE) TO INCLUDE THE DEVELOPMENT OF THE COMMERCIAL PORTION OF THE PROJECT WITH THREE, 2-STORY OFFICE BUILDINGS AND ASSOCIATED PARKING ON PROPERTY KNOWN AS 700 BILTMORE AVENUE

City Attorney Currin reviewed with Council the conditional use process, which is a quasi-judicial permit hearing. At this public hearing all the testimony needs to be sworn and due process protections afforded to the applicant.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

After hearing no questions about the procedure, Mayor Manheimer opened the public hearing at 5:45 p.m.

Assistant Director of Planning & Urban Design Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Assistant Director of Planning & Urban Design Alan Glines said that this is the consideration of an ordinance to to grant modification to a conditional use permit for Biltmore Gardens originally approved in 2005 (now known as Commercial Properties at Biltmore) to include the development of the commercial portion of the project with three, 2-story office buildings and associated parking on property known as 700 Biltmore Avenue. This public hearing was advertised on August 28 and September 4, 2015.

This application modifying the conditional use permit follows the standards outlined in 7-5-5 of the UDO. The site consists of a 6.6 acre parcel located at 700 Biltmore Avenue (City Exhibit 3 - Location Map). The property is owned by Near Urban Development Co, LLC. The parcel is steeply sloping with the residential component at the higher portions of the site and commercial uses at the lower portion of the site near Biltmore Avenue. The parcel is zoned Institutional and is governed by a conditional use permit approved in 2005 as the Biltmore Gardens (Ordinance 3222) for 114 residential units and four commercial structures totaling 15,060 square feet. Parking was also approved for the site along with several access points along neighboring streets. The parcel is bordered by three streets: Caledonia Road to the north, Bowling Park Road to the east, Kenilwood Place to the south and Biltmore Avenue to the west. Neighboring uses include, single family residential and commercial uses along Biltmore Avenue (City Exhibit 3 - Site Layout).

The residential portion of the development has been renovated and sold. The modification proposal consists of changes to the commercial component of the CUP. The original approval included 4 commercial structures totaling 15,060 square feet, The modification seeks to reduce the overall amount of commercial space to 10,255 square feet and proposes only three commercial structures compared to four which were approved in the original permit. The size of one structure, Building Three will be increased by a small amount. In addition the architectural style of the development would change from the original proposal: from a mix of traditional residential revival-styles (colonial, Italianate, arts and crafts) to a more contemporary residential style proposed now. Original and proposed elevations and perspective drawings are included in this report (City Exhibit 3 - Elevation Plans for Buildings 1, 2 and 3). The plans provide a comparison of building footprints on sheets 700 and 701 of the current proposal with the earlier approval. A summary is provided in the table below:

	2005 Approval	**2015 Proposal**	**Change**
Building One	6,960 s.f. two-stories	3,800 s.f. two-stories	Reduce 3,160 s.f.
Building Two	4,800 s.f. two-stories	4,555 s.f. two-stories	Reduce 245 s.f.
Building Three	1,500 s.f. one-story	1,970 s.f. two-stories	Add 470 s.f. add one story
Building Four	1,800 s.f. two-stories	Removed from proposal	Eliminated from plan
Total	15,060 s.f.	10,255 s.f.	New reduction 4,805 s.f.

Mr. Glines presented Council with City Exhibit 4 (Revised Table showing the 2015 proposal for Building One is 3,700 s.f. two stories, not 3,800 s.f. two-stories).

Existing and Proposed Building Components: The residential units have been completed and permits have been closed out. Rough grading for the lower area of the site is also completed. The final component of the development is to complete the construction of the new commercial buildings and provide parking and landscaping. The uses of the commercial buildings will be primarily office except for Building One which will be used for office and special events in conjunction with the rental use of some of the residential condominiums. As originally approved this building was to house a restaurant. Buildings Two and Three were originally approved for office and retail and will today focus on office uses.

The new buildings are proposed to be more contemporary in style but with a scale and detailing similar to nearby residential homes (City Exhibit 3 - Building Study). The materials include cementitious siding, stone veneer and aluminum-glass storefront windows, additional smaller windows, and shed-style awnings. The roofs will utilize clipped gables and shed dormers which is compatible with nearby residential roof styles.

Sidewalks surround the site and new sidewalks will connect internally from the parking areas and the new structures to the external sidewalk system.

New surface parking and bicycle parking will be provided for the commercial uses including some that are already in place and others that will be constructed. The parking counts meet UDO requirements.

Landscaping is required for the project and includes parking lot landscaping and building impact landscaping. In addition a number of existing trees will remain on the property and will be protected. The proposed landscaping meets the requirements outlined in the UDO (City Exhibit 3 - Village View from Biltmore Avenue; Village Interior View; Residential Condominium View; Section View; Sketch).

This proposal was approved with conditions by the Technical Review Committee on July 20, 2015. The modification application also requires a quasi-judicial review by the Asheville City

Council and final TRC review.

The site is zoned Institutional District.

A letter of support from The Residences at Biltmore Condominium Owners' Association Inc. has been received (City Exhibit 5).

Section 7-16-2(c) of the Unified Development Ordinance (UDO) states that Asheville City Council shall not approve the conditional use application and site plan unless and until it makes certain findings based on the evidence and the testimony received at the public hearing or otherwise appearing in the record of the case. There are total of seven conditional use standards that the project must meet. The applicant has provided a statement on these findings.

Mr. W. Louis Bissette, representing Near Urban Development Company, said that the commercial components original planned as a part of this mixed use project, and approved by City Council in 2005 were never completed as a result of the economic downtown and the project's subsequent bankruptcy and foreclosure. The commercial properties were purchased earlier this year by Near Urban Development Company. Near Urban proposes to complete three commercial buildings, basically as approved in the 2005 conditional use permit. One of the four commercial structures originally approved will not be constructed and is not a part of this application. This modification seeks to reduce the overall amount of commercial space from approximately 15,000 square feet in 2005 to approximately 10,000 square feet today. He explained the size of the three structures compared to what was proposed in 2005. The three buildings are essentially in the same location as previously approved in 2005. Access, sidewalks, parking, landscaping and open space remain as previously approved and meets the City's requirements as outlined in the Unified Development Ordinance. He then reviewed the seven conditional use standards and how their project complies with those standards. He asked for the Council's support of this modification.

After hearing no rebuttal, Mayor Manheimer closed the public hearing at 6:01 p.m.

Councilman Pelly moved to approve the modification to the conditional use permit for Commercial Properties at Biltmore located at 700 Biltmore Avenue, subject to the site plan and elevations and conditions outlined in the Technical Review Committee report, because the proposal meets the seven conditional use permit standards as demonstrated by the applicant. This motion was seconded by Councilman Bothwell and carried unanimously.

City Attorney Currin said that on the September 22 agenda, a motion will be placed approving the Findings of Fact and Conclusions of Law for Commercial Properties at Biltmore located at 700 Biltmore Avenue.

E. PUBLIC HEARING TO CONSIDER AMENDMENTS TO THE UNIFIED DEVELOPMENT ORDINANCE TO CREATE A NEW LAND USE THAT PERMITS FELINE ADOPTION TOGETHER WITH RETAIL SALES, KNOWN AS CAT CAFÉ, WITHIN THE CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 4448 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO CREATE A NEW LAND USE THAT PERMITS FELINE ADOPTION TOGETHER WITH RETAIL SALES, KNOWN AS CAT CAFÉ, WITHIN THE CENTRAL BUSINESS DISTRICT

Urban Planner Vaidila Satvika said that this is the consideration of an amendment to the Unified Development Ordinance sections 7-2-5 definitions, 7-8-1(d) table of permitted uses, and Section 7-17-3 (c) land use impact table to create a new land use that permits feline adoption together with retail sales, to be defined as Cat Café, within the Central Business District (CBD). This public hearing was advertised on August 28 and September 4, 2015.

The applicant for this wording amendment is Brother Wolf Animal Rescue, a not-for-profit organization whose mission is to provide the resources and lifesaving programs to build a No Kill community.

The applicant is interested in creating a cat café in downtown Asheville, which is a new model of mixing animal adoption with the experience of a café. The cat café model originated in Taiwan in 1998 and has since spread to North America with the opening of a cat cafe in Montreal in 2014. A number of additional cat cafes have opened throughout the U.S. and Canada with the twist of partnering with local animal shelters to showcase adoptable cats looking for new homes. In order to meet health standards, cat cafes are required to separate areas that house cats from food and beverages.

Currently, the UDO precludes animal uses in the CBD. The only two uses in the various zoning districts within the city that relate to live animals are Kennels and Veterinary Clinics.

> *Kennel* means any premises where domestic animals, such as dogs and cats, are boarded, trained, or bred for commercial or animal control purposes.

Veterinary clinics, although not defined, are primarily places of medical service for animals.

The cat café can fit within the kennel use but because kennels permit dogs, a potential noise nuisance for residents and businesses, staff believes permitting kennels within the CBD is not appropriate. The cat café would not meet the veterinary clinic definition because it would only serve orphaned cats that are in need of adoption, not providing medical services to any "owned" cat although medical services would be provided as needed to the cats in the adoption center. Staff proposes to create a new use that would only be permitted in the CBD that would be specific to housing orphaned cats until they are adopted.

The proposed use would be defined as Cat Café and would be permitted only within the CBD:

> *Cat café* means any premises used to house or contain homeless, orphaned, or unwanted cats and that is owned, operated, or maintained by an organization that is licensed by the State as an animal shelter and devoted to the welfare, protection, and humane treatment of animals for the purpose of adoption, and which incorporates retail sales to support the interaction of patrons with cats, such as a café, bookshop, or other permitted use.

The proposed wording amendment would add *Cat Café* as a low-impact use under the Office/Business classification in the Land Use Impact Table of Section 7-17-3 (c), as it is would be consistent with the intensity of uses in that section.

The proposed wording amendment was presented to the Downtown Commission on July 10, 2015 and to the Planning and Zoning Commission on August 5, 2015, and received unanimous support from both.

Staff recommends approval of this proposed amendment because the proposed change to the UDO is determined to be consistent with the Comprehensive Plan and other adopted plans, and is reasonable in that it will add to the city's dynamic and diverse culture and economy by contributing to the eclectic mix of creative, innovative businesses and the employment opportunities they provide.

Mayor Manheimer opened the public hearing at 6:07 p.m., and when no one spoke, she closed the public hearing at 6:07 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell moved to approve the proposed amendment to Sections 7-2-5 definitions, 7-8-1(d) table of permitted uses, and Section 7-17-3 (c) land use impact table to create a new, low-impact land use that permits feline adoption together with retail sales, to be defined as *Cat Café*, within the Central Business District (CBD) and find this amendment is consistent with the Comprehensive Plan and other adopted plans, and is reasonable and in the public interest because it will add to the City's dynamic and diverse culture and economy by creating to the eclectic mix of creative, innovative businesses and the employment opportunities they provide. This motion was seconded by Councilwoman Wisler and carried unanimously.

ORDINANCE BOOK NO. 30 – PAGE 128

F. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED AT 311 AND 315 OLD HAW CREEK ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL ZONING FOR CHURCH RENOVATION, PARKING AREA, ADDED SIDEWALKS AND CONSTRUCTION OF 10 STUDENT HOUSING UNITS WITH ASSOCIATED INFRASTRUCTURE, WITH CONDITIONS FOR REDUCED PROPERTY LINE BUFFERS FOR PORTIONS OF THE SITE

ORDINANCE NO. 4449 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 311 AND 315 OLD HAW CREEK ROAD FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO INSTITUTIONAL DISTRICT/CONDITIONAL ZONING FOR CHURCH RENOVATION, PARKING AREA, ADDED SIDEWALKS AND CONSTRUCTION OF 10 STUDENT HOUSING UNITS WITH ASSOCIATED INFRASTRUCTURE

Urban Planner Vaidila Satvika said that this is the consideration of an ordinance to conditionally zone property located at 311 and 315 Old Haw Creek Road from RS-4 Residential Single-Family Medium Density District to Institutional District/Conditional Zoning for church renovation, parking area, added sidewalks and construction of 10 student housing units with associated infrastructure, with conditions for reduced property line buffers for portions of the site. This public hearing was advertised on August 28 and September 4, 2015.

The project area consists of a single 6.16-acre parcel located at 311 & 315 Old Haw Creek Road with secondary frontage along Bethesda Road. The parcel is currently zoned Residential Single-Family Medium Density (RS-4) and contains a church and minister's parsonage, and a cemetery that measures nearly 69,000 square feet, occupying one quarter of the property. The site is primarily surrounded by residential uses. The site is immediately north and adjacent to Haw Creek Elementary School, a school of approximately 410 students in grades kindergarten through fifth.

The applicant is seeking to create a more flexible use of their property to be able to continue as a place of worship while accommodating other uses. The plan is to create a multi-use property that houses students and seminarians year round as part of an educational and community service curriculum. The project components are outlined here:

- Students would be housed in ten newly constructed small cottages measuring approximately 350-600 square feet each, located at the southwest corner of the property and accessed through a new driveway adjacent to the church. The homes have been designed by Wishbone Tiny Homes but would be built by ministerial students and volunteer labor.

- Fellowship Hall – The existing fellowship hall will be remodeled and upgraded to include a co-working kitchen/maker space, co-working office space, and dining hall.
    - Co-working kitchen/maker space – The co-working, commercial kitchen/maker space will be used by the church and will be available for use by the public at a charge. It will incorporate classes such as canning, cooking, and pickling. Food truck operators may use the kitchen as their commissary, where food is prepared and then loaded onto the truck for delivery.
    - Co-working office – A shared co-working office measuring approximately 800 square feet will be developed with approximately 25 work stations that will be used by students and also open to the public for use at a charge.
    - Dining Hall – The dining hall will be used for all users of the premises.

  There shall be no retail sale of good from the co-working kitchen/office spaces and no restaurant sales.
- Sanctuary – The sanctuary of the church will be used as a place for worship for the four church congregations. It will be renovated in order to be a more flexible space so that it can accommodate community meetings and events. The pews will be replaced with moveable seating.
- Classrooms – On the same floor as the sanctuary there are five classrooms that will be used by students and instructors, and may be available to the public for meeting spaces as part of the co-working kitchen/office spaces.
- Parsonage – The parsonage serves as a residence for clergy and lay missionaries associated with the church; it will continue to function as a residential house for the church's ministers, guests, and temporarily for student ministerial housing.

This chart summarizes the current versus proposed spaces and uses:

Structure	Name of Space	Current Uses	Area	Proposed Uses	Area
Church	Sanctuary	Workship space	2192 SF	Workship space	2192 SF
	Fellowship Hall	Dining area	1548 SF	Dining space	774 SF
				Co-working office	774 SF
	5 Class Rooms	Various church/educational	1576 SF	Church/Educational/Meeting Rooms	1576 SF
	Kitchen	Kitchen	716 SF	Co-working kitchen/maker space	716 SF
Parsonage		Ministerial Housing	5116 SF	Ministerial Housing	5116 SF
Tiny Homes		N.A.	0 SF	10 small homes	6000 SF

Co-working space available to the public at a charge	1490 SF 9%

Access to the property is from either Old Haw Creek Road or Bethesda Road. There will be two parking areas, one accessed from Old Haw Creek Road, the other from Bethesda Road.

There are currently 33 parking spaces on the premises. Based on the mix of uses and the expected overlap, the minimum number of parking spaces required for the project is 41. The project will provide eight additional spaces in order to meet that requirement. Three of the spaces will be provided as accessible parking spaces. Bike parking and a loading berth will be provided.

A 20-foot-wide paved access road will extend from the new parking lot to connect the ten small cottages for access. The applicant will use that access road to join the parsonage so that the parsonage's currently-used gravel driveway may be removed, which would reduce the number of entrances/exits to enhance safety and it would also allow for the planted buffer yard to be uninterrupted by the gravel road encroachment.

A new sidewalk measuring at least five feet wide is proposed along the length of the property adjacent to Old Haw Creek Road and Bethesda Road, and south, bisecting the property, along the cemetery to a 30-foot right of way, which is unpaved. The sidewalk that bisects the

property will enhance the cemetery by making it easier for visitors to access and it will provide a direct connection for access to the school. The applicant has agreed to allow parents to use the church parking facility to park and walk children to the school through the property, or to have children walk along that sidewalk to the parking area to be picked up after school.

The site is on the ART bus route E2 with a bus stop across the street from the site.

Landscaping is required for this project including street trees, parking lot landscaping, street buffer, building impact landscaping, and a property line buffer. The applicant is requesting modifications to the property line buffer due to the location of the cemetery; to comply would require the relocation of more than 75 graves. The proposed alternative compliance is detailed below.

The open space requirement is 15% of the lot area. The site plan shows sufficient area to meet this standard.

Conditions modifying development standards:

1. Property line buffer – a type B (30 foot wide) property line buffer is required adjacent to RS-4 zoned properties.
    1. Along the cemetery, the property line buffer will be waived. At this southern and southeastern edge of the property along the cemetery, which measures approximately 450 feet, planting a buffer would require the relocation of more than 75 graves. *Staff is supportive of this modification due to existing site constraints and because the uses and activity along this part of the property will not change.*

The applicant promoted a community meeting via direct mail to 2,250 households in January 2015, which resulted in a meeting on January 25, 2015, with over 40 people in attendance. The applicant held two additional community meetings. The first gathered approximately 70 people, the second gathered approximately 75 people. At those cookouts, the applicant reviewed the proposed plan and answered questions. On June 18, 2015, the applicant presented to the Haw Creek Home Owners Association to a group of 25. Two letters of support have been received from the public as of the writing of this report.

This proposal was approved with conditions by the Technical Review Committee on April 20, 2015, and requires review by City Council and Final TRC prior to zoning approval. The proposal was presented to the Planning & Zoning Commission first on May 6, 2015, and, after seeking a continuance to gather more public support and to better articulate the plan, it returned to the Planning & Zoning Commission on July 16, 2015. The Planning & Zoning Commission recommended to approve the proposal with a 3-2 vote. Two commissioners were concerned about the tiny homes.

The site is surrounded by other properties zoned RS-4, most of which are single-family residential. There is a pocket of RM-6 zoning to the north of the site, which is mostly used as a place of worship. By moving from RS-4 to INST zoning, the applicant seeks greater flexibility to be able to continue as a place of worship while also accommodating student housing and co-working kitchen/office spaces. All of the uses proposed are identified in the UDO's impact table as "low."

The primary proposed use of the property will continue to function as a place of worship as it has for many years. The question of commercial activity, however, was a concern at the May 6th Planning & Zoning Commission meeting and is addressed here: Is commercial activity compatible with the proposed project and in this residential neighborhood?

First, it should be noted that only about 10% of the project's gross floor area would be used for commercial activities for part of the time. The co-working kitchen/maker space would

serve as non-commercial dining for church members and students, while the co-working office space would serve ministerial students. In comparison, every residential dwelling, under the *Home Occupation* provision of Section 16, is allowed to use up to 25% of its home for commercial uses as an ongoing business. Commercial activity is not precluded from residential areas, but it is subordinate to the primary use.

There is precedent for neighborhood-scale commercial activity within residential districts. An example would be the Harvest House in Kenilworth Road. Open Monday through Friday from 9 a.m. to 4 p.m., the Harvest House is a parks department-owned facility that offers various free activities as well as paid classes in weaving, wood working, clay sculpture, glass mosaics, painting, and so on. The center is very popular and acts as a vibrant neighborhood community center that is located in the middle of the residential zoning district and Kenilworth neighborhood. The commercial activity of the Harvest House does not contribute to a negative neighborhood environment; it's an amenity for the neighborhood.

Appropriately-scaled commercial activity within residential districts helps neighborhoods to be more walkable and bicycle friendly by offering relevant goods and services close by. For this reason there exist various city goals that promote the development of mixed-use corridors and mixed-use development where appropriate. In fact, the Comprehensive Plan states that "appropriately-scaled non-residential uses that serve residents of neighborhoods should be permitted in appropriate locations."

(As a side note, in regard to taxation, according to the County Tax Department allowing a for-profit business to use the church's facilities would make those facility areas taxable but it would not take the whole church property out of tax exemption. The applicant is aware of this.)

The property is bordered by an elementary school to the south, which, as an institutional use with over 400 children served, will be served by this project by being able to use the church's parking lot and sidewalk as a supplemental drop off and pick up location for the school, which the church has agreed to.

In regard to the added residential density, under the current RS-4 zoning if the owner so chose it would be permissible to build an additional four homes within the 60,000 square feet of the property that is currently not built upon (area behind the parsonage/church and not including the cemetery). In comparison to what is permissible by right, 10 small cottages, when combined (approximately 5000 SF), will be a lower impact use below what is developable by right under RS-4. (Area = 60,000 SF. Min lot size = 10,000 SF. Approx 5 homes and cul-de-sac).

The Haw Creek Commons project would offer commercial activities that would be significantly subordinate to the principal use of the site as a place of worship and they would serve neighborhood residents. For this reason, the proposal is compatible with the site and the surrounding neighborhood, and it is consistent with broader city goals pertaining to the adaptive reuse of property to support the continuation of a local institution and community space.

The proposal complies with policies adopted by the City in several ways. As stated in the *City Development Plan 2025,* reusing older buildings is "the most sustainable construction" and helps to preserve and protect neighborhood vitality and appropriately-scaled non-residential uses should be allowed in appropriate locations. This proposal aims to repurpose the site to ensure its financial sustainability and the Plan states that the number one strategy for land use is adaptive reuse of (vacant or) underutilized structures. The addition of street trees, sidewalks and on-site bike parking as well as the location along a transit route supports bus use; the streetscape will be enhanced and automobile dependence may be minimized. A large amount of the site will remain planted and additional, native landscaping will be added to the parking areas, along the streets, and in front of buildings adding to sustainability and environmental goals.

This proposal aligns with City Council's Strategic Plan. As part of Focus Area #1: Economic Growth and Sustainability, this project will "ensure a sustainable financial future for Asheville by promoting an environment where citizens and businesses want to live, work, and invest" by reusing this site to create an eastern hub for their organization's operations. In addition, consistent with Focus Area #3: High Quality of Life, the project will enhance the quality of life for neighborhood residents by adding sidewalks that improve safety and provide more pedestrian connectivity.

Considerations:

- The project proposes the adaptive reuse of an existing building and provides a way for a community institution to adapt to changing realities.
- Ten small cottages would be constructed (beyond street view) to accommodate students.
- Subordinate commercial uses would be added to provide neighborhood-scale co-working spaces alongside on-going traditional uses.
- Sidewalks will be provided along both Old Haw Creek Road and Bethesda Road.
- Additional landscaping will be added throughout the site to soften the streetscape and provide buffering to adjacent properties.

Staff recommends approval of the proposed conditional zoning to allow for the redevelopment of the church and fellowship hall at 311 & 315 Old Haw Creek Road for the construction of ten small cottages, development of neighborhood-scale co-working spaces, new parking area, and to enhance the site with landscaping and sidewalks. This recommendation includes approval of the landscape modifications as detailed above.

Mayor Manheimer opened the public hearing at 6:18 p.m.

Pastor Larry Duggins from the United Methodist Church said they are looking to modify this existing Church building to allow the formations of new types of Christian community. They are continuing worship in this facility by each of four congregations that are currently working in this space, but we are making changes to the physical space to allow community formation in the way that people form community today. Research shows people form community around their work places and that is the motivation behind the co-working spaces within the facility. People form community around food so they would like to create a shared use commercial kitchen, modifying the kitchen that already exists. There would be up to four workers allowed in the kitchen space at any one time. People also form community around their children's schools. They are creating a new relationship with Haw Creek Elementary School. They've added new signage to their parking spaces inviting people to park in their parking lot to walk across to pick up their children at school. That will help alleviate the traffic problem that exists at the entryway to the School. They are also creating a sidewalk with gardens from the parking lot to the School. In addition, they have already added a playground and picnic tables to the space to make it a family-friendly place. Finally, they are working with School administration to make sure that we are making all of our space available to the Elementary School for needs and desires they have. People also form community around shared recreational and community activities so they have modified the space for those activities. They are taking out all the pews out of the main sanctuary so that space can be used not only for worship, but for community meetings in the area. Space will also be utilized by a quilting group, an AA group, a woodworking group, etc. The Missional Wisdom Foundation not only creates this new kind of community but they also teach people about that. They have plans to teach high school, college and seminary students, as well as adults in clergy and adults in lay leadership, about this new kind of missional education through classes and retreats at the space. They want to have 10 tiny student houses on the site, to be able to achieve specific educational goals. First they want their students to experience community living in a monastic austere kind of environment in which we can teach the theology of sufficiency. Second they want to expose the students to that particular kind of housing because we believe it has great potential for affordable housing in some areas or housing for the homeless in some areas. On their site, the only use for those tiny houses is student houses. They have held four community meetings. This is not a retail space and they are not having retail sales from

this location, other than those kinds of sales that churches typically have, e.g., bake sales, rummage sales, etc. This is not a restaurant space. They will not have food service to people for sale. This is not a manufacturing facility to sell tiny houses. And, this is not a business, it's a ministry. There is no profit motive. We are charging people to be able to support the on-going operation of this ministry and other ministries of the Foundation. This is an attempt to repurpose the Church building to match how people form community today.

The following individuals spoke against the conditional zoning for various reasons, some being, but are not limited to: to allow this church the additional activities will open the door for other churches in the area to do the same; this is a very residential neighborhood and their quality of life will be encroached upon; size of the tiny homes seem to be getting larger from every community meeting; community meeting attendees were not supportive of this project; suggestion of adding a dorm to the back of the church and eliminate the 10 tiny homes; fear of what will happen to the tiny homes when the students move out; 10 tiny homes are not sustainable; transient students will walk near the school yard and it will not be safe for the children; 10 tiny homes will decrease adjoining property owners tax values; and the 10 tiny lots will be in the woods and will not be visible from the Church or the School which is not good when there is an adjoining School:

Resident on Willowbrook Road
Ms. Barber Melton, Board Member of the Haw Creek Community Association
Mr. Joe Bly, father of adjoining property owner on Trinity Chapel Road

The following members spoke in support of the conditional zoning for various reasons, some being, but are not limited to: churches need to find new ways to keep their doors open; this is a way to give back to the community; and this will be a positive impact on the Haw Creek community:

Ms. Margaret Burnette King, resident on New Haw Creek Road
Pastor from Bethesda United Methodist Church
Mr. Luke Lingle, employee of the Western North Carolina Conference of United Methodist Church
Mr. Shawn Rice, Director of RFD Construct who will provide the general contracting Services
Ms. Lisa Gibbs, resident in the immediate area

Mayor Manheimer closed the public hearing at 6:50 p.m.

Mr. Rice responded to various questions raised by the community. He said if the trees are marked with a yellow ribbon, they will remain. He felt there is no precedent being set as conditional zonings are considered on a case by case basis. The 10 tiny homes are not trailers on wheels. There will be one tiny home on a trailer which will be used for the teaching element, but that will not remain on the site.

Councilman Bothwell felt that the big problem with tiny homes is that there is a very high material use per square footage and they are much less energy efficient than if you put 10, 500 square foot apartments in a block together. You gain the advantages of HVAC, piping and it disturbs less land.

Councilman Bothwell noted there was a question of what would happen to the tiny homes with the students moved out. He said that a 500 square foot home is very easy to move.

Councilwoman Wisler was concerned about the construction of the 4 tiny homes on the property to be used in the teaching curriculum. Mr. Satvika explained that there is a condition that "the teaching curriculum is allowed to include the construction of up to 4 tiny homes per year, but not for commercial sale. Tiny homes will not exceed 600 square feet. Construction of the tiny

homes will occur only between the hours of 9:00 a.m. and 5:00 p.m. and will be located immediately behind the parsonage, as noted in the site plan."

Pastor Duggins explained that they intend to build up to 10 tiny homes that will be on permanent foundations and built up to residential housing codes. They also plan to build up to 4 tiny homes on trailers so that after their infrastructure is built and there is another round of students, they can have the experience of building one of these houses. There is a condition that they have agreed to regarding the construction being limited to daylight houses and only four houses. These will be for teaching tools and will not be sold.

When Vice-Mayor Hunt asked what happens to the teaching tiny home after it has been constructed, Pastor Duggins said they will give them away or send them off with people who have a use for them in their area. The one they are building now on site will be used as a teaching tool to take to local United Methodist congregations to tour them and get a feeling of what tiny houses represent.

Councilman Pelly moved to approve the conditional zoning request for Haw Creek Commons at 311 & 315 Old Haw Creek Road from RS-4 (Residential Single-Family Medium Density) to INST - CZ (Institutional District – Conditional Zone) with the conditions for the properly line buffer waiver along the cemetery, based on the master plan and find that the request is reasonable, is in the public interest, and is consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) The project proposes the reuse of an existing building, the most sustainable form of development, (2) the project will provide neighborhood-scale co-working spaces that will serve residents of Haw Creek, and (3) the project improves access and safety for users of the site as well as for neighbors by adding sidewalks along the streets and through the property itself. This motion was seconded by Councilman Davis.

In response to Vice-Mayor Hunt, Mr. Satvika reviewed the process of hearings to date and noted that less than 10% of this proposal would include a commercial component. And in comparison, we allow, with our home occupational rules, any home in the City can have up to 25% of their home as their home occupation. Commercial activity is not prohibited precluded from residential areas, but we definitely think it should be subordinate, and staff believes it is subordinate here.

Vice-Mayor Hunt was concerned that neighbors expect the noise of construction to go away after a project is complete, but that would not be the case here with the construction of the 4 tiny homes for the teaching curriculum. When he asked Pastor Duggins what would happen if Council did not allow the construction of the 4 additional tiny homes, Pastor Duggins said that would remove a teaching component they are trying to incorporate into their curriculum, as they find it's important to give people the actual experience of doing something. They believe tiny homes are a viable alternative to address affordable housing and to address the theology of sufficiency.

Vice-Mayor Hunt moved to amend the main motion to approve the conditional zoning request (with the property line buffer waiver along the cemetery) with the removal of the condition that the teaching curriculum is allowed to include the construction of up to 4 tiny homes per year. This motion was seconded by Councilman Smith.

Councilman Davis did not understand that this would be an on-going teaching curriculum of allowing the construction of up to 4 tiny homes per year.

When Councilman Bothwell suggested the Church build a structure to contain the noise from the construction of the 4 tiny homes, Mr. Rice stated that there is a condition that the applicant will return to the Planning & Zoning Commission in one year to review if there are noise issues.

Councilman Pelly said that there have been concerns expressed, but none from the adjoining property owners about noise. He said this is a 6-acre site adjoining a 20-acre Elementary School site. In addition, the site they will build the tiny times on is below grade.

Vice-Mayor Hunt felt that in a residential area Council would now allow a home occupation that involved construction of buildings and exporting them. He also said the construction of the additional tiny homes doesn't necessarily have to happen on the site for the students to participate.

When Mayor Manheimer asked for a vote on the amended motion, said vote was 6-1, with Councilman Pelly voting "no."

City Attorney Currin said that since this is a conditional zoning, the applicant will have to agree to any conditions imposed by Council. Pastor Duggins acknowledged that Council will remove the condition allowing the teaching curriculum to include the construction of up to 4 tiny homes per year and he agreed to that amendment.

Councilman Pelly, Haw Creek resident, was heartened by the opportunities of this proposal presents and felt the changes associated with the School are good improvements.

When Mayor Manheimer asked for a vote on the amended main motion, said vote carried unanimously.

ORDINANCE BOOK NO. 30 - PAGE 130

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. BOARDS & COMMISSIONS

Regarding the representatives from the Neighborhood Advisory Committee and the Sustainability Advisory Committee on Energy & the Environment, it was the consensus of Council to postpone these appointments until October 13, 2015.

Regarding the Buncombe County Tourism Development Authority appointment, it was the consensus of Council to re-advertise the position for two additional weeks, hold the interviews in the Council Chamber in the afternoon of October 13, and transition into the interview process similar to the Planning & Zoning Commission vacancies.

A. RESOLUTION NO. 15-180 - RESOLUTION APPOINTING MEMBERS TO THE HUB COMMUNITY ECONOMIC DEVELOPMENT ALLIANCE

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that the terms of Julie Mayfield, Edward Hay and Jerome Jones, as members of the HUB Community Economic Development Alliance, expired on August 22, 2015.

The following individuals have applied for a vacancy on the Board: Ted Figura, Hunter Goosmann, Ed Manning, Grant Millin, Kendra Sherrod, Cheri Torres and Brooke Brownlow.

The Boards & Commission Committee recommended reappointing Julie Mayfield, Edward Hay and Jerome Jones.

Vice-Mayor Hunt moved to reappoint Julie Mayfield, Edward Hay and Jerome Jones, to each serve an additional three-year term, terms to expire August 22, 2018, or until their

successors have been appointed. This motion was seconded by Councilwoman Wisler and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 268

B. RESOLUTION NO. 15-181 - RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that the terms of Hutch Kerns and Ashley Arrington expired on June 30, 2015. In addition, Josh O'Conner and Patrick Dennehy also resigned, thus leaving two unexpired terms until June 30, 2017.

The following individuals have applied for a vacancy on the Commission: Dean Pistor, Helen Hyatt, Laura Carlson, and Patrick Dennehy.

The Boards & Commission Committee recommended appointing Dean Pistor, Helen Hyatt and Laura Carlson.

Vice-Mayor Hunt moved to appoint (1) Dean Pistor and Helen Hyatt to each serve a three-year term, terms to expire June 30, 2018, or until their successors have been appointed; (2) appoint Laura Carlson to fill the unexpired term of Mr. O'Connor, term to expire June 30, 2017, or until her successor has been appointed; and (3) appoint Pat Dennehy to serve the unexpired term of Mr. Dennehy, term to expire June 30, 2017, or until his successor has been appointed. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 269

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

A group of individuals sought City Council support in urging the City of Asheville to prevent the removal of a stand of valuable tall oak trees on Collier Avenue in Asheville's South Slope. Some of the trees are taller than surrounding buildings, tall enough that you can see them from various vantage points several blocks away. They asked the City to lead the way in preventing the loss of this unique wood in this otherwise urban neighborhood. One way would be to facilitate offering the developer a land swap where he can build his apartment project without the need to remove the forest. Another way would be for the City to assist in finding a donor(s) who would acquire the lot with the purpose to preserve and protect the wood in its natural form. After discussion on how this needs to be a community effort in raising funds, with the City being in a minority investment role as with other parks in the City, it was the consensus of Council to ask City Manager Jackson to first meet with the developer to see how willing he is to consider an exchange of property, and then to provide the following information: (1) what was the staff's perspective for this area during the development of the South Slope Innovation District; (2) how much did the developer pay for the property; (2) what kinds of things is the developer looking at constructing on this property; (3) is there an affordable housing component in the developer's plans; and (5) get background and context of this area from the Parks & Recreation Master Plan, the Downtown Master Plan and the Economic Development CIP.

A representative from the Vietnam Veterans Association Chapter 124 asked City Council to consider donating to the Vietnam Traveling Memorial Wall, which will be at the Harley-Davidson of Asheville on September 9-14, 2015. While this Wall is a replica of the one in Washington, D.C., this experience can have the same emotional and healing effect on our visitors. In addition, traveling to Washington is not always easy or affordable for Vietnam Veterans, family and friends. They have raised over $13,000 but their budget is $25,000. He noted that Buncombe County pledged $6,000, and he asked for a donation from the City of Asheville.

Closed Session

At 8:01 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(3). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(5); and (3) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. Statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3). This motion was seconded by Councilman Pelly and carried unanimously.

At 9:33 p.m., Councilman Bothwell moved to come out of closed session. This motion was seconded by Councilwoman Wisler and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 9:33 p.m.

Magdalen Burleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – September 22, 2015 - 5:00 p.m.

Regular Meeting

Present: Vice-Mayor Mark W. Hunt, Presiding; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: Mayor Esther E. Manheimer

PLEDGE OF ALLEGIANCE

Vice-Mayor Hunt led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. EMPLOYEE RECOGNITIONS

City Manager Jackson recognized Lt. Bradley Duncan, Station 11; Engineer Adam Hurdt, Station 11; Sr. Fire Fighter Justin Baker, Station 2; Sr. Brad Maselbas, Station 2; Abby Moore – NC Association of Hazardous Materials Responders Outreach and Education Chair coordinated the team organization; and Chief Joy Ponder – Member of the NCAHMR was the team leader at the Challenge, for coming in first place in the Twelfth Annual "HAZMAT CHALLENGE." This competition allows teams to practice typical HazMat responses while competing against colleagues from across the State of North Carolina. This year eleven teams competed with the Asheville Hazardous Materials Regional Response Team #6 won first place.

Vice-Mayor Hunt thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

II. CONSENT AGENDA:

At the request of Councilman Davis, Consent Agenda Item "H" was removed from the Consent Agenda for discussion and/or individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 8, 2015

B. RESOLUTION NO. 15-182 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS UNDER THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM FOR A REGIONAL LAW ENFORCEMENT LIAISON

ORDINANCE NO. 4450 - BUDGET AMENDMENT TO ACCEPT FUNDS UNDER THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM FOR A REGIONAL LAW ENFORCEMENT LIAISON

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the North Carolina Governor's Highway Safety Program for highway safety grant funds to purchase equipment for the Traffic Safety Unit; and to cover the costs associated with the City providing an officer to serve as the Regional Law Enforcement Liaison which entails training and travel related to the liaison duties, and the associated budget amendment in the amount of $20,000.00.

The City of Asheville Police Department (Police Department) currently participates in the Highway Safety Program campaigns. In order to maximize participation and efficiency of highway safety initiatives, a regional law enforcement network was created to enhance communication and effectiveness. The Police Department promotes highway safety statewide by designating a member of the department to serve as the regional liaison for Highway Safety Program Region 10 which covers Buncombe, Henderson, Madison, Mitchell, Polk, Rutherford, and Yancey counties.

Pro:

- Reimbursement revenue to cover the cost of obtaining the needed equipment including speed measuring instruments for police motorcycles, Crash Data Retrieval Software subscription, and laptop computers.
- Reimbursement revenue to cover the cost of necessary training and travel related to highway safety duties and operations.

Con:

- Commitment of staff hours for the officer charged with the liaison duties to accomplish the goals stated in the grant contract.

This budget amendment is fully funded with grant revenue and there is no impact to the General Fund budget.

Staff recommends that the City Council adopt a resolution authorizing the City Manager to enter into an agreement with the Highway Safety Program to provide an officer to act as the Regional Law Enforcement Liaison. The grant will provide funding for travel expenses, needed equipment cover costs associated with the liaison role.

RESOLUTION BOOK NO. 37 - PAGE 270
ORDINANCE BOOK NO. 30 - PAGE 138

C. MOTION TO ADOPT THE FINDINGS OF FACT AND CONCLUSIONS OF LAW FOR THE MODIFICATION TO A CONDITIONAL USE PERMIT FOR BILTMORE GARDENS (NOW KNOWN AS COMMERCIAL PROPERTIES AT BILTMORE)

D. RESOLUTION NO. 15-183 - RESOLUTION APPROVING A WRITTEN EXEMPTION FROM THE REQUEST FOR QUALIFICATION PROCESS AND AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH KIMLEY-HORN AND ASSOCIATES INC. TO PROVIDE REDEVELOPMENT OPTIONS FOR THE FORMER MATTHEWS FORD PROPERTY

Summary: The consideration of a resolution approving a written exemption from the Request for Qualification (RFQ) process and authorizing the City Manager to execute a contract with Kimley-Horn and Associates, Inc., for the amount of $30,000 to provide redevelopment options for the former Matthews Ford property.

The City of Asheville designated the South Slope Extension as an Innovation District. Property previously known as the Matthews Ford property is located within that district. Although Duke Energy Progress currently owns the property with plans for electrical infrastructure development, they continue to evaluate other options/locations that meet their electrical system needs. The City of Asheville would like to evaluate the property to see if it can be developed in conjunction with the Lee Walker redevelopment to allow additional access to Lee Walker, include mixed-use and affordable housing.

Kimley-Horn has a proven track record of working on mixed-use, mixed income projects.

Since the scope of work of this proposed contract may include some minor design and/or engineering services, it may be viewed as a professional services contract, rather than a general services contract. The State statutes require that professional service contracts be subject to a RFQ process, but N.C.G.S. § 143-64.32, allows for a written exemption from this process for professional service contracts under $50,000 upon local government approval. The proposed contract with Kimley-Horn will be in an amount not to exceed $30,000.

Pro:

- The study will provide information on the feasibility for using the site as mixed-use, mixed income property.

Con:

- None.

The project budget will be an hourly rate not to exceed $30,000.

Staff recommends City Council adopt the resolution approving a written exemption from the RFQ process for professional service contracts and authorizing the City Manager to execute a contract with Kimley-Horn and Associates, Inc., for the amount of $30,000 to provide potential redevelopment options for the former Matthews Ford property.

RESOLUTION BOOK NO. 37 - PAGE 271

E. RESOLUTION NO. 15-184 - RESOLUTION TO EXEMPT THE FORMAL BIDDING REQUIREMENT FOR THE SUBJECT PURCHASING BID, AND AUTHORIZE THE WATER RESOURCES DEPARTMENT TO PURCHASE MID-SIZE METER BOXES FROM SOLE SOURCE FORTILINE WATERWORKS

Summary: The consideration of a resolution to exempt the formal bidding requirement for the subject purchasing bid, authorize Water Resources Department (Water Resources) to purchase mid-size meter boxes, and recognize Fortiline Waterworks as the sole source for the purchases.

North Carolina General Statute 143-129 (e) allows exceptions to formal bidding when standardization or compatibility is the overriding consideration.

On April 10, 2012, City Council passed Resolution No. 12-77 to exempt the formal bidding requirement for Water Resources to purchase mid-size meter boxes from a sole source supplier, PSP Manufacturing & Supply. PSP Manufacturing & Supply has gone out of business, and the rights to manufacture the meter boxes have been transferred to Fortiline Waterworks in Concord, North Carolina.

In November 2011, the Water Resources Department Standard Details were updated to detail new meter box requirements for 1-inch, 1 ½-inch, and 2-inch meters. The new meter box requirement would allow sizes of water meters ranging from 1 to 2-inch to fit within the same meter box, thereby reducing the various sizes of meter boxes needed. The meter boxes shown on the updated details are manufactured by Fortiline Waterworks in North Carolina. There are currently no other manufacturers who provide a box that can house meters in this range of sizes.

Water Resources staff consulted with the City's Purchasing Division on the need to sole source the purchase to Fortiline Waterworks due to compatibility issues with the Department's Standard Details. It is the consensus of the City's Water Resources Department and Purchasing Division that Fortiline Waterworks should be recognized as the sole source for this purchase and a Purchase Order should be issued to it for the purchase of mid-size meters boxes. The sole source with Fortiline Waterworks will initially be for 12 months to allow time for interested vendors

to update products to match the City's needs and provide a competitive bid. If no vendors update its products, then the sole source would continue annually thereafter.

Pros:

- Recognizing Fortiline Waterworks as the sole source for the mid-size meter boxes and authorizing the purchase from this vendor will ensure compliance with Water Resource's Standard Details.
- The meter boxes can be locked, which will deter tampering and water theft.
- The meter box has a locking mechanism that does not allow the lid to slip, slide, or otherwise dislocate, which greatly reduces pedestrian liability when located in sidewalks , or other pedestrian-friendly environments.

Con:

- Sole sourcing the meter box reduces the advantage of competitive pricing through other vendors. The initial 12 month sole source will give other vendors a chance to manufacture like products that meet the Water Resource standard. The meter boxes will be more expensive than the current meter boxes. Water Resources currently pays $671 for mid-size meter boxes. The price will increase to $710 per meter box. Because the proposed meter box can accommodate different meter sizes, that should help compensate for the increased expense.

The funding needed for this purchase is currently allocated in the Water Resources' Operating budget.

Staff recommends City Council consideration of a resolution to exempt the formal bidding requirement for the subject purchasing bid, authorize Water Resources to purchase mid-size meter boxes, and recognize Fortiline Waterworks as the sole source for the purchases.

RESOLUTION BOOK NO. 37 - PAGE 272

F. ORDINANCE NO. 4451 - BUDGET AMENDMENT TO USE FEDERAL DRUG SEIZURE FUNDS TO FUND TRAINING, SAFETY EQUIPMENT AND EDUCATIONAL MATERIALS FOR THE ASHEVILLE POLICE DEPARTMENT

Summary: The consideration of a budget amendment in the amount of $40,000 to authorize the use of Federal Drug Seizure Funds to purchase safety equipment and training materials for Community training for the Asheville Police Department.

The Federal Asset Forfeiture Program is an equitable sharing program which divides the illegal proceeds from criminal activities between the federal government and local law enforcement agencies. It is designed to help off-set the considerable cost of drug enforcement, and other applicable joint investigation by allowing local law enforcement agencies to use seized monies for equipment, training, and improvements that might not necessarily be budgeted for by the agency. The illegal proceeds are divided with 20% going to the federal agency adopting the seizure and 80% going to the local law enforcement agency initiating the seizure.

The Police Department has received $40,000 in federal drug seizure funding. This proposed budget amendment would authorize the use of this funding for: 1) Training and Materials, 2) Purchase criminal justice books in partnership with AB Tech and local high schools; and 3) Safety equipment to better equip officers to render first aid to the public and each other in critical incidents. These are items which are not currently funded within the Police Department's operating budget.

Pros:

- Reduction in cost to the City of Asheville for the purchase of this equipment and training

- Increase officer and public safety by providing safety equipment to render first aid
- Support of partnership with AB Tech and Local High School Criminal Justice Programs through providing educational materials

Con:

- None noted

Accepting and allocating these State Forfeiture Funds is a financial benefit to the City and Police Department by allowing it to be better equipped and providing additional safety measures to protect the public. There is no impact to the General Fund budget.

Staff recommends City Council adopt a resolution authorizing the City Manager to adopt a budget amendment in the amount of $40,000 authorizing the acceptance and use of Federal Asset Forfeiture Program Funds to fund training, safety equipment and educational materials.

ORDINANCE BOOK NO. 30 - PAGE 140

G. ORDINANCE NO. 4452 - ORDINANCE AMENDING THE MEMBERSHIP OF THE CIVIC CENTER COMMISSION TO (1) ADD THE ASHEVILLE-BUNCOMBE SPORTS COMMISSION DIRECTOR AND THE ASHEVILLE SYMPHONY DIRECTOR BE NON-VOTING EX-OFFICIO MEMBERS; AND (2) ALLOW THE COMMISSION TO APPOINT COMMITTEES FROM ITS MEMBERSHIP OR THE COMMUNITY AT LARGE

Summary: The consideration of an amendment to the provisions of the Civic Center Commission ordinance to allow the Commission to add additional ex-officio members and to appoint members to committees from members of the community at large.

First, in regard to ex officio membership, Sec. 2-61 of the City Code pertains to the "Creation; composition; terms of office meetings; authority" of the Asheville Area Civic Center Commission and subsection(a) of this Section states that the commission shall be composed of nine voting members and that "*the city manager, the city finance director and the civic center director, and the Asheville Area Chamber of Commerce's Director of Convention and Marketing Sales, shall be non-voting ex officio members.*" The Commission would like the ability to include additional non-voting ex officio members. The reason for this change is that currently, there are Directors of two organizations-the Asheville Buncombe Regional Sports Commission (Ben Van Camp) and the Asheville Symphony (David Whitehill) who attend and report at the Commission meetings regularly but have no formally recognized role in the Commission. These organizations engage in work that, like the work of the Chamber of Commerce, has particular impact and relationship to the functions of the Civic Center. For example, the Sports Commission was instrumental in negotiating with the Southern Conference to return to the City of Asheville and to hold the event at the civic center and the Asheville Symphony, leases space at the civic center and also is one of the primary users of the Thomas Wolfe Theatre. Therefore, the Commission would like the ability to add directors of such organizations as non-voting ex-officio members of the Commission.

Originally, the Commission requested that they be allowed to add ex officio members generally, as they saw fit, upon a majority vote. However, when the matter was heard before the Boards and Commissions Committee on September 8, 2015, the recommendation was revised to allow only the specific addition of the Sports Commission Director and Asheville Symphony Director as ex officio members.

Second, in regard to the appointment of subcommittee members from the community at large, Sec. 2-61(g) currently allows the Commission to "*provide for committees whose functions shall be fixed by the commission at the time of appointment.*" The Commission would like to revise this section to clarify that committee members may be appointed from the community at large, in addition to the Commission membership. Other City Commissions, including the

Downtown Commission and the Riverfront Redevelopment Commission, have this ability to appoint community members to subcommittees and this is often very useful. In the case of the Civic Center Commission, for example, a very experienced Commission member, Mike Burke, has reached the end of his term and therefore can no longer serve on the Commission. However, the Commission is interested in having him continue to head the Thomas Wolfe Task Force.

Pro:

- Enables the Commission to have more meaningful participation from organizations and individuals with expertise and experience that is particularly valuable to the work of the Commission.

Con:

- None known.

City Staff recommends City Council adopt the amendments to the Civic Center Commission ordinance allowing the Asheville Buncombe Regional Sports Commission Director and the Asheville Symphony Director to be added as ex-officio, non-voting members and to allow the Commission to appoint members of the community at large to committees.

ORDINANCE BOOK NO. 30 - PAGE 142

H. RESOLUTION INCREASING THE LIVING WAGE RATE FOR FULL- AND PART-TIME CITY EMPLOYEES AND INCREASING ITS APPLICABILITY TO ALL CITY EMPLOYEES

This item was removed from the Consent Agenda for discussion and/or an individual vote.

I. RESOLUTION NO. 15-186 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS THROUGH THE 2015 EDWARD BYRNE JUSTICE ASSISTANCE GRANT - LOCAL SOLICITATION, TO PURCHASE CONDUCTED ELECTRICAL WEAPONS

ORDINANCE NO. 4453 - BUDGET AMENDMENT FROM THE U.S. DEPT. OF JUSTICE FOR THE 2015 EDWARD BYRNE JUSTICE ASSISTANCE GRANT

Summary: The consideration of a resolution authorizing the City of Asheville (City) to enter into contract with and accept funds through the 2015 Edward Byrne Justice Assistance Grant – Local Solicitation (Byrne JAG – Local Solicitation) in the amount of $50,434 and a budget amendment in that same amount.

The Asheville Police Department (Police Department) received authorization and applied for the Byrne JAG – Local Solicitation. On September 3, 2015 the City was awarded the grant and is requesting authorization to officially accept the grant. The related funding is a predetermined amount, based on the Part 1 Uniform Crime Reporting. Once accepted the Police Department and Buncombe County Sheriff's Department will be allocated $50,434 based on the award matrix. The City will receive $38,322 and Buncombe County will receive $12,112. The distribution of funds would be approved through a signed Memorandum Of Understanding (MOU).

If approved, the Police Department plans to utilize the grant funds to purchase Conducted Electrical Weapons (CEW) for uniformed patrol officers. These devices will serve to enhance officer safety and potentially reduce the propensity for injury that offenders could be exposed to during altercations with officers. Effective CEW applications have demonstrated the capability to incapacitate threatening subjects by using an electrical charge to target the motor

nerves that control movement. Ideally, these devices facilitate effective restraint while reducing the opportunity for injury to all involved parties, thereby potentially reducing workers' compensation claims and liability claims.

There will be an expense of $38,322 by the Police Department for the purchase of approximately 30 CEW's. The Buncombe County Sheriff's Department will be awarded $12,112 for its identified needs. This accounts for the total allocation of $50,434 for this grant.

This is a 100% funded non-local match grant that will serve to enhance officer safety for substantially more patrol officers and potentially reduce the probability of injury for threatening offenders.

Pros:

- Increasing the number of Conducted Electrical Weapons for patrol officers will enhance officer safety and that of the community
- Increased accountability because of the downloadable content related to deployments
- Costs of the devices could offset the costs incurred by workers' compensation or liability claims

Con:

- Additional burden on future operations budget for the cost of maintenance and replacement after the approximate five-year service life of the device
- Additional training costs associated with purchasing the training cartridges at an approximate cost of $40 per year per device.

If the grant is accepted, there is no local match required, however there would be maintenance and replacement costs for the equipment that would need to be included in future fiscal year budgets.

Staff recommends City Council adopt the resolution authorizing the City Manager to accept grant funds through US Office of Justice Programs in the amount of $50,434, and a budget amendment in that same amount.

RESOLUTION BOOK NO. 37 - PAGE 274
ORDINANCE BOOK NO. 30 - PAGE 144

Vice-Mayor Hunt asked for public comments on any item on the Consent Agenda, but received none.

Vice-Mayor Hunt said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Bothwell moved for the adoption of the Consent Agenda, with the deletion of Consent Agenda "H". This motion was seconded by Councilman Pelly and carried unanimously.

ITEM REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

H. RESOLUTION NO. 15-185 - RESOLUTION INCREASING THE LIVING WAGE RATE FOR FULL- AND PART-TIME CITY EMPLOYEES AND INCREASING ITS APPLICABILITY TO ALL CITY EMPLOYEES

Summary: The consideration of a resolution increasing the living wage rate for full and part-time employees and increasing the applicability of the living wage provisions to all City employees regardless of full or part-time status, including temp seasonal employees.

The City of Asheville's Living Wage Policy is considered annually as part of the budget process. The adopted fiscal year 2015-16 budget includes funding to set a living wage of $12.50/ hour without employer-provided health insurance and $11.00/ hour with employer-provided health insurance. Effective retroactive to July 3, 2015, the revised Living Wage Policy would apply to all City employees regardless of full or part-time status, including all temporary/seasonal employees.

Pros:

- Updates living wages to Just Economics WNC guidelines.
- Supports affordability goals for persons all incomes.

Cons:

- Cost impact.
- Reduced cost recovery for City services.

The adopted budget includes $250,000 City-wide, sufficient funds to implement the living wage retroactive to July 3, 2015. The wage adjustments will impact cost recovery for operations of the U.S. Cellular Center and the Parks and Recreation Department. U.S. Cellular Center impacts are estimated at $24,000 annually. The Civic Center Commission recommends consideration of adjustments to billable hour rates, box office hours and staffing to offset the cost increase. Fee increases and staffing adjustments would be considered in the process of planning the FY 2016-17 budget.

For City Council to adopt the resolution increasing the living wage rate for full and part-time employees and increasing the applicability of the living wage provisions to all City employees regardless of full or part-time status, including temporary/seasonal employees.

Councilman Davis supported living wages for full- and part-time employees. However, he raised concerns about extending it to temporary and seasonal employees because some options will need to be instituted by departments to account for this and may include the scaling back the number of hours for employees. He noted that some employees would rather have the hours rather than having the living wage. Using the U.S. Cellular Center as an example, they are trying to reduce the subsidy and it may have to be by cutting one day out of the box office hours and that may not be good for business.

City Manger Jackson responded to Council by explaining the budget impact, specifically stating that there was $250,000 built in the budget for expenditures by various departments but there was no increase in revenues to retain cost recovery for programs and services. The revenue and cost recovery will be reviewed during the budget process.

When Vice-Mayor Hunt asked for public comment, no one spoke.

Councilman Smith moved to adopt Resolution No. 15-185. This motion was seconded by Councilwoman Wisler and carried on a 5-1 vote, with Councilman Davis voting "no."

RESOLUTION BOOK NO. 37 - PAGE 273

III. PRESENTATIONS & REPORTS:

A. FINANCIAL RATING ANALYSIS

Mr. Doug Carter, the City's Financial Advisor, updated City Council on their upgraded to triple-A bond rating. He reviewed the (1) importance of highest credit ratings and the S&P AAA; (2) what highest ratings say about Asheville; (3) City infrastructure improvements key to continuing success; (4) Economic Development - Whatever you have done keep doing it; (5) maintaining the rating; and (6) role of strong management.

Mr. Carter responded to questions raised by the Council regarding what kind of benefit will the City and taxpayers enjoy from the higher AAA bond rating.

B. BOARDS & COMMISSIONS MANUAL

Business Services Manager Jamie Matthews provided Council with an updated Boards & Commission Manual. The Manual consists of an overview of the boards and commissions; the rules and procedures for boards and commissions; roles and responsibilities of board chairs, board members and staff support; and templates.

It was the consensus of Council to (1) approve the manual as a guide for board and commission members and staff; (2) staff plan a second annual board chair meeting for mid-January prior to Council retreat; and (3) develop a long-term plan to provide regular comprehensive training to staff and board and commission members.

C. LEGISLATIVE UPDATE

Vice-Mayor Hunt updated City Council on some highlights from the legislature affecting the City of Asheville as follows: (1) **Budget-** H97 2015 Appropriations Act. - Sales Tax Redistribution - The final budget agreement does not include a redistribution of currently collected sales taxes, but provides new sales tax revenue through the expansion of the sales tax base to the repair, maintenance, and installation of tangible personal property. That new revenue will be distributed to 79 counties based on percentages found in the budget; (2) Historic Taxes - The budget includes a historic preservation tax credit with a sunset expiration date on Jan. 1, 2020. The provision creates a tax credit of 10 to 20 percent of rehabilitation expenses for qualifying buildings and homes. In poorer Tier 1 and Tier 2 counties and for projects under $10 million, the higher percentage would apply; (3) MSDs - Legislators adopted compromise language on Municipal Service Districts (MSDs) in the final budget. This revised language set parameters on the contracts cities make with private entities to provide services within an MSD; required all moneys raised in these districts meet the needs of the district; and directed an interim study regarding whether district property owners should have the right to petition for removal from that district; (4) Body Cams - Legislators have set aside $5 million in the state budget to provide matching grants to local law enforcement agencies in order to equip them with police body-worn cameras. The maximum grant that an agency can receive is $100,000 and the grants require a 2-to-1 local match; and (5) **JDIG** - H117 NC Competes Act - JDIG - Compromise langue would increase the cap on incentive awards to $20 million a year. The cap would be increased to $35 million for any year in which the state has a "high-yield" jobs deal where a company invests at least $500 million and adds at least 1,750 jobs.

Councilman Smith said that there there will be a huge human cost to pay for the tax cuts in Raleigh, with mental health being one piece.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED ON 95 CHARLOTTE STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING FOR FOR ADAPTIVE REUSE OF AN HISTORIC STRUCTURE FOR OFFICE USE AND THE CONSTRUCTION OF A NEW RESIDENTIAL BUILDING, WITH CONDITIONS RELATING TO LANDSCAPING AND BUILDING DESIGN

ORDINANCE NO. 4454 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED ON 95 CHARLOTTE STREET FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING FOR FOR ADAPTIVE REUSE OF AN

HISTORIC STRUCTURE FOR OFFICE USE AND THE CONSTRUCTION OF A NEW RESIDENTIAL BUILDING, WITH CONDITIONS RELATING TO LANDSCAPING AND BUILDING DESIGN

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to conditionally zone property located on 95 Charlotte Street from RM-16 Residential Multi-Family High Density District to Office District/Conditional Zoning for the adaptive reuse of an historic structure for office use and the construction of a new residential building, with conditions relating to landscaping and building design. This public hearing was advertised on September 11 and 18, 2015.

The project site consists of a single parcel, 1.23 acres in size. The parcel is located at 95 Charlotte Street (PIN 9649.63-1039, owned by 95 Charlotte Street, LLC) on the southeast corner of East Chestnut Street and is zoned RM-16. Adjacent zoning includes CBII (vacant) and RM-16 (vacant and multi-family apartments) with Office, CBI and CBII (retail, restaurant) zoning in the immediate area. The Charlotte Street corridor is largely commercial in this vicinity with some residential to the north and there is a residential neighborhood to the east, immediately adjacent.

The site is the location of the historic Patton Parker House - built in 1868-9 and a designated local historic landmark as well as a contributing resource within the Chestnut Hill National Register Historic District. Additionally, there are restrictive covenants on the house and site that will be managed by the Preservation Society of Asheville & Buncombe County.

Phase One - The applicant is proposing to convert the existing structure from a residential to an office use and make supporting site improvements related to access, accessibility and parking. The structure is approximately 4,931 square feet in size and two stories in height (38 feet nine inches).

Phase Two - The second phase is to construct a new building on the rear of the property. It is proposed to be approximately 2,350 square feet, two-stories in height (31 feet six inches) and will contain two residential units. The exterior design of this structure is ultimately subject to approval by the Historic Resources Commission (HRC).

Access to and from the site is currently in three locations and each will remain. The existing driveway loops from an opening on Charlotte Street across the front lawn and over to East Chestnut Street. The loop is proposed to be expanded interior to the site to create a circular drive in front of the property with parallel parking spaces in two locations. The Charlotte Street driveway would be ingress-only and the driveway onto East Chestnut would provide both egress and ingress.

The driveway cut into the rear of the site from East Chestnut will be enlarged and will provide access to a new surface parking area behind the historic structure and the accessible entrance.

Twelve parking spaces are shown in the surface lot and room for six additional spaces are proposed along the circular driveway on the front of the property, for a total of 18 parking spaces. The office use requires between 14 to 19 spaces. Due to the proximity of the residential use to downtown, designated parking is not required for the residences but should be able to be accommodated on the site with the number of spaces provided.

There are historic brick sidewalks along East Chestnut Street (six feet wide) that will be protected and remain. There are also existing concrete sidewalks along Charlotte Street that will remain in place. There is a northbound bus stop in front of project site.

Landscaping is required for this project and includes a property line buffer, street buffer, street trees, parking lot and building impact landscaping. The HRC will be evaluating the

landscaping plan according to the Local Landmark designation and has provided guidance at several meetings. The plan deviates from the UDO requirements to create a more site-specific, historically appropriate landscaped setting, preserving character defining trees and shrubs and meeting the intent of the code requirements but presenting planting areas in a somewhat "softer," less linear layout.

The change in zoning is required because office uses are not permitted within the existing residential zoning.

The current proposal includes the following conditions that will need to be approved by City Council with a recommendation from the HRC:

1. The landscape plan does not meet the exact UDO requirements but has been evaluated and recommended for approval by the HRC based on the historical nature of the property and creating a landscape that respects the character of the site while meeting the intent of the ordinance. The plan includes a portion of the driveway (existing) and one parking spaces encroaching into the buffer area.
2. The final exterior design of the new residential building will be subject to approval by the HRC and reviewed against the Secretary of the Interior's Standards.

As a Conditional Zoning request, this project requires a recommendation from the Planning & Zoning Commission and approval by City Council. The Planning & Zoning Commission unanimously voted to support the proposal at their meeting on September 2, 2015. The Technical Review Commission issued and approval with conditions at their meeting on August 17th and final TRC review is needed prior to issuance of a zoning permit.

Additionally, review and approval by the HRC is also required due to the historic landmark status of the property. The HRC is reviewing the site design, building alterations and new construction against the Secretary of the Interior's Standards for Rehabilitation which will result in the issuance of a Certificate of Appropriateness upon approval of the rezoning. Preliminary reviews with the HRC were held on May 13th, August 12th and September 9th.

A Conditional Zoning was recently approved in the vicinity (1 Sunset Parkway, BP 15-0486). There have been several Level I projects underway or recently completed along the Charlotte Street corridor for new businesses.

The mix of office and residential proposed for the parcel is consistent with other uses along the Charlotte Street corridor and the mix of new landscaping material with preservation of existing plants will aid in mitigating the potential visual impact of the parking along the rear of the site.

The preservation and adaptive reuse of the historic structure allows for the historic character of this important site to remain while incorporating new uses and structures in a way that is sensitive to the history and integrated into the surrounding area.

This proposal is aligned with numerous aspects of the *City Development Plan 2025* including encouraging mixed-use and infill developments, tailoring neighborhood compatibility through the design review process and adaptive reuse of an historic structure.

This project supports goals in City Council's 2014-2015 strategic plan, most notably in the area of *Economic Growth & Sustainability* with both the infill redevelopment aspect as well as the adaptive reuse of an historic structure to accommodate a contemporary use. The preservation of the historic Patton Parker House adds to the area of a *High Quality of Life* with the safeguarding of a significant piece of local history, retaining the character along this corridor.

Based on the above findings and the analysis provided in the staff report and as stated in the recommendation below, staff finds this request to be reasonable, consistent with the comprehensive plan and within the best public interest.

Considerations:

- The change in zoning allows for adaptive reuse and preservation of a local landmark, National Register historic structure.
- Multiple design review meetings with the Historic Resources Commissions ensures a proposal that is historically appropriate and compatible with the character of the area.
- Construction of the new building to the rear of the site provides a residential use adjacent to the residentially-zoned neighboring lot and minimizes impact to the historically significant features on the front and middle of the site.

Staff recommends approval of the proposed conditional zoning for the adaptive reuse of this historic structure and the new construction to add two residential units to the rear of the property.

Vice-Mayor Hunt opened the public hearing at 6:03 p.m.

Mr. Mark Wilson, representing the applicant, said that they are working with the Historic Resources Commission and expect to reach consensus with them soon.

Mr. Richard Liston questioned how any archeological items found will be handled and how will traffic be managed during renovations.

Mr. Frank Thomson, Director of The Preservation Society of Asheville and Buncombe County, was excited to see the project move forward. He said there would b very low impact on the rehabilitation of the existing structure and understood the work will not impede any area outside the boundary of the property, expect for tree removal.

Vice-Mayor Hunt closed the public hearing at 6:10 p.m.

In response to Councilman Bothwell, Mr. Wilson stated that the mature hardwood trees will be preserved. He did note that there are two pine trees at the intersection of East Chestnut Street and Charlotte Street that will have to be removed as they are affecting the stability of the wall. In addition, there is a maple tree at the top of the loop in the circular driveway whose branches are intertwined with a Buncombe County Treasure Tree. That may also have to be removed.

Director of Historic Resources Stacy Merten said that because this is a local landmark, if any archeological findings are located, they will be assessed and a state local historical representative would be contacted.

Vice-Mayor Hunt said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved to recommend approval of the conditional zoning request for 95 Charlotte Street from Residential Multi-family High Density (RM-16) to Office Conditional Zone (O-CZ) including the requested conditions on landscaping and final building design and find that the request is reasonable, is in the public interest and is consistent with the Comprehensive Plan and other adopted plans in that the proposal supports goals found in the City's comprehensive plan of promoting adaptive reuse of existing structures, historic preservation and using design review to ensure neighborhood compatibility. This motion was seconded by Councilwoman Wisler and carried unanimously.

ORDINANCE BOOK NO. 30 - PAGE 146

B. **PUBLIC HEARING TO CONSIDER AN AMENDMENT TO A PREVIOUSLY APPROVED CONDITIONAL ZONING AT 40, 50 AND 60 GERBER ROAD TO INCREASE THE TOTAL NUMBER OF UNITS IN PHASES II AND III BY 22 FOR A TOTAL OF 142 UNITS**

ORDINANCE NO. 4455 - ORDINANCE TO AMEND A PREVIOUSLY APPROVED CONDITIONAL ZONING AT 40, 50 AND 60 GERBER ROAD TO INCREASE THE TOTAL NUMBER OF UNITS IN PHASES II AND III BY 22 FOR A TOTAL OF 142 UNITS

Assistant Director of Planning & Urban Design Alan Glines said that this is the consideration of an ordinance to consider an amendment to the previously approved conditional zoning at 40, 50 and 60 Gerber Road to increase the total number of units in Phases II and III by 22 for a total of 142 units. This public hearing was advertised on September 11 and 18, 2015.

The applicant, Givens Estates, Inc., proposes to develop a multi-family senior housing complex consisting of total of 262 units. The parcel is currently zoned HBCZ having received conditional zoning approval for 240 units of senior housing in 2012. It was under this original approval that the first 120 units included Phase I were issued permits and the site is now currently under construction. Now that financing for Phases II and III are secured, the developer has submitted an application for a conditional zoning amendment that is substantially similar to the 2012 plan but differs with a proposed increase in density for an additional 22 units for a total of 262 units of senior housing, along with some modest layout changes proposed in the development. More specifically, Phases II and III will be increased from 120 to 142 units, split into two phases and two buildings. The following is a breakdown of the properties and phases:

Tract 1 – 40 Gerber Rd. (Pin 9655.26-3627)		
Phase I (2012 plan)	120 units	94 1-BR; 26 2-BR
Tract 2 – 50 Gerber Rd. (Pin 9655.26-7600)		
Phase II (2015 plan)	82 units	60 1-BR; 22 2-BR
Phase III (2015 plan)	60 units	45 1-BR; 15 2-BR
	Total: 262 units (20.5 units/acre)	

Although density is only modestly increased, it had been limited to 240 units by the original 2012 CZ and requires re-consideration and approval by the City Council. Additionally, the affordability details are now better understood with the two new phases which had been included as a consideration demonstrating support for city adopted goals and plans.

All buildings are proposed to be 4 stories and range in overall height between 39 feet up to 43-feet, 4-inches. Collectively, the project includes 262,826 square feet of gross floor area.

All units in Phases I and III are to be affordable and a number of sustainable features are proposed for the multi-family development. Phase II is not included in the affordable unit count but will be made available at "workforce" rates (61-100% of AMI).

The subject property consists of two parcels/tracts totaling 12.75 acres located at 40 & 50 Gerber Road in South Asheville. The large majority of the site had been previously graded and slopes gently up from the front of the property. The site is bordered by properties zoned CBII (Gerber Village and a vacant property to the south) and Industrial (containing a warehouse

distribution facility and accompanying access). The recently approved Palisades multi-family development is located to the south of this site.

Principal access to the site is from Gerber Road with vehicular access to the Gerber Village development to the northwest. Pedestrian connectivity to Gerber Village is also proposed. Sidewalks are provided along Gerber Road in addition to the pedestrian walkways provided throughout the site. 337 vehicular parking spaces are shown with provisions for 18 bicycle parking spaces being noted.

Landscaping is required for this project and includes street trees, parking lot landscaping, building impact landscaping, and tree save area. Landscaping shown on the submitted plans appears to comply. The project is also required a minimum of 15% of open space be provided. The submitted plans satisfy this requirement with a combination of active open space located at the center of the project and passive open space around the perimeter.

This property was previously zoned HBCZ (2012) for a similar sized multi-family development. Prior to the passage of the 2012 conditional zoning ordinance the property was zoned Urban Village; it was a part of the original Gerber Village proposal. Property to the south that was once part of the same parcel as the subject property was recently (2012) rezoned from Urban Village to Community Business II.

Permits for Phase I have been issued under the original 2012 approval and is currently under construction.

The proposal was approved with conditions by the Technical Review Committee on August 17, 2015. A number of TRC comments have been addressed in the submittal received by the Planning & Zoning Commission, and this plan was approved unanimously (6:0) by the Commission at their September 2, 2015, meeting. Additional revisions will be worked out before the final TRC review and before final zoning approval and permit issuance.

No communication had been received from the public at the time of the completion of the staff report.

Adjacent uses include the Gerber Village mixed-use development, a warehousing/light industrial facility, suburban retail strip center, and vacant land. The zoning and use proposed are compatible with other zoning/uses in the immediate area.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

The proposed development supports several goals stated in the *Asheville City Development Plan 2025.* These include: (1) The goal to provide affordable housing; and (2) The goal of providing higher density development in areas close to transportation corridors and services.

The proposal is aligned with the second focus area of the Strategic Plan, *Affordability and Economic Mobility*. The 82 units included in Phase III of the Givens Gerber Park project received 2015 Tax Credits and will remain affordable for a minimum of 30 years. In addition to Phase III, the 120 units in Phase I are also committed to affordability resulting in 202 affordable senior housing units in a locationally efficient area. All of the affordable units are priced to be affordable to those earning below 60% AMI with set asides for those earning below 50% and 30% respectively. The 60 units in Phase II are designed to provide needed housing to an underserved group of seniors earning between 61-100% of AMI and who would not otherwise qualify for any kind of assistance.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Considerations

- 202 affordable units will be created for those earning 60% or less of AMI.
- 60 units will be created for those earning 61-100% of AMI.
- The proposal furthers the goals and objectives of the City's comprehensive plan (infill, locationally efficient, affordable, multi-modal amenities, green space, etc.).
- The project meets City goals of providing affordable infill development in a strategically located area.

Staff recommends approval of the request to amend the current HB-CZ Ordinance allowing minor changes to the site plan along with an increase in density to raise the total number of units from 240 to 262.

Vice-Mayor Hunt opened the public hearing at 6:19 p.m.

Ms. Teresa Stephens, representing Givens, asked City Council for their support.

Vice-Mayor Hunt closed the public hearing at 6:20 p.m.

Vice-Mayor Hunt said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell move to approve the Highway-Business Conditional Zoning Amendment with the new proposed site plan and density allowances, and find that the request is reasonable, is in the public interest and is consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) Places density in strategically located area with close and easy access to employment, transportation, goods and services; (2) The Conditional Zoning will provide 202 affordable units will be created for those earning 60% or less of AMI; and (3) The Conditional Zoning will provide 60 units for those earning 61-100% of AMI. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 30 - PAGE 155

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. RESOLUTION NO. 15-187 - RESOLUTION AUTHORIZING THE CITY MANAGER EXECUTE A REVISED LAND USE INCENTIVE GRANT POLICY

Assistant Director of Community & Economic Development Jeff Staudinger said that this is the consideration of a revised Land Use Incentive Program Policy.

The Land Use Incentive Program (known as the Land Use Incentive Grant, or LUIG) was originally adopted by the City in November 2010; it was amended in March 2011, in 2012 to expand the eligible geographic area, and in 2014 to align more directly with statute and to remove a grantee contingent liability to hold the City harmless if the policy was challenged.

The LUIG was minimally applied for in its first three years; but since 2014 two applications have been approved, and more applications are expected The interest of Council

members in potentially expanding and evaluating the effectiveness of the City's financial investments in affordable housing has led to an assessment of the policy and its goals.

Staff has discussed the program with HCD and PED Committees, the Affordable Housing Advisory Committee, developers and advocates; and has viewed comments on social media. The main point of agreement among all parties was that the policy needed to focus on affordable housing production as its goal, and the revised policy does that. Additional review was provided by the City Attorney.

Key proposed revisions include:

- Added reference to NC Statute allowing for incentives for affordable housing;
- The proposed policy does not allow waiver of eligibility requirements.
- Increase to 15 years minimum affordability, and requirement that units be leased to income eligible households.
- Flexibility on defining an eligible location: The proposed policy removes the .25 mile distance to a named corridor as a threshold, and instead suggests a definition for location and allows for a case to be made if the applicant wishes to deviate from that definition.
- Significant increase in points for affordable housing: As many as 100 points could be awarded for affordable housing
- "Workforce" housing is redefined as housing affordable to, and leased to, households making 100% or less of median income.
- Elimination of eligibility requirement and points for energy efficiency and green building.
- Elimination of points for mixed-use developments.
- Elimination of points for brownfield developments, but statement of flexibility in grant payment when used in conjunction with State Brownfield grants.
- Additional points for "superior" locations.
- Additional points for longer term affordability.
- Clarity regarding rent increases (only in line with City's published affordable and workforce rents).
- Increase maximum grant term to 15 years.
- Grant application process and reporting more clearly defined.

The Housing and Community Development Committee recommends adoption.

Pros:

- The proposed changes would significantly increase the incentive to create affordable housing.
- The scoring process becomes much more simple and predictable.
- Developers may find the program more attractive because of significantly greater incentives to provide affordable housing.

Cons:

- Projects earning more points will pay fewer taxes, having an impact on funds available for the general fund.
- Private developers may find the incentive less attractive because rental income and future value may be reduced due to the longer time period of required affordability.
- While more predictable, the opportunity to negotiate points is reduced.

The nature of the fiscal impact is twofold: first, it supports affordable housing development by delaying the availability of new taxes created by that development, and therefore delaying the general fund benefit of the growth in the City's taxable property base. Secondly, the

rebate of fees would result in a decrease of fee revenue in the year the project received its certificate of occupancy.

Staff recommends adoption of the revised Land Use Incentive Program Policy.

In response to Councilwoman Wisler, Mr. Staudinger if the project is not in compliance within 30 days of being out of compliance, the Land Use Incentive Grant agreement will become null and void and all prior grant funds must be returned to the City.

In response to Councilman Pelly, Mr. Staudinger said that there will be an annual report to City Council providing both a complete rent roll and income and household size of income qualified tenant, and unit number correlated to rent roll, establishing compliance with the Land Use Incentive Grant requirements.

Councilman Smith was pleased to see this piece of the broad comprehensive affordable housing strategy that will create some predictability for builders and also some flexibility on where the land is located.

Mr. Richard Liston felt the numbers are out of line with reality.

Vice-Mayor Hunt said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 15-187. This motion was seconded by Vice-Mayor Hunt and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 275

B. BOARDS & COMMISSIONS

Regarding the Buncombe County Tourism Development Authority, the following individuals have applied for this vacancy: Kelly Prime, Gary Froeba, Michael Adams, John Luckett, Himanshu Karvir and Dennis Hulsing. This vacancy must be an owner or operator of a hotel, motel, bed and breakfast, or vacation rental management company with more than 100 rental units. It was the consensus of Council to interview Mr. Froeba, Mr. Luckett, Mr. Karvir and Mr. Hulsing on October 13, 2015.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Richard Liston commented on the Tourism Development Authority and the need to fix intersections on state roads.

Councilman Davis recognized the Asheville Tourists for being runner up in the South Atlantic League Championship.

Councilman Smith announced early voting begins on September 24 and that the Board of Elections Main Office has moved to 77 McDowell Street.

Results of the September 21, 2015, Civil Service Board Employee Elections

One copy of the results of the Civil Service Board employee election held on September 21, 2015, is to be filed with the City Manager and one with the City Clerk, who shall present such certification to the City Council at its next regular meeting. The Board of Canvassers provided the following certified certificate on September 22, 2015: We do hereby certify, having opened, canvassed, and determined the original returns of the Civil Service Board employee election, the results of the Civil Service Board Employee Election held on September 21, 2015, noting the

name of each person voted for and the number of votes cast for each person as follows: Alan Coxie - 89; Edward M. Hahn 85; Virginia Robinson – 56; and Sean Aardema - 1.

Closed Session

At 6:47 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(a)(3). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3). This motion was seconded by Councilman Pelly and carried unanimously.

At 7:24 p.m., Councilman Bothwell moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

VIII. ADJOURNMENT:

Vice-Mayor Hunt adjourned the meeting at 7:24 p.m.

Magdalen Bullock
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – October 13, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 22, 2015

B. RESOLUTION NO. 15-188 - RESOLUTION AMENDING THE CITY COUNCIL 2015 MEETING SCHEDULE TO INCLUDE THE ORGANIZATIONAL MEETING OF CITY COUNCIL ON TUESDAY, DECEMBER 1, 2015, AT 4:00 P.M. IN THE COUNCIL CHAMBER, LOCATED ON THE 2ND FLOOR OF CITY HALL

RESOLUTION BOOK NO. 37 - PAGE 282

C. RESOLUTION NO. 15-189 - RESOLUTION TO ESTABLISH AN OPEN DATA POLICY FOR THE CITY OF ASHEVILLE FOR SUSTAINING PUBLIC DATA AVAILABILITY USING OPEN DATA STANDARDS

Summary: The consideration of a resolution adopted an open data policy for the City of Asheville for sustaining public data availability using open data standards.

The City of Asheville has long been committed to using technology to create open, transparent, and accessible government. Furthermore, City staff has led the way in open data since 2012. In fact, the City participated in one of the country's first "Open Data Day" activities, and has been recognized as being the first city in the South to implement a publicly-accessible repository of automated open records.

Open data is the automation of data records that are already considered "open" by state law. Open data removes the manual labor associated with providing data and makes city government more efficient by creating a self-service portal that serves interested parties, such as media, business, and interested citizens.

It is well known that open data is helpful with economic development, commerce, entrepreneurship, and a higher level of civic engagement in the community. Open data allows city staff and others to analyze and visualize data in ways that can help the community. For example, the "Asheville Budget App" (avlbudget.org) was created by interested Asheville citizens, not by city staff. Several community events, such as RerouteAVL, OpenHousing, and Hack For Food, were all assisted by the 24x7 availability of open city data. These weekend events would not have been possible if data was only available through city staff, Monday through Friday, 8:30-5:00.

Staff seeks to have City Council endorse open data efforts at the City of Asheville. Interested citizen groups have also expressed interest in seeing City Council pass an Open Data Resolution.

The City Council Governance Committee reviewed this action on August 25, 2015, and supported it moving forward for full Council consideration.

The following are recommended best practices:

1. The most frequently requested structured datasets (that is, data that have rows and columns, rather than document format) shall be prioritized for release.
2. The City's Information Technology Services (ITS) Department will facilitate the process of open data release with all City departments, and will both identify high value data sets for City departments, as well as assist departments in publishing data sets that are identified by each department.
3. When data sets are published, the originating city department, with assistance from ITS, should provide descriptive information (i.e. metadata) about each dataset to facilitate the search and understanding of the content of open datasets

Pros:

- Compliance with state law regarding open records
- Efficiency regarding fulfillment of open record requests
- Creates opportunities for the community to collaborate with City government
- Increased customer service, decreased turnaround time through self-service access to City data
- Low cost of implementation

Cons:

- None noted

It is difficult to precisely assess the impact of open data on both the economy and on the City budget. However, it is fairly obvious that manually satisfying record requests is dramatically more expensive in terms of labor than an automated process. Moreover, tools that take advantage of open data (such as SimpliCity) have been reported to save local business significant labor over time.

City Staff recommends City Council direct the City Manager to adopt a resolution establishing an open data policy for the City of Asheville for sustaining public data availability using open data standards.

RESOLUTION BOOK NO. 37 - PAGE 283

D. RESOLUTION NO. 15-190 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH THE N.C. GOVERNOR'S HIGHWAY SAFETY PROGRAM FOR A GRANT TO FUND YEAR 3 OF THE MULTI-JURISDICTIONAL DWI TASK FORCE INVOLVING THE ASHEVILLE POLICE DEPARTMENT AND THE BUNCOMBE COUNTY SHERIFF'S OFFICE

ORDINANCE NO. 4456 - BUDGET AMENDMENT FOR THE THIRD YEAR OF A GRANT FOR MULTI-JURISDICTIONAL DWI TASK FORCE

Summary: The consideration of (1) a resolution authorizing the City Manager to enter into a contract with the North Carolina Governor's Highway Safety Program (NCGHSP) for a grant to fund year 3 of the multi-jurisdictional DWI Task Force involving the Asheville Police Department (APD) and Buncombe County Sheriff's Office (BCSO); and (2) a budget amendment in the amount of $411,331 to establish a budget for the third year of the grant.

In Asheville and Buncombe County, the number of impaired drivers has been a serious concern to citizens and law enforcement for many years. Since 2010, there have been 4,434 DWI arrests by Buncombe County law enforcement agencies, more than 1,024 traffic collisions that have involved impaired drivers and 18 fatal collisions as a result of an .08 Blood Alcohol Content (BAC) or higher.

In reviewing these statistics, the NCGHSP contacted APD and suggested a DWI Task Force with a goal of reducing the number of DWI related collisions, injuries and deaths in Asheville and Buncombe County, as well as educating the public on impaired driving and its effects. A request for continuation of year 3 of a 4 year grant in the amount of $411,331 in FY 2016 that would cover the of cost, to pay for six officers on DWI enforcement and training. These six officers would conduct targeted DWI enforcement throughout Asheville and Buncombe County and conduct DWI, seat-belt and night-time traffic safety checking stations throughout the County. Under this grant, APD would supply one sergeant and three officers while BCSO would supply two officers. The appointed officers would also hold educational events at local high schools that would focus on teen driving safety, impaired driving, distracted driving and seat-belt compliance. The City of Asheville and Buncombe County are responsible for a total grant match of 30% or $123,399. The City's share of this match will total $80,197 in FY 2016.

This grant proposal was reviewed at the Finance Committee meeting on September 22, 2015, and recommended it be forward to the full Council.

Pros:

- NCGHSP grant funds used to pay for training and pay 70% of the costs of salary and benefits to officers participating in the DWI Task Force.
- Potential reduction in impaired driving collisions, injuries and deaths throughout Asheville and Buncombe County.

Cons:

- Funding from NCGHSP is evaluated annually and not fully guaranteed beyond the first year.
- In year three (3), the City of Asheville will be required to match 30% of the personnel costs. The grant funding will incrementally decrease each year and after the four-year funding period, 100% of the personnel costs will be the City of Asheville's responsibility.

As noted above, the general fund impact in FY 2015-16 is $80,197. This amount is already included in the Police Department's adopted FY 2015-16 budget. At the end of the grant, the general fund impact would be approximately $267,325 per year to permanently add one sergeant and three officers to the APD roster, and to provide their equipment as needed. The chart below outlines the general fund impact over the remainder of the grant.

Year 3	FY 2016	$80,197
Year 4	FY 2017	$133,662
Year 5	FY 2018	$267,325

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to enter into a contract and accept grant funds through the North Carolina Governor's Highway Safety Program; and (2) a budget amendment in the amount of $411,311 to establish a budget for the third year of the grant.

RESOLUTION BOOK NO. 37 - PAGE 285

ORDINANCE BOOK NO. 30 - PAGE 163

E. RESOLUTION NO. 15-191 - RESOLUTION APPROVING CO-SPONSORSHIP OF THE AFFORDABLE CARE ACT OPEN ENROLLMENT KICK-OFF SPEARHEADED BY PISGAH LEGAL SERVICES

Summary: The consideration of a resolution approving co-sponsorship with Pisgah Legal Services and other partners for the Affordable Care Act Open Enrollment event on November 7, 2015, at the US Cellular Center.

In November of 2014, the City of Asheville co-sponsored the Affordable Care Act Open Enrollment Event at the US Cellular Center. The event will again be hosted by The ACA Partners of WNC (Blue Ridge Community Health Services, Council on Aging of Buncombe County, Legal Aid of North Carolina, Mountain Projects, Inc., Pisgah Legal Services, Western Carolina Medical Society and Western North Carolina Community Health Services).

Pros:
- Continued partnerships with outside agencies.
- Opportunity for residents of Asheville and Buncombe County to get information about health insurance coverage.

Cons:
- None

Pisgah Legal Services is paying $500 which is $1000 less than the standard rate for the room during a normal event. All of the City's 'hard costs' are covered with this.

City staff recommends City Council approval of a resolution authorizing the City Manager to co-sponsor the Affordable Care Act Open Enrollment event on November 7, 2015, at the US Cellular Center.

RESOLUTION BOOK NO. 37 - PAGE 286

F. RESOLUTION NO. 15-192 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH J & E CONCRETE CONSTRUCTION LLC FOR THE CONCRETE MAINTENANCE AND ADA IMPROVEMENTS FOR FISCAL YEAR 2016

Summary: The consideration of a resolution authorizing the City Manager to execute a contract in the amount of $165,448.50 with J & E Concrete Construction, LLC. for the project known as Concrete Maintenance and ADA Improvements FY16, City of Asheville Project #CPM-15-16-001, and further authorizing the execution of any change orders to said contract which may arise during execution of said project up to the budgeted amount of $200,000.

This contract is our annual Concrete Maintenance Contract. It will be used to address sidewalk issues primarily along Merrimon Avenue and its adjacent streets. This area has a number of issues and has not been heavily addressed with previous contracts. The project was advertised on July 30, 2015, and bids were opened on August 27, 2015, with the following results:

J & E Concrete Construction, LLC, Harmony, NC	$165,448.50
Patton Construction Group, Arden, NC	$233,176.00
Armen Construction, Charlotte, NC	$237,749.00
Appalachian Paving and Concrete, Swannanoa, NC	$287,280.00

Pros:

- Will correct a number of sidewalk issues, primarily on the Merrimon Avenue corridor.
- Addresses pedestrian safety by providing the required sidewalk maintenance.

Cons:

- Project management and contract administration will consume staff time.
- Will not address the complete backlog of sidewalk maintenance work orders.

$200,000 was budgeted for concrete repair and maintenance in the general fund. This amount was approved by City Council and included in the Fiscal Year 2015-16 budget.

City staff recommends City Council adopt the resolution awarding the contract to J & E Concrete Construction, LLC. and authorizing the City Manager to execute a contract in the amount of $165,448.50 with J & E Concrete Construction, LLC for the project known as Concrete Maintenance and ADA Improvements FY 16 and further authorizing the execution of any change orders to said contract which may arise during execution of said project up to the budgeted amount of $200,000.

RESOLUTION BOOK NO. 37 - PAGE 287

G. RESOLUTION NO. 15-193 - RESOLUTION AUTHORIZING THE CITY MANAGER ENTER INTO A CONTRACT WITH MCGILL ASSOCIATES PA FOR THE 2015 MEDIAN MAINTENANCE PROJECT

Summary: The consideration of a resolution authorizing the City Manager to execute a contract with McGill Associates, PA, for the amount of $58,200.00 plus 10% contingency and any change orders within the project budget for the project known as 2015 Median Maintenance Project, City of Asheville Project # CPM-14-15-012.

The City of Asheville has many median and bulb-out locations in City rights-of-way that need landscape improvement and maintenance. This project will address these locations in stages, beginning with locations located within the City's Central Business District and with additional locations within the City addressed in subsequent years. For each site this project includes a basic schematic, an assessment of the existing vegetation, recommendations for appropriate plants, and development of a maintenance plan including care and maintenance of existing and proposed plantings. The maintenance plan will serve as the basis of a subsequent and separate landscape maintenance bid package.

A request for qualifications (RFQ) for this project was initially advertised on April 17, 2015, and responses were received from design teams led by the firms listed below.

Design Workshop	Asheville, NC
Equinox Environmental	Asheville, NC
McGill Associates	Asheville, NC
The Jaeger Company	Athens, GA

Following an evaluation process as described in the RFQ, McGill Associates was selected based on their company's experience and qualifications, the experience of their project manager and key personnel, and the company's project understanding and approach. Fee negotiations between the City and McGill Associates resulted in the contract price of $58,200.00. Adding a 10% contingency, the total required budget for construction is $64,020.00. The work produced from this contract would resolve issues associated with driving safety and pedestrian facilities. The work complies with the City of Asheville's Strategic Operating Plan Focus Area 1 Goal 2, and Focus Area 3 Goal 1.

Pros:

- Ensures pedestrian and driver safety.
- Confirms investment in community infrastructure

Con:

- Project management and contract administration will consume staff time.

Funding for this contract was included in the FY 2015-16 adopted Public Works Department general fund budget.

City staff recommends City Council adopt the resolution awarding the contract to McGill Associates, PA, and authorizing the City Manager to execute on behalf of the City of Asheville a contract in the amount of $58,200.00 plus a contingency of 10% ($5,820.00), for a total of $64,020.00, with McGill Associates, PA for the project known as 2015 Median Maintenance Project.

RESOLUTION BOOK NO. 37 - PAGE 288

H. RESOLUTION NO. 15-194 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO FUND THE METROPOLITAN PLANNING PROGRAM, SECTION 5303 OF THE FEDERAL TRANSIT ADMINISTRATION

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) to fund the Metropolitan Planning Program, Section 5303 of the Federal Transit Administration (FTA).

The FTA Section 5303 Metropolitan Planning Program is part of the annual Unified Planning Work Program (UPWP) of the French Broad River Metropolitan Planning Organization (FBRMPO), which outlines transportation planning tasks to be performed by the FBRMPO. The Metropolitan Planning Program is designated to pay exclusively for transit planning activities, such as grants administration and reporting activities, short range and long range transit planning, transportation improvement program preparation, Title VI and DBE programs, and planning and operational analyses. The funds are used to supplement the Transit Projects Coordinator position (90% of the grant) and a portion of the Transportation Manager position (the remaining 10%) for time spent on transit planning.

This funding makes possible to have dedicated staff developing and engaging in complex processes such as the transit master plan implementation, and to develop programs required by the Federal Transit Administration for recipient and subrecipients to ensure compliance with federal regulations.

FY 2015-16 funding totals $75,000. The subject grant will provide 80% of the anticipated funding ($60,000), the North Carolina Department of Transportation will provide 10% ($7,500), and the City will provide the remaining 10% ($7,500). The grant funding and the City's local match in the amount of $7,500 are currently budgeted in the Transportation Department's approved budget for the current fiscal year.

The Transit Committee supports the subject action.

Pros:

- The subject grant supplements funding for two existing positions.
- The subject grant enables the City of Asheville to use $67,500 in Federal and State funds for transit planning activities. Transit planning activities include but are not limited to: analysis of transit data, implementation of the transit master plan, route development and scheduling; operational improvements, development of the Title VI and DBE programs;

development of specifications related to transit products; bus stop program and shelter installation.

Con:

- A 10% local match in the amount of $7,500 is required.

The total grant funding for Fiscal Year 2015-16 is $75,000. The City is required to provide a 10% local match in the amount of $7,500. The anticipated grant funding and the City's local match in the amount of $7,500 are currently budgeted in the Transit Services fund.

City staff recommends that City Council adopt a resolution authorizing the City Manager to enter into an agreement with the North Carolina Department of Transportation to fund the transit planning program, Section 5303 Metropolitan Planning Grant of the Federal Transit Administration for FY 2015-16.

RESOLUTION BOOK NO. 37 - PAGE 289

I. ORDINANCE NO. 4457 - BUDGET AMENDMENT FOR ENHANCED MOBILITY OF SENIORS AND INDIVIDUALS WITH DISABILITIES FEDERAL GRANT, SECTION 5310

Summary: The consideration of a budget amendment in the amount of $444,299 to set up the project budgets for the Enhanced Mobility of Seniors and Individuals with Disabilities Federal grant, Section 5310.

The City of Asheville is the designated recipient of the Enhanced Mobility of Seniors and Individuals with Disabilities program, which is a program of the Federal Transit Administration (FTA). This is a formula grant program oriented to improve mobility for seniors and individuals with disabilities by removing barriers to transportation service and expanding transportation mobility options.

The projects to be funded include: the Call a Ride, Council on Aging program; the Senior Companion, a Land of Sky program; supplemental elderly and disabled transportation assistance, a Buncombe County program; paratransit services, a City of Asheville program, and the City of Asheville's administrative costs.

This is a new program of the Moving Ahead for Progress (MAP) 21 transportation bill passed by Congress in 2012 that consolidated the Elderly and Disabled program that distributed funds to the states and the New Freedom program that was a formula program in which the City was the region's designated recipient.

To be eligible, the program requires an intensive planning process and the development of a Coordinated Public Transportation and Human Services Transportation Plan or CTP-HSTP based on community participation. The CTP-HSTP was developed in conjunction with the French Broad Metropolitan Planning Organization (MPO), Buncombe, Henderson and Haywood Counties, human services agencies, public and private transportation providers, the North Carolina Department of Transportation and the general public to assess current transportation needs, identify gaps and to set goals.

The plan was approved on March 29, 2012, by the French Broad River MPO's governing body (the Board), which includes elected representatives from each of the eighteen local governments which make up the MPO. The CTP-HSTP set the region's priorities and identifies needs; the projects were selected on April 23, 2015, through a competitive process led by the MPO.

The projects below were selected as city's sub-recipients for the 5310 program. The projects are listed as follows:

Sub-Recipient	Project	Amount funded	Sub-Recipient's match
Buncombe County	Supplemental elderly and disabled assistance	$66,126	$66,126
Council on Aging	Call a Ride	$27,548	$27,548
Land of Sky	Senior companion program	$54,000	$54,000
City of Asheville	ADA paratransit	$99,401	$24,850
City of Asheville	Program Administration	$24,700	N/A

The city needs to set up project budgets in order to pass through the funds and will seek reimbursement directly from the FTA. The sub-recipients will be responsible for the match.

The City will be responsible for the Program Management and, as designated recipient, to oversee the use of the funds according to FTA regulations. The program management will require the use of city resources, mainly staff. As a designated recipient the city will use $24,700 for administration purposes, which will cover the program management expenses for a period of one year.

Pros:

- Project funding is provided by the FTA, 50% for operating projects and 80% of capital projects. The sub-recipients are responsible for the local match.
- The city can use $24,700 for administration purposes.

Con:

- The project cost is $444,299, of those $271,775 are federal funds and the city will seek reimbursement from FTA.

The total financial impact for the subject projects is $444,299 and it will be funded with Federal Funds. $24,700 will be reimbursed to the city for administrative costs.

Staff recommends that City Council adopt a budget ordinance amendment in the amount of $444,299 from Federal Funds to setup the project budget for Job Access and Reverse Commute project, including the administrative costs.

ORDINANCE BOOK NO. 30 - PAGE 165

J. RESOLUTION NO. 15-195 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN INTERLOCAL AGREEMENT WITH THE CITY OF ROCKY MOUNT FOR THE PROCUREMENT OF TRANSIT BUSES

Summary: The consideration of a resolution authorizing the Mayor to inter into an inter-local agreement with the City of Rocky Mount for the procurement of buses.

Local governments may team up with each other under the interlocal cooperation authority contained in Chapter 160A, Article 20, Part 1 of the North Carolina General Statutes. Under this authority, local governments can accumulate their requirements and obtain lower prices on buses that would not be affordable for one unit acting alone. .

The City of Rocky Mount Transportation Authority will issue an invitation for bids to procure replacement buses for its public transit fleet. The City of Asheville and its Management Company, First Transit has communicated with Rocky Mount as to the specifications and requirements for the City of Asheville transit fleet. Rocky Mount has incorporated the City of Asheville specifications and requirements into the cooperative bid document.

The City of Rocky Mount will act as the lead procuring agency and will handle the bid opening and award the contract o the successful Vendor in accordance with applicable North Carolina and Federal law.

This matter was presented to the Transit Committee on October 6, 2015, and they recommended to pursue this alternative. The matter will be presented to the Multi-Modal Commission on October 28, 2015.

Pros:

- Partnering with the City of Rocky Mount will save staff time and resources and will allow city staff to purchase a 35 foot bus immediately after the bid is awarded, as the city has already received funding to acquire the first one of these.
- The city is not committing financial resources in pursuing this opportunity and has the option to reject the award.

Con:

- None at this time.

This action does not have any fiscal impact.

City staff recommends City Council adopt the resolution authorizing the Mayor to enter into an Interlocal Agreement with the City of Rocky Mount to procure transit buses.

RESOLUTION BOOK NO. 37 - PAGE 290

K. RESOLUTION NO. 15-196 - RESOLUTION ACCEPTING THE ANNUAL REPETITIVE LOSS AREAS ANALYSIS REPORT

Summary: The consideration of a resolution accepting the annual Repetitive Loss Area Analysis report which identifies actions staff has taken since becoming a member of the Community Rating System (CRS) Program.

The City of Asheville joined the Community Rating System (CRS) program administered by the Insurance Services Office (ISO) last year. As required by the CRS program, a Repetitive Loss Area Analysis (RLAA) to supplement the Buncombe's County-wide All Hazards Mitigation Plan was prepared last year by the consultation firm of Brown and Caldwell.

A Repetitive Loss Area (RLA) is defined as an area that contains one or more repetitive loss structures (two or more claims of more than $1,000 that have been paid by the National Flood Insurance Program (NFIP) within any 10-year period since 1978). The RLAA is a mitigation plan developed for those areas with the purpose of reducing damages and increasing awareness from flooding and lowering the cost of claims submitted to the NFIP. The ultimate goal of lowering these costs is to reduce the consistent increase in flood insurance premiums that has been occurring for a number of decades.

The Community Rating System (CRS) is a program administered by the Federal Emergency Management Agency (FEMA). It provides lower insurance premiums under the National Flood Insurance Program. The premium reduction is in the form of a CRS Class. A 5 percent reduction is received by policy holders for each class reduction the community obtains. The classes are obtained by actions that are above and beyond the requirements of the National Flood Insurance Program administered by FEMA. The benefits of joining the Community Rating System has been a reduction of flood insurance premiums paid for by those citizens who have flood insurance. Currently, the citizens of Asheville receive a 10 percent reduction in their flood insurance premiums because Asheville is a participant in the CRS program.

In order to maintain the current status in the CRS program, staff is required to provide to council the annual report of the Flood Mitigation Actions Items that were part of the RLAA report from Brown and Caldwell adopted by Council on December 10, 2013. As highlighted in the report, staff continues to look for ways to reduce flooding and damage from floods through community awareness through our website and flyers, staff is working with the Army Corps of Engineers on opportunities within the Swannanoa River Basin for flood mitigation opportunities and city staff works with developers and property owner on ways to protect their properties from flooding.

Pros:

- The citizens of Asheville will continue to receive a 10 percent reduction on their flood insurance program.
- Provides higher level of protection through our current flood ordinance
- Promotes public education of the Special Flood Hazard Areas

Con:

- Considerable amount of staff time is necessary to maintain these requirements.

There is no additional fiscal impact to continuing the efforts necessary for the CRS program, staff time is currently programmed into the annual budget.

City staff recommends City Council adopt a resolution accepting the annual Repetitive Loss Area Analysis.

RESOLUTION BOOK NO. 37 - PAGE 291

L. ORDINANCE NO. 4458 - BUDGET AMENDMENT FROM INSURANCE RECOVERY FUNDS FOR A NEW TRAFFIC SIGNAL POLE IN BILTMORE VILLAGE

Summary: The consideration of a budget amendment in the General Fund in the amount of $10,526.40 from insurance recovery funds from a damaged traffic signal pole to utilize towards the purchase of a new traffic signal pole.

On March 24, 2015, a City of Asheville (City) traffic signal pole was knocked down by a third-party in the Biltmore Village after which a temporary traffic signal control was installed for traffic safety purposes. Recently, the City settled the property damage claim for $10,526.40 and the Transportation Department seeks to utilize the settlement funds to purchase a permanent traffic signal pole.

Pro:

- Provides funding for Transportation Department traffic signal pole purchase.

Con:

- None.

The insurance recovery funds will be received in the City's Property & Liability Fund and then be transferred to the General Fund, from which the traffic signal pole purchase will be made.

Staff recommends City Council adopt the budget amendment in the General Fund in the amount of $10,526.40 from insurance recovery funds to be utilized towards the purchase of a traffic signal pole.

ORDINANCE BOOK NO. 30 - PAGE 167

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Bothwell moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Wisler and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. SIMPLICITY

Director of Information Technology Jonathan Feldman recognized Business & Public Technology Manager Scott Barnwell, Analyst Cameron Carlyle and Media Specialist Dan Phairas for their assistance in the City's winning Technology Award for its SimpliCity search engine during the Code for America Summit Oct. 2 in Oakland, Calif.

Mr. Feldman then explained that launched in June, SimpliCity makes city data easy to find. SimpliCity's tagline is "city data simplified" and it provides easy access to city data through a single search bar.

Powered by open data and developed with Lean Startup and usability principles, the focus of SimpliCity is to answer questions of interest in the simplest manner possible. Citizens can track crime and development near their home, and get answers to simple questions. City employees can quickly determine if an address falls within city limits before issuing a permit. Both the citizen and employee experience is designed to be quick, simple, self-service and easy.

In the past, cities provided an overwhelming amount of information through dense and frustrating portals and PDFs. SimpliCity is so easy that anybody with a smart phone can use it.

B. LEGISLATIVE UPDATE

Mayor Manheimer said that the 2015 Long Session ended on September 30, 2015.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING FOR PROPERTY LOCATED AT 852 (9999) HENDERSONVILLE ROAD FROM HIGHWAY BUSINESS DISTRICT AND OFFICE DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION FO A SELF-STORAGE FACILITY, WITH CONDITIONS MODIFYING REQUIREMENTS FOR THE LOCATION OF STREET TREES, REDUCING PARKING COUNTS, AND REDUCING BUILDING SETBACKS

At the applicant's request, Councilman Bothwell moved to continue this public hearing until November 10, 2015. This motion was seconded by Vice-Mayor Hunt and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 509 BILTMORE AVENUE FOR THE CONSTRUCTION OF A 12-STORY TOWER ADDITION TO THE MISSION HOSPITAL FACILITY

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Currin reviewed with Council the conditional use permit hearing process which is a quasi-judicial permit hearing. At this public hearing, all the testimony needs to be sworn and due process protections afforded to the applicant.

After hearing no questions about the procedure, Mayor Manheimer opened the public hearing at 5:20 p.m.

Urban Planner Jessica Bernstein submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Bernstein said that the applicant, Mission Health Inc. & Memorial Mission of Western North Carolina, is requesting review of site plans for the construction of a 12-story, 681,000 square foot tower addition to the Mission Hospital facility (Attachment to Exhibit 3 - Location Map). This project is considered a Level III review pursuant to Section 7-5-9(a) of the city's Unified Development Ordinance (UDO), which designates review for institutional projects with more than 100,000 square feet of gross floor area. Level III projects are reviewed as Conditional Use Permits.

The site consists of three parcels with a combined area of over 30 acres (PINs 9648.43-8750; 9648.43-3912; 9648.44-5476), located at 509 Biltmore Avenue (Attachment to Exhibit 3 - Overall Master Plan). The project area (approximately 7.6 acres) has frontage on multiple City streets (Biltmore Avenue, Hospital Drive, Victoria Road) as well as internal private drives (Lily Carmichael Drive, Anna Woodfin Drive, Rose Chapman Drive) and is occupied by multiple hospital buildings and parking structures. The site and surrounding parcels are zoned Institutional.

The applicant is proposing to demolish several existing parking areas and structures to construct a new 12-story medical tower (10 levels above ground). The building is shown as 681,000 square feet with a height of approximately 214 feet. The proposal includes several new points of access into the site from Victoria Road as well as reconfiguration of internal vehicular flow, patient drop-off points and new parking for the emergency department and main hospital entrance.

Currently, access to the emergency department is from Biltmore Avenue and the primary entrance for the hospital by the public is from Victoria Road. The proposal creates a completely new emergency department in the new tower with a relocated vehicular entrance from Victoria Road (in the location of the current access off of Victoria Road). There would be a new main entrance for all other hospital users southwards on Victoria, across from Livingston Street (the City is undertaking an intersection improvement in this location as part of a separate project). This proposed main hospital entrance allows access to the new emergency department, to the surgery drop-off area, and to Lily Carmichael Drive, Anna Woodfin Drive and the main (west) parking deck.

Ambulances and emergency vehicles are shown to have an entrance/access to the emergency department that is separate from the main public entrance, and will enter via the MAHEC bridge over Biltmore Avenue (existing access points).

There is also a proposed access for service and delivery vehicles from Hospital Drive into the lower levels of the tower.

According to submitted plans, this project results in a net loss of approximately 130 parking spaces. The proposal adds approximately 101 public spaces at the new emergency department, eight spaces at the main entrance and 30 spaces at the ambulance drop-off, primarily for ambulances, doctors and emergency personnel (a total of approximately 139 spaces created). Plans indicate that the overall hospital parking count will be 4,070 at the completion of this project. Because the UDO does not provide an off-street parking category for hospital campus uses, an interpretation has been created using peer data and the American Planning Advisory Service Report Number 432 (Off-Street Parking Requirements, following the process in Section 7-11-2(c)(1) and as a result, parking is considered adequate and compliant.

There are existing sidewalks along all project frontages (Biltmore Avenue, Hospital Drive and Victoria Road). Additionally, there are new walkways shown into the site from Victoria Road to route pedestrians along the new main entrance. Currently the S1, S2, S3 and S5 bus routes serve the hospital and are proposed to remain.

Landscaping required for the project includes street trees, parking lot, parking deck and building impact landscaping as well as retaining wall screening.

The proposal includes significant new retaining walls along the Biltmore Avenue and Hospital Drive frontages for the new emergency department parking area as well as another significant wall around the new main entrance drop-off (up to 20 feet in height). Walls as shown along Biltmore Avenue and Hospital Drive reach up to approximately 28 feet in height and will be reviewed for detailed technical compliance at the Final Technical Review Committee (TRC) submittal.

The project proposes to comply with urban open space standards in the UDO, which require five percent of the project area to be designated and this is being accommodated in a number of hardscaped and landscaped plazas, courtyards and waiting areas around the new development.

A detailed staging plan has been provided, showing the anticipated phasing of vehicular and pedestrian access as well as crane locations. The phasing and construction staging will be an ongoing discussion between multiple City departments as the project continues through the review and permitting processes.

The site is currently zoned Institutional; the use proposed is permitted by-right and the applicant is proposing to meet the standards of the District with this development proposal.

This proposal was approved with conditions by the TRC on August 17, 2015, and requires quasi-judicial review by City Council and Final TRC review prior to zoning approval (Attachment to City Exhibit 3 - Building Perspectives); (Attachment to City Exhibit 3 - Proposed Public Plaza Design); and (City Exhibit 4 - Marked Drawing No. 1 - Sketch of Corner of Biltmore Avenue).

The Planning & Zoning Commission reviewed the proposal at their meeting on September 2, 2015, and several Commissioners expressed concerns about the lack of activity and interaction of the proposal with Biltmore Avenue and Hospital Drive and the impact to the pedestrian experience on these frontages. Ultimately there was a unanimous recommendation to support the project but with added conditions to better conform with numbers four and five of the

conditional use permit standards. These are: 1) that the applicant work to address the pedestrian access from Biltmore Avenue; and, 2) that the applicant should address the proposed structure walls along Hospital Drive and Biltmore Avenue.

In response to staff and the Planning & Zoning Commission concerns, the applicant has revised the area along the corner of Biltmore Avenue and Hospital Drive to include a redesigned plaza with wider sidewalks, a planting strip along a portion of Biltmore Avenue, hardscaped courtyard areas with seating and wayfinding as well as space for a transit shelter. Staff's assessment of the overall project, including the proposed plaza, as related to the conditional use standards is described in further detail below.

Staff met with the applicant on numerous occasions in order to address the conditional use standards as described in further detail below.

Conditional Use Findings: Section 7-16-2(c) of the Unified Development Ordinance (UDO) states that Asheville City Council shall not approve the conditional use application and site plan unless and until it makes certain findings based on the evidence and the testimony received at the public hearing or otherwise appearing in the record of the case. The applicant has provided a statement on these findings.

Staff has concerns with the project's ability to fully comply with the following conditional use permit standards:

- *Standard One: That the proposed use or development of the land will not materially endanger the public health or safety.*
    - Staff has some concerns with pedestrian safety around the southernmost and eastern perimeters of the project area.

- *Standard Two: That the proposed use or development of the land is reasonably compatible with significant natural and topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.*
    - There are grade changes in the immediate vicinity and in order to coordinate and connect the internal workings of the proposed tower with the existing hospital buildings, the proposed plan results in the building being set back from Biltmore Avenue/Hospital Drive 30-60', leading to retaining walls up to 28' with the raised parking surface above. Mitigation measures are needed to better integrate the proposed grade changes with the existing pedestrian environment.

- *Standard Four: That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.*
    - The character of area is institutional in nature and largely consists of medical and hospital uses and related offices. These uses flank both sides of Biltmore Avenue, Hospital Drive, Victoria Road and McDowell Street. Residential neighborhoods are located between McDowell and Biltmore, as well as behind the commercial and office uses that are located along the main arterials. Asheville High School is located southwest of the subject site. Biltmore and McDowell are connectors between the commercial nodes of the Central Business District and Biltmore Village and experience large vehicular volumes, and contain multiple transit routes. There is also considerable pedestrian traffic flowing along the Biltmore Avenue corridor, as well as related to the neighborhoods and the employees and visitors at the hospital and surrounding offices. This level of activity results in a character for the area that is busy throughout the day. The development in the areas varies from urban-style buildings at the back of the sidewalk as well as medical offices that follow a more suburban pattern with

parking in between the building and the street. There are larger parcels along Biltmore Avenue heading north towards downtown, currently larger expanses of surface parking, where redevelopment is anticipated in the future.

- The proposed development faces internally, along Victoria Road, leaving an undeveloped, un-activated corner at Biltmore and Hospital Drive. While there are some examples of larger setbacks and inactive frontages in the general area, these are more from an outdated development pattern and do not reflect the active nature of this urban neighborhood corridor.
- The tower building is proposed to be approximately 214 feet in height, or 12-stories (10-levels above ground) and approximately 681,000 square feet. This structure is significantly larger than any building in the vicinity. The adjacent hospital building is 5-7 stories and most of the buildings in the area vary between one and five levels. This proposal can be considered as out of scale with the area in which it is located but staff recommends mitigating the increase in scale by ensuring a human-scale is respected at the ground level. There are large, vegetated setbacks and retaining walls up to 28 feet along Biltmore Avenue, Hospital Drive and Victoria Road which limits integration of the project with the pedestrian realm.

- *Standard Five: That the proposed use or development of the land will generally conform with the comprehensive plan, smart growth policies, sustainable economic development strategic plan, and other official plans adopted by the city.*
  - The land use and transportation section of the 2025 Asheville City Development Plan notes that Biltmore Avenue at this location is considered an "Urban Neighborhood Corridor" which "connects neighborhoods with each other, with employment centers, with institutional uses and with major thoroughfares. Mixed-use structures, typically 2-4 stories in height, contain retail, office and residential uses that serve and are completed by adjacent neighborhoods. Sidewalks, streetscape and building design acknowledge and provide a safe environment for the significant pedestrian users of the urban/neighborhood corridor". Also, the smart growth policies throughout the comp plan highlight infill development, mixed-use buildings and thoughtful use of spaces for pedestrians and transit users as well as encouraging "human-scale design, compatibility with the existing urban context". Development along the corridor is encouraged to be mixed-use, buildings permitted to front on the street, follow urban-style of architecture and provide a high-quality intentional streetscape design.

- *Standards, Two, Four and Five:*
  - Related to the ability to comply with standards two, four and five, staff has concerns with the void of pedestrian activity or human-scale interest created by the large setbacks and tall structure walls along Biltmore Avenue and Hospital Drive and how that impacts character, scale, compatibility and interconnectivity especially from the pedestrian perspective along this urban neighborhood corridor as described in multiple sections of the 2025 Comprehensive Plan.

- *Standard Six: That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.*
  - There are multiple routes in the immediate area but no existing shelters.

To lessen the impacts of this development and to better comply with the standards referenced above:

- Staff recommended the redesign of the southwest corner of Biltmore Avenue and Hospital Drive in order to allow for greater activation and interaction, such as a liner building, an urban plaza space and aesthetic treatments to the retaining walls to maintain a consistent and more urban streetscape along Biltmore

Avenue, improve the pedestrian experience, and mitigate the large scale of the proposed tower and associated retaining wall at this location. Understanding the challenges with providing a liner building at this time, the applicant has agreed to work with the city to evaluate future opportunities along the Biltmore Avenue corridor that enhance the pedestrian environment, street-level activity and human-scale interest.

- In response to this recommendation, the applicant has proposed a hardscaped public plaza with widened sidewalks, street trees within a buffer planting strip between the sidewalk and street, seating opportunities with specialty paving and benches, possible wayfinding and public art, and an integrated bus shelter. Staff acknowledges that creating a direct pedestrian access from the street level up into the parking area above is problematic on several levels including topographic challenges, security and pedestrian safety, and as such, this has not be included in the applicant's redesign.

- Staff suggests that regarding the retaining/structural walls along Biltmore Avenue, Hospital Drive and Victoria Road, for sections of wall with a height greater than 10 feet, not less than 40 percent of the wall area will be treated with aesthetic measures to mitigate the mass and scale (treatments may include, but are not limited to, green-screen, change in materials, articulations or variations in the plane of the face of the wall, fenestrated openings, etc.)

- Staff suggests that the applicant create crosswalks at the driveway entrances at Granby, including ADA curb ramps along this section where there is currently no accessibility for continuing south.

- Staff recommended that a transit shelter be incorporated into the design on Biltmore Avenue, south of Hospital Drive. The applicant currently shows this shelter on the proposed plaza drawing.

- Additionally, because the main entrance to the hospital will be from Victoria Road, staff recommends that the hospital partner with the City and provide a transit shelter at the stop at Livingston Street to address the transit needs from this side of the project area.

Staff's finds that the project as proposed can be considered technically compliant with the UDO (or can be made so through the clarifications as listed in the TRC staff report). However, as noted above, there have been concerns expressed regarding context, character and compatibility along the Biltmore Avenue corridor and Hospital Drive and staff has provided suggested mitigation conditions above as allowed for in Section 7-16-2 of the UDO.

When Mayor Manheimer suggested a stairwell from the parking area to the urban plaza space at the intersection of Biltmore Avenue and Hospital Drive, Ms. Bernstein said that staff met with the developer to see how that could be accomplished.. However, it would be approximately 28 feet from the parking area to the plaza, which would require significant stairwells and a challenge to get those stairs in within the allotted space. In addition, the second challenge would be that the top of the pedestrian stairs would dump pedestrians into the Emergency Room parking lot, which would cause safety and security challenges.

In response to Vice-Mayor Hunt, Ms. Bernstein showed how pedestrians have to access the Emergency Room, which is no change from now from Biltmore Avenue (approximately a 5 minute walk). However, there is another transit line on Livingston Street and with the proposed changes to Livingston Street, staff proposed to the applicant if they would fund a transit shelter at that location and they were amenable to that. There are other opportunities to get to the Heart Center from other locations on Biltmore Avenue, but not to the Emergency Room.

When Vice-Mayor Hunt asked which of staff's recommendations are still outstanding, Ms. Bernstein said that it was her understanding the only outstanding item is the suggestion that the applicant create crosswalks at the driveway entrances at Granby, including ADA curb ramps along this section where there is currently no accessibility for continuing south.

City Attorney Currin confirmed that a number of the suggested conditions of staff appear in City Exhibit 4 (Drawing No. 1). Ms. Bernstein said that the only suggested conditions not reflected on the official submitted plan documents are (1) the green screen treatment; (2) the crosswalks at the driveway entrance at Granby, etc.; and (2) the transit center on Livingston Street, because it is actually off-site.

Councilman Bothwell felt that the City should revisit the way parking is calculated for large (in this case, hospital campus uses) in the future.

Mr. Derrick Allen, attorney representing Mission Hospital, asked to submit City Exhibit 4 (Drawing No. 1) as a part of the conditions that they want a part of their conditional use permit application.

Ms. Sonya Greck, Senior Vice-President of Operations at Mission Hospital, explained that this is a replacement hospital to provide the best patient care possible.

Mr. Allen explained the replacement project, noting that it will be better from a pedestrian, vehicular, visual, and inside of the building state of the art technology standpoint. He explained that their directive was to activate the corner of Biltmore Avenue and Hospital Drive, which City Exhibit 4 addresses. In addition, he also reiterated Ms. Bernstein's concerns regarding having a stairway from the plaza space up to the Emergency Room parking lot. He then reviewed the seven condition use standards and why the project met those conditions.

In response to Councilwoman Wisler, Mr. Toby Kay, project director, said that they are willing to add a condition that they create crosswalks at the driveway entrances at Granby, including ADA curb ramps along this section where there is currently no accessibility for continuing south. The plans will be modified to address that condition.

Mr. Allen agreed to the condition that the retaining/structural walls along Biltmore Avenue, Hospital Drive and Victoria Road, for sections of wall with a height greater than 10 feet, not less than 40 percent of the wall area will be treated with aesthetic measures to mitigate the mass and scale (treatments may include, but are not limited to, green-screen, change in materials, articulations or variations in the plane of the face of the wall, fenestrated openings, etc.) and plans will be modified to address that condition.

Ms. Bernstein noted that the Livingston Street transit shelter is off-site and cannot be shown on the site plan. Mr. Allen agreed to the condition that the applicant provide transit improvements on Livingston Street or the surrounding area based on actual costs, not to exceed $30,000, paid to the City upon issuance of the Certificate of Occupancy.

Mayor Manheimer explained how the City is trying to move Biltmore Avenue into an urban corridor, with pedestrian friendly corridors. Mr. Allen agreed with the concept, however, this is a very special building in terms of how it is being used and how it is integral into other hospital buildings.

Councilman Bothwell felt that this project is lowering the carbon footprint of Asheville; and hoped that the St. Joseph's site can include a mixed use project.

Mayor Manheimer closed the public hearing at 6:01 p.m. after no one from the public commented.

Councilman Bothwell moved to recommend approval of the conditional use permit for Mission Hospital Tower located at 509 Biltmore Avenue, including the conditions discussed, agreed upon by all parties, and added to the site plan, including the funding of the transit stop on Livingston Street, because it meets the seven conditional use standards as demonstrated by the applicant. This motion was seconded by Councilman Smith and carried unanimously.

City Attorney Currin said that the Findings of Fact and Conclusions of Law will be placed on the October 27, 2015, agenda.

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE ESTABLISHING REQUIREMENTS FOR UTILITY SUBSTATIONS

Councilwoman Wisler moved to continue this public hearing until November 24, 2015. This motion was seconded by Councilman Pelly and carried unanimously.

V. UNFINISHED BUSINESS:

A. CONFIRMATION OF PLANNING & ZONING COMMISSION CANDIDATES

Vice-Mayor Hunt said that the following individuals have applied for a vacancy on the Planning & Zoning Commission and have completed the essay question responses: John S. Brigham, Joseph Archibald, Joshua Nielsen, Tony Hauser, Guillermo Rodriguez, Thomas Edward Muncy, Barber Melton, Robert Moore and Sage Turner.

After City Council reviewed all applications and essay question responses, it was the consensus of Council to interview Tony Hauser, Guillermo Rodriguez, Thomas Edward Muncy and Sage Turner. Those interviews will be on Tuesday, October 27, 2015. Because Ms. Turner will be unavailable on October 27, Council suggested she contact Council members individually to discuss her interests.

VI. NEW BUSINESS:

A. RESOLUTION NO. 15-197 - RESOLUTION ADOPTING A NEIGHBORHOOD SIDEWALK POLICY

Mr. Jim Grode, Chair of the Multimodal Transportation Commission said that City Council has created a neighborhood sidewalk project line item in the capital budget, and staff was directed to create a policy to use in choosing new sidewalk projects for the funding. Before coming to this body, this proposed policy was reviewed and recommended for full Council consideration by the Council Planning and Economic Development Committee, and endorsed by the Multimodal Transportation Commission (MMTC) and Neighborhood Advisory Committee (NAC).

City Council has created a neighborhood sidewalk project line item in the capital budget, and in order to prioritize the potential projects in an objective and transparent way, the policy is being proposed.

The policy identifies initial and secondary screening factors for the selection process. Initial screening is done using elements that can be obtained and quantified via geographic information systems (GIS). The elements selected as the initial screening factors are: proximity to transit stops and community destinations, areas zoned for small lot or multi-family residential use, prevalence of low-income households and of households without motor vehicles, and two measures of safety: traffic volume and pedestrian crash history.

A set of secondary screening factors will be applied to the top-ranking projects as determined by the initial screening process. The secondary screening criteria are not ones that can be reliably screened via GIS. They are: connectivity to the transportation system, whether sidewalk is already present on one side of the street, construction feasibility, and if a choice must be made from two or more similarly ranking projects, geographic distribution of projects.

The policy proposed was created under the direction of a four-person Neighborhood Sidewalk Committee, made up of members of the MMTC, and including the NAC representative to the MMTC. Considerable committee member and staff time and energy have been invested in this project, including by Information Technology Department staff. All involved believe that the policy achieves the goal of clearly identifying sidewalk projects that would be included in the universe of potential projects, and outlining the factors that will be used to prioritize those potential projects.

This work was advised by public input in the form of a survey and interaction with residents and representative groups. Input was gathered at the NAC Festival of Neighborhoods via face-to-face input and a short survey to complete and return. Additional survey opportunities were promoted via the city's neighborhood, transit and bicycle and pedestrian mailing lists, and through other contacts.

Pro:

- The policy provides guidance for project selection for neighborhood sidewalk construction and allows staff to move to selection of projects under the program.

Con:

- This policy, like all that guide a selection process, has limitations; however, the policy includes provisions for review and revision if needed.

He, along with City staff, recommends City Council adopt a resolution authorizing the City Manager to have staff implement the policy for selecting neighborhood sidewalk projects.

In response to Councilman Bothwell, Mr. Grode said that there is $350,000 budgeted for this coming year, which is enough for 1,000 feet of sidewalk (approximately 90 miles needed). If the City has to buy right-of-way, the project would be bumped out of this program.

Mayor Manheimer said that this special program is intended to fit in missing linkages in neighborhoods, and not the state roads where we need to partner with the N.C. Dept. of Transportation. She also noted that there are sidewalks associated with different capital improvement projects.

Councilman Pelly was concerned about the density consideration, fearing that it would knock out some less tightly packed areas from consideration. Mr. Grode acknowledged amended language would make sure to reflect that those areas could qualify, they just might not be at the top of the list.

In response to Councilman Pelly's concern, Director of Transportation Ken Putnam asked for the following three amendments to the policy: (1) Under the minimum requirements for consideration, the first sentence read "This policy applies to all residential streets that are identified as a needed linkage in the approved Pedestrian Master Plan"; (2) Under the initial screening factors, the first sentence read "Streets that meet the minimum requirements for consideration above will then be screened t prioritize the factors described below; and (3) Under public input, the second sentence read "The public shall be consulted at reasonable intervals to ensure that the Policy continues to reflect the community's vision."

When Mayor Manheimer asked for public comments, none were received.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Wisler moved for the adoption of Resolution No. 15-197, with amendments suggested by Mr. Putnam. This motion was seconded by Councilman Pelly and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 294

B. BOARDS AND COMMISSIONS

Regarding the Affordable Housing Advisory Committee, the following individuals have applied for the vacancies: Eric McDaniel, Kama Ward, Zachary Eden, Sage Turner, Laura Collins, Charlene Jones, Arthur Myers and Emily Coleman-Wolf. It was the recommendation of the Boards & Commission Committee, and consensus of City Council, to postpone appointments until after the Affordable Housing Summit in mid-November, at which time the vacancies will be re-advertised with a specific interest in appointing development professionals, along with diversity in the community.

Regarding the Homeless Initiative Advisory Committee, the following individuals have applied for the vacancy: Eric McDaniel, Charlene Jones and Arthur Myers. It was the recommendation of the Boards & Commissions Committee, and consensus of Council, to re-advertise and wait for a recommendation from the Homeless Initiative Advisory Committee.

RESOLUTION NO. 15-198 - RESOLUTION APPOINTING MEMBERS TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY

Due to a conflict of interest, Councilman Smith moved to recuse Mayor Manheimer from participating in this issue. This motion was seconded by Councilman Davis and carried unanimously.

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Buncombe County Tourism Development Authority.

The term of Bob Patel (must be an owner or operator of a hotel, motel, bed and breakfast, or vacation rental management company with less more 100 rental units) expired on August 30, 2015. Mr. Patel is not eligible for reappointment.

Session Law 2015-128, House Bill 347, amended the membership of the Buncombe County Tourism Development Authority, to allow City Council to appoint two members who must be an owner or operator of hotels, motels, bed and breakfasts, or vacation rental management companies with more than 100 rental units.

The following individuals have applied for this vacancy: Kelly Prime, Gary Froeba, Michael Adams, John Luckett, Himanshu Karvir and Dennis Hulsing.

On September 22, 2015, it was the consensus of Council to interview all eligible candidates - Mr. Froeba, Mr. Luckett, Mr. Karvir and Mr. Hulsing. Mr. Hulsing and Mr. Froeba were unable to attend the interview.

Councilman Smith moved to appoint Himanshu Karvir to the Buncombe County Tourism Development Authority (must be an owner or operator of a hotel, motel, bed and breakfast, or vacation rental management company with more than 100 rental units) to serve a three-year term, term to begin immediately and expire on August 30, 2018, or until his successor has been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

Councilman Pelly moved to appoint John Luckett to the Buncombe County Tourism Development Authority (must be an owner or operator of a hotel, motel, bed and breakfast, or vacation rental management company with more than 100 rental units) to serve a three-year term, term to begin immediately and expire on August 30, 2018, or until his successor has been appointed. This motion was seconded by Councilwoman Wisler and carried on a 5-1 vote, with Councilman Smith voting "no".

RESOLUTION BOOK NO. 35 – PAGE 299

RESOLUTION NO. 15-199 - RESOLUTION APPOINTING REPRESENTATIVES TO THE MULTIMODAL TRANSPORTATION COMMISSION

Vice-Mayor Hunt said that the Neighborhood Advisory Commission has requested Philip Lenowitz be appointed as their non-voting, ex-officio representative to the Multimodal Transportation Commission (replacing Robert Roepnack), to serve until July 1, 2016. The Sustainability Advisory Committee on Energy & the Environment (SACEE) felt that their vacant non-voting, ex officio seat left by Lael Gray (term to expire July 1, 2016), on the Multimodal Transportation Committee, is not necessary. The Boards & Commissions concurred with the Neighborhood Advisory Committee recommendation to appoint Mr. Lenowitz; however, it was their recommendation to have the seat remain open for a SACEE representative, said open seat to be reviewed at a later date.

Councilman Pelly moved to (1) appoint Philip Lenowitz (representative of the Neighborhood Advisory Committee) as a non-voting, ex officio on the Multimodal Transportation Committee, to serve the unexpired term of Mr. Roepnack, term to expire July 1, 2016, or until his successor has been appointed; and (2) have the non-voting ex officio SACEE seat on the Multimodal Transportation Commission remain open to be reviewed at a later date. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 300

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Helaine Greene, along with Mr. Jonas Gerard, presented City Council with a petition for the City to revisit the RADTIP 65% plans in order to accommodate the existing Riverview Station's parking plans as prepared by SiteWorks Studios. City Attorney Currin said that she is working with the attorney for Riverview Station.

Mr. Christopher Chiaronmonte spoke on various topics, one being the loss of the water lawsuit.

Councilman Bothwell was concerned about the City's enforcement on short term rentals and homestays, especially since the homestay issue is still being reviews.

Councilman Smith said that there is some interest in seeing Asheville consider a local renaming of Columbus Day to "Indigenous Peoples Day." As part of that effort he has reached out to Cherokee Chief Lambert for his perspective.

Closed Session

At 7:15 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(a)(3). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); (2) To consult with an attorney employed by the City about matters with respect to

which the attorney-client privilege between the City and its attorney must be preserved, including, but not limited to a lawsuit with the following parties: State of North Carolina and the City of Asheville; The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); (3) To consider the qualifications, competence, performance, character, fitness, or conditions of appointment of an individual public officer or employee. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(6); and to prevent the disclosure of information that is confidential pursuant to N.C. Gen. Stat. § 160A-168, the Personnel Privacy Act. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 7:55 p.m., Councilwoman Wisler moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 7:55 p.m.

Magdalen Burleson
CITY CLERK

Esther Manheimer
MAYOR

Tuesday – October 27, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: Councilman Christopher A. Pelly

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING NOVEMBER, 2015, AS "ADOPTION AWARENESS MONTH"

Mayor Manheimer read the proclamation proclaiming November, 2015, as "Adoption Awareness Month" in the City of Asheville. She presented the proclamation to Ms. Angie Garner, Foster Care Program Manager for Buncombe County Health and Human Services, who briefed City Council on some activities taking place during the month.

II. CONSENT AGENDA:

At the request Mayor Manheimer, Consent Agenda Item "E" was removed from the Consent Agenda to be rescheduled on November 10, 2015.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 13, 2015

B. MOTION TO ADOPT THE FINDINGS OF FACT AND CONCLUSIONS OF LAW FOR 509 BILTMORE AVENUE FOR THE CONSTRUCTION OF A TOWER AT MISSION HOSPITAL FACILITY

C. RESOLUTION NO. 15-200 - RESOLUTION APPROVING THE COMMUNITY CLEAN ENERGY POLICY FRAMEWORK

Summary: The consideration of a resolution to adopt a Community Clean Energy Policy Framework in response to City Council's adoption of Resolution 13-22, Supporting Clean Energy Economy.

On October 23, 2013, Asheville City Council adopted the Resolution 13-228 Supporting Clean Energy Economy which includes the following six action items:

1. Support a local clean energy future for the City and the region;
2. Call on Duke Energy Progress to partner with the City to help meet its carbon reduction goals by decreasing reliance on fossil fuels including transitioning from coal to electricity provided by clean, renewable energy sources while continuing to meet the company's obligation to provide affordable and reliable electricity to all customers 24 hours a day, 7 days a week;
3. Call on Duke Energy to continue and expand its investments in and programs supporting renewable energy, energy efficiency and energy conservation;

4. Call on Duke Energy to stop the spread of coal ash pollution and remediate existing coal ash pollution;
5. Develop a Clean Energy Partnership Progress Report that documents the achievements of this new partnership with Duke Energy, and;
6. Seek input from a variety of stakeholders when identifying collaboration opportunities for this partnership, which was adopted as an amendment to the Resolution as it was presented (this was added as an amendment to the resolution by Mayor Terry Bellamy as reflected in the meeting minutes).

After the resolution was adopted, the Sustainability Advisory Committee on Energy & the Environment (SACEE) formed a Clean Energy Task Force and invited stakeholders to participate in a community input process. Two sessions were held in August and September 2014, and a final session in July 2015. During the first input session participants were asked to brainstorm action items on what a community clean energy plan would address; including areas of focus in policy, programming, education outreach and projects. Participants were able to prioritize action items through a survey and results were vetted during the second session. The final session in July 2015, the participants were give the framework in which the prioritized action items were developed into the Community Clean Energy Plan.

The Community Clean Energy Plan is a guide for ongoing policy decisions and City staff workplans; consistent with City Council's Resolution to Support a Clean Energy Economy. Adoption of the Community Clean Energy Plan will guide City staff's work and upcoming planning processes, including updating the City's Comprehensive Plan. A near term action item included in the Community Clean Energy Plan is to launch a collaborative partnership with Duke Energy Progress to build a foundation for a longer term community energy efficiency, clean renewable energy sources; decreasing the City's reliance on fossil fuels.

This direction aligns with the City's 2014-2015 Strategic Plan, Economic Growth and Sustainability (FA1, G4): *"Continued sustainability efforts including carbon footprint reductions and clean energy economy – Clean Energy Partnership with Duke Energy."*

Council's Planning and Economic Development unanimously approved the framework on October 20, 2015. The Governance Committee recommended the letter to Duke Energy Progress at their October 13, 2015, meeting.

Pros:

- Aligns with City's 2014-2015 Strategic Plan, Economic Growth and Sustainability
- Funding for the temp/seasonal staff is available in the Green CIP

Con:

- None

Based on the Resolution 13-22 adopted by City Council, City staff evaluated the resources necessary to implement the Community Clean Energy Plan. A part time hourly position, funded from Fiscal Year 2016 Green Capital Improvement Program, will be used to help implement the short term goals of the plan that have a timeline of 12 -18 months for implementation.

	12 Months		18 Months	
Temporary/Seasonal $16.00/hr.	Salary	$16,640	Salary	$24,960
	FICA	$1,273	FICA	$1,910
	Total	$17,913	Total	$26,870

Long term goals within the plan will be factored into the update of the City's Comprehensive Plan.

Staff recommends Council accept the PED recommendation to adopt the Community Clean Energy Policy Framework in order to continue sustainability efforts including carbon footprint reductions and clean energy economy through a partnership with Duke Energy.

Councilman Bothwell was pleased to see this action taken and hoped that we encourage Duke Energy Progress to get off of fossil fuels. The planned expansion of the Lake Julian Plant and the conversion to gas is not getting us away from fossil fuels.

Ms. Kelly Martin, representing the Sierra Club, highlighted some particular items out of the Policy Framework that she hoped Council would support and provide resources to move forward. She also urged Council to reiterate their support for clean renewal energy development in the area.

RESOLUTION BOOK NO. 37 - PAGE 301

D. ORDINANCE NO. 4459 - BUDGET AMENDMENT FOR AN ALLOCATION FROM THE N.C. DEPT. OF COMMERCE FOR THE WNC NATURE CENTER ANNUAL GRASSROOTS COLLABORATIVE GRANT AWARD

Summary: The consideration of a budget amendment in the amount of $67,336 for an allocation from the N.C. Dept. of Commerce (Department of Commerce) for the Western North Carolina Nature Center (Nature Center).

Each year the Department of Commerce allocates funds to museums, science centers and zoos in North Carolina. The Nature Center is eligible to annually receive an allocation to be used for capital improvements, animal exhibits, materials, and goods and services.

The allocation, intended to support the 20/20 Vision Site Plan for the WNC Nature Center, will be used to support the purchase of animal health care equipment, small deferred maintenance projects and minor upgrades to exhibits within the Appalachian Station area.

Pros:
- Provides funds to support improvements at the Nature Center.
- Provides funds to support improvements in animal care.
- Provides funds to enhance special projects and services to Nature Center visitors.
- Provides funds to assist in fulfilling standards and maintaining Nature Center accreditation with the Association of Zoos and Aquariums.

Con:
- None

The budget for one-time equipment purchase and facility improvements at the WNC Nature Center will increase by $67,336.00. Since this increase is funded by an allocation from the State of North Carolina Department of Commerce, there is no impact to the City's General Fund budget.

Staff recommends City Council approval of a budget amendment authorizing the City Manager to (a) accept funds from the North Carolina Department of Commerce, and (b) establish a budget by $67,336.00 for equipment and facility improvements at the WNC Nature Center.

ORDINANCE BOOK NO. 30 - PAGE 169

E. RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A MEMORANDUM OF UNDERSTANDING WITH THE ECONOMIC DEVELOPMENT COALITION

This item was removed from the Consent Agenda, to be considered at the November 10, 2015, meeting.

F. RESOLUTION NO. 15-202 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A PROFESSIONAL ENGINEERING SERVICES SUPPLEMENTAL AGREEMENT WITH BROWN AND CALDWELL FOR THE WATER TREATMENT PLANT UPGRADES PROJECT

Summary: The consideration of a resolution by City Council (Council) authorizing the City Manager to execute a Professional Engineering Services Supplemental Agreement with Brown and Caldwell for the proposed amount of $354,000 plus a contingency amount of $10,000 for a total project budget in the amount of $364,000 for the Water Treatment Plant Upgrades Project.

On August 11, 2014, the Water Resources Department (WRD) issued a Request for Qualifications (RFQ) for On-Call Professional Services for Water Treatment Plant (WTP) Projects. In response to the RFQ, seven engineering firms submitted Statements of Qualifications (SOQ). A WRD review team selected three engineering firms with proven experience and expertise to provide professional and engineering services for various water treatment plant repair, replacement, and/or expansion projects: Brown and Caldwell, CDM Smith, and GHD Consulting Services. With guidance from the City's Legal and Purchasing Departments, the WRD executed Master Agreements with all three firms to establish initial contractual terms. Specific projects would be authorized under a separate Supplemental Agreement between the WRD and individual engineering firm. The WRD desires to enter into its first Supplemental Agreement with Brown and Caldwell for the WTP Upgrades Project.

The purpose of the WTP Upgrades Project is to conduct a variety of upgrades at the North Fork and Mills River WTP's. The various upgrades will be investigated, designed, and then constructed. Upon execution of a Supplemental Agreement, Brown and Caldwell will perform the following tasks for existing conditions at the WTP's: (1) an evaluation of the existing leaking seal at the clearwell inffluent pipe; (2) a structural evaluation and provide initial repair recommendations for select locations at the North Fork WTP; (3) engineering services to prepare bidding documents for the repair of the clearwell seal, filter valve and actuator replacement, extension of the existing high pressure water supply distribution system at the North Fork WTP, and for the installation of open channel flow meters at the backwash lagoons at the North Fork and Mills River WTP's; (4) assistance during the bidding process; (5) construction administration services and design engineer services; and (6) project administration and management during the performance of this project. All tasks are expected to be completed within one year of contract execution.

Pro:

- This project will identify problems, design solutions, and oversee repairs that need to be made to the North Fork and Mills River WTP's in order to operate the plants at the most efficient level possible.

Con:

- A delay in award of an engineering services agreement for this project would postpone needed repairs to the North Fork and Mills River WTP's.

The funding needed for this agreement is currently allocated within the Water Treatment Plant Improvements Project in the Water Resources Capital Improvement Projects (CIP) Fund.

Staff recommends Council approval of a resolution authorizing the City Manager to execute a Professional Engineering Services Supplemental Agreement with Brown and Caldwell

for the proposed amount of $354,000 plus a contingency amount of $10,000 for a total project budget in the amount of $364,000 for the Water Treatment Plant Upgrades Project.

RESOLUTION BOOK NO. 37 - PAGE 313

G. RESOLUTION NO. 15-203 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR 2016 EMERGENCY SOLUTIONS GRANT FUNDS FROM THE N.C. DIVISION OF AGING AND ADULT SERVICES, HOUSING AND HOMELESS UNIT

Summary: The consideration of a resolution to apply for Fiscal Year (FY) 2016 Emergency Solutions Grant funds in order to provide those funds to the agencies for the programs approved by the State Division of Aging and Adult Services, Housing and Homeless Unit.

The City of Asheville has been the fiscal sponsor for Emergency Solutions Grant funding since the 2012 ESG grant cycle. Through the State of North Carolina Division of Aging and Adult Services (DAAS), Housing and Homeless Unit these funds are made available to a regional fiscal sponsor to fund local agencies with capacity to provide emergency shelter and rapid rehousing services for individuals and families. Funding recommendations are made to the Housing and Community Development Committee by the Homeless Initiative Advisory Committee. These recommendations follow a process that includes submittal of letters of intent from eligible agencies, review and preliminary selection by the ESG Subcommittee of the Advisory Committee, and endorsement of those recommendations by the Asheville Homeless Coalition and the Homeless Initiative Advisory Committee.

We have been informed that for the FY 15-16 ESG Grant cycle, the City of Asheville is eligible to apply for $118,965. In the FY14-15 cycle, the City of Asheville received an initial allocation of $144,492, and 2 additional allocations totaling $80,188 to further expand Rapid Re-housing services and provide Homeless Management Information System (HMIS) support.

Staff has made an inquiry to the State regarding the amount of this year's allocation ($118,965), since it is less than last year's. A different formula was used for this year's eligible allocations across the State, causing a variation in amounts in multiple Continua Care, including Asheville-Buncombe.

Award of funds is conditional on the application being approved by the State. These conditions will include, but are not limited, to adequate documentation of required matching funds. These matching funds are provided by the individual agencies (and not the City), except in the case of the proposed allocation to the City. That allocation will support the administration of the Homeless Information Management System (HMIS), and the City provides matching funds through its annual allocation of general funds for the Homeless Initiative.

Pro:

- ESG funding is a key funding resource for emergency shelter and for rapid rehousing of persons experiencing homelessness.

Con:

- FY16 base funding level is less than last year's. Unless this grant is supplemented during the year (as it has been in other years), funded agencies will have fewer resources to assist homeless households.

Program funding is entirely from the US Department of Housing and Urban Development, through the State of North Carolina. Existing community development division staff will administer the program. No general funds are requested to support this program.

Staff recommends that Council approve the Housing and Community Development Committee's recommendation to adopt the resolution authorizing the City to apply for Emergency Solutions Grant funding in order to provide those funds to the agencies for the programs approved by the State Division of Aging and Adult Services (DAAS), Housing and Homeless Unit.

RESOLUTION BOOK NO. 37 - PAGE 314

H. RESOLUTION NO. 15-204 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXERCISE THE THIRD-YEAR OPTION OF A CONTRACT WITH LANDMARK LANDSCAPES FOR GROUND MAINTENANCE SERVICES AT VARIOUS PARKS, GREENWAYS AND FACILITIES IN THE CENTRAL PARK DISTRICT

Summary: The consideration of a resolution authorizing the City Manager to exercise the third-year option of a contract with Landmark Landscapes for ground maintenance services at various parks, greenways and facilities in the City of Asheville (City) Central Park District for the third year renewal based on contractor performance in the cumulative amount of $143,040.

The City's Parks and Recreation Department (Department) contracts with multiple vendors for ground maintenance services for the six districts within the City's park system. On August 12, 2013 the City issued an Advertisement for Bids for ground maintenance services within the districts that comprise the City's park system to include mowing, trim and edge, and leaf and debris removal. Four vendors were the lowest responsive and responsible bidders. Landmark Landscapes, located in Arden was awarded a one-year contract with option to renew for two consecutive years based upon contractor performance for the Central Park District. By electing to exercise the third and final year of the three-year contract based on the contractor's performance, the cumulative amount of the contract, $143,040, exceeds the City Manager's authority to execute the third-year contract. All existing mowing contracts in the six park districts continue through Fiscal Year 2015-2016 at which time will be put back out to bid.

Pro:
- Supports the efficient delivery of core park maintenance services.

Con:
- None

The funding required to support this ground maintenance contract is budgeted in the Fiscal Year 2015-2016 Department operating budget as part of the Parks Maintenance division budget.

Staff recommends that City Council adopt a resolution authorizing the City Manager to exercise the third-year option of a contract with Landmark Landscapes to provide ground maintenance services in the various parks, greenways and facilities in the City's Central Park District for the third-year renewal in the cumulative amount of $143,040.

RESOLUTION BOOK NO. 37 - PAGE 315

I. RESOLUTION NO. 15-205 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXERCISE THE THIRD-YEAR OPTION OF A CONTRACT WITH DALTON'S LAWN & LANDSCAPING FOR GROUND MAINTENANCE SERVICES AT VARIOUS PARKS, GREENWAYS AND FACILITIES IN THE WEST I PARK DISTRICT

Summary: The consideration of a resolution authorizing the City Manager to exercise the third-year option of a contract with Dalton's Lawn & Landscaping for ground maintenance services at various parks, greenways and facilities in the City of Asheville (City) West I Park

District for the third year renewal based on the contractor's performance in the cumulative amount of $97,150.

The City's Parks and Recreation Department (Department) contracts with multiple vendors for ground maintenance services for the six parks districts within the City's park system. On August 12, 2013 the City issued an Advertisement for Bids for ground maintenance services within the districts that comprise the City's park system to include mowing, trim and edge, and leaf and debris removal. Four vendors were the lowest, responsive and responsible bidders. Dalton's Lawn & Landscaping, located in Asheville, was awarded a one-year contract with option to renew for two consecutive years based upon contractor performance for the West I Park District. By electing to exercise the third and final year of the three-year contract based on the contractor's performance, the cumulative amount of the contract, $97,150, exceeds the City Manager's authority to execute the third-year contract. All existing mowing contracts in the six park districts continue through Fiscal Year 2015-2016 at which time will be put back out to bid.

Pro:
- Supports the efficient delivery of core park maintenance services.

Con:
- None

The funding required to support this ground maintenance contract is budgeted in the Fiscal Year 2015-2016 Department operating budget as part of the Parks Maintenance division budget.

Staff recommends that City Council adopt a resolution authorizing the City Manager to exercise the third-year option of a contract with Dalton's Lawn & Landscaping for ground maintenance services at various parks, greenways and facilities in the City's West I Park District for the third year renewal in the cumulative amount of $97,150.

RESOLUTION BOOK NO. 37 - PAGE 316

J. RESOLUTION NO. 15-201 - RESOLUTION AMENDING THE 2015 CITY COUNCIL MEETING SCHEDULE TO ADD A REGULAR FORMAL MEETING ON NOVEMBER 17, 2015, AND CANCEL THE REGULAR FORMAL MEETING ON NOVEMBER 24, 2015

Summary: City Council will (1) A regular formal meeting will be held on Tuesday, November 17, 2015, in the Council Chamber, located on the 2nd floor of City Hall, at 5:00 p.m. In addition to other City Council matters, the following public hearings will be held on November 17, 2015: (a) Public hearing to consider an amendment to Chapter 7 of the Code of Ordinances to establish requirements for utility substations; and (b) Continuation of public hearing to consider amending Sections 7-2-5, 7-8-1, 7-16-1(c)(9) and 7-18-2(b) of the Unified Development Ordinance relating to the definition of "Homestay" and the districts in which Homestays are permitted in the Table of Permitted Uses; and the standards required for Homestays which are designated as a use by right subject to special standards; and (2) The regular formal meeting on Tuesday, November 24, 2015, has been cancelled.

Councilman Bothwell was disappointed that the seated Council did not manage to conclude the homestay issue before the election as there seems to be mixed messages going to our residents. He asked that the last City Council Planning & Economic Development Committee minutes be posted as soon as possible.

RESOLUTION BOOK NO. 37 - PAGE 312

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Wisler and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. SISTER CITIES UPDATE

Ms. Karon Korp provided City Council with their 2015 Annual Report, which highlighted the many activities and projects throughout the year.

IV. PUBLIC HEARINGS:

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. RESOLUTION NO. 15-206 - RESOLUTION APPOINTING MEMBERS TO THE PLANNING & ZONING COMMISSION

Vice-Mayor Hunt said that the terms of Holly Shriner and Joe Minicozzi, as members on the Planning & Zoning Commission, expired August 14, 2015.

After an extensive process, on October 13, 2015, City Council voted to interview Thomas Muncy, Guillermo Rodriguez, Tony Hauser and Sage Turner. Ms. Turner has withdrawn from consideration.

Council thanked Ms. Shriner and Mr. Minicozzi for their dedication to the Planning & Zoning Commission.

After Council spoke highly of all candidates, Mr. Muncy received 1 vote; Mr. Hauser received 6 votes; and Mr. Rodriguez received 5 votes. Therefore, Mr. Hauser and Mr. Rodriguez were appointed as members of the Planning & Zoning Commission, terms to expire August 14, 2018, or until their successors have been appointed.

RESOLUTION BOOK NO. 36 – PAGE 317

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Jerry Sternberg spoke about the need to preserve property rights and business operations in the River Arts District and provided Council with a resolution from the Asheville Area Riverfront Redevelopment Commission regarding form based code zoning in the River District. Said resolution supported the River District property owners and requested removal of the part of the property contained in the code based planning lying west of the Norfolk Southern railroad tracks and fronting on and/or adjacent to the French Broad River be removed from consideration for any zoning changes at this time.

Closed Session

At 5:33 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(3). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1);

(2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including, but not limited to, a lawsuit involving the following parties: State of North Carolina and the City of Asheville. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3); and (3) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of a contract for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(5). This motion was seconded by Councilman Bothwell and carried unanimously.

At 6:55 p.m., Councilman Smith moved to come out of closed session. This motion was seconded by Councilman Bothwell and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 6:55 p.m.

Magdalen Bowleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – November 10, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 27, 2015

B. RESOLUTION NO. 15-207 - RESOLUTION NAMING FIRE STATION 8 IN MEMORY OF CITY OF ASHEVILLE FIREFIGHTER JIMMIE EDWARD TRENT

Summary: The consideration of naming Fire Station 8 in memory of former City of Asheville Firefighter Jimmie Edward Trent.

City of Asheville Firefighter Jimmie Edward Trent died November 13, 1975, after suffering a heart attack fighting a fire at the Red Chair Restaurant at 1 North Pack Square. The Asheville Fire Department requests that Firefighter Trent be honored by naming City of Asheville Fire Station 8 in memory of Jimmie Edward Trent. Firefighter Trent's family has requested Fire Station 8 as he was primarily assigned to that station during his career. Fire Station 8 is located at 904 Tunnel Road and serves East Asheville. This will be the second fire station named in memory of a City of Asheville Firefighter who has died in the line of duty. There have been a total of seven line of duty deaths in the City of Asheville Fire Department's history.

Pro:

- Having a City of Asheville owned facility that has been named to honor a public servant who has died in the line of duty is an ultimate recognition of their public service and sacrifice.

Con:

- None have been identified or known at this time.

The purchase of a plaque commemorating the naming would be the associated expense to this consideration and would be paid for out of the existing Fire Department budget.

Staff recommends that the Asheville City Council name Fire Station 8 in memory of Jimmie Edward Trent.

The son of Mr. Trent thanked City Council for this recognition.

RESOLUTION BOOK NO. 37 - PAGE 318

C. ORDINANCE NO. 4460 - BUDGET AMENDMENT FROM THE FEDERAL TRANSIT ADMINISTRATION FRO THE EXISTING JOB ACCESS AND REVERSE COMMUTE PEDESTRIAN SIGNAL GRANT

Summary: The consideration of a budget amendment, in the amount of $$47,854, to increase grant funding for the existing Job Access and Reverse Commute (JARC) pedestrian signal grant.

In 2010, the city successfully applied to the French Broad River Metropolitan Planning Organization (MPO) for Federal Transit Administration (FTA) JARC funding to install pedestrian signals at four busy intersections at an anticipated cost of $124,900: (1) Haywood Road and Louisiana Avenue; (2) Clingman Avenue and Hilliard Avenue; (3) Choctaw Street and McDowell Road; and (4) Biltmore Avenue and Southside/South Charlotte Street.

The project's original plan and cost estimates were based on the traffic engineering and signal work being carried out by the North Carolina Department of Transportation (NCDOT) and/or it's contractors under a reimbursable agreement between NCDOT and the city. Ultimately, that proved impossible, though NCDOT was able to provide signal plans for one of the intersections, Clingman Avenue and Hilliard Avenue. The city then had a contractor install the pedestrian signals at Clingman Avenue and Hilliard Avenue using the JARC funding. The city also proceeded with design for the remaining three signals using the JARC grant, but insufficient funding remained to purchase and install the signals at the three intersections.

On June 23, 2015, Council approved a budget amendment moving $13,063 from the general fund to the project to supplement the project budget. Additional JARC funding in the amount of $47,854 was identified to supplement the project budget, and FTA recently approved moving the funds to this project. The funds transferred in June will serve as the required match for the new FTA funds. With the new FTA funding, the total project budget is $184,837.

The existing and new funding is expected to be enough to install the pedestrian signals at the intersection of Haywood Road and Louisiana Avenue and at the intersection of Choctaw Street and McDowell Road. It is not anticipated that there will be enough funding at this time to install the signals and pedestrian refuges at the last and most expensive intersection on Biltmore Avenue, so other capital funding is being sought for that project.

Pros:

- Allows planned pedestrian safety improvements to continue
- Adds additional federal funding to the city's budget

Cons:

- One intersection will remain to be done

This will bring $47,854 more in new capital investment to Asheville's pedestrian network. The required 20% grant match will come from amounts already in the project budget. NCDOT will maintain the signals, so there is no increase in ongoing city costs. This grant does not affect the city's regular FTA transit system funding.

With this amendment, the total project budget will be $184,837. To date, $84,272 has been spent on the project: $37,772 to install the pedestrian signals at Clingman and Hilliard Avenues, $24,000 for a reimbursable agreement with NCDOT to review signal plans and inspect installations, and $22,500 for three signal designs (signals 1, 3, and 4, above). With this budget amendment, $100,565 will remain in the project budget.

City staff recommends City Council adopt the budget ordinance amendment to increase grant funding for the existing JARC pedestrian signal grant.

ORDINANCE BOOK NO. 30 - PAGE 171

D. RESOLUTION NO. 15-208 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SELL CITY PROPERTY LOCATED AT 600 SKYLOFT DRIVE - UNIT A-201, TO AUBREY RAY

Summary: The consideration of a resolution directing the City Manager to sell City property located at 600 N. Skyloft Drive, Unit A-201 to Aubrey Ray for $140,000.

In 2008, the City established a deferred Housing Trust Fund Loan on property at 600 N. Skyloft Drive, Unit A-201 (PIN 9648-68-1640-C201) in the amount of $30,000. In July 2014, the City of Asheville purchased this condominium at a foreclosure auction in order to resell it and protect the City's original investment. The City's total purchase price at auction was $100,438.00. Thereafter, the Housing and Community Development Committee approved marketing this property to City Employees with affordable housing restrictions placed on the deed, specifically: potential buyers could not earn over 100% of median household income; the Skyloft condo must be their primary residence; and the affordability restrictions would apply to any resale. There was little interest in the property from City employees and the marketing was extended to all county employees and then to all government employees. As of October 31, 2015, the City has paid out $4,730 in bills to include an unpaid property tax bill, utility bills and condominium owner fees. Including the original Housing Trust Fund loan, the City has invested a total of $135,168 in this property. The unit was advertised for sale at $140,000. This price would allow the City to break even if the sale included buyers' agent fees and some closing costs and still maintain affordability for income eligible buyers. In October of 2015, the marketing effort was extended to the general public and Aubrey Ray submitted a qualifying application.

North Carolina General Statute 153A-163 authorizes a city that acquires a property by foreclosure in order to secure a debt due to the city, to sell said property by private sale for not less than the amount of its bid. According to NCGS 160A-267 (private sale procedure) the City Council can authorize the appropriate City official to dispose of property by private sale at a negotiated price. The resolution provides authorization for the City Manager to sell the property at 600 N. Skyloft Drive, Unite A-201 to Aubrey Ray for $140,000, subject to income eligibility, permanent deed restrictions concerning long-term affordability of the unit, and a requirement that the unit must be the primary residence of the owner. If the following resolution is adopted, a public notice summarizing the resolution will be published and the transaction will not take place until at least 10 days after publication.

Pros:

- Sale of an affordable unit to an income eligible buyer.
- Deed restrictions will preserve the property as permanently affordable.
- Private sale will recoup funds spent by the Housing Trust Fund to further affordable housing goals.

Con:

- None

Because this property is associated with the Housing Trust Fund Loan Program, the financial proceeds are to benefit that program as managed by the Economic and Community Development Department.

City staff recommends City Council adopt a resolution directing the City Manager to sell the property located at 600 N. Skyloft Drive, Unit A- 201A to Aubrey Ray for $140,000, subject to income eligibility, permanent deed restrictions concerning long-term affordability of the unit, and a requirement that the unit must be the primary residence of the owner.

RESOLUTION BOOK NO. 37 - PAGE 319

E. RESOLUTION NO. 15-209 - RESOLUTION SETTING A PUBLIC HEARING ON DECEMBER 8, 2015, TO PERMANENTLY CLOSE AN UNNAMED ALLEY OFF JARRETT ROAD

Summary: The consideration of a resolution of intent to permanently close an unnamed alley off of Jarrett Street and setting a public hearing on December 8, 2015.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjoining property owners, T.S. Investments, LLC, owners Thomas and Catherine Durham, owners of parcel 9638-25-1024, and Ira Bernstein, parcel 9638-25-0070, and David Chambers, parcel 9638-25-1177, have requested the City of Asheville to permanently close the unnamed alley off of Jarrett St. A copy of this resolution of intent shall be sent by registered or certified mail to all property owners abutting the unnamed alley, not joining in the petition to close.

The Multimodal Transportation Commission met on October 28, 2015, and approved the closure.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of intent to permanently close an unnamed alley off of Jarrett Street and set a public hearing on December 8, 2015.

RESOLUTION BOOK NO. 37 - PAGE 320

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Bothwell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Pelly and carried unanimously.

III. PRESENTATIONS & REPORTS:

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING ON PROPERTY LOCATED AT 39 ELM STREET FROM COMMUNITY BUSINESS II DISTRICT TO COMMUNITY BUSINESS II DISTRICT/CONDITIONAL ZONING, WITH CONDITIONS TO BUILDING SIZE, IMPERVIOUS AREA AND SETBACK, FOR THE CONSTRUCTION OF A 5-STORY HOTEL WITH PARKING

On October 20, 2015, a letter was received from Mr. Craig D. Justus, attorney representing the applicant, asking that their conditional zoning request be withdrawn.

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING FOR PROPERTY LOCATED AT 852 (9999) HENDERSONVILLE ROAD FROM HIGHWAY BUSINESS DISTRICT AND OFFICE DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION OF A SELF-STORAGE FACILITY, WITH CONDITIONS MODIFYING REQUIREMENTS FOR THE LOCATION OF STREET TREES, REDUCING PARKING COUNTS, AND REDUCING BUILDING SETBACKS

Urban Planner Vaidila Satvika said that this is the consideration of an ordinance to conditionally zone property located on 852 (9999) Hendersonville Road from Highway Business District and Office District to Highway Business/Conditional Zoning for the construction of a 3-story, 89,700 square foot self-storage facility on 1.89 acres, with conditions modifying requirements for the location of street trees, reducing parking counts and reducing building setbacks. This public hearing was advertised on October 3 and 9, 2015.

The subject site measures 1.89 acres, is currently vacant and includes two parcels, which would be reassembled into one parcel. The property is currently split zoned between the HB (approximately 0.75 acres) and Office (approximately 1.1 acres) zoning districts. The project site is located within the Shiloh neighborhood.

The applicant is seeking to construct a three-story, 89,700 square-foot self-storage facility. The proposed use is not permitted in the Office zoning district; therefore, the applicant is requesting a conditional zoning designation to HB-CZ. The building would include 700 storage units staffed by two employees in an 812 square-foot office located on the second floor. The building footprint would measure 29,900 square feet.

Access to the property is proposed from both Forest Street and Cornell Street with two driveways on Forest Street and one on Cornell Street. There is no ingress/egress proposed from Hendersonville Road.

Nineteen parking spaces will be provided, which has been determined to be appropriate for the proposed use.

A new sidewalk is proposed for both Forest and Cornell Streets. There is a northbound bus stop (S3) located on Hendersonville Road at Forest Street.

The site is required to comply with the provision of street trees, street buffer, parking lot landscaping, building impact, and open space. In total, 67 trees and 148 shrubs are required for the site. The project meets the 15% of lot area for required open space by providing three separate open space areas totaling 0.28 acre. In addition the developer has agreed to add a 30-foot property line buffer to mitigate the impacts of the development to the Office and residential zoning along the east side of the development.

There is a stand of four older pine trees at the northeastern part of the parcel that appear to be in healthy condition and located in the area that is designated on the plan to be open space. Staff is requesting that the applicant retain these trees.

There would be two bio-retention swales provided, one on the north and one on the south part of the property.

Conditions Modifying Development Standards:

1. Street trees. The City's Unified Development Ordinance (UDO) requires that street trees

be placed within 20 feet from the edge of pavement. In this case there is an existing sewer line and associated sewer buffer that precludes tree placement within 20 feet. Street trees along Hendersonville Road will be allowed to be placed no further than 30 feet from edge of pavement.

2. Front setback. The required setback for buildings in the HB zoning district is 35 feet, unless located in a pedestrian-oriented environment, which allows for a reduction to only a five foot setback. Staff encouraged the applicant to reduce the front setback in order to allow for more room on the eastern part of the property to include the planted buffer between the subject site and the residential uses immediate to the east. The front setback was reduced to approximately 25 feet on the site plan.
3. Parking shall be reduced to 19 spaces, consistent with staff interpretation of parking standards for indoor self-storage, as stated below in the compatibility analysis.

As per UDO Section 7-7-8.(d), a conditional zoning application shall be reviewed by the City's Technical Review Committee (TRC), and the Planning and Zoning Commission shall hold a public hearing to review the application and make a recommendation to City Council for approval or denial.

This project was reviewed by the City's Technical Review Committee (TRC) on July 7, 2015. The Planning and Zoning Commission reviewed the proposal and voted unanimously to deny approval on August 5, 2015. City Council is the final approval body for this proposal. If the project is approved by City Council, it then returns to TRC for final zoning approval.

Pursuant to UDO Section 7-7-8.(c), it is strongly recommended that the applicant meet with representatives of the surrounding property owners and of the surrounding neighborhood to discuss the proposed development.

It is staff's understanding that representatives from the project development team met with the Shiloh Community Association on September 14, 2015 to discuss the project. The project development team may discuss the outcome of that meeting at the City Council public hearing.

The parcel is split with approximately 40% of the area (0.75 acres) located within HB and 60% (1.1 acres) within Office. HB allows for self-storage, as well as single-tenant buildings that total a maximum of 100,000 square feet, whereas the Office zoning district does not permit self-storage facilities and allows a maximum 8,000 square foot building. The proposed facility would be located approximately evenly split between HB and Office, thereby allowing approximately 45,000 square feet in each zoning district.

As described in the purpose section of the Office zoning district in the UDO, the intent of this district is to reserve areas for development of small scale office uses adjacent to residential uses. This district may serve as a transition between residential and commercial areas.

As per UDO Section 7-7-8.(d)(5), City Council's consideration of a conditional zoning application may consider any relevant information in its deliberations, and consideration shall be given to adopted land use plans, small area plans, other land use policy documents, and to the surrounding land uses. Further, UDO Section 7-7-8.(a) states that additional standards and regulations may be attached to a proposed development to ensure compatibility with surrounding uses and with applicable adopted plans.

Staff's compatibility analysis is as follows:

1. Building size and scale: Staff believes the combination of the size and scale of the encroachment of the facility into the Office zoning district and the building's higher-impact use would result in a project that is incompatible with the adjacent residential neighborhood. New structures in the Office zoning district shall not exceed 8,000 square

feet for multiple story buildings, with a maximum footprint of 4,000 square feet. With approximately 45,000 square feet proposed to encroach into the Office zoning district, the proposal would result in five times the permitted gross floor area in this district.

Context, areas zoned HB along Hendersonville Road do not project an equal distance into the residential districts; the HB district contains jagged lines that move in and out. In some areas, the HB district encroaches further into the residential neighborhood. As a result of this type of commercial encroachment into the adjacent residential neighborhoods, the Shiloh Community Plan 2025 (adopted by City Council in September 2010) recommends that along Hendersonville Road the City allow "no additional commercial incursion (to) occur in the community.". The proposed project would further encroach Highway Business activity into an Office zoning district and into the adjacent residential neighborhood. This is contradictory to the purpose of the Office zoning district, which was placed between Highway Business zoning and Residential zoning to soften the scale of development and to mitigate negative commercial impacts. The proposed 89,000 square foot building adjacent to residential uses appears to be unreasonable at this location. If approved, staff recommends that the proposed building be scaled back.

It should be noted that the existing parcel zoned HB would allow for the proposed building and the applicant has acknowledged that some version of this proposal could be viable by using only the existing HB part of the parcel.

2. Parking: According to the UDO, there needs to be one parking space per 10 storage units, plus one space per two employees, plus one space per 250 square feet of office, which totals 75 spaces. This rule is useful for smaller storage facilities but would be excessive for the proposed 700 unit storage facility.

UDO Sec 7-11-2 (c)(1) states that for uses not covered in the table of off-street parking requirements, the appropriate number may be selected from the American Planning Association (APA) Advisory Service Report Number 432. In this case a self-storage facility is covered in the UDO but it is not appropriate because it is not consistent with the data for how large self-storage facilities operate. The APA Service Report recommendation, however, is not helpful because its examples range from one space per 10 storage units to one space per 100 storage units. Staff recommends using the Institute for Transportation Engineer's (ITE's) Parking Generation manual instead, which reviews peak demand from similarly-scaled self-storage facilities and is therefore more applicable. The applicant is requesting to use ITE's Average Peak Parking Demand (1.39 vehicles per 100 spaces), which totals to 15 spaces for this project. Staff recommends ITE's conservative standards, which would require 19 spaces.

3. Materials: The material choices for the building are visually simplistic and would create the effect of a blank wall, especially as seen from the east and north where metal siding is proposed for the majority of the exterior. Except for the Hendersonville Road elevation, the majority of the structure is windowless and although there are no design guidelines for this district, the project could use architectural detail to improve the compatibility with surrounding buildings and residences, and to soften this building's impacts on the neighborhood.

4. Self-storage development activity: Staff is currently reviewing proposals for two other similar indoor self-storage facilities that are located on parcels where this use is permitted as-of-right, without changes to zoning. The proposed self-storage facility at the subject location is the only such self-storage project to date that would require a conditional zoning approval.

The proposed project does not comply with the Comprehensive Plan because it (Goal 1, Strategy 4) does not provide a mix of uses at underdeveloped commercial nodes where public facilities exist; (Goal 1, Strategy 11) fails to provide a mix of uses along a key transit node; and (Goal 1, Strategy 14) it does not support the enhancement and strengthening of existing neighborhoods, in this case by proposing a large-scale self-storage facility adjacent to an existing residential neighborhood. Although the Comprehensive Plan calls for "appropriately-scaled non-residential uses (to) be allowed in appropriate locations", staff believes the current proposed project is not appropriately scaled.

The proposed project does not align with Focus Area 3: High Quality of Life; Goal 4: Continue to develop City Council communications and partnerships with citizens, community leaders, the media and elected officials; Action Item: Evaluate and implement best practices to improve effective community engagement. The currently proposed site plan is inconsistent with the Shiloh Community Plan 2025, which states that "it is strongly felt that commercial incursion should be prevented in the Shiloh community".

Based on the above findings and the analysis provided in the report and as stated in the recommendation below, staff finds this request to be unreasonable.

Staff does not recommend the conditional zoning request as currently proposed based upon the intent of Office zoning to buffer residential neighborhoods from larger-scale buildings that are less compatible with neighborhood scale, and due to the project's inconsistency with the City's Comprehensive Plan and Shiloh Community Plan 2025. The Planning and Zoning Commission also voted to deny the conditional zoning request.

Mr. W. Louis Bissette, attorney representing the developer, showed the site of the subject property, along with views of the project from different views. He said that most of the units are accessed from inside the building and are climate controlled. The building will look like a nice office building. He said that this is a low impact project and feared what other projects could go into that site by right with the designation of Highway Business District in the front portion. He then showed a picture of the core of the Shiloh community, noting that they are not in the core. He presented a letter from Ms. Hicks (owner of the property directly behind the site) who was not opposed to the project. He also presented letters of support from Colton Mattress and Mission Health.

Mr. Chris Day, representing Civil Design Concepts, explained how they designed the building to look like a 2-story office building, noting one side 2-stories can be seen, and 3-stories can be seen on the other side. Access is with through the current Mission Health Driveway. He then explained the loading and parking areas. He said the project does propose sidewalks along Forest Street, Cornell and Hendersonville Road. They also created a larger landscape buffer than is required in the rear of the property with an additional berm for Ms. Hicks to screen her from the project and traffic on Hendersonville Road. He explained there is no outdoor storage, as it is a fully enclosed self-storage project.

Mr. David Ellison, with the development company, described the operations of this facility. He said the office building is staffed by 2 on-site office managers. The office will be open from 9:30 a.m. - 6:00 p.m. and people can access their units (via a keypad) from 6:00 a.m. - 10:00 p.m. He noted that when they came to the City with their pre-submittal meeting, at that time there were no objections, so they moved forward in good faith. In July they received an e-mail from Planning staff indicating concerns about the size and encroachment into the Shilch community. They have reached out to the neighborhood on three different occasions and urged Council to approve this conditional zoning.

Mayor Manheimer then opened the public hearing at 5:36 p.m.

The following individuals spoke against the conditional zoning for several reasons, with the major objections surrounding: commercial encroachment into the historic Shiloh community; non-compliance with the Shiloh Community Plan; project will not benefit the Shiloh community as it will not provide jobs and people cannot afford the monthly rent for a unit; additional traffic on Forest Street; and project will not increase noise or traffic in the area:

Ms. Norma Baynes, Liaison to the Shiloh Community Association
Mr. Vinnie Norman McIntosh, member of the Shiloh Community Association
Mr. Charlie Owen, co-owner of the property - presented petition with 28 names
Mr. Walter Taylor, senior member of the development team
Mr. Joe Brummit

The following individuals spoke in support of the conditional zoning for several reasons, some being, but are not limited to: the project will benefit the Shiloh Community; nice building that will be well-maintained and well-landscaped; project will have a low impact on the community; and fear of what might be built on the property is this project is denied:

Ms. Faye Reynolds, Shiloh resident
A Shiloh homeowner
Ms. Phyllis Williams Green, Assistant Secretary for the Shiloh Community Association

At 6:03 p.m. Mayor Manheimer closed the public hearing.

In response to Vice-Mayor Hunt, Mr. Todd Okolichany, Director of Planning & Urban Development, reiterated staff's concerns regarding the size and scale of the project, in that it is out of compliance with the City's Comprehensive Plan and the Shiloh Community Plan. Without a specific site plan layout, staff cannot assess an alternative use; noting that the traffic impact of a retail use would result in more traffic than a self-storage facility. The maximum building height would be 40 feet on a use by right under the Office District zoning.

Councilman Pelly stated that other neighborhoods are encouraged to design neighborhood plans similar to what the Shiloh community developed. Knowing that changes will come, they need to find a vision on how they want to grow and evolve over time. The Shiloh community has that plan and he felt this development violates some of aspects of their plan.

Vice-Mayor Hunt emphasized that a Highway Business District project on that property will be a use by right and will not come before City Council for any conditions. He felt this lot is high in demand and will have a large impact use, opposed to this low impact use.

Councilman Bothwell felt that the same building could be built vertically with the same square footage on the existing Highway Business lot - five stories with one underground. That would be about the same height as the Mission Health building. That would also allow the lot in the rear to soften the impact into the residential area.

Councilman Smith moved to deny the conditional zoning request from Highway Business (HB) and Office to Highway Business Conditional Zone (HB-CZ) for the construction of a three-story, 89,700 square-foot self-storage facility to be located at 852 Hendersonville Road with the requested conditions, and find that the request is not reasonable, is not in the public interest, and is not consistent with the Comprehensive Plan and other adopted plans in the following ways: the proposed plan does not provide a mix of uses along a key transit node where public facilities exist, it does not support the enhancement and strengthening of existing neighborhoods, and it would allow large scale commercial incursion to occur in the adjacent residential community, which is contrary to the recommendations contained in the area's community plan. This motion was seconded by Councilman Bothwell and carried on a 5-2 vote, with Vice-Mayor Hunt and Councilman Davis voting "no."

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 15-210 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A MEMORANDUM OF UNDERSTANDING WITH THE ECONOMIC DEVELOPMENT COALITION

Mr. Ben Teague, Executive Director of the Asheville-Buncombe Economic Development Coalition (EDC) provided Council with a brief update on the Asheville 5x5 Campaign.

There was considerable discussion, initiated by Councilman Smith and responded to by Mr. Teague, regarding arts and culture not being included in the vision 2020 plan. Mr. Teague summed it up by saying that they spent $75,000 over 5 years to bring arts and culture together, and that the EDC will continue to meet with arts leaders asking what they want to accomplish. With a number of the topics they brought up, the EDC can help them with research and numbers, but there are a number of items that they can partner more broadly with, i.e., the Chamber of Commerce and other organizations, to accomplish what they want. The EDC still has arts and culture as part of their plan in recognition that it is very important to our community.

Upon inquiry of Councilman Smith, Mr. Teague also responded about how the EDC offers help with downtown homegrown companies to preserve them.

Vice-Mayor Hunt, member of the EDC, spoke in support of the EDC and how the City's investment is extremely valuable in their role. He felt that growing arts and culture deserves funding from the City, feeling that the EDC is not vehicle to fund it with.

Councilman Bothwell agreed the work of the EDC is valuable; however, he felt it often appears that a concerted effort like the Asheville 5x5 Campaign gets credit for things that would have happened otherwise, citing New Belgium and Linamar.

Ms. Kitty Love, Executive Director of the Asheville Arts Council, said that she is looking for a partnership with the EDC, and if they are not the avenue, she hopes that the Chamber will be that avenue to upfit and grow jobs in arts and culture.

Councilman Smith supports bringing more wealth in the community with the new focus on higher wage jobs. He will support the motion with the promise that everyone will come together on the arts and culture piece and be able to examine the numbers to find a strategy for arts and culture.

Mayor Manheimer said that this is funding for the EDC to grow quality jobs in Asheville which means new businesses locating here or the growth of existing businesses. We need to focus on growing higher paying jobs and need to better understand how the arts community impacts our overall economy and how to support them in the context of our total economy.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Hunt moved for the adoption of Resolution No. 15-210. This motion was seconded by Councilwoman Wisler and carried on a 6-1 vote, with Councilman Bothwell voting "no".

RESOLUTION BOOK NO. 37 - PAGE 321

B. MOUNTAIN HOUSING OPPORTUNITIES EAGLE MARKET PLACE REQUEST

Mr. Wyatt Stevens, attorney for Eagle-Market Place, LLC, gave a brief update on the background of this project and explained in detail why they are now requesting a way to move

forward without asking for additional City funds into the project. He said that in order to secure an additional bank loan to ensure completion of the Eagle-Market Place project, Eagle Market Place LLC requests the following modifications to the City loans: (1) Convert 24-30 of the 62 residential housing units to workforce housing units, affordable to households with incomes at 120% of Area Median Income; (2) Disburse the balance of the Urban Redevelopment Loan ($2,867,618) at 50% completion (release of funds will follow all inspections and approval of satisfactory percent of completion by the bank and the City of Asheville's appointed representative(s), as well as project architect and structural engineer. Inspections will certify proper structural design and construction as well as all other elements required to certify successful 50% completion.) (3) Of the $718,000 of committed Section 108 Funds, disburse $218,000 at or no later than 10 days past the new construction closing date, then $50,000 by July 26, 2016, and the balance of $450,000 when the certificate of occupancy is issued; and (4) Modify the interest rate on the Housing Trust Fund Loan from 2% to 0% effective immediately. City Council is requested to authorize City staff to review, revise, approve and sign specific agreements within these authorizations and previous authorizations of City Council. Updated pro formas, updated financial commitments and other due diligence will be provided to City staff for their review and approval prior to construction loan closing.

Councilman Bothwell asked if the Mountain Housing Opportunities (MHO) is successful in recovering more money through the mediation, would it be possible to return the 2% interest on the Housing Trust Fund loan rather than return the 24-30 units from workforce housing units to affordable housing units. Mr. Stevens said that they would be willing to consider that.

Community Development Director Jeff Staudinger responded to Councilwoman Wisler regarding the Section 108 funds. He said that those funds were already pledged to the project and the request is to change the disbursement schedule.

In response to Councilman Smith, Mr. Staudinger said that City Council has waived the interest rate in the Housing Trust Fund for projects that generally serve the lowest income households.

In response to Councilwoman Wisler, Mr. Stevens said that they will sign a change order with the general contractor that will be very specific and they have included $631,000 contingency. They sincerely hope that they never have to come back in front of Council to complete this project.

Mr. Scott Dedman, Executive Director of MHO, explained the broad range in the number of affordable units vs. the workforce units.

Executive Director of Planning & Multimodal Transportation Cathy Ball said that the City Attorney's Office and City Manager's Office has been working on a number of conditions for your consideration should Council choose to approve this modification. She read them as follows:

A. Prior to disbursement, the following must be approved:

1. Certification from project architect and engineer that the building is at "50% completion" as that term has been defined in EMP's 11-3-15 request to Council.

2. Copies of all inspection reports from City inspectors reflecting approval of all components of the completed project along with a statement from the City's Development Services Office that all work inspected by the project architect and structural engineer evidencing 50% completion have been inspected by the City and approved.

3. Certification from General Contractor and/or architect identifying any outstanding or anticipated change orders to complete the project.

4. Confirmation from all contractors (general contractor, architect, engineer) and lenders that all payments due to them at the time, in accordance with the terms of their contracts or loan agreements, are current.

B. Prior to Agreement by City:

5. Evidence that all financing commitments necessary to complete the project have been obtained.

6. EMP's attorney must review any and all contracts between EMP and any other entity regarding the project inclusive of the contract between EMP and the General Contractor, and all banking loans.

7. EMP's attorney must review all design and construction contracts relating to the Project and certify that there is insurance coverage consistent with industry standards.

8. EMP's attorney is to modify the HTF loan documents to represent a 0% interest rate vs. a 2% interest rate, such modification to be retroactive to April 2015 and modify the urban redevelopment loan to reflect the agreed upon changes.

9. The GC must continue to maintain the performance and payment bond currently in effect on the Project.

10. Commitment by EMP that any project cost overages shall be covered by additional non-city financing.

11. With the exception of annual application request for CDBG/Home/HTF monies, upon 50% completion and release of funding, neither MHO nor Eagle Market Street Development Corporation shall request any additional funding from the City for the Project.

12. EMP will use good faith efforts to ensure that HOME units are completed and leased no later than January 2017.

13. To the extent required, EMP will obtain approval from the Buncombe County Board of Commissioners to modify it's agreement with the County to allow for the 24-30 units to be converted to workforce units. EMP will obtain confirmation from the County that the County's funding commitment for the project is still in place.

Councilman Bothwell didn't see where we can afford not to finish this project at this point.

Mr. David Nutter, Board Secretary of Eagle Market Street Development Project, spoke in support of the request and thanked Council for preserving a living block with an African American presence.

Mr. Rich Lee felt that the highest priority in this project was affordable units and hoped that any additional funds received though mediation be used to return the workforce housing to affordable units.

Ms. Dee Williams urged Council to approve the loan modifications and requested space be reserved in the project for African American entrepreneurs.

Mr. Gene Ellison, attorney in Asheville, was grateful to the efforts of MHO to make this project work and thanked the City for standing behind them.

Mr. Gene Ellison, attorney in Asheville, was grateful to the efforts of MHO to make this project work and thanked the City for standing behind them.

Ms. Joslin Reece wondered if there is something else that can be done without reducing the number of affordable units.

Mr. Dedman explained that when they reformulated their financial plan, they started with the assumption was that they don't' come back to the City and ask for more funds. The mix of workforce and affordable housing is a healthy mix, noting that MHO has over 600 apartments in this community which are all deeply affordable. They have never done a mix, but we are willing to borrow approximately $3 Million of new funds to make the project work so we don't have to come back and ask the City for approximately $3 Million in new funds. The cash flow required to pay the monthly payments on the new debt will need the higher rents. If they receive funds from arbitration, and within bank underwriting requirements, they would be happy to repay some or all of the $16,000 a year in interest in Housing Trust Fund because that money would go toward other affordable units. They also will try to build back in affordability.

Councilman Smith said that the intentions of this project went beyond housing. There is 8,000 square feet of commercial space and as important - the preservation of the historic nature of the neighborhood.

Councilwoman Wisler said that she would like to see the Eagle Market Street project go forward. She applauded MHO for continuing to seek recovery of funds through mediation. She also understands that MHO and the general contractor have foregone fees in an attempt to keep this project going. However, she still has some major concerns. First, with funding at 50% level. The City has already contributed $2.7 Million to this project and additionally guaranteed federal grants of $440,000. These figures include the purchase of The Block property, consulting fees and monies that went directly to building the project. Now the City is being asked to fund $2.9 Million and forgive all interest payments. To pay these remaining monies before the project is 100% complete is highly risky. She noted that the County is paying all of its financial commitment only when the project is 100% complete. She understood that MHO has committed not to ask the City for more funds, but it's not clear to her that if the project needs more funds, where those would come from. At 50% completion levels, there will remain a lot of uncertainties. While the funding at 50% completion is risky. She is also uncomfortable with the reduction in affordable housing units. When the City first committed to this project, the cost of each of the 62 deeply affordable units was approximately $83,000 while the City normally spends less than $20,000 when we contribute to affordable units. Therefore, we were already spending quite a bit more per unit for the Eagle Market project. That commitment reflected how important and transformational this project is for the City and recognizes the difficulties with the soil conditions and preservation work. As Mr. Stevens pointed out, the original commitment of 62 affordable units was a significant issue in the original negotiations. Today, in order to get financing for this project with its substantially increased costs resulting from the construction problems, the project will reduce its deeply affordable housing units to between 30 and 38 units. With this change in the mix of affordable units, the City will be contributing between $135-175,000 per unit. That is 7 to 10 times our typical contribution per affordable housing unit. She was not sure this is the best use of taxpayers' money. And given that there is no guarantee that the project can be completed at the original total cost, the City may be asked to spend even more per unit, even though she realized they are committing not to. She would like the City to fulfill its original commitment under the original terms to the Eagle Market Street Project.

Councilman Bothwell moved to approve the loan modifications for Eagle Market Place, LLC, as requested with the conditions read by Ms. Ball outlined above. This motion was seconded by Vice-Mayor Hunt and carried on a 6-1 vote, with Councilwoman Wisler voting "no."

VI. NEW BUSINESS:

A. BOARDS & COMMISSIONS

Regarding the Homeless Initiative Advisory Committee, the following individuals have applied for the vacancy: Eric McDaniel, Charlene Jones, Arthur Myers, Seth Connelly and Dale Davidson. It was the consensus of the Boards & Commissions Committee and City Council to re-advertise for a position and wait for a recommendation from the Homeless Initiative Advisory Committee of a City resident.

RESOLUTION NO. 15-211 - RESOLUTION APPOINTING MEMBERS TO THE ALCOHOLIC BEVERAGE CONTROL BOARD

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that the terms of Edward Hay and Robin Cape as members on the Alcoholic Beverage Control Board, expire on November 13, 2015.

No individual filed for the vacancies.

The Boards & Commission Committee recommended reappointing Edward Hay and Robin Cape.

Councilman Bothwell moved to reappoint Edward Hay and Robin Cape to each serve an additional three-year term respectively, terms to expire November 13, 2018, or until their successor have been appointed. This motion was seconded by Mayor Manheimer and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 322

RESOLUTION NO. 15-212 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that Tracey Rizzo has resigned as a member of the Asheville-Buncombe Historic Resources Commission, thus leaving an unexpired term until July 1, 2018.

The following individuals have applied for the vacancy: Craig Cline, Guy Cothran, Leslie Klingner, and Helen Glenn Court.

The Boards & Commission Committee recommended appointing Leslie Klingner.

Councilman Pelly moved to appoint Leslie Klingner to serve as a member of the Asheville-Buncombe Historic Resources Commission to serve the unexpired term of Ms. Rizzo, term to expire July 1, 2018, or until her successor has been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 323

RESOLUTION NO. 15-213 - RESOLUTION APPOINTING A MEMBER TO THE MULTIMODAL TRANSPORTATION COMMISSION

Vice-Mayor Hunt, Chair of the Boards & Commissions Committee, said that the term of Steven Obremski, as an at-large member of the Multimodal Transportation Commission, has resigned, thus leaving an unexpired term until July 1, 2017.

The following individuals have applied for the vacancy: Mike Zukoski, Kelly Prime, Meredith Gregory, Eric Workman, Richard Rozzelle, Edward Keaton, Seth Connelly, Michael Speciale, Devin Clancy and Rich Lee.

The Boards & Commission Committee recommended appointing Rich Lee.

Mayor Manheimer moved to appoint Rich Lee to serve as an at-large member of the Multimodal Transportation Commission, to serve the unexpired term of Mr. Obremski, term to expire July 1, 2017, or until his successor has been appointed. This motion was seconded by Councilwoman Wisler and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 324

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

At the suggestion of Councilman Smith, it was the consensus of Council to review the downtown development review guidelines as outlined in the Downtown Master Plan referencing "After a pilot period, evaluate the success of these review process changes and amend them as appropriate prior to permanent adoption. A four-year pilot period is recommended to allow sufficient time for economic recovery and significant project proposals to occur, while keeping the timeframe finite." City Manager Jackson said that he will provide Council with a staff analysis, together with some suggested alternatives, for Council's review on December 8, 2015. It was also the consensus that the City Manager report to Council on the small business focus and how to address the national/international chains popping up in downtown.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 8:30 p.m.

Magdalen Bowleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – November 17, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Marc W. Hunt; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman Christopher A. Pelly; Councilman Gordon D. Smith; Councilwoman Gwen C. Wisler; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer asked for a moment of silence for those affected by the terrorist attacks in Paris.

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. RESOLUTION NO. 15-215 - RESOLUTION OF APPRECIATION FOR JAN B. DAVIS

Mayor Manheimer read the resolution.

Resolution No. 15-215 was adopted by acclamation.

Mayor Manheimer thanked Councilman Davis for his service to Asheville and presented him with an appreciation resolution, a plaque, his name plates, a City pen, and other mementos of his service to the City of Asheville.

RESOLUTION BOOK NO. 37 - PAGE 327

B. RESOLUTION NO. 15-216 - RESOLUTION OF APPRECIATION FOR MARC W. HUNT

Mayor Manheimer read the resolution.

Resolution No. 15-216 was adopted by acclamation.

Mayor Manheimer thanked Vice-Mayor Hunt for his service to Asheville and presented him with an appreciation resolution, a plaque, his name plate, a City pen, and other mementos of his service to the City of Asheville.

RESOLUTION BOOK NO. 37 - PAGE 328

C. RESOLUTION NO. 15-217 - RESOLUTION OF APPRECIATION FOR CHRISTOPHER A. PELLY

Mayor Manheimer read the resolution.

Resolution No. 15-217 was adopted by acclamation.

Mayor Manheimer thanked Councilman Davis for his service to Asheville and presented him with an appreciation resolution, a plaque, his name plates, a City pen, and other mementos of his service to the City of Asheville.

RESOLUTION BOOK NO. 37 - PAGE 329

II. CONSENT AGENDA:

At the request of Councilman Smith, Consent Agenda Item "J" was removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 10, 2015

B. RESOLUTION NO. 15-214 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONSTRUCTION AGREEMENT WITH H&M CONSTRUCTORS FOR THE 200 BINGHAM ROAD UPFIT AND RENOVATION PROJECT

ORDINANCE NO. 4461 - BUDGET AMENDMENT FOR THE 200 BINGHAM ROAD UPFIT AND RENOVATION PROJECT

Summary: The consideration of the following items relative to the 200 Bingham Road Up-fit and Renovation Project ('Project'): (1) a resolution authorizing the City Manager to enter into a construction agreement with H&M Constructors for the bid amount of $2,658,417, with (a) an additional $43,890 for bid alternate #E-2 for installation of a security camera system; and (b) a contingency amount of $270,231 for a total project budget in the amount of $2,972,538; and (2) a budget amendment in the amount of $1,972,538.

On February 19, 2015, the Water Resources Department (WRD) purchased the property located at 200 Bingham Road to relocate its Water Maintenance and Meter Services Divisions and the Finance Department's Central Stores Division to the site. This Project consists of the construction and installation of all materials, labor, incidentals, and equipment necessary to: (1) remodel and renovate approximately 37,000 Square Feet of existing structure at 200 Bingham Road; (2) replace 35% of the existing roof; (3) install new HVAC systems; (4) install environmental mitigation systems; (5) construct a new covered stone shed; (6) install a new camera security system; and (7) relocate and replace the existing entrance gates.

In response to an Advertisement for Bids for the construction project on October 7, 2015, the WRD received four bids. Companies responding were:

1. American South General Contractors, Inc. – Asheville, NC
2. Cooper Construction Company, Inc. – Hendersonville, NC
3. H&M Constructors, a Division of MB Haynes Corporation – Asheville, NC
4. SIMCON Company, LLC – Mount Airy, NC

American South General Contractors, Inc., was identified as the initial apparent low bidder. On October 7, 2015, American South General Contractors, Inc., pursuant to G.S 143-129.1, requested to withdraw its bid due to a calculation error in the submitted bid. Following review of the request to withdraw the bid by City Staff and Project Architect, Clark Nexen, American South was notified that its bid withdraw would be allowed on October 14, 2015.

Following a review of the remaining three bids by City Staff and the Project Architects, Clark Nexen, the second lowest bidder, H&M Constructors was selected as the lowest responsible, responsive bidder for the bid amount of $2,658,417. It is recommended that alternate #E-2 for installation of a security camera system be included for the amount of $43,890.

A contingency amount of $270,231 has been added for a total project budget in the amount of $2,972,538.

Pros:

- This project will allow the WRD Divisions of Water Maintenance and Meter Services to relocate from the existing facility at 174 South Charlotte Street, which has existing building safety issues.
- This project will allow the Finance Department's Central Stores Division to relocate from the existing facility at 2 Hunt Hill Place to provide them with more adequate spacing needs.
- This project supports the City of Asheville's economic development goal to relocate and expand business.

Con:

- Failure to award a construction contract would prevent the completion of this project, which is required to relocate all divisions involved and could defer the option to market properties.

Approximately $1 million of the funding needed for the construction agreement is currently allocated within the 200 Bingham Road Up-fit and Renovation Project in the Water Resources Capital Improvement Projects fund. The remaining funds of $1,972,538 needed for the construction agreement will be transferred from the General Projects Capital Project, which accrues funds from completed, closed capital projects. In order to transfer the funds, a budget amendment is necessary.

Amount Available for Construction Agreement	$1,000,000
Additional Amount Needed	$1,972,538
Total Amount Needed for Construction Project Budget	$2,972,538

The transfer of $1,972,538 is necessary to compensate for a low budget estimate which was established upon preliminary evaluation of the renovation project. An amount of $1,100,000 was included in the Fiscal Year 2015/2016 capital budget to fund this project. While the estimate was meant to be comprehensive and reflect the entire cost of the renovation, several factors have contributed to the higher project costs. Changes which have impacted this estimate are detailed below:

- Addition of 6,500 SF of programmed space including (2) mud/locker rooms with associated showers, sinks and ceramic tile finishes; lab classroom, testing wet lab, storage room, conference room, exercise room, media room, inventory staff toilet rooms, backflow lab toilet rooms and (3) additional staff offices.
- Addition of 6,500 SF section of roof has also been identified as needing replacement after roof cores were evaluated by the design team.
- Site investigation revealed a need for a more extensive underground soil gas abatement which required a more elaborate gas extraction system.
- Miscellaneous site and building improvements also include fence relocation and new motorized gates, guard shed relocation, roof drain replacement and (1) additional roof-top unit replacement.

Water Resources staff have met with the contractor and the architect to investigate cost savings for the project, however, the changes to the project will need to be minor in order to avoid a significant change in the scope of the project. It is anticipated that the savings from these modifications will be less than $100,000.

City staff recommends City Council authorize the following relative to the 200 Bingham Road Up-fit and Renovation Project: (1) the City Manager to enter into a construction agreement with H&M Constructors for the bid amount of $2,658,417, with (a) an additional $43,890 for bid alternate #E-2 for installation of a security camera system; and (b) a contingency amount of

$270,231 for a total project budget in the amount of $2,972,538; and (2) a budget amendment in the amount of $1,972,538.

RESOLUTION BOOK NO. 37 - PAGE 325
ORDINANCE BOOK NO. 30 - PAGE 173

C. ORDINANCE NO. 4462 - FIRST READING OF ORDINANCE GRANTING A FRANCHISE TO OPERATE A LOW SPEED VEHICLE SHUTTLE SERVICE WITHIN THE CITY OF ASHEVILLE

Summary: The consideration of an ordinance granting a franchise agreement for the operation of a low speed vehicle shuttle service within the City of Asheville.

City staff has been working with an individual that is interested in starting a low speed vehicle shuttle service within the City of Asheville under the business name of Land of Sky Shuttle. The service would operate in the downtown Central Business District (CBD) on city-maintained and state-maintained streets that have a posted speed limit less than 35 mph.

By definition (NCGS # 20-4.01(27)h), a low speed vehicle is a four-wheeled electric vehicle whose top speed is greater than 20 mph but less than 25 mph. It is not a golf cart! The vehicle(s) must be equipped with headlamps, stop lamps, turn signal lamps, tail lamps, reflex reflectors, parking brakes, rearview mirrors, windshields, windshield wipers, speedometer, seat belts, and a vehicle identification number. In addition, the vehicle(s) must be insured, registered and licensed in North Carolina.

The shuttle service will operate between the hours of 9:00 am and 3:00 am Monday through Friday and between the hours of 7:00 am and 3:00 am on Saturday and Sunday. The City reserves the right to change the hours of operation at its sole discretion with a 30-day notice. The shuttle service will provide alternative transportation services to and from the various downtown hotels to various points of interest in the downtown central business district in an effort to minimize traffic congestion and the need for parking.

The individual has worked closely with the Transportation Department, the Legal Department, and the Asheville Police Department and at this time, all concerns have been addressed. The individual is very committed for the shuttle service to be successful and he intends to work closely with staff to make any necessary tweaks if needed.

This item has been reviewed by the Council's Public Safety Committee and it received the Committee's endorsement on October 26, 2015.

Pros:

- Supports diversified job growth and business development.
- Minimizes vehicular traffic congestion and the need for parking.
- Enhances the visitor experience to downtown Asheville.
- No direct fiscal impact to the City.

Con:

- Could impact vehicular traffic flow.

There is no known fiscal impact for the subject franchise agreement.

Staff recommends that City Council approve an ordinance granting a franchise agreement to Land of Sky Shuttle for the operation of a low speed vehicle shuttle service within the City of Asheville.

Councilman Bothwell felt that this kind of shuttle vehicle has the potential to reduce parking downtown.

In response to Councilman Pelly, Mr. Putnam said that there is only one vehicle at this time that will probably carry 4-6 people.

ORDINANCE BOOK NO. 30 - PAGE 175

D. ORDINANCE NO. 4463 - BUDGET AMENDMENT FOR THE FISCAL YEAR 2015-16 SENIOR CENTER GENERAL PURPOSE FUNDING FOR THE SENIOR OPPORTUNITY CENTER AND HARVEST HOUSE

Summary: The consideration of a budget amendment in the amount of $3,800 for Senior Opportunity Center and $3,800 for Harvest House for an appropriation from the State of North Carolina, Department of Health and Human Services, Division on Aging and the Land of Sky Regional Council/Area Agency on Aging through the Senior Center General Purpose Funding.

Funds will be used at the Senior Opportunity Center to 1) Purchase program supplies and equipment for new classes, and 2) purchase furniture for main lobby area. The allocation requires a 25% local match which will be provided via in-kind services of staff time to manage the project.

Funds will be used at Harvest House to purchase supplies and furniture for classrooms. This allocation also requires a 25% local match which will be provided via in-kind services of staff time to manage the project.

Pro:

- Equipment purchases will enhance the customer experience and expand programming opportunities provided

Con:

- None

The allocation will increase the City's General Fund budget by $7,600 in special project accounts designated for the Senior Opportunity Center and Harvest House. The 25% local match will be provided through in-kind services of staff time to manage the projects.

Staff recommends City Council approval of the budget amendment authorizing the City Manager to establish a budget in the amount of 1) $3,800 for Senior Opportunity Center, and 2) $3,800 for Harvest House for facility improvements and equipment.

ORDINANCE BOOK NO. 30 - PAGE 179

E. 2015 NEIGHBORHOOD ENHANCEMENT ENGINEERING DESIGN SERVICES

RESOLUTION NO. 15-218 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A PROFESSIONAL ENGINEERING SERVICES SUPPLEMENTAL AGREEMENT WITH MCGILL ASSOCIATES, FOR THE 2015 NEIGHBORHOOD ENHANCEMENT AREA 1 PROJECT

ORDINANCE NO. 4464 - BUDGET AMENDMENT FOR THE 2015 NEIGHBORHOOD ENHANCEMENT AREA 1 PROJECT

Summary: The consideration of the following items relative to the 2015 Neighborhood Enhancement Area 1 Project ('Project'): (1) a resolution authorizing the City Manager to execute a Professional Engineering Services Supplemental Agreement with McGill Associates, PA, for the

not-to-exceed amount of $698,780; and (2) a budget amendment in the amount of $2,674,500 to combine four capital projects into one in order to save time and money in the bidding and contract administration process.

The Water Resources Department (WRD) has prioritized this Neighborhood Waterline Replacement Project for the current fiscal year and is seeking engineering design and project management assistance for this project. This project will replace existing substandard and failing waterlines in favor of new waterlines, designed and constructed in accordance with the City of Asheville (City) standards. Area 1 projects include approximately 29,220 Linear Feet of predominately 6-inch, 8-inch and 12-inch water main and appurtenances along various streets within the Enka Lake Road, Lindsey Road, Starnes Cove Road, and Emma Road communities.

Through a Request for Qualifications (RFQ) process for engineering services, the City selected four engineering firms to provide on-call professional services for Water Distribution and Storage Projects. As one of the selected firms, the City executed a Master Agreement for On-Call Professional Services for Water Distribution and Storage Projects with McGill Associates, PA, on April 28, 2015. The Master Service Agreement process was conducted to prequalify firms for future projects. Future projects are to be awarded to selected firms through Supplemental Agreement to the executed Master Agreement. No work was awarded to any firm as part of the Master Service Agreement.

If approved, the proposed engineering services described herein will be developed into a Supplemental Agreement under the terms and conditions of the executed Master Agreement. Water Resources staff met with McGill Associates, PA, and negotiated an engineering services agreement for the not-to-exceed amount of $698,780.

Pros:

- McGill Associates, PA, has provided engineering services on City water system improvement projects. Their experience and knowledge of water systems will minimize staff support and input during the design process.
- This project will provide citizens with a more reliable drinking water source and much improved fire protection.

Con:

- Failure to award an engineering services agreement would prevent the WRD from completing this Neighborhood Enhancement Project in a timely manner and delay replacement of the aging existing water system.

This project will include several locations in order to save time and money when bidding the construction portion of the project. The budget amendment will combine four existing capital projects, which will fund the entire amount needed for the engineering agreement and a majority of the estimated amount for the construction portion of the project.

Lindsey Road Current Budget	$ 140,000	
Starnes Cove Road Current Budget		$ 242,000
Enka Lake Road Current Budget		$ 172,500
Gormon Bridge Road Current Budget	$2,260,000	
Subtotal		$2,814,500
Amount Needed For Engineer	($ 698,780)	
Amount Remaining for Construction		$2,115,720

All of the projects shown above were listed separately in the City's CIP budget. The projects are being consolidated so that they are efficiently and cost effectively designed and constructed. The budget amendment associated with this report consolidates the project under one project budget. Additional funds have been submitted on the Water Resources FY 16/17 CIP for the construction portion of the project.

City staff recommends City Council authorize the following relative to the 2015 Neighborhood Enhancement Area 1 Project: (1) the City Manager to execute a Professional Engineering Services Supplemental Agreement with McGill Associates, PA, for the not-to-exceed amount of $698,780; and (2) a budget amendment in the amount of $2,674,500 to combine four capital projects into one in order to save time and money in the bidding and contract administration process.

RESOLUTION BOOK NO. 37 - PAGE 330
ORDINANCE BOOK NO. 30 - PAGE 181

RESOLUTION NO. 15-219- RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A PROFESSIONAL ENGINEERING SERVICES SUPPLEMENTAL AGREEMENT WITH W.K. DICKSON & CO., FOR THE NEIGHBORHOOD ENHANCEMENT AREA 2 PROJECT

ORDINANCE NO. 4465 - BUDGET AMENDMENT FOR THE 2015 NEIGHBORHOOD ENHANCEMENT AREA 2 PROJECT

Summary: The consideration of the following items relative to the 2015 Neighborhood Enhancement Area 2 Project ('Project'): (1) a resolution authorizing the City Manager to execute a Professional Engineering Services Supplemental Agreement with W.K. Dickson & Co., Inc., for the not-to-exceed amount of $567,100; and (2) a budget amendment in the amount of $1,650,000 to combine two capital projects into one in order to save time and money in the bidding and contract administration process.

The Water Resources Department (WRD) has prioritized this Neighborhood Waterline Replacement Project for the current fiscal year and is seeking engineering design and project management assistance for this project. This project will replace existing substandard and failing waterlines in favor of new waterlines, designed and constructed in accordance with the City of Asheville standards. Area 2 project includes approximately 12,900 Linear Feet of predominately 6-inch water line and appurtenances along various streets within the Tiny Farms Subdivision and approximately 13,800 LF of predominately 6-inch water line and appurtenances along various streets within the Mount Carmel Acres Subdivision.

Through a Request for Qualifications (RFQ) process for engineering services, the City of Asheville (City) selected four engineering firms to provide on-call professional services for Water Distribution and Storage Projects. As one of the selected on-call firms, a Master Agreement for On-Call Professional Services for Water Distribution and Storage Projects was executed with W. K. Dickson& Co., Inc. on May 11, 2015. The Master Service Agreement process was conducted to prequalify firms for future projects. Future projects are to be awarded to selected firms through Supplemental Agreement to the executed Master Agreement. No work was awarded to any firm as part of the Master Service Agreement.

If approved, the proposed engineering services described herein will be developed into a Supplemental Agreement under the terms and conditions of the executed Master Agreement Water Resources staff met with W.K. Dickson & Co., Inc., and negotiated an engineering services agreement for the not-to-exceed amount of $567,100.

Pros:

- W.K. Dickson & Co., Inc., has provided engineering services on City water system improvement projects. Their experience and knowledge of water systems will minimize staff support and input during the design process.
- This project will provide citizens with a more reliable drinking water source and much improved fire protection.

Con:

- Failure to award an engineering services agreement would prevent the WRD from completing this Neighborhood Enhancement Project in a timely manner and delay replacement of the aging existing water system.

This project will include two large subdivisions in order to save time and money when bidding the construction portion of the project. The budget amendment will combine two existing capital projects, which will fund the entire amount needed for the engineering agreement and a majority of the estimated amount for the construction portion of the project.

Tiny Farms Current Budget	$ 750,000
Mount Carmel Current Budget	$1,650,000
Subtotal	$2,400,000
Amount Needed For Engineer	($ 567,100)
Amount Remaining for Construction	$1,832,900

All of the projects shown above were listed separately in the City's CIP budget. The projects are being consolidated so that they are efficiently and cost effectively designed and constructed. The budget amendment associated with this report consolidates these projects under one project budget. Additional funds have been submitted on the Water Resources FY 16/17 CIP for the construction portion of the project.

City staff recommends City Council authorize the following relative to the 2015 Neighborhood Enhancement Area 2 Project: (1) the City Manager to execute a Professional Engineering Services Supplemental Agreement with W.K. Dickson & Co., Inc., for the not-to-exceed amount of $567,100; and (2) a budget amendment in the amount of $1,650,000 to combine two capital projects into one in order to save time and money in the bidding and contract administration process.

ORDINANCE BOOK NO. 30 - PAGE 183

RESOLUTION NO. 15-220 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A PROFESSIONAL ENGINEERING SERVICES SUPPLEMENTAL AGREEMENT WITH CDM SMITH, INC. FOR THE NEIGHBORHOOD ENHANCEMENT AREA 3 PROJECT

ORDINANCE NO. 4466 - BUDGET AMENDMENT FOR THE 2015 NEIGHBORHOOD ENHANCEMENT AREA 3 PROJECT

Summary: The consideration of the following items relative to the 2015 Neighborhood Enhancement Area 3 Project ('Project'): (1) a resolution authorizing the City Manager to execute a Professional Engineering Services Supplemental Agreement with CDM Smith, Inc., for the not-to-exceed amount of $672,572; and (2) a budget amendment in the amount of $792,500 to combine three capital projects into one in order to save time and money in the bidding and contract administration process.

The Water Resources Department (WRD) has prioritized this Neighborhood Waterline Replacement Project for the current fiscal year and is seeking engineering design and project management assistance for this project. This project will replace existing substandard and failing waterlines in favor of new waterlines, designed and constructed in accordance with the City of Asheville (City) standards. Area 3 project includes approximately 26,500 Linear Feet of predominately 6-inch water main and appurtenances along various streets within the Kenilworth

and Malvern Hills neighborhoods. Additionally, the project will include approximately 1,000 LF of new 30-inch water main along Tunnel Rd near the Kenilworth neighborhood.

Through a Request for Qualifications (RFQ) process for engineering services, the City selected four engineering firms to provide on-call professional services for Water Distribution and Storage Projects. As one of the selected firms, a Master Agreement for On-Call Professional Services for Water Distribution and Storage Projects was executed with CDM Smith, Inc., on May 27, 2015. The Master Service Agreement process was conducted to prequalify firms for future projects. Future projects are to be awarded to selected firms through Supplemental Agreement to the executed Master Agreement. No work was awarded to any firm as part of the Master Service Agreement.

If approved, the proposed engineering services described herein will be developed into a Supplemental Agreement under the terms and conditions of the executed Master Agreement. Water Resources staff met with CDM Smith, Inc., and negotiated an engineering services agreement for the not-to-exceed amount of $672,572.

Pros:

- CDM Smith, Inc., has provided engineering services on City water system improvement projects. Their experience and knowledge of water systems will minimize staff support and input during the design process.
- This project will provide citizens with a more reliable drinking water source and much improved fire protection.

Con:

- Failure to award an engineering services agreement would prevent the WRD from completing this Neighborhood Enhancement Project in a timely manner and delay replacement of the aging existing water system.

This project will include several locations in order to save time and money when bidding the construction portion of the project. The budget amendment will combine three existing capital projects, which will fund the entire amount needed for the engineering agreement and part of the estimated amount for the construction portion of the project.

Kenilworth Road Current Budget	$ 542,000
Malvern Hills Current Budget	$ 650,000
Beaucatcher Road Current Budget	$ 142,500
Subtotal	$1,334,500
Amount Needed For Engineer	($ 672,572)
Amount Remaining for Construction	$ 661,928

All of the projects shown above were listed separately in the City's CIP budget. The projects are being consolidated so that they are efficiently and cost effectively designed and constructed. The budget amendment associated with this report consolidates these projects under one project budget. Additional funds have been submitted on the Water Resources FY 16/17 and FY 17/18 CIP for the construction portion of the project. Water Resource engineering staff estimate that the total construction cost of this project will be $ 3,376,425.

City staff recommends City Council authorize the following relative to the 2015 Neighborhood Enhancement Area 3 Project: (1) the City Manager to execute a Professional Engineering Services Supplemental Agreement with CDM Smith, Inc., for the not-to-exceed amount of $672,572; and (2) a budget amendment in the amount of $792,500 to combine three capital projects into one in order to save time and money in the bidding and contract administration process.

ORDINANCE BOOK NO. 30 - PAGE 185

RESOLUTION NO. 15-221- RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A PROFESSIONAL ENGINEERING SERVICES SUPPLEMENTAL AGREEMENT WITH KIMLEY-HORN & ASSOCIATES FOR THE NEIGHBORHOOD ENHANCEMENT AREA 4 PROJECT

ORDINANCE NO. 4467 - BUDGET AMENDMENT FOR THE 2015 NEIGHBORHOOD ENHANCEMENT AREA 4 PROJECT

Summary: The consideration of the following items relative to the 2015 Neighborhood Enhancement Area 4 Project ('Project'): (1) a resolution authorizing the City Manager to execute a Professional Engineering Services Supplemental Agreement with Kimley-Horn & Associates for the not-to-exceed amount of $581,900; and (2) a budget amendment in the amount of $2,521,000 to combine eight capital projects into one in order to save time and money in the bidding and contract administration process.

The Water Resources Department (WRD) has prioritized this Neighborhood Waterline Replacement Project for the current fiscal year and is seeking engineering design and project management assistance for this project. This project will replace existing substandard and failing waterlines in favor of new waterlines, designed and constructed in accordance with the City of Asheville standards. Area 4 project includes approximately 25,600 Linear Feet of predominately 6-inch and 8- inch water main and appurtenances within various neighborhoods along Warren Wilson Road, Dogwood Court, Piney Mountain Road, Conestee Street, Waynesville Avenue, Willis Way Alley, North Street, and Hanover Street.

Through a Request for Qualifications (RFQ) process for engineering services, the City of Asheville (City) selected four engineering firms to provide on-call professional services for Water Distribution and Storage Projects. As one of the selected on-call firms, a Master Agreement for On-Call Professional Services for Water Distribution and Storage Projects was executed with Kimley-Horn & Associates on May 11, 2015. The Master Service Agreement process was conducted to prequalify firms for future projects. Future projects are to be awarded to selected firms through Supplemental Agreement to the executed Master Agreement. No work was awarded to any firm as part of the Master Service Agreement.

If approved, the proposed engineering services described herein will be developed into a Supplemental Agreement under the terms and conditions of the executed Master Agreement. Water Resources staff met with Kimley-Horn & Associates and negotiated an engineering services agreement for the not-to-exceed amount of $581,900.

Pros:

- Kimley-Horn & Associates has provided engineering services on City water system improvement projects. Their experience and knowledge of water systems will minimize staff support and input during the design process.
- This project will provide citizens with a more reliable drinking water source and much improved fire protection.

Con:

- Failure to award an engineering services agreement would prevent the WRD from completing this Neighborhood Enhancement Project in a timely manner and delay replacement of the aging existing water system.

This project will include several locations in order to save time and money when bidding the construction portion of the project. The budget amendment will combine eight existing capital

projects, which will fund the entire amount needed for the engineering agreement and is also expected to fund the estimated amount for the construction portion of the project.

Conestee Street Current Budget	$ 121,000
Waynesville Avenue Current Budget	$ 536,000
Hanover Street Current Budget	$ 625,000
North Street Current Budget	$ 360,000
Willis Way Current Budget	$ 150,000
College Street Current Budget	$1,000,000
Dogwood Court (East) Current Budget	$ 105,000
Piney Mountain Church Road Current Budget	$ 160,000
Subtotal	$3,057,000
Amount Needed For Engineer	($ 581,900)
Amount Remaining for Construction	$2,475,100

All of the projects shown above were listed separately in the City's CIP budget. The projects are being consolidated so that they are efficiently and cost effectively designed and constructed. The budget amendment associated with this report consolidates these projects under one project budget.

City staff recommends City Council authorize the following relative to the 2015 Neighborhood Enhancement Area 4 Project: (1) the City Manager to execute a Professional Engineering Services Supplemental Agreement with Kimley-Horn & Associates for the not-to-exceed amount of $581,900; and (2) a budget amendment in the amount of $2,521,000 to combine eight capital projects into one in order to save time and money in the bidding and contract administration process.

RESOLUTION BOOK NO. 37 - PAGE 333
ORDINANCE BOOK NO. 30 - PAGE 187

F. RESOLUTION NO. 15-222 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CHANGE ORDER TO INCREASE THE ENGINEERING DESIGN SERVICES CONTRACT FO SCHNABEL ENGINEERING SOUTH, PC. FOR THE NORTH FORK DAM INTAKE TOWER AND CONDUIT REPAIRS PROJECT

Summary: The consideration of a resolution authorizing the City Manager to execute a change order in the amount of $175,000 to increase the engineering design services contract for Schnabel Engineering South, PC, (Schnabel) from a total in the amount of $302,400 to $477,400 for the North Fork Dam Intake Tower and Conduit Repairs Project (North Fork Dam Project).

On August 26, 2014, City Council (Council) authorized the City Manager to execute a professional engineering services agreement with Schnabel, for the proposed amount of $302,400 for bidding and construction oversight services for the North Fork Dam Project. The original contract included one bidding phase and a construction period lasting 150 calendar days from notice-to-proceed to substantial completion. Schnabel is requesting a time extension and increase in the contract amount for construction oversight services associated with the rehabilitation of the interior of the intake tower, concrete infilling of the outlet works conduit, and repairs to the tower bridge.

Schnabel was contracted to perform services for one bidding process. The project had to be bid three times before it was successfully awarded. The first bid only had one bidder and the second bid was contested by Haren Construction (Haren). As a result of this protest, the City decided to re-bid a third time rather than encounter potential legal challenges and schedule delays. Haren was awarded the contract as the successful low bidder on the third bid.

Based on requests from bidders, the construction contract time was extended by a total of 50 calendar days which requires Schnabel to reciprocate by also extending its contract time. Also, Schnabel anticipates that the project will not be completed until almost three months after Haren's current schedule. In order to continue its construction services to complete the construction oversight of Haren's work, a change order is needed to increase the contract amount by an additional $175,000.

Pro:

- Approval of the change order will allow the city to complete the engineering services for the project.

Con:

- If the change order is not approved, construction administration services will need to be performed through other means. This would require a contract with another consulting firm or internal performance of these services which are outside of the City scope of knowledge.

The funding needed for this change order is currently allocated within the North Fork Dam Project in the Water Resources Capital Improvement Projects (CIP) Fund.

Staff recommends Council adopt a resolution authorizing the City Manager to execute a change order in the amount of $175,000 to increase the engineering design services contract for Schnabel Engineering South, PC, from a total in the amount of $302,400 to $477,400 for the North Fork Dam Intake Tower and Conduit Repairs Project.

RESOLUTION BOOK NO. 37 - PAGE 334

G. ORDINANCE NO. 4468 - BUDGET AMENDMENT TO ALLOCATE COLLECTED AND ANTICIPATED REVENUE TO TOWER MAINTENANCE CAPITAL PROJECT

Summary: The consideration of a budget amendment in the amount of $167,000 to allocate collected and anticipated Fiscal Year 2015/2016 revenue from tenant leases to continue to fund the Tower Maintenance Capital Project.

This Towner Maintenance Capital Project, established in 2008 underwrite a cost savings plan for the City's own telecommunication operations, is funded by revenue from a limited number of telecommunication tower leases. This budget adjustment will continue to allocate that revenue as well as the anticipated revenue for Fiscal Year 2015/16 to the capital project.

These funds will be used to perform continuing maintenance on City-owned telecommunications towers as well as to fund a needed lifecycle tower replacement.

Pros:

- Continues specific revenue stream to support telecommunications tower maintenance.
- Reduces the impact on the city's general fund.
- Helps support public safety communications operations.

Con:

- None noted

Continuing to allocate these funds allows staff to better provide the necessary infrastructure to maintain and improve the City's public safety radio system. There is no impact to the General Fund budget.

Staff recommends City Council adopt a resolution authorizing the City Manager to adopt a budget amendment in the amount of $167,000 to continue to allocate revenue to the Tower Maintenance Capital Project.

ORDINANCE BOOK NO. 30 - PAGE 189

H. ORDINANCE NO. 4469 - BUDGET AMENDMENT TO ALLOCATE FUNDING TO THE DEVELOPMENT SERVICES TECHNOLOGY CAPITAL PROJECT

Summary: The consideration of a budget amendment in the amount of $320,000 to allocate funding to the Development Services Technology capital project.

Through fees associated with the development review process, the City receives Capital Improvement Program (CIP) funding for technology improvements that serve Development Services.

Examples of those improvements include:

- Fund ongoing software maintenance
- Replace/upgrade staff computers
- Electronic Plans review software and services
- Consulting services to further enhance the Accela software.
- Upgrade connection speed to City Hall
- Procure dedicated hardware to run Accela to increase performance.
- Document Management integration

This budget amendment will appropriate $320,000 in revenue that has already been collected and allocate it to the Development Services Technology capital project.

Pros:

- User fees are dedicated to funding technology improvements that will benefit them.
- Reduces demand on city's general fund.

Con:

- None noted

Allocating these funds allows us to made needed technology upgrades to the Development Services Function. There is no impact to the General Fund budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to adopt a budget amendment in the amount of $320,000 to allocated collected revenue to the Development Services Technology capital project.

ORDINANCE BOOK NO. 30 - PAGE 191

I. RESOLUTION NO. 15-223 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO CONSTRUCT SIDEWALK ALONG NEW LEICESTER HIGHWAY FROM PATTON AVENUE TO THE CITY LIMITS

Summary: The consideration of a resolution authorizing the City Manager to sign and execute a locally administered project agreement with the N.C. Dept. of Transportation (NCDOT) for a project (identified as U-5190) to construct a sidewalk along US 63 (New Leicester Highway) from Patton Avenue to the city limits of Asheville.

This agreement will allow for the construction of sidewalk alongside New Leicester Highway. Currently, very little sidewalk exists on this road. The need for a sidewalk on this road is demonstrated by the "goat paths" that can be found on the shoulders of the road. Also, existing ART bus stops are not currently served by sidewalk.

Pros:

- Will lead to the installation of a badly needed sidewalk on New Leicester Highway.
- Will provide sidewalk access to existing ART bus stops.

Con:

- Project management and contract administration will consume staff time.

The City will be required to provide the non-federal match of up to $726,000 and cover all costs that exceed the total estimated cost. This project is already budgeted in the adopted Capital Improvement Program.

City staff recommends City Council adopt the attached resolution authorizing the City Manager to sign and execute a locally administered project agreement with the NCDOT to construct a sidewalk along US 63 (New Leicester Highway) from Patton Avenue to the city limits of Asheville.

RESOLUTION BOOK NO. 37 - PAGE 335

J. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN EXTENSION WITH FIRST TRANSIT FOR THE OPERATION OF THE ASHEVILLE TRANSIT SYSTEM

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda, with the deletion of Consent Agenda Item J. This motion was seconded by Councilman Bothwell and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

J. RESOLUTION NO. 15-224 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN EXTENSION WITH FIRST TRANSIT FOR THE OPERATION OF THE ASHEVILLE TRANSIT SYSTEM

Summary: The consideration of a resolution authorizing the City Manager to extend the mass transit management agreement with First Transit, Inc. (First Transit) until June 30, 2016, to continue managing the daily operation of Asheville Redefines Transit (ART) System.

First Transit has managed the transit system since July 1, 2008, through two separate management agreements, the first one from July 1, 2008 to December 31, 2011, and the second one from January 1, 2012, to date. The current contract with First Transit expires on December 31, 2015, and the City decided not to exercise the option to renew the agreement but requested

an extension until June 30, 2016, so that First Transit could negotiate the collective bargaining agreement which expires on January 31, 2016.

At the same time, the City will seek proposals from transit management providers to operate the City's transit system. The extension will allow staff to go through the procurement process and have a new contract in place once the collective bargaining agreement has been negotiated by the beginning of Fiscal Year 2017.

During this period First Transit will continue furnishing all management and supervisory services required and necessary for the efficient and economical operation of transit services under the policies, standards and procedures established by the City of Asheville until a new contract is in place, by July 1, 2016.

The Transit Committee reviewed this item but did not have quorum to vote at the time it was brought to them. The Multimodal Transportation Commission voted to exercise the option to renew for one more year and to have a new contract by January 1st, 2017.

Pros:

- The transit system will continue to operate in a safe and efficient manner.
- First Transit will negotiate a new collective bargaining agreement.

Con:

- Total cost of $141,552.54 ($23,592.09/month) as established in the compensation schedule for year 5 of the contract and agreed with First Transit.

The total project cost until June 30, 2016 is $141,552.54. These funds are budgeted in the current Fiscal Year in the Transit Services Fund.

City staff recommends that City Council adopt a resolution authorizing the City Manager to extend the mass transit management agreement with First Transit until June 30, 2016, to continue managing the operation of the City of Asheville Transit System and to negotiate a new collective bargaining agreement.

Ms. Sabrah n'haRaven, Ms. Diane Allen and a bus driver felt that a 6-month extension is too long as there are serious safety concerns now regarding the operation of the system.

In response to Councilman Bothwell, Mr. Putnam explained the reason for the 6-month extension and the Request for Proposals process. Primarily, staff wants to make sure that we have enough time to solicit all available contractor that want to be involved and vet the project as thoroughly as we can.

Councilman Smith hoped that staff will try to shorten the 6-month extension if possible.

In response to Councilman Bothwell, Mr. Putnam said that staff will re-double their efforts to insist on performance under the contract.

Councilman Smith moved for the adoption of Resolution No. 15-224. This motion was seconded by Vice-Mayor Hunt and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 336

III. PRESENTATIONS & REPORTS: None.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE ESTABLISHING REQUIREMENTS FOR UTILITY SUBSTATIONS

Mayor Manheimer said that she has received a letter from Mr. Robert Sipes, General Manager of the Western Zone of Duke Energy, which stated in part that "At your request to keep looking for another location for the substation along Hill Street, next to the Isaac Dickson Elementary School, the company will agree to hold off submitting permits for these three substations until Jan. 2017. With this delay, we respectfully request that you wait and consider the ordinance after we can work with city leadership to attempt to locate another suitable site."

Councilman Davis moved to continue this public hearing until August 23, 2016. This motion was seconded by Councilman Pelly and carried unanimously.

B. PUBLIC HEARING CONSIDER AMENDING SECTIONS 7-2-5, 7-8-1, 7-16-1(C)(9) AND 7-18-2(B) OF THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO THE DEFINITION OF "HOMESTAY" AND THE DISTRICTS IN WHICH HOMESTAYS ARE PERMITTED IN THE TABLE OF PERMITTED USES; THE STANDARDS REQUIRED FOR HOMESTAYS WHICH ARE DESIGNATED AS A USE BY RIGHT SUBJECT TO SPECIAL STANDARDS

ORDINANCE NO. 4470 - ORDINANCE AMENDING SECTIONS 7-2-5, 7-8-1, 7-16-1(C)(9) AND 7-18-2(B) OF THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO THE DEFINITION OF "HOMESTAY" AND THE DISTRICTS IN WHICH HOMESTAYS ARE PERMITTED IN THE TABLE OF PERMITTED USES; THE STANDARDS REQUIRED FOR HOMESTAYS WHICH ARE DESIGNATED AS A USE BY RIGHT SUBJECT TO SPECIAL STANDARDS

Mayor Manheimer said that this is a continuation of the August 25, 2015, public hearing. A homestay is where you rent out some portion of your home for a short period of time. Homestays have been legal in Asheville since 2006. The short term rental issue is not before City Council at this time. A short term rental is the renting of a stand alone home for overnight stays less than 30 days and those have been illegal in residential districts for many years. She reiterated that the City of Asheville does not receive the room tax and City doesn't get any more sales tax.

Principal Planner Shannon Tuch said that this public hearing was held on August 25, 2015, at which time Council deferred consideration. On September 8, 2015, City Council referred the amendment to the City Council Planning & Economic Development Committee.

Ms. Tuch said that the City of Asheville has been engaged in a long and public conversation over the proliferation of short term rentals in the city's jurisdiction over the last two years. Most recently, the Asheville City Council reviewed an ordinance amending standards for *Homestays* on August 25, 2015. Significant public comment, both for and against, homestay operations was received at the hearing and Council delayed the vote to allow for additional research and input before a final decision is made. Specific concerns voiced by the Council during the public hearing included:

(1) Ensuring that homestay operations preserve the health and safety of both residents and visitors;
(2) Protecting the community's general welfare by preserving much needed housing and promoting housing security; and
(3) Minimizing impacts on the residential neighborhoods by integrating these non-residential uses in a manner that would preserve the harmony and character of the neighborhoods within which the homestay operations were located.

In discussing these concerns, several specific points related to the regulation of homestays were identified and Council directed staff to explore these points further with the Planning & Economic Development Committee. As a result of this research, analysis and committee discussion, staff is proposing a revised Ordinance for the Council's consideration. Also represented in the revised Ordinance is a recommendation to add language that would allow non-conforming properties that were legally established (but which subsequently became non-conforming due to changes to the UDO) to be eligible to apply for a homestay application, unlike other Uses-by-right, Subject-to-Special-Requirements (USSR's). While this is currently the standard and was not originally included in the changes, it is now better understood that without this addition as much as 30% of all residential properties would be ineligible for a homestay application. This is contrary to the goal of expanding the economic opportunity to more citizens in a way that could also improve housing security. No other USSR is thought to achieve the same opportunity nor are they controlled and regulated to the same extent that mitigates potential nuisance, harmony or welfare concerns.

This proposal is consistent with goals outlined n the Comprehensive Plan and City Council Strategic Plan, and because allowing and regulating homestays is a reasonable response to a social and economic phenomenon that effectively seeks to balance a variety of city adopted goals, staff recommends approval of the revised wording amendment modifying the city's *Homestay* standards.

There was considerable discussion amongst the Council while Ms. Tuch reviewed a comparison table of what the standard is, the current UDO requirement, the Planning & Zoning Commission recommendation, and alternative standards.

Mayor Manheimer opened the public hearing at 6:31 p.m.

Leaving out comments regarding short term rentals, the following individuals expressed concern about the proposed homestay regulations as follows: homestays should be self-regulated; don't require off-street parking for a homestay; allow accessory structures or accessory dwelling units to be used for any part of the homestay operation; there is no criteria for inspections and they place an unnecessary burden on City staff; request to postpone action until the new seated City Council takes office; free issuance of violations; allow non-conforming properties to be eligible for a homestay permit; and this ordinance is being amended based on only a few complaints received:

Lisa Shoemaker, representative of the Asheville Home Sharing Network
Jackson Tierney, resident on Magnolia Avenue
Kama Ward
John Farquhar
Helen Powell-Busch, Five Points neighborhood resident
Rita Hayes
A resident
Tom Gallo
A north Asheville resident
Eric Shank
Lonnie Blakeslee
Patrick Lockett
Charlie Soderquist
Matt Levitt
Laurie Fisher

The following individuals spoke in support of the proposed ordinance for several reasons, some being, but are not limited to: need actual proof of residency; there should be no commercial lodging in neighborhoods; suggest a cap on the number of homestays per

neighborhood; potential loss of housing units; neighbors don't want to live adjacent to non-transient tourists; and suggest a 500 foot separation requirement for each homestay:

Stuart Alford
Jane Mathews
David Rodgers

Mayor Manheimer closed the public hearing at 7:36 p.m.

Mayor Manheimer explained that in order for City Council to consider allowing accessory structures or accessory dwelling units to be used for any part of the homestay operation would require an ordinance amendment which would need to be reviewed by the Planning & Zoning Commission. Personally, she felt we need to look at expanding the definition of homestay to include accessory dwelling units.

The majority of the discussion surrounded (1) the 25% maximum floor area dedicated to homestay standard vs. the number of bedrooms allowed; (2) number of documents required to establish proof of residency from the full-time resident of the property; (3) off-street parking not being required for a homestay; (4) non-conforming properties being eligible for a homestay permit; (5) allowing concurrent home occupations (which home occupation is defined in the UDO) in a residence with an active homestay use; (6) the process a person would have to go through to get a permit for a homestay; (7) one homestay permit for person; and (8) the insurance requirement.

After hearing that there is only a very small percentage of complaints regarding homestays, Councilman Bothwell questioned how much does City Council want to regulate something that hasn't been causing a problem.

Mayor Manheimer was concerned about the integrity of the neighborhood - balancing what makes Asheville special, but allowing people to make their living experience more affordable. She hoped by expanding homestay usage to be as user friendly as possible, while still prohibiting whole house short-term rentals, we will try to find that balance.

Councilman Bothwell supported striking the 25% maximum floor area dedicated to homestay and instead allow up to three bedrooms; and strike the off-street parking requirement.

Councilwoman Wisler suggested not counting the number of bedrooms, but rather limit a total percent to the house - maybe 40%.

Councilman Smith felt that this issue is property rights vs. residential zoning and individual need vs. community needs. It's important that Council try to strike a balance. Our existing ordinance is too restrictive. What Council is considering is creating a fundamental change in our neighborhoods. He supported striking the 25% maximum floor area dedicated to homestay and instead allow up to two bedrooms. He did note that the Affordable Housing Advisory Committee does advise against short term rentals and accessory dwelling units but supports the homestay use. We do need to strike a balance and allow owners seeking to make it affordable for them to have that opportunity.

Councilman Pelly and Councilman Davis felt that home occupations should be permitted concurrently in a residence with an active homestay use. He felt the standard is too vague right now and there are many people who work at home that have a very low impact on the community.

Vice-Mayor Hunt felt the big question is whether we want to allow commercial enterprises into residential neighborhoods. He felt we need to be careful in crafting standards that would allow de facto short term rentals to occur under our ordinance. He didn't believe our inability to

limit multiple property ownership by one financial interest. The integrity of community life in our neighborhoods is important. He could not support ordinance changes that do not include either a two bedroom maximum, and either a 500 foot separation or a maximum of 100 nights per year. He felt if we go beyond that level we are inviting the cleaver investors to come in and start taking up housing stock and hollowing out our neighborhoods.

Councilman Bothwell noted the demand for this is not infinite. He felt we need to move forward with this amendment because of the enforcement piece, or if this is postponed, he would want to see a stay on all enforcement.

With all the discussion on these standards, Councilman Smith suggested Council move forward with as close to consensus on the standards as they can, with a provision that certain provisions be reviewed in 4, 8 and 12 months. During these reviews, Council will be looking for the number of complaints received, number of permits issued, and then staff concerns that have arisen since adoption.

In response to Councilman Davis, Ms. Tuch said that if nuisance complaints are filed, the City has the option to withdraw their homestay permit.

Councilwoman Wisler wanted the public to be aware that this ordinance may change after hearing the staff updates.

Councilman Smith moved to amend the definition of homestay as follows: "Homestay means a private, resident occupied dwelling, with up to two guest rooms where overnight lodging accommodations are provided to transients for compensation and where the use is subordinate and incidental to the main residential use of the building. A homestay is considered a 'Lodging' use under this UDO.", and find that the request is reasonable, is in the public interest, and is consistent with the Comprehensive Plan and other adopted plans by expanding an existing economic opportunity to more residents of Asheville. This motion was seconded by Councilman Bothwell and carried unanimously.

Councilman Smith moved to approve the Planning & Zoning Commission recommendations with the following amendments: (1) subsection (c) be amended that two or more documents establishing residency shall be supplied from an approved list of documents and language defining "present and residing,"; (2) subsection (d) be stricken entirely to delete the 25% maximum floor area dedicated to homestay; (3) no change to subsection (f) as the current ordinance states that no additional off-street parking is required for a homestay; (4) delete reference to accessory structures or accessory dwelling units; (5) addition to restrict one permit per parcel/lot; (6) subsection (j) be stricken to delete the provision that home occupations shall not be permitted concurrently in a residence with an active homestay use; (7) addition to restrict one permit per owner; (8) addition to that non-conforming properties be eligible for a permit; and find that the request is reasonable, is in the public interest, and is consistent with the Comprehensive Plan and other adopted plans by expanding an existing economic opportunity to more residents of Asheville. This motion was seconded by Councilman Bothwell.

When Vice-Mayor Hunt clarified that there must be a full-time resident of the property must be present and residing in the home when lodgers are present, he stated that he could not support the motion.

The motion made by Councilman Smith and seconded by Councilman Bothwell regarding amendments to the current ordinance carried on a 6-1 vote, with Vice-Mayor Hunt voting "no."

Councilman Smith moved to receive a staff report on the ordinance in 4, 8 and 12 months as it relates to number of permits issued, complaints received and other staff concerns that have arisen over the course of the process. This motion was seconded by Councilman Bothwell and carried unanimously.

Councilman Smith moved to approve the Table of Permitted Uses with respect to the homestay use and find that the request is reasonable, is in the public interest and is consistent with the Comprehensive Plan and other adopted plans by expanding an existing economic opportunity to more residents of Asheville. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 30 - PAGE 193

V. UNFINISHED BUSINESS: None

VI. NEW BUSINESS:

A. MOTION TO APPROVE AN ADDITIONAL FULL-TIME EQUIVALENT POSITION FOR A DOWNTOWN/CENTRAL BUSINESS DISTRICT COORDINATOR

Community and Economic Development Director Sam Power said that action is being requested on an additional FTE for fiscal year 2015-16 for a Downtown/Central Business District coordinator, to be funded from Parking Fund and 50% from the Public Works Department within the General Fund.

The position will be funded from the Parking Fund and the Public Works Department of the General Fund; therefore, no budget amendment is being brought forth as the total impact is anticipated to be less than $50,000 to fund the salary, benefits and other miscellaneous expenses associated with the for the remainder of FY 2015-16. This ongoing position will be responsible for coordinating City initiatives in downtown and the south slope, establishing and maintaining relationships with the multiple stakeholder groups involved in downtown Asheville, and be available to work directly with stakeholders and citizens regarding downtown issues.

Downtown Asheville - Downtown Asheville is important to a number of stakeholder groups, including residents, property and business owners, hoteliers and restaurateurs, as well as visitors to the City. Staff recognizes that it is extremely important to coordinate City infrastructure and operational investment in downtown with the needs of residents, public safety, development activity, tourism interests and the business community. In order to accomplish this end, staff has identified that a full-time equivalent position should be added to as the point person to ensure that the City is addressing the needs of the different groups.

Because one of the key issues facing downtown is parking, 50% funding for the position from the Parking Fund, an enterprise fund of the City, is appropriate. This position will be responsible for continued tracking and analysis of parking in the downtown and south slope area in the interests of the stakeholder groups discussed above.

Parking Fund Revenue Growth - The Parking revenue performance is excellent. The newest parking deck, at 51 Biltmore (Aloft Hotel) downtown, is outperforming the pro forma estimates and is expected to continue to do so. While this deck is not self-supporting because of outstanding construction debt, the other parking decks belonging to the City of Asheville are also high performing and have no remaining outstanding debt associated with them. Below is a summary of the expected performance as of the Parking Fund for FY 2015-16.

Parking Fund

	Adopted Budget	Year End Estimate	Pos. (Neg.) Budget Variance
Revenue	4,625,144	5,000,000	374,856

Expenditure	4,625,144	4,486,390	138,754
Rev. Over/(Under) Exp.	0	513,610	--

All categories of parking revenues are exceeding projections for the first quarter, especially transient, after hours and monthly parking. Monthly parking demand has exceeded our capacity in all surface lots and in three of the four garages. Biltmore Avenue Garage still has a few monthly spaces available but is experiencing huge demand for transient (hourly) parking. Expenditures are expected to rise due to unforeseen roof repairs at Civic Center and Wall Street garages. In addition, new informational signage will be ordered for Rankin Avenue and Civic Center garages. These signs will provide needed information about the existing capacity of said garages; especially important at the intersection of Vanderbilt Place and Haywood Street.

The following is recommended for Council consideration and action:

- Authorize the addition of one full-time equivalent (FTE) position to be funded 50/50 General Fund and Parking Fund.

This action allows staff to move forward with plans to coordinate City initiatives in the downtown and south slope areas with stakeholder groups.

Pro:

- Increased expertise specific to the downtown and south slope areas
- Staff visibility and better coordination between City departments and stakeholder groups

Con:

- None.

The $50,000 additional expense will have minimal impact on the performance of the Parking and General Funds. As of the end of Quarter 1, Fiscal Year 2015-16 the Parking Fund is performing above expectations. The Public Works Department will fund the General Fund portion from existing budget intended for contract work.

City staff recommends City Council approve the addition of one full-time equivalent position for a downtown coordinator (title to be determined).

Councilman Davis said that the Downtown Commission does support this position but he felt they envisioned a stronger downtown manager position.

When Councilman Bothwell asked how this position fits in with actions already being tackled by the Transportation Department, Mr. Powers said that as with all other issues, having additional staff capacity has been identified as being helpful to those issues.

When Mayor Manheimer asked for public comment, no one spoke.

Councilman Davis moved to approve the addition of one full-time equivalent position for a downtown coordinator. This motion was seconded by Councilwoman Wisler and carried unanimously.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Regarding the homestay ordinance, Ms. Jane Mathews asked that during the 4, 8 and 12 month review that staff also look at the statistic regarding the loss of housing.

Councilman Smith updated the Council on the Housing Summit held on November 16, 2015, noting that a second one will be held in the spring.

PRIMARY ELECTION RESULTS – CITY OF ASHEVILLE – OCTOBER, 6, 2015; GENERAL ELECTION RESULTS – CITY OF ASHEVILLE – NOVEMBER 3, 2015

Attached hereto as Exhibit "A" is the abstract containing the number of legal votes in the Primary Election, City of Asheville, held on October 6, 2015. Also attached as Exhibit "B" is the abstract containing the number of legal votes cast in the General Election, City of Asheville, held on November 3, 2015.

CLOSED SESSION

At 8:41 p.m., Councilwoman Wisler moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(a)(3). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including, but not limited to, a lawsuit involving the following parties: Rebecca Robertson, Wann Near, Christal Weatherly and the City of Asheville. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3); and (3) To discuss matters relating to the location or expansion of industries. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(4). This motion was seconded by Councilman Pelly and carried unanimously.

At 9:22 p.m., Councilman Davis moved to come out of closed session. This motion was seconded by Councilman Pelly and carried unanimously.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 9:22 p.m.

Tuesday - December 1, 2015 – 4:00 p.m.

ORGANIZATIONAL SESSION:

Mayor Manheimer welcomed everyone to the organizational session.

The Marine Corp JROTC led City Council in the Pledge of Allegiance.

Asheville Senior Firefighter Bentley Andrews sang the National Anthem.

Mayor Manheimer then introduced her father Dr. Ronald J. Manheimer who composed the invocation.

The Honorable J. Calvin Hill, Buncombe County Chief District Court Judge, administered the Oath of Office to the following:

Council Member Brian Douglas Haynes
Council Member Julie Virginia Mayfield
Council Member William Keith Young

ELECTION OF VICE-MAYOR

Councilman Gordon Smith moved to nominated Councilwoman Gwen Wisler as Vice-Mayor of the City of Asheville. This motion was seconded by Councilman Cecil Bothwell and carried unanimously.

SWEARING-IN ADDRESS

Mayor Manheimer gave a brief address about working together to build our community.

REMARKS - MEMBERS OF COUNCIL

Councilman Haynes, Councilwoman Mayfield and Councilman Young each expressed their honor to be allowed to serve the citizens, appreciated the support of their family and friends, and looked forward to working for and with City residents.

ADJOURNMENT:

Mayor Manheimer adjourned the organizational meeting at 4:25 p.m.

Magdalen Bowlson
City Clerk

Esther E. Manheimer
Mayor

Tuesday – December 8, 2015 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Gwen C. Wisler; Councilman Cecil Bothwell; Councilman Brian D. Haynes; Councilwoman Julie V. Mayfield; Councilman Gordon D. Smith; Councilman W. Keith Young; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Boy Scouts from Troop 91 led City Council in the Pledge of Allegiance.

ANNOUNCEMENTS

Mayor Manheimer asked for a moment of silence in memory of Taylor Hunt, son of former Vice-Mayor Marc Hunt.

Mayor Manheimer said Happy Hanukkah and since the City Council's next formal meeting will not be until January 12 2016, she wished all happy holidays.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER, 17, 2015, FORMAL MEETING; AND THE DECEMBER 1, 2015, ORGANIZATIONAL MEETING

B. MOTION ADOPTING ASSIGNMENT OF BOARDS & COMMISSIONS MEMBERS/LIAISONS FOR 2014-15

Summary: City Clerk Burleson has a complete listing of all appointments made for City Council liaison and mandatory seats for Council on the various boards and commissions.

C. RESOLUTION NO. 15 - 225 - RESOLUTION ADOPTING THE 2016 CITY COUNCIL MEETING SCHEDULE

Summary: City Council Formal Meetings will be held at 5:00 p.m. on the 2nd and 4th Tuesdays of each month in the Council Chamber – 2nd Floor of City Hall Building, Asheville, N.C. The following meetings are hereby cancelled: Tuesday, July 12, 2016; Tuesday, August 9, 2016; Tuesday, November 22, 2016; and Tuesday, December 27, 2016.

RESOLUTION BOOK NO. 37 - PAGE 337

E. RESOLUTION NO. 15-226 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CHARTWELL STAFFING SOLUTIONS FOR TEMPORARY SERVICES IN THE PARKING GARAGES, SURFACE PARKING LOTS AND OTHER FACILITIES

Summary: The consideration of a resolution authorizing the City Manager to enter in to a contract with Chartwell Staffing Solutions, Inc. for temporary services in the City's parking garages, surface parking lots, and other facilities during the period of December 1, 2015 through June 30, 2016.

The City of Asheville, through the Parking Services Division, currently operates four parking garages and several monthly parking and pay-by-space surface parking lots downtown. Parking Services Division uses a combination of City employees and administrative contract temporary workers to provide service and customer assistance in these facilities and lots. Generally, City employees work during the business day and early evenings while contract temporary services are used for fill-ins, special events, and to extend garage and public restroom hours during late evenings, weekends, and holidays. Use of temporary workers allows the greatest flexibility as needs vary greatly depending on time of year and events booked at the U.S. Cellular Center, outside special events, and other large venues downtown. On some days Parking Services may only need one temporary service employee to fill in for a City employee sick or on vacation. At other times, Parking Services may need six to 15 to support a major event downtown.

In late March 2015 Parking Services requested and received bids from interested vendors in providing temporary service employees. Eight vendors responded. Chartwell Staffing Solutions provided the lowest bid for the service. They are located in Charlotte, North Carolina with local recruiters in the Asheville area servicing their existing clients.

City Council delayed action on this item at their meeting on July 28, 2015, in order to give staff an opportunity to improve overall garage cleanliness, to develop an action plan to improve customer service when exiting the garages when the booth attendants are not on duty, and to possibly increase the hours for the public restrooms.

The stairwells in all four parking garages are now power washed on a monthly basis (this work began in August), the Biltmore Avenue Parking Garage public restrooms have been power washed, the walls have been repainted, and the floors have been replaced, and the roofs for the stairwells in the Civic Center and Wall Street Parking Garages are currently being repaired. Once these repairs are completed, the stairwells in all four parking garages will be repainted (this work will be accomplished throughout the winter months depending on weather conditions). Staff has received positive feedback regarding this work.

Regarding a long-term solution to improve customer service when exiting the garages, staff is researching a call center business model that the City of Greenville, South Carolina uses and we plan on moving towards that model during FY 2016-17. In addition, staff will be issuing a Comprehensive Parking Study RFP during January 2016 to research and document all available new technologies including pros and cons and cost information including pay-on-foot options. It will also include a 10-year financial model that will help staff determine when more capital debt could be incurred including fee increases needed to support capital needs.

The issue regarding public restrooms throughout the Central Business District is currently being reviewed by staff and recommendations will probably be included in the overall budget process.

Pros:

- Provides safe and convenient facilities for residents and visitors parking.

- Using temporary service employees is the most cost effective and flexible manner to augment the Parking Services Division's staffing requirements.
- Allows parking Services to capitalize on extended weekend/nights/holiday hours and special event parking to provide better customer service and to bring in additional revenue.

Con:

- Total cost of $130,000.

The necessary funds for the contract are already budgeted in the Parking Services' Operating Budget for FY 2015-16.

City staff recommends that City Council adopt a resolution authorizing the City Manager to sign a contract with Chartwell Staffing to Solutions to provide temporary services in the City's parking garages and lots at a total maximum cost of $130,000.

RESOLUTION BOOK NO. 37 - PAGE 338

F. ORDINANCE NO. 4471 - BUDGET AMENDMENT FOR THE CONTINUED PARTNERSHIP EFFORTS WITH THE CORPS OF ENGINEERS FOR THE SWANNANOA RIVER FLOOD MITIGATION PROJECT

Summary: The consideration of a budget amendment in the amount of $360,000 from Stormwater Fund Balance which would allow the City to continue the partnership with the Corps of Engineers for the flood mitigation efforts along the Swannanoa River.

The Hurricane Recovery Act of 2005 (Senate Bill 7) allocated funds for planning and implementation of projects to aid in flood damage reduction for North Carolina communities hardest hit by the 2004 hurricane season. The Biltmore Village area of the City of Asheville (within the Swannanoa River watershed) was named as a recipient of this funding. The city previously hired a consultant (Brown and Caldwell) to perform the Swannanoa Flood Risk Management Project which identified potential flood mitigation projects.

City Council authorized the City Manager to enter into a Feasibility Cost Share Agreement (FCSA) with the US Army Corps of Engineers. This partnership with the Corps has allowed the City to continue the flood mitigation efforts and to focus on key projects that will be most effective in the flood mitigation efforts. The three key projects the Corps has identified is the removal of the flood plain fill near the Biltmore Avenue Bridge, reconfiguration of the Lake Craig Dam and the peak flow control structure at Warren Wilson College. In order to complete the feasibility report for the Swannanoa Flood Risk Management Project, additional efforts are needed to complete the report.

The City has a goal to continue to be stewards of the environment. Through this continued partnership the Corps of Engineers will finalize the flood mitigation efforts along the Swannanoa and will develop a recommendation for construction projects. The feasibility phase has to be complete prior to Construction activities beginning in order to receive Corps partnership funding.

The FCSA will recognize a majority of the work completed by the Brown and Caldwell and McGill on Phase 1 of the Lake Craig Project as "work-in-kind" matching to Section 205 funds allotted to the Project. However, in order to complete the work requested of the U.S. Army Corps of Engineers, agreement to a cash match of an additional $360,000 is required. In addition, once identified flood control projects have proceeded to the final design and construction stages and as additional study needs are identified, additional funding may be required.

Pros:

- The cooperation of the U.S. Army Corps of Engineers and execution of a Federal Cost Sharing Agreement will position our community to receive Federal investment in flood control projects for the construction of the measures
- Flood mitigation efforts will reduce the depth of flooding to businesses and infrastructure within the Swannanoa River area.
- By continuing this feasibility study, the City is a step closer to having projects implemented.

Cons:

- The project management and coordination will consume staff time and City Funds.
- Payment requires an appropriation from Stormwater fund balance.

The additional funds for the continuation of the partnership will come available from fund balance in the Stormwater Fund. The Stormwater Fund ended FY 2014/15 with approximately $2.0 million in available fund balance. After this appropriation, Stormwater will have available fund balance of approximately $1.64 million. City staff will coordinate with the Corps and participate in the continued development of future projects.

City staff recommends City Council a budget amendment for the continued partnership with the US Army Corps of Engineers for the Flood Risk Management Project.

ORDINANCE BOOK NO. 30 - PAGE 196

G. RESOLUTION NO. 15-227 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A GENERAL SERVICES CONTRACT WITH PASSPORT PARKING INC. FOR ON-STREET METERED PARKING

Summary: The consideration of a resolution authorizing the City Manager to enter into a general services contract with Passport Parking, Inc. in order to enable customers to use credit/debit cards in addition to cash to pay for their on-street metered parking experience in downtown Asheville.

Passport Parking is a "cloud-based" pay-by-phone with validation system that enables customers to use credit/debit cards in addition to cash to pay for their on-street metered parking experiences in downtown Asheville. Customers simply access the system through their cell telephones by using voice, text, or a mobile "app" (with a smart phone). Individual accounts are secured with the specific telephone number and a unique PIN number (similar to using an ATM machine).

The system works with our existing parking meters without any needed changes or "add-ons"; therefore, there was **no** initial capital outlay. The existing parking meters continue to accept coins (the system simply provides other options for payment). City Council authorized City staff to charge a convenience fee of $0.25 per transaction on August 14, 2012 (Ord # 4105) and **no** complaints regarding the convenience fee have been received (Passport Parking has already agreed to leave the convenience fee at $0.25 per transaction). Although the anticipated annual expense of the contract is about $30,000 +/-, staff is seeking City Council approval because the total value of the contract will probably exceed $90,000 if the contract remains in effect for the initial 3-year time period and two 1-year extension time periods (the total maximum length of the contract is 5 years).

We began using Passport Parking during September 2012 as a test at 100 parking meters and then expanded the system to all of our parking meters during February 2013. We have now completed two full fiscal years (at full implementation); specifically, FY 2013-14 and FY 2014-15 and the results have been outstanding. Transactions have ranged from a low of 3,500 per month during July 2013 to a high of 8,600 per month during June 2015. During the past seven consecutive months, transactions have been greater than 8,000 per month and during two

of these months, we exceeded 9,000 transactions. 1,400 new users "came online" during September 2015! To date, Passport Parking has generated a total of $352,000 in net revenue in the Parking Enterprises Fund as shown below:

Gross Revenue =	$397,000
Convenience Fees =	-$45,000
Net Revenue =	$352,000

Based on this information and the positive comments that we receive about Passport Parking, I believe it is very successful and it provides a very good service to our customer base. The service is well established in our downtown area and I am confident that we will be expanding into other areas of the City during the next three to five years.

Pros:

- Enables customers to use credit/debit cards in addition to cash.
- Increases revenue.
- Customers pay a convenience fee.
- General Fund monies are not used.

Con:

- Credit/Debit card fees are an operating expense ($27,260 paid in FY 2014-15).

The contract amount is directly dependent on the amount of transactions that occur at a rate of $0.25 per transaction. For budgeting purposes, staff is assuming there will be 10,000 transactions per month which equates to an annual contract amount of $30,000. The appropriate amount is currently budgeted in the Parking Enterprises Fund operating budget and will be budgeted each fiscal year.

City staff recommends that City Council approve a resolution authorizing the City Manager to enter into a general services contract with Passport Parking, Inc. in order to enable customers to use credit/debit cards in addition to cash to pay for their on-street metered parking experience in downtown Asheville.

RESOLUTION BOOK NO. 37 - PAGE 339

H. RESOLUTION NO. 15-228 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN THE U.S. GEOLOGICAL SURVEY APPLICATION TO NAME A CREEK IN WEST ASHEVILLE "FOX CREEK"

Summary: The consideration of a resolution authorizing the City Manager to sign the United States Geological Survey (USGS) application to name a creek in West Asheville "Fox Creek".

As a part of its "Name that Creek" program, RiverLink recently worked with city staff to perform a community engagement process to gather nominations and identify a preferred name for the short creek that runs through West Asheville's Falconhurst neighborhood, roughly parallel to Louisiana Avenue through to Patton Avenue. The neighborhood group identified the creek and the need to maintain and name it during the review process for the Craggy Park subdivision project.

The Falconhurst neighborhood proposed three names and the community-based engagement process initiated by RiverLink and supported by the City of Asheville (City) resulted in the selection of the name "Fox Creek" in honor of the fox and other wildland creatures that live in that area.

In order to complete the application to the United States Geological Naming Convention form to name this water body "Fox Creek", a local government official must sign the form to demonstrate support and to certify that the naming process followed USGS guidelines.

Because the request came from a Neighborhood Association and the creek is contained within a neighborhood, the request was referred to the City's Neighborhood Advisory Committee (NAC). On October 26, 2015, the NAC reviewed and unanimously approved the following motion: "We advise Council to support the proposed name of "Fox Creek" for the creek in West Asheville flowing through the Falconhurst neighborhood into Smith Mill Creek."

Pros:

- Naming of a creek or stream can bring attention to its existence, help identify it as a part of neighborhoods ecosystem, and encourage environmental stewardship that enhances quality of life.
- Supporting this community-driven effort further develops partnerships between groups like RiverLink, the Falconhurst neighborhood and the City.

Con:

- None identified.

There is no fiscal impact related to this item.

Staff recommends City Council authorize the City Manager to sign the USGS form to name the creek in West Asheville "Fox Creek."

RESOLUTION BOOK NO. 37 - PAGE 340

I. RESOLUTION NO. 15-229 - RESOLUTION APPROVING THE SUBMITTAL OF THE 2015-16 U.S. DEPT. OF HOUSING & URBAN DEVELOPMENT CONTINUUM OF CARE COMPETITION GRANT

Summary: The consideration of a resolution approving the submittal of the 2015-16 Department of Housing and Urban Development Continuum of Care (CoC) Competition Grant Application on behalf of the Asheville-Buncombe Continuum of Care (CoC NC-501).

The City of Asheville serves as the Continuum of Care Lead for the Asheville-Buncombe CoC. Each CoC Lead is responsible for submitting the community's application to be considered for grant funding from the CoC Competition. For 2015-16, the Asheville-Buncombe CoC is eligible to apply for $1,196,396 in renewal funding. The renewal projects currently assist in housing more than 300 formerly homeless individuals, including providing for case management funding, and includes the financial support necessary to operate the Homeless Management Information system for the entire NC-501 CoC. An additional $179,459 is available for a new Permanent Supportive Housing project and $35,892 is available for CoC Lead Planning costs.

The Homeless Initiative Advisory Committee (HIAC) appointed a Finance Subcommittee, compromised of individuals and agencies who did not apply for CoC funds, to review the Continuum of Care projects and application process and make recommendations to the HIAC. Their recommendations were approved unanimously by the HIAC. The HIAC recommended the following projects to the Housing and Community Development Committee for the 2015-16 CoC Grant Application. HCD approved these projects and recommends to City Council the submission of the 2015-16 CoC Grant Application.

Project	Type	Amount	Agency
Bridge to Recovery	Permanent Supportive Housing	$293,831	Homeward Bound
PPH Extreme Needs 3	Permanent	$73,311	Homeward Bound

	Supportive Housing		
Smoky Mountain Center, Shelter Plus Care	Permanent Supportive Housing	$324,496	Smoky Mtn Center
PPH Extreme Needs 2	Permanent Supportive Housing	$56,244	Homeward Bound
HMIS Renewal	HMIS User Fees and Support, Lead Agency Cost	$67,500	City of Asheville
PPH Extreme Needs	Permanent Supportive Housing	$218,798	Homeward Bound
PPH Extreme Needs 5	Permanent Supportive Housing	$162,216	Homeward Bound
PPH Extreme Needs 4	Permanent Supportive Housing	$179,459	Homeward Bound
CoC Planning Project	Planning and Coordination for NC-501	$35,892	City of Asheville

Pro:

- Continuum of Care funding is a key funding resource for permanent supportive housing for homeless individuals and families, as well as operating the HMIS necessary for NC-501 to receive this funding.

Con:

- None noted.

Program funding is entirely from the US Department of Housing and Urban Development, through the State of North Carolina. Existing community development division staff will administer the program. Matching funds for the CoC Planning Project will come from Buncombe County. No general funds are requested to support this program.

Staff recommends that Council approve the Housing and Community Development Committee's recommendation to adopt the resolution authorizing the City to apply for CoC funding in order to provide those funds to the agencies for the programs approved by the U.S. Department of Housing and Urban Development.

RESOLUTION BOOK NO. 37 - PAGE 341

J. ORDINANCE NO. 4472 - BUDGET AMENDMENT FOR INSURANCE RECOVERY FUNDS TO REPLACE POLICE DEPARTMENT DWI TASK FORCE VEHICLE

Summary: The consideration of a budget amendment in the General Fund in the amount of $35,389.71 from from insurance recovery funds from a totaled Asheville Police Department vehicle to utilize towards the purchase of a replacement vehicle.

On September 1, 2015, a City of Asheville (City) Police Department vehicle was totaled by a third-party. Recently, the City settled the property damage claim for $35,389.71 and seeks to utilize the settlement funds to replace the vehicle.

Pro:

- Provides funding for APD Vehicle purchase.

Con:

- None.

The insurance recovery funds will be received in the City's Property & Liability Fund and then be transferred to the General Capital Project Fund, from which the new vehicle purchase will be made.

Staff recommends City Council adopt the budget amendment in the General Capital Project Fund in the amount of $35,389.71 from insurance recovery funds to be utilized towards the purchase of a new Police Department vehicle.

ORDINANCE BOOK NO. 30 - PAGE

K. RESOLUTION NO. 15-230 - RESOLUTION IN SUPPORT OF THE CONNECT NC BOND

RESOLUTION BOOK NO. 37 - PAGE 342

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Wisler and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. DEVELOPMENT REVIEW AND PRESERVING DOWNTOWN CHARACTER

Director of Planning & Urban Design Todd Okolichany said that at its November 10, 2015, meeting, the Asheville City Council directed staff to present an evaluation of the development review process for Downtown Asheville, as well as strategies to preserve Downtown character. Strategy 6, Action Item 5 of the Downtown Master Plan recommends that after a four-year pilot period, the City should evaluate the success of the development review process changes that were made after the adoption of the Downtown Master Plan. The following evaluation is being provided at Council's request, and as recommended by the Downtown Master Plan.

BACKGROUND

Downtown Context - As the urban center of Asheville and western North Carolina, the Downtown's Central Business District (CBD) is an area where private and public investment is encouraged to preserve the CBD as the primary retail, office, hotel, institutional, cultural and entertainment center of our community. It is the further purpose of this district to encourage a strong supportive retail center along with high density residential development, which will complement other Downtown uses and surrounding neighborhoods, while slowing down the negative impacts of urban sprawl. A high priority is placed on design, integrating new uses into and with existing architecture in a respectful and cohesive manner. Further, a well-balanced transportation system is encouraged for this district, with an emphasis on all forms of transportation, including pedestrians, bicycling, transit and automobiles.

Downtown Master Plan - The Downtown Master Plan was adopted by City Council in 2009 after an extensive public outreach process that incorporated ideas from a broad spectrum of Downtown stakeholders and shared community interests. The result of this public input enabled the formulation of a vision for Downtown Asheville, which is to empower Asheville's essential creativity, entrepreneurship and energy to make Downtown flourish in a new era of opportunity.

The Plan's recommendations are further concentrated in a series of seven strategies, grouped into three main themes: Experiencing Downtown, Shaping Downtown and Managing Downtown Asheville, all derived from the community's vision.

Prior the adoption of the Downtown Master Plan, the CBD was experiencing rapid development and redevelopment, and several tall buildings were proposed for the core of Downtown, where the historic fabric is most intact. There was no height limit in Downtown and there were limited adopted design standards. In general, neither the citizens nor the development community were satisfied with the development approval process because it was unpredictable and there was a lack of standards for buildings.

While Strategies 4 and 5 of the Downtown Master Plan focused on the creation of a hybrid form-based code and additional design standards for the Downtown, including new maximum building height limits, Strategy 6 was established to update the regulatory framework for the development review process in order to address current development trends and in response to public concerns about the development review process.

Strategy 6 sought to achieve the following regulatory changes for the development review process:

- Clarify design standards and guidelines and ensure approvals are clearly linked to specific standards
- Provide predictability in the development review process rather than discretionary decisions
- Require the developer to hold a neighborhood meeting before submitting plans
- Require approval bodies to consider whether a proposal meets policy goals in the Downtown Master Plan
- Limit application of Conditional Use Permits
- Encourage infill development by making the Level I approval process easier and replacing the residential density caps from the development review thresholds with maximum development size and height thresholds in order to remove barriers to housing
- Guarantee multiple opportunities for public input, especially at the early stages of development review, and ensure that recommendations of lower boards/commissions are considered
- Enhance the role of the Downtown Commission in design review (i.e. building form and context over use)

The above changes revised the development review process, including new project size thresholds for Level I, Level II and Level III site plan review. Design standards were also codified in the city's Unified Development Ordinance (UDO) and additional design guidelines were established by the Downtown Commission to guide new development in the Downtown. Together, these changes helped to provide clarity and certainty in Downtown Asheville, allow ample public input, assure a level playing field for developers, promote confidence among elected officials, remove barriers to residential development, and give City staff a firm set of procedures and regulations.

Downtown Development Review Process - Prior to the adoption of the Downtown Master Plan, the Downtown development review thresholds were divided into the following three different categories (which are the same for the rest of the City):

- Level I: under 35,000 sq. ft. commercial or office, or 3 to 19 dwelling units
- Level II: 35,000 sq. ft. to 100,000 sq. ft. commercial or office, or 20 to 50 dwelling units
- Level III: more than 100,000 sq. ft. commercial or office, or more than 50 dwelling units

The following changes were made to the Downtown development review thresholds upon the adoption of the Downtown Master Plan and after extensive public input. These are the current site plan review thresholds for projects proposed in the CBD:

- Level I: new development or additions not meeting the threshold for Level II review, or modification to exterior walls/roofs, or renovations with a total cost exceeding 75% of the appraised value of the building
- Level II: gross floor area of 20,000 sq. ft. to 175,000 sq. ft. or building height under the Intermediate Height Zone (145 ft.)
- Level III: gross floor area greater than 175,000 sq. ft. or building height above the Intermediate Height Zone (145 ft. to 265 ft. maximum)

Project Type & Review Threshold	Current Downtown Project Review Process							
	Pre-Development Conference	Applicant Meeting w/ Neighborhood	Staff Review	TRC	Downtown Commission	Planning & Zoning Commission	City Council	Final TRC
Level I[1]			X					
Level II	X	X	X	X	X	X		X
Level III[2]	X	X	X	X	X	X	X	X

Notes:
1. For Level I projects, a predevelopment conference with planning staff and a neighborhood meeting are recommended but are not required.
2. Level III projects located in Traditional Downtown Core shall be reviewed via the conditional zoning process. Level III projects located outside the Traditional Downtown Core shall be reviewed only for compliance with applicable standards and regulations.

As part of the changes that were made to the development review thresholds, new maximum height zones were established in the CBD. The Downtown Design Review Map and the Intermediate Height Zone (up to 145 feet) encompasses a majority of the Traditional Downtown Core of the Central Business District (CBD), with the exception of some parcels east of North Market Street, as well as several parcels west of O Henry Avenue and near the intersection of Patton and Coxe Avenues. The Intermediate Height Zone also applies to a majority of the CBD perimeter, adjacent to residential neighborhoods. The Tallest Height Zone (up to 265 feet) generally applies to areas within the CBD but outside the Traditional Downtown Core. These changes reflected community input during the Downtown Master Plan process. Citizens were mostly concerned about very tall buildings in the historic core of Downtown Asheville.

Downtown Development Trends - The following table indicates the number of development projects proposed in the Downtown each year since 2010, when the amendments to the UDO were adopted for the CBD. The table further separates each project by the primary type of use proposed:

Year	Number of Projects (Primary Use) by Type						Number of Projects Reviewed by City Council (Level III, CZ or CUP)
	Residential	Hotel	Residential/ Hotel	Office	Institutional	Other	
2010					1		1
2011	1				1		1
2012							
2013	1	1				1	

2014	1	3		1			
2015	6	1	1		1		2
Total	**9**	**5**	**1**	**1**	**3**	**1**	**4**

Regarding the Downtown Projects Summary (2010-2015), the following types and amount of development have been proposed in Downtown Asheville since 2010. As can be seen, there is an overall trend over the past few years towards proposals for residential and hotel development in Downtown Asheville, especially since 2013:

- Residential: 700 dwelling units (height range: 32 feet to 62 feet)
- Hotel: 794 rooms (height range: 49 feet to 115 feet, with the exception of the BB&T building/One West Tower at Pack Square, which is an existing building that reaches 205 feet to the highest floor level)
- Retail/Restaurant: 32,250 square feet (mostly limited mixed-use as part of other projects)
- Office: 68,000 square feet (maximum height of 48 feet)
- Institutional: 212,000 square feet (height range: 74 feet to 140 feet)
- Other: 37,800 square feet (maximum height of two stories)

In spite of the recent increase in development proposals in Downtown Asheville, approved development projects have not reached their full allowable development potential. As shown above, the maximum proposed building height of recent projects has been well below the overall maximum allowable height of 265 feet for areas outside the Traditional Downtown Core. Within the Traditional Downtown Core, recently proposed residential projects have reached 62 feet, which is only 43% of the maximum height of the Intermediate Height Zone (up to 145 feet). The maximum proposed building height of recent hotel projects in the Traditional Downtown Core has reached 115 feet, which represents 79% of the maximum height of the Intermediate Height Zone (For purposes of this building height analysis for both residential and hotel projects, the BB&T building/ One West Tower at Pack Square is excluded as it is an existing building.)

From a building form and design perspective, approved development projects have been guided by the UDO and Downtown Design Guidelines. While design standards in the UDO are required, the Downtown Design Guidelines require mandatory review (by the Downtown Commission) but only voluntary compliance. This type of review structure allows for flexibility in the design process as long as developments meet the intent of the design guidelines.

Changes to the UDO and design guidelines have led to projects that are held to a higher design standard in terms of fenestration, street wall step-backs, the orientation of buildings, the use of high quality materials, and respect for the Downtown's historic resources and overall character. Recent development is incorporating many of the qualities of older, more traditional urban development patterns that contribute to Downtown character and vibrancy. Traits that characterize these developments include interconnected street systems, wider sidewalks, a mix of uses, activated ground floors, higher density and less parking.

Although recent development trends have added value to the Downtown's urban form and vibrancy, increased development has led to a number of issues that are common in downtown areas, but manageable. Concerns have been expressed by residents, visitors and business owners about overcrowded sidewalks, pedestrian crowding in roadways, motorist safety, blocked crosswalks, handicap access, the availability of a sufficient number of parks, the functionality of existing public spaces, and construction staging. As the City continues to grow, there needs to be greater emphasis on its public spaces to ensure that it is meeting or exceeding standard levels of service, accommodating multiple users, and balancing public safety concerns for the use and creation of public spaces that contribute to the dynamic environments that make Asheville such a unique place to live, work and visit.

ALTERNATIVE STRATEGIES

Strategies to Expand Council Review - As noted in the Downtown Master Plan, prior to its adoption, conditional use permit decisions in the Downtown led to public concerns about discretionary design review being conducted by City Council, failure to consider the recommendations of lower boards/commissions, and potential costly requirements being unexpectedly placed on projects at the final stage of the review process. In response to these concerns, conditional use permits were limited only to certain uses that could prove incompatible with existing Downtown uses and character. City Council may have a desire to expand their UDO authority to review additional uses that may be impacting Downtown Asheville neighborhoods via the following two zoning tools:

Conditional use permit: this zoning tool allows conditionally-appropriate uses to be considered through a quasi-judicial public hearing process. Conditional uses are uses which are generally compatible with other land uses permitted in a zoning district but which, because of their unique characteristics or potential impacts on the surrounding neighborhood and/or the city as a whole, require individual consideration of their location, design, configuration, and/or operation at the particular location proposed. In a quasi-judicial proceeding, the Council is not setting new policy but is applying policies expressed by an existing ordinance, statute or regulation to past or present facts presented at a hearing.

Under a conditional use permit, there are currently seven standards that must be met, such as the development will not endanger public health or safety. Consideration may also call for the imposition of additional individualized conditions. For example, in the Neighborhood Corridor district, drive-through facilities must be located to the side or rear of the building and not be placed on the street side of the building. Hours of operation may also be limited by City Council.

In the consideration of applying the conditional use permit process to new uses in Downtown Asheville, the City Council could require minimum parking requirements or additional design criteria. City Council could also require that for certain uses, the proposed building must contain a minimum percentage of mixed uses, such as housing.

If the Council chooses to apply the CUP process to a new particular use(s) it would require a zoning text amendment to the City's UDO. Per North Carolina statutes any zoning amendment must be consistent with an adopted comprehensive plan or any other officially adopted plan that is applicable. If the zoning amendment is not consistent with the City's Comprehensive Plan, the Plan must be updated accordingly.

Pro:

- City Council may apply the conditional use permit process to certain uses (rather than change the site plan review threshold for all uses) and may include additional standards or design criteria that should be met.

Cons:

- As a quasi-judicial process, City Council members may not participate in ex parte communications (written or verbal) with the applicant, the Planning and Zoning Commission, other City Council members or community members outside of the public hearing.
- The decision is based on evidence at the City Council hearing and Council may have no choice but to either grant or deny based on evidentiary presentations.
- If the proposed zoning amendment to apply the CUP process to a new particular use(s) is inconsistent with the City's Comprehensive Plan, the Plan will need to be revised.

Conditional zoning: this is a rezoning that is pursuant to a particular development proposal. Conditional zonings can only be initiated by the property owner. In addition to specific conditional zoning requests for zoning district changes, all Level III projects in the Traditional

Downtown Core are currently reviewed via the conditional zoning process. The City Council could consider expanding the conditional zoning review process within the CBD to areas outside the Traditional Downtown Core.

Pros:

- Flexibility in the review process in that City Council and the applicant may agree upon certain conditions that could improve the overall project.
- Communication between City Council members and others is allowed outside of the public hearing.

Cons:

- Conditional zoning can be perceived as arbitrary and unpredictable, and could lead to unforeseen costs for the applicant.
- May require changes to the UDO and a new overlay district or other zoning district

Design guidelines: In addition to the standards prescribed by the UDO, the CBD is contained within the Downtown Design Review Overlay District. This district requires mandatory review, but voluntary compliance, with the Downtown Design Review Guidelines. The guidelines were approved by the Downtown Commission but have not been adopted by the City Council. If formally adopted, the design guidelines could aid City Council in their review of projects in the CBD, and provisions could be drafted which would permit the denial of a project based on noncompliance with the adopted design guidelines.

Strategies to Preserve Downtown Character - The City of Asheville has recently been engaged in a public conversation regarding Downtown character. Most recently, this topic was discussed at several Downtown Commission meetings, including a subcommittee of the Commission, and at their November 2015 retreat. Specific concerns voiced by the Council on November 10th included ways and means to preserve authenticity and shaping the character of Downtown.

The City currently utilizes a number of different strategies to preserve and enhance Downtown character, including codified design standards, Downtown Design Review Guidelines, Downtown Master Plan and Historic Preservation Master Plan policies, the Comprehensive Plan and other planning documents, and economic incentives and programs:

UDO - The City's Unified Development Ordinance (UDO) includes the City's zoning and development requirements. It contains several standards aimed at protecting and enhancing character in the Central Business District (CBD). One such standard is the minimum height requirement of two stories that helps to maintain a building form that is consistent with downtown environments. Shadow impacts on public parks or plazas are also limited in the CBD, while stepback requirements help to enhance the traditional scale of Downtown and ensure adequate air and light at the sidewalk level and neighboring properties. Requirements for the placement of parking to the side or rear of buildings, no minimum front building setbacks and other design standards further contribute to the Downtown's urban form.

2025 Comprehensive Plan - The City's Comprehensive Plan sets forth the goals and policies which serve as the basic policy guide for development in the City of Asheville. These goals and policies may be amended from time to time to meet the changing requirements of the City. A Comprehensive Plan is advisory in North Carolina but all zoning regulations must be made in accordance with a comprehensive plan.

The current Comprehensive Plan was adopted in 2003 and contains a number of goals and policies that promote community character, including the creation of standards for building orientation that address build-to lines and site relationships, promoting quality building design and contextual design, and increased connectivity and walkability. Together, these policies help to promote traditional urban development patterns that contribute to neighborhood character.

In October 2015, the City released a request for proposals to hire a consultant to assist the City in updating the 2025 Comprehensive Plan. The project kick-off is anticipated to occur in the first quarter of 2016 and the overall timeframe of the project is expected to be 18 months.

Downtown Design Review Guidelines - The guidelines aid architects for new buildings, renovations and additions to existing buildings in the CBD to achieve buildings of distinction whose designs are true to the present day and sensitive to the architectural fabric of the city. The guidelines further help to promote active and mixed uses that contribute to the vibrancy of Downtown Asheville.

Downtown Master Plan and Downtown Coordinator Position - The Downtown Master Plan aims to help the community shape growth in a way that preserves Downtown Asheville's character and authenticity, while promoting strategies that help to contribute to Downtown's vibrancy. The plan recommends the development of character areas or neighborhoods as development spreads outside of the downtown core. These are the future neighborhoods of Downtown where there will be opportunities for small businesses.

At its November retreat, the Downtown Commission discussed a recommendation to City Council that the City should consider updating the Downtown Master Plan to focus on public spaces and streetscape issues.

City Council also recently approved the creation of a Downtown Coordinator position. This person will serve as a liaison between City departments and downtown businesses, residents, property owners and the Downtown Commission. This position was previously staffed by the City Development Director until 2005. With the surge in tourism, development and general downtown vibrancy, the City has recognized the need for a point person to coordinate many of the complexities of the Downtown. The Downtown Coordinator position will be able to assist and support small business owners, especially as it relates to working with City processes and standards.

Historic Designation/Historic Preservation Master Plan - Downtown Asheville is designated a National Historic District. Federally designated historic districts are listed on the National Register of Historic Places, which makes available federal tax credits for rehabilitation. However, federal listing imposes no restrictions on what property owners may do with a designated property.

In March 2015, City Council adopted the Historic Preservation Master Plan for Asheville and Buncombe County, North Carolina. The Master Plan was designed to establish goals and recommended actions for historic preservation, as well as to guide future program development and decision-making. Recommendations include policies that preserve historic buildings and the character defining elements of the public realm, enhanced coordination between the Historic Resources Commission and Downtown Commission regarding demolition permits, implementing the City's wayfinding system, and supporting the adaptive re-use of historic buildings for affordable housing.

City Programs and Studies - Earlier this year the City Community and Economic Development Department completed a small business incentive study and presented the study to both the Planning and Economic Development Committee and the Housing and Community Development (HCD) Committee. Both committees agreed that the City should continue to invest in streamlining the customer service experience, provide information on how to start a new business in the city, and raise awareness of existing small business support programs. The committees also agreed that if the City were to fund a small business revolving loan program, it would look to a partner agency for administration. The HCD committee was also interested in exploring façade grants and small business grants that encourage job creation.

In August of this year the U.S. Small Business Administration awarded a $50,000 grant, called "Startup in a Day", to Asheville to simplify the startup process for entrepreneurs so that they can review through an online portal the necessary regulatory processes to start a business. City staff is currently working on the program, which will help streamline the licensing, permitting and other requirements needed to start a business in the City through a single point of entry.

Economic Incentives and Tax Credits - Economic incentives, such as business tax credits, can be a useful tool in supporting businesses; however, this type of tax credit is generally available at the state level. The City has a performance based economic incentive program. The City's Business Development Grant can help to stimulate small business expansions. Similar to the state's business tax credits, award of the City's grant is dependent on such factors as the location of the business, the amount of capital investments and the number, equity and quality of jobs created.

Additional Strategies - The City's statutory zoning authority is governed by primarily by North Carolina General Statutes Sections 160A-381 and 160A-383. Zoning allows cities to regulate building size, height, lot size, setbacks, and the types of uses that are permitted within certain districts. However, cities in North Carolina cannot regulate based upon who is the owner or operator of a business as North Carolina General Statutes (and federal law) do not permit municipalities to interfere in commerce.

There may be other local programs and partnerships that the City could explore that support small businesses and the overall economy; however, further analysis of these strategies is needed in order to determine and understand potential state restrictions and other barriers, the City's role, potential partnerships, funding mechanisms and other information. Some of these strategies include:

- Supporting businesses that contribute to sustainable, inclusive economic development
- Incentives to property owners who prioritize reasonable rent increases or property owners who place deed restrictions or trusts
- Partnering with organizations that can offer support in negotiating leases and protecting tenant rights
- Incubating small, creative start-ups to foster and elevate the small business entrepreneur
- Community investment and partnership with a non-profit land trust

Summary and Next Steps

Downtown Development Review Process - As noted above, the current Downtown development review process and Downtown design standards have helped to provide clarity and certainty in Downtown Asheville, allow ample public input, assure a level playing field for developers, promote confidence among elected officials, and give City staff a firm set of procedures and regulations.

Development trends show an increase in overall development throughout the City, including recent increases in residential and hotel activity in the Downtown. Although these projects are not meeting their full allowable build-out potential, increased development has led to a number of issues, such as overcrowded sidewalks and the functionality of existing public spaces.

If City Council decides to revisit the current development review thresholds, it is recommended that the City conduct a public outreach process in order to solicit community input from citizens, businesses, property owners, neighborhood and business groups, other organizations and various City boards and commissions. Additional factors that should be considered are the potential unintended consequences of changing review levels (e.g. developers may propose lower density projects that are under that threshold, which could be counterintuitive

to the purpose of the Downtown), as well as the extra standards that Council would review if the site plan level threshold is changed.

As an alternative to revisiting the development review process for all projects in the CBD, City Council may consider expanding its UDO authority to review certain specific types of uses via the conditional use permit process, or expand the conditional zoning review process within the CBD to areas outside the Traditional Downtown Core. In addition, City Council may consider adopting the Downtown Design Review Guidelines so that projects would be subject to mandatory review and mandatory compliance with the guidelines.

Preserving Downtown Character - A community engagement process will occur as part of the City's effort to update its Comprehensive Plan. In regards to the CBD, the Comprehensive Plan will address conflicting expectations, values and ideals for Downtown parks and other types of public spaces. At its November retreat, the Downtown Commission discussed a recommendation to City Council that the City should consider updating the Downtown Master Plan to focus on public spaces and streetscape issues.

There may be other local programs and partnerships that the City could explore that support small businesses and the overall economy; however, further analysis of these strategies is needed in order to determine and understand potential state restrictions and other barriers, the City's role, potential partnerships, funding requirements and other information.

At this time, City staff requests further direction from Council as to how staff should proceed or be of further assistance.

Councilwoman Mayfield felt we need to clearly identify the problems and concerns with downtown development as a first step in figuring out the right strategy.

Mayor Manheimer said we only have certain tools to use to address the problem. A short time ago, Council asked to look at a process to accelerate the review of development review thresholds. She reiterated some tools that might address some of the concerns - bringing Level II's under the review of Council; expanding the UDO authority to review certain specific types of uses via the conditional use permit process, or expand the conditional zoning review process within the CBD to areas outside the Traditional Downtown Core; or adopting the Downtown Design Review Guidelines so that projects would be subject to mandatory review and mandatory compliance with the guidelines. She recommended this be reviewed by the Planning & Economic Development Committee (PED) to take a more thorough look at these issues (including the pros and cons of all approaches) and the process on how any changes would work and make a recommendation to City Council.

Councilman Smith was pleased that the City is updating the Comprehensive Plan as the values of the community can shift over time. Back in 2010 when we looked at downtown design review, we needed to stimulate investment and growth in our downtown. The hotel industry has not responded to the needs of the citizens to what we felt were very reasonable calls for cooperation and partnership regarding the occupancy room tax. Among the values of the citizens of Asheville are providing a living wage, sources things locally, turning to local businesses, and recognizing we are in the midst of an affordable housing crisis. Regarding mandatory compliance with the downtown design guidelines, he didn't want to homogenize our downtown because our community values also surround independent spirit and an arts and culture vibe. We need to strike a balance. He would support lodging (hotels) as a use into a conditional use permit process and to expand the conditional zoning review process within the CBD to areas outside the Traditional Downtown Core. He would also support reducing the development review threshold for Level II's from 175,000 to 100,000. He supported businesses that contribute to sustainable, inclusive economic development; incentives to property owners who prioritize reasonable rent increases or property owners who place deed restrictions or trusts; partnering with organizations that can offer support in negotiating leases and protecting tenant rights; incubating small, creative

start-ups to foster and elevate the small business entrepreneur; and community investment and partnership with a non-profit land trust.

Councilman Bothwell was interested in seeing what other cities have used for design guidelines that push for quality. He also supported the mandatory compliance of the design guidelines.

Councilwoman Mayfield suggested that we might investigate having a very high level architectural review, which would be different from compliance with design guidelines.

Mayor Manheimer said that in general she is concerned about going in the direction of conditional use permits for downtown because she felt we can get a good project with just conditional zoning, which will allow us to speak directly to the applicants and enter into a more negotiation setting. But, the downside would be we can't require conditional zonings by use - it would be by size, and that would be capturing hotels and apartments.

Vice-Mayor Wisler preferred Council to direct PED to look at two or three different options that can be result in a relatively rapid decision while other options will be reviewed in the update to the Comprehensive Plan.

There was consensus of Council to have PED look at reducing the Level II threshold in downtown from 175,000 sq. ft.

There was discussion about if Council wanted to look at expanding the conditional zoning review process within the CBD to areas outside the Traditional Downtown Core. Mr. Okolichany clarified that in the CBD is further refined to the Traditional Downtown Core. That is where the conditional zoning process is currently implemented. Outside of the Traditional Downtown Core, but still within the CBD projects go through a Level III process, but it is not currently through conditional zoning (it is the conditional use permit process).

In response to Councilman Young, Mr. Okolichany explained one of the main differences between the conditional use permit process vs. a conditional zoning. He said with a conditional use permit process, you can apply that to a specific use. If Council decides to expand the conditional zoning process to all areas within the CBD, that would apply to all uses - residential, hotel, institutional uses, etc.

It was the consensus of Council to have PED look at mandatory design guidelines for downtown, which might consist of an historic overlay, conservation, or an architectural review.

Councilwoman Mayfield also suggested PED look at perhaps implementing some of the recommendations about preserving the Traditional Downtown Core from the Historic Preservation Master Plan.

It was the consensus of Council that PED look bringing in any Level II project in the entire CBD before Council for review. PED can flush out whether it is appropriate to make them reviewed by City Council as a conditional zoning or a conditional use permit.

After discussion about whether Council wanted to review all hotel applications outside of the CDB, it was the consensus of Council to review that as part of the comprehensive plan.

Mayor Manheimer said that regarding preserving the downtown character, at the City Council retreat Council will have the opportunity to provide policy direction to incorporate the small business focus and menu of options for promoting and helping supporting small businesses in our downtown.

At the request of Councilman Young, Mr. Okolichany said that he will provide best practice guidelines from other cities, along with additional analysis on the menu of options.

When Councilwoman Mayfield asked if we can look at zoning individual parcels that have a lot of opportunity for good developments, Mr. Okolichany explained that they normally look at segments, not parcels. The Comprehensive Plan is the best approach to look at corridors.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO A PREVIOUSLY APPROVED CONDITIONAL ZONING AT 671 SAND HILL ROAD TO ADD A 2-STORY, 8,000 SQUARE FOOT BUILDING FOR AN ESTABLISHED PRIVATE SCHOOL

ORDINANCE NO. 4473 - ORDINANCE AMENDING A PREVIOUSLY APPROVED CONDITIONAL ZONING AT 671 SAND HILL ROAD TO ADD A 2-STORY, 8,000 SQUARE FOOT BUILDING FOR AN ESTABLISHED PRIVATE SCHOOL

Assistant Director of Planning & Urban Development Alan Glines said that this is consideration of an amendment to a previously approved conditional zoning at 671 Sand Hill Road to add a 2-story, 8,000 square foot building for an established private school. This public hearing was advertised on November 27 and December 4, 2015.

Mr. Glines said that the applicant is requesting an amendment to the conditional zoning for the property located at 671 Sand Hill Road to build an additional school building from the originally approved plan. Per Section 7-7-8(c)(6) of the City of Asheville Unified Development Ordinance (UDO), changes to a previously approved plan must be approved by the City Council as an amendment to the conditional zoning (CZ).

The site is a 1.91 acre parcel that slopes up gently from Sand Hill Road. The property PIN is 9627-59-0175 and the owner is Classical Properties, LLC. The applicant is Andrew Cross and the school is known as the New Classical Academy. The driveway to the school is shared by easement with a residential community of 46 homes behind this site on separate parcels. The parcels surrounding the school are zoned *Residential multi-family low density* (RM-6) which includes mostly residential uses, primarily single and multifamily units. *Institutional* zoning located further west is owned by the Asheville School abutting Sand Hill Road.

New Classical Academy seeks to expand their school operations on the site by constructing a new classroom building with a multipurpose room. The new two-story building would total about 8,000 square feet. Four new classrooms will be a part of the building. The current building totals about 3,400 square feet on two levels providing space for three classrooms and worship space. Since the original conditional zoning application was approved in 2012, site improvements are in place and are compliance with technical standards. The school currently has an enrollment of 56 students and would like to eventually grow to a maximum of 80 students in classroom programs K-8.

Principal access to the site is from Sand Hill Road along a shared driveway. Sidewalks are not in place at this location but will be added as a condition of this proposal. There is ample parking on the site based on a total of seven classrooms proposed for the school. Plans show 19 spaces with a longer drive aisle for parents dropping off and picking up students. The existing facilities can accommodate this future increase because the existing parking area is ample based on calculations in the UDO, and could also be expanded if necessary. A condition was placed on the prior approval that if the school should grow beyond 60 students, a traffic management plan would be submitted for review by City staff. The plan was submitted to the Transportation Department as a part of the current application and was found to be sufficient.

Landscaping is required for this project and includes street trees, parking lot landscaping, building impact landscaping, and tree save area. Landscaping shown on the submitted plans complies with requirements and were installed during the approval of the original conditional zoning application. The project is also required to have a minimum of 15% open space, which is provided in the form of a play area at the back of the site.

A condition from the original 2012 conditional zoning approval to modify the property line buffer requirement along the east property line will continue with this amendment. The property line buffer in this location was waived because of a lack of sufficient space due to the shared access driveway.

The proposal was approved with conditions by the City's Technical Review Committee (TRC) on October 19, 2015. The Planning and Zoning Commission reviewed the project and recommended unanimous approval at their meeting on November 4, 2015. Should City Council approve the amendment, the project will have a final review by the TRC.

One neighbor called to ask that additional plantings or a fence be provided at the east side of the parcel. There is limited space in this area to provide additional plantings on the applicant's property. A second nearby property owner came to the Planning and Zoning Commission meeting with concerns about traffic in the area at the end of the school day as parents are picking up students from the public school bus. The applicant and the neighbor agreed to meet and discuss this situation.

In 2012, the subject property was rezoned to Institutional-CZ (INST-CZ) for the original school development. Prior to this application, this property was zoned Residential Multifamily Low Density (RM-6). A K-8 school use in a residential zone is a use by right subject to special requirements (USSR) with a requirement that the parcel size be a minimum of two acres. Since the project site is 1.91 acres it could not be permitted without a conditional zoning change.

Adjacent uses include apartments to the north of the property, which share the driveway at Sand Hill Road. Other uses in the area are primarily single family in nature. Schools are allowed in residential areas and this school has been in operation for several years. The location along Sand Hill Road is good for a school use because of easy access with ample room to provide for parking needs and outdoor play space.

The proposed development supports the goal stated in the *Asheville City Development Plan 2025* that appropriately-scaled non-residential uses that serve residents of neighborhoods should be allowed in appropriate locations. The site has been evaluated and has sufficient infrastructure in place to manage impacts on the surrounding community. Schools are supported with this goal.

The proposal is aligned with Focus Area One: Economic Growth and Sustainability; and Goal 2: Invest and leverage investment in community infrastructure because the proposal will bring additional investment in the school expansion and will be adding a sidewalk linkage at the street.

Considerations:

- The school will expand at this location with a new 8,000 square foot building.
- The site has sufficient space to manage the proposed increase in the number of students/ classrooms.
- Parking and traffic needs will be managed onsite.

Based on policies stated in the Comprehensive Plan and other plans, staff finds this request to be reasonable and within the public interest and recommends support of the conditional zoning as proposed.

Mr. Clay Mooney, representing the applicant, said that they are willing to comply with the conditions and requested Council approved the conditional zoning amendment.

Mayor Manheimer opened the public hearing at 6:22 p.m., and when no one spoke, she closed the public hearing at 6:22 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Wisler moved to approve the Institutional Conditional Zoning Amendment based on the site plan, and find that the request is reasonable, is in the public interest and is consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) appropriately-scaled non-residential uses that serve residents of neighborhoods are encouraged where impacts can be managed; and (2) the proposal will bring further investment at an infill location and will improve public infrastructure. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 30 – PAGE 200

B. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING AN UNNAMED ALLEY OFF JARRETT STREET

RESOLUTION NO. 15-231 - RESOLUTION TO PERMANENTLY CLOSE AN UNNAMED ALLEY OFF JARRETT STREET

Streets Manager Chad Bandy said that this is the consideration of a resolution to permanently close a portion an unnamed alley off Jarrett Street. This public hearing was advertised on November 13, 20, 27 and December 4, 2015.

N. C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjoining property owners, TS Investments, LLC, owners of parcel 9638-25-1024, and Ira Bernstein, parcel 9638-25-0070, and David Chambers, parcel 9638-25-1177, have requested the City of Asheville to permanently close the unnamed alley off Jarrett Street.

The Multimodal Transportation Commission met on October 28, 2015, and approved the closure.

Communication has been made with the various utility companies and there are no easements to retain in the closed portion.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

City staff recommends City Council adopt the resolution to permanently close an unnamed alley off Jarrett Street.

Ms. Kathy Durham, managing partner with TS Investments, thanked City Council for their consideration.

Mayor Manheimer opened the public hearing at 6:27 p.m. and when no one spoke, she closed the public hearing at 6:27 p.m.

Mayor Manheimer said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 15-231. This motion was seconded by Councilwoman Mayfield and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 343

V. UNFINISHED BUSINESS:

A. I-26 CONNECTOR PROJECT

REVIEW OF TECHNICAL COMMENTS AND PROCESS

Transportation Director Ken Putnam said that the purpose of this memorandum is to update City Council regarding staff's comments about the I-26 Connector Project Draft Environmental Impact Statement (DEIS).

The I-26 Connector Project is an interstate freeway project that is being proposed to connect I-26 in southwest Asheville to US 19-23-70 in northwest Asheville. The North Carolina Department of Transportation (NCDOT) has programmed this project to upgrade and widen I-240 from I-40 to Patton Avenue, and then proceed northward from Patton Avenue on new location across the French Broad River and connect to US 19-23-70 just south of Exit 25 (Broadway). Upon completion, this project will be part of the I-26 interstate that extends from Charleston, South Carolina to Kingsport, Tennessee. It is about 7 miles long and includes three sections: C, A, and B.

The NCDOT completed and released the DEIS for review and comment on October 16, 2015. As a part of the release, copies of the actual document were provided to the following locations; the NCDOT local Division 13 office on Orange Street, the Land-of-the-Sky offices on New Leicester Highway, the City of Asheville Transportation Department in City Hall, the Pack Memorial Library, the West Asheville Library, and the Buncombe County Law Library. In addition, the public hearing maps were provided to the following locations; the NCDOT local Division 13 office on Orange Street, the Land-of-the-Sky offices on New Leicester Highway, and the City of Asheville Transportation Department in City Hall. All of the project materials can also be viewed at the project website at http://www.ncdot.gov/projects/i26connector/.

The Open House and Public Meeting were held on Monday, November 16, 2015, at the Renaissance Hotel located at 31 Woodfin Street. The informal open house was held from 4:00 pm until 6:30 pm and during this time, NCDOT representatives were available to answer questions and receive comments on a one-on-one basis. Earlier in the day (from noon until 1:00 p.m.), an informational meeting with local officials was held. The formal public hearing began at 7:00 pm with a presentation including an explanation of the proposed corridor location, design, right-of-way, relocation requirements/procedures, and the state-federal relationship. After the presentation, statements, questions, and comments were received by the persons attending the meeting. All of the comments were recorded and a transcript is being prepared. The official comment period ends on December 16, 2015, and the NCDOT has provided many ways for comments to be submitted. In addition, the City's public media staff has worked closely with the NCDOT to ensure that all comments are submitted to the NCDOT.

City staff conducted two "work sessions"; one on November 6, 2015, and the other one on November 17, 2015, to review the materials and prepare comments. Attendees included staff members from the Transportation Department, the Planning Department, the Public Works Department, the Multi-Modal Transportation Commission, the Asheville Design Center, and the Southern Environmental Law Center. Staff comments focused on multi-modal transportation elements and the City's transportation plans as outlined in the joint resolution approved by the City of Asheville, Buncombe County, and the French Broad River Metropolitan Planning Organization (FBRMPO) on March 25, 2014 (Resolution # 14-54). Staff's comments are more technical in nature and staff does not recommend a specific alternative. In summary, staff comments (1) strongly encourage inclusion of complete streets elements; (2) strongly encourages minimizing overall project footprint; (3) strongly encourages active participation during the design phase; (4) strongly encourage mitigation strategies during the construction phase; and (5) strongly encourages NCDOT to redesign Amboy Road to be consistent with the City's ongoing project. The comments will be submitted to the NCDOT via a cover letter on December 16, 2015.

Councilwoman Mayfield suggested the following comment amendments: (1) express concern about the impacts of Alt. 4 and 4B on the east side of the river, particularly in the Hill Street Street, Isaac Dickson and Riverside Cemetery; (2) making Patton Avenue (in Alt. 4 and 4B) a pedestrian friendly, truly multi-modal urban boulevard instead of just a high speed throughway to downtown; (3) use of current updated base maps in the final EIS in order to reflect construction activities (new homes and businesses) that have occurred during the past several years; and (4) explore possibilities of constructing buildings on the Haywood Road bridge in an effort to maintain connectivity as a business corridor through west Asheville.

RESOLUTION NO. 15-232 - RESOLUTION REGARDING THE NORTH CAROLINA DEPARTMENT OF TRANSPORTATION I-26 CONNECTOR TIP PROJECT 2513

Councilwoman Mayfield said that this is probably going to be the largest infrastructure project we will ever see in western North Carolina. It will cost approximately ¾ of a billion dollar just in this corridor in the City. It will be a huge impact on neighborhoods and businesses, all of which are growing. How the project unfolds will dictate the character and feel of our city for decades going forward. She then explained the potential impact of this project, along with a background of it leading up until now.

She said some citizens want to see the project go away. She felt the City should resist that temptation for several reasons: (1) there are very real safety issues in this corridor; (2) even if the City of Asheville did not want the project doesn't mean it would stop NCDOT from moving forward; and (3) we would forfeit the critical opportunity to make the City's voice heard about what it is we want to see from this project.

She said that basically we want to see a project that matches the scale and character of our community; that reunifies and connects community; minimizes impact of neighborhoods and local businesses; and separates local and interstate traffic. The resolution below accomplishes those goals.

She then reviewed the following resolution, including three amendments: "WHEREAS, the North Carolina Department of Transportation ("NC DOT") has issued a Draft Environmental Impact Statement ("DEIS") for the I-26 Connector Project, TIP Project I-2513 ("the project"); and WHEREAS, NCDOT is seeking public input on the DEIS and held a public information session and hearing on November 16, 2015; and WHEREAS, the City of Asheville is providing comments to NCDOT on the DEIS through a letter and this resolution; and WHEREAS, the I-26 and I-240 corridors are critical to local and regional residents, visitors, interstate travelers, and regional commerce; and WHEREAS, traffic congestion and safety are continuing problems along I-240 and I-26 through Asheville; and WHEREAS, improvements to the I-240 and I-26 corridors should be minimally impactful to the local community and should enhance the quality of life for residents and the quality of experience for visitors wherever possible; and WHEREAS, NC DOT has been

responsive to input from the City of Asheville and Buncombe County by including new bicycle and pedestrian facilities in the DEIS; and WHEREAS, the NC DOT has committed to run the new, local travel demand model and undertake a capacity analysis that considers a six-lane alternative for Section A and has stated that fewer lanes would be built if these analyses demonstrate fewer lanes would be sufficient; and WHEREAS, members of the community have expressed at the November 16 public hearing and through letters their strong preference for a project that addresses current congestion and safety problems but also one that is smaller overall, better reflects the character of Asheville, incorporates additional bicycle and pedestrian facilities, and minimizes harm to the affected neighborhoods of West Asheville, Burton Street, Emma, and Montford; and WHEREAS, the City of Asheville seeks a closer working relationship with NC DOT on the ongoing design of this project to ensure its impacts are minimized. NOW THEREFORE BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ASHEVILLE THAT: (1) The City of Asheville calls on NC DOT to use any and all tools at its disposal to reduce the overall size and impact of the project on Asheville's neighborhoods and businesses and to improve community connectivity through inclusion of additional bicycle and pedestrian elements required by NC DOT's Complete Streets policy, reflected in adopted City plans and policies, and referenced in the December 9, 2015, cover letter and December 8, 2015, Memorandum from the City of Asheville, both of which are specifically incorporated herein by reference; (2) The City of Asheville further calls on NC DOT to analyze in both the travel demand model and the capacity analysis a six-lane alternative in Section A (the West Asheville section) coupled with four lanes for I-26 in Section B (the bridge section) and to construct as few lanes as possible to address safety and congestion; (3) The City of Asheville further calls on NC DOT to partner with the City in creating a collaborative working group of City appointees and NC DOT design professionals that will meet regularly starting in early 2016 and throughout the design phase to: (a) minimize the project's size and impact, which will provide community benefits and reduce cost; (b) ensure adequate consideration of the concerns listed in the City's comment letter; (c) analyze the travel demand model, capacity analysis, and the methodology of calculating Level of Service in an effort to gain consensus on these foundational elements of the project; (d) identify opportunities to return land around the project to productive, tax-generating use and to ensure land on the east side of the river under any new bridges is put to use in a way that enhances the riverfront; and (e) identify opportunities to repair or redress impacts of previous transportation projects on neighborhoods and businesses; (4) In order to provide the most benefit to the Asheville community while also accommodating through traffic, and for all the reasons stated in the City of Asheville's comment letter, the City of Asheville endorses Alternatives 4 and 4B for Section B and calls on NC DOT to further minimize the size and scale of these alternatives, particularly the impacts on the Burton Street Community, the impacts of Alt. 4 on the Emma Community and the impacts of Alt. 4B on the Montford Community. Following completion of the new travel demand model and capacity analysis and focused exploration with NC DOT of options to reduce the overall size and impact of the project, the City of Asheville anticipates being able to endorse a single alternative but, in the absence of additional information, is not able to do so at this time; and (5) The City of Asheville endorses Alternative F1 for Section C (I-40/I-26/I-240 interchange) in order to minimize the footprint and cost, while achieving the primary objective of creating full movement between interstate highways. For the reasons cited in the City's comment letter, the City of Asheville does not endorse the increased expense associated with the proposed collector roads and widening of I-40 east of Brevard Road."

She said that we have very real problems in this corridor that need to be addressed and we need to figure out a way to do that while preserving the integrity of our City and the things that make it special.

Closed Session

At 7:13 p.m., Councilman Young moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132

of the General Statutes. The law that makes the information privileged and confidential is N.C. Gen. Stat. § 143-318.10(a)(3). The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(1); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including, but not limited to, a lawsuit involving the following parties: Rebecca Robertson, Wann Near, Christal Weatherly and the City of Asheville. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3). This motion was seconded by Vice-Mayor Wisler and carried unanimously.

At 7:50 p.m., Councilman Bothwell moved to come out of closed session. This motion was seconded by Vice-Mayor Wisler and carried unanimously.

Mayor Manheimer asked for public comment.

The following individuals expressed their thoughts regarding the I-26 Connector and its route, and those with written comments submitted them to Mr. Putnam for forwarding to the NCDOT (others indicated they would submit their comments directly to NCDOT):

John Gordon, resident in the Montford area
Ted Figura
Joe Minicozzi
Steve Rasmussen
Don Kostelec
Alan McGuinn
Mike Sule
West Asheville resident
Timothy Sadler

In response to Vice-Mayor Wisler, Mr. Putnam felt that he didn't think that 1,000 copies of the same letter to NCDOT would rise to the top; but felt it was very important to make sure that the NCDOT receives at least one copy.

Councilman Bothwell felt that the suggestion by Mr. Kostelec be made to the resolution to state that "Whereas, traffic congestion and safety are challenging problems along I-240 and I-26 through Asheville." He felt that a lot of the problems associated with that stretch is distribution of traffic.

It was the consensus of Council to bring this item back on a regular basis to update City Council on the progress of the I-26 Connector.

Councilman Bothwell then moved to approve the resolution, with the amendment noted above. This motion was seconded by Councilwoman Mayfield and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 346

VI. NEW BUSINESS:

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Richard A. Clemenzi, PE, CGD, PACE-NC Inc., presented information regarding the PACE Financing for Clean Energy. He hoped Asheville will begin the process to actively facilitating PACE in the very near time frame by (1) supporting PACE initiative; (2) form team staff/PACE-NC/Industry/SACEE Team; (3) coordinate with Local Governance Commission; and (2) have the PACE Team report back in 30 days. City Manager Jackson said that policy direction and strategic goals from Council are clear and this is a management project. Staff will continue

working with this group and seek the Sustainability Advisory Committee on Energy & the Environment's advice if they need to come back with additional policy direction.

Rev. Amy Cantrell urged Council to use their tools to work on the affordable housing crisis, in particular, to increase money in the Affordable Housing Trust Fund; to continue to use land banking and creating policies around land banking for the purpose of affordable housing; and to pass mandatory inclusionary zoning so that any new development also includes affordable housing.

Mr. Eric Velez said that he has property in south Asheville and is working with Planning and Community Development staff to develop the property in an positive way for affordable housing.

Mr. Bryon Greiner, member of the Downtown Commission, stated that the Downtown Commission has a process in place to work with developers to get a better project. In addition, mandatory compliance and mandatory review of the design guidelines is a good step. Basically, developers need a clear, understandable process for development.

Mr. Timothy Sadler suggested if apartments get subsidies from the U.S. Dept. of Housing & Urban Development (HUD), they should require a mold test, paid by the HUD. In addition, he urged Council to encourage the use of new products to make sure our buildings are built energy efficient.

Councilman Young urged Council familiarize themselves with the ban the box initiative as it will be going before the Governance Committee in January.

Accessory Dwelling Units

Mr. John Farquhar and Mr. Jackson Tierney asked City Council to expedite a process to include accessory dwelling units into the homestay ordinance.

It was the consensus of Council to instruct the Planning & Economic Development Committee begin exploring the idea of including accessory dwelling units into the definition of homestays.

City-Owned Property on Haywood Street

Ms. Valerie Hoh and Mr. John Morris presented City Council with a petition containing 9,905 signatures requesting City Council preserve the City-owned property in front of the Basilica of St. Lawrence for future use as public green space, and vote against the sale of that property for commercial development.

Mr. Blain Perry felt the City-owned property on Haywood Street should be used for residential. Downtowns are concentrated areas where people can walk without having to have cars. That would be a way to preserve some of our greenspace outside of the City.

Mayor Manheimer said that City-owned property on Haywood Street noted that this property is no longer on the market. She felt we the process should begin at the Planning & Economic Development Committee (PED), with involvement from the Asheville Design Center, the Basilica, etc.

Councilman Bothwell felt the first essential decision is what the streets will be like because the streets will define what we do. The Transportation Department and Asheville Design Center have come up with ideas on how to improve the intersection. Then, with the Planning & Economic Development Committee (PED) involvement, we let the Asheville Design Center, or

others, come in with demonstration ideas that could be installed relatively cheaply and let people see what could happen, i.e. a demonstration garden. He felt there should be a lot of citizen input into this project.

Councilwoman Mayfield understood the Asheville Design Center will not work on this project unless there are a range of options they are allowed to present, to include some level of development and public space. The Design Center has offered (with a very small compensation compared to what the City would pay for a larger design firm) to come up with a range of options that would be vetted by the public, but it would not be just pure open space or public space.

Councilman Smith was not sure how we approach an entity to do planning for the City without having a Request for Qualifications process. He didn't feel that was a public process.

Vice-Mayor Wisler, Chair of the PED Committee, felt that PED can take on the role of looking at ways to find opportunities for the public to come forward with ideas.

Councilman Young supported entire public space with no development, along with community conservation.

Councilwoman Mayfield was interested in an exploration of options that would include everything from a combination of a building and public space, to pure green space, and that we look at what the costs and benefits are of each of the design options.

Councilman Smith felt this item should be placed on an agenda and arriving at a major policy decision at this meeting is not appropriate. He supported starting a process planning at PED.

It was the consensus of Council to have PED start investigating a thorough public process around the options obtaining as much public input as we can, and then PED will come to a consensus on a process and bring that forward to Council.

VIII. ADJOURNMENT:

Mayor Manheimer adjourned the meeting at 9:11 p.m.

Magdalen Burleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – January 12, 2016 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Gwen C. Wisler; Councilman Cecil Bothwell; Councilman Brian D. Haynes; Councilwoman Julie V. Mayfield; Councilman Gordon D. Smith; Councilman W. Keith Young; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

I. PROCLAMATIONS:

A. EMPLOYEE RECOGNITIONS

City Manager Jackson recognized the following (1) for their participation in the ISO 14001 EMS Certification for Transit: Rosann Christian, Yuri Koslen, Mariate Echeverry, Ken Putnam, Cathy Ball, Sam Byrd, LaShawn Meadows, Ronnie Payne, Fedor Demets, Steve Hall, Dewayne Dryman, Wesley Logan, Eli Bratnichenko, Sara McHone, Kerby Smithson, Joey Robison, Sean Spiller, Janet GeorgeMurr, McCray Coats, Mark Stevens, Dion Eskew, Tony Rathbone, Keisha Lipe, Tony Chapman, Bobby Austin, John Swafford, Jeremy Hyatt, Andrew Morgan and Cody Shook. Nationally there are approximately 12 agencies with the certification; (2) for their participation in the Award of Excellence for 123 Graffiti - Graffiti Clean Up Initiative - Greg Shuler, Brad Hunter, Chris Daniels, Vicky Haskell, Scott Barnwell, Cameron Carlyle, Tim Reimers, Dawa Hitch, Dan Phairas, Christy Edwards, Marsha Stickford, Cathy Ball, Joey Robison and Catherine Hofmann; and (3) for their participation in the Parking Garage Real-Time Space Availability - Keith Kennedy, Scott Barnwell, Tim Reimers and Cameron Carlyle.

Mayor Manheimer thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

B. PROCLAMATION PROCLAIMING JANUARY 16 AND 18, 2016, AS "DR. MARTIN LUTHER KING JR. DAYS"

Mayor Manheimer read the proclamation proclaiming January 16 and 18, 2016, as "Dr. Martin Luther King Jr. Days" in the City of Asheville. She presented the proclamation to Ms. Oralene Simmons, and others, who briefed City Council on some activities taking place during these days.

C. PROCLAMATION PROCLAIMING JANUARY, 2016, AS "SENIOR SUFFRAGE MONTH'

Mayor Manheimer read the proclamation proclaiming January, 2016, as "Senior Suffrage Month" in the City of Asheville. She presented the proclamation to Ms. Ann Butzner, who briefed City Council on some activities taking place during the month.

At the request of Councilman Smith, Council supported Councilman Smith proceeding through the process to make voting day a fare free day.

II. CONSENT AGENDA:

Mayor Manheimer announced that the Resolution in support of the designation of the Asheville Housing Authority's Lee Walker Heights Project as a redevelopment project be moved from New Business to Consent Agenda. This item will be pulled from the Consent Agenda for discussion and/or an individual vote.

Councilman Smith asked that the Resolution establishing the second Monday in October as Indigenous Peoples Day be pulled from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON DECEMBER 8, 2015

B. APPOINTMENT RESOLUTIONS

RESOLUTION NO. 16-1 - RESOLUTION APPOINTING A MEMBER AS THE EX-OFFICIO, NON-VOTING MEMBER TO THE CITIZENS-POLICE ADVISORY COMMITTEE

Summary: Former Councilman Chris Pelly has resigned as the ex-officio non-voting City Council member on the Citizens-Police Advisory Committee, thus creating a vacancy.

Councilman Keith Young be and he is hereby appointed to serve as the ex-officio, non-voting City Council member on the Citizens-Police Advisory Committee according to the length of his Council term of office.

RESOLUTION BOOK NO. 37 - PAGE 348

RESOLUTION NO. 16-2 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

Summary: Councilman Gordon Smith has resigned as a member of the Asheville-Buncombe Community Relations Council. Councilman Keith Young be and he is hereby appointed as a voting member to the Asheville-Buncombe Community Relations Council to serve a term according to the length of his Council term of office.

RESOLUTION BOOK NO. 37 - PAGE 349

RESOLUTION NO. 16-3 - RESOLUTION APPOINTING A MEMBER TO THE DOWNTOWN COMMISSION

Summary: Former Councilman Jan Davis has resigned as a member of the Downtown Commission, thus creating a vacancy for a voting City Council member.

Councilman Brian Haynes be and he is hereby appointed to serve as a voting member on the Asheville Downtown Commission until he is no longer a member of City Council.

RESOLUTION BOOK NO. 37 - PAGE 350

RESOLUTION NO. 16-4 - RESOLUTION APPOINTING MEMBERS TO THE HUB COMMUNITY ECONOMIC DEVELOPMENT ALLIANCE

Summary: Former Vice-Mayor Marc Hunt has resigned as a member of the HUB Community Economic Development Alliance, representing the seat of a Planning & Economic Development Committee member.

Vice-Mayor Gwen Wisler be and she is hereby appointed as the City Council appointee and member of the City Council Planning & Economic Development Committee to serve a a member of the HUB Community Economic Development Alliance until she is no longer a member of City Council or is no longer a member of the City Council Planning & Economic Development Committee.

Councilwoman Julie Mayfield be and she is hereby appointed to serve as an Alternate on the HUB Community Economic Development Alliance until she is no longer a member of City Council.

RESOLUTION BOOK NO. 37 - PAGE 351

RESOLUTION NO. 16-5 - RESOLUTION APPOINTING A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT

Summary: The term of Chris Pelly, as a member on the Metropolitan Sewerage District Board of Directors, expires on January 19, 2016.

Mr. Chris Pelly, 95 Cisco Road, be and he is hereby appointed to serve an additional three-year term, term to expire January 19, 2019, or until his successor has been appointed.

RESOLUTION BOOK NO. 37 - PAGE 352

RESOLUTION NO. 16-6 - RESOLUTION APPOINTING THE CHAIR OF THE POLICE OFFICERS AND FIREFIGHTERS DISABILITY REVIEW BOARD

Summary: There is a need to appoint the Vice-Mayor to serve as the Chairman of the Police Officers and Firefighters Disability Review Board.

Vice-Mayor Gwen Wisler be and she is hereby appointed as the City Council representative, to serve as Chairman, to the Police Officers and Firefighters Disability Review Board to serve a term according to the length of her Vice-Mayor term of office.

RESOLUTION BOOK NO. 37 - PAGE 353

RESOLUTION NO. 16-7 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE AREA RIVERFRONT REDEVELOPMENT COMMISSION

Summary: Former Councilman Jan Davis has resigned as a member of the Asheville Area Riverfront Redevelopment Commission, thus creating a vacancy.

Councilman Cecil Bothwell be and he is hereby appointed to the Asheville Area Riverfront Redevelopment Commission to serve as the City Council voting member until he is no longer a member of the Asheville City Council.

RESOLUTION BOOK NO. 37 - PAGE 354

RESOLUTION NO. 16-8 - RESOLUTION APPOINTING AN EX-OFFICIO, NON-VOTING MEMBER OF THE BUNCOMBE TOURISM DEVELOPMENT AUTHORITY

Summary: Former Councilman Jan Davis has resigned from the ex-officio non-voting member on the Buncombe County Tourism Development Authority, thus creating a vacancy for a City Council representative.

Councilwoman Julie Mayfield be and she is hereby appointed as the ex-officio non-voting City Council representative on the Buncombe County Tourism Development Authority to serve a term according to the length of her Council term of office.

RESOLUTION BOOK NO. 37 - PAGE 355

C. RESOLUTION NO. 16-9 - RESOLUTION AMENDING THE 2016 CITY COUNCIL MEETING SCHEDULE TO ADD THE CITY COUNCIL ANNUAL RETREAT ON JANUARY 29 AND 30, 2016, BEGINNING AT 8:30 A.M. IN THE 1ST FLOOR CONFERENCE ROOM OF THE COUNTY ADMINISTRATION BUILDING, LOCATED AT 200 COLLEGE STREET, ASHEVILLE, N.C.

RESOLUTION BOOK NO. 37 - PAGE 356

D. RESOLUTION NO. 16-10 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN AN AMENDMENT TO THE 2012 MUNICIPAL RECORDS RETENTION AND DISPOSITION SCHEDULE

Summary: The consideration of a resolution authorizing the Mayor to sign an amendment to the 2012 Municipal Records Retention & Disposition Schedule.

On October 9, 2012, City Council adopted Resolution No. 12-228 approving the 2012 Municipal Records Retention and Disposition Schedule issued September 10, 2012, by the N.C. Dept. of Cultural Resources, Division of Archives and History.

The first amendment (dated October 2, 2014) to Standard 9 (Law Enforcement Records) was previously adopted by City Council on February 10, 2015, by Resolution No. 15-33. The second amendment to Standard 12 (Personnel Records) clarifies language for retention period of employee eligibility records.

Pro:

- Promotes municipal records management

Con:

- None noted

Staff recommends City Council adopt a resolution authorizing the Mayor to sign an amendment to the 2012 Municipal Records Retention & Disposition Schedule.

RESOLUTION BOOK NO. 37 - PAGE 357

E. RESOLUTION ESTABLISHING THE SECOND MONDAY IN OCTOBER AS INDIGENOUS PEOPLES' DAY

This item was removed from the Consent Agenda for discussion and/or an individual vote.

F. RESOLUTION NO. 16-12 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A GRANT AGREEMENT WITH THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY FOR $1 MILLION IN TOURISM PRODUCT DEVELOPMENT FUNDS

Summary: The consideration of a resolution authorizing the City Manager to sign a grant agreement with Buncombe County Tourism Development Authority (BCTDA) for $1 million in Tourism Product Development Funds (TPDF).

The BCTA administers the TPDF Grant with the purpose to provide funding assistance for construction projects that will create new and additional lodging room nights in Buncombe County. In May 2015, Council approved a TPDF application for $2.5 million in grant funds to help construct $5 million worth of Riverfront Destination Development projects. During the TPDF Phase II application, the request was reduced to $2.27 million.

In response to the TPDF Phase II application, the BCTDA announced an award of $1.7 million to the City of Asheville (City) in late October 2015 for the Riverfront Destination Development Project. $1 million is available from the TPDF now and an additional $700,000 is expected to receive final approval from the BCTDA in early 2016 when additional funds are available. Two different grant agreements will be executed between the City and the BCTDA since funds will become available at different times.

Since the City did not receive full funding, the scope of the Riverfront Destination Development Project was reduced.

The grant agreement outlines the required construction start and end dates, the construction cost reimbursement schedule, annual reporting requirements, and other legal requirements.

The City's application proposed construction of brick and mortar projects that will help transform the River Arts District and its gateways from a place that has scattered and hard to find attractions, into a fully developed destination where points of interest and experiences are easy to find, attentive to visitor needs, and easily accessed.

Pros:

- City Council has identified implementation of riverfront redevelopment capital investments as a key strategic goal for the city
- The TPDF grant award is a significant funding opportunity that leverages the City's investment to move forward on these investments
- The City has shown a commitment to implementing these projects as part of the Economic Development Capital Improvement Program

Con:

- The grant is a reimbursement grant, which means that for cash flow purposes the City will need to allocate its own capital dollars first and structure its financing to cover these cash needs

Funding from grants and partnerships is a key component of the City's multi-year Capital Improvement Program (CIP). This $1 million grant will be used to provide funding for a key project in the CIP. Staff is currently updating cost estimates, and cash flow projections for the CIP and will present those updates as part of the upcoming FY 2016-17 budget process.

City staff recommends City Council authorize the City Manager to sign the grant agreement with BCTDA.

RESOLUTION BOOK NO. 37 - PAGE 359

G. RESOLUTION NO. 16-13 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR A GRANT FROM THE US DEPT. OF HOMELAND SECURITY FOR STRUCTURAL FIREFIGHTING PERSONAL PROTECTIVE EQUIPMENT

Summary: The consideration of a resolution authorizing the City of Asheville Fire Department (Fire Department) to apply for a grant in the amount of $500,000.00 from the US Department of Homeland Security to obtain funding for Structural Firefighting Personal Protective Equipment, and to accept grant funding if awarded.

The Department of Homeland Security has recently issued guidance for the Fiscal Year (FY) 2015 Assistance to Firefighters Grant (AFG) program. This is a grant opportunity for fire departments to purchase needed equipment to enhance firefighter safety, service delivery, and effectively train personnel. Towards that end, if the grant request is approved, the Fire Department would purchase Structural Firefighting Personal Protective Equipment to replace equipment that is currently reaching its end of service life. The Structural Firefighting Personal Protective Equipment is one of a firefighter's most critical tools for personal protection and regular replacement ensures that our personnel have the most up-to-date equipment available. The grant program requires communities of greater than 20,000 populations to match Federal grant funds equal to 10 percent of the total project cost, or $50,000.

Staff recommends participation in the AFG Program for the following reasons:

- The grant program was developed to assist in the purchase of critical firefighting equipment and tools to provide greater safety for firefighters.
- If awarded, the City would be able to utilize grant funds for the purchase of required equipment.

Pros:

- Improved safety and efficiency of firefighters when responding to dangerous environments.
- This grant will enable AFD to accelerate our procurement of this equipment.

Con:

- 10% matching amount of purchase required $50,000

This grant will not increase the Fire Department's budget request as these funds are already programmed into the budget.

City staff recommends that City Council authorize the fire department to apply for a grant in the amount of $500,000 from the US Department of Homeland Security to obtain funding for Structural Firefighting Personal Protective Equipment, and to accept the grant funding if awarded.

RESOLUTION BOOK NO. 37 - PAGE 360

H. RESOLUTION NO. 16-14 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY TO THE FRENCH BROAD METROPOLITAN PLANNING ORGANIZATION FOR GRANTS OF FEDERAL TRANSPORTATION FUNDING

Summary: The consideration of a resolution authorizing the City Manager to apply to the French Broad River Metropolitan Planning Organization (MPO) for grants of federal transportation funds, and if the applications are successful, to accept grants and sign necessary agreements with the MPO, or state or federal agencies to receive the funds.

The MPO has opened a call for projects to use federal Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities (5310) funds; the deadline was December 23, 2015; due to timing issues city staff applied for the grant, but the application will not move through without council's approval.

The MPO expects to have approximately $325,000 in 5310 funds for 2016. These funds are expected to be distributed via this competitive call for projects.

Staff is pursuing funding for the following projects:

- Paratransit service for $112,500; with 80% funded by the grant.
- Transit station repairs and ADA upgrades for $150,000; 80% funded by the grant.

If received, the paratransit funds would help fund an annual operating expense that will be programmed in the City's Transit Operating Fund for FY 2017; the transit station is an existing capital project that requires more funds than originally budgeted; these funds would help offset the additional costs. Each of these projects is ready to move forward as the funding becomes available.

The Transit Committee and Multimodal Transportation Commission endorsed this application.

Pros:

- Allows the City of Asheville access to up to $262,500 in capital, and operating investment.
- Allows the City of Asheville to offset existing costs.

Con:

- Commits the city to funding to the match, at least for the time the applications are pending.

If successful, the grant applications will involve the spending of city funds to leverage 80% grant funding for these projects, up to a grant value of $262,500.

City staff recommends City Council adopt a resolution authorizing the City Manager to apply to the French Broad River Metropolitan Planning Organization (MPO) for grants of federal transportation funds, and if the applications are successful, to accept grants and sign necessary agreements with the MPO, or state or federal agencies to receive the funds.

RESOLUTION BOOK NO. 37 - PAGE 361

I. RESOLUTION NO. 16-15 - RESOLUTION AUTHORIZING THE CITY MANAGER ENTER INTO A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR IMPROVEMENTS AT THE I-26 AND NC 191 (BREVARD ROAD) INTERSECTION

Summary: The consideration of a resolution authorizing the City Manager to sign a municipal agreement with the N.C. Dept. of Transportation for the installation of a concrete sidewalk along both sides of NC 191 (Brevard Road) at its intersection with I-26 and for the installation of four concrete bus pads at locations designated by the City of Asheville.

The N.C. Dept. of Transportation (NCDOT) plans to upgrade the interchange of I-26 and NC 191 (Brevard Road) and widen and reconstruct I-26 from east of Brevard Road to east of Pond Road with an anticipated letting date during February 2016 and an anticipated completion date during August 2019. The project includes construction of about 5,750 linear feet of 5-foot sidewalk and four bus pads.

According to current NCDOT policy, the City is required to reimburse the NCDOT 40% of the construction cost for the sidewalk and 100% of the construction cost for the bus pads. The estimated cost to the City for the sidewalk is $57,086 and the estimated cost to the City for the bus pads is $1,132. Upon completion of the project, the NCDOT will invoice the City for its share of the actual costs and final payment would be due within 60 days of the invoicing.

Pros:

- Much need pedestrian and transit infra-structure will be provided.

- The City is only required to pay 40% of the construction cost for the sidewalk as opposed to 100%.
- Overall construction cost will be minimized since the sidewalks and bus pads are part of a larger project.

Cons:

- The City will be responsible for the maintenance of the sidewalk and bus pads.
- Actual anticipated cost to the City is $58,218.

The actual anticipated cost to the City is $58,218 and the funds should be budgeted for FY 2019-20 from sidewalk fee-in-lieu-of funds.

Staff recommends that City Council approve a resolution authorizing the City Manager to sign a municipal agreement with the NCDOT for the installation of a concrete sidewalk along both sides of NC 191 (Brevard Road) at its intersection with I-26 and for the installation of four concrete bus pads at locations designated by the City of Asheville as a part of project I-5504.

RESOLUTION BOOK NO. 37 - PAGE 362

J. RESOLUTION NO. 16-16 - RESOLUTION AUTHORIZING THE SALE OF A PARCEL OF LAND OWNED BY THE CITY OFF STATE STREET TO MOUNTAIN HOUSING OPPORTUNITIES FOR THE PURPOSE OF CREATING AFFORDABLE HOUSING

Summary: The consideration of an offer by Mountain Housing Opportunities to purchase, by private sale, real property owned by the City of Asheville located off State Street.

The City owns a small (.18 acres) parcel off State Street in West Asheville. This parcel has been owned by the since 1932, in what appears to be the result of a tax sale. Earlier this year, the City learned that an adjoining parcel with access to Pineview Street was for sale. MHO indicated interest in this parcel, and inquired whether the subject City land off State Street was available. Based upon Council's Strategic Operating Plan and our Comprehensive Affordable Housing Strategy, the City's interest in making this land available for affordable housing was confirmed to MHO, and both parties engaged in due diligence.

As a result of that mutual interest, MHO has offered to purchase the property from the City on the following terms:

- Purchase Price: $34,700. This is the appraised value of the site.
- City to provide non-warranty deed
- MHO will develop 3 single family homes on this site or adjacent property that will be sold to households with incomes below 80% AMI
- City to loan $34,700 to MHO with the following terms:
    - Zero Interest to MHO during construction.
    - Upon sale, loan funds will be transferred/loaned to 3 income eligible households with the City as a lender –3rd mortgage, deferred for 30 years with an equity sharing clause due upon repayment.

MHO's current plan for the Pineview development is to develop 12 single family homes. All homes will be the same size and character, approximately 1000 square feet, 2 bedroom, 1.5 bath. Four of the 12 homes may sit above a garage to take advantage of the site topography. In addition to the 3 homes committed as part of the State Street lot acquisition, 3 additional homes (for a total of 6) are planned to be sold affordably, pending the site being adequate for density of 12 homes and the availability of additional needed subsidy. MHO is currently building homes to both System Vision and Energy Star standards. They are partnering with the Compact Cottage

Company developer who builds to Energy Star standards and will at a minimum build to this standard.

The Housing and Community Development Committee supports the approval of the purchase offer from Mountain Housing Opportunities for the lot off State Street.

Pros:

- Six units of affordable for-sale housing will be created.
- The value of the land will be recovered by the City at the time of the resale of the homes.

Con:

- Although the proposed structure will recover funds at some future point in time, there is no promise of long-term affordability for these homes.

No City funding is requested other than making the value of the land available as a loan.

Staff recommends approval of the purchase offer from Mountain Housing Opportunities for the lot off State Street.

RESOLUTION BOOK NO. 37 - PAGE 363

K. ORDINANCE NO. 4474 - BUDGET AMENDMENT TO APPROPRIATE FUNDING FOR PRIOR YEAR CONTRACTS AND PURCHASE ORDERS THAT ROLLED FORWARD TO FISCAL YEAR 2015-16

Summary: The consideration of a technical budget amendment in each of the City's annual operating funds to appropriate from restricted fund balance the required budget authorization for prior year contracts, purchase orders, and other carry-over appropriations that rolled forward to FY 2015-16.

As part of its ongoing operations, the City enters into various contracts and purchase order agreements throughout the fiscal year. When these contracts and purchase orders are entered into, budget funds are encumbered for the full amount of the expected purchase. Often these contract and purchase orders are not fully completed and paid in one fiscal year. North Carolina General Statutes provide authorization for local governments to reserve the unexpended portion of these prior year commitments and roll those budgets forward to the new fiscal year.

As a part of the FY 2014-15 annual audit, staff identified prior year commitments and carry-over appropriations to roll forward to FY 2015-16, and these dollar amounts were deducted from the unassigned fund balance amounts that were reported in the Comprehensive Annual Financial Report. The attached technical budget amendment will provide authorization to officially appropriate these amounts in the FY 2015-16 budget for each of the City's annual operating funds.

Pro:

- Provides budget authorization for prior year contracts, purchase orders, and other carry-over appropriations that rolled forward to FY 2015-16.

Con:

- None.

As noted above this budget amendment simply provides budget authorization for prior year commitments which have already been reserved in the City's FY 2014-15 financial statements. There is no impact on unassigned/available fund balance in the City's operating funds.

City staff recommends City Council approve the attached technical budget amendment in each of the City's annual operating funds to appropriate from restricted fund balance the required budget authorization for prior year contracts, purchase orders, and other carry-over appropriations that rolled forward to FY 2015-16.

ORDINANCE BOOK NO. 30 - PAGE 206

L. ORDINANCE NO. 4475 - BUDGET AMENDMENT FOR THE CONSTRUCTION OF THE FRONT ENTRANCE OF THE WNC NATURE CENTER

Summary: The consideration of a budget amendment in the amount of $627,000 for the construction of the front entrance at the Western North Carolina (WNC) Nature Center (Nature Center).

The City of Asheville in the Parks and Recreation Department has received a $627,000 contribution from the Friends of the WNC Nature Center (Friends) to support the construction of a new front entrance at the Nature Center. The front entrance is one of the primary initiatives identified in the Nature Center's 2020 Vision Plan.

The Friends, a 501 (c) 3 non-profit organization, is a community group of individuals, businesses and grantors who together support the Nature Center with funding to provide an enriching and educational experience for visitors. Approximately 50 percent of the contribution is funded by a grant awarded to the Friends by the Tourism Development Authority in the Tourism Product Development Fund. The remaining 50 percent of the contribution is funded by institutional and donor directed funds.

Pros:
- Provides funds to support capital improvements at the Nature Center.
- Provides funds to enhance special projects and guest services at the Nature Center.
- Provides funds to assist in fulfilling standards and maintaining Nature Center accreditation with the Association of Zoos and Aquariums.

Con:
- None

A project budget established by this budget amendment will authorize (a) one-time improvements to construct the front entrance; and (b) expenditures up to $627,000. Since these expenditures will be fully funded with a contribution from the Friends that has been received, there is no net fiscal impact to the City's operating budget.

City staff recommends City Council to approve the budget amendment authorizing the City Manager to accept the contribution from the Friends in the amount of $627,000 for construction of the front entrance at the Nature Center.

ORDINANCE BOOK NO. 30 - PAGE 208

M. RESOLUTION IN SUPPORT OF THE DESIGNATION OF THE ASHEVILLE HOUSING AUTHORITY'S LEE WALKER HEIGHTS PROJECT AS A REDEVELOPMENT PROJECT

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Manheimer asked for public comments on any item on the Consent Agenda, but received none.

Mayor Manheimer said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Bothwell moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Wisler and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

RESOLUTION NO. 16-11 - RESOLUTION ESTABLISHING THE SECOND MONDAY IN OCTOBER AS INDIGENOUS PEOPLES' DAY

Summary: This resolution will declare the second Monday in October as Indigenous Peoples' Day in the City of Asheville; encourage other institutions to recognize the day; and reaffirm the City's commitment to promote the well-being and growth of Asheville's and all of western North Carolina's Indigenous People.

Mr. Richard Sneed, Vice-Chief of the Eastern Band of Cherokee Indians, and Mr. Sage Dunston, Chief of Staff representing Chief Justice, thanked Councilman Smith and City Council for this resolution which will celebrate the contributions of Cherokees and all indigenous people.

Councilman Smith moved for the adoption of Resolution No. 16-11. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 358

RESOLUTION NO. 16-17 - RESOLUTION IN SUPPORT OF THE DESIGNATION OF THE ASHEVILLE HOUSING AUTHORITY'S LEE WALKER HEIGHTS PROJECT AS A REDEVELOPMENT PROJECT

Summary: The Asheville Housing Authority, in partnership with Mountain Housing Opportunities, plans to submit an application for low income housing tax credits to the North Carolina Housing Finance (NCHFA) for the redevelopment of Lee Walker Heights and desires to have this project considered a "redevelopment project" application by NCHFA. In order to be considered a "redevelopment project" by NCHFA, certain criteria must be met, of which one option includes evidence that there is a waiver of impact, tap, or related fees normally charged for the project. The City has established an Affordable Housing Fee Rebate of 50% of City permit and water tap fees for which City staff has confirmed this project will qualify, but to meet certain North Carolina Housing Finance Agency requirements for the project, that fee incentive must be approved as an advance waiver.

This resolution will approve the City of Asheville approving a waiver of 50% of all permit, tap, and other City development fees for this important redevelopment project; and (2) authorizing the Mayor to provide a letter to the Housing Authority confirming the approved waiver of fees.

City Manager Jackson said this resolution is only about waiving 50% of all permit, tap and other City development fees. This a precursor to an application to a state tax credit agency. It is his understanding that City Council is interested in understanding all of the unknowns and opportunities, but they are not considering other funding opportunities, other than this waiver. He said that Council's policy is to provide a 50% rebate, but this is a process deviation for a waiver rather than reimbursement.

Councilman Bothwell's concern was if this project was going to be successful it needs to connect the Lee Walker Heights Project to Biltmore Avenue, so it becomes much more part of the community. He understands that it looks pretty certain that the Matthews Ford property will be available to the City and we will be able to make that connection happen.

In response to Councilman Smith, Housing Authority Chief Financial Officer David Nash said that their original request was 100% waiver; however, they have confirmed that a 50% waiver will suffice for the application. A 100% waiver would be a stronger show of support from the City and that is still their preference. There will be an opportunity to revisit the waiver later on in the application process. There will be two other items that will need to be brought before City Council - a rezoning request; and the larger financial commitment they will be looking for infrastructure, so the other 50% waiver could be considered at that time.

In response to Councilman Smith, Mr. Nash explained that at the time that HUD gives its final approval for the conversion from public housing to this new program, and after they secure all the funding and put the financing plan for that, anyone who is living at Lee Walker Heights at that time will have the right to relocation benefits and temporary relocation with the right to return. There will not be any screening requirement for them to return to the property after the new units will be completed.

When Councilman Haynes wondered what percentage of the people displaced would return, Mr. Nash said that he didn't imagine it would be 100% because once they find another place to live and are satisfied with that, they may not wish to relocate again. Through the grapevine he has heard that many of them will return.

In response to Councilman Haynes, Mr. Nash said that they must find housing under the federal HUD requirements. They cannot start demolition on that property until they find housing for the people that are living there. The plan is a three-fold approach - (1) residents will be asked for three choices of relocation to one of our other developments or affiliated developments that the Housing Authority operates; (2) Mountain Housing Opportunities (MHO) is working as their co-developer and they have agreed to waive their credit check requirements for residents moving from Lee Walker Heights, so they will have an opportunity to move to one of MHO's development as they have a turnover; and (3) people can request a voucher and move into the private market. Some people have said that they would like to take their voucher and move to another City. The Housing Authority will honor that request.

In response to Councilwoman Mayfield, Mr. Nash said that only the people at the time of the final HUD approval of the financing plan will be relocated, which they expect to be in late 2016 or early 2017. He said that currently they have 76 households still living in the development. People are staying in the development and in the planning process because they want to be there and they want to be able to come back to the new development.

Two Lee Walker Heights residents who have been participating in the process said that there has been good communication with the Housing Authority. They felt that 70% of the residents will return because everyone that lives there was born and raised there and they want to return.

When Executive Director of the Housing Authority Gene Bell said that a letter has been sent to every resident outlining the relocation requirements and their benefits, Mayor Manheimer asked if he would share that letter with Council so they can be educated when residents call them.

Councilman Young was inclined to support this so they can complete their application; however, he will be interested in hearing more when they come back to Council with a substantial request.

Councilwoman Mayfield moved for the adoption of Resolution No. 16-17. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 364

III. PRESENTATIONS & REPORTS:

A. AUDIT PRESENTATION

Mr. Daniel Gougherty, Manager of Cherry Bekaert, LLP, reviewed with Council the Fiscal Year 2015-16 audit which consisted of reviewing the City's major assets, liabilities and other areas within the financial statements issued by management for accuracy and consistency with General Acceptable Accounting Principles. He then reported on the role of the external auditor, the key highlights and the summary (1) clean opinions (2) No Adjusted Journal Entries and one Proposed Adjusting Journal Entry; (3) good internal controls; (4) one management letter comment; and (5) full cooperation with management.

B. FINANCIAL QUARTERLY UPDATE

Chief Financial Officer Barbara Whitehorn provided the financial information report, which reflects the City's overall financial position for the fiscal year through September 2015. The executive summary is as follows:

- ***Amendments.*** There were no budget amendments in the General Fund during the first quarter.

- ***Revenues.*** Through September 30, 2015, the City has collected $14.5 million in General Fund revenue, which represents approximately 14% of the total General Fund revenue budget. This collection rate is typical for the first quarter of the fiscal year. Based on FY 2014-15 year end revenue collections and FY 2015-16 first quarter trends, staff is currently projecting that ***FY 2015-16 General Fund revenue will exceed budget by $460,000 or 0.44%.***

- ***Expenditures.*** General Fund expenditures through September 30, 2015 totaled $19.8 million or 19% of budget, which is typical for this point in the fiscal year. Personnel expenses, the largest component of the General Fund budget, are on budget through the first quarter. Staff is projecting that ***FY 2015-16 expenditures (including contract and purchase order commitments) will finish the year under budget by $746,000 (99.3% of adopted budget).***

- ***Fund Balance.*** The City began FY 2015-16 with unassigned fund balance of $16.6 million. Based on ***current revenue and expenditure projections for FY 2015-16, staff estimates that unassigned fund balance at June 30, 2016 will be $17.8 million or 17.4% of estimated expenditures.***

In response to Councilman Smith, Chief Financial Officer Barbara Whitehorn said that the City's Fund Balance policy is 15% (now Fund Balance is 17.6%) and any excess uncommitted funds is up to Council to determine what to do with it. Staff recommends growing the Fund Balance percentage because it impacts our credit rating.

C. STRATEGIC OPERATING PLAN UPDATE

Executive Director of Planning & Multimodal Transportation Cathy Ball updated City Council on the Strategic Operating Plan. In each three focus areas, she outlined completed projects, projects in process and next steps.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 2360 SWEETEN CREEK ROAD FOR

THE REPLACEMENT OF THREE EXISTING MULTI-FAMILY BUILDINGS (22 UNITS) WITH TWO NEW MULTI-FAMILY BUILDINGS (24 UNITS)

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Currin reviewed with Council the conditional use process which is a quasi-judicial permit hearing. At this public hearing, all the testimony needs to be sworn and due process protections afforded to the applicant.

Principal Planner Shannon Tuch submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Tuch said that this is the consideration of the issuance of a conditional use permit for property located located at 2360 Sweeten Creek Road for the replacement of three existing multi-family buildings (22 units) with two new multi-family buildings (24 units).

She said the applicant, Givens Estates, Inc. is requesting review of site plans for the construction of 24 new multi-family units in two separate buildings (Attachment to City Exhibit 3 - Aerial Map). This project is considered a Level III review pursuant to Section 7-5-9(a) of the city's Unified Development Ordinance (UDO), which designates review for residential projects with more 50 dwelling units. While Phase 3 includes only 24 units, all three phases, when combined, result in a total of 72 units. Per UDO subsection 7-5-9(a)(1)(c), the aggregate dwelling unit count determines the review thresholds. Level III projects are reviewed as Conditional Use Permits and include a quasi-judicial hearing at City Council as part of the final review.

The project site is an approximately 2.7 acre portion of PIN 9655.57-2108, which is 134.3 acres in total size (Attachment to City Exhibit 3 - Landscape Plan). This parcel is the largest of four parcels that make up the Givens Estate campus, which is 205.6 acres in size and supports a large senior housing community that provides a variety of housing types (Attachment to City Exhibit 3 - Elevations). The residential development is surrounded by a naturally wooded perimeter with mild to moderate topography where much of the campus is subject to the city's steep slope development standards. There is also a small, jurisdictional stream that runs through the property. All three phases of the project area are located internal to the campus on Wesley Drive. Wesley Drive is a privately maintained road that winds through the campus and is accessed off of Sweeten Creek Road in south Asheville.

The applicant previously received approval for two separate Level II projects, Phases 1 and 2. Both earlier phases replaced two existing buildings that contained a total of 14 units, with two new buildings for a total of 24 units, resulting in a net gain of 10 units. The current request is the third and final phase and proposes to replace three existing buildings containing 22 units total, with two new buildings (same design used in Phases 1 and 2) for a total of 24 units, resulting in a net gain of two units. Also included in this phase is the demolition and reconstruction of much of the existing surface parking and connected walkways. While subject to steep slope standards, this phase of the development will stay within the historical limits of disturbance and will not increase the total disturbed area for the property. Overall, the previously disturbed area of 53.87 acres is well below the allowed 91.8 acre total for the campus.

The Givens Estates campus is accessed off of Sweeten Creek Road through a wide, well-marked entrance and is connected internally through a series of privately maintained roads, drives and parking lots. Each phase of the Creekside development is separately parked with a combination of structured parking under the buildings with some surface parking. Phase 3 includes 12 underground spaces per building combined with 22 surface parking spots for a total of 46 spaces. The proposed parking plan results in a small net gain of two spaces over the 42 spaces currently found on-site; however, it reduces the total number of on-street spaces by 20,

which are essentially displaced to the structured parking below the buildings. Additionally, a complete campus parking analysis has been provided and found to be compliant overall. The requisite bicycle parking is also provided.

Landscaping for the new construction includes building impact, street trees and parking lot landscaping. The site is moderately wooded with existing vegetation, which may count towards the overall landscape standard.

A minimum of 20% or 0.54 acres of the project area must be set aside for open space. The proposed plan indicates that 1.43 acres is reserved and shows passively used open space between and around the buildings. Earlier documentation also demonstrated that open space for the larger campus is also met.

The site is currently zoned RM-16 (Residential Multi-family, High Density); the use proposed is permitted by-right and the applicant is proposing to meet the standards of the zoning district with this development proposal. Under this zoning designation, the overall site can support a maximum of 1,362 dwelling units, which is well above the new adjusted total of 681 units.

This proposal was approved with conditions by the Technical Review Committee (TRC) on November 16, 2015. The Planning & Zoning Commission also reviewed the project on December 2, 2015, where it was unanimously supported and recommended for approval. This Level III project requires quasi-judicial review by City Council, and Final TRC review prior to zoning approval.

Section 7-16-2(c) of the UDO states that Asheville City Council shall not approve the conditional use application and site plan unless and until it makes certain findings based on the evidence and the testimony received at the public hearing or otherwise appearing in the record of the case. The applicant has provided a statement on these findings.

Staff finds that the relevant standards of the City have been met or can be met with this application.

Mr. Ken Partin, Director of Givens Estates, was available to respond to questions. He asked that the applicant's position on the seven conditional use standards be submitted into the record (Attachment to City Exhibit 3 - Statement on Findings).

Mr. Tom Jones, engineer of the project, said there is a slight decrease of impervious area and a smaller development footprint. He said this project aligns with the City's goals for compatible, higher density residential infill development.

Councilwoman Mayfield thanked the applicant for increasing density on the property they already have and building much more efficient, safe and healthy buildings for your residents.

Mayor Manheimer opened the public hearing at 6:30 p.m.

Mr. Timothy Sadler suggested the applicant buy monthly bus passes at a bulk rate and offer that to the residents as an amenity. He felt that if residents are offered a bus pass as an amenity, they may be more included to use public transit. Mr. Partin responded that this community is not on a bus stop and there is not good access to a bus stop from the community.

After rebuttal, Mayor Manheimer closed the public hearing at 6:33 p.m.

Vice-Mayor Wisler moved to approve the Conditional Use Permit for Givens Creekside, Phase 3 located at 2360 Sweeten Creek Road because it meets the seven conditional use

standards as demonstrated by the applicant. This motion was seconded by Councilman Smith and carried unanimously.

City Attorney Currin said that the Findings of Fact and Conclusions of Law will be placed on the January 26, 2016, agenda.

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING PROPERTY LOCATED AT 1 WEST TOWER AT PACK SQUARE AND 11 PATTON AVENUE FROM CENTRAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT/CONDITIONAL ZONING AND REVIEW OF SITE PLANS FOR THE RENOVATION OF AN EXISTING 201,000 SQUARE FOOT BUILDING ALONG WITH A PROPOSED 35,300 SQUARE FOOT PARKING STRUCTURE AND OTHER SITE IMPROVEMENTS FOR THE DEVELOPMENT OF A MIXED-USE PROJECT INCLUDING A HOTEL AND SUPPORT FUNCTIONS, 39 CONDOMINIUM UNITS AND COMMERCIAL SPACES, WITH A CONDITION TO MODIFY FENESTRATION STANDARDS FOUND IN SECTION 7-8-18 OF THE UNIFIED DEVELOPMENT ORDINANCE

ORDINANCE NO. 4476 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED AT 1 WEST TOWER AT PACK SQUARE AND 11 PATTON AVENUE FROM CENTRAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT/CONDITIONAL ZONING AND REVIEW OF SITE PLANS FOR THE RENOVATION OF AN EXISTING 201,000 SQUARE FOOT BUILDING ALONG WITH A PROPOSED 35,300 SQUARE FOOT PARKING STRUCTURE AND OTHER SITE IMPROVEMENTS FOR THE DEVELOPMENT OF A MIXED-USE PROJECT INCLUDING A HOTEL AND SUPPORT FUNCTIONS, 39 CONDOMINIUM UNITS AND COMMERCIAL SPACES, WITH A CONDITION TO MODIFY FENESTRATION STANDARDS FOUND IN SECTION 7-8-18 OF THE UNIFIED DEVELOPMENT ORDINANCE

Assistant Director of Planning & Urban Development Alan Glines said that this is the consideration of a request to conditionally zone property located 1 West Tower at Pack Square and 11 Patton Avenue from Central Business District to Central Business District/Conditional Zoning and review of site plans for the renovation of an existing 201,000 square foot building along with a proposed 35,300 square foot parking structure and other site improvements for the development of a mixed-use project including a hotel and support functions, 39 condominium units and commercial spaces, with a condition to modify fenestration standards found in Section 7-8-18 of the Unified Development Ordinance. This public hearing was advertised on January 1 and 8, 2016.

Mr. Glines said that the applicant is requesting consideration of conditional zoning of two parcels totaling .61 acres located at 1 West Pack Square and 11 Patton Avenue, and identified on Buncombe County tax records as PINs 9649-40-2414 and 9649-40-1422, from Central Business District (CBD) to Central Business District Conditional Zoning (CBD CZ). The site plans include the renovation of an existing 201,000 square foot building along with a proposed 35,300 square foot parking structure and other site improvements for the development of a mixed-use project which includes hotel and support functions, 39 residential units and commercial spaces, with a condition to modify fenestration standards found in Section 7-8-18 of the Unified Development Ordinance.

The project site consists of the existing BB&T building, which over the years has been home to a variety of commercial uses focusing on banking and office uses. In the past, portions of the building provided space for restaurants. The project site is surrounded for four streets: North Pack Square to the east (often referred to as Broadway), College Street to the north, North Lexington Avenue on the west side and Patton Avenue on the south side. The site has a dramatic cross slope of nearly 18 feet from the high point at the southeast corner (at Patton Avenue and N.

Pack Square) to the northwest corner of the site (at N. Lexington Avenue and College Street). The existing building has an internal drive-through lane for the former banking use that bisects the site from College Street to Patton Avenue. At the west side of the property there is a surface parking lot with an access point from N. Lexington Avenue. There is an area of city-owned property along the east side that steps to the front of the building including the large tree planters. This area will be reconfigured as a component of the proposal. This property is one of the few parcels in the city to be surrounded by four streets, all of which are designated as key pedestrian streets in the downtown area.

McKibbon Hotel Group seeks to redevelop the existing 200,868 square foot BB&T building, rebranding it as One West Tower at Pack Square. New uses will include 39 residential units intended for sale, and 140 hotel rooms. The main level of the building (accessed from N. Pack Square) will be divided between a hotel managed restaurant space, a second leased commercial space that may be used for a restaurant, and function areas for the hotel lobby. A new retail space (maximum size of 5,000 square feet) will be created out of the lower side of the building facing College Street, with new storefront fenestration where there is currently a solid brick exterior wall. The second and third floors of the building will be used for offices, meeting space and other hotel functions. As the final plans are developed for the project the number of hotel rooms and the number of residential units could change. The developer has asked for some flexibility to reconfigure the final counts so that approximately 20 hotel rooms (the equivalent of a single floor) may be substituted for up to seven residential units.

The building will be refaced with steel, glass and synthetic stone. A new roof feature will be added to the top of the building and the base will also be altered with new doors and a reconfigured plaza space to activate the ground level area.

The proposal also includes a 60 space three-level 35,283 square foot parking structure in the area along North Lexington Avenue that is currently a surface parking lot. The parking spaces will be divided between the hotel arrival area on the top level of the structure with valet parking for hotel guests. The two lower levels will be dedicated for residential parking.

The three existing driveways on Patton Avenue and College Street and N. Lexington Avenue will be utilized to access the three separate levels of the proposed parking structure. The three levels do not have internal ramping and are independent from each other. While there are no parking requirements in the CBD, the project proposes a total of 60 parking spaces. The proposal includes the utilization of the top level of the structure to create 12 spaces and a drop-off area for the valet parking for hotel guests. The hotel valet service and hotel guests will use excess parking available at the AC Hotel across from this site, which is currently under construction. The two lower levels of the structure will provide 48 parking spaces for condominium owners. Bicycle parking is also provided in the structure.

The sidewalks surrounding the property will be improved as proposed on the site plans and include street trees and crosswalks. The plans show that the disturbed area (0.87 acres) is larger than the parcel area (0.61 acres) because it includes the surrounding sidewalks. The proposal will provide major improvements and upgrades to the sidewalks as follows:

North Pack Square - The existing steps and brick planters with trees are currently part of the public right-of-way. The steps act to accommodate the grade change from North Pack Square to the building. The proposal will provide a wider flat area near the corner with Patton Avenue to extend the character of Pack Square and will then provide a grand stair to the primary entrance of the hotel. The sidewalks will vary in width from a maximum of 24 feet at the corner of North Pack Square and Patton Avenue to 12 feet in front of the building. Staff is supportive of reworking the plaza space and widening the sidewalks because it will accommodate the growing number of pedestrians using this main crossroads of downtown.

The excess area at the top of the plaza space will be leased back for outside dining as

has been common practice along the south side of Pack Square and in other parts of downtown. There is a passenger loading zone proposed for the front of the building where two on-street spaces are currently located. One of the metered spaces would be removed and the loading zone would occur in the other space. City staff has commented that a drop-off zone may be helpful to maintain the flow of traffic while accommodating a short term space for drop off and pick up of passengers. There is an existing loading zone along College Street that will remain after construction and serves as a second long-term loading zone for businesses throughout the area. Also taxis and hotel guests may utilize the direct access to the hotel provided from Patton Avenue.

College Street - The existing sidewalk along College Street is currently about seven feet wide. The proposal is to widen the sidewalk to eight feet for the section adjacent to the existing building and 10 feet adjacent to the proposed parking structure. Street trees will be added along this block which will soften the scale of the building. Access to the existing loading dock will remain, as well as access to the mid-level of the new parking structure. A new open stairway is proposed to connect the top of the parking structure to the College Street sidewalk.

N. Lexington Avenue - The existing sidewalk along N. Lexington Avenue is only about five feet wide. The proposal is to widen this sidewalk to 11 feet by reworking the width of the travel lane and by encroaching into the parcel. Four street trees will be added to this streetscape. At the corner of N. Lexington and Patton Avenues there is a niche space within the corner of the parking structure. The developer is proposing to maintain special pavement and has mentioned creating a space for an art piece. The signal pole at this corner (currently in the middle of the sidewalk area) will be relocated to a space just at the edge or behind the sidewalk. The developer will participate in the construction of the base for this pole.

Patton Avenue - The existing ten foot wide sidewalk in this area will be replaced. The developer is proposing to remove two on-street parking spaces at the corner of N. Lexington and Patton Avenues because of visibility concerns when drivers exit the upper level of the parking structure. The applicant is proposing an 18 foot sidewalk section there with two street trees in tree grates. The remaining sidewalk closer to the corner with N. Pack Square will be 12 feet wide with three street trees.

There is some transit features off-site, but they are part of the proposal. That will include two poles to house a map and route information. There will also be a bus shelter along the bus route within the public right-of-way at North Pack Square. The developer has agreed to those improvements.

Landscaping requirements for the CBD include the use of street trees and except for some minor spacing issues, the plans appear to comply with requirements. Open space is not required for developments within the CBD.

The existing building has been studied for compliance with key measurements and design standards for CBD projects and essentially complies. Only two items do not comply: 1) the requirement of a streetwall stepback; and 2) the amount of fenestration provided along the North Pack Square façade (east side of the building). The UDO anticipates this type of situation with a provision that an existing building which does not comply with all development standards should not be made less compliant through redevelopment. The building does not provide a stepback at the height of the street wall but is not required to comply because it is an existing condition. The fenestration on the east side of the building however, is being reduced through the redevelopment proposal to about 60% instead of the required 70%. The development will need a condition to modify the standard, which may be granted by City Council as a part of the conditional zoning review process (additional analysis provided below).

The property has its primary pedestrian entrance along the frontage of North Pack Square. There is also an entrance along College Street to a new retail space proposed in that

location. The parking structure has frontage on N. Lexington, College Street and Patton Avenue and meets parking structures fenestration standards. There are no direct access points into the building on Patton Avenue except by way of the driveway to the guest drop off area. The rest of the building that faces Patton Avenue functions as the base of the structure, which is mostly solid. The area above this base is proposed to be open and will be activated by the restaurant use for outside seating.

The new building design emphasizes a base, middle and cap orientation in compliance with UDO requirements. The base section proposes a higher proportion of stone materials; the middle section incorporates stone in a lighter color and uses more glass in larger spans to increase the lightness of the structure. The treatment of caps for tall buildings is given special emphasis in the UDO and the Downtown Master Plan. The cap portion of the building proposes the use of more glass than stone and works to make the tower appear lighter. The cap is detailed with both stone veneer and metal panels and other detailing to provide a well defined ornamental finish to the project.

Conditions Modifying Development Standards - Per Section 7-7-8 of the UDO, a project undergoing review as a conditional zoning may request a modification of certain standards as a part of the project review. Along the east side of the building, the ground floor fenestration is required to be a minimum of 70% windows, doors or other openings. The existing structure complies with this standard. Through the redevelopment of the façade, there are solid vertical pilasters using synthetic stone that begin at the ground level and provide a regular rhythm across the façade to the upper stories of the building. This will reduce the amount of the ground level fenestration to about 60% of the length of the façade, which is below the 70% requirement.

The reduction is partially the result of the design intention to satisfy the base, middle and cap orientation as specified as an option in the UDO for downtown buildings. The fenestration requirement is required "because it enhances the character of downtown Asheville by providing features of visual interest at the sidewalk for the benefit of pedestrians, be defining the scale between the ground floor and upper floors..." (see Section 7-8-18). Staff is supportive of the condition to modify the standard because it is a result of the unified building design, which along with the new plaza in front of the building will be an active space that includes wider sidewalks for pedestrians and outdoor dining. All of this helps to meet the intent of the fenestration standard.

The developer has asked for some flexibility in the mix of uses, especially between the hotel room amounts and the condo amounts. As the final plans are developed for the project, the number of hotel rooms and the number of residential rooms could change. The developer has asked for some flexibility to reconfigure the final counts so that approximately 20 hotel rooms (equivalent to 1 floor) may be substituted to up to 7 residential units. That could happen without further review or reconsideration by Council.

As per UDO Section 7-5-9.1. Site plan review for large development projects on parcels zoned Central Business District and located in the Downtown Design Review Overlay District in the Traditional Downtown Core are reviewed as Level III conditional zoning applications. With a conditional zoning request, City Council can learn about the project without the ban of ex-parte communication and can propose conditions so long as they are agreed to by the developer for the proposal.

The Level III downtown conditional zoning review process specifies that the Technical Review Committee (TRC) reviews the request for technical compliance, followed by the Downtown Commission which provides design review and a recommendation for the building and site. The Planning and Zoning Commission follows with a public hearing and provides a recommendation to City Council, which takes final action. If the proposal is approved by City Council, the project will return to the TRC for a final review prior to permit issuance.

The TRC reviewed this application at their meeting on November 2, 2015, and approved it with conditions. The Downtown Commission reviewed the project at their meeting on November 13, 2015, and recommended unanimous approval. The Planning and Zoning Commission reviewed the project on November 19, 2015, with a 6-1 vote. The commissioner who cast the single vote against the project focused on the new building design which removes much of the original design elements of the structure which is described as an International Style building from the 1960's.

As required by the ordinance, the developer held a meeting for neighbors on October 14, 2015. The developer reported that about 20 people attended the meeting.

The property is zoned Central Business District as are all surrounding properties. The uses proposed with the application are compatible with surrounding uses that include a hotel under construction, office, retail, food and beverage facilities and residential units.

The AC Hotel by Marriott was approved in 2014 at the corner of College Street and Broadway. Parking for hotel guests from One West Tower will be provided in this parking structure.

The Asheville 2025 Comprehensive Plan recognizes the importance of redevelopment and reinvestment, especially in downtown where intense development is appropriate and where infrastructure is in place to support the development. The Center City Plan supports high quality architecture with new construction, while respecting historic context and the creation of pedestrian environments and open spaces that are pleasant, visually interesting and welcoming to visitors. The Downtown Master Plan emphasizes the importance of new development projects to improve sidewalks along their frontage to meet defined standards and calls attention to the importance of building caps for taller buildings to enhance the skyline of downtown Asheville.

The proposal is most closely aligned with Council's Focus Area 1: Economic Growth and Sustainability, Goal 2: Invest and leverage investment in community infrastructure by encouraging mixed-use and sustainable infill development in coordination with the Comprehensive Plan, because the project will redevelop an existing building and provide new public sidewalks and plaza infrastructure.

Considerations:

- The project represents additional investment and provides an adaptive reuse of an older downtown building.
- The project will comply with downtown design standards to enhance the skyline of downtown Asheville.
- Public infrastructure will be enhanced through new wider sidewalks and other streetscape improvements.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Staff recommends approval of the proposed Level III conditional zoning application with the condition modifying fenestration standards, finding it consistent with City-adopted plans and strategic goals for development.

Upon inquiry of Councilman Bothwell, Mr. Glines explained in further detail the total loss of four parking spaces (2 on North Pack Square and 2 on Patton Avenue).

When Councilman Bothwell asked about signage, Mr. Glines said that the sign ordinance will govern what can be located on the building.

In response to Councilwoman Mayfield, Mr. Glines said that there are 17-foot sidewalks in the City, noting that there is a wide sidewalk across the street from this project on the Patton Avenue side.

When Councilwoman Mayfield questioned the necessity of losing the 2 parking spaces on North Pack Square, Mr. Glines responded that they debated this issue with the Transportation Department, Police Department, Fire Department and Public Works Department and it was their final conclusion that this is not a bad solution. What is happening out there now is happening without facilities, and the Police get frustrated because people are blocking the lane backing cars up through the light. This will help alleviate that backup. This area would be for anyone in the area of downtown.

Councilman Smith said we have an occupancy tax problem where the hotel industry retains the entirety of the occupancy tax for marketing and product development, as it sees fit. Last summer the City and County approached our hotel industry partners and requested that we cooperate to have an equitable distribution of that occupancy tax. That conversation was denied. Law was changed to increase the tax and cut the City out. We know the hotel industry has a wage problem and thus contributing to the affordable housing crisis. The hotel industry has historically had a local business problem where it has forced out local businesses. There is also an infrastructure problem in regards to the number of visitors that are coming to the City and the City not seeing any return on the infrastructure tax. Most say the BB&T Building is ugly, but exploitation of the City is uglier. He has concerns about this project, but they can be ameliorated if the applicant were willing to consider this greater context, and consider living wages, consider local business, consider affordable housing, and to consider being an advocate for the people of the City in equitably redistributing the occupancy tax for public needs.

Mr. John Cooke, attorney for the applicant, said the BB&T Building has been in downtown Asheville for 50 years and is visible from every spot in Asheville. This is a rare opportunity to repurpose an existing building to conform it the City's guidelines for development and to turn it into a mixed use 21st Century activity center. First you need a building that is ready to be repurposed. Secondly, you have to have a landlord who can work with the tenants so they can relocate. Third thing you need is an owner and developer who has a sustainable vision for how this building will be repurposed and redeveloped. Finally, you need a developer and owner who has the ability to track the investment. Not one dollar of public money in this application. This is a significant development. Significant development in urban areas attract a lot of public comment about the design. There is no organized opposition to this development. There is no plausible reason to deny this project and to deny the citizens the opportunity to have a different looking BB&T Building that is going to be a mixed-use development that is a 21st Century activity center. The application proposes a mixture of uses in the Central Business District, and the Code says the Central Business District is the primary retail, hotel, cultural and entertainment center. This is a quality application and an application that is very suitable for its surroundings. This application satisfies every applicable City plan and policy. And, the application satisfies every technical standard except for the one modification explained by Mr. Glines, noting it is requested to make it compliant with some of the other City's guidelines. He asked for Council's support.

Mr. Erik Rowan, Vice-President of Development for McKibbon Hotel Group Tower LLC, spoke to the design elements. A couple noteworthy items include (1) the developer is investing an estimated $750,000 towards construction improvements in the area surrounding the building the public realm. They will be replacing and widening sidewalks on all sides of the building, redesigning the entire plaza fronting North Pack Square. Removing the existing large planters at North Pack Square and replacing them with small sloped landscaped beds, which will create a more open inviting softer connection to the elevated outdoor dining area, activating the sidewalk. They will be adding additional outdoor dining that will overlook both College Street and Patton Avenue for additional street front activation. At the corner of College and North Pack Square, they will be cutting back the tall existing retaining wall and incorporating a new curbed terrace wall. At College Street and North Pack Square, the new extended sidewalk bulb-out will open up

the pedestrian zone. They have added over 1,600 square feet of retail with storefront on College Street at the basement level. They will narrow the loading bay on College Street and screening it with a decorative gate. On College Street they will be adding a pedestrian green stair which leads to the hotel arrival plaza above. On Lexington they will be widening the sidewalk, which will be extended onto property owned by the developer. They have added an additional public area at the corner of Lexington and Patton for an art wall with local art, and widen the sidewalk. The new parking deck will have reserved spaces for the residences of the condos at the two lower levels with the hotel arrival and check-in parking at the top level. Hotel guests will have valet and self-parking in the parking deck across the street. When the projects are completed, even at the peak occupancy there will be about 100 additional parking spaces available for the public at night and as many as 200 parking spaces available during the day. Between the two projects they will be building nearly 400 new parking spaces with private funds. They spent a tremendous amount of time evaluating how best to create an iconic high quality design for this very visible building, and outlined the many important issues the team focused on.

Mr. John McKibbon, applicant, said that he will pay the living wage for their full-time employees on this project. They also have a 401-K plan that they match profit sharing and many other benefits. In his Aloft Hotel they have been paying a living wage there for almost a year. We will support the local art scene, as we have done so in the Aloft Hotel. They will not have any national chains, but will have local or regional tenants, noting they have two local businesses in the Aloft Hotel. They will hire local and will use transit. He was not aware of the Passport Program and this might work. Also, the car sharing program is something they want to do and they will reserve a spot in the garage for the car. He reiterated comments made by Mr. Rowan about some of the design elements. Affordable housing is a real community problem. To help in this effort he is committing $250,000 to the Housing Trust Fund. He will also work with Mountain Housing Opportunities and others to provide cash and great development expertise. Regarding the occupancy tax, he currently serves on the Tourism Development Authority Board (TDA) has has pushed to get the majority of the tax for infrastructure (currently 75% goes to marketing and 25% goes for capital projects). He will support working with the state to modify how the tax is structured and distributed. He said the TDA has recently committed $3.8 to City projects for greenways, soccer fields, Nature Center and museums. These projects will be used more by locals than by tourists, and that's the direction we want to spend more money on. He asked for the Council to weigh all the issues and make a decision that will be good for our community.

Mr. Glen Wilcox, co-partner with Mr. McKibbon, spoke in support of the project. When the building was built in 1965, Wilcox Travel was one of the first tenants in the building. Twenty-eight years ago the owners of the building were in bankruptcy. He and a few other investors borrowed the money to buy the building to save it. He has tried to save and give new life to this building. In 2014 he and Mr. McKibbon became sole owners of the building. He urged Council to support the project, noting that the majority of the tenants have moved out of the building and it will be empty soon. With Council's approval they can continue with their expensive redevelopment plans for a beautiful and vibrant community.

Mayor Manheimer opened the public hearing at 7:29 p.m.

The following individuals spoke in support of this conditional zoning for various reasons, some being, but are not limited to: this project will restore beauty to a blighted skyscraper; supports the public realm with active people uses including housing, retail, meeting space, and hotel; rooftop decorations are attractive and will be seen from near and far; this project brings new private investment and will pay a large amount of taxes; will provide funds for affordable housing, pay living wages for full-time employees, support local businesses and local artists, and will upfit an existing building; this is a good example of what the private sector can do to help our City; the developer has met with the Downtown Commission Design Review Team and has listened and been cooperative ending up with a better design; the building will be given new life; building will include meeting spaces which are needed in the downtown area; there is a high demand for condos and almost no supply; developer supports the students in the A-B Tech

Culinary Arts Program by offering scholarships, hiring interns, hiring part-time employees, hires graduates to salary management positions, etc.; happy about living wage for full-time employees, but part-time employees should be paid a living wage as well; wider sidewalk areas will be potential places for buskers; and developer has a proven commitment to local arts:

Mr. David Nutter, Asheville resident
Ms. Kim MacQueen, Asheville resident and downtown business owner
Mr. Pat Whalen, President of Public Interest Projects
Mr. Byron Greiner, Downtown Commission member
Mr. Walter Rapetski, Instructor at A-B Tech for the Culinary Arts Program
Mr. Andrew Fletcher
Mr. Timothy Sadler
Ms. Elizabeth Button, owner of Heirloom Hospitality Group
Mr. Kevin Westmoreland, local small business owner
Ms. Liz Barr, art consultant

The following individuals spoke in opposition of the condition zoning for various reasons, some being, but are not limited to: people do not want any more hotels; hotels and condos will drive up land prices and rent; hotels pay low wages; this project will widen the gap between the rich and poor; every hotel built adds more traffic and pedestrian congestion and places additional burdens on our infrastructure; the hotel industry has exploited on the backs of people who live and work; downtown needs to be a place where young people have a stake, not just in hospitality or restaurants; and part-time workers need a living wage too:

Ms. Linda Brown, resident on Grove Street, said that
Mr. Scott Owen
A young college graduate who works many odd jobs to make ends meet

Mayor Manheimer closed the public hearing at 8:05 p.m.

In response to Councilwoman Mayfield, Mr. Rowan said that all windows will be replaced with insulated glass.

Vice-Mayor Wisler said that this is an amazing reuse of an unattractive building. Even though the City Council Planning & Economic Development Committee has been tasked with reviewing some of their rules, this developer has proceeded under the existing rules and should be allowed to proceed under those existing rules. She was pleased that Mr. McKibbon has agreed to start the conversation regarding the change in occupancy tax redistribution. She will be supportive of this conditional zoning request.

Councilman Haynes acknowledged the extent to which Mr. McKibbon has compromised and ultimately presented a good project. It aims to help local businesses and artists, commits to paying a living wage, though only to full-time employees, which troubles him, and supports the goals of increasing funding for affordable housing. However, the majority opinion he has heard from his constituents on this issue urges him to vote against it on the grounds of its contribution to the unnecessary growth of the hotel industry at a time when downtown already seems overrun. He promised his constituents that he would listen to them and on this issue he will honor that promise by voting against this conditional zoning.

Councilwoman Mayfield said her thinking around this breaks down into three categories: First - process. The City has set up processes around plans and commissions/boards that consider these projects before they get to Council. The boards/commissions that have considered this have made recommendations to approve, virtually unanimous, and Council should have a good reason to disagree with those recommendations. Second - land use and smart growth aspects. This kind of mixed use building in our downtown core is the exact kind of building that will reduce traffic and allow people to talk and take transit. That is certainly true for

visitors to our town who would otherwise be staying out on Tunnel Road or Patton Avenue. Third - occupancy tax. He has heard from constituents not to approve any hotels until the occupancy tax is changed. She is the Council liaison to the TDA Board and she will try to address this problem. The tax is a legislative change. We need to build a broader community consensus around what needs to happen with that money and be ready in 2017. She appreciated the applicant's willingness to support those efforts. The City will need a lot of allies to make this happen. Fourth - we have to have a legal basis on which to deny approvals for conditional zonings. The fact that the occupancy tax structure has not changed is not a legal basis which we can deny this project. While she appreciates all of the concerns, on balance, the commitment around living wages, support of local business, affordable housing and transit, she thinks this is an opportunity to set a new bar ("McKibbon Standard") for future hotel owners. She will support the project.

Councilman Bothwell has been critical about the room tax for a long time, and we need to find a legislative solution to that redistribution formula. The main objection he has heard is that it's a hotel. He felt that if this was not a hotel and everything else was going to happen to this building, the City would be cheering for this project. He felt this is an amazing project.

Mayor Manheimer said that one way to create pressure businesses to pay better wages is for the City to pay our employees a living wage, which we do, and for developers like Mr. McKibbon to lead in the effort. She felt that as this Council looks at moving towards review of new hotel applications in our City that we will be thinking about the bar Mr. McKibbon has raised and it sets a stage for a new way to view the new growth that we are experiencing. She appreciated Mr. McKibbon's leadership and would support this project.

Councilman Smith said that with Mr. McKibbon's declarations of principles that we are seeing a new day in Asheville. He appreciated that Mr. McKibbon has heard what the people of Asheville are asking for from its industry leaders, and that is the importance of paying a living wage and preferring our local artists and businesses. He was pleased that the developer is willing to use the Passport Program to increase transit usage and decrease traffic. He felt that with the McKibbon Standard, and his willingness to stand and advocate for a change to the distribution of the occupancy tax which is so valuable and important, he would support this project.

Councilman Bothwell moved to approve the Level III conditional zoning request for One West Pack Square and 11 Patton Avenue from Central Business District (CBD) to Central Business District Conditional Zone (CBD CZ) with the submitted conditions, site plan and elevations, and find that the request is reasonable, is in the public interest and is consistent with the Comprehensive Plan and other adopted plans in the following ways: (1) new investment in Downtown Asheville is appropriate and encouraged; (2) the proposal will add visual interest to the downtown skyline; and (3) public infrastructure is enhanced with new sidewalks and streetscape improvements. This motion was seconded by Vice-Mayor Wisler and carried on a 5-2 vote, with Councilman Hayes and Councilman Young voting "no"

ORDINANCE BOOK NO. 30 - PAGE 210

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

BOARDS AND COMMISSIONS

Vice-Mayor Wisler said that the applicant pool on these vacancies has been outstanding and she appreciated everyone's effort in stepping forward to help the community.

Councilman Bothwell urged residents to not only apply for boards/commissions that have current vacancies, but to review the City's Talent Scout and apply for a board/commission that you have interest in.

Regarding the Affordable Housing Advisory Committee, the following individuals applied for the vacancies: Eric McDaniel, Kama Ward, Zachary Eden, Sage Turner, Laura Collins, Charlene Jones, Arthur Myers, Emily Coleman-Wolf, Barry Bialik, Richard Fort, John Brigham, Rita Yerby, Jo Ikelheimer, Mark Collins and Amy Murphy-Nugen. Councilman Bothwell moved to appoint Jo Ikelheimer and interview Barry Bialik, Laura Collins and Richard Fort. This motion was seconded by Councilman Smith and carried unanimously.

Regarding the Downtown Commission, the following individuals applied for the vacancy: John Menkes, Constance Richards, Drea Jackson, Audra Gaiziunas, Rae Geoffrey, Kelly Prime, Carter B. Webb, Sage Turner, Mike Marcus, Franzi Charen, Andrew Fletcher, Taryn Gentry, John Monroe and John Kloeckner. Vice-Mayor Wisler moved to reappoint Dane Barrager, Brent Campbell and Pamela Winkler and interview Franzi Charen, Sage Turner, Andrew Fletcher and Mike Marcus. This motion was seconded by Councilman Young and carried unanimously.

Regarding the HUB Community & Economic Development Alliance, the following individuals applied for the vacancy: Ted Figura, Hunter Goosman, Ed Manning, Grant Millin, Kendra Sherrod, Cheri Torres, Brooke Brownlow, Rebecca Crandall, Rich Lee, Toya Hauf, Rita Yerby and Mark Collins. Councilman Young asked that Ms. Hauf's application be forwarded to the County for consideration as she is a County resident. Vice-Mayor Wisler moved to interview Ted Figura, Brooke Brownlow, Mark Collins and Rich Lee. This motion was seconded by Councilman Bothwell and carried unanimously.

Regarding the Multimodal Transportation Commission, the following individuals applied for the vacancy: Mike Zukoski, Kelly Prime, Meredith Gregory, Eric Workman, Richard Rozzelle, Keaton Edwards, Seth Connelly, Michael Speciale and Devin Clancy. Due to some confusion with the application process, Vice-Mayor Wisler moved to advertise this vacancy for a person with a demonstrated transit interest. This motion was seconded by Councilwoman Mayfield and carried unanimously.

RESOLUTION NO. 16-18 - RESOLUTION APPOINTING A MEMBER TO THE BOARD OF ADJUSTMENT

Vice-Mayor Wisler, Chair of the Boards & Commissions Committee, said that the term to Christine Longoria, alternate member on the Board of Adjustment, expires on January 21, 2016.

The following individuals have applied for the vacancy: Eric Workman and Paul Wilczynski.

Vice-Mayor Wisler moved to reappoint Christine Longoria as an alternate member to the Board of Adjustment, to serve a three year term, term to expire January 21, 2019, or until her successor has been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 365

RESOLUTION NO. 16-19 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

Vice-Mayor Wisler, Chair of the Boards & Commissions Committee, said that the term to Kathryn Liss, as a member on the Asheville-Buncombe Community Relations Council, expired on December 231, 2015.

The following individuals have applied for the vacancy: Roberto Hess, Dana Blake, Katie Latino, Eric McDaniel, Toya Hauf, Paul Jelenchick, Alfred Kalahati, Lauren Pittman and Ben Scales. Councilman Young asked that Ms. Hauf's application be forwarded to the County for consideration as she is a County resident.

Vice-Mayor Wisler moved to reappoint Kathryn Liss to the Asheville-Buncombe Community Relations Council, to serve a three year term, term to expire December 31, 2018, or until her successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 366

RESOLUTION NO. 16-20 - RESOLUTION APPOINTING MEMBERS TO THE SUSTAINABILITY ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT

Vice-Mayor Wisler, Chair of the Boards & Commissions Committee, said that the terms of Lawrence Pittman, Torin Kexel, and Josh O'Conner, as members on the Sustainability Advisory Committee on Energy & the Environment (SACEE) expired on December 31, 2015. In addition, Katie Bray has resigned as a member, thus leaving an unexpired term until December 31, 2017.

The following individuals have applied for the vacancy: Philip Pritchard, Julie Loveless, Jackson Tierney, Jeremiah Mattysse, Erin Singer McCombs, Hannah Furgiuele, Grant Millin, Sam McLamb, Geoffrey Habron, Eric Workman, Rich Lee, Kendra Sherrod, Brad Rouse, Keith McDade, Amanda Fairley, April Brown and Emily Boyd.

Vice-Mayor Wisler moved to (1) reappoint Lawrence Pittman and Josh O'Conner, to each serve a an additional three-year term respectively, terms to expire December 31, 2018, or until their successors have been appointed; (2) appoint Geoffrey Habron to serve the unexpired term of Ms. Bray, term to expire December 31, 2017, or until his successor has been appointed; and (3) appoint Keith McDade to a three-year term, term to expire December 31, 2018, or until his successor has been appointed. This motion was seconded by Councilman Young and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 367

RESOLUTION NO. 16-21 - RESOLUTION APPOINTING A MEMBER TO THE FIREMEN'S RELIEF FUND

Vice-Mayor Wisler, Chair of the Boards & Commissions Committee, said that the term of Pat Leckey, as a member on the Firemen's Relief Fund, expired on January 1, 2016.

The following individual applied for the vacancy: Alfred Kalahati.

Vice-Mayor Wisler moved to appoint Alfred Kalahati to the Firemen's Relief Fund, to serve a two-year term, term to expire January 1, 2018, or until his successor has been appointed. This motion was seconded by Councilman Haynes and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 368

RESOLUTION NO. 16-22 - RESOLUTION APPOINTING A MEMBER TO THE HOMELESS INITIATIVE ADVISORY COMMITTEE

Vice-Mayor Wisler, Chair of the Boards & Commissions Committee, said that the term of Celeste Collins as a member on the Homeless Initiative Advisory Committee (HIAC), expired on November 1, 2015.

The following individuals have applied for the vacancy: Eric McDaniel, Charlene Jones, Arthur Myers, Seth Connelly, Dale Davidson, Sarah Lancaster, Emily Whitmire, Amy Upham, John Sterling, John Kloeckner and R. Scott Owen.

Vice-Mayor Wisler moved to appoint Amy Upham to serve as a member of the Homeless Initiative Advisory Committee, to serve a three-year term, term to expire November 1, 2018, or until her successor has been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 – PAGE 369

RESOLUTION NO. 16-23 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE AREA RIVERFRONT REDEVELOPMENT COMMISSION

Vice-Mayor Wisler, Chair of the Boards & Commissions Committee, said that Ms. Pattiy Torno (representing a design professional) has resigned as a member of the Asheville Area Riverfront Redevelopment Commission, thus leaving an unexpired term until January 1, 2016.

The following individuals have applied for the vacancy: John Brigham, Jane Mathews and Steve Winter.

Vice-Mayor Wisler moved to appoint Jane Mathews as a member of the Asheville Area Riverfront Redevelopment Commission (representing the design professional), to fill the unexpired term of Ms. Torno, term to expire January 1, 2019, or until her successor has been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 370

RESOLUTION NO. 16-24 - RESOLUTION APPOINTING MEMBERS TO THE TREE COMMISSION

Vice-Mayor Wisler, Chair of the Boards & Commissions Committee, said that the terms of Stephen Hendricks and Leslee Reiter, as members on the Tree Commission, expired on December 31, 2015.

The following individuals have applied for the vacancies: Carl Nyberg, Diane Hillgrove, Sara Surabian and John Brigham.

Vice-Mayor Wisler moved to (1) reappoint Stephen Hendricks to serve a three year term, term to expire December 31, 2018, or until his successor has been appointed; and (2) appoint Carl Nyberg to serve a three year term, term to expire December 31, 2018, or until his successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 37 - PAGE 371

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Timothy Sadler questioned Council's reappointment process.

Mr. Andrew Fletcher urged for accurate information on the City's website.

Ms. Imke and Ms. Inge Durre asked for City Council's support of a preservation initiative to preserve the small urban forest located on 11 Collier Avenue. Ms. Inge Durre explained the proposal in detail which as to propose a land swap of the Collier Avenue tract for 33/35 Page Avenue, subject to various conditions with the transfer to happen no later than April 1, 2016,

subject to appraisals of both parcels to each party's satisfaction. All of Council noted this is a worthy cause; however, after a brief discussion, it was the consensus of Council that due to a variety of reasons, i.e., deadline of April 1, challenge of private fundraising, other worthy neighborhood requests, etc.), that no more staff time would be devoted to this effort.

Closed Session

At 9:08 p.m., Councilman Young moved to go into closed session for the following reasons: (1) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(3). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved. The statutory authorization is contained in N.C. Gen. Stat. § 143-318.11(a)(3). This motion was seconded by Vice-Mayor Wisler and carried unanimously.

At 9:21 p.m., Councilman Smith moved to come out of closed session. This motion was seconded by Vice-Mayor Wisler and carried unanimously.

VIII. ADJOURNMENT:

Vice-Mayor Wisler adjourned the meeting at 9:21 p.m.

Magdalen Burleson
CITY CLERK

Esther E. Manheimer
MAYOR

Tuesday – January 26, 2016 - 5:00 p.m.

Regular Meeting

Present: Mayor Esther E. Manheimer, Presiding; Vice-Mayor Gwen C. Wisler; Councilman Cecil Bothwell; Councilman Brian D. Haynes; Councilwoman Julie V. Mayfield; Councilman Gordon D. Smith; Councilman W. Keith Young; City Manager Gary W. Jackson; City Attorney Robin T. Currin; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Manheimer led City Council in the Pledge of Allegiance.

On behalf of City Council, Mayor Manheimer thanked City staff for their hard work and dedication during the recent snow storm.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Councilman Young, Consent Agenda Item "I" was removed from the Consent Agenda for discussion and/or individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 12, 2016

B. RESOLUTION NO. 16-25 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT AND SIGN AN EASEMENT AT 152 SHELBURNE ROAD FOR THE HOMINY CREEK GREENWAY

Summary: The consideration of a resolution authorizing the Mayor to accept a greenway easement that was granted by Ms. Jessie M. Corpening of Shelburne Road in Asheville.

In 2011, the City of Asheville, in partnership with Buncombe County and local non-profits acquired approximately 10 acres of property formerly owned by Sue B. Waller heirs along Hominy Creek. This tract of land is an important connection of the Hominy Creek Greenway that runs from Carrier Park to the county park nearby. A well-worn path along the creek shows how popular this area is with the public. At this time, the City is designing improvements to the property, such as paving a permanent greenway path to comply with the Americans with Disabilities Act and to facilitate regular maintenance. As shown on the attached map, the property narrows at a bend in the creek and in order to accommodate the future greenway trail, the City needed an easement from the adjacent private property owner, Jessie Corpening.

Ms. Corpening has agreed to grant a permanent greenway easement on the creek side of her property (PIN #9628-90-2700) at 152 Shelburne Road to the City of Asheville. The easement contains 4,484 square feet or 0.10 acres and varies in width from 60 feet to 0 feet. Staff requests that Council authorize the Mayor to formally accept the easement dedication for the purpose of implementing the Hominy Creek Greenway

Pros:

- Accepting the easement will provide legal access to the land needed for the Hominy Creek Greenway.
- Ms. Corpening donated the easement to the City.

Cons:

- None noted.

No monetary consideration involved in this conveyance.

City staff recommends City Council approve a resolution authorizing the Mayor to accept and sign a 4,484 square foot easement on private property for purposes of continuing the Hominy Creek Greenway.

RESOLUTION BOOK NO. 37 - PAGE 372

C. RESOLUTION NO. 16-26 - RESOLUTION AUTHORIZING THE CITY MANAGER TO CONVEY A SANITARY SEWER EASEMENT TO THE METROPOLITAN SEWERAGE DISTRICT OF BUNCOMBE COUNTY FOR THE BYPASS PUMP STAGING AREA AT AMBOY ROAD AND RIVERVIEW DRIVE PARALLEL TO THE FRENCH BROAD RIVER

Summary: The consideration of a resolution authorizing the City Manager to convey a sanitary sewer easement to the Metropolitan Sewerage District of Buncombe County (MSD) for the Bypass Pump Staging Area at Amboy Road and Riverview Drive parallel to the French Broad River.

The City of Asheville owns two parks near the intersection of Amboy Road and the Carrier Bridge, known as the Amboy Road River Park and the French Broad River Park. Within the past few years, the City acquired two small parcels of property to connect these parks under the Carrier Bridge via the French Broad River Greenway. An existing sewer line runs across these two parcels, in parallel to the French Broad River and the City's greenway. At this time, MSD has approached the City with a request to obtain an easement on these two parcels in order to install a bypass pump staging area to serve MSD's sewer infrastructure.

Directly adjacent to the City's French Broad River Park, MSD operates a main pump station that receives wastewater from West Asheville. This station pumps 8 billion gallons per day from the west side of the French Broad River through a 24 inch force main to a gravity line on the east side of the river towards MSD's Woodfin plant. With this easement request, MSD intends to develop a bypass pump staging area so that periodically they may take the main station offline as needed. In the event of an emergency, or for the purposes of future maintenance, a bypass pump station will allow MSD to divert the wastewater from the main station while repairs or improvements are completed. Having a backup station further insures that a direct spill into the river does not occur by providing critical backup infrastructure in case of failure at the main station.

MSD is requesting an easement to install a 19 ' x 12' concrete pad on the City's property to operate the emergency bypass pump. The physical pump equipment will not be installed onsite, but will be transported to the site as needed. The concrete pad and a connection to the existing sewer line are the only improvements that MSD needs to perform. The MSD design engineer has conducted a site visit with Al Kopf of Parks and Recreation and Lucy Crown, the Greenway Coordinator in Transportation Department. City staff supports the need for the project and do not see any conflicts with the greenway after construction is complete.

In addition, MSD is also requesting a permanent easement along its existing sewer line that is primarily 12 ½ feet on either side of the line. Only permanent easement is being requested and the total area including the line and the staging pad is approximately 8,342.5 total square feet. Refer to the attached plat, maps and photos of the bypass pump for additional details. The French Broad River Greenway will only be disrupted during installation of the

improvements. MSD's construction is planned for the early 2016 and should not take longer than ten days to two weeks.

Pros:

- Granting of the easement will allow MSD to install redundant systems that would operate in case of emergency or if the nearby pump station needed to be taken off line for scheduled maintenance.
- Granting of the easement will not permanently interfere with the greenway planned for the area.
- MSD has agreed to remove a straight pipe to the river that is sealed but looks unsightly.
- This project reduces the likelihood that a wastewater spill would affect public health and/or impact the environment.

Cons:

- Greenway would be temporarily impacted during construction of the concrete pad and pipe intake.

No monetary consideration involved in this conveyance.

City staff recommends City Council approve a resolution authorizing the City Manager to convey an 8,342.5 square foot permanent easement to MSD across two city owned parcels at Amboy Road and Riverview Drive and Carrier Bridge.

RESOLUTION BOOK NO. 37 - PAGE 373

D. RESOLUTION NO. 16-27 - RESOLUTION AUTHORIZING THE CITY MANAGER TO CONVEY A CONSERVATION EASEMENT ALONG THE FRENCH BROAD RIVER LOCATED AT THE ASHEVILLE REGIONAL AIRPORT TO THE CAROLINA MOUNTAIN LAND CONSERVANCY FOR CONSERVATION AND GREENWAY PURPOSES

Summary: The consideration of a resolution authorizing the City Manager to convey a conservation and greenway easement on 16.50+/- acres of real property along the French Broad River located at the Asheville Regional Airport to the Carolina Mountain Land Conservancy (CMLC) for conservation and greenway purposes.

The City of Asheville holds title to the real property at the Asheville Regional Airport, and leases that property to the Asheville Regional Airport Authority (Airport). In order to convey any interest in real property at this location, the City of Asheville must sign the deeds or easements of conveyance. In turn, the Federal Aviation Administration (FAA)—in consultation with the Airport--must "release" the property from FAA use restrictions.

Airport Authority staff has been working with the CMLC to establish conservation and greenway easements on airport property along the French Broad River. The airport property that is being recommended for the conservation easement is within the flood plain/flood way of the French Broad River and therefore would have limited development possibilities in the future. The establishment of the greenway easements on airport property would help to tie together other property along the French Broad River to enable the development of a future trail system.

The CMLC proposes to purchase conservation and greenway easements of approximately 16.50+/- acres of airport property on the French Broad River. In accordance with FAA regulations, the easements must be purchased for fair market value. A grant in the amount of $107,000 has been awarded through the NC Clean Water Management Trust Fund to the CMLC for the acquisition of conservation and greenway easements on Airport property.

Because the airport property was originally acquired with FAA financial assistance, all financial proceeds associated with the real property are subject to FAA regulations governing the allocation of these proceeds. This FAA regulation states that proceeds of sale (or granting of easement in this case) must be delivered to FAA as a reimbursement for the initial acquisition of said property – or the proceeds must be utilized for airport purposes in the same proportion as the initial contribution to the purchase price. This being the case, the payment will be handled in this manner and the City will receive no financial share in this payment.

This request was reviewed and approved by Asheville City Council in September of 2014 for a total of 8.3 acres of easement area. Since then, more detailed surveying has been completed and the size of the easement has grown to 16.50+/- acres, and this substantial change requires Council approval.

Pro:

- This conservation and greenway easement will protect public lands with the floodway and support a future trail system along the French Broad River.

Con:

- None.

There is no direct financial impact to the City. All financial proceeds associated with the conservation easement are subject to FAA regulations governing the allocation of these proceeds; specifically, proceeds of sale must be delivered to FAA as a reimbursement for the initial acquisition of said property and/or must be utilized for airport purposes.

City staff recommends adoption of the resolution to convey an 16.50+/- acre conservation and greenway easement at the Asheville Regional Airport to the Carolina Mountain Land Conservancy.

RESOLUTION BOOK NO. 37 - PAGE 374

E. MOTION TO ADOPT THE FINDINGS OF FACT AND CONCLUSIONS OF LAW FOR THE CONDITIONAL USE PERMIT FOR GIVENS CREEKSIDE, PHASE 3

Summary: This public hearing was held on January 12, 2016.

F. MOTION ADOPTING THE 2016-17 BUDGET CALENDAR

Summary: The consideration of a motion adopting the Fiscal Year 2016/2017 Budget Calendar.

As a part of the Fiscal year 2016/2017 Operating and Capital Budgets development process which began internally in the Fall of 2015, staff is proposing a budget calendar which encompasses the following:

- series of Budget Worksessions with City Council beginning in March 2016,
- formal presentation of the City Manager's Proposed Budget on May 10, 2016, and
- eventual budget adoption on June 14, 2016.

Staff recommends that City Council review the proposed Fiscal Year 2016/2017 Budget Calendar, make changes as needed, and approve the motion to adopt the Fiscal Year 2016/2017 Budget Calendar.

G. ORDINANCE NO. 4477 - ORDINANCE TO ENACT A 25 MPH SPEED LIMIT ON CALEDONIA ROAD FROM BILTMORE AVENUE TO SWANNANOA RIVER ROAD, CROWELL FARMS DRIVE FROM WEST OAKVIEW ROAD TO WEST POINTE DRIVE, HAMPTON STREET FROM CARIBOU ROAD TO BROOKLYN ROAD, AND SHERWOOD ROAD FROM FOREST HILL DRIVE TO THE END OF CITY MAINTENANCE

Summary: The consideration of an ordinance to enact a 25 mph speed limit on Caledonia Road from Biltmore Avenue to Swannanoa River Road, Crowell Farms Drive from West Oakview Road to West Pointe Drive, Hampton Street from Caribou Road to Brooklyn Road, and Sherwood Road from Forest Hill Drive to the end of city maintenance.

According to state law (NCGS # 20-141), the statutory speed limit in North Carolina is 35 mph inside municipal corporate limits for all vehicles and 55 mph outside municipal corporate limits for all vehicles except for school buses and school activity buses.

Furthermore, local authorities may authorize by ordinance higher speeds or lower speeds than the statutory 35 mph speed limit on locally-maintained streets provided that the higher speed limit cannot exceed 55 mph. Speed limits authorized by local authorities are effective when the appropriate signs are erected.

City staff recently completed traffic engineering investigations and determined that a 25 mph speed limit would be reasonable and safe on Caledonia Road from Biltmore Avenue to Swannanoa River Road, Crowell Farms Drive from West Oakview Road to West Pointe Drive, Hampton Street from Caribou Road to Brooklyn Road, and Sherwood Road from Forest Hill Drive to the end of city maintenance.

Pros:

- City staff has been able to respond favorably to citizen's requests.
- The new speed limits will be consistent with roads of like character and design.
- Based on the 85th percentile speeds, most drivers would adhere to the recommended speed limits on these roads.

Cons:

- The initial cost to install the appropriate speed limit signs is about $500.00.
- Typically, speed limit signs have a serviceable life of five to seven years.

The initial cost to install the appropriate speed limit signs is about $500 and is included in the current operating budget for the Transportation Department.

City staff recommends that City Council approve an ordinance enacting a 25 mph speed limit on Caledonia Road from Biltmore Avenue to Swannanoa River Road, Crowell Farms Drive from West Oakview Road to West Pointe Drive, Hampton Street from Caribou Road to Brooklyn Road, and Sherwood Road from Forest Hill Drive to the end of city maintenance.

ORDINANCE BOOK NO. 30 - PAGE 219

H. RESOLUTION NO. 16-28 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A GIFT MEMORANDUM OF UNDERSTANDING AND ACCEPT A DONATION FO $250,000 FROM THE MCKIBBON HOTEL GROUP, INC. FOR THE CITY'S AFFORDABLE HOUSING TRUST FUND

Summary: The consideration of a resolution authorizing the City Manager to execute a Gift MOU and accept a donation of $250,000 from the McKibbon Hotel Group, Inc. for the City's Affordable Housing Trust Fund.
